There are in the town three places of worship belonging to the Established church, one Presbyterian mecting house, one Methodist, and several R. Catholic chapels. Several of these are handsoma buildings, particularly the parish church of St. Peter's, and tne R. Catholic chapel of the same name, the former being an elegant Grecian, and the latter a spacious Gothic edifice. The other principal public buildings are the townhall, corn-market, Smith's endowed school-house, and the poorhouse. It has several schools, a few minor charities, a newsroom, and a mechanics' institute.

Flax and cotton spinning are carried on in Drogheda or its immediate vicinity, to a very considerable extent, there being several large mills on the banks of the Boyne near the town. There are also an extensive foundry, and steam-engine manufactory, two breweries, a number of tanneries, several soap works, and a small shipbuilding yard. Drogheda carries on, likewise, a pretty large export trade, chiefly with Liverpool, in which several first rate steamers ply. The exports consist principally of corn, meal, flour, cattle, provisions, linen, \&c.; imports of coal, manufactured goods, and colonial produce. The number of sailing vessels belonging to the port, in 1848, was 46 , tonn. 4868 ; stcamers, six, 1585 tons. The harbour of Drogheda is formed by the waters of the Boyno 4 m . from the sea, and extends about half a mile below the bridge, with 16 to 18 ft . water abreast the quays. At the entrance of the harbour are three lighthouses. The navigation of the Boyne for barges of 50 tons extends inland to Navan, 19 m .

Drogheda was a principal rendezvons for the forces which were so frequently required in Ulster, between the 14 th and 17 th centuries. On the breaking out of the rebellion in 1641 it was unsuccessfully besieged by the rebels; in 1649 it was stormed by Cromwell and its garrison put to the sword; and in 1690 it resisted the attack of a division of King William's army; within 2 m . of its walls was fought the famous 'Battle of the Boyne.' Drogheda was also the scat of many Irish Parliaments at various periods, particnlarly during the 15th century. Amongst the remarkable architectural antiquities with which this ancient town and its vicinity abound, are Magdalene's steeple and Lawrence gate. The first is all that remains of a Dominican convent, founded in 1224. It is a lofty square structure, of light and elegant proportions, built upon, and entirely supported by a noble pointed Gothic arch, and presenting, from its present isolated position, a very singular and striking appearance. The second, Lawrence gate, is the only perfect specimen remaining of the ancient fortifications of the town; it consists of two lofty round towers, with the low gateway between, in fine preservation. Pop. (1841), 17,365.-(Local Correspondent.)

DROHITCHIN, or Drohicyn, a tn. Russian Poland, prov. of, and 55 m . S.S.W. Bialystock, cap. circle of same name, r. bank, Bug. It contains four churches, a Piarist college, with a gymnasium; two monasteries, and a nunnery. Pop. 984.-The CIRCLE, area, 800 geo. sq. m., is watered by the Bug and the Nurzch, is well wooded, and has much excellent arable and meadow land. Pop. 49,651.

DROHOBYCZ, a tn. Austria, Galicia, circle, Sambor, cap. lordship of same name, on the Tysminnica, 41 m. S.S.W. Lemberg. It consists of the town proper and eight suburbs; contains two churches, one the handsomest in the country, a synagogue, Basilian monastery, castle, and high school; and has an important trade, chiefly with IIungary, in corn, leather, linen, earthenware, and particularly salt, obtained from salt springs in the vicinity. Pop. 7206.

DROITTWICH, a parl. bor. and market tn. England, co. of, and 6 m . N.E. W orcester, agreeably situate in a narrow valley, on the Salwarp. It consists of five principal strects, well
kept and lighted with gas, and has three Established churches, a chapel of ease, and places of worship for Independents and Wesleyan Methodists; a charity school for 50 boys and 50 girls, several daily and national schools, an infant and a ragged school, and an hospital for 36 old men and women, founded in 1686; and a lunatic asylum. The principal trade of the town consists in the manufacture and export of salt obtained from brine wells sunk in the middle of the town. The brine contains 33 per cent. of salt, which is obtained by evaporation. About 1000 tons of salt are manufactured weckly, the greater part of which is shipped for Gloucester and other places, by a canal 5 or 6 m . long, which communicates with the Severn, and is navigable for vessels of 60 tons burthen. Brine-baths, established here several years ago, have proved highly beneficial, especially to persons afflicted with gout and rheumatism. The brine springs were anciently called wiches (Saxon), whence the name of the town; the prefix Droitright or legal-being supposed to refer to some exclusive privilege for the manufacture of salt obtained by the inhabitants. Salt has been manufactured from them for upwards of 1000 years, as appears from the grants of different Saxon kings to the church of Worcester. Droitwich is supposed to have been the Salince of the Romans, and tesselated pavement, and other antique Roman remains, are occasionally discovered. It sends a member to Parliament. Registered electors (1850), 338. Market-day, Friday. The Droitwich station of the Midland Railway is $1 \frac{1}{2} \mathrm{~m}$. from the town. Pop. (1841), 2832. -(Local Correspondent.)

DROLSHAGEN, a tn. Prussia, prov. Westphalia, gov. Arnsberg, near the source of the Bigge, 35 m . E.N.E. Cologne. It contains a R. Catholic parish church, and has several tanneries, and three annual fairs. Pop. 497.

DROM, par. Irel. Tipperary ; 4480 ac. Pop. 2025.
DROMAGH, a vil. Ireland, co. Cork, $5 \frac{1}{2} \mathrm{~m}$. S.W. Kanturk, with extensive collieries in the vicinity. Fairs in May, August, and November.

DROMAHAIRE, or Drumahaire, a market and post tn . Ireland, co. Leitrim, $8 \mathrm{~m} . \mathrm{S} . E$. Sligo, picturesquely situate on the Bonnet, containing the ruins of an old castle, built by one of the O'Rorke's, an extensive corn and flour mill, and a school. The parish church is contiguous to the town. Market on Thursday, and fairs monthly. Trade, in grain, considerable. Pop. 348.

DROMDOW NEY, par. Irel. Cork; 659 ac. Pop. 186.
DROME.-1, [anc. Druna], A river, France, which has its course wholly within the department to which it gives its name, and which it crosses E. to W. near the centre; rising near the frontiers of Hautes-Alpes, flowing N.W., past Die, round a ridge of hills, then first S., and afterwards W. by N. to its embouchure in the Rhone, 12 m . S. by W. Valence. Its total course is 68 m ., through some most wild and picturesque scenery, and fertile valleys; it is suitable for flotation nearly throughout, and considerable quantities of timber, from the forests on its banks, are transported along it.-2, A small river, dep. Calvados, which falls into the British Channel, 21 m. N. W. Caen, after a N. course of 24 m .

DROME, a dep. France, bounded, N. and N.E. by Isère, E. Hautes-Alpes, S. Basses-Alpes and Vaucluse, and W. by the Rhone, forming the boundary between it and Ardèche; between lat. $44^{\circ} 7^{\prime}$ and $45^{\circ} 20^{\prime} \mathrm{N} . ;$ and lon. $4^{\circ} 36^{\prime}$ and $5^{\circ} 46^{\prime}$ E. Length, N.N.W. to S.S.E., $86 \mathrm{~m} . ;$ centre breadth, 47 m ; area, $2508 \mathrm{sq} . \mathrm{m}$. The surface is very much broken by mountains, forming ramifications from the Alps, and traversing it from N. to S.; but has a general slope westward towards the l. bank of the Rhone. The average height of the mountains is from 4000 to 5000 ft ., and between them are lateral valleys, drained by numerous streams, which, with scarcely a single exception, flow W., and carry their waters to the Rhone. After that river, forming, as already mentioned, the W. boundary of the department, along which its course is almost due $S$., the most important are the Isère, in the N., and the Drôme, which gives it its name, and crossing it almost centrally from E. to W., divides it into two nearly equal parts. About one-fourth of the whole surface is waste,
and nearly one-third in wood. The greater part of the remainder is arable; but the soil possesses little natural fertility, being generally thin and sandy, and the grain raised falls considerably short of the consumption. A considerable extent of ground is occupied by vineyards, and several of the wines produced are first class. Among them may be mentioned Hermitage, grown near Tain; and the wines of Die, Donzére, Chateauneuf, Montelimart, and Mercurol. The loftier summits and higher lands of the department are devoted to pasture, and, in summer, are browsed by numerous flocks of sheep, sent chiefly from department Bouches-du-Rhone, when, from heat and drought, its plains of Crau d'Arles cease to be nourishing. Among the forest trees, fir, oak, and beech prevail; but on the lower acclivities are extensive plantations of chestnuts and walnuts, the former of which are extensively used as food, while from the latter great quantities of oil are extracted. In many districts both the olive and the mulberry thrive well, and large quantities of silk are obtained. The animal principally employed, both in agriculture and for burden, is the mule. Horses and horned cattle are few in number, and of inferior breed; but the sheep, chiefly merinoes, or a cross with them, are very numerous; and swine, the flesh of which is much esteemed, are fed in large herds on the mast of the forests. Game, including chamois, hares, and partridges, abound. The wolf is by no means uncommon, and eagles and vultures are frequently seen. The lakes and rivers are well supplied with fish. The minerals include iron and lead, which are worked in several places; copper, of which only indications appear, and coal, which, though as yet worked only at one spot, is thought to form a considerable field. Limestone, gypsum, and marble, white and veined, are common. The manufactures consist of coarse woollens, serge, printed linens, gloves, leather, common and morocco; and there are numerous dyeworks, paper, cotton, and silk mills, lime and plaster kilns, brick and tile-works, several roperies, and blast furnaces. The trade is chiefly in wine, brandy, oil, fruit, silk, wax, and honey. For administrative purposes, Drôme is divided into four arrondissements Valence (the capital), Die, Montelimart, and Nyons, subdivided into 28 cantons, and 361 communes. Pop. (1846), $320,075$.

DROMEDARY, a cape, S.E. coast, Australia; lat. $36^{\circ}$ $18^{\prime} \mathrm{S} . ;$ lon. $150^{\circ} 14^{\prime} \mathrm{E}$. ; about 105 m . N. Cape Howe. It consists of a projecting headland, having a double mountain over it, called Mount Dromedary.

DROMERSHEIM, a tn. Hesse Darmstadt, Rheinhesse, circle of, and near Bingen. It contains a R. Catholic parish church. Pop. 892.

DROMIN, two pars. Ireland :-1, par. and tn. Louth; 2042 ac. Pop. 863.-2, par. Limerick; 4096 ac. Pop. 1375.

DROMINEER, par. Irel. Tipperary; 2426 ac. P. 756.
DROMISKIN, par. and tn Irel. Louth; 5312 ac P. 2507.
DROMKEEN, par. Irel. Limerick; 860 ac. Pop. 567.
DROMOD, par. Irel. Kerry ; 50,702 ac. Pop. 5247.
DROMORE.-1, An episcopal city, Ireland, co. Down, 16 m . S.W. Belfast, on the Lagan, here crossed by two bridges. It consists of a square and five principal streets, and is rather neat and well built. In an open and spacious area stands the markethouse, a substantial building. The parish church, a small, unprctending structure, contains the remains of Jeremy Taylor, who was bishop of the see, and by whom it was built. There are also a R. Catholic chapel and two Presbyterian meeting houses, a district diocesan school, and two widows' houses. Weekly market, on Saturday, for provisions, farming stock, and linen. A constabulary police force is stationed herc. Near the town is a mineral spring of some repute, and a Danish mound, 60 ft . high. Pop. 2110. -2, A par. Ircl. Tyrone; 25,492 ac. Pop. 10,601 .

DRON, par. Scot. Perth; $3 \frac{1}{2} \mathrm{~m}$ : by 3 m . Pop. 441.
DRONERO [anc. Draconarium, Dragonerium], a city, Sardinian States, Piedmont, prov. of, and 12 m . W.N.W. Coni, picturesquely situate on an eminence at the confluence of the Roccabruna with the Maira, here crossed by a lofty stone bridge, of three arches, at the mouth of an extensive valley. It consists of the town proper, surrounded by old walls, and of two suburbs; is the seat of a court of justice, contains a large parish church of three naves, in a kind of bastard Gothic ; another church belonging to the confraternity of Gonfalone, a simple and elegant structure; a townhouse,
a Benedictine monastery, a college, with about 200 students, and an hospital, erected on the site of the old castle of Dronero, of which a majestic tower still remains; and has manufactures of hempen cloth, and of scythes and sickles; several silk mills, a trade in the above manufactures, and in corn, cattle, cheese, and larch-wood; and four fairs. Pop. 3365.

DRONFIELD, a tn. and par. England, co. Derby.The rows, pleasantly situated in a vaiiey formed by a brancl of the Rother, 7 m . S. by E. Sheffield, is small but neat, and is inhabited by many respectable families. The parish church, beautifully situated on a hill near the town, has a fine tower and spire, chiefly in the decorated English stylc. There are places of worship, besides, for Independents, Wesleyan Methodists, and the Society of Friends; also two free, and several other schools. Cutlery, edge tools, agricultural implements, and saddlers' ironmongery, are manufactured here to a considerable extent. In the neighbourhood are iron and chemical works, and several corn mills. Coal abounds in the vicinity. Area of par. 15,580 ac. P. 4583.

DRONNE, a river, France, which rises about 18 m . S.W. Limoges, dep. IIaute-Vienne, flows S.W., enters and traverses dep. Dordogne, and, in part of its course, forms the boundary between it and the two Charentes; enters dep. Gironde, and falls into the Isle, 26 m . N.E. Bordeaux, after a course of about 100 m . It is nowhere navigable, except for a short space near its moutl.

DRONRIJP, a vil. Holland, prov. Friesland, 6 m . W. Leeuwarden, on a canal, advantageously placed, and flourishing. It has a Reformed church and a school, a tile-work, and a corn-mill. Pop. agricultural, 1100.

DRONTHEIM, Norway. See Trondijem.
drosau, Droschau, or Straczow, a tn. Bohemia, circle of, and 8 m . S.S.W. Klattau, on a height above r. bank, Bradank. It contains a parish church, synagogue, and two schools, one of them for Jews; and has a weekly market, two anuual fairs, and a considerable trade in yarn, linen, and cattle. Pop. 1474.

DROSENDORF, a tn. archduchy of Austria, below
the Ens, picturesquely situate on a rocky eminence above the Thaja, at the junction of the Thumritz, close on the frontiers of Moravia, 33 m . N. Krems. It consists of the town proper and a suburb, sometimes called the Old Town-the former is walled: contains a castle and hospital; has manufactures of wax and tallow candles, and a trade in leather. Pop. 800.

DROSSEN, a tn. Prussia, gov. of, and 15 m . N.E. Frankfort-on the-Oder, in a marshy district, 1. bank, Lenze. It is the seat of both a civil and a criminal court, contains two churches, and has manufactures of woollen and linen cloth, hosiery, hats, leathcr, and earthenware, a brick and tile-work, a trade in horses and cattle, and four annual fairs. Good fuller's-earth is found in the neighbourhood. P. 3970.

DROXFORD, par. Eng. Hants; 7380 ac. Pop. 1942.
DROYLSDEN, a rapidly increasing vil. England, co Lancaster, situated on an elevated plain, $3 \frac{1}{2} \mathrm{~m}$. E. Manchester, and a station on the Lancashire and Yorkshire Railway. It consists of one principal street, irregularly laid out, and badly kept. The cottages are neatly built of brick. It has an Established church, a handsome modern building, with a tower and spire; places of worship for Wesleyan and Primitive Methodists, Independents, and Moravians, several schools, and a mechanics' institution. The principal manufacture is that of cotton goods; and there are also some copperas works, one or two small dye-works, and several extensive printworks. Pop. (1841), 4933.-(Local Correspondent.)

DROYSSIG, a vil. Prussia, prov. Saxony, gov. Merseburg, circle of, and 12 m . S.S.E. Weissenfels, with a parish church, a fine eastle and garden, and several mills. Pop. 783.

DRUENT, or Druento [Latin, Druentum], a vil. and com. Sardinian States, prov. of, and about 7 m. N. W. Turin, ncar the mountain-stream Ceronda. It contains an ancient parish, and four other churches, and an old feudal castle, now in ruins; and has trade in cattle and in mushrooms, which abound in the district. Pop. 2000.

DRUMBLADE, par. Scot. Aberdecn; 7 m . by 5 m . Pop. 945.

DRUMKEERAN, a vil. Ireland, co. Leitrim, 15 m . S.E. Sligo, containing a church, and a R. Catholic chapel. Pop. 469.

DRUMLISH, a vil. Ireland, co. of, and 7 m . N. Longford, containing the parish clurch, and a R. Catholic chapel. Several fairs are held annually. Pop. 533.

DRUMMELZIER, par. Scot. Pecbles; 14 m. by 4 m. Pop. 228.

DRUMMOND'S ISLAND [native, Taputeouea], an isl., S. Pacific Ocean; lat. $1^{\circ} 20^{\prime} \mathrm{S}$.; lon. $174^{\circ} 57^{\prime}$ E., of coral formation, a few feet above the level of the ocean, 30 m . long, N.W. to S.E., and varying in breadth from a half to three quarters of a mile. It is thinly covered with cocoar nut and pandanus trees, but is nearly destitute of grass, or of any sort of undergrowth. It is densely inhabited, containing no fewer than 14 towns, the whole shore appearing at a distance to be covered with loouses; while at intervals of a mile are large buildings, called by the natives ' mariapas,' or coun-cil-houses. The natives are described as fierce and treacherous; the majority of them entirely naked, while a few wear a girdle, the only article of dress to be seen among them, excepting a covering for the head made of the bleached pandanus leaf. Tattooing is practised, but not to such an extent as in the S. Sea Islands. War appears to be one of the principal em-
ployments of this people, and their wcapons, consisting chiefly of shark's teeth, swords, and spears, are of the most formidable description.-(U. States Exp. Exped.-2, An isl., U. States, in N.W. part of Lake Huron, having S.E. Cockburn Island; and N. W. that of St. Joseph; length, 20 m . ; greatest breadth, 10 m .

DRUMOAK, par. Scot. A berdeen; 12 sq. m. Pop. 811.
DRUMQU1N, a vil. Ireland, co. Tyrone, 9 m . S.S.W.
Newton Stewart, consisting of one street, and containing a clurch, R. Catholic chapel, Presbyterian meeting-house, school, and dispensary. Several fairs are held annually. Pop. 452.

DRUMSHAMBO, or Druyshando, a vil. Ireland, co. Leitrim, near the S. extremity of Lough Allen, 7 m . N. by E. Carrick-on-Shannon. It has a church, a Wesleyan chapel, and several annual fairs. Pop. 517.

DRUMSNA, a small tn. Ireland, co. Leitrim, pleasantly situated in a valley, sheltered on the E. and N. by well planted hills, $3 \frac{1}{2} \mathrm{~m}$. S.E. Carrick-on Shannon. Its houses are well built and slated, several of them handsome; contains a R. Catholie chapel, a parochial, and a national school ; the inhabitants are chiefly employed in agriculture. Several annual fairs; weekly petty sessions. Pop. 516.-(Local Correspondent.)

DRUNG, par. Irel. Cavan; 11,475 ac. Pop. 6551.
DRUSES, a people who inhabit the chain of Lebanon, in Syria, but chiefly the S. part, E. and S. E. Beirout, and as

## DUBLIN

far S. as the district of Hasbeya, about the sources of tho Jordan. Their territory contains several mountain districts, forming as many cantons, each under an emir of ancient family. Throughout this tract, a kind of republican independence is maintained, under a hereditary chieftain. Their houses are generally comfortable, being substantially built of stone, and almost always whitewashed, although in their villages there are many clay-built dwellings, but these, though humble, are neat and clean. They are remarkable for patient and persevering industry, for hospitality, valour, and love of country, with extreme pride of birth. The Druse females frequently wear a blue jacket and petticoat, with some coins attached to the hair ; but their chief ornament is a singular conical shaped horn of chased silver, projecting about 18 inches from the forehead to which it is attached; it is also balanced by a heavy weight behind the head; it is not removed even at night, and in the day-time the costume is completed by throwing a piece of white cotton over it, so as to envelope the whole person. Their religious rites are but little known, but they have a priestlood, and abhor all religions excepting their own. They neither fast nor pray, but believe in the transmigration of souls. Their language is Arabic. The capital of the Druses is Dair-el-Kammar (which see).

DRUTEN, a vil. Holland, prov. Gelderland, 10 m . N.W. Nijmegen, 1. bank, Waal, with a R. Catholic church and a school. Three annual markets. Pop., agricultural, 1400.

DRYFESDALE, par. Scot. Dumfries;11,000ac. P. 2093.
DRYMEN, a vil. and par. Scotland, co. Stirling. The village, 16 m . N.W. Glasgow, near r. bank Eudrick, lies on an incline, in a well-cultivated and picturesque district; consists chiefly of a row of rather indifferent houses, on either side of the public road, with an open space used as a marketplace near its N.E. end. It has a parish and a U. Presbyterian church, and a parochial and an infant school; and an annual cattle-show. Area of par. $32,200 \mathrm{ac}$. Pop. 1515 ; of whom in vil. 344.

DRYPOOL, par. Eng., E. York; 1290 ac. Pop. 3390.
DUAGH, a par. and tn., Irel. Kerry ; 19,701 ac. P. 5065.
DUBBIESJDE, or Inverleven, a vil. Scotland, co. Fife, 6 m. S.E. Markinch, r. bank, Leven, near its influx into the Firth of Forth ; neatly and regularly built, and containing a U. Presbyterian church. P., chiefly hand-loom weavers, 348.

DUBEN, a tn. Prussia, gov. Merseburg, circle, Bitterficld, r. bank, Mulde, here crossed by a wooden bridge, 17 m . W.N.W. Torgau. It is the seat of a law court and several public offices, contains a church and an old castle, and has manufactures of cloth, a trade in wood, and three annual fairs. Pop. 3850.

DUBENETY, a vil. Bohemia, circle, Königgrätz, about 6 m . from Jaromirz. It is divided into Upper and Under Dubenetz, contains a parish church, and has several mills. In the vicinity are the ruins of the strong castle of Kalnowitz. Pop. 1538.

DUBHOY, or Dubbor, an inland tn. Hindoostan, prov. Goojerat, 20 m . S.E. Baroda ; lat. $22^{\circ} 7^{\prime}$ N.; lon. $73^{\circ} 27^{\prime}$ E.; it is more than $2 \frac{1}{4} \mathrm{~m}$. in extent, the fortifications forming nearly an exact square. Some of the houses are well built, but the others are mere huts, overshadowed by mangoe and tamarind trees, in which great numbers of monkies harbour. It was formerly a place of much greater extent and importance than it is now, as the remains of its ancient fortifications, gates, and temples, indicate. The gate of diamonds is a singularly beautiful specimen of Hindoo architecture, and the sculpture so chaste and spirited, as to approach the classical bas-reliefs of Greece. The ancient walls and towers were entirely built of large square stones brought from a great distance. Within the walls is a tank lined with hewn stone, laving a flight of steps all round, three quarters of a mile in circumference. This magnificent reservoir is supplied chicfly by the periodical rains; and the opening of the aqueduct, by which it is filled, is celebrated by a festival of several days. In the rainy season, the town is completely insulated by large lakes or sheets of water, so that the cattle swim in and out of the gates every morning and evening.

DUBIECKO, a tn. Austria, Galicia, circle, Sanok, l. bank, San, 75 m . W. Lemberg. It is situated in a wild and mountainous district, contains a handsome chateau, with fine gardens, and has valuable salt mines, which were at one time, and might still be, extensively worked, but, owing to a scarcity
of fuel, are at present made to yield only about 2000 tons oi salt. Dubiecko has also six annual fairs, chiefly for grain. Pop. 1050.

DUBITZA, Dubicza, or Dubuza, a market tı. Austria, military Croatia, l. bank, Unna, opposite to the Turkish fortress of same namc, 24 m . W. Gradiska. It contains a R. Catholic, and a Greek non-united parish church, and a German school (Trivialschule); and carries on an important trade with Turkey, in grain, fruit, and cattle. Pop. 4000.

DUBITZA, a small tn. and fortress, Turkish Croatia, r. bank, Unna, about 10 m . from its junction with the Save; lat $45^{\circ} 12^{\prime}$ N.; lon. $16^{\circ} 45^{\prime} 45^{\prime \prime}$ E.; remarkable for the obstinate stand which it made against the Austrians in 1788. Opposite the tn., l. bank, Unna, is the Austrian tn. of same name. Pop. 6000.

DUBLIN, a maritime co. Ireland, prov. Leinster, on the E. coast of the island, having the Irish Channel E., Meath and Kildare W., Wicklow S., and Meath N. Greatest length, N. to S., 32 m. ; greatest breadth, 18 m .; area, $354 \mathrm{sq} . \mathrm{m}$., or $226,414 \mathrm{ac}$., of which 196,063 are arable, 19,312 uncultivated, 5519 in plantations, and 1820 in towns, exclusive of Dublin city. In 1848, 92,391 ac. were under crop, occupied as follows:-

The surface is level, rising, at its S. boundary, into a range of elevated hills, the summit of the highest of which-Kippure-is 2473 ft . above the sea. The elevated grounds above the coast, in the $S$. parts of the county, are very picturesque, and are occupied by marine villas, and by seats of the nobility and gentry. The N. districts are comparatively level and tame, but are fertile, and covered with a beautiful verdure. There are, in all, about 70 m . of sea coast, including the bays of Dublin, Killiney, Malahide, Rogerstown, and Lough Shinny. Property is much divided. Farms near the city small, but, at a distance, larger. Agriculture is, on the whole, improving, but is still in a very backward state. The prevailing subsoil is calp limestone and granite. The principal streams are the Liffey, which intersects it W. to E., and on which there is a considerable salmon fishery; the Dodder and the Tolka both falling into Dublin Bay-the former on the S., the latter on the N. side of Dublin city. Important water communications are, the Royal and the Grand canals, both centering in Dublin, and uniting the Liffey with the Shannon. Neither minerals nor manufactures are important. In 1841, there were 12,451 children attending school ; and, in 1848, there were 129 national schools in operation, attended by 22,491 children. The country is traversed by four railways, which, like the canals, centre in the capital-the Kingston, Drogheda, Midland Great Western, and Great South-western. The county is divided into nine baronies-Balrothery E. and W., Castleknock, Coolock, Dublin, Nethercross, Newcastle, Rathdown, and Upper cross; and returns two members to the House of Commons. Registered electors (1850), 2207. Pop. (1841), exclusive of Dublin city, 140,047; (1851), 146, 631 .

DUBLIN, a city, seaport, and cap. of Ireland, co. Dublin, the residence of the Lord Lieutenant of Ireland, the seat of the see of the archbishop of the $S$. province, and the centre of all the political, ecclesiastical, educational, fiscal, commercial, and military institutions of the kingdom. It lies at the head of Dublin Bay, and mouth of the Liffey; lat. $53^{\circ} 23^{\prime}$ N.; lon. $6^{\circ} 20^{\prime}$ W.; 292 m . W.N.W. London, 133 m . W. Liverpool, and 63 m. W. Holyhead.

General Description.-Dublin is divided into two nearly equal parts by the Liffey, which, intersecting it W. to E., is embanked with granite, and lined on both sides with spacious quays, and spanned by nine bridges-seven of stone, and two of iron. The city is flanked, N. and S., by the Royal and the Grand Canals, and is nearly surrounded by a highway called the Circular Road, from 8 to 9 m . in extent, which nay be considered its entire circumference. Its length from E. to W. is about $2 \frac{1}{2} \mathrm{~m}$., greatest breadth about 2 m ., and the ground on which it lies rises gently to the N. and the S.W.; the S.E. portion was reclaimed from the river. It is paved, and lighted with gas, and supplied with water, chicfly frow
the Royal and the Grand Canals. The oldest part of it lies to the S . of the river, W. of the castle, and is composed of narrow, filthy streets, lined by mean houses, and inhabited by a miserable squalid population, and those who sell them food and clothing. Even in the better parts, when turning off the main thoroughfares, similar dwellings, similarly tenanted,
meet the eye. The more modern part of the city, however, is regularly and well built as need be. Its principal strects are broad, and present a fine appearance, being generally lined with handsome houses; but the domestic arehitecture, as a whole, is plain, and wanting in character. Excepting the public buildings, which are of stone, the houses are all of

Lriek. The inain thorourhfare, E. to W., is by the magnificent quays along the Liffey, presenting, indced, one of the finest features of the city, lined, as they are, by clegant buildings; but the stream being tidal, and the sewerage of the eity being eonveyed into it, elbb tide and warm weather eause it to exhale anything but balmy odours. The prineipal thoroughfare, N. to S.. is towards the E. side of the eity, and is composel of Grafton Street, the busiest commercial loeality in I ublin, connectins, N. by Carlisle Brilge, with Saekville Street, justly esteemed the fincst in the kingdom, being 650 yards, or rather more than a third of a mile long, and 40 yards wide; at its N.end, in Rutland Square, stands the Rotunda, near its centre the Nelson column, and on its W. side the general post office, a fine Lonic building in granite, with a hexastyle portico in Portland stone. There are several other important thoroughfares, annong which may be named, Dame Street, in which are the finest shops in the city. All the prineipal strects are filled with passengers, and with ears innnmerable, and present quite a busy scene. Dublin las numerous and fine squares, the chief, on the S. side of the river, are St. Stephen's Green, one of the largest public squares in Europe, being 1 nm . in circumference, with a bronze equestrian statue of George II. in the centre; Merrion Square, in which is the negleeted house of the agitator Daniel O'Con-
Vol. I.
nell ; College Park, and Fitzwilliam Square. N. of the Liffey are Rutland and Mountjoy Squares, in the highest and airiest parts of the city.

Public Puildings and Institutions.-Few cities possess more numerous or more elegant public buildings. In the centre of the S . side stands Dublin eastle, on a slight elevation. It is the official residence of the Lord Lieutenant, and is more remarkable for size than for architeetural features. E. from the castle. and facing College Green, is the Bank of Ireland,

THE BANK OP IRELAND AND TRINITY COLLEGE, DURLIN.-Drawn tron Nature and an Wowl, by W. F, Wakeman.

## DUBLIN

one of 130,000 , and the other of 20,000 volumes, and a museum. The Fonr Courts, stretching for 500 ft . along King's Quay, on the Liffey, have a beautiful portico of six Corinthian columns, and in the centre is surmounted by a

THE FOUR COURTS, DUBLIN --Drawn from Nature and on Wood, by w. F. Wakeman.
charitable and benevolent institntions of various kinds in the city, many of them on a very large scale, and all liberally supported, are exceedingly numerous; they include five hospitals, among which the Royal Hospital, for disabled soldiers, is a noble edifice, by Sir C. Wren; several infirmaries, among which is the lying-in hospital, the first of the kind in the United King dom; two lunatic asylums, one of which, St. Patrick's or Swift's hospital, was founded by Dean Swift, who bequeathed $£ 10,000$ for this purpose; several orphan societies, and female penitentiaries; and upwards of 200 charity schools, of which two are model, two for deaf•mutes, 27 for orphans, 34 where the pupils are lodged, clothed, and boarded, and 132 dayschools; and a number of other not less useful charities. There are within the city, or its immediate precincts, seven barracks or military stations, capable of accommodating 5500 men.
large circular lantern, with twelve windows, and twenty-four Corinthian pillars; its buildings accommodate the four courts of chancery, Queen's bench, common pleas, and exchequer. The most important of the other public buildings, many of which are elegant, are the custom-house, with a noble cupola, 125 ft . high ; the King's Inns, the post-office, already alluded to ; the royal exchange, rotunda, corn exchange, commercial buildings, linen hall, the mansion house, city assembly house, sessions house, Newgate prison, house of correction, or Richmond Bridewell; the Sheriff's prison, the N. and S. union workhouses, and the stations of the Drogheda, of the Midland Great Western, and of the Great South-western Railways.

The principal ecclesiastical buildings are the cathedrals of St. Patrick and the Holy Trinity, the latter commonly called Christ's church ; and the metropolitan R. Catholic cathedral. Besides these, there are 20 parochial, and as many nonparochial Episcopal churches-eight R. Catholic, besides a Jesuits' church, six friaries, and eight convents, four Presbyterian, two Unitarian, three Independent, one Seceding, two Primitive Wesleyan, five Wesleyan Methodist, two Friends, one Baptist, one Moravian, one German Lutheran, and one Welsh Methodist places of worship, and a Jews' synagogue. There are three cemeteries - the Golden-bridge Cemetery, established for the burial chicfly of R. Catholics; Prospect Cemetery, adjoining the botanic garden, comprises about 20 ac. , is tastefully planted and laid out with walks, and contains a handsome monument to John Philpot Curran. Mount Jerome comprehends 27 ac., and is also well laid out.

The most important litcrary and scientific institutions are Trinity College, already referred to; the royal Dublin society, for improving husbandry and other useful arts in Ireland; the royal Hibernian academy of painting, sculpture, and architecture; and the royal Irish academy for promoting the study of science, polite literature, and antiquities; the archæological society, the society of Irish artists, the institution of civil engineers of Ireland, statistical society, royal institute of the architects of Ireland, geological society of Dublin, royal zoological society of Ireland, Dublin natural history society, the Dublin college historical society, the Dublin university philosophical society, the Dublin university reading society, and the Dublin mechanics' institution. The principal libraries are the library of Trinity College, already mentioned; Marsh's library, containing between 17,000 and 18,000 volumes; and the Dublin library society. There are one agricultural and two horticultural societies; and a society for the promotion and improvement of the growth of flax. This society was established in 1841, and succeeded in raising the amount of the Irish flax crop, in five years, from 25,000 to 40,000 tons.

The surgical and medical institutions are the royal college of surgeons, King and Queen's college of physicians in Ireland, the school of physic, the school of surgery, the surgical society of Ireland, and school of medicine of the apothecaries' hall of Ireland. There are, besides, several associations for the promotion of medical and surgical knowledge. The

For public amusement and recreation there are three theatres, the music ball, the concerts of various musical societies, and the Portobello and Rotunda gardens. In the vicinity also, up the Liffey, a little N.W. of the city, is the Phonix Park, a corruption of the Irish term Finniske, signifying 'a spring of clear water,' one of the most extensive and beautiful promenades of which any European city can boast. Its greatest length is about $2 \frac{1}{2} \mathrm{~m}$., greatest breadth about $1 \frac{8}{4} \mathrm{~m}$., area, 1759 ac . It is adorned with trees, and its surface picturesquely broken by a number of small ravines through which streamlets seek their way to the Liffey. The park contains the viceregal lodge, the residence of the Lord Lieutenant, a large and handsome building, with fine gardens attached, and an enclosed demesne of 160 ac .; the chief and under secretary's lodges, the Hibernian school for soldiers cliildren, the gunpowder magazine, the military infirmary, the constabulary barrack, the lodges of the park-ranger, and assistants, the Wellington testimonial, an obelisk 205 ft . high; the garden of the zoological society, the review ground for the troops in the garrison, and an enclosed cricket ground. Upwards of 1300 ac . are open to the public. Fine views of the city are obtained from various parts of the park, which is under the charge of the commissioners of woods and forests.

Government, Courts, dc.-Dublin is the seat of the viceregal Government, consisting of a lord lieutenant and privy council, appointed by the Crown, assisted by a chief secretary, under secretary, and a large establishment of inferior officers. The official residence of the lord lieutenant is Dublin castle, first appropriated to that purpose in the reign of Elizabeth, but his usual residence is the vice-regal lodge in the Phœnix Park. The corporation consists of the lord mayor, chosen annually from among the aldermen or town councillors; 15 aldermen, and 45 town councillors. There are three divisional offices, in which magistrates sit daily for the administration of justice. Several of the principal civic functionaries are appointed by the lord lieutenant, and hold their offices at his pleasure. The supreme courts of the city are, the Chancery Rolls, Queen's Bench, Exchequer, Common Pleas, Nisi Prius, and Admiralty. The other principal courts are the Consistorial and Prerogative courts. The prisons of Dublin are Newgate, Richmond bridewell, and Richmond female penitentiary.

Manufactures.-The manufactures are of little note, although formerly woollen cloths, linen, and silk, were manufactured in the city and vicinity to a large extent. The tabinets or poplins, a fabric of silken warp and woollen weft, for which Dublin has been long celebrated, are still in some request, though small compared to what it was formerly. Tanning and currying of leather, cabinet and coach making, are all carried on to a considerable extent. There are two molasses boileries, a number of foundries, breweries, and distilleries, and establishments for the manufacture of flint glass, sail cloth, canvas, turpentine, vitriol, vinegar, soap, starch, size, glue, paper, parchment, vellum, hats, and the celebrated Lundyfoot snuff.

Port, Trade, \&c.- The harbour, formerly a very indifferent one, has been lately so much improved, that vessels of large burden may now unload at the quays. The depth of the channel at low water springs is from 11 to 12 ft ., and at high water springs, 23 to 24 ft . This has been attained by dredging the bed and mouth of the Liffey, and by building a protecting wall on cither side of the channel; that on the S. side stretching far ont into the bay, with a lighthouse at its extreme end. The docks connected with the customhouse, on the N. side. cover an area of 8 ac ., have 16 ft . depth of water, and 1200 yards of quay, with ample stores, and are capable of accommodating 40,000 tons of shipping. The docks on the $S$. side afford commodious wharfage for upwards of 100 sail. Considerable advantage has likewise been derived from the formation of the harbour of refuge at Kingstown, giving increased security to the shipping. The principal exports are linen, cattle, corn, meal, flour, provisions, sheep, hogs, beer, woollen and cotton manufactures, hides, and egrs ; and the imports colonial produce, tea, timber, and wine, the last article having continued to increase in quantity during all the vicissitudes of the trade of the port. For a number of years back the trade of the port, both home and foreign, has been rapidly increasing. The tonnage registered in $1843-45$ was 105.101 ; and in 1846-48, 126,288. The following table exhibits the progress made since 1840 , as respects the number of reign arrivals, and the gross amount of customs and excise daties collected :-

|  |  | Customs. | Excise. |
| :---: | :---: | :---: | :---: |
| 1840 |  | ${ }_{\text {£ }}$ |  |
| 1841 | 247 297 | 859,447 | 351,132 |
| 1842. | 264 | 965,623 | 252,253 |
| 1843. | 292 | 958,687 | 279,633 |
| 1844. | 275 | 971,907 | 257,338 |
| 1845. | 305 | 1,032,696 | 268,706 |
| 1846. | 310 | 1,012,089 | 320,902 |
| 1847. | 348 | 1,054,675 | 381,858 |
| 1818. | 416 | 980,289 | 337,663 |
| 1849. |  | 978,511 | 352,193 |

Steam packets ply regularly to Holyhead and Liverpool, I,ondon, Bristol, Cork, Glasgow, \&c., some of them sailing from Kingstown harbour; and by the Grand and Royal Canals, connecting the Liffey with the Shannon, supplics are carried to the interior, and grain, potatoes, \&c., are brought to the capital.

Four railways diverge from Dublin-the Drogheda to the N., to connect with Ulster; the Midland Great Western, counecting with Galway and Comnaught; the Great Southern and Western, connecting with Cork, Limerick, and the S.W.; and the Kingstown railway.

The environs of Dublin are remarkably beautiful, although the city itself is somewhat unfortunate in its approaches, none of which do it justice. The bay is noble and picturesque, and esteemed one of the finest in the United Kingdom; it is about 7 m . in breadth at its entrance, between Howth Head on the N., and Kingstown on the S., with a lighthouse. It extends inland for about the same distance; and along the shores are the villages of Kingstown, Blackrock, Clontarf, Ratheny, \&c.; and terraces of handsome houses, and scattered villas; and the 'Big Hill of Howth,' on the N., and Killiney Hill and the Wicklow Mountains, to the S., form fine objects in the scene. In the centre flows in the Liffey, and on either side the Dodder and Tolka. Attached to the city, or nearly so, are the suburban villages of Ringsend, Irishtown, Sandymount, Ballsbridge, Donnybrook, Ranelagh, Rathmines, Harold's Cross, Dolphin's Barn, Kilmainham, Island Bridge, Glasnevin, Drumcondra, and Clontarf.

History. - The metropolis of Ireland claims a high antiquity, having been in existence, as is alleged, since the time of Ptolemy, when it was called Eblana. Its original native name was Drom-Col-Coille, or the 'Hill of hazel wood.' Another ancient name, still retained by the natives, is Bally-Ath-Cliath-Duibhlinne, the 'Town of the Ford of Hurdles on the Blackwater.' By the Danish settlers it was called Divelin. These latter names appear to be merely varicties of the Irish Dubh-linn, or Black Pool, which is considered the correct etymology. In the earlier part of the 9 th century, Dublin was taken by the Danes, who infested it for several centuries
thereafter. In 1169, it was taken by storm by the English under Strongbow, who died there seven ycars afterwards, and was interred in Christ church cathedral. From about this period, the history of Dublin is that of Ireland.

The city returns two members to the House of Commons. Constituency (1850), 17,643, and the University returns other two. Pop. (1841), 232,726; (1851), 254,850.-(Thom's Irish Almanac; The Land We Live In; M'Glashan's Dublin and its Environs ; \&c.)

DUBNICZ, or Dunnicza, a market tn. IIungary, Hither Danube, co. of, and 9 m . N.E. 'Trentschin, near r. bank, Waag. It contains a parish church, to which numerous pilgrimages are made ; and a castle, which possesses a fine library, rich in MSS. ; and has four annual fairs. Pop. 1868.

DUBNITZA, a tn. Turkey, 22 m . E. by N. Ghiustendil, 1. bank, Stroma, at the foot of Mount Dubnitza; lat. $42^{\circ} 13^{\prime} \mathrm{N}$.; lon. $23^{\circ} 20^{\prime}$ E. The inhabitants are chiefly supported by working iron mines in the neighbourhood. Silk is produced in the locality. Pop. 6000.

DUBNO, a tn. Russia, cap. circle of same name, gov. Volhynia, 132 m . W. by N. Jitomir, on the Irva; lat. $50^{\circ} 25^{\prime}$ N.; lon. $25^{\circ} 40^{\prime}$ E. It is irregularly built, with narrow, crooked, and unpaved streets; but contains several Greek and R. Catholic churches, a Greek abbey, a ducal residence, and a grammar-school. There is a considerable traffic in corn, flax, tobacco, fish, and cattle; and a large fair is held at Whitsuntide. Pop. ( 1850 ), 8350,

DUBOSSAR, or Novo-Dubosart, a tn. Russia, gev. Kherson, circle of, and 40 m . N.W. Tiraspol, agreeably situated, l. bank, Dniester, at the foot of a hill surrounded by gardens and fine Lombardy poplars. It contains two churches and a synagogue. Trade in tobacco, extensively grown in the district. In the vicinity is a monastery, anong almost inaccessible rocks, and used to furnish an asylum to the inhabitants during the inroads of the Tartars. Pop. (1850), 5235.

## DUBOVKA, a tn. Russia. See Doubovka.

DUBRAVA Also, a vil. Hungary, co. Szalad, on the Muraköz, not far from the junction of the Mur with the Drave. Many of the inhabitants are employed as carriers and in goldwashing. Pop. 2026.

DUBROVNA, a tn . Russia, gov. of, and 47 m . N.N.E. Mohilev, l. bank, Dnicper. It contains a R. Catholic and four Greek churches, and a synagogue; and has manufactures of woollen and linen cloth, plush, woollen covers, and clocks; a considerable trade in wood, carried, by successive floatage, first to Babinowitschi. then to Vitepsk, and finally to Riga. The fairs, tirree in number, are important. Pop. (1851), 7114.

DUBUQUE, a vil., U. States, Iowa, on a terrace, r. bank, Mississippi, 1605 m . above New Orlcans; lat. $42^{\circ} 30^{\prime} \mathrm{N}$. ; lon. $90^{\circ} 40^{\prime} \mathrm{W}$. It is regularly laid out, well built, and contains several churches, an academy, lyceum, reading-room, and printing office, which issues a weekly newspaper; and is the centre of a mining district, lead being found abundantly within the jurisdiction of the village. Pop. 1300.

DUCATO (Cape), the S. extremity of Santa Maura, one of the Ionian isls. ; lat. $38^{\circ} 33^{\prime} 30^{\prime \prime} \mathrm{N}$. ; lon. $20^{\circ} 32^{\prime} 45^{\prime \prime} \mathrm{E}$. (r.) It is the ancient promontory of Leucadia, which was commonly called the Lover's Leap. The poetess Sappho, who cherished a hopeless passion for Phaon, is reperted to have thrown herself from the top of this promontory.

DUCHS, or Dux, a tn. Bohemia, circle, Leitmeritz, in a plain, $46 \mathrm{~m} . \mathrm{N} . \mathrm{N} . W$. Prague. It contams two churches, one of them with a fine altarpiece; an hospital, and a castle, which possesses a picture gallery, a library of 13,000 volumes, and other collections; and has a distillery, a weekly market, and four annual fairs; and in the vicinity a coal mine. Pop. 1030 .

DUCIE, an uninhabited isl., S. Pacific Occan ; lat. $24^{\circ} 43^{\prime}$ S.; lon. $124^{\circ} 48^{\prime}$ W. (k.) It is low, of coral formation, oval form, with a lagoon in the centre, and about 5 m . in circumference. The highest trees do not rise more than 26 ft . above sea level. The water here is so clear over the coral rocks, that the bottom may be distinctly seen at a depth of upwards of 30 fathons.

DUCK.-1, A river, U. States, l'ennessce, rising in a branch of the Cumberland Mountaius, and after a W.N.W. coast of about 180 m ., falling into the Tennessee, 72 m . W.S.W. Nashville. It is navigable for about $90 \mathrm{~m} .-2$, An isl. British Amcrica, Lake Huron, 6 m . S. Manitoulin isl.

DUCKIINGTON, par. Eng. Oxford; 2640 ac. P. 541 .

DUDCOTT, or Dudcote, par. Eng. Berks; 1150 ac. Pop. 203.

UUDDESTON, a township, England, co. Warwick, forming the N.E. suburb of Birmingham. It stands on an elevated plain, and consists of five or six principal streets, wide, well laid out, and kept in good condition, with several others of a subordinate description; well supplied with water, lighted with gas, and rapidly increasing in size and population; houses of brick, but, except in the principal streets, built without any regard to uniformity. It has three Established churches, a number of Dissenting clapels, and day schools. Trade much the same as that of Birmingham. Pop. (1841), 20,079. -(Local Correspondent.)

DUDDINGSTONE, a vil. and par. Scotland, co. Edinburgh. The village, about two miles S.E. Edinburgh, is pleasantly situated near the foot of Arthur's Seat, having W. a small, but beautiful sheet of water, called Duddingstone Loch, a favourite skating resort of the citizens of Edinburgh. It has a handsome parish church, in the Norman style; and an hospital, founded by Louis Cauvin, a French teacher in Edinburgh, and afterwards a farmer in the parish. Near the village are the mansionhouse and grounds of the Marquis of Abercorn. The forces of Prince Charles Edward encamped in the vicinity, in 1745, both before and after the battle of Prestonpans. Area of par. 1812 ac. Pop. (1851), 966.

DUDDINGTON, par. Eng. Northampton; 1400 ac. Pop. 413.

DUDDON, a river, England, rising near the junction of counties Cumberland, Lancaster, and Westmorland, and, after a S. course of 20 m . between counties Cumberland and Lancaster, falling into the Irish Sea by a broad estuary, nearly dry at low water, $7 \frac{1}{2} \mathrm{~m}$. N. Morecambe Bay. This river has been celebrated by Wordsworth in a series of beautiful sonnets.

DUDELDORF, a tn. Prussia, gov. of, and $18 \mathrm{~m} . \mathrm{N}$. Treves, near the Kyll. It is the seat of a justice of peace court, contains a R. Catholic parish church, has manufactures of woollens, a trade in cattle, a weekly market, and two annual fairs. .Pop. 870.

DÜDELSHEIM, a market tn. Hesse-Darmstadt, Oberhesse, dist. of, and near Büdingen. It contains a Protestant parish church, townhouse, and school, and has manufactures of linen, a trade in fruit, and an annual fair. Pop. 1258.

DUDENHOFEN, a vil. Hesse-Darmstadt, prov. Starkenburg, dist. of, and near Seligenstadt. It contains a Protestant parish church, and has a trade in cattle, and two annual fairs. Pop. 1131.

DUDERSTADT, a tn. Hanover, Grubenhagen, cap. bail. of same name, in a fertile valley at the confluence of the Hahle and Breme, 15 m . E. Göttingen. It consists of the town proper, surrounded by a wall and rampart, and of four suburbs, and is divided into four quarters. It contains a Protestant, and a R. Catholic church; an ancient townhouse, superior school, hospital, and Ursiline monastery; and has extensive manufactures, particularly of linen and ribbons. The ramparts furnish a fine promenade, and the environs are laid out in gardens. Pop., tn. 4433 ; bail. 9580.

DÜDINGEN, a vil. and par. Switzerland, can. ef, and 4 m. N. by E. Fribourg. It is well built, and contains a handsome parish church with a tower, a well endowed school, and a remarkable hermitage called Magdalena Eirsiedelei, hewn out in a steep rock at a very early period, afterwards enlarged into a number of rooms by a man who laboured 20 years upon it, and still the resort of numerous pilgrims. Pop. 2342.

DUDLEY, a tn., parl. bor., and par. England, co. Worcester, but locally situated in Staffordshire, being completely surrounded by that county. The Town, on an acclivity, 8 m . N.W. Birmingham, on the S. Staffordshire Railway, consisted originally of enly one long street, to which several others have been added. The principal one is spacious, and all are well paved, and lighted with gas; houses, for the most part, well built of brick, and shops handsome. It has four places of worship connected with the Established chureh, and chapels belonging to R. Catholics, Free Church of Scotland, Independents, Baptists, Unitarians, Wesleyans, Ranters, and several other Dissenting bodies. Among the charities are an infirmary, a free grammar-school, two blue-coat schools, liberally endowed; a female school of industry, a charity
school for 40 poor girls, and an infant school. There are several book societies, a subscription library, a mechanics' institution, and a geological society, with a museum containing numerous specimens of interesting fossils and minerals collected in the neighbourhood. The principal trade of Dudley consists in the smelting and working of iron; boilers, chaincables, fire-irons, fenders, vices, spades, scythes, and nails, being the principal articles made. Flint-glass is also extensively manufactured, and beautiful ornamental articles of fossiliferous limestone, with which the vicinity abounds, as it does also with coal and ironstone. The immense caverns wrought iuto the limestone rock are very remarkable, and particularly interesting to the geologist. One of these excavations extends nearly 2 m . into the solid roek, and is traversed by a canal, by which the quarried material is conveyed to the mouth of the tunnel. The roofs of the caverns are supported by massive limestone pillars, which impart an exceedingly grand and striking effect to these subterranean regions when seen by terch-light. Hard by is the extensive ruins of the ancient castle, situated on an eminence overlooking the ravine, and affording a fine view of the surrounding country. It is of an oblong shape, with a tower at either end, and was held in 1644, by Colonel Beaumont, for three weeks for the King, against the parliamentary forces. The original building was erected in the eighth century by Dudo or Dodo, a Saxon prince, from whom the town is named. Dudley sends a member to the Heuse of Commons. Registered elcctors (1850), 925. Petty sessions are held every Monday by the county magistrates. Market day, Saturday. Three fairs annually. Richard Baxter, the celebrated nonconformist divine, was for some time master of the grammar school in this parish. Dudley confers the title of earl on the family of Ward. Area of par. 3930 ac. Pop. (1841), 31,232.-(Local Correspondent.)

DUDLEY•Hill, a hamlet, England, co. York (W. Riding), $1 \frac{1}{2} \mathrm{~m}$. S. Bradford; with places of worship for Primitive Methodists and Wesleyans; and two worsted mills. In the neighbourhood are several coal mines. Two fairs annually for cattle, horses, and pigs.

DUENAS, a tn. Spain, in Leon, prov. of, and $10 \mathrm{~m} . \mathrm{S}$. Palencia, near r. bank, Pisuerga. It is irregularly built; has two squares, a Gothic parish church, school, townhall, prison, and spacious cemetery. The Castilla Canal passes E. of the town, and affords facility for the transmission of merchandize. The inhabitants are almost exclusively employed in tillage and cattle-rearing. There are, however, a few looms, and a manufactory of hats. Pop. 2232.

DUERNA, a river, Spain, Leon, which rises in the E. slope of the sierra del Teleno, flows E.S.E., and, after a course of 40 m ., joins r. bank Tuerto, near La Baneza.

DUERO river. See Douro.
DUFFEL, a tn. and com. Belgium, prov. Antwerp, 6 m. N. Malines; with some manufactures of linen and flaxspinning; trade in country produce; and an annual fair lasting eight days, for horses, cloth, harness, \&c. Pop. 4178.

DUFFIELD, a vil. and par. England, co. Derby. The village, 4 m . N. Derby, a station on the Midland Railway, is situated partly on a plain, and partly on an acclivity, and consists of four principal streets; houses chiefly of stone from the Duffield quarries; well supplied with water. It has a parish chureh. chapels belonging to Wesleyans and Baptists, and six scloools; the most important of which are the free, national, and infant schools. The principal trade of the place is the making of silk gloves for the manufacturers of Belper and Derby; and at Milford, about 1 m . distant, are extensive bleach and dye works, a cotton factory, and a small foundry, which give employment to a great number of hands. Many are also employed in the stone quarries in the neighbourhood. Area of par., which, besides the village of Duffield, contains several populous villages and a market tn ., 17,390 ac. Pop. (1841), 17,664.

DUFF'S ISLANDS, S. Pacific Ocean, N.E. Queen Charlotte's Islands; lat. $10^{\circ} 23^{\prime}$ S.; lon. $165^{\circ} 49^{\prime} \mathrm{E}$. (R.) They are about 11 in number, extending 14 or 15 m ., N.W. to S.E., of unequal size ; the smaller apparently barren, but the largest two, which are about 6 m . in circumference, and situate in the middle of the others, are covered with wood. The natives are stout and well made, with complexions of a copper colour. Their canoes are about 12 or 14 ft . long, and about 15 incles

## DUFFUS

## DULCE

broad, sharpened at the ends, and a little ornamented. They are made of a single tree.

DUFFUS, par. Seot. Elgin; 6 m. by 3 m. Pop. 2970.
DUFTON, par. Eng. Westmorland; 20.560 ac. 1'. 466.
DUGNANO, a vil. and com. Austrian Italy, prov. Milan, dist. of, and 6 m . W. Monza, near l. bank, Serveso. It contains two parish ehurches. The distriet produces mueh corn, wine, and silk. Pop. 1421.
1)UIDA, a magnificent mountain, S. America, Venezuela, near its S. extremity ; lat. $3^{\circ} 10^{\prime} \mathrm{N}$. ; lon. $66^{\circ} 10^{\prime} \mathrm{W}$. ; about 20 m . N.E. from the point where the natural canal of the Casiquiare leaves the Orinoeo. It rises to an elevation of 8500 ft ., and being perpendienlar S. and W., bare and stony on the summit, and clothed on its less steep deelivities with vast forests, presents a most imposing spectacle; forming a landmark which guides the voyager on the Orinoeo for hundreds of miles. The summit of the mountain is so steep that no person bas ever ascended it. At the beginning and end of the rainy season, small flames, whieh appear to shift, are seen upon it. On this account it has been called a voleano, which, however, it is not. The granite whereof it is composed is full of veins, some of which being partly open, gaseous and inflammable vapours are supposed to pass through them, and to have given rise to the error. Another mistake has been occasioned by its roek-crystals and ehlorite quartzes having been taken for diamonds and emeralds, and thus to have obtained for a miserable village, abont 10 m . S. from it, the gorgeous name of Esmeralda. Spots of dazzling whiteness are observable along the precipitous declivities of Duida, when the atmosphere is elear, and the sun reflects his rays on its walls.

DUISBURG [anc. Lastrum Drusonis], a tn. Prussia, gov. of, and $15 \mathrm{~m} . \mathrm{N}$. Düsseldorf, between the Ruhr and the Angerbach, and about 2 m . from r. bank, Rhine, a station on the railway from Cologne to Hanover. It is surrounded by walls flanked with towers, in a somewhat dilapidated state, is the seat of several courts and public offices, contains four churehes -two Protestant and two R. Catholic, one of them the Salvatorkirche, a beantiful structure of the 15th century ; a synagogue, a gymnasium, substituted for the university, which was suppressed in 1802 ; an orphan, and an ordinary liospital ; and has important manufactures of woollen eloth, woollen covers, cotton prints, baize, velvet, hosiery, cat-gut, paper, porcelain, leather, and laequered ware. There are also chemical, starch, ehicory, vinegar, and glue-works, oil-mills, and sugar refineries. The trade, greatly facilitated by a canal which communicates with the Rhine, and by the railway, is important, consisting ehiefly in wine and colonial produce. Duisburg is of Roman origin; it rose to be a free town, and beeame a member of the Hanseatic League. It was early fortified, and suffered much by repeated sieges. Pop. 8543. --The circie, area, 278 geo. sq. m., is, in the N., flat and sandy, but, in the S., traversed by the Sauerland hills. It is watered by the Rhine, Lippe, and Ruhr, and has good pastures, on which numerous cattle are reared. In the higher grounds, coal is worked to a considcrable extent. Pop. (1846), 105,254.

DUIVELAND, an isl. Holland, prov. Zeeland, formed between the months of the Mas and the Seheldt, by the junction of various islets from the creeks between having been filled up. It measures about 5 m . by 7 m ., and is separated W. from isl. Schouwen, by a canal ; N., S., and E., it is bounded by arms of the Scheldt and Maas. Its soil is sandy, but is tolerably fertile, possessing both good corn and meadow land. It is surrounded by dykes, but still has on scveral occasions suffered severely from inroads of the sea, more especially in 1531, it was nearly wholly submerged. It has five sehools. Agrieulture and mussel-gathering are the main employments. Pop. 4200.

DUIVEN, a vil. Holland, prov. Gelderland, 6 m . E. by S. Arnhem, with a R. Catholic ehureh, and a school. Pop., agricaltural, 700.

DUKE OF YORK.-1, [native, Oatufu], An isl., S. Pacifie Ocean; lat. $8^{\circ} 36^{\prime}$ S.; lon. $172^{\circ} 23^{\prime} 52^{\prime \prime}$ W.; a lagoon island, of coral formation, 3 m . in length, E. to W., and $2 \frac{1}{2} \mathrm{~m}$. broad, N. to S., covered with cocoa-nut and pandanus trees. Nineteen varieties of trees were found here by the offieers of the U. States expedition, some of which were of large growth. Aquatie birds are numerous, also rats, and a large black lizard. The natives, a docile and harmless people, do not cultivate
the ground, but live entirely on cocoa-nuts and fish, having neither animals nor fowls of any kind. Neither have they any water on the island, their supply being wholly obtained from excavations made in the body of the coeoa-nut trees, 2 ft . from the ground, and capable of containing five or six gallons of water. This island was discovered by Byron in 1765, who reported it as destitute of inhabitants. It is now believed to contain about 120.-2, An isl., S. Pacifie Ocean, N.W.entrance St. George's Chamel, between New Ireland and New Britain; lat. $4^{\circ} 8^{\prime}$ S.; lon. $152^{\circ} 24^{\prime}$ E. (R.) It is eovered inland with lofty woods, and near the water side are the houses of the natives, interspersed among groves of cocoa-trees.-3, A cluster of isls. lying off the W. coast of Russian America, Prince of Wales archipelago; they extend about 50 m . in length, and 25 m . in breadth, or from lat. $55^{\circ} 50^{\prime}$ to $56^{\circ} 34^{\prime} \mathrm{N}$., and from lon. $133^{\circ} 15^{\prime}$ to $134^{\circ} 15^{\prime} \mathrm{W}$. They were first eireumnavigated by Vancouver.

DUKELLA, a maritime dist. Marocco, S.W. of the Morbeya, and between it and the dist. of Abda, with Sharagua on the E.; between lat. $32^{\circ} 10^{\prime}$ and $33^{\circ} 15^{\prime} \mathrm{N}$. The soil is in general fertile, producing, in great abundance, grain, fruit, honey, and wax. Goats are reared in great numbers.

DUKE'S TOWN, a tn., W. coast, Upper Guinea, on a branch of the old Calabar river; lat. $5^{\circ} 30^{\prime} \mathrm{N}$.; lon. $8^{\circ} 28^{\prime} \mathrm{E}$. An extensive trade is earried on here in palm oil, ivory, podpepper, and red wood, the first being by far the most important. A great deal of form and ceremony towards the ehiefs has to be observed by the foreign vessels trading in this part of the world. A salute of two guns must be fired at lienshaw's Town, a little below Duke's Town, and seven at the latter, followed by a formal visit to the Duke himself, who holds dominion over an immense tract of surrounding country.

DUKINFIELD, or Duckinfield, a vil. and township, England, co. Chester, $6 \frac{1}{2}$ m. N.N.E. Stockport, a station on the Maneliester and Staley-bridge Railway. It has several churches, and ehapels belonging to various bodies of Dissenters. Extensive collieries and eotton factories give employment to the greater part of the population, whieh has been rapidly increasing during the last half century, amounting in 1801 to 1737, and in 1841 to 22,394 .

DUKLA, a tn. Austria, Galicia, cirele of, and 16 m . S.E. Jaslo, on the Cergowa. It contains a parish chureh, and a Beruardine monastery, and has manufactures of woollen eloth, flannel, and linen, ard a considerable trade, chiefly in wine. Pop. 2100.

DULANE, par. Irel. Meath; 4243 ac. Pop. 1217.
DULAS, par. Eng. Hereford; 1320 ae. Pop. 60.
DULBAHANTA, a dist., N.E. Africa, Somanli eountry, S. from the Wur Singeli Mountains, between lat. $8^{\circ}$ and $10^{\circ}$ N., and lon. $46^{\circ}$ and $49^{\circ}$ E. It consists of a level country. abounding in grass, water, and timber, without a stone, and forming extensive pasture ranges. The inhabitants or Dulbahanta, are represented as a fine martial race of men, who fight chiefly on horseback, their horses powerful and courageous, and their arms two spears and a shield. They are courteous and hospitable to strangers; lave no grain, subsisting ehiefly on milk; have few gums, but trade extensively in ivory, ostrich feathers, and ghee. Wild beasts are numerous, the lion especially. Cameleopards, the koodoo, oryx, and black rhinoceros, are also common.

DULCE.-1, A lake, Central America, state of, and 102 m. N.E. Guatemala, forming the prineipal water-way of the state to the Atlantic. It is about 25 m . long, and 10 m . average breadth; has 18 ft . water at 300 or 400 yards from the shore, and, in most other places, from 30 to 60 ft . ; communicates with the Gulf of Honduras through a smaller one, ealled the Golfete, and the small river Dulce, the entrance to whiel, from the sea, is impeded by a bar, which cannot be passed by vessels drawing more than 6 or 7 ft ., though, once over, there is a general depth of 15 ft . Near its mouth is the port of Santo Tomas, which is well sheltered from the violence of the winds, and las deep water elose in shore.2, A gulf, Central Ameriea, formed by the Pacifie, on the coast of Costa-Rica. Its entrance is between the points of Buriea, lat. $8^{\circ}$ N.; lon. $83^{\circ}$ W., and Gorda, lat. $8^{\circ} 32^{\prime}$ N.; lon. $83^{\circ} 50^{\prime} \mathrm{W}$., on the latter of which is a fort.—A river of same name, rising in the mountains in the interior of the state, flows N. to S., and falls into the gulf after a course of abont $75 \mathrm{~m} .-3$, A river, La Plata, rising in the mountainous dis-
tricts of Tucuman, about lat. $26^{\circ}$ S., whence it flows S.E., under various names, and finally falls into Lake Salados de los Porongos, in lat. $30^{\circ} 15^{\prime} \mathrm{S}$.; its whole course being thus about 400 m .

DULCIGNO, a small seaport tn. European Turkey, Albania, on the Adriatic; lat. $41^{\circ} 53^{\prime} 48^{\prime \prime}$ N.; lon. $19^{\circ} 11^{\prime}$ E. (r.) It is built on an isolated hill forming a cape, which is united to the low land by an isthmus; it contains about 1000 houses, and is the seat of a R. Catholic bishop. The inhabitants live mostly upon the produce of their estates, excepting a few families engaged in commerce, or in the fisheries of the river Bojana, 6 or 7 m . S.E. from the town. Pop. 7000 to 8000 .

DULEEK, a vil. and par. Ireland, co. Meath. The village, 5 m. S. W. Drogheda, on the Nanny, has a few respectable houses, built of stone, and slated, but the greater part are thatched mud-cabins. It has a parish church, with a handsome spire, and an elegant white marble statue of Judge Trotter; a large R. Catholic chapel, and a courthouse, in which petty and quarter sessions are held; the ruins of the abbey of St. Kiernan, and of St. Patrick's chapel, and two antique stone crosses. There are a parish and a national school, and a dispensary. About 50 looms are employed in weaving bed ticking, and there is an extensive corn-mill. Four annual fairs. Area of par., 16,554 ac. Pop. (1841), 4594 ; of vil., 1158.-(Local Correspondent.)

DULEEK-Abbey, par. Irel. Meath; 1030 ac. Pop. 141.
DULKEN, a tn. Prussia, gov. of, and 17 m . N.W. Düsseldorf, at the source of the Neete. It is the seat of a law court, contains a R. Catholic parish church, and has manufactures of linen, a linen printfield, a worsted mill, and four annual fairs. Flax is extensively grown in the neighbour hood. Pop. 2230.

DULL, par. Scot., Perth; 134,400 ac. Pop. 752.
DULLINGHAM, a par. England, Cambridge; 3240 ac. Pop. 758.

DULMEN, a tn. Prussia, prov. Westphalia, gov. of, and $20 \mathrm{~m} . \mathrm{S}$. W. Münster, on a small stream. It contains a fine castle, the residence of the Duke of Croy-Diilmen, and three R. Catholic churches; is the seat of a law court, and has manufactures of linen, dyeworks, tileworks, a marble quarry, some general trade, and several mills. Pop. 2871.

DULOE, par. Eng. Cornwall ; 5900 ac. Pop. 937.
DULVERTON, a market tn. and par. England, co. Somerset. The town, $19 \frac{1}{2} \mathrm{~m}$. W. by N. Taunton, is well built, mostly of stone, obtained from quarries in the neighbourhood; kept clean ; water abundant. It has a neat Established church, an Independent chapel, two schools, and some minor charities. About 100 females are engaged in the crape manufacture; but the inhabitants, generally, are employed in agriculture. Weekly market on Saturday; two fairs annually. Area of par. 7760 ac. Pop. 1422.-(Local Correspondent.)

DULWICH, a vil. England, co. Surrey, 5 m. S. London, in a small vale surrounded by rising grounds, and surrounded with handsome villas. It is, however, noticeable chiefly on account of its college, founded, in 1619 , by Edward Allen or Alleyn, a distinguished actor in the reigns of Elizabeth and James I., and a contemporary of Shakspeare and Johnson. The members of the college are a master, warden, four fellows, six poor brethren, six sisters, 12 scholars, and 30 outmembers. The original revenues were only $£ 800$, but now amount to $£ 14,000$. The sons of inhabitants of Dulwich are entitled to gratuitous instruction; and certain sums, under the discretion of the master and wardens, are appropriated as exhibitions to either of the universities. Dulwich college has been always celebrated for its pictures, many of which were bequeathed by the founder; but the greater and more valuable portion of them were the bequest of Sir Francis Bourgeois, a landscape painter of some eminence, who died in 1810 ; he bequeathed also $£ 2000$ for the purpose of building a gallery for the reception and proper care of the pictures. A free school was founded in Dulwich, in 1741, by James Alleyne, a master of the college, for 60 boys and 60 girls, of which number, 12 of the former, and 20 of the latter, are clothed by subscription. Pop. (1841), 1904.

DUMARAN, an isl. Philippines, N.E. Palawan; lat. (E. point) $10^{\circ} 29^{\prime} \mathrm{N}$. ; lon. $119^{\circ} 56^{\prime}$ E. (R.) ; length and breadth, about 17 m ., and possesses shelter for vessels in some seasons of the year. The inhabitants are poor, and chiefly occupied in fishing trepang.

DUMBARTON, a maritime co. Scotland, consisting of two detached portions, the larger, and most W. having co. Perth N., Loch Lomond and co. Stirling E., the Clyde separating it from co. Renfrew S., and Loch Long separating it from co. Argyle W. Its utmost length is about 37 m ., breadth varying from 5 to 7 m ., and in some places, towards its N . extremity, diminishing to 1 and $1 \frac{1}{2} \mathrm{~m}$. The smaller portion is about 4 m . E. from the former, and comprises the two parishes of Cumbernauld and Kirkintilloch. It is about 14 m . long, and from $1 \frac{1}{2}$ to $3 \frac{1}{2} \mathrm{~m}$. broad, having the county of Stirling on the N. and E., and the county of Lanark on the S. and W. These two parishes formerly belonged to the county of Stirling, but were annexed to that of Dumbarton in the reign of Robert I. More than half the area of the county is occupied by lofty and rugged mountains, some of them attaining a height of upwards of 3000 ft . above sea level. Though unfit for cultivation, and covered with snow for several months in the year, they abound in excellent pasture for sheep, and produce many rare alpine plants. The lower lands again are fertile, and in general well cultivated. Next to its mountains, which contribute to the formation of some of the most magnificent scenery in Scotland, are, as regards picturesque beauty, its lakes, of which the principal is the far-famed Loch Lomond, with its numerous islands (see Lomond, Loch). The most considerable of the other fresh-water lakes, of which there are 9 or 10 , is Loch Sloy, the war-cry of the highland clan Macfarlane; Loch Gare, an arm of the sea lying parallel to Loch Long, and forming a part of the county into a peninsula, is likewise surrounded by picturesque scenery. The principal river is the Leven, rendered classic by Smollet's beautiful Ode. This river, the waters of which are singularly pure and limpid, issues from Loch Lomond, and discharges itself into the Clyde a little below the town of Dumbarton. The state of agriculture in this county is as various as its soil and surface. The farms in general are small, except where the heath and mountains are used as sheep pasture. Wheat is now raised to a considerable extent, limiting, proportionally, the cultivation of barley, but oats are the principal grain crop. Turnips, beans, and potatoes are also grown, the last in large quantities, and of superior quality. The prevailing breed of sheep, of which great numbers are reared in the hilly districts, are the $S$. of Scotland blackfaced sort, and the cattle of the Highland breed, but on the low lands of the shire the milch cows are mostly of the Ayrshire breed. The climate is in general mild, and healtliful, but extremely moist, and is thus more favourable to pasturage and the growth of wood than to agriculture. The latter at one time abounded, but the larger kinds of natural timber are now nearly extinct. There are still, however, extensive natural copeswoods, which add much to the beauty of the scenery, and large plantations of wood have been made during the last half century. The chief minerals are coal, limestoue, ironstone, and slate, all of which are wrought, more or less-the first two to a great extent, at Old Kilpatrick, Kirkintilloch, and Cumbernauld.

On the banks of the Leven, and at Milton, are several extensive cotton-printing and bleaching establishments. Sundry manufactures are also carried on in the town of Dumbarton (which see). The Dumbartonshire Railway gives communication between the Clyde at Bowling and the S. end of Loch Lomond; the detached part of the county is traversed by the Campsie branch of the Edinburgh and Glasgow Railway, and by the Clyde and Forth Canal, which likewise has its W. termination within the county, on the Clyde, at Bowling. Besides Dumbarton, the chief town, the county contains the towns of Helensburgh, Kirkintilloch, Cumbernauld, and the manufacturing villages of Alexandria, Renton, and Bonhill; and it is divided into 12 parishes. The county returns a member to the House of Commons. Registered electors (1850), 1238. Pop. (1841), 44,295; (1851), 45,103.

DUMBARTON, or DUNBARTON, a royal and parl. burgh, and seaport, Scotland, chief tn. of above co., l. bank, Leven, within a short distance of its junction with the Clyde, 13 m . N.W. Glasgow, on the Dumbartonshire Railway. It consists of one principal street, curved like a horse's shoe, from which numerous lanes and alleys diverge. The former is well paved, tolerably well kept, and is lighted with gas, as is the town generally. The houses on the line of the main street are, in general, well built, but in some of the subordinate streets and lanes there are houses antiquated and mean-looking, and

## DUMFRIES

npparently greatly wanting in comfort, accommodation, and cleanliness. The supply of water is indifferent, and is obtained altogether from wells, public and private. On the r. bank of the river is the suburb of West Bridgend, united with the town by a good stone bridge of five arches. The places of worship consist of the parish church, a neat structure; one Free church, two U. Presbyterian, one Baptist, one Episcopalian, and one R. Catholic. The only public building, exclusive of the churches, is the courthouse. The schools consist of the burgh academy, a Free church, and two female schools. There are a mechanics' institute, and a public reading-room. Glass was formerly extensively manufactured here, but that branch of industry is now altogether abandoned. Shipbuilding, both in wood and iron, is now (1851) the staple business of the town, and is carried on to a very great extent, there being two spacious yards for shipbuilding in each of these materials, or four yards in all, employing 1000 men ; and a marine engine manufactory has lately been erected, employing more than 100 men. Besides these, there are a distillery and brewery, a foundry, and a small machine manufactory. The river Leven is navigable to Dumbarton quay, at high water, for vessels of considerable size; but at very low tides, only small vessels can come so far up, in consequence of the obstruction presented by a bar and sandbanks near the month of the stream, for the removal of which money has been subscribed. The shipping belonging to the port is inconsiderable. A little to the S . of the town is the famous rock or castle of Dumbarton, situated on a flat point of land at the confluence of the Leven with the Clyde, now accessible at all times, by land, although formerly surrounded by water. The rock terminates at the summit in two points, and, being precipitous and entirely isolated, has a very striking ap. pearance. It is 206 ft . in height, and about 1 m . in circumference at the base. On the side facing the river, looking S., stands the house once occupied by the governor; and between the two summits are the various buildings of the fort, consisting of the barracks, armoury, \&c.; the latter containing about 1500 stands of arms, the former capable of accommodating 150 men. In the armoury is kept the double-handed sword of the Scottish patriot Wallace. A long flight of steps leads to the barracks, \&c., which are accessible by no other route. At what period a castle was first erected on this singular rock does not appear, but it seems to have been a stronghold from the earliest times, and is known to have been so for at least 1000 years. It is a place of considerable historical interest. It was at different times in possession of Edward I., having been held, at one period, four years for that monarch by Sir John Monteith, the infamous betrayer of Wallace, who was at that time sheriff of the county, and governor of the castle. It came subsequently and successively into the possession of Baliol, Bruce, Queen Mary, Charles I., and Cromwell. It was from this castle that the unfortunate Queen just named was conveyed to France while yet a child; and it was to this fortress her friends intended conducting her after her escape from Lochleven, had they not been intercepted, and defeated by the Regent Murray at Langside. In 1563 , at a more happy period of her troubled career, she visited this fortress with a numerous retinue, on a progress to Aıgyleshire. Dumbarton Castle was the scene, alse, of a singularly daring adventure. In May 1571, it was taken by escalade, on a dark and stormy night, by Captain Thomas Crawford and a few soldiers, under circumstances demanding an extraordinary degree of intrepidity. The last memorable occurrence connected with this ancient fortalice was the visit of her present Majesty, Queen Victoria, on Angust 17, 1847, on her way to the Highlands. This fortress is one of the four stipulated to be kept in repair by the articles of the Union. Dumbarton was known, in ancient times, by the name of Alcluyd, which, in the British language, signifies the rock high on the Clyde. It unites with Port-Glasgow, Renfrew, Rutherglen, and Kilmarnock, in sending a member to the House of Commons. Pop. (1841), 3782 ; (1851), 5411.

DUMBLANE. Sce Dunblane.
DUMBLETON, par. Eng. Gloucester; 2100 ac. P. 497.
DUMBRA VICZE, a th. Ilungary, Thither Theiss, co. of, and about 40 m . from Arad. It contains a Greek nonunited parish church. The inhabitants are almost all Wallachians. Pop. 1746 .

DUMDUM, a military vil. and extensive cantonment, Itindoostan, prov. Bengal, 6 m . E.N.E. Calcutta. It is the
head quarters of the Bengat artillery, and may be considered the Woolwich of India. All the young officers arriving from Europe, as well as the recruits, are practically trained here before being sent to their respective regiments. The officers' rooms are bandsomely fitted up; and, besides the mess-room, comprise a billiard-room, a select library, a model-room, and a collection of remarkable arms. Close by, is a large plain appropriated to artillery practice. There are here a church and free school.

DUMFRIES, a maritime co. Scotland, on the Solway Firth, having N. and E. cos. Lanark, Peebles, Selkirk, and Roxburgh; W., Ayr and Kirkeudbright; S., the Solway Firth, and part of Cumberland; length, N.W. to S.E., 53 m .; breadth, between 32 m . and 33 m .; area, $808,320 \mathrm{ac}$., of which between one-fourth and one-fifth are supposed to be arable. The surface is irregular, but for the most part mountaineus, especially in the N. and N.W. districts, where the hills attain a considerable elevation, some of them exceeding 2000 ft . Lofty mountains occur also at intervals throughout the whole length of the N. limit of the county, including Hartfell, the highest in the $S$. of Scotland, 2790 ft . in height, and Ettrick Pen, about 8 m . S.E. the former, 2220 ft . These parts of the county abound in the most romantic scenery. In the lower, or $S$. portions, there are some extensive morasses, one of which, called Lochar Moss, is from 10 to 13 m . long, and from 2 to 3 m . broad. In these swamps, large trunks of trees, marine shells, ancient canoes, and iron anchors, have been found at great deptlis in the mess. Arable husbandry has greatly improved here during the last half century, as have also farm buildings of all descriptions. They are now mostly commodious and well arranged, built of stone and lime, and covered with slate. Oats, potatoes, and turnips, are the most common and most extensive products. The cultivation of the last has increased greatly of late years; they are generally consumed on the ground by sheep. The cattle are mostly of the Galloway breed, and are much in request for the Englislı market. The sheep on the bill pastures are mostly Cheviots; on the lower, and arable lands, the Leicester prevails. Immense numbers of pigs are reared in the county, hams and bacon, both of excellent quality, being cured in large quantities, for the Liverpool, London, and Newcastle markets. The estates in this county are generally large, and mostly entailed. The farms in the lower districts vary from 100 to 400 ac ., and in the higher, from 500 to 5000 ac . This county has profited in a remarkable manner by the facilities afforded by steam navigation in conveying its produce, including sheep and cattle, to distant markets, particularly Liverpool. The principal streams are the Nith, the Annan, and the Esk, all falling into the Solway Firth, which in fact receives the whole of the drainage of the county. There are likewise a number of small lakes. The minerals most abundant are coal, lead, iron, antimony, and gypsum. Coal is worked at Canonbie, and at Sanquhar, and lead mines at Wanlockhead and Leadhills, from which 48,000 tons are annually extracted. The Wanlock ore contains a considerable proportion of silver. Limestone and freestone abound in various parts of the county. Gold also has been found amongst the mountains; and in the time of James V., considerable quantities were obtained. There are no manufactures worth mentioning. The county contains 43 parishes; returns one member to the House of Commons. Registered electors (1850), 2195. Principal towns-Dumfries, Annan, Sanquhar, and Lochmaben, which unite with KirkeudBright in sending a member to Parliament. Pop. (1841), 72,830; (1851), 78,123.

DUMFRIES, a river port, and parl. bor., Scotland, cap. above co., beautifully sitnated, 1 . bank, Nith, about 6 m . from its junction with the Solway Firth, 64 m . S.W. Edinburgh, a station on the Scottish S.-western Railway. It is one of the handsomest towns in Scotland. The streets are wide, well-paved, well lighted with gas, and kept remarkably clean. Excellent water, also, is abundant. The houses are chiefly built of red sandstone, and are generally remarkable for their clegance. On the opposite side of the river is an extensive suburb called Maxwelltown, which communicates with the town by an old and a handsome modern bridge. The public buildings comprise the trades' hall, county jail, a large new building; the court houses, the assembly rooms, theatre, academy, the Crichton royal institution, or lunatic asylum; the

Dumfries and Galloway royal infirmary, and the Dumfries savings'-bank, in front of which is a statue of the late Rev. Dr. Duncan, minister of the neighbouring parish of Ruthwell, the originator of savings'-banks. Near the centre of the town stands what is called the Mid Steeple, built by Inigo Jones, and in which the meetings of the town council are held; and in the centre of Queensberry Square there is a stately Doric column, erected to the memory of Charles, Duke of Queensberry. The ecclesiastical edifices, some of which are neat and tasteful buildings, are three Established churches, a Free church, three U. Presbyterian, a Reformed Presbyterian, a Wesleyan Methodist, a United Christian, an Independent, an Episcopal chapel, a R. Catholic chapel, and some minor places of worship. There are, besides, a number of religious and benevolent societies. The means of education are also abundant, there being no fewer than four endowed, and 30 unendowed schools, many of them of high character. Its literary and scientific institutions include an astronomical association, a horticultural society, a mechanics' institution, four public reading rooms, four public, and three circulating libraries. The only articles manufactured in Dumfries to any extent are hats, stockings, principally of lambs' wool; clogs, strong shoes with thick wooden soles; and ordinary shoes, of which considerable quantities are exported. There are also several large tanneries and breweries, a very extensive basket establishment, and a woollen spinning and weaving mill. The weekly cattle markets of Dumfrics have long been celebrated; they are held upon the 'Sands,' an open space by the river side, set apart for the purpose. Pork is sometimes sold at these markets to the extent of $£ 4000$ to $£ 7000$ in one day. The river Nith is navigable to the town for vessels of above 60 tons. The principal foreign trade is with America, and a little with the Baltic for timber. The chief imports ure coal, lime, iron, tallow, slate, hemp, bones, wine, and colonial produce; the exports are principally grain, fat cattle, sheep, pork, wool, hosiery, wood, grass seeds, freestone, \&c. There are three stations lower down the Nith for vessels drawing too much water to come up to the town. Foreign traders generally stop at that nearest the month of the river. Of this description, there are 12 or 14 belonging to the town. The whole number of vessels, of all sizes, belonging to the port, is between 80 and 90 . Dumfries is governed by a provost, magistrates, and town council. It is of great antiquity, and has been the scene of some remarkable historical events; one of which was the slaughter of John Comyn by Robert Bruce, which occurred in the chapel of the Franciscan or Greyfriars' convent, that stood in the street called the Friars' Vennel, on February 10, 1306. In the burying - ground of St. Michael's or the old church are deposited the remains of the Scottish poet Burns, who died in Dumfries, and whose resting-place is marked by a handsome mausoleum, erected by subscription, as a tribute to his genius. Burns resided in Dumfries for some years preceding his death, and the street in which he lived, a very humble one, is now distinguished by his name. Dumfries unites with Annan, Sanquhar, Lochmaben, and Kirkcudbright in sending a member to the House of Commons. Registered electors (1850), 521. There are a number of handsome villas around the town, and the general tone of society is much above that usually met with in provincial towns of similar magnitude. Pop., bor. (1841), 10,069; (1851), 11,106.-(Local Correspondent.)

DUMMER, par. Eng. Hants; 2100 ac. Pop. 412.
DUMPO, or Doompo, a tn. Tibet, near a little river, at some distance from the l. bank of the Sutlej ; lat. $31^{\circ} 5^{\prime} \mathrm{N} . ;$ lon. $80^{\circ} 12^{\prime} \mathrm{E}$. Locusts, of different species, breed in the vicinity; and on a neighbouring mountain are found the ruins of several ancient monuments.

DUN, par. Scot. Forfar; 12 sq. m. Pop. 581.
DUNA, two places, Hungary :-1, Duna-vecse, A market tn., Hither Danube, co. and 40 m. S. Pesth, l. bank, Danube. It belongs to the Foldvary family; and contains a Protestant parish church. Pop. 7910.-2, Duna-Szent-Gyorgy, A market tn., Thither Danube, co. Tolna, 63 m. S.S.W. Pesth. It contains a Protestant chapel. Pop. 1930.

DÜNA, a river, Russia. See Dvina.
DÜNABURG, or Dvinabiekg, a fortified th. Russia, gov. Vitepsk; lat. $55^{\circ} 53^{\prime} \mathrm{N}$. ; lon. $26^{\circ} 24^{\prime} \mathrm{E}$. It was once capital of Polish Livenia, r. bank, Diina, or Dvina, 112 m. S.E. Riga; and has a Greek and two R. Catholic churches, a syna-
gogue, and a convent; a considerable trade; and three yearly fairs. Pop. (1842), 11,361.

DUNAGHY, par. Irel. Antrim; 13,743 ac. Pop. 3881.
DUNA MON, par. Irel. Galway and Roscommon; 4656 ac. Pop. 955.

DUNANY, par. Irel. Louth; 1662 ac. Pop. 709.
DÜNAMÜNDE, a fort, Russia, prov. Livonia, at the mouth of the Duina, near Riga. It was originally a Cistertian convent, and is of little military importance. It is occupied by a small garrison; and contains a church for their use, and a prison, in which state prisoners have occasionally been confined.

DUNBAR, a royal and parl. bor. and seaport, E. coast Scotland, co. Haddington, 27 m . E. by N. Edinburgh, a station on the North British Railway, lat. (church) $55^{\circ} 59^{\prime} 54^{\prime \prime} \mathrm{N}$.; lon. $2^{\circ} 31^{\prime}$ W. (R.) It stands on a slight eminence, and consists, chiefly, of one spacious street, running E. and W., with some smaller streets, and a number of lanes. The houses are mostly modern, the shops good, and the streets are lighted with gas, and the outskirts are adorned with a number of tasteful villas. The parish church, built of red sandstone, is an elcgant Gothic building, standing on a height, 65 ft . above the level of the sea, with a magnificent tower $107 \frac{1}{2} \mathrm{ft}$. ligh, which forms a well-known landmark to seamen. In this church is preserved a splendid marble monument 26 ft . high, and 12 broad, erected to the memory of George Home of Manderston, created Earl of Dunbar, in 1605. The other buildings of any note are the town-hall, the new burgh schools, the assembly rooms, and Dunbar House. Besides the parish church, there are a Free church, at the village of Belhaven, within the burgh; two U.Presbyterian churches, and a Wesleyan Methodist chapel, two burgh schools, a grammar and mathematical and several other schools, and a mechanics' institution, with a respectable library attached. There are several charitable and benevolent institutions. The harbour is rendered of difficult access by rocks at the entrance; once gained, however, it is safe and commodious. It has 9 ft . water at neap, and 14 at spring tides. Timber, coals, and foreign grain, are the principal articles of import. There are in the town and vicinity a soap-work, an iron-foundry, a steam-engine manufactory, and several breweries; some shipbuilding and manufactures of cordage and sailcloths. and fish-curing, employs a considerable number of hands. Lobsters, also, are caught in great numbers, and are preserved for the London market, in pits cut out of the rock within sea mark, and called hullies. The principal object of interest at Dunbar is its castle, the ruins of which are situated on the summit of a lofty, rugged, sea beaten rock. The date of the buildings is unknown. After the battle of Bannockburn, Edward II. took refuge here, and afterwards continued his flight by sea to Berwick. It was subsequently in the possezsion, alternately, of the Scotch and the English, being often perseveringly besicged, and as often bravely defended. The most remarkable defence was, in 1337, against the Earl of Salisbury, by Black Agnes, countess of Dunbar, who, in the absence of her husband, successfully held out the castle for 19 weeks. An Act of Parliament, passed in 1488 , directs the immediate demolition of the castle of Dunbar, as a place dangerous to the peace of the realm; but it was not till 1567, when another Act of the same import was passed, that the sentence of destruction was carried into effect. Dinbar was erected a royal burgh by David 1I. It is governed by a provost, magistrates, a town council, and unites with Haddington, North Berwick, Jedburgh, and Lauder, in returning a member to the House of Commons. Pop. (1841), burgh, including Belhaven vil., (380), 3,013; (1851), 3,038.

DUNBARNY, par. Scot. Perth; 4 m . by 4 m. Pop. 1752.
DUNBELL, par. and tn., Irel. Kilkenny; 2579 ac. P.569.
DUNBIN, par. Irel. Lowth ; 2169 ac. Pop. 1115.
DUNBLANE, or Dumblane, a market tn. and old Episcopal city, Scotland, co. Perth, 6 m . N.E. Stirling, pleasantly situated on the Allan, and a station on the Scottish Central Railway. It consists of one principal, and several smaller streets, all narrow and ill kept; houses generally mean, and mostly roofed with thateh. The most remarkable object is an ancient cathedral, partly in ruins, with a tower, situated on an eminence overlooking the town. The date of its erection is uncertain, but is supposed to have bcen in the 12 th century. The nave is 130 ft . by 58 ft . and the choir,
now the parish church, is 80 ft . by 30 ft . Bishop Leighton, who held the see of Dumblane from 1662 to 1670 , bequeathed his library to the clergy of the diocese, his executors providing at their own expense a suitable building for its reception, and endowing the establishment with funds to defray the librarian'a salary, uphold the fabric, and ald to the books. The public, as weli as the clergymen of the presbytery, have access to the library, which has received large accessions from various quarters. There are other two libraries in the town. Tesides the parish church, there are here places of worship in connection with the Free, the United Presbyterian, Congregationalist, and Scottish Episcopalian churches. Botls the sheriff court and commissary court are held every Wednesday, during session; and there is here a large district prison. Market-day, Thursday; several fairs, chiefly for cattle, are held annually. At Cromlex, about 2 m . distant, is a mineral spring of some celebrity. Dumblane gives the title of Viscount, in the peerage of Scotland, to the Duke of Lecds (Osborne). Pop. (1841), 1911.

DUNBOE, par. Irel. Londonderry; 14,811 ac. P. 4627.
DUNBOG, par. Scot. Fife; 4 m . by $1 \frac{1}{2} \mathrm{~m}$. Pop. 220.
DUNBOYNE, a vil. and par. Ireland, co. Meath. The village, 10 m . W.N.W. Dublin, contains an ancient church, and a dispensary, and has a well-frequented annual fair on July 9, chiefly for horses and cattle. Area of par., $13,686 \mathrm{ac}$. Pop. 2249.

DUNBRODY And St. James, par. Irel. Wexford; 8489 ac. Pop. 3693.

DUNBULLOGE, par. Irel. Cork, 16,783 ac. Pop. 5269.
DUNCANNON, a vil. Ireland, co. of, and 22 m. S.W. Wexford, on the shore of Waterford harbour, consisting of one principal street, and containing a R. Catholic chapel, and several schools; and a fort on a rock projecting from the $E$. side of Waterford harbour, whence, after the battle of the Boyne, James II. embarked for France. Duncannon gives the title of Viscount, to the Ponsonby family. Pop. 521.

DUNCANSBY HEAD, a well known and picturesque promontory, N.E. coast Scotland, co. Caithness, at the E. entrance into the Pentland Firth; lat. $58^{\circ} 39^{\prime}$ N.; lon. $3^{\circ} 1^{\prime}$ W. (R.) It consists of a circular rocky eminence of abont 2 m . in circumference, and is indented by several large ravines, and remarkable fissures. Close by the promontory, are two singular insulated rocks, of fantastic form, and great height, called the Stacks of Duncansby, which in spring and summer are covered with sea-fowl. About $1 \frac{1}{2} \mathrm{~m}$. W. of the promontory stood the celebrated John O'Groat's House, of which no trace now remains.

DUNCHIDEOCK, par. Eng. Devon; 710 ac. Pop. 208.
DUNCHURCH, a vil. and par. England, co. Warwick. The village, 13 m . E.N.E. Warwick, has a church, and a free grammar-school, founded in 1707. Area of par., 5010 ac . Pop. 1390.

DUNCORMICK, par. and tn., Irel. Wexford; 5711 ac . Pop. 1796.

DUNCTON. par. Eng. Sussex ; 1330 ac. Pop. 308.
DUNDALK, a maritime tn., and parl. bor. Ircland, cap. co. Louth, $45 \mathrm{~m} . \mathrm{N}$. by W. Dublin ; lat. $54^{\circ} 0^{\prime} 30^{\prime \prime} \mathrm{N}$. ; lon. $6^{\circ} 24^{\prime}$ W. (r.), on a plain, r. bank, Castletown River, where the latter suddenly expands to an estuary, half a mile wide, and about 2 m . from its embouchure in Dundalk Bay. It has two principal streets, each 1 m . in length, one straight, the other somewhat crooked, but both are tolerably well kept, and intersect each other in the market-place. The older houses, of which there are many, are of stone, the more modern of brick. The town is abundantly supplied with pump-water, much impregnated with saline particles held in solution, and is lighted with gas. The principal public buildmgs, exclusive of the churches, are the courthouse, in the Doric style, with a portico after the model of the temple of Theseus at Athens; the county infirmary, later English; national school, guildhall, new jail, cavalry barracks, barrack hospital, and riding house. Some of the first class private houses are also very handsome edifices. The places of worship are an Episcopal church, a R. Catholic cathedral, a very beautiful structure; a Friary chapel, a Presbyterian, and two Methodist chapels. A nunnery, also, has been recently established. The edncational establishments comprise an endowed grammar school, a free school, a national, a free daily, and infant schools, besides a number of private schools. The
literary and benevolent institutions are a mechanics' institute, with lending library attached, and two newsrooms; an infirmary, a dispensary, and a ladies' work-socicty.

The principal manufactures are flax spinning, pin and starch making, one establishinent for each. There are also a very extensive distillery, two breweries, two rectifying distilleries, a foundry in which machinery and agricultural implements are made, several rope manufactories, and three corn-mills.

The chief trade of Dundalk is in agricultural produce, of which, it is computed, 23,400 tons annually, besides horsez, cows, sheep, and pigs, are shipped for various British ports. The principal foreign imports consist of timber, tallow, wine, and bark. In this department of the trade of the town, an extraordinary improvement has been in progress during the last 17 years. In 1834, the gross produce of the customs was only $£ 4460$; while, in 1848 , it amounted to $£ 44,393$. The number and tonnage of sailing vessels belonging to the port, in 1848, was 27, aggregate tonn. 2307; steamers, three, of 1023 tons. Comparing the five years ending January 5, 1850, with the preceding five years, the foreign trade had more than doubled itself, the increase being 65 vessels, tonn. 12,480 , inwards; and 40 vessels, tonn. 8039 ontward. The bar and harbour have been recently deepened, so that vessels drãwing 16 ft water may now come up. The channel, when completed, will be 150 ft . wide at the quays. The rise of tide at the har, where there is now a lighthouse on the screw principle, is 16 ft . King Edward Bruce, brother to Robert Bruce of Scotland, was killed in battle near Dundalk, and part of his body is buried at a place called Faughart, close to the town. Dundalk returns a member to Parliament. Registered electors (1850), 400. There is direct railway communication between Dundalk, Drogheda, and Dublin. Pop. (1851), 11,000.-(Iocal Correspondent.)

DUNDALK BAY, an inlet, Irish Sea, E. coast, Ireland, co. Louth, between Coolcy Point on the N., and Dunany Point on the $S$. It is about 8 m . wide, and as many inland. It is shallow, and the Dee and other rivers which flow into it are small. It contains extensive oyster beds.

DUNDAS.-1, A manufacturing vil. Upper Canada, W; end of Lake Ontario. It has six churches and a mechanics' institution. It is connected with Burlington Bay, at the W. extremity of Lake Ontario, by a canal 5 m . long. Pop. $(1852), 3517 .-2$, A chain of small isls. stretching along the F. coast of Africa, close to the land, from lat. $2^{\circ}$ S. nearly to the equator. They amount to abont 500 , many measuring from $2 \frac{1}{2} \mathrm{~m}$. to $4 \frac{3}{4} \mathrm{~m}$. in length, but the majority are of inconsidcrable size, rising abruptly from, and overhanging a narrow line of reefs. Throughout the whole space occupied by these islands, 154 m. , there is but one secure retreat for vessels at all times. It is at the entrance of a river, and is called Port Durnford; lat. $1^{\circ} 13^{\prime} 12^{\prime \prime} \mathrm{S}$.; lon. $41^{\circ} 54^{\prime} 15^{\prime \prime}$ E. (R.) -3 , A river, E. Africa, which falls into Delagoa Bay, its sources being, as believed, about 30 or 40 m . inland; it is the only one of several strcams that fall into the same bay, that has fresh water in the dry season. It abounds with hippopotami. $-4, \mathrm{~A}$ strait, N. coast: Australia, between Melville Island and Victoria Peninsula, one of the two passages leading into Van Diemen's Gulf.

DUNDEE, a royal bor. and seaport, Scotland, co. Forfar, fincly situated, 1. bank, Firth ot Tay, about 8 m . from the open sea ; lat. $56^{\circ} 27^{\prime} 36^{\prime \prime} \mathrm{N}$. ; lon. $2^{\circ} 57^{\prime} 45^{\prime \prime}$ W. (н.) ; 37 m . N. by E. Edinburgh. It stretches along the Tay, or E. to $W$., for about $1 \frac{3}{4} \mathrm{~m}$., its greatest length, and recedes inland, with a gradual ascent, to a distance of about half a mile, its extreme breadth. Its appearance from the sea, and opposite shore, from which it is distant about $1 \frac{1}{2}$ to 2 m. , is at once striking and pleasing; an effect nuch cnhanced by the beautiful green hills which form the background of the picture, one of which, the nearest, called the Law, is 525 ft . ligh. In the centre of the town is a large open space, surrounded with good, substantial free stone buildings, of four storics in height, called the Cross or Marketplace, 360 ft . long, by 100 broad, from which a number of the principal streets diverge. The more recently formed strects are, in general, spacious and handsome; but most of those of more ancient date are narrow, irregular, and ill built. The town is lighted with gas, and is amply supplied with water. The most conspicuous object in Dundee is its old tower, 156 ft . high, built in the 12 th century, the only remaining

## DUNFERMLINE

portion of an edifice burnt down some years ago; and to which three modern parochial churches have been built in form of a cathedral, the nave, choir, and transept respectively forming a separate church, and the whole constituting one of the most striking architectural features of the town. Many of the other churches are also elegant buildings. In all, there are five Established churches, and two chapels; eleven Free, six United Presbyterian, and three Congregationalist churches, three Episcopalian chapels, three R. Catholic, one Friends', and several other Dissenting places of worship. The other public buildings of note are-the townhall, trades-hall, the academy, the new exchange, containing, besides other accommodation, a handsome reading-room; Watt institution, the theatre, infirmary, and the royal lunatic asylum. To these may be added, the jail and bridewell, under one governor, erected within these few years at an expense of $£ 26,000$; and an imposing Norman triumphal arch, erected in front of the mid quay, to commemorate the landing at Dundee of Her Majesty Queen Victoria, in Sept. 1844. There are two handsome cemeteries, one on the N., and the other on the W. side of the town, both tastefully laid out; and above the former is the new bleaching-green, bordered by trees and shrubs, and intersected by gravel walks, with rustic seats placed at intervals.

Besides the academy, the principal seminary of the town, the grammar school, now united with the former, and the sessional school, there are a large number of private and Sabbath schools, including several connected with the spinning establishments of the town, the teachers of which are paid by the proprietors of these works. There are a number of libraries in the town, the principal of which are the Dundee public library, consisting of several thousand volumes; the Watt library, and the Law library; and the Dundee Literary Institute has a handsome reading-room and library in a central part of the town. Exclusive of the infirmary and dispensary already alluded to, there are a number of charitable and benevolent institutions and societies, and various religious associations.

Dundee has long been celebrated for its manufactures, particularly those of the coarser descriptions of linen, duck, and canvas. The linen manufactures employ altogether 10,157 individuals, of whom 4543 are females; and their entire value is estimated at from $£ 1,500,000$ to $£ 1,600,000$ annually. The linen yarns are manufactured partly in the town, and partly in the neighbouring towns and villages; and a portion of them is exported to France and other foreign countries. The staple articles of import are flax and hemp from foreign countries, and coals and lime coastwise ; of export, linens and linen yarns; to which may be added, since the opening of steam communication with London, large exports of black cattle, sheep, and agricultural produce. More than half the linens shipped at Dundee are exported to foreign countries, being generally sent in the first place to Glasgow, Liverpool, and London, where they are re-shipped for their destinations. The whole of the mills are driven by steam power. Another manufacture of some importance is the Dundee kid gloves, famed for their neatness and durability. Shipbuilding, tanning, \&c., are also carried on to a considerable extent. The harbour accommodation, and docks of Dundee, are of the best description; and include two wet docks, one of $6 \frac{1}{4} \mathrm{ac}$. and another of $5 \frac{\mathrm{ac} .}{}$, with a tidal harbour of $4 \frac{3}{4} \mathrm{ac}$. connected with them; the breadth of the lock of the former, to which is attached a splendid graving dock, is 40 ft .; and that of the latter, which is fitted to admit steamers, 55 ft . A wet dock of $14 \frac{1}{2}$ acres is now being constructed, the lock of which will be 60 ft ; and there are others embraced by the harbour plaz, which, when executed, will greatly extend this species of accommodation. The quays are wide, affording berthage for above 65 vessels, and there are spacious carpenters' and shipbuilding yards, with a slip capable of drawing up a vessel of 800 tons. A large crane, of 30 tons power, is erected on the S.E. corner of Earl Grey's Dock, for the purpose of lifting the heavy machinery and boilers of steam-vessels, there being now a considerable trade carried on in constructing and fit-ting-in the machinery of steamers at the port. The registered shipping of the port, in 1851, numbered 382 vessels; aggregate tonn. 72,754.
Dundee was long considered one of the most unhealthy towns in the United Kingdom, but some later inquiries have
led to a contradiction of this opinion, and, without claiming any remarkable salubrity for the place, would show that the value of life stands higher there than in either Liverpool or Glas-gow.-(Jour. London Stat. Soc., vol. viii., p. 324.) The communication between Dundee and the opposite shore, a distance of from $1 \frac{1}{2}$ to 2 m ., is maintained by a large and handsome steamer of peculiar and admirable construction for its purposes, which are the conveyance of cattle, carriages, \&c., as well as passengers. About 100,000 persons are conveyed across annually, besides carriages, horses, cattle, \&c. The trip is performed in 20 minutes. There are four railways connected with the town:-One to Newtyle, from which are branches to Cupar-Angus and Glammis, on the Scottish Midland Junction (this being the first railway line in Scotland); one to Arbroath, with branch to Montrose, and continuation to Aberdeen; another (the Edinburgh, Perth, and Dundee) to Edinburgh, crossing the Firths of Tay and Forth by powerful steamers; and a fourth to Perth, and thence to the South, by the Scottish Central, \&c.

Dundee was at an early period a place of considerable note, and, like most old towns, was originally walled. It was erected a royal burgh by William the Lion, was twice in the possession of the English onder Edward I., was as often retaken by Wallace and Bruce, and in the reigns subsequent to that of the latter was ranked the third town in Scotland after Edinburgh. At the Reformation it was distinguished by the name of 'The Second Geneva,' for its zeal in behalf of the new faith. In 1645, it was besieged, taken, and sacked, by the Duke of Montrose; and six years afterwards, namely, in 1651, it was stormed by Monk, when a great number of its inhabitants were put to death, not fewer, it is said, than a sixth part, or about 1300 persons. During the reigns of the Scottish kings, Dundee was one of their places of residence. It is the birthplace of Hector Boece, the historian; and of Admiral Duncan, the hero of Camperdown. The town re turns one member to the House of Commons. Registered electors (1851), 3290. Pop. (1841), 60,553; (1851), 78,829.

DUNDENHEIM, a vil. Baden, Middle Rhine circle, bail. Lahr; with a chapel. Pop. 800.

DUNDERROW, a par. and tn. Ireland, Cork; 6435 ac. Pop. 3082.

DUNDONALD.-1, a par. and small vil. Scotland, co. Ayr. The parish is 7 m. by 3 m .; and the village, 4 m . S.W. Kilmarnock, is beautifully situate near the remains of an ancient castle, and has a cattle show in May. This place gives the title of earl to the noble family of Cochrane. Pop. 6716.-2, A vil. and par. Ireland, co. Down. The village, 5 m . E. Belfast, contains a small church, and a Presbyterian meeting-house. In the immediate vicinity is an extensive bleaching-green. Area of par., 4635 ac. Pop. 1460.

DUNDRUM, two vils. Ireland:-1, co. of, and $3 \frac{1}{2} \mathrm{~m}$. S. Dublin, pleasantly situate on a sheltered declivity, and containing a R. Catholic chapel, school, and dispensary. Pop. 550.-2, co. Down, 7 m. S.W. Downpatrick, on the inner part of Dundrum Bay, much resorted to for sea-bathing. Near it are the ruins of Dundrum castle.

DUNDRUM BAY, an inlet, Irish Sea, E. coast, Ireland, co. Down, between St. John's Point on the N.E., and Dunmore Head on the S.W., 5 m . S. Downpatrick. It is 9 m . wide at its entrance, and nearly 3 inland. It is exposed to a heavy swell in S. and S.E. winds. The steam-ship Great Britain was stranded here in 1846.

DUNDRY, par. Eng. Somerset; 2820 ac. Pop. 536.
DUNE, or Dun, an isl. China Sea, E. coast, Anam; lat. $12^{\circ} 15^{\prime} \mathrm{N}$.; lon. $109^{\circ} 30^{\prime} \mathrm{E}$. It is of a moderate height, and flat on the summit when viewed in some directions.

DUNEANE, par. Irel. Antrim; 13,128 ac. Pop. 6369.
DUNEANY, par. Irel. Kildare; 3084 ac. Pop. 617.
DUNEDIN, a tn. New Zealand. See Otago.
DUNFANAGHY, a seaport tn. Ireland, co. Donegal, 31 m . N.W. Lifford, at the head of an inlet, forming part of Sheephaven Bay. It is built of stone, and has some neat houses, a courthouse, markethouse, constabulary police barrack, dispensary, workhouse, fever hospital, and two schools. Some oats, barley, flax, butter, pork, and fish are exported. Pop. (1841), 529--(Local Correspondent.)

DUNFERMLINE, a royal and parl. bor. Scotland, co. Fife, W. dist., about 3 m . N. the Forth, and 13 m . N.W. Edinburgh. It is agreeably situate on the side and summit
of an acclivity facing the S., and, when approached from this direction, has a very imposing appearance. It consists chiefly of three parallel streets, stretching W. to E., and three other streets intersecting them nearly at right angles, and of several extensive suburbs branching off in all directions, but chiefly W. Owing to the nature of the ground, the streets, in the direction of the acclivity, are ateep, and have few pretensions to regularity, but the High Street, which is nearly 1 m . in length, is spacious, contains many houses of three stories, of a respectable and substantial appearance; and is continued W. by a handsome street, built partly across a deep ravine, and occupied, for the most part, by elegant shops. The space occupied by the town and suburbs is larger than the population might seem to require, many of the houses having garclens attached to them; but it is somewhat remarkable, that though Dunfermline, a few years ago, possessed, in its town Green, one of the finest public walks of which any provincial town in Scotland could boast, it has not now a single public square to which the inhabitants can resort either for business or recreation. But if, in this respect, the town has been retrograde, in many others it has made rapid progress, and, in 1850 , obtained the removal of one of the greatest disadvantagea under which it laboured, by the introduction of an abundant supply of excellent spring water. The principal modern edifices are the parish or abbey church, so called from occupying the site of the old church of the abbey, destroyed at the Reformation, a spacious and handsome Gothic structure, with a square tower, rising, from the intersection of the nave with the transepts, to the height of 100 ft ., and containing, beneath its pulpit, the remains of King Robert the Bruce, which were discovered in digging its foundations; the guildhall, with a spire 132 ft . high, and containing the public offices connected with the county; the townhouse, the new jail and poorhouse, both situated in the town Green already mentioned ; Queen Ann Street church, in connection with the U. Presbyterians, a huge ungainly edifice, forming, from its elevated site, the inost conspicuous object in the town, from whatever direction it is approached, with an open space in front, on which has recently been erected a colossal statue of Ralph Erskine, one of the chief founders of the first great secession from the Establishment; Gillespie church, so called in honour of Mr. Gillespie, who, on his expulsion from the parish church of Carnock, removed to Dunfermline, and founded the Relief Secession; the Episcopalian, Independent, and various other churches, most of them modern, and several of them handsome, including, in all, three Established, three Free, four U. Presbyterian, two Baptist, an Episcopalian, a Congregationalist, and a R. Catholic. The principal educational establishments are the grammar and the commercial schools. There are a number of other schools, several of them in connection with the different religious denominations. Of these, the most important are Maclean school, belonging to the Establishment, and the Free abbey church school. The staple manufacture is table linen, in regard to which the town early took the lead, and is still unrivalled by any other town in the kingdom. This manufacture, together with that of coloured worsted and cotton covers, which has been added to it, and almost equals it in extent, occupies about one half of the population. There are also numerous spinning-mills, extensive malleable iron works, a large power-loom factory, and, in the vicinity, several important collieries. Dunfermline connects, E., with branch of the Edinburgh and Northern, and W., with the Alloa and Dunfermline railways, both of which have a common station immediately N. of the town. Among the antiquities of the town, the most important are the monastery, of which the most perfect portion now remaining forms a maguificent entrance to the abbey church, and is terminated, at its W. end, by a fine old spire, with a bartizan, from which at least 14 counties are said to be visible; the Frater's hall, immediately adjoining, with a pyramidical tower, which bears the name of Malcolm Canmore, and a much admired Gothic window; and the remains of the royal palace, consisting chiefly of a large square tower built over an arch, beneath which the public road passes, and a lofty buttressed wall, overhanging a finely wooded and romantic glen, and containing, among its windows, one which is atill shown as that of the room in which Charles I. was born. Dunfermline unites with Stirling, Inverkeithing, Culross, and S. Queensferry, in sending a member to the House of Commons. Area of par.

23,040 ac. Pop. 20,217; of bor. (1841), 13,296; (1851), 13,861.

DUNFIERTH, par. Irel. Kildare; 5518 ac. Pop. 938.
DUNGANNON, an inland tn., and parl. bor. Ireland, co. Tyrone, and 35 m . W. by S. Belfast, on the acclivity, near a branch of the Blackwater. It consists of an old and a new tn., comprising a square, and several streets; contains many good houses, and is lighted with gas. It has a courthouse, and bridewell attached, a handsome modern structure, a parish church, R. Catholic chapel, meeting-houses for Presbyterians and Methodists; a fever hospital, and an endowed classical and several other schools. Linens are manufactured here to a considerable extent, also coarse earthenware, fire-brick, and tiles. There are, besides, a large distillery, a brewery, and a corn-mill. Fairs monthly; grain market weekly, on Monday. It has quarter sessions and petty sessions, and returns a member to the House of Commons. Registered electors (1850), 271. Dungannon was the clief seat of the O'Neils, kings of Ulster, from the earliest period of Irish history till 1607, when the last of these powerful chieftains fled to the Continent, and his possessions were granted by James I. to Sir Arthur Chichester. Pop. (1841), 3,801.

DUNGANSTOWN, par. Ireland, Wicklow; 14,287 ac. Pop. 3434.

DUNGARVAN, a maritime tn., parl. bor., and par. Ireland, co. Waterford. The town, on the bay of Dungarvan, on the point of land formed by the estuaries of the Bricky and Colligan, two small rivers that here join the sea, 40 m . E.N.E. Cork, lat. (pier) $52^{\circ} 5^{\prime}$ N. ; lon. $7^{\circ} 38^{\prime}$ W. (r.), has, on the whole, an agreeable appearance, and is much resorted to in summer for sea-bathing. On the E. side of the Colligan, is a suburb called Abbeyside, connected with the town by a causeway, and a single arched bridge. It has a parish church, two R. Catholic chapels, a convent, fever hospital, sessions house, union workhouse, market house, and an ancient castle, situated in the centre of the town, and now used as a barrack, or military station. The trade of the town is limited, as vessels exceeding 150 tons cannot approach the quay. The exports are chiefly grain, butter, and cattle. The fisheries, the principal of which are the laake and herring fishery, constitute the main support of the inhabitants. Dungarvan returns a member to the House of Commons. Registered electors (1850), 407. Quarter sessions and petty sessions, and numerous fairs, are held. It is the station of a resident magistrate, the head quarters of a constabulary district ; and a coast guard station. Pop. 8625. Area of par. 9413 ac. Pop. 13,321.

DUNGARVAN, par. Irel. Kilkenny ; 5881 ac. P. 1806
DUNGENESS, or Dengeness.-1, A headland, England, forming the S. extremity of co. Kent, English Channel, $3 \frac{1}{2} \mathrm{~m}$. S.E. Lydd. It is defended by a fort, and has a lighthouse, with a fixed light 92 ft . above sea level ; lat. $50^{\circ} 55^{\prime} \mathrm{N}$.; lon. $0^{\circ} 58^{\prime}$ E. (R.)-2, A hcadland, S. America, on the N.E. entrance of Magalhaen's Strait, a little S.W. Cape Virgins; lat. $50^{\circ} 25^{\prime}$ S. ; lon. $68^{\circ} 23^{\prime} \mathrm{W}$.

DUNGIVEN, a market tn. and par. Ireland, co. Londonderry. The town, 17 m . S.E. Londonderry, has one principal, and two minor streets; a parish church, R. Catholic chapel, and Presbyterian meeting-house; a dispensary, and old castle. Market on Saturday ; fairs and petty sessions monthly. Area of par., $29,328 \mathrm{ac}$. Pop. 5169 ; of tn., 1016.

DUNGLOW, a vil. Ireland, co. of, and $11 \frac{1}{2} \mathrm{~m}$. N. by W. Donegal, with the parish church, a R. Catholic chapel, and barrack. Pop. 449.

DUNGOURNEY, par. aud tn. Irel. Cork; 8231 ac Pop. 2705.

DUNKELD and Dowally, par. Scot. Perth. Pop. 1752.
DUNKELD (Little), par. Scot. Perth. Pop. 2718.
DUNKELD, a bor. of barony and market tn. Scotland, co. Perth, 14 m. N. by W. Perth, l. bank Tay, and celebrated for the picturesque scenery of its environs. At its $W$. end
stands the ancient cathedral of the diocese of Dunkeld, picturesquely situated on the banks of the Tay. Its choir is used as the parish church. The entire structure is 120 ft . long, by 60 broad. At the W. end rises the great tower or steeple, and adjoining it, a small octagonal much admired watch tower. Its earliest portion was built in 1330, bat, long before this period, Dunkeld was celebrated in the ecclesiastical annals of the kingdom. In 850, Kenneth I. removed the reliques of Saint Columba from Iona to a church which he had built here, and which formed the primacy of Scotland for several ages, till supplanted by St. Andrews. A religious establishment, similar to that at Iona, was erected at the same time, the abbots of which acted a conspicuous part in many of the most memorable events recorded in Scotch history. Besides the parish church, there are Free and Independent churches, and a royal grammar school, founded in 1567, by James VI.
Near the cathedral stands the ancient palace of the Dukes of Athole, an old-fashioned square building, and at a short distance, again, a new mansion was commenced by the late Duke, but suspended at his death, which took place in 1830 . Within the grounds are shown the two first larches introduced into Britain. They were brought from the Tyrol in 1738, and were at first treated as green-house plants. The tallest is now 90 ft . high, and measures 15 ft . in circumference two ft . above the ground. The larch is now naturalized in Scotland, and forms one of the most valuable and extensively cultivated timber trees in the country. Pop. (1851), 1102.

DUNKERRIN, par. Irel. King's co.; $7770 \mathrm{ac} . \quad$ P. 2695.
DUNKERTON, par. Eng. Somerset; 910 ac . Pop. 825.
DUNKESWELL, par. Eng. Devon; 5160 ac. Pop. 536.
DUNKINEELY, or DUNkANELY, a vil. Ireland, co. of, and 3 m . W. Donegal, N. E. of the head of Macswine's bay, with a parish church and a Wesleyan chapel. Pop. 475.

DUNKIRK, [French, Dunkerque; German, Dünkirchen], a seaport tn. France, dep. Nord, at the S. E. entrance of the strait of Dover, 46 m. E.S.E. Dover, and 42 m . N.W. Lille, lat. (light) $51^{\circ} 3^{\prime} 6^{\prime \prime} \mathrm{N}$.; and lon. $2^{\circ} 22^{\prime}$ E. (r.) The country around is a dreary waste of sand hills, and the

shore is so encumbered with sandbanks, that the harbour, notwithstanding the vast sums which have been expended upon it, is still indifferent; though unquestionably the best which France possesses on its N.E. coast. The town is advantageously situated for trade, having, in addition to its harbour, the benefit of extensive communication with the interior by the united canals of Bergues, Bourbourg, and Furnes, and also by the railway Du Nord; is surrounded by walls, and otherwise defended by forts and outworks, so as to rank, as a fortress of the second class, and is well-built, possessing, in particular, several squares, which are large, regular, and handsome. One of the greatest disadvantages under which the
town labours, is a want of good water. The objects most deserving of notice are the church of St. Eloi, a Gothic structure, with a belfry containing chimes, with a very handsome but incongruous Corinthian portico; the townhouse, built in 1644; the college, occupying the site of an old Jesuit charch; the public library of 18,000 vols.; the theatre, and concert rooms; the bust of Jean Bart, placed in the well-planted square which bears his name; the Champ de Mars; the naval docks, and the basins for containing water to scour the harbour; and the pier, which stretches far out into the sea, has both a tower and a lighthouse, and affords an excellent promenade. The manufactures consist chiefly of earthenware, iron castings, leather, soap, starch, ropes, and there are numerous sugar refineries, breweries, gin distilleries, and salt works. The trade, both foreign, coasting, and transit, is important, and is chiefly in corn, wine, brandy, coal, fish, and colonial produce. In 1844, the number of vessels belonging to the port were 197 ( 18,299 tons). A considerable number of these were engaged in the cod fishery, from which the number of vessels of all nations which entered the port the same year was 94 ( 7270 tons). In 1849, the total number of vessels entered was 1740 ( 134,828 tons) ; and cleared, 1659 ( 184,927 tons). Dunkirk is the seat of a court of first resort and commerce, and of a maritime syndicat, and possesses a chamber of commerce, an exchange, an agricultural society, and a communal college. It appears to have become a place of some importance in the tenth century, when it was first surrounded by walls. The possession of it was repeatedly contested by the Spaniards and French. In 1658 it was given up to the English by Turenne, after a victory which their exertions lad chiefly enabled him to gain, and continued with them till 1662, when Charles II. sold it to Louis XIV. During the last European war, a great number of privateers were fitted out in its harbour, and did considerable damage to British commerce in the Channel. Pop. 24,562.

DUNKIRK, a vil., U. States, New York, on Lake Erie, 326 m. W. Albany. The harbour, which has 12 ft . water over the bar, is eagerly sought in bad weather. Here are two cluurches, and an academy.

DUNKITT, par. Irel. Kilkenny; 6773 ac. Pop. 2709.
DUNKUR, a vil. and fort, Hindoostan, Kunawur, 1. bank. Spiti, 32 m . N.N.W. from its confluence with the Sutlej: $140 \mathrm{~m} . \mathrm{S}$. by E. Lell ; lat. $32^{\circ} 18^{\prime}$ N. ; lon. $78^{\circ} 20^{\prime}$ E. They are built among the ragged rocks, which rise abrupt and in accessible on all sides, save that by which they are connected with the main ridge of hills. In former times a covered way existed to the brink of the river, by which the inhabitants could obtain water unperceived by their enemies; but this is now in ruins. Dunkur is useless as a place of strength in modern warfare.

DUNLA VAN, a market tn. and par. Ireland, co. Wicklow. The town, 28 m . W. by N. Wicklow, on the confines of the cos. Wicklow, Dublin, and Kildare, consists of two streets; in the centre of the principal one stands the market-bouse, a fine structure, built of granite, and surmounted by a dome. Market on Wednesday, and fairs several times annually. Pop. 990 . Area of par. 5852 ac. Pop. 2594.

DUNLECKNY, par. Irel. Carlow; 7956 ac. Pop. 4743.
DUNLEER, a small post tn. and par. Ireland, co. Loutli. The rown, 8 m . N. by W. Drogheda, a station on the Dublin and Belfast railway, contains a parish church, R. Catholic chapel, Church education, and national schools, dispensary, petty session court, and police barrack; 11 fairs annually. Pop. 808. Area of par. 2379 ac. Pop. 1551.

DUNLOP, a vil. and par. Scotland, co. Ayr. The village, 15 m . S. by W. Glasgow, has a pop. above 200 . The parish (area, $10 \frac{1}{4} \mathrm{sq} . \mathrm{m}$. ), has long been celebrated for its cheese; the improved method of making which was introduced by Barbara Gilmour, a farmer's wife, in the reign of Charles II., and consists, simply, in using the whole milk. Previously here, and elsewhere, skimmed milk alone had been used for this purpose. Pop. 1206.

DUNLUCE, par. Irel. Antrim; 9381 ac . Pop. 3381.
DUNMAFION, par. Irel. Cork; 2302 ac. Pop. 888.
DUNMANOGE, par. Irel. Kildare; 2961 ac. Pop. 625.
DUNMANUS BAY, an inlet, S.W. coast, Ireland, co. Cork, 4 m . in breadth at its entrance between Sheep Head, on the N., and Three Castle Head, on the S., and stretching inland abont 12 in . It contains some small islands and rocks,
and is separated from Bantry Bay by a long and narrow peninsula. It forms a favourite fishing ground.

DUNMANWAY, a tı. Ireland, co. of, and 29 m. S.W. Cork, romantically situated among wooded hills, on a small level tract, near the junction of the thrce streams that form the Bandon river. It consists of two principal streets; many of the houses well built of stone; but many in the suburbs miserably thatched cabins; supply of water deficient. Till 1845, the town had been progressing; but since that period it has fallen off considerably. It has a parish church, R. Catholic chapel, Methodist meeting-house, several schools, a court-house, barrack, and small bridewell. The manufacture of linen, formerly carried on, has much declined; considerable trade in corn, and some brewing and tanning; petty sessions are held; weekly market; four annual fairs for cattle. Pop. (1841), 3086.-(Local Correspondent.)

DUNMOE, par. Irel. Meath; 976 ac. Pop. 111.
DUNMORE.-1, A vil. Scotland, co. of, and $7 \frac{1}{2} \mathrm{~m}$. S.E. Stirling, amidst beautiful scenery. In its vicinity is Dunmore Park, the seat of the Earl of Dunmore. Pop. 154. $2, A \mathrm{tn}$. and par. Ireland, co. Galway. The former, 9 m . N.E. Tuam, contains a church and a R. Catholic chapel, a nuarket and court-house, a dispensary, and police barrack; has weekly markets on Monday and Thursday, and several annual fairs. Pop. 917. Area of par. 34,939 ac. Pop. $11,775 .-3$, A vil. and seaport, Ireland, co. of, and 8 m . S.E. Waterford, W. shore of Waterford Haven, originally a small fishing vil.; but Government, having fixed upon it as a station for the mail packets from Milford, was, several years ago, at great expense in improving the harbour, and it has since risen into some importance as a sea-bathing place. It contains a parish church, a R. Catholic chapel, and two schools: inhabitants chiefly employed in fishing and tillage. Pop. 302. -4, Par. Ireland, Kilkenny ; 2380 ac. Pop. 767.

DUNMOW.-1, (Great), A par. and small market tn., England, co. Essex. The rown, on an acclivity, on the Chelmer, 32 m . N.E. London, has two good streets, with a market cross in the centre of the town; is well lighted with gas, and amply supplied with pump water. It has a large ancient church, places of worship for Baptists, Independents, and the Society of Friends; national and British schools, a literary institution, and various friendly societies ; and a large tan yard. Area of par. 7910 ac. Pop. 2792.-2, (Little), A par. $2 \frac{1}{4} \mathrm{~m}$. E.S.E. the former, where prevailed the custom of giving a llitch of bacon to any married couple, who, having been married a year and a day, would swear that they had not quarrelled once, nor, up to that time, had repented of their marriage. The flitch is said to have heen claimed but six times since the reign of Henry VI. This custom was revived in 1837, the bringing up of children without parochial relief being substituted as the condition of obtaining the flitch. Area of par. 1390 ac. Pop. 385.-(Local Correspondent.)

UUNMOYLAN, par. Irel. Limerick; 6190 ac. P. 1659.
DUNMURIAGH1LL, a par. Ireland, Kildare; 502 ac . Pop. 154.

DUNMURRY, a vil. Ireland, co. Antrim, on the Glenwater, $4 \frac{1}{2} \mathrm{~m}$. S. by W. Belfast. It has a Presbyterian chapel, and a station on the Ulster railway; several extensive flourmills, and a bleachfield. Pop. 211.

DUNMURRY, par. Irel. Kildare; 1101 ac. Pop. 154.
DUNNAMAGGAN, par. and vil. Ireland, Kilkenny ; 11,779 ac. Pop. 1213.

DUNNET, par. and maritime vil. Scot. Caithness; 12 m . by 6 m . Good fishing in Dunnet Bay. Pop. 1880.

DUNNET HEAD, a remarkable promontory, Scotland, co. Caithness, at the W. entrance of, and projecting into the Pentland Firth, which is here about 7 m . broad, the most N. point of the mainland of the kingdom; lat. (light), $58^{\circ} 40^{\prime} 24^{\prime \prime}$ N. ; lon. $3^{\circ} 21^{\prime} 15^{\prime \prime} \mathrm{W}$. (R.) It rises to the height of 500 ft . above the level of the sea, and, excepting in two or three places, is inaccessible from the land side. It is wholly composed of freestone, chiefly of a brownish colour, with a covering of moss. It contains 3000 ac., and rears about 400 sheep of the original short-tailed breed of the country. On the summit are vestiges of a R. Catholic chapel, supposed to have been a place of penance, and on the N.W. extremity there is a lighthouse, 346 ft . high.

DUNNICHEN, a par. Scotland, Forfar; 4 m . by 3 m . Pop. 1625.

DUNNING, a vil. and par. Scotland, co. Perth. The village, $9 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Perth, near a station on the Scottish Central railway, has a parish, a Free, a U. Presbyterian, and an original Seceder church, and a parochial school ; a public read-ing-room, a gas-work, flour, saw, and malt mills, a distillery, and a brewery; but a large proportion of the people are entployed in weaving for Glasgow houses. Pop. of par. (area, 28 sq. m.), 2128 ; of vil., 1068.

DUNNINGEN, a vil. Wïrtemberg, circle Schwarzwald, bail. of, and 7 m . W.N.W. Rottweil. It contains a parish church. Pop. 1411.

DUNNINGTON, par. Eng., York (E. Riding); 3110 ac. Pop. 765.

DUNNOSE, a lofty headland, England, S.E. coast Isle of Wight ; lat. $50^{\circ} 38^{\prime} \mathrm{N} . ;$ lon. $1^{\circ} 11^{\prime} 35^{\prime \prime} \mathrm{W}$.

DUNNOTTAR, par. Scot. Kincardine; 8156 ac. Its ancient castle, now in ruins, situated on a cliff beetling out into the sea, $2 \mathrm{~m} . \mathrm{S}$. by E. Stonehaven, is often mentioned in Scottish history. During the parliamentary war it became the depository of the Scottish regalia; and capitulated to Cromwell's troops after a six months' siege, the regalia having previously been secretly conveyed away. Pop. 1873.

DUNOIS, an anc. territory, France, prov. Orléanais, now forming parts of the deps. Eure et-Loir, Loir-et-Cher, and Loiret. Its capital was Châteaudun.

DUNOON, a maritime vil. and par. Scotland, co. Argyle. The village, finely situated on the W. shore of Firth of Clyde, 25 m . W. by N. Glasgow, has risen into importance within the last quarter of a century, having become a favourite summer resort for the citizens of Glasgow. Ranges of neat and elegant modern villas stretch along the shore to the distance of about $1 \frac{1}{2} \mathrm{~m}$. N. and S . of the old village. On a green rocky knoll overlooking the Firth, are to be seen the foundation walls of the ancient castle of Dunoon, a residence of the noble family of Argyle till the early part of the 17 th century. The existing remains do not indicate a higher antiquity than the 14th or 15 th century, though it is known that a castle existed here at a much earlier date. There are here an elegant parish church; plain Free, U. Presbyterian, and English Episcopal churches, and a neat Scotch Episcopal church; seven schools, and a circulating library. No manufactures are carried on; but the population of the village is increasing. Area of united par. of Dunoon and Kilmun, 180 sq. m. Pop. (1851), 4519. - (Local Correspondent.)

DUNQUIN, par. Irel. Kerry ; 4397 ac. Pop. 1394.
DUNREGGAN, a vil. Scotland, co. of, and 16 m . N.W. Dumfries, on the Dalwhat, here crossed by a stone bridge, connecting it with the vil. of Minnyhive. Pop. 277.
I)UNROSSNESS, par. Scot. Shetland. Pop. 4494.

DUNSANY, par. Irel. Meath; 964 ac. Pop. 175.
DUNSBY, par. Eng. Lincoln; 2420 ac. Pop. 195.
DUNSCORE, par. Scot. Dumfries; 24 sq. m. Pop. 1517.
DUNSE, a bor. of barony, market tn., and par., Scotland, co. Berwick. The town, $35 \mathrm{~m} . \mathrm{S}$. E. Edinburgh, on a branch of the N. Britislı Railway, beautifully situated at the foot of a hill 630 ft . high, called Dunse Law, is well built, and contains some spacious streets; is well kept, abundantly supplied with water, and lighted with gas. The only remarkable public building is the townhall, founded in 1816 , and surmounted by a beantiful Gothic spire. It has a plain parish church, built in 1790 ; a Free, and U. Presbyterian churches, several schools and libraries, and a reading-room. Weekly market on Wednesday ; three annual fairs. On the summit of Dunse Law are vestiges of the entrenched camp occupied by General Leslie and 20,000 Covenanters, May 1639, to oppose a threatened invasion of Scotland by Charles I., who had advanced 7 m . beyond Berwick with a large force, to subdue the Scotch Covenanters. John Duns Scotus, Boston, author of the Fourfold State ; Dr. M'Crie, the historian of Knox ; and Sir Joseph Paxton, architect of the Crystal Palace, were all born in the town or parish of Dunse. Area of par., 18 sq. m. Pop. 3162.- (Local Correspondent.)

DUNSFOLD, par. Eng. Surrey ; 4240 ac. Pop. 669.
UUNSFORD, par. Eng. Devon; 6560 ac. Pop. 925.
DUNSFORT, par. Irel. Down; 4239 ac. Pop. 1450.
DUNSHAUGHLIN, a post tn. and par. Ireland, co. Meath. The former, situated in a hollow, 15 m . N. W. Dublin, is a dirty dilapidated place, and has a parish church, a R. Catholic chapel, two schools, and a dispensary. The
people, in a miserable condition, are either day labourers or mendicants. Petty sessions fortnightly. Area of par., 5264 ac. Pop. (1841), 1581.-(Local Correspondent.)

DUNSHELT, or DANEShalt, a vil. Scotland, $\omega$. Fife, 1 m. S.E. Auchtermuchty, on the Eden; inhabitants mostly cotton weavers. Pop. 646.

DUNSINNANE, one of the Sidlaw hills, Scotland, co. of, and 7 m. N.E. Perth, and about 15 m . S.E. Birnam; height, 1114 ft . An extensive view is obtained from the top, on which the circumvallations of what is said to be Macbeth's castle, may still be traced.

DUNSINSK, a pleasant vil. Ireland, co. of, and 4 m . W.N.W. Dublin. On a hill in the vicinity, 210 ft . high, is the observatory of Trinity college.

DUNSTABLE, a tn. and par. England, co. Bedford. The rown, 32 m . N.W. London, on a branch of the London and North-western Railway, in the centre of the Dunstable chalk downs, consists of four principal streets ; houses, mostly of brick, in general well built, but many of an antiquated appearance. It has a parish church, a Wesleyan, and two Baptist chapels, a free school, and several almshouses. Straw plait and bonnet manufacture is the chief trade of the town, employing a great many females. Whiting, also, is manufactured to a great extent, and there are several considerable malting establishments. Immense numbers of larks are taken in the vicinity, and sent to the London market. Dunstable was an important Roman station. Henry I. built a royal mansion in the neighbourhood, and also founded a priory here, of which no part remains but the portion appropriated to the parish church, and twe arches in the adjoining wall. Market, Wednesday; four fairs annually Area of par., 520 ac. P. 2582.

DUNSTAN (ST.), three pars. Eng.:-1, Kent; 320 ac. Pop. 1209. - Two forming part of London (in the East), Middlesex. P. 1010.-(in the West), Middlesex. P. 3266.

DUNSTER, a market tn. and par. England, co. Somerset. The former, beautifully situated in a vale looking towards the Bristol Channel, and enclosed on every other side by hills, $19 \frac{1}{2} \mathrm{~m}$. N.W. Taunton, has a handsome ancient church, a Wesleyan chapel, and an endowed school. Market on Friday. Area of par., 2500 ac. Pop. 1078.

DUNSTEW, par. Eng. Oxford; 1370 ac. Pop. 449.
DUNSTON, two pars. Eng. :-1, Lincoln; 4620 ac. Pop. 518.-2, Norfolk; 500 ac. Pop. 107.

DUNSYRE, par. Scot. Lanark; 11,071 ac. P. (1851), 312.
DUNTERTON, par. Eng. Devori; 1170 ac. Pop. 212.
DUNTISBOURNE, two pars. Eng. Gloucester:-1, (Abbots), 3290 ac. Pop. 354.-2, (Rouse), 1730 ac. Pop. 138.

DUNTOCHER, a large manufacturing vil. Scotland, co. Dumbarton, 8 m . N.W. by W. Glasgow, containing Established and Free churches, a R. Cathelic chapel, and two other meeting-houses; several large cotton-spinning and weaving factories, and manufactures of agricultural implements, \&c. Bricks are also made, and many are employed in coal and lime-works. An antique bridge here is supposed to have been erected by the Romans; and, in the vicinity, several interesting Roman remains have been found. Pop. 3809.

DUNTON, several pars. Eug.:-1, Bedford; 2840 ac. Pop. 434.-2, Bucks; 1550 ac. Pop. 107.-3, Essex; 2790 ac. Pop. 194.-4, (Basset), Leicester; 1860 ac. Pop. 553.-5, (Cum Doughton), Norfolk; 1570 ac. Pop. 147.

DUNURLIN, par. Irel. Kerry; 4700 ac . Pop. 2125.
DUNVEGAN, a headland and bay, Scotland, W. coast, Skye. The former in lat. $57^{\circ} 32^{\prime}$ N.; lon. $6^{\circ} 41^{\prime}$ W. (r.) Here is Dunvegan Castle, seat of the M•Leod family.

DUNWICH, a decayed seaport, bor. and par. England, co. Suffolk. The town, 26 m . N.E. Ipswich, was formerly a place of considerable importance, having an extensive trade, and containing many churches and monasteries, all of which, with the ground they stood upon, have been engulfed by the sea, which is here perpetually gaining on the land. This continual encroachment of the sea has reduced this once flourishing seaport to an insignificant village, and now threatens its utter obliteration. The principal occupation of the inhabitants is herring and sprat fishing, the latter being cured here in the same way that herrings are cured at Yarmouth. Area of par., $3240 \mathrm{ac} . ~ P o p .237$.

DUPPA, Tuppad, or Daurow, a tn. Bohemia, circle of, and 18 m. E. N.E. Elbogen, in a deep valley, r. bank, Anbach. it contains a parish church, castle, Piarist cloister, gsmnasium,
ligh school, and hospital; and has manufactures of woolleu cloth. Pop. 1400.

DURANCE [Latin, Durentia], a river, France, which rises on the W. slope of the Cottian Alps, in Mount Genèvre, in the N.E. of dep. Hautes-Alpes, flows circuitously in a S.E. direction through that dep., then almost due S. through the W. part of dep. Basses-Alpes, on reaching the S. frontiers of which it turns W., forming the boundary between deps. Vaucluse and Bouches-du-Rhone, and joins l. bank, Rhone, 4 m . below Avignon. It passes the towers of Briançon, Embrun, Sisteron, and Orgon, and has for its principal affluents, on the right, the Guisane, Gironde, Buech, and Calavon, and on the left the Guil, Ubaye, Sasse, Bleone, Asse, and Verdon. The Durance, though a large stream, is so rapid in its current, and carries so much debris along with it, that it is nowhere navigable. It is, however, much used for floatation, and by feeding the canal of Carpoune, which connects it with the Rhone in the lower part of its course, furnishes an important water communication. It is subject to inundations, which often commit great ravages. Its whole course is about 180 m .

DURANGO.-1, An inland state, or dep. Mexican confederation, between lat. $23^{\circ} 37^{\prime}$ and $27^{\circ} 45^{\prime}$ N. ; lon. $102^{\circ} 30^{\prime}$ and $107^{\circ} 17^{\prime}$ W.; surrounded by Chihuahua, Cohahuila, Zacatecas, Jalisco, Sonora, and Cinaloa; length, N. to S., about 280 m .; breadth, 150 m . ; area, about $54,000 \mathrm{sq}$. m. It is mostly rocky and mountainous, and is traversed by the sierra Madre, which forms the connecting link between the plateau of Anahuac and the Rocky Mountains. It is watered by only a few streams, the most important of which is the Rio-de-las-Nases, which loses itself in the lake of Cayman, in the Bolson-de-Mapimi. The greater part of this state is a barren and irreclaimable waste; but there are some fine meadows, well adapted for grazing, and along the banks of the streams the soil is rich and fertile, producing, in abundance, corn, maize, rice, and other cereals. Agriculture, cattlerearing, and working the gold, silver, and iron in the mountains are the chief employments. Durango is greatly infested by several Indian tribes, especially by the Comanches, who, at certain seasons, overrun the N. and W. portions of Mexico, driving cattle, and massacring, without mercy, all who come in their way. Pop. (1841), $165,000-2$, A tn., cap. above state, 7295 ft above sea level ; lat. $24^{\circ} 25^{\prime} \mathrm{N}$.; lon. $103^{\circ} 34^{\prime} 37^{\prime \prime}$ W. (L.) It is picturesque, but dirty; and has two large churches, a college, an hospital, several convents, a mint, and numerous woollen and cotton manufactories; and a good trade in cattle and leather. It was founded about the middle of the 16 th century. Pop. (1841), 25,000 ; of whom a majority are rogues and beggars.- $3, \mathrm{~A} \mathrm{tn}$. Spain, prov. Biscay, 14 m . S.E. Bilbao, r. bank of a small river, here crossed by three bridges. It is well built, and has straight, clean, and paved streets; three churches, two convents, a Latin, and two primary schools, a townhall, hospital, prison, and cemetery. Weaving, tanning, and the manufacture of hardware, are carried on. Pop. 2246.

DURAS, or Dras, a valley, Ladakh, about lat. $34^{\circ} 22^{\prime}$ N. ; lon. $75^{\circ} 30^{\prime}$ E.; at a short distance N. from the N. frontier of Cashmere, in which are a collection of villages, through which passes a river of the same name; the latter, rising in the Bultul or Kantal Pass, flows N. to the Indus, which it joins in lat. $34^{\circ} 44^{\prime} \mathrm{N}$. ; lon. $76^{\circ} 9^{\prime} \mathrm{E}$. Duras is 9000 ft . above the sea.

DURATON, a river, Spain, which rises in the W. of the Somo sierra, near N.W. frontiers of New Castile, flows N.W., traversing Old Castile, enters Leon, and shortly after passing Peñafiel, joins 1. bank, Douro. Its whole course is about 60 m ., and is partly navigable in spring. It is well supplied with fish.

DURAZZO [anc. Dyrachium, or Epidamnus], a seaport, European Turkey, prov. Albania, on the Adriatic, 50 m . S. by W. Scutari; lat. $41^{\circ} 18^{\prime} 12^{\prime \prime}$ N.; lon. $19^{\circ} 26^{\prime} 45^{\prime \prime}$ E. (г.) It is strongly fortified; has a safe and commodious harbour; exports tobacco to Italy, and receives Manchester and Birmingham manufactures from Trieste. The ancient Epidamnus, which was a colony of Corcyreans, was the most powerful maritime town of Illyria. The expulsion of its aristocracy, b.c. 436, was the origin of the Peloponnesian war. No traces of the ancient city now exist, excepting pieces of columns and marbles scattered over the burial grounds, or built in the walls. Pop. 5000.

DURBEN, a market tn . Russia, gov. Courland, on the S.E. ahore of a amall lake of same name, 15 m . E.N.E. Lebau. It contains a church and an old castle. Pop. 1500.

DURCAL, a vil. Spain, Andalusia, prov. of, and about 15 m. S. Granada, in a beantiful plain, at the foot of Mount Sshor, a ramification of the sierra Nevada, near 1. bank, Durcal. The houses are old, and ill built, and the streets, though level, are winding, and, for the most part. withont pavement. It contains a parish church, of modern construction; a town house, which is small, and of no architectural merit; and an endowed primary school. Some of the inhabitants make esparto articles, but the chief employment is agriculture. Pop. 1821.

DǗREN [anc. Marcodurum], a tn. Prussia, gov. of, and 16 m. E. by N. Aix-la-Chapelle, on the r. bank of the Roer, here crossed by a stone bridge, and on the railway from Aix-la-Chapelle to Cologne. It is the seat of several courts and public offices, contains two Protestant, and five R. Catholic churches, one of the former new, and very handsome, and one of the latter surmounted by a fine Gothic tower; a synagogue, gymnasium, and three nunneries; and has important mannfactures of woollen cloth, and woollen covers, paper, leather, sheet-iron, cast-iron, and steel ware, numerous brandy distilleries; an important trade in corn, cattle, and the above manufactures; and two annual fairs. Diiren is of Roman origin, and is mentioned by Tacitus under its name of Marcodurum. It was besieged by Charles V. in 1543, with an army of 60,000 men, and, after an obstinate resistance, taken and destroyed. Pop. 7759.- The circle, area, 164 geo. sq. m., is partly flat, and partly hilly, is watered by the Roer, and several small streams, is well wooded, produces a good deal of wine and fruit, rears great numbers of cattle, and possesses a number of valuable minerals, particularly iron, alum, lead, lignite, and coal. Pop. 50,461.

DURGERDAM, a fishing vil. Holland, prov. N. Holland, on the Ij , opposite Amsterdam, which it supplies with fish. It has a church and school. Pop. 450.

DURHAM, a N. maritime co. England, consisting chiefly of a long contiguous tract forming the co. properly so called. and of three detached portions. Of these the largest is in the N. of Northumberland, where it forms an irregular triangle, with its base on the German Ocean, and has annexed to it, at a short distance from the coast, Holy Island, and the small group of the Fern Islands; the second is on the S.E. part of the coast of the same county; the third, forming the parish of Craike, is wholly enclosed by Yorkshire, and is situated about 10 m . N. of the town of York. The county proper is in the form of an irregnlar triangle, the vertex of which, somewhat flattened, is on the W., where it is contiguons both with Cumberland and Westmorland. The coast line on the E. forms its base. The N. side is bounded by Northumberland, from which it is partly separated by the Tyne; the S. side by Yorkshire, from which it is separated throughout by the Tees ; greatest length W. to E., 55 m. ; greatest breadth, 35 m. ; area, 1097 sq . m. or $702,080 \mathrm{ac}$. The surface is greatly diversified. In the $\mathbf{W}$. it becomes monntainous, being covered by portions of what has been called the N. Penine range, one of whose summits, that of Kil! op Law, here attains the height of 2196 ft . To the E. of this range a bleak elevated tract extends, and is continued by a series of branches, some of which stretch as far as the sea, and form a number of rocky headlands. The finest part of the county lies in the valleys, which separate those branches, and form the channcls of numerous streams, of which the most important, in addition to the Tyne and Tees, already mentioned, is the Weir, which traverses the county centrally, first in an E. and then in a N.E. direction. All these rivers are navigable to a considerable distance from their mouths. The geological formations of the county are well defined. The strata lowest in the series but most elevated in position belong to the mountain limestone, of which both the mountains in the W. and the elevated platcau to the E. of it are composed. Immediately above this, continuing E., appear first the millstone grit, then a part of the valuable coal field to which Newcastle has given its name, then the magnesian limestone, and finally the new red sandstone. The continuity of the strata is frequently broken by veins of basalt or greenstone. The W. part of the county, both from its elevated position and the bleak moors which cover its surface, is altogether unfitted for agriculture, and,
scarcely admitting of improvement, is allowed to remain in a state of nature. A number of small hardy shecp, muci esteamed for the delicacy of their flesh, roam over it, and manage to pick up a scanty subsistence, and on some parts, especially where limestone forms the immediate subsoil, some tracts of good sound pasture are employed in the rearing of young stock; but the average annual value of the whole moorlands is supposed not to exceed 1 s . per acre. To the E. of the moorlands, though much of the soil continues to be of a thin clayey and intractable nature, a very decided improvement takes place, and good crops of all the ordinary cereals are raised. Friable loams admirably adapted for root crops, especially turnips, are not unfrequent, and along the N. bank of the Tees, particularly near its estuary, are considerable tracts of rich alluvial soil, partly under the plough, but more frequently kept in permanent pasture, on which many of the finest cattle of the kingdom are grazed. Indeed in this branch of agricultural industry the farmers of Durham are not surpassed, and their famons short horns or Teeswater breed of cattle, are universally admitted to combine the most valuablo properties of the race in their higbest perfection. The best wooded part of the county is the vale of Derwent, where much fine hardwood timber, particularly oak, is grown. It is not, however, from the soil that Durham derives the principal source of its wealth. Its richest treasures lie deeply buried in its bowels. Reference has already been made to its coal field, one of the most valuable which England possesses, and in the W., where the surface is almost without value, the limestone beneath it abounds in rich veins of lead, which are worked to a great extent, and yield a profit only inferior to that of the coal. The value of the minerals is much increased by the facilities of trarisport. Besides three navigable rivers, each with an important town and tolerably good harbour at its mouth, where, at least in spring tides, large vessels can load, the York, Newcastle, and Berwick Railway, forming one of the main trunks by which the communication between the metropolis and Scotland is maintained, traverses the county in a N . direction for about 45 m ., and is joined by numerous branches passing through the heart of the mineral fields, and conveying their produce either to the trunks or to the coast, where, in addition to the harbour already mentioned, that of Hartlepool furnishes an important outlet. For administrative purposes, Durham is divided into the four wards of Chester, Darlington, Easington, and Stockton. Ecelesiastically it is in the diocese of its own name and the province of York, and contains 60 parishes. Many of the livings are the most valuable of the kingdom, and much of the land belongs properly to the chureb. It consists politically of two divisions-a N. and a S.-cach of which sends two members to parliament. Durham city is the capital, where the assizes and the quarter sessions are held. Pop. (1841), 324,284; (1851), 390,997.

DURHAM [originally Dunholme], an anc. and celebratel city and parl. bor. England, cap. above co., on the Wear, 230 m. N. by W. London. It stands on seven eminences, along the summits of which the streets generally run. Of these there are nine that may be considered principal streets, besides several smaller, and a number of lanes, courts, \&c. The first are tolerably straight, and well kept. The houses are built, some of brick, and some of stone; many of them are very old, and extremely irregular in form and dimensions, those of modern erection are more uniform. The city is partially paved and flagged, well supplied with water, and lighted with gas. The principal public buildings, exclusive of the ancient castle, the cathedral, and other churches, are the townhall, a handsome edifice, in the Tudor baronial style; the new hall, a spacious room, 70 ft . long, 35 ft . broad, and 51 ft . high; the county prisons, lately much enlarged; and a new grammar school. There are in all six churches in the city, besides the cathedral, together with chapcls for Wesleyans, New Connection Methodists, Primitive Methodists, Independents, R. Catholics, and a meeting-house for the society of Friends. The educational institutions comprise the university, gram-mar-school, diocesan training school, blue coat, national, and infant schools, a R. Catholic free and charity school. The university was founded in 1833, chiefly for students in theology. A new college, called Hatfield Hall, has been attached to the former, in which students can be educated on much cheaper terms than in the university. An additional college, on similar terms to Hatfield Hall, was opened in October

## DURRENSTEIN

1851. There are in the city a mechanics' institute, an athenæum, an infirmary, and a number of minor charities. The only manufactures of any importance carried on, are those of carpeting and mustard, for the last of which articles Durham has been for a long time much celebrated. The vicinity abounds in beautiful public walks, commanding a great extent and variety of picturesque scenery. But the great attractions of Durham are its famous cathedral, and ancient castle. The former occupies the summit of a peninsula overlooking the Wear on the E. and W., and having rapid descents to the river, which are covered with hanging
school, and has glass-works, a paper-mill, a trade in corn and wine, and an annual fair. In the neighbourhood are the salt springs of Philippshall. Dürkheim was early surrounded with walls, and otherwise fortified, so as to be a place of considerable strength. It suffered much during the Thirty Years' War, and still more from the French, by whom it was pillaged in 1674. Pop. 4529.

DURLACH, a tn. Baden, circle, Middle Rhine, cap. bail. of same name, at the foot of the Thurmberg, r. bank Pfinz, and on the railway from Baden to Frankfort, 4 m. E.S.E. Carls ruhe. It contains a Protestant and a R. Catholic church, an old townhouse, courthouse, hospital, superior burgher school, house of refuge, and savings bank; and has manufactures of linen, tobacco, chicory, and vinegar, and an important market for fruit, which is extensively grown in the district. Durlach is an ancient place, and was long the residence of the Margraves of Baden-Durlach, now the reigning line since the extinction of that of Baden-Baden in 1771. An old ruined castle, on a height near the town, was the cradle of the family. Pop. 4530.

DURLEIGH, par. Eng. Somerset; 480 ac. Pop. 143.

DURLEY, par. Eng. Hants 4290 ac. Pop. 425.

DURNESS, par. Scot. Sutherland; 300 sq. m. Pop. 1109.

DURNFORD, par. Eng. Wilts; 3770 ac. Pop. 533.

DURNFORD, a river of $E$. Africa, coast of Zanguebar, falling into the Indian Ocean, in lat. $1^{\circ} 8^{\prime} \mathrm{S}$.
woods and gardens, having a singularly pleasing effect. The aspect of this venerable structure is peculiarly grand and impressive. The general character of the larger portion is Norman, of a very bold style, with insertions in all the English styles. Three magnificent, and elaborately ornamented towers spring up from the body of the building, one from the centre, 212 ft . high; and two, together, from the W . end, 143 ft . high each. The entire length of the edifice is 420 ft . It was founded by bishop William de Carilepho, assisted by Malcolm, King of Scotland, on August 11, 1093. The castle, formerly the residence of the bishops of Durham, stands N. from the cathedral, on the summit of an artificial mound. The original building is Norman, but many of the additions are of much later dates. It is believed to have been founded by William the Conqueror, in 1072, but it is considered doubtful whether any part of the original keep, with exception of the foundation, now remains. The greater portion of the existing building is supposed to have been erected in 1350. Durham returns two members to the House of Commons. Registered electors (1851), 1116. Pop. (1841), 14,151; (1851), 12.942.-(Local Correspondent.)

DURIAN, or Dryon (Great and Little, and Strait). The former are two islands at the S.E. entrance to the Strait of Malacea, lat. $0^{\circ} 50^{\prime} \mathrm{N}$. ; lon. $103^{\circ} 50^{\prime} \mathrm{E}$. They are high, and separated from each other by a narrow creek. The conical peak of Great Durian forms a conspicuous object in coming from the $S$. ; there is a peak also on Little Durian, bnt of much less elevation. The Strait of Durian lies between the E. coast of Sumatra, and the island of Lingen, extending from Pulo Varela to the Carimons, off the S.E. extremity of the Malay peninsula. It is about 120 m . in length, and is bounded W. by the coast of Sumatra, False Durian, Sabon, and the contiguous islands; on the E. side by the islands off the S. and W. sides of Lingen, Great and Little Durian, and the adjacent islands.

DURINISH, par. Scot. Inverness; $100 \mathrm{sq} . \mathrm{m}$. P. 4983.
DURISDEER, par. Scot. Dumfries; 28坔 sq. m. P. 1445.
DÜRKHEIM, a tn. Bavaria, Palatinate, at the entrance of the valley of Dürkheim, through which the Isenach flows, 14 m . W.S.W. Manheim. It is well built, is the seat of several courts and public offices, contains a R. Catholic and two Protestant parish churches, a Latin and an industrial

At its entrance it affords at all times a secure retreat to vessels; and its banks, which appear to be inhabited by the Gallas are susceptible of the highest cultivation.

DÜRNHOLZ, a tn. Austria, Moravia, circle of, and 25 m. S. by W. Brunn, l. bank Thaya. It has an old castle, a church, hospital, mill, two tilefields, five annual fairs, and a weekly market. Pop. 2407.

DURNTEN (Mittel, Ober, and Unter), [middle, upper, and lower], a par. and scattered vil., Switzerland, can. of, and 16 m. S.E. Zürich. Besides agriculture and cattle-rearing, the inhabitants are engaged in spinning, and weaving silk and cotton. Pop. 1503.

DURR-See, a small lake, Switzerland, can. of, and 37 m . S. Bern, on the road from the vil. of Lauenen to the Gelten glacier, and nearly 4000 ft . above sea level.

DURRA, Zarrah, or Zurrah, a large brackish lake, Afghanistan, prov. Seistan, lat. $32^{\circ}$ N.; lon. $62^{\circ}$ E.; about 160 in . in circumference, and containing an island, on which is a stronghold, called the fort of Rustain or Rustan, in which the chiefs of Seistan used to take refuge when their country was invaded. The shores are overgrown to a considerable distance with rushes and reeds, interspersed with pools of standing water; and these marshes or thickets are occupied by herds of oxen, belonging to a race of people different from the other inhabitants of Seistan, being tall, stout, black men, who live in reed hovels, tend their flocks, and fish or fowl on rafts among the rushes of the lake.

DURRANGDRA, a tn. Hindoostan, Goojerat, 85 m . N.W. Cambay; lat. $22^{\circ} 54^{\prime}$ N.; lon. $71^{\circ} 35^{\prime}$ E.

DURRENBERG, a vil. Prussian Saxony, 6 m . S.S.E. Merseburg, remarkable only for its salt springs, which have been employed in making salt for above a century, and yield yearly about 12,000 tons. Pop. 320.

DÜRRENROTH, a vil. and par. Switzerland, can. of, and 22 m. N.E. Bern, in an elevated and picturesque locality, surrounded by green slopes and wooded hills. It has a church, some neat houses, and a grain-mill. The inhabitants are chiefly employed in cattle-rearing, and linen weaving. Pop. 1542.

DURRENSTEIN, a small tn. Lower Austria, picturesquely situated on l. bank Danube, 41 m. W. by N. Vienna. It be longs to the princes of Starhemberg, who have here a castle containing a good library. There are also here fine ruins of
an Augustinian monastery. But Dürrenstein is more especially noted for the ruins of its old fortress, which lie on a lofty, bare, rugged rock above the village, behind which again the Wunderberg rises still higher, covered with dark fir-wood. In this fortress, Richard Cour de Lion, treacherously seized when returning from l'alestine, A.D. 1191, was detained pri-

It is agrecably situate, has the remains of an old castle, pot teries and brickfields, and a trade in grain. Pop. 1566.

DURWAZ, a territory, Independent Turkestan, between Budukshan and the Pamer Bolor mountains, intersected by lat. $38^{\circ} \mathrm{N} . ;$ and lon. $71^{\circ} \mathrm{E}$. It is exceedingly mountainous, and its dizzy paths can only be traversed by footmen. Cotton is grown on what little soil there is. Made into cloth, it forms an article of export; in return for which grain and gunpowder are obtained. All its villages are situated on the banks of the Oxus, by the carlier stream of which it is traversed. The natives are Tajiks, and most of them Suni Mahometans. Their language is Persian.

DURWESTON, par. Eng. Dorset; 1780 ac. Pop. 468.

DUSEFORD, par. Eng. Cambridge; 2982 ac. Pop. 763.

DUSHET, a small tn. and fort, Russian Georgia, 25 m . N. Tiflis. It is an insignificant place, having a number of low small shops, in which different ar ticles are exposed for sale, and where all kinds of tradesmen are seen at work. Here also are to be seen weavers of coarse linen, sitting upon the ground with their feet in holes in the earth. The fort is a place of no great strength; now falling to decay, and used as a barrack for a battalion of soldiers. The country around is open and well cultivated. P.(1848),1364.

DUEKY BAY, New Zealand, S.W. extremity of Middle Island, lat. $45^{\circ} 43^{\prime}$ S.; Ion. $166^{\circ} 27^{\prime}$ E. (R.) It is large, and affords good anchorage near the shore,
soner by Duke Leopold of Austria. He remained in confinement 15 months. This old stronghold was taken and subsequently fortified by the Swedes, and ultimately destroyed by them in 1645 . In 1741 a small body of the villagers repulsed a large force of French and Bavarians by means of a number of water-pipes painted to look like cannon, which they planted on the walls, assisted in their operations by a drum, which was vigorously beaten, to make the enemy imagine the place was strongly garrisoned. In November 1805, the French here defeated the Austrians and Russians. Pop. 500.

DÜRRIIEIM, a vil. Baten, Lake circle, bail. of, and 4 m. S.E. Villingen, between the sources of the Neckar and Danube, on the W. slope of the Black Forest. It contains a parish church, and has a strong salt spring. Pop. 1049.

DURIIING'TON, two pars. Eng.:-1, Sussex; 740 ac . Pop. 191.-2, Wilts; 2830 ac. Pop. 465.

DURRIS, par. Scot. Kincardine; 7 m . by $3 \frac{1}{2} \mathrm{~m}$. P. 1109.
DURRMENZ, a vil. W iirtemburg, circle Neckar, on both sides of the Enz, here crossed by a handsome bridge. It contains a parish church, and has manufactures of tobacco. l'op. 1490.

DULROW.-1, $\Lambda$ market th. and par. Ireland, cos. Kilkemy and Queen's county. The Town, on the Erkin, 15 m . N.W. Kilkenny, consists generally of old, and chiefly stone houses, is plentifully supplied with good water, and well kept, has a well-built courthouse, an Episcopal church, R. Catholic chapel, parochial school, and a dispensary. Weekly market, Friday; cight fairs annually. A tlax-spinning mill has been recently erected. Pcople chiefly agricultural labourers. Area of par. 6529 ac . Pop. 2977 ; of town, 1318. -(Local Correspondent.)-2, Par. 1reland, King's co. and Westmeath; 9773 ac . Pop. 2922.

DURNUS, par. Irel. Cork; 11,138 ac. Pop. 4483.
DURSEY, an isl. Ireland, co. Cork, 11 m . W. by s. Castletown, near the entrance to Bantry Bay, $3 \frac{1}{2} \mathrm{~m}$. in length, by 1 m . in breadth. It contains the remains of an old church and castle. Pop. 200.

DURSLEY, a market tn., and par. England, co. Gloucester. The town, $14 \mathrm{~m} . \mathrm{s}$. by W. Gloucester, in a picturesque district, is well-built, lighted with gas, and well supplied with water; it has a handsome church, with a tower at the W. end, a chapel of ease, and chapels for Independents and Wesleyans, and several charities and schools. There are here some cloth-mills, but this branch of business has much fallen off of late years. Area of par. 1360 ac. Pop. 2931.

DURSTON, par. Eng. Nomerset; 980 ac. Pop. 267.
DURTA1, an anc. tn. France, dep. Maine-et-Loire, 21 m. N.E. Angers, on the Loir, here crossed by a stone bridge. Vol. I.
which is steep and rugged. Fish are plentiful and in great varicty. Discovered, in 1769, by Cook.

DUSNOK, a vil. Hungary, Hither Danube, co. of and 60 m. from Pesth; with a R. Catholic church. Pop. 2289.

DUSSAUN, a river, Hindoostan, which has its sources in the Vindhaya mountains, lat. $23^{\circ} 20^{\prime}$ N.; lon. $78^{\circ} 35^{\prime}$ E., about 70 m. E. by N. the city of Bhopaul. It flows nearly due N. till it joins the Betwah, lat. $25^{\circ} 45^{\prime}$ N.; lon. $79^{\circ} 30^{\prime}$ E ; entire course about 180 m . It is too rocky to be navigable, but abounds with fish.

IUUSSELDORF, a gov. Rhenish Prussia; bounded, N. and W. by Holland, S. Aix-la-Chapelle and Cologne, E. Arnsberg, and N.E. Miinster; area, 1573 geo. sq. m. The surface wholly belongs to the basin of the Rhine, which traverses it circuitonsly in a N. direction, and divides it into two nearly equal parts-that on the E. being hilly but well wooded, and that on the W. generally flat and fertile. The principal tributaries of the Rhine within the government arc, on the left, the Erft, Meurs or Mörs, and Quebach; on the right, the Wipper, Duissel, Ruhr, Embscher, and Lippe. The principal crops are wheat, rye, barley, and oats, but the produce is sail to fall short of the home consumption. Potatoes, flax, and oil-seed. also, are extensively grown; and, in some districts, tobaceo thrives well. The minerals include iron, coal, and good potter's clay. For administrative purposes, the goverument is divided into 13 circles-Cleves, Rees, Duisburg, Geldern, Kempen, Krefeld, Dïsseldorf, Elberfeld, Lennep, Solingen, Neuss, Grevenbroid, and Glatbach. Pop. 887,614.

DUSSELDORF, a tn. Prussia, cap. Rhenish province, beautifully situated among villas and gardens, r. bank, Rhine, here crossed by a bridge of boats, at the conflumee of the Dussel, and on the railway from Elberfeld, 22 m . N.N.W. Cologne. It is built of brick, nearly in the form of a paral lelogram, with its greatest length from N. to S., and with its principal streets, which are regnlar, spacious, and planted with trees in the same direction, and nearly parallel to the river. Its ramparts have been thrown down and converted into promenades, and so many improvements lave been made upon it within the present century, that it now ranks as one of the handsonest towns in the valley of the Rhine. It consists of three parts-the Altstalt, the Carlstadt, and Neustadt. Of these, the Altstadt is the least preposscssing, and the Ncustalt the most elegant. Among the streets, the Mittel Strasse, containing a number of fine shops; thin Allée Strasse, and the Castanien Allee; and among, the squares, the Exercier 1'lat\%, Carl Platz, and Frederick l'latz, are most deserving of notice. The principal edifices are St. Lambert's church, in the centre of an irregular open space in the N.W. part of the town, near the Rhine, adorned with a beautiful monument of Duke John

William IV. and his consort, in white marble, and with several fine paintings; St. Andrew's or the Hof church, almost overloaded with decorations, and rich in carvings, frescoes, and paintings; the Franciscan or Maximilian church, with a fine bronze altar table, and a large picture by Damian; the old palace of the Churfursts, once a huge pile, but now destroyed, with the exception of a wing, partly occupied by the drawing academy, and partly as a royal mint; the townhouse, an ancient and venerable structure ; the old Marstallhaus, now used for the meetings of the Estates, and other Government buildings; the gymnasium, picture gallery, theatre, courthouses, prison, and large new barracks. Among the public institutions, particular notice is due to the Academy of Art, founded, 1777, by the Elector Theodore, renewed, in 1821, by King Frederick William, and afterwards directed by Cornelius and Schadow. It has the honour of having founded a school of painting, which takes the name of Düsseldorf, and has a great number of young painters in training, many of them of high promise. The manufactures include woollen and cotton goods, calicoes, hats, soap, white-lead, leather, tobacco, sugar, and, particularly, liqueurs, of which there are 10 factories. The trade, both general and transit, and consisting chiefly of agricultural and colonial produce, is very important, and, in recent years, has made large and rapid progress. In 1836, the imports were 855,533 ewts., and the exports 113,144 ewts. In 1845 , the former had risen to $1,535,926 \mathrm{cwts}$, and the latter to 206,370 ewts. Much of this increase is owing to the completion of the railway from Elberfeld, and more is expected from the completion of others now in progress. The residence of Prince William of Prussia, as governor of the Rhenish province, and commander in-chief, attracts many of the nobility, and gives the town somewhat the arpearance of a capital. Pop. (1846), 26,301.——The circle, area, 118 geo. sq. m., is finely diversified by hills, and well wooded, but not remarkable for its fertility. Pop. 79,348.

DUSSERA, a fortified th. Hindoostan, prov. Goojerat; lat. $23^{\circ} 16^{\prime}$ N.; lon. $71^{\circ} 51^{\prime}$ E.; contains about 1300 houses. The country around is well cultivated.

DUSSLINGEN, a vil. Würtemburg, circle, Schwarzwald, bail. of, and $4 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Tübingen. It contains a parish church, and has manufactures of linen. Much hemp, flax, and fruit, are grown in the vicinity. Pop. 2287.

DUSTEE, or DUst, a river, Beloochistan, sources unknown. It traverses prov. Mckran, and falls into the Indian Ocean, in Gwelter Bay; lat. $25^{\circ} 3^{\prime} \mathrm{N} . ; \operatorname{lon} .61^{\circ} 50^{\prime} \mathrm{E}$. It is supposed to have a course, under different names, of 1000 m .

DUSTON, par. Eng. Northampton; 1760 ac. Pop. 687.
DUTHILL, par. Scot. Elgin; 16 m. by 13 m . P. 1769 .
DUTTON, two townships, England:-1, co. Chester, $4 \frac{1}{2} \mathrm{~m}$. E. Frodsham, ncar where the valley of the Weaver is crossed by a viacuct of the London and North-western Railway, built of red stone, consisting of 20 stupendous arches
about 70 ft . high, and 60 ft . in span. Pop. 361.-2, co. Lancaster, $6 \frac{1}{2}$ m. N.N.W. Blackburn. Pop. (1841), 563.

DU'TTWEILER, a vil. Prussia, 40 m . S.S.E. Treves, on the Fischbach. It has a court of justice, parish church, and extensive alum and vitriol works. A seam of coal in the neighbourhood has long been burning below ground. Pop. 1387.

DVINA, Dwina, or Düna, two rivers, Russia:-1, Western Dvina [anc. Turuntus], rises in gov. Tver, near vil. Kolnina, dist. Ostachkov, about 15 m . W. of the source of the Volga, flows first circuitnusly, S.S.W., through that gov., and along the frontiers of govs. Pskov, Smolensk, and Vitebsk, till it reaches the town of Vitebsk, when it turns gradually round, assumes a W.N.W. direction, separating Vitebsk and Livonia, on its right, from Minsk and Courland on its left, and finally falls into the gulf, about 10 m . below the town of Riga, after a course of about 500 m . In spring, it is navigable nearly to its source, but, at other times, not beyond Wiliz. It continues frozen from the end of November to the beginning of April, and has several rapids, which become dangerous when the water is low. Its principal affluents are, on the right, the Toropa, Obol, Drissa, Evst, and Ogher; and, on the left, the Meja, Kasplia, Oula, and Disna. It is subject to inundations, particularly at the melting of the ice, and frequently commits great ravages. It abounds with fish. - 2 , Northern Dvina [anc. Carambucis], is formed, in gov. Vologda, by the junction of the Suchona and Vitchegda, about 15 m . E. Sollvitchegodsk; flows, N.N.W., into gov. Arehaugel; there receives, on its left, the Vaga and Emtza, and, on its right, the Pingisha and Pinega; and, after a direct course of 270 m. , and an indirect of above 400 m ., falls into the White Sea about 30 m . below Archangel, after forming a number of islands, and branching off into a number of mouths. For a representation of these, and a description of the traffic on this river, see Archangel. By a canal connecting the Suchona with Lake Bulo, and, through it, with the Neva, and another connecting the Vitchegda with the Kama, a great system of water communication has been formed, furnishing the means of uninterrupted transit from the White Sea and the Baltic to the Black Sea and the Caspian.

DWALAGIRI, one of the culminating points of the Himalaya Mountains, in the kingdom of Nepaul; lat. $29^{\circ} 8^{\prime}$ N.; lon. $82^{\circ} 53^{\prime}$ E. Height, 28,000 ft., being but 178 ft . lower than Kunchinginga, the highest ascertained peak of the Himalayas.

DWALDER, an isl. Java Sea, near the S. entrance to the Macassar Strait; lat. $4^{\circ} 12^{\prime} \mathrm{S}$. ; lon. $116^{\circ} 21^{\prime} \mathrm{E}$. It is small, low, covered with wood, and saddle-shaped.

DWARAKA, or Jugguth, a small maritime tn. Hindoostan, prov. Goojerat, at its most W. point, on the Indian Ocean; lat. $22^{\circ} 15^{\prime} \mathrm{N}$. ; lon. $69^{\circ} 5^{\prime} \mathrm{E}$. ; on a beautiful, sandy shore, and surrounded with a wall, washed by the tide. It is considered the most sacred spot in this part of India, and

TOWN AND TEMPLES OF DWARAKA.-Frun Grindlay's Scenery of Western India.
is resorted to annually by about 15,000 pilgrims. Its principal pagoda or temple is a magnificent structure of high antiquity. The entrance towards the sea is by a long and noble flight of stone steps. Its great pyramid is 140 ft . high, richly
and elaborately ornamented. There are a great number of smaller temples and pagodas. The devotee, having performed the necessary ablutions, visited the temple, deposited his offerings, and paid all fees, which are pretty heavy, amounting.
altogether, to about 11 silver rupees ( 22 s .), besides presents, proceeds to a place called Aramra, 15 m . N.E. Dwaraka, for the purpose of being stamped by the hand of Bralimin, which means being impressed, usually on the arm, with a hot iron instrument, engraved with the shell, the ring, and the lotus flower, the insignia of the gods. Dwaraka submitted to the British forces in 1816, but, in the following year, was transferred to the Baroda government.

DWINA, rivers, Russia. See Dvina.
DWINGELOO, a pleasant vil. Holland, prov. Drenthe, 14 m. S.S.W. Assen, with a Reformed church, small synagogue, school, benevolent society, and two annual fairs. Many of the French Protestants found a refuge here after the revocation of the Edict of Nantes. Pop. 700.

DWY-gyfylchi, par. Wales, Carnarvon. Pop. 709.
DYAKS. See Borneo.
DYCE, par. Scot. Aberdeen; 6 m . by 3 m . Pop. 472.
DYFRIN-Clydach, a hamlet, S. Wales, co. Glamorgan, 1.2 m . N.W. Neath, and containing within its limits the ruins of Neath abbey. Pop. 1085.

DYHERNFUR'TH, a tn. Prussia, gov. of, and 15 m . N.W. Breslau, r. bank, Oder. It contains a Protestant parish church, a chapel, a synagogue, and an old and new castle, with a fine park and gardens; and has a ferry over the Oder, some shipping, and a considerable trade. Pop. 1368.

DYKE and Moy, par. Scot. Elgin; 27 sq. m. Pop. (1851), 1369.

DYLE, a river, Belgium, which rises S.E. Nivelles, prov. S. Brabant, near the frontiers of Hainaut ; flows N., passing Wavre and Louvain, then W., through Malines, where it enters prov. Antwerp, and shortly after, at Rumpot, unites with the Nethe to form the Rupel. Its course is 50 m ., of which about 13 m ., commencing at the confluence of the Demer, are navigable. Its chief affluents are the Demer and the Senne.

DYMCHURCH, par. Eng. Kent; 1210 ac. Pop. 613.
DYMEIRCHION, or Tremeirchion, par. Wales, Flint. Pop. 613.

DYMOCK, par. Eng. Gloucester; 6270 ac. Pop. 1776.
DYRHAM and Hinton, par. Eng. Gloucester; 3290 ac. Pop. 530.

DYSART, four pars. Irel.:-1, Kilkenny ; 7938 ac. Pop. 2367.-2, Louth; 1912 ac. Pop. 608.-3, Westmeath; 7417 nc. Pop. 1129.-4, Roscommon; 6569 ac. Pop. 1739.

DYSART, a royal bor., seaport, and par., Scotland, co.

Fife, N. coast, Firth of Forth, 13 m. N. by E. Edinburgh, a station on the Edinburgh, Perth, and Dundee Railway; lat. $59^{\circ} 7^{\prime}$ N.; lon. $3^{\circ} 6^{\prime} \mathrm{W}$. It consists of three narrow streets, with several lanes and alleys, and an open space in the centre. In the middle of the town stands the townliouse, a plain old structure, with a tower and spire. Though now a dull and comparatively deserted town, with little or no trade, in the 15 th century extensive salt-works were in operation here, and the produce exported in great quantities to Holland, besides supplying the larger towns of Scotland; and coal was wrought here 350 years ago. Malting and brewing were also carried on to a great extent, and immense quantities of foreign merchandize were imported, and exposed to sale under the piazzas, now all built up, of the principal street, and in the marketplace. It has now neither foreign nor home trade, and owns only a few small coasting vessels. And its extensive manufacture of nails and linen cloth are now nearly extinct. Checks and ticks, however, are still manufactured. The harbour is excellent, and is provided with a wet dock, having fully 18 ft . water. Towards the S. or lower part of the town, are the remains of a small chapel : and close by stands the old church of Dysart. A little W. of the town, on a steep crag fronting the sea, stand the ruins of the ancient castle of Ra venscraig, alluded to under the name of Ravensheuch, in Scott's Lay of the Last Minstrel. Dysart unites with Kir kaldy, Burntisland, and Kinghorn, in returning a member to the House of Commons. Extent of par., 4 m . by 3 m . Pop. of burgh and par. (1851), 8727.

DYSAR'TENOS, par. Irel. Queen's co.; 6096 ac. P. 1415.
DYSARTGALLEN, par. Irel. Queen's co.; 10,781 ac. Pop. 4342

DYSARTMOON, par. Irel. Kilkenny; 6208 ac. P. 2123.
DYSER'T, five pars. Irel.:-1, Clare; 7251 ac. Pop. 1933.-2, Kerry; 6149 ac. Pop. 1295.-3, Kerry; 6074 ac. Pop. 1529.-4, Limerick; 910 ac. Pop. 170.-5, Waterford; 5396 ac. Pop. 1406.

DYSERTH, par. Wales, Flint. Pop. 892.
DZIALOSZYCE, a tn. Russian Poland, woiwode, Cracow, obwod of, and 36 m . S.S.W. Kielce, in a deep valley, near the Niddica. Pop. 900.

DZIALOSZYN, a tn . Russian Poland, gov. of, and 54 m . S.S.E. Kalisch, near the river Warta. The town is well built round a handsome central square; some manufactures, and two annual fairs. Pop. about 2500.

DZOUNGARIA, a region, Asia. See Soongarta.
[ $E$ in some positions, is substituted by $a$ and $i$, and some Russian names commence indifferently with $E, I e, J e$, and $Y e$. ]

EAGLE, par. Eng. Lincoln; 2450 ac. Pop. 466.
EAGLE ISLAND,-a sharp rocky islet, off W. coast, Ireland, co. Mayo, about two-thirds of a mile from the mainland; lat. $54^{\circ} 17^{\prime} \mathrm{N} . ;$ lon. $10^{\circ} 6^{\prime} \mathrm{W}$. (r.); area, about 15 ac. On this islet have been erected two lighthouses, with bright fixed lights.

EAGLE ISLAND.-1, One of the Amirantes, Indian Ocean; lat. $5^{\circ} 8^{\prime} \mathrm{S}$. ; lon. $53^{\circ} 22^{\prime} 30^{\prime \prime}$ E.; about $1 \frac{1}{2}$ or 2 m . in circumference; destitute of water, low, and sandy ; covered with shrubs, and encompassed by a chain of reefs to the $N$. and E., at the distance of 2 and 3 m . from the shore, on which the sea breaks very high.——2, An isl.. S. Pacific Ocean, near N.E. coast, Australia, between Lizard Island and Cape Flattery; lat. $14^{\circ} 32^{\prime} \mathrm{S}$. ; lon. $145^{\circ} 20^{\prime}$ E.-—3, An isl., U. States, Maine, in Penobscot Bay. Pop. 18, fishermen.

EAGLESCLIFFE, par.Eng.Vurham; 3970 ac. Pop. 628.
EAGLESHAM, a par. and vil. Scotland, co. Renfrew; area, $15,503 \mathrm{ac}$. The village, formerly a market town, is 8 m. S. by W. Glasgow, and consists of two rows of well built freestone houses, with a large and beautiful green, interspersed with trees between them, and intersected by a clear streamlet. It has a parish and two dissenting churches, and two schools. Many of the inhabitants are employed in cotton weaving for the manufacturers of Glasgow and Paisley; but
the principal source of employment is a large cotton spinning factory propelled by water-power. Robert Pollock, author ot the Course of Time, was a native of the parish. Pop. 2526.

EAGLESHAY, two isls. Scotland:-1, Orkney, 9 m . N. Kirkwall, and scparated by a channel about 1 m . broad, from Rousay. The soil in gencral is fit for cultivation; but on the N . is an extensive tract of sand, overrun with rabbits. -2, Shetland, on the E. side of St. Magnus' Bay.

EAHEINOMAUWE, the native name of the most N. of the two great islands of New Zealand (which see).

EAKRING, par. Eng. Notts; 2240 ac. Pop. 661.
EALING, par. Eng. Middlesex ; 3930 ac. Pop. 8407. EAOO, native name of Bow Island (which see).
EARDISLAND, par. Eng. Hereford; 4170 ac. P. 856.
EARDISLEY, par. Eng. Hereford; 4460 ac. Pop. 756.
EARL, two pars. Eng.:-1, (-Soham), Suffolk; 2240 ac. Pop. 741.-2, (Stoke), Wilts; 2400 ac. Pop. 381.

EARL SHILTON, a vil. and chapelry, England, co. of, and 9 m. S.W. Leicester; with a church, and chapels for Independents, Methodists, and Baptists. The stocking manufacture employs the greater part of the inhabitants. Pop. 2220.-(Local Correspondent.)

EaRlhHAM (St. Mary), par. Eng. Norfolk. Pop. 107.
EARLS-Barton, par.Eng.Northampton; 1760 ac. P. 1079.

EARLSFERRY, a decayed bor., Scotland, co. Fife, 1 m . W. Elie. The inhabitants are principally employed in handloom weaving. Although now a place of little importance, it formerly carried on a considerable trade. Pop. 496.

EARLSTON [anc. Ercildoun], a vil. and par. Scotland, co. Berwick. The village, 28 m . S.E. Edinburgh, is chiefly remarkable for the manufacture of a well-known description of cotton cloth called 'Earlston ginghams;' merinos, shawls, muslins, shirtings, blankets, flannels, \&c., are also manufactured. In the village are the parish church, two dissenting meeting-houses, and an endowed school. Within a quarter of a mile of the village are the ruins of a castle, called 'Rhymer's Tower,' in which Thomas the Rhymer, so famous in Scotch tradition, resided; and at the distance of about $1 \frac{1}{2} \mathrm{~m}$. is the locality rendered classical by the beautiful melody of 'The Broom o' the Cowdenknowes.' Pop. (1851), 970. Area of par. 6 m. by $4 \frac{1}{2}$. Pop. 1756.

EARLSTOWN, par. Irel. Kilkenny; 2938 ac. P. 527.
EARN, a river and loch, Scotland, co. Perth. The Loch, 26 m . W. Perth, is 7 m . long, by $1 \frac{1}{2}$ broad, and has a beautiful and picturesque appearance, being surrounded by mountains of considerable elevation.-The river issues from the E. end of the lake, about 5 m . above Comrie, flows chiefly E. through a rich and fertile country, and falls into the Tay about 1 m . below Abernethy. It abounds in trout and salmon, and is navigable about 4 m . from its mouth.

EARN (Bridee of), a vil. Scotland, co. of, and 4 m. S.E. Perth, named from a handsome bridge here erected over the Earn. It is neat and cleanly, has a station on the Edinburgh and Perth Railway, and derives its principal importance from its vicinity to the mineral springs of Pitcaithly. Pop. 369.

EARNLEY, par. Eng. Sussex; 1120 ac. Pop. 139.
EARNSHILL, par. Eng. Somerset ; 390 ac. Pop. 12.
EARSDON, par. Eng. Northumberland; 11,060 ac. Pop. 9429.

EARSHAM, par. Eng. Norfolk; 2960 ac. Pop. 731.
EARTHAM, par. Eng. Sussex; 2110 ac. Pop. 117.
EASBY, par. Eng. York (N. Riding); 5090 ac. P. 771.
EASDALE, a small isl. Scotland, close by Seil Island, off the W. coast of the mainland of co. Argyle; lat. $56^{\circ} 20^{\prime}$ N.; lon. $6^{\circ} 25^{\prime}$ W.; about $\frac{3}{4} \mathrm{~m}$. long, and nearly the same breadth at the broadest part, long celebrated for its slate. Being an entire mass of this material, the greater portion of it is now reduced below the level of the sea.

EASEBOURNE, par. Eng. Sussex; 4110 ac. P. 1074.
EASINGTON, four pars. Eng.:-1, Durham; 12,400 ac. Pop. 5573.-2, Oxford; 380 ac. Pop. 24.-3, York (E. Riding); 3020 ac. Pop. 546.-4, York (N. Riding); 3850 ac. Pop. 791.

EASINGWOLD, a market tn. England, co. York (N. Riding), 13 m. N. York, irregularly built, and in a flat, and not very fertile country. It contains a parish church, and chapels for Independents, Primitive and Wesleyan Methodists, and R. Catholics, the last a very neat edifice; and 10 daily schools. The trade in bacon and butter is considerable; most of it is sent to York in the first instance, and afterwards to London. Market on Friday. Fairs are held for horned cattle, horses, sheep, linen and woollen cloth, in July and Scptember. In the vicinity are some chalybeate springs. Area of par. $10,070 \mathrm{ac} . \quad$ Pop. 2719.

EASKY, par. and tn. Irel. Sligo; 13,286 ac. Pop. 6349.
EASSIE and Nevay, par. Scot. Forfar; $8 \mathrm{sq} . \mathrm{m}$. P. 732.
EAST, with different affixes, the name of numerous pars. in England and Wales:-1, (Eastgrinsteal $)$, Sussex; 13,390 ac. Pop. 3586.-2, (Eastbridge), Kent; 1090 ac. Pop. 22.-3, (Eastchurch), Kent; 6220 ac. Pop. 1019.-4, (Easter, Good), Essex; 1800 ac. Pop. 504.-5, (Easter, High), Essex ; 3730 ac. Pop. 975.-6, (Eastergate), Sussex; 890 ac. Pop. 1629.-18, (Eastwel), Kent; 820 ac. Pop. 106.-19, (Eastwell), Leicester: 1370 ac. Pop. 131.-20, (Eastivich), Hertford; 750 ac.

Pop. 173.-21, (Eastwood), Essex ; 4780 ac. Pop. 596.22, (Eastwood), Notts; 940 ac. Pop. 1621.

EAST ISLAND, one of the Crozet Islands (which see).
EASTBOURNE, a tn. and par. England, co. Sussex. The town, on the English Channel, near Beachy Head, has four principal streets, kept remarkably clean; well supplied with water; and is rapidly improving. It has an elegant old parish church, a handsome district church, with chapels for Wesleyans and Independents ; an endowed national school; and is much resorted to for sea-bathing. Nnmerous Roman, and some Danish, remains have been discovered in the parish. Area of par. 5850 ac . Pop., chiefly agricultural, 3015.(Local Corrcspondent.)

EASTER, or Teary Island, an isl., S. Pacific; lat. $27^{\circ} 6^{\prime} \mathrm{S}$.; lon. $109^{\circ} 17^{\prime} \mathrm{W}$. (R.) It is from 35 to 40 m . in circumference, and in the interior has mountains sufficiently high to be seen at a considerable distance. The land in the valleys is fertile, and well cultivated; but good water is deficient. The inhabitauts are tall, have an open countenance, high forchead, and regular features; the men are generally robust and muscular; the women delicate and handsome. Both sexes tatoo themselves, and, with exception of a girdle, go completely naked. They live on sweet potatoes, bananas, sugar-canes, and fish. The island abounds in fowls and rats; but the pigs, which were formerly found here, have now disapreared.

EASTERN ARChipelago. See Indian Archipelago.

EASTON, numerous pars. England:-1, Huntingdon; 1300 ac. Pop. 186.-2, Norfolk; 1910 ac. Pop. 279.-3, Northampton; $3170 \mathrm{ac} . \quad$ Pop. 883.-4, Hants; 2840 ac. Pop. 505.-5, Suffolk; 1360 ac. Pop. 415.-6, Wilts; 2080 ac. Pop. 532.-7, (-Bavents), Suffolk: 770 ac. Pop. 11.-8, (Great), Essex ; 2290 ac. Pcp. 929.-9, (Little), 1400 ac. Pop. 343.-10, (Grey), Wilts; 790 ac. Pop. 165.-11, (-inGordano, or St. George), Somerset; 1440 ac . Pop. 2199.12, (-Maudit), Northampton; 2070 ac. Pop. 214.-13, (-Neston), Northampton; 720 ac. Pop. 169.

EASTON, several places, U. States, including:-1, A tn. Pennsylvania, 53 m . N. Philadelphia, r. bank, Delaware, at the confluence of the Lehigh. It has regular streets, crossing each other at right angles, a central square, containing the courthouse; five churches, and Lafayette college; a woollen factory, two ropeworks, a number of tanneries, distilleries, and breweries, various kinds of mills. Pop. 4865. -2 , A vil. and post township, New York, 27 m . N.N.E. Albany, containing three churches, a cotton factory, a tannery, and several mills. Pop. 2988.-3, A vil. Maryland, 30 m . S.E. Annapolis, on Tread Haven Creek, near the head of a large estuary, 13 m . from its entrance into Chesapeake Bay. It contains a market-house, courthouses, and three churches, and is the seat of a considerable trade.

EASTPORT, a maritime vil., U. States, Maine, on Moose Island, Passamaquoddy Bay, 160 m . E.N.E. Augusta. It has five churches, a U. States garrison, a good harbour, and a variety of stores. The inhabitants are principally occupied in the lumber trade and the fisheries. Pop. 2000

EASTRINGTON, a vil. and par. England, co. York (E. Riding). The village, 17 m . S.E. York, a station on the Hull and Selby Railway; is well built, has brick houses, a church, Methodist chapel, free school, and extensive sacking manufactory. Area of par. 6910 ac . Pop. 2076.

EASTWOOD, or Pollock, a par. Scot. Renfrew; 7 $\frac{1}{2}$ sq. m. Pop. 7970; (1851), 9243.

EATON, numerous pars. England:-1, Leicester; 2470 ac. Pop. 404.-2, Notts; 1540 ac Pop. 189.-3, Salop; 5200 ac . Pop. 579.-4, (-Bishop), Hereford; 2270 ac. Pop. 434.-5, (-Bray), Bedford ; 2650 ac . Pop. 1097.-6, (-Constantine), Salop; 890 ac. Pop. 294.-7, (-Hastings), Berks ; 1330 ac. Pop. 161.--8, (-Socon), Bedford; 7530 ac. Pop. 2600.-9, (St. Andrew), Norfolk. Pop. 621.

Eaton (Cherch), a par. and vil. England, co. Stafford; 4930 ac . The village, $5 \frac{1}{2} \mathrm{~m}$. S.W. by W. Stafford, is well built, and has a church and a free grammar-school. Pop. 743.

EAUX BONNES, or AAs, a celebrated watering-place, France, dep. Basses-Pyrénées, 20 m . S.S.E. Oleron. It stands at the bottom of a narrow gorge, down which the Gave de Gabas makes a rapid descent, and consists of rather more than 20 large and lofty hotels and lodging-houses, forming one side
of a street, and completely overhung and hemmed in by precipitous rocks. The springs, five in number, are strongly impreguated with sulphur, and have a temperature not exceeding $91^{\circ}$. They are used only in baths, with the exception of one cold spring, which is drunk, and are said to be very efficacions in affections of the lungs and chest, and particnlarly in the carly stages of consumption. During the season, from June to October, the plain is crowded witl patients and visitors.

EAUX CHAUDES (Les), or Aigues-Chaudes, a vil. and bathing establishment, France, dep. Basses-Pyrénées, situated in a wild and rocky gorge of the valley of Ossau, on the Gave de Pau. It consists of a few inns and lodging-houses, wedged in the trough of the valley, and overhung by lofty precipices. The springs which, with the exception of one cold spring, have a temperature varying from $93^{\circ}$ to $95^{\circ}$, and are of a sulphureous nature, burst forth at the junction of the granite and limestone rock. They have the same properties of the Eaux Bonnes, above described; but the place as yet does not possess many attractions.

EAUX VIVEs, a vil. and par. Switzerland, can. of, and forming a suburb of Geneva. It is finely situated on the lake, contains a number of well-built houses, and is surrounded by handsome villas; and has manufactures of silk and woollen shawls, and several calico printfields. Pop. 1462.

EBBE (St.), par. Eng. Oxford. Pop. 4169.
EBBERSTON, par. Eng., N. York; 6350 ac. Pop. 579.
EBBESBBORNE-WAKE, par.Eng. Wilts; 2700ac. P. 306.
EBELEBEN, a tn. Germany, principality Schwarzburg Sondershausen, on the IIelbe, 5 m . S.W. Sondershausen. It contains a pleasure palace, with gardens; and has tile-works, a fishery, several mills, a cattle market, and two annual fairs. Pop. 831.

EBELSBERG, a tn. Austria. See Enersbera.
EBELTOFT, a maritime tn., Denmark, Jutland, bail. of, and $30 \mathrm{~m} . \mathrm{S} . E$. Randers, E. shore bay of same name. It has a large inconveniently-placed church, a winter haven, and carries on some trade and fishing. Pop. 1100.

EBENFURT, a tn. Lower Austria, 22 m. S. Vienna, 1. bank, Leitha. It is surrounded by walls and ditches, in a very dilapidated state; contains an ancient church and a modern castle, with a fine garden; and has manufactures of cloth, and a paper, cotton, and other mills. Pop. 2000.

EBERBACH, a tn. Baden, circle, Lower Rhine, cap. bail. of same name, r. bank, Neckar, 23 m . E. Mannheim. It contains a Protestant and a R. Catholic church, town-house, hospital, and Latin school; and has several tanneries, an iron, gypsum, polishing, saw, and other mills, some shipping, and a trade in timber. The scales of a white fish, Cyprinus Alburnus, are collected here to make false pearls. Eberbach was once a free imperial town. Pop. 3650; of bail. 7271.

EBERGASSING, or Oebergässling, a vil. Lower Anstria, on the Fische, 15 m . S.S.E. Vienna, with a church, and a castle with a chapel ; and manufactures of cotton prints, a cotton mill, and machinery for boring the cannon cast at Vienna. Pop. 890.

EBERMANNSTADT, a tn. Bavaria, Upper Franconia, cap. bail. of same name, l. bank, Wiessent, 20 m . S.W. Baireuth. It is the seat of a civil court, contains a castle, parish church and chapel, and has an oil and other mills, and seven annual fairs. Much hemp and mustard are grown in the vicinity. Pop. 651. Area of bail., 56 geo. sq. m. P. 11,851.

ElBERN, a tn. Bavaria, Lower Franconia, l. bank, Baunach, 14 m . N.W. Bamberg. It contains a parish church, chapel, and hospital ; and has manufactures of woollen and linen cloth, leather, and earthenware, dye-works, several mills, and seven annual fairs. Hops are extensively grown in the vicinity. Pop. 1162.

EBERNBURG, a vil. Bavaria, Palatinate, at the junction of the Alsenz with the Nahe, $20 \mathrm{~m} . \mathrm{S}$.W. Mentz. In the valley below is a handsome modern castle, built on a lofty and almost inaccessible height ; above stand the ruins of a much more interesting castle, long occupied by the celebrated knight Franz von Sickingen, who gave an asylum within its walls to many of the earliest and most distinguished of the reformers; among others, Bucer, Melancthon, and Ecolompadius. Ulrich von Hütten not only composed several of his celebrated writings, but had a printing press here, at which some of them were printed. Pop. 483.

EBERSBACH, several small places, Germany, particularly 1.-A vil. Wiurtemberg, circle Danube, r. bank, Fils, and on the railway from Stuttgart to Ulm, 6 m . W. Göppingen. It contains a Protestant parish church, and has an important cattle market. Pop. 1407.-2, (Ober, Mittel, and U'nter), a vil. Saxony, circle Dresden, near Moritzbnrg. It contains a parish church, and has mannfactures of wooden pipe bowls. Pop. 650.

EBERSBERG, a market tn. Upper Bavaria, on the Ebrach, 19 m. E.S.E. Munich. It contains a parish chureh and a castle, once a Jesuit college; and has an important sheep and corn market. Pop. 1004.

EBERSBERG, or Ebelsnerg, a market tn. Upper Austria, r. bank, Traun, here crossed by a long wooden bridge, 15 m. N.W. Steyer. It consists almost entirely of a marketplace, and two sinall streets, and contains a castle and a very ancient church. In 1809, the passage of the bridge was fiercely contested between the French and Austrians, and a battle fought, in which 12,000 men fell. Pop. 700.

EBERSDORF-an-der-Donau, or Kaiser-Ebersdorf, a vil. Lower Austria, near the confluence of the Schwechut with the Danube, 6 m . S.E. Vienna. It contains a parish church, to which numerous pilgrinages are made, and large artillery barracks, and has manufactures of calico and iron ware. Pop. 1136.

EBERSDORF, several places, Germany, particularly1, A market tn., principality, Reuss-Lobenstein, in a bleak district, on the Friesa. It is the seat of several courts and public offices, contains a handsome palace in which the prince resides, an educational and several charitable establishments; and has manufactures of cotton cloth, embroidery, soap, tiles, and tobacco. Pop. 1312.-2, A vil. Saxony, circle Zwickau, on the Zschopau, N.W. Chemnitz. It contains a handsome parish church, with beautiful stained glass, and fine wood and alabaster carvings; and has manufactures of damask, a coal mine, and some fine quarrics. Pop. 817.-3, Ebersdorf, or Abersdorf, a vil. Prussia, gov. of, and 70 m. S.S.W. Breslau. It contains a parish church, and has two oil and several other mills. Pop. 1005.

EBERSTADT, a vil. Hesse-Darmstadt, prov. Starkenburg, about 3 m . N.E. Weinsberg. It contains a Protestant parish church, with a monument of the lords of Frankenstein, a townhouse, and two schools; and has manufactures of woollen cloth, a worsted and numerous other mills. Pop. 1792.

EbESFALVA, Ersenetvaros, or Elisabethstadt, a tn. Austria, Transylvania, in a beautiful valley on the Kokel, 36 m. N.E. Hermannstadt. It contains a Protestant, Armenian, R. Catholic, and Greek church, the ruins of an old castle, in which the princes of Apafi resided, and a monastery of St. Anthony, surmounted by two lofty towers, and containing a small Armenian library and some paintings; and has a considerable trade, carried on chiefly by Armenians, in wool and wine. Pop. 2900.

EBHAUSEN, or MöllhaUSEN, a vil. Würtemberg, circle Schwarzwald, about $4 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Nagold; with considerable manufactures of woollen cloth. Pop. 1588.

EBINGEN, a tn. Würtemberg, circle, Danube, r. bank, Schmiecha, 10 m . E.S.E. Balingen; with an ancient church, a Latin and a superior burgher school; and manufactures of woollen cloth, hosiery, hats, leather, and lace, dye-works, and a considerable trade in cattle. Pop. 4384.

EBLERN, a vil. Austria, Styria, circle of, and 35 m . W.N.W. Judenburg, r. bank, Ens. It possesses a copper mine, the ore of which contains some gold, and a considerable percentage of silver, for the extraction of which works are crected. Pop. 600.

EBOE, a tn., W. Africa. See Abon.
EBOLI, or Evolr [anc. Eburi], a tn. and com. Naples, prov. Principato Citra, at the foot of a hill, 16 m . E.S.E. Salerno. It contains several churches, convents, and two hospitals; and has an annual fair, which lasts 12 days. Pop. 4999.

EBONY, par. Eng. Kent; 2000 ac. Pop. 168.
EBORA, a th. Portugal. See Evora.
EBREICHSDORF, or Ebersdorf-am-Moos, a vil. Lower Austria, 6 m. N.N.E. Ebenfort. It contains an old castle, surrounded with ramparts and ditches; and has a cotton printfield, and cotton, madder, and iron mills. Pop. 765.

EBREUIL [anc. Ebrolium], a tn. France, dep. Allier, 35 m. S.S.W. Moulins, in a fertile district, r. bank, Sioule,
which here propels several large flour mills. It has a trade in grain ; and in the vicinity are several limekilns. Pop. 1334.

EBRINGEN, a vil. Baden, circle Upper Rhine, bail. of, and 4 m . S.W. Freiburg. It contains a parish church. Pop. 1058.

EBRINGTON, par. Eng. Gloucester; 3690 ac. Pop. 583.
EBRO [Latin, Iberus, French, Ebre], one of the principal rivers of Spain. It rises in prov. Santander, in the valley of, and about $10 \mathrm{~m} . \mathrm{W}$. by N. Reynosa ; lat. $43^{\circ} \mathrm{N}$. ; lon. $4^{\circ} \mathrm{W}$.; and, pursuing a S.E. course, separates Biscay and Navarre from Old Castile, intersects Aragon, and the S.E. extremity of Catalonia, and falls into the Mediterranean by two branches, in lat. $40^{\circ} 40^{\circ}$ N.; lon. $0^{\circ} 50^{\prime}$ E., after a total direct course of nearly 300 m. , or, including windings, of upwards of 480 m . It is navigable for boats up to Tudela, about 180 m . from its embouchure; but is much impeded by shoals and rapids, to avoid which, a canal has been constructed, S. of, and paralle! with the river, from near Tudela to Sastago, 40 m . S.E. Saragossa. Its principal affluents are the Oca, Nagerillo, Jiloca, and Guadaloupe on the r., and the Aragon, Gallego, and Segre, on the l. bank. Previous to the second Punic war, the Ebro iormed the line of demarcation between the dominions of Carthage and those of Rome. It afterwards formed the boundary between the dominions of Charlemagne and his successors, and those of the Moors.

EBUS, or Bos, one of the Philippine isls., off N.W. coast Mindoro, with which it forms a good harbour. It is about $1 \frac{1}{2} \mathrm{~m}$. in circuit.

ECCLES, two pars. Eng.:-1, Lancaster ; 20,240 ac. Pop. 33,792.-2, Norfolk; 1490 ac. Pop. 124.

ECCLES, par. Scot., Berwick; $6 \frac{3}{4} \mathrm{~m}$. by $5 \frac{1}{2} \mathrm{~m}$. P. 1946.
ECCLESFECHAN, a vil. Scotland, co. of, and 16 m . E. Dumfries, a station on the Caledonian railway. It is the seat of an important cattle market, and a pork market; but the inhabitants generally are employed in the manufacture or gingham. Pop. 769.

ECCLESFIELD, par. Eng. York (W. Riding); 43,540 ac. Pop. 15,150.

ECCLESHALL, a market tn. and par. England, co. Stafford. The parish is divided into numerous townships; area, 20,930 ac. Pop. 4730 . - The town, 7 m . N.W. Stafford, contains some good houses, and a spacious old church, in which Queen Margaret obtained sanctuary after the defeat of Lord Audley at Bloreheath. Market on Friday; four annual fairs for horses, cattle, and sheep. Pop. 1439.

ECCLESMACHAN, par. Scot. Linlithgow; 2458 ac. Pop. 303.

ECCLESTON, two pars. Eng.:-1, Chester; 2330 ac. Pop. 321.-2, Lancaster; 8090 ac. Pop. 3319.

ECHALLENS, a vil. and par. Switzerland, can. Vand, on the Talent, $8 \mathrm{~m} . \mathrm{N} . \mathrm{by}$ W. Lausanne. It contains a parish church, used in common by Protestants and R. Catholics, and an old castle, and has important annual fairs. Pop. 744.

ECHELLES (Les), a vil. Sardinian States, Savoy, r. bank, Guier, 12 m . S.W. Chambery. The valley, beyond the village, is closed np by a limestone rock 800 ft . high, through which the public road passes, by a tunnel, 25 ft . in width, as much in height, and nearly 1000 ft . long. Originally travellers, in order to get out of the valley, were obliged to climb the precipice by ladders, from which circumstance the village is said to have derived its name. A road was subsequently cut in 1670. The tunnel was commenced by Napoleon, and finished by the King of Sardinia in 1817.

## ECHMIADZIn. See Armenia.

ECHT, par. Scot., Aberdeen; 4 $\frac{1}{2}$ sq. m. Pop. 1078.
ECHT, or EGt, a vil. Holland, prov. Limburg, 9 m . S. W. Roermonde, r. bank, Maas; formerly a fortified town, but now a village, consisting of a single paved street. It has a R. Catholic church, a good townhouse, and a school: and near it once stood the strong castle of the Huis-te-Echt. Pop. 1500.

ECHTERDINGEN, a vil. Würtemberg, circle Neckar, bail. of, and 5 m. S. Stuttgart. It contains a parish church, and has several annual fairs. Pop. 1636.

ECHTERNACH, a tn. Holland, duchy, Luxemburg, r. bank, Sauer, here crossed by a bridge, 20 m. N.E. Luxemburg. It is surrounded by walls with five gates, contains a church, three chapels, a townhouse, prison, progymnasium, and hospital, and has manufactures of delftware, woollen cloth,
leather, and wooden tohacco-pipe bowls, numerous mills, two weekly markets, and six annual fairs. Pop. 3548.

ECHZELL, a vil. Hesse Darmstadt, Oberhesse, r. bank, Horloff, 5 m . S.S.E. Giessen. It has a church, school-house, a sulphureous spring, and two annual fairs. Pop. 1615.

ECIJA [anc. Astigis], a city, Spain, Andalusia, prov. of, and 42 m. E.N.E. Seville, l. bank, Genil, crossed here by handsome stone bridge. It is partly surrounded by a decayed wall, and is entered by two gates. The streets in general ara narrow, crooked, and irregular, but have been much improved and repaired since 1843. Most of the houses are of brick, and have shady gardens, and verandahs. There are two principal and 12 smaller squares, among which the 'Plaza Mayor,' is large, lined with handsome buildings ornamented with porticos; among others the magnificent palaces of the Marquis of Peñafor, and of Benamegi, and the municipal offices, whose lower story contains the prisons. In the centre of this square are delighttul public walks, decorated with trees, and a fine stone fountain. A splendid saloon was erected here in 1843, with seats and other conveniences, and forms a favonrite resort on summer evenings. The 'Plaza-de-Abastos' or market square, built on the site of the Jesuits' convent, also in 1843, has gates facing the cardinal points, and a central fountain. Ecija has six churches, built chiefly of brick, and profusely ornamented within; several convents, and a great number of establishments for education. Its remaining public edifices comprise civil, military, and foundling hospitals, an orphan asylum, barracks, theatre, bull-ring, cemetery, and some public granaries. In the environs are a variety of shady and agreeable public walks and gardens, one in particular along the bank of the river, adorned with trees, flowers, statues, and fountains; much needed resorts in a place which, from the excessive heat of its climate, is commonly called the Oven of Andalusia. Manufactures :-woollen and linen fabrics, hats, soap, earthenware, leather, wine, and oil. Trade:-cattle, grain, wool, hemp, fruits, and colonial produce. A well attended annual fair is held in September. Ecija is of unknown origin; it is the ancient Astigis, and was called Colonia Julia Firma by the Romans. It is supposed to have been visited by the apostle Paul, and became an Episcopal see very early in the history of Christianity. Many inscriptions and Roman antiquities still exist here, among the latter a temple of the sun, in which is a colossal figure intended to represent that luminary. Pop. 23,722.

ECK (Loch), a lake, Scotland, co. Argyle, 7 m . long, and rather more than half a mile broad, which discharges itself into the Holy Loch, an arm of the Firth of Clyde. The scenery on its banks is very picturesque.

ECKARDSBERGA, a tn. Prussian Saxony, gov. of, and 24 m. S.W. Merseburg, cap. circle of same name, at the foot of the Finnberg. It contains a Protestant church, and the remains of an old castle, and has manufactures of linen, and two annual fairs. Pop. 1628.-The circle, area, 166 geo. sq. m., partly mountainous, and partly flat and fertile, is watered by the Unstrut, Wipper, and other streams, and produces inuch corn, hemp, flax, fruit, and wine. Pop. 36,662.

ECKERNFÖRDE, a seaport, Denmark, duchy, Schleswig, E. coast, in a fiord of same name, 17 m . N.W. Kiel ; lat. $54^{\circ} 28^{\prime} \mathrm{N}$.; lon. $9^{\circ} 52^{\prime} \mathrm{E}$. It has an hospital for old soldiers and their widows, and with it is conjoined a school for soldiers' children. The inhabitants are engaged to some extent in commerce and have a few small vessels, but their main occupation is fishing. Pop. sou0.

ECKERSDORF, three places, Prussia:-1, A vil., gov. Breslan, circle, Glatz. It contains a R. Catholic parish church, and two castles, one old and ruinous, the other modern, with a fine park and orangery, and has manufactures of beet-root sugar, and several mills. Coal is worked in the vicinity. Pop. 955.-2, A vil., gov. Liegnitz, circle, Sagan. It consists of two distinct portions, contains a R. Catholic parish church, and has tileworks. Pop. 1042.-3, A vil., gov. Breslau, circle Namslau, with a castle and a R. Catholic parish church, tileworks, and several mills. Pop. 1183.

ECKFORD, par. Scot. Roxburgh ; 6 m. by $4 \frac{1}{2}$ m. P. 1069 .
ECKHUNG CHOO, a river, Tibet, supposed to be the main head stream of the Indus. It rises in the Cailas mountains ; lat. $31^{\circ} 25^{\prime}$ N.; lon. $81^{\circ} 40^{\prime}$ E., whence it flows N.E. and assumes the name of the Indus, about lon. $79^{\circ} \mathrm{E}$. At lon. $80^{\circ}$ E. it is joined by the Singhey Chu.

ECKINGTON.-1, A vil. and par. England, co. Derby. The village, $5 \frac{1}{2} \mathrm{~m}$. N. by E. Chesterfield, irregular, but well built; houses chiefly of a dark sandstone, which abounds in the neighbourhood; is wretchedly supplied with water, the most of it being drawn off by the neighbouring coal and iron pits. It has a large Norman parish church, two Wesleyan meeting-houses, and three schools, two of them endowed. Sickles, scythes, nails, and files, are made. Area of par. 6610 ac. Pop. 4401.-2, Par. Worcester; 2260 ac. Pop. 785.-(Local Correspondent.)

ECKM ÜHL, or EgGMÜril, a vil. Lower Bavaria, r. bank, Laber, here crossed by a stone bridge, 11 m . S. Ratisbon. It contains a castle with a chapel, but is memorable only as the scene in 1809 , of the signal defeat of the Austrians by the French.

ECLIPSE ISLANDS, a clnster of small, rocky, barren isls., S. Pacific Ocean, near the S.W. coast of Australia; lat. $35^{\circ} 12^{\prime} \mathrm{S}$.; lon. $117^{\circ} 53^{\prime} \mathrm{E}$. (r.)

ECLUSE (Fort de l'), an anc. fort, France, dep. Ain, 16 m . W.S.W. Geneva, in a narrow gorge between l. bank, Rhone, and Momint Jura. The pass is described by Cesar as a narrow and difficult defile, which will scarcely allow a single carriage to pass, and is so completely overhung by the mountain, that a few men could defend it against any numbers. The fort stands on a height through which the road necessarily passes, and of course completely commands both it and the river. The only entrance to it is by a draw bridge at cither extremity. The works were partly destroyed by the Austrians in 1814.

ECOMMOY, a tı. France, dep. Sarthe, 13 m . S.S.E. Le Mans, handsome, well built, with straight streets centring in the place-de-la-halle or great market, with a fine Gothic parish church, and manufactures of linen and canvas, bleacheries, potteries, tile fields, \&c. Pop. 1243.

ECONOMY, a socialist or communist vil., U. States, Pennsylvania, l. bank, Ohio, 217 m . W. by N. Harrisburg. The streets cross at right angles, and it contains an elegant church, and various sorts of manufactories. It is inhabited by Germans from Swabia, who hold their property in common. Pop. 1283.

ECREFIOU, a group of low rocky islets in the English channel, about 5 m . N.E. the island of Jersey.

ECSEG, a vil. Hungary, It ither Danube, co. Neograd, on the Zagyva, about 12 m . from Hatvun. It contains a handsome R. Catholic parish church. Pop. 1529.

E(TON, par. Eng. Northampton; 1790 ac. Pop. 602.
ECUADOI: [Enghish, Equator; French, Equateurj, an independent republican state, S. America, lying under the equator, whence it takes its name. It extends along the coast of the Pacific Ocean, from the mouth of the Patia; lat. $2^{\circ} 30^{\prime} \mathrm{N}$., to the Tumbez; lat. $3^{\circ} 20^{\prime} \mathrm{S}$., at the S. commencement of the Gulf of Puna or Bay of Guayaquil. From this point the boundary line strikes S.E. along the river about 60 m . to the Cordillera, which it follows S. to lat. $6^{\circ} 20^{\prime} \mathrm{S}$., and then turning E. till it comes on the Marañon, it follows this great river in its winding course E. by N. into the wilds of the interior. Such is the S. boundary of the state. The N. boundary is traced in like manner, E. from the source of the Patia across the Cordillera, to the source of the Fragua, and down this stream to the Japura, which it follows E. by S . into the boundless forests. The Japura joins the Marañon or river of Amazons within the Brazilian territory, and the line of demarcation between the two states in the unfrequented region of the interior has not been as yet, we believe, authoritatively settled. Geographers, however, draw a boundary line nearly in the meridian of $70^{\circ} \mathrm{W}$., from Tabatinga, where the Javari joins the Marañon, to the river Japura or Caqueta, so that the state, thus limited, has New Granada on the N.; Peru on the S., the Pacific on the W., and Brazil on the E. Its greatest breadth, N. to S ., is near the sea coast, between the extreme points already indicated; towards the E. it contracts uniformly. Its length, from Cape $S$. Lorenzo, lon. $80^{\circ} 40^{\prime}$, to its E. limit, may be about 800 m .; and the area of the state, probably, does not fall much short of $340,000 \mathrm{sq} . \mathrm{m}$.

General View.-This state, like the others situate along the Cordillera of the Andes, embraces every variety of climate, having tierras caliéntes or low tractz, insufferably hot; templeadas or temperate regions, from 6000 to 9000 ft . above the sea; frias or cold districts, extending from the upper
limits of the preceding to the borders of the paramos or culd deserts, lying between the clevation of $11,000 \mathrm{ft}$. and tho limits of perpetnal snow; and finally, the nevados or snowy heights themselves. The culminating summits in this part of the Andes are ranged close together in double file, or along the outer edges of a narrow elevated longitudinal ridge, in the hollows of which is collected the chief population of the state. On the W. of this ridge, towards the sea, the declivities of the Cordilleras are covered with dense forests. On the E. also impenetrable forests occupy the mid region, between the temperate heights and those interminable and periodically desert plains below, which are here called by the Spanish name Llanos, and which resemble the pampas and savannas of other regions.

Divisions.-The state of Ecuador ia at present divided into three departments, which are again subdivided into seven provinces, in the following manner:-

The department of Guayaquil comprises the entire maritime district of the state; the other two embrace the heights of the Cordillera, their provinces following in succession from N. to $S$. in the order observed above. As to the mode in which the Llanos or great E. plains are shared among the provinces, we cannot find any statement, and, indeed, it does not appear that the civilized population of Ecuador have as yet descended anywhere into those plains, which so far as the missions extended along the N. banks of the Amazons, are considered as depending on Jaen de Bracamoros. The Galapagos or Turtle Islands under the line, and in lon. $89^{\circ} 30^{\prime}$ to $91^{\circ} 3^{\prime} \mathrm{W}$., are also claimed though not yet occupied by this state.

Cordilleras. - The central ridge or elevated region of Ecuador is formed by a double range of snow-clad mountains -several of them active volcanoes-which enclose a longitudinal valley, varying in elevation from 8800 to $13,900 \mathrm{ft}$., and divided, as will be seen, by transverse barriers. These mountains, which figure as the most remarkable volcanic group on the earth, are as follows :-

| W. Range. | Aha. Height. | E. Range. | Abs. lleight |
| :---: | :---: | :---: | :---: |
| Pasto | $\begin{aligned} & \text { Fint. } \\ & 13,450 \end{aligned}$ | Cavambe | Feet. 19,535 |
| Cumbal. | ... 15,620 | Guanami. |  |
| Cutacache | 16,380 | Antisana | .19,137 |
| Pichincha | 15,924 | Cotopaxi... | 18,875 |
| Corazon. | 15,795 | Quelemda |  |
| llinissa. | 17,380 | Tungurag | . 16,424 |
| Carguarazo | 15,540 | Sangry... | 16,138 |
| Chimborazo | ... 21,424 | , | , |

Thus within a distance of 250 m ., there rise in succession at least a dozen of mountains surpassing Mont Blanc in absolute elevation, besides many more which just reach the line of perpetual congelation. At the N. limit of Ecuador, the two chains uniting, form the Paramos de los Pastos, having on their N. and S. borders respectively the volcanoes of Pasto and Cumbal, and inhabited to a height of $10,200 \mathrm{ft}$. Towards the S., the snowy Cordilleras separating, enclose the long valley of Quito, which is, however, more elevated than the city from which it takes its name. The village of Lulumbamba or Gualabamba in this valley, and the Nevado of Cayambe lie directly under the equator. About 40 m . S. of the equator, the valley of Quito is closed by the Alto de Chisinche, where the two branches of the Andes unite in a single narrow ridge, not quite 500 ft . above the adjacent plains. S. of Chisinche again the ridge opens, and the valley of llambato extends about 150 m . in length, between Chimborazo and Carguarazo on the one side, and the group of Sangay on the other. It terminates on the S. at the trachytic ridge of Assuay, where the I'aramo attains the absolute height of $15,440 \mathrm{ft}$. Beyond this, towards the S., the valley of Cuenca succeeds, and stretches about 30 m . to the mountains of Loja, the elevation of which does not exceed 7000 ft . None of the summits on the sides of this valley attain the height of perpetual snow ; indeed, the highest of them probably does not exceed $11,000 \mathrm{ft}$.; and beyond the valley of Cuenca, towards the Marañon, the
hills sink to an clevation of 2000 or 3000 ft . Among the mountains enumerated above, Chimborazo (which see) holds the first place. Cotopaxi, though not the highest, is the most celebrated and conspicuous peaks in this most remarkable region of the Andes. It attracts the eye at once, being a perfectly symmetrical truncated cone, prosenting a uniform, unfurrowed field of snow of resplendent brightness. It is not to its beauty, however, that it owes its celebrity, but to its terrific eruptions, which, recurring frequently in the course of the last and the beginning of the present century, totally changed the face of the S. part of the valley of Hambato, overturned the towns or buried them under scoriæ and ashes. Riobamba was destroyed, in 1797, by an eruption of Tunguragua, when the rivers, dammed up by masses of rock falling from the mountains, swept away every vestige of the town. Great numbers of the inhabitants perished on that occasion. Pichincha, which, previous to the Spanish conquest, was an active volcano, rises immediately above the plain of Quito. Its crater is 3 m . in circumference, and may be viewed by a spectator lying flat on the precipitous rocks which form its brim. Thus seen, it appears to be nearly on a level with the plain of Quito, or about 6600 ft . or $1 \frac{1}{4} \mathrm{~m}$. decp, and is quite black within, while its upper edges are covered with snow.

Valleys.-The cultivated land and population of Ecuador lies chiefly in the valley, which extends along between the summits of the Cordillera, and which may be considered as divided by transverse ridges or dykes into the valleys of Quito, IIambato, and Cuenca. The average height of this tract is about 9000 ft . above the sea, though at its S. extremity, at and beyond Loja, it sinks about 2000 ft . Deep clefts or crevices sometimes occur, which bring the tropical vegetation into immediate contiguity with that of the elevated plains. Thus the luxuriant vale or glen of Chota, penetrates the plain of Ibarra, at a depth of nearly 5000 ft The inlabited districts on the sea side at Barbacoas, Esmeraldas, and Guayaquil are of small extent, and the slopes of the Andes on both sides are still covered with wild forests, on which the encroachments of human industry are rarely perceptible. These forests, with the snowy heights and the dreary paramos on the borders of the snow, occupy nineteen-twentieths of the area of the state.

Rivers, \&ic.-The rivers are, for the most part, rapid torrents, quite unavailable for purposes of internal communication. Some of the streams on the coast may perhaps be plied for a few miles by the canoes of the Indians, but commerce derives no aid from their navigation. The Marañon or river of Amazons, indeed, becomes navigable for light boats at Cluchunga, on the S . frontier of Ecuador, and about 5 m . below Jaen de Bracamoros; but this remote and difficult navigation is never attempted but by adventurous travellers, with whom the love of novelty outweighs the considerations of safety and convenience. The communication by post with the settlements (chiefly missionary) of the interior, on the banks of the Amazons, is carried on by means of Indians; who, with the packets of letters tied in a handkerchief round the head, swim for 300 or 400 m . down the great river, aided only by a balsa or float of light wood, which supports them in the descent of the rapids. On the E. of the Cordilleras, beginning at the N . limit of the state, we find, at the boundary itself, the river Caqueta or Japura, which joins the Amazons some 1000 m . lower down; the Putumayo or Ica, a few miles further S., hastens to unite with the preceding. Then follow the Almaricu, Coca, and Napo; which last, receiving the other two, and also the Curaray further S., enters the plains as a great river. The Tigu, Pastaca, Macas, Paute, and Zamora, all hurry in briefer courses to the Marainon. On the W. or maritime side of the mountains, the chief rivers are the Patia, noted only for the extreme insalubrity of its valley; the Mira, the Esmeraldas, so called from the ancient emerald mines (now deserted) on its banks; and the river of Guayaquil, formed by the junction of two small streams, the Caracol and Daule. The estuary at the mouth of this river, being protected towards the sea by the large island of Puna, forms a secure and capacious harbour, sometimes called the Gulf of Puna. This island is remarkable as being the landing-place of Pizarro, when, in 1530, he led his adventurous band to the conquest of Peru.

Geology.-The Andes of Ecnador may be entitled, collectively, a volcanic group, but as yet little has been done towards
the minute examination of their structure. Chimborazo is known to be a mass of trachyte, the ridge of Assuay displays the same formation; lavas, pumice, and cinders cover extensive tracts in the neighbourhood of Cotopaxi and Sangay. Yet the syenitic rocks and porphyries, elsewhere so characteristic of the Andes, occur here also; and, on the heights of Cuenca, the causeways and ruined temples of the Incas are constructed of freestone. It is said that gold was formerly collected in several river beds in the valley of Hambato and S. towards Zeruma, and silver ores are believed to exist in various parts of the Cordillera; sulphuret of mercury is found in Cuenca, and platina in Barbacoas; but no attention is now given to the mines, excepting those of iron and copper, not perhaps so much owing to their diminished productiveness, as to the juster appreciation now made of that kind of industry. Emeralds, however, are still gathered, chiefly by Indians, the mines being, for the most part, in impenetrable forests, on the side of the river Esmeraldas.

Climate.-From its geographical position, and double range of snow-clad mountains, Ecuador may be readily inferred to possess variety of climate, so far at least as temperature is concerned. But the practical effects of this variety are less striking and important than might be expected. The inhabitants of the coast, of European origin, are few in number; and the influential population has selected for its abode, not merely a temperate, but even an almost invariable climate. On the plain of Quito, 9300 ft . above the sea, there reigns a perpetual spring, with a temperature so constant that even the snow-line on the surrounding mountains seems hardly to vary throughout the year. The absolute height of the line of perpetual congelation is here about $15,700 \mathrm{ft}$., which is considerably lower than in Bolivia; where, owing to the dryness of the climate, the fall of snow is scanty. At Quito the rain is abundant, falling generally for a few hours in the afternoon, and rarely so constant or so heavy as to mar seriously the enjoyment derived from the usually bright sky and delicious atmosphere. It is popularly believed that since the earth quake of 1797 , the temperature of Quito and the adjoining valley has been lower than before; but it does not appear that any change has taken place in the vegetable productions of the country since that event. Further S., in Loja, and E. in the plains, there is less rain than at Quito; while on the opposite direction, at Barbacoas, it rains nearly every day in the year. The country round Guayaquil is inundated to a great extent in the rainy season (July), after which it remains for some months a pestilential marsh, from which issue in credible multitudes of mosquitoes, reptiles, and noxious insects. The exemption enjoyed by Quito and the elevated valleys from these plagues, is counterbalanced by their liability to violent earthquakes, of which they are constantly reminded by the ground gaping in deep cracks, by tottering buildings, and other monuments of former ruin. The high lands are often visited, too, by gusts of wind, of indescribable violence, sometines accompanied with snow.

Zoology.-All that we know of the zoology of Ecuador is derived from popular report, compared with the scientific information gathered in the other tropical regions of America. The puma, cougar or American lion (Felis concolor), and the still more formidable jaguar or American tiger, together with the black bear, frequent the mountains near Quito, and descend even to the sea-shore. The tapir (of two species) is one of the largest of the wild quadrupeds; deer numerous, but generally small. The sloth, bats, of which one species (the vampire) is destructive of cattle; cavies, iguanas, much prized as delicate food; and monkeys of many species, people the interminable forests. As to the feathered tribes, the reptiles, and insects, they are far too numerous to find a place in this rapid sketch. On the seacoast, life is rendered miserable by the incessant stings of flies and insects; snakes lie coiled under every fallen leaf, while the banks of every stream are guarded by alligators. Fish of many kinds are inconceivably abundan along the shore, but, owing to the great heat of the climate, they are of little value to the inhabitants ; they feed, however. myriads of birds, of various species, and the condor, among the rest, is said to visit the beach twice a day from his home on the highest Andes-on an average, 100 m . distant-to feast on the shell-fish washed ashore by the tide.

Vegetation.-The botanical productions of this country are many and intrinsically valuable, but not absolutely peculiar
to it, and they are, eonsequently, excluded in some degree from commerce by the competition of countries (sueh as New Granada and Venezuela) which are nearer to the European markets, and have greater facilities of internal communication. The cinchona, china or quina (Jesuit's bark) of Loja, is of the best kind, and was formerly in general demand, but the price now paid for it barely defrays the expense of carrying to the seacoast. The cacao of the same locality, and of the coast near Guayaquil, is excellent, and finds a ready sale in Mexico. Rice and pepper also are cultivated in the low country, while the plain of Quito produces sugar-cane, cotton, maize, and, higher up, wheat and barley. Wheat, which here attains the greatest perfection, and is extremely prolific, particularly when grown on irrigated lands, may be regarded as the characteristic product of this country. It is exported chiefly to Guatemala. In the equable climate of Quito, wheat can ripen at any time of the year, and the season of sowing it depends in the several localities, on slight differences of elevation. An indigenous species of tobaceo, very mild, and rendered fragrant by the process of drying, is cultivated in the neighbourhood of Loja. The vast forests of large timber, and the abundance of tropical fruits on the sides, and chiefly at the W. foot of the Andes, add little to the wealth of the state, and serve at present only to shelter and support a few tribes of wild Indians. Agriculture, considered as a science, is in a low condition in this as in the neighbouring states, being chiefly in the hands of the aboriginal race, who cling obstinately to their old habits.

Industry and Towns.-The Indians are collectively industrious, though they never manifest the energy of the European race. They weave cotton cloth, make quilts and carpets, which last are highly prized on account of their brilliant and unchangeable colours. Their pottery also merits commendation. The Indians are the miners, the agriculturists, the herdsmen, and, to a great extent, the manufacturers also of the state. On the coast they formerly carried on a profitable pearl fishery, but of late years this has been abandoned, chiefly owing, it is said, to the dread of a large cuttle fish, the grasp of whieh is fatal to the divers. That the natives are not deficient in nautical skill and boldness, is evident from their balsas or rafts, made of light wood, on which they often venture to sea, and make voyages of 200 or 300 m . along the coast. The balsas are sometimes 60 ft . long, and capable of earrying 25 tons of merehandize. The native ingenuity is still further manifested in the taravitas or rope bridges, of various kinds, thrown over torrents, and across profound chasms.

Chief Towns.-The chief towns (proceeding N. to S.), are Ibarra, at the foot of Cutacache; Quito, the capital, with 70,000 inhabitants; Riobamba, near Chimborazo, and within a few miles of the site of the old town; Cuenea, which ranks next to Quito in population, having 20,000 inhabitants; Loja; Jacn de Bracamoros, only a large village; and Guayaquil, the chief port of the state, and nearly equal in size, while superior in wealth, to Cuenca.
$\boldsymbol{P}$ pulation, \&c.-Of the population of Eeuador, the aboriginal red race or Peruvians, as they may be called, speaking the Quichua or some cognate language, form more than half; the rest are negroes, mulattocs, mestizoes, zamboes, and whites, the last a small minority. The negroes are comparatively few, and chiefly on the coast; indeed, the little maritime towns of Esmeraldas, Rio Verde, and Atacames, are peopled almost wholly by zamboes, or that breed of muxed negro and Indian blood, whieh is said to inherit all the vices of both parent stocks. The entire population of the state probably exceeds 500,000 . The form of government is republie, with a president as the head, who governs with a chamber of 45 members. The revenue of the state in 1849 was $\$ 792,900$ ( $£ 158,580$ ). Men of all races and eomplexions are now politically equal. Religious liberty, freedom of the press, and the principle of election to office are now established by law. But the whites or Spanish creoles, though numerically weak, still maintain a leading position as an aristocracy, by means of their superior education and intellectual vigour. It is said, however, that they are excelled in the moral sense, and in purity of life, by the native race; and that when these shall have been raised a little by education, the power of the State must necessarily pass into their hands. In dress and domestic manners, these people differ in nothing from the natives of Peru. The Spaniards are much given to indolent enjoyment, Awinging in hammocks, and smoking cigars. A very broad
hat, braided jacket and brecehes, coarse buskins on bare legs, and spurs with rowels of enormous size, form the dress of the peasant. The cavalier generally hides his other finery beneath an ample mantillo, or eloak of cloth or velvet. The ladies also sometimes conceal themselves in capotes, but the French style of dress is now generally adopted by the upper classes. The means of education are said to be very defective, and Spanish being the common language, is of course accompanied by a stagnant literature; but, as to the progress of society in Ecuador, there is little known in Europe, our chief sources of information respecting that country being anterior in date to the epoch of its independence.

Antiquities.-In the time of the Incas, the mountain region from Quito S . ranked next to the plains round Titieaca, as the seat of Peruvian civilization, and the remains of royal roads or causeways, and of Tambos or palaces still attest, at Cayambe and on Assuay, more than 13,000 ft. above the sea, the perseverance, grandeur of design, and careful workmanship of the natives.

History.-Quito formed part of the viceroyalty of Peru till 1564, when it was erected into a separate presideney. In 1717, it was annexed to New Granada, but at the end of five years, returned to its former separate condition, and so continued till the revolution, which broke out in 1809. The first attempts were twiee suppressed, and it was not till 1822 that the royalists were finally vanquished in Quito, which then united with New Granada and Venezuela to form the republie of Colnmbia. Continual troubles and revolts haressed the new republie, till at last, in 1831, the three ill united States agreed to separate, and to form so many independent confederated republics, dividing equitably between them the Columbian debt. On this oceasion, Quito, with its associated provinees, took the name of Ecuador.-(Humboldt's Personal Narrative of Travels to the Equinoctial Regions of the New Continent; Mollien's Travels in the Republic of Colombia; Colombia, being a Geographical, Statistical, Agricultural, Commercial, and Political Account of that country; Don Feliciano Montenegro Colon's Geographia General, dec.)

EDAM, an isl., N. coast Java, 9 m . N.N.E. Batavia, about 2 m . in eireuit, and very woody. There are here some storehouses for salt; but the island is ehiefly used as a place of banishment.

EDAM [Latin, Edamum], a tn. Holland, prov. N. Holland, 12 m. N.N.E. Amsterdam, about a mile from W. shore of the Zuider Zee, with which it is conneeted by a canal; formerly a more important place than at present. It is intersected by a canal, and has a haven, which, however, is little frequented, partly from its shallowness. Edam is walled, and was formerly fortified, and had seven gates; the fortifications are now planted with trees. It has two Calvinistic churches, one of which, esteemed the finest in the province, has some good painted glass ; a Lutheran, a Baptist, and a R. Catholic ehurch; a synagogue, and several benevolent institutions; a good townhouse, exchange, and fish market. It was formerly the prineipal cheese market in N. Holland, and from it the round red cheeses, called in England Dutchmen's heads, were nained Edain cheeses. Though far outstripped now by Alkmaar and Hoorn, still nearly a million lbs. of cheese are sold annually in the Edam market. It likewise still possesses three boat-building yards, three rope-spinneries, and a sawmill. Pop. within the walls, 2500; with environs, 4000.

EDAY, an isl. Scotland, Orkney, between Stronsay and Westray, and separated from the former by the firth called Eday Sound, about 4 m . broad. It is about 7 m . long, and 3 broad, and is chiefly covered with heath. It has two excellent harbours, that of Fersuess on the W., and Calf Sound on the N. Pop. 944.

EDBURTON, par. Eng. Sussex ; 2580 ac. Pop. 318.
EDD, a maritime vil. Abyssinia, lat. $13^{\circ} 58^{\prime} \mathrm{N}$. ; lon. $41^{\circ} 40^{\prime}$ E., on a sandy plain, and consisting principally of oblong huts, with arehed tops, and an outer covering of coarse grass mats; it is of no great extent, has a few small boats, and considerable trade with Moeha, in mats, rafters, glue, and goatskins. Good cattle may be had here, but no water, ex cepting at some distance, and that is brackish.

EDDERACHILLIS, par. Seot. Sutherland; 112,000 ac. Pop. 1699.

EDDERTOUN, par. Scot. Ross; 10 m . by 8 m . Pop. (1851), 890.

EDDLESBOROUGH, par.Eng.Bucks; 4350 ac. P. 1722. EDDLESTONE, par. Scot. Peebles; 10 m. by 7 m . Pop. 742.

EDDY, an isl. Ireland, Galway Bay, co. of, and 5 . m. S. by E. Galway; area 95 ac . It contains the ruins of an old castle.

EDDYSTONE, a group of dangerous rocks in the English channel, off the coast of Cornwall, on one of which, about 10 m. S.E. the Ram Head, the celebrated Eddystone lighthouse was erected by Smeaton, and completed in 1759 ; lat. $50^{\circ} 10^{\prime} 54^{\prime \prime} \mathrm{N}$. ; lon. $4^{\circ} 16^{\prime} 0^{\prime \prime} \mathrm{W}$. (R.) It has a bright fixed light, 72 ft . above sea level. The W. side is safe, close to the lighthouse; but to the E., and stretching N. and S., are rocks covered at high water.

EDDYSTONE ISLAND, a small isl., S. Pacific ocean, New Georgia; lat. $8^{\circ} 18^{\prime} \mathrm{S}$. ; lon. $156^{\circ} 30^{\prime} 40^{\prime \prime} \mathrm{E}$. On the N.W. side is a small harbour, where a vessel can lie completely land-locked; and on the W. the land rises 1036 ft . above sea level. The natives, who are black, and have woolly hair, are cannibals.

EDE, Eec, Eede, or Eden, a vil. Holland, prov. Gelderland, 11 m. W.N.W. Arnhem, on the road to Amsterdam, consequently having a good deal of traffic through it. It lies in a fertile grain district, and has a Calvinistic church, and a school. Pop. 1000; or, with some adjoining hamlets, 2600.

EDELENEY, a market tn. Hungary, Hither Theiss, co. Borsod, on the Bodva, 12 m . N. Miskolez. It contains a Protestant church, and a large castle, with fine gardens. Pop. 1470.

EDELFINGEN, a vil. Würtemberg, circle, Jaxt, r. bank Tauber, 2 m. N.N.W. Mergentheim. It contains a parish church. Much fruit and wine are grown in the neighbourhood. Part of the village belongs to Baden. Pop. 1090.

EDEN.-1, A river, England, rising in a hill in Westmorland, near the N.W. boundary of Yorkshire; flows N.W., crossing Westmorland and Cumberland, passing Appleby and Carlisle, and falling into the Solway firth. Total course, direct distance, 40 m . -2 , A river, Scotland, rising on the E. borders of co. Kinross ; flowing E. and N.E., and intersecting co. Fife in its whole length, and falling into St. Andrew's Bay. Total course, direct distance, 20 m .

EDENBRIDGE, par. Eng. Kent; 5290 ac. Pop. 2029.
EDENDERRY, a market tn. Ireland, King's co., $13 \frac{3}{4} \mathrm{~m}$. N.N.E. Portarlington, close to the bog of Allen, on a branch of the Grand Canal. It is cleanly kept; houses of stone, and slated; supply of water abundant; and town decidedly improving. It lias a handsome townhall, a parish church, a Friends' meeting-house, and four schools. Large quantities of corn are sold at the weekly Saturday markets, and conveyed to Dublin by the canal. Three annual fairs. Pop. 1850.(Local Correspondent.)

EDENHALL, par. Eng. Cumberland; 3570 ac. P. 266.
EDENHAM, par. Eng. Lincoln; 7760 ac. Pop. 699.
EDENKOBEN, a tn. Bavaria, Palatinate, 8 m . N. Landau. It is the seat of a law court, contains a R. Catholic, and two Protestant churches, and a Latin school, and has a bathing establishment, several mills, and manufactures of fire-arms. Much wine is produced, and chestnuts abound in the vicinity. Pop. 4930.

EDENSOR, par. Eng. Derby; 4900 ac. Pop. 748.
EDER, a tn. of W. Hindoostan, prov. Goojerat, $64 \mathrm{~m} . \mathrm{N}$. by E. Ahmedabad; lat. $23^{\circ} 53^{\prime} \mathrm{N}$.; lon. $72^{\circ} 3^{\prime} \mathrm{E}$. In 1820 , it was supposed to contain about 12,000 inhabitants; but, according to Elphinstone, is little better now than a large village.

EDER, or Eddel, a river of W. Germany. It rises in Rhenish Prussia, about 42 m . N.E. Coblenz, flows in a devious course E. by N. across the principality of Waldeck and Hesse-Cassel, and joins the Fulda 8 m . S. by W. Casscl. Gold has been found in its sands.

EDERMINE, par. Irel. Wexford; 4131 ac. Pop. 1334.
EDERNION, a beautiful valley of N. Wales, co. Merioneth, extending from Bala to Corwen, and containing several delightful country seats.

EDESHEIM, a market tn. Bavaria, Palatinate, on the Queich, here crossed by a stone bridge, 6 m . N. Landau. It
contains two castles, and has an important annual fair. Much wine is produced in the vicinity. Pop. 2069.

EDEYRN, par. Wales, Carnarvon. Pop. 624.
EDFOO, or Edfou [ane. Apollinopolis Magna; Coptic, Phbôou or Atbo], a small tn. Upper Egypt, l. bank Nile, 54 m . S.S.E. Thebes; lat. $25^{\circ} \mathrm{N}$.; lon. $32^{\circ} 51^{\prime} \mathrm{E}$. It is a poor place, composed chiefly of mean huts; but manufactures some coarse cottons and indifferent pottery. It is only remarkable as being the site of an ancient city, and for its remains, especially those of the greater and the smaller temples, the latter apparently an adjunct to the former. The greater temple is the largest in Egypt of those of Karnak and Luxor; but can with difficulty be inspected from the mass of rubbish collected in and around it, and from the modern houses built in every part of it, even on the roof of the inner temple. It would seem to have been founded by Ptolemy Philometer; and Athor, the Egyptian

court of the great temple at edfoo.-From Horeau, Panorama d'Egypte.

Aphrodite, Hor-hat, and their son Hor-senct-to, appear to have been the gods worshipped. The two pylones or gate-towers, in appearance like truncated pyramids, are 90 ft . high, each consisting of 10 stories inside, and carved outside with mag. nificent rilievos, chiefly of a religious nature. Between them is the doorway, 20 ft . wide, also covered with rilievos. Through this doorway the temple-court is gained, enclosed by a splendid colonade of 32 pillars; after this follows a hall with 18 pillars, and beyond it, through a beautiful portal, the temple-proper is reached, but mostly filled up with rubbish. Each pillar differs from the other, but all form a complete harmony, and give an impression of perfect beauty. The length of the temple is 400 ft ., its breadth 150 . In form it is exceedingly regular, and the effect of the whole is grand : $: 1$ imposing in the extreme. The small temple consists of two chambers, with a peristyle of pillars. Pop. 2000.-(Sir G. Wilkinson's Modern Egypt; Russeger's Reise in Egypten.)

EDGAR (Port), on S.E. coast, W. Falkland Island; lat. $52^{\circ} 0^{\prime} 42^{\prime \prime} \mathrm{S}$.; lon. $60^{\circ} 13^{\prime} 15^{\prime \prime} \mathrm{W}$. (r.) It is a very secure harbour. The entrance is between two bluff heads, about a cable's length apart, and about a cable broad. When once within the heads, the harbour opens out suddenly. The rocks on both sides of the entrance are bold; there are from 15 to 17 fathoms in mid-chamnel.

EDGBASTON, a suburb, Birmingham (which see, p. 414.)
EDGCOTT, par. Eng. Northampton; 960 ac Pop. 83.
EDGECOTT, or Edgcolt, par. Eng. Bucks; 650 ac. Pop. 195.

EDGEFIELD, par. Eng. Norfolk; 2230 ac. Pop. 638.
EDGEHILL. See Kington.
EDGEWORTII, par. Eng. Gloucester; 1620 ac. P. 149.
EDGEWORTHS'TOWN, a small vil. Ireland, co. of, and $8 \frac{1}{2} \mathrm{~m}$. S.E. Longford, with a parish chureh, R. Catholic chapel, and a school for the education of the sons of the clergy, the only institution of the kind in Ireland. The church is a neat structure, with a spire 50 ft . high, and so curiously constructed that it can be raised and lowered in the space of 18 minutes, by machinery within the tower. Close by is the
mansion of the Edgeworth family, in which the celebrated authoress, Maria Edgeworth, was born. Pop. (1841), 864. EDGMOND, par. Eng. Salop; 7270 ac. Pop. 2471. EDGTON, par. Eng. Salop; 2840 ac. Pop. 214. EDGW ARE, a par. and small tn. England, co. Middlesex; 1990 ac . The town, 8 m . N.W. St. Paul's, London, is beautifully situated, and is chiefly occupied by opulent families. It contains a church, a school, and several almshouses. The market has been discontinued; but a fair, with races, is held in August. Pop. 659.

EDinburgif (county of), Edinburgushire, or MidLothian, a maritime co. Scotland, bounded, N. by the Firth of Forth, along which it extends from 11 to $12 \mathrm{~m} . ;$ N.W. by co. Linlithgow, N.E. Haddington, E. Berwick, and S.W. and S. by portions of Lanark, Peebles, Selkirk, and Roxburgh. Its S . outline is extremely irregular, being deeply indented by the co. Peebles. Its extreme length on this side, E. to W., is 35 m ., diminishing gradually to the shores of the Forth, to 11 or 12 m . as already stated. Its breadth varies from 13 m . in the centre to about 16 on either side. Area, $358 \mathrm{sq} . \mathrm{m}$., or 229,120 ac., of which, it is calculated, that 145,000 are under cultivation. The S.S.E. and S.W. parts of the county are diversified with hills, of which the two principal ranges are the Pentland and Moorfoot, the former stretching S.W. to N.E. into the centre of the county from Peebles, to within 4 m . of Edinburgh, the latter occupying an area of nearly 50 $\mathrm{sq} . \mathrm{m}$. on its S.E. corner. The highest summit of the Pentlands is between 1500 and 1800 ft ; the highest of the Moorfrot hills between 1800 and 1900 ft . The former have generally a more bleak and barren aspect than the latter, which are interspersed with fertile dales and tracts of arable land, while a large part of their acclivities also is under cultivation, producing excellent crops. The views from some of the higher elevations of the Pentlands, looking towards the N. and N.W., are of the most magnificent description. There are, besides these systems of high lands, several isolated hills in different parts of the county, some of them covered with wood, and extremely beautiful. The county is watered by several rivers, but none of any extent. The principal are the N. and S. Esks, and the Water of Leith. The banks of the two former are remarkable for their picturesque beauty. Edinburghshire rests on a series of strata, connected with the coal formation. In the hilly S.E. districts, the rocks are of greywacke, and clay-slate; quartz, spar, and steatite being found only in small quantities. The Moorfoot hills are of greywaeke, the rock of the Pentlands chiefly porphyry. Whinstone is sometimes met with, and granite, syenite, and other primitive rocks are occasionally found. Coal, limestone, and sandstone are extensively wrought througlout the whole district. In the hilly parts, particularly in the S.E., the climate is cold, but healthy; in all other places it is the same with that of the adjoining coast, subject to dry and cold E. winds for three months in the year, namely, March, A pril, and May, and to much rain in August and Scptember, during which W. and S.W. winds prevail. The soil is geatly varied, but consists chiefly of a clayey loam, alternated with sand and gravel. It is not generally remarkable for natural fertility, but the richest portions are the low lands towards the Forth, where the most luxuriant crops are obtained, and the valley watered by the N. and S. Esks, where vegetation is rapid, carly, and abundant. The chief crops are wheat, barley, oats, beans, pease, potatoes, and turnips. The agricultural farms are of considerable size, varying from 100 to 400 ac .; the farm buildings substantial and well arranged, generally of stone; the implements of hushandry of the best and most approved description; and the lands well drained and enclosed. A large portion of the comnty, however, is under pasturage, chiefly the S. and hilly parts. The sheep and cattle are of the best breeds, the former mostly Cheviots, the latter IIIghland; and the horses for husbandry chiefly of the Lanarkshire, with a few of the Clydesdale breed; the milch-cows are usually of the Ayrshire and Teviotdale breeds. Considerable attention is paid to the management of the dairy-farms, of which the principal produce is milk and butter for the supply of Edinburgh and other towns. The manufactures of the county are comparatively limited, but include ale, long celebrated; whisky, to a considerable extent; gunpowder, and paper, especially along the banks of the N. Esk, which may be considered the principal seat in Scotland for the paper manufacture. There are also bleacheries,
and corn and other mills, on the Esks and the Water of Leith, and manufactures of various kinds are carried on in Edinburgh and Leith. The county communicates by the Union Canal with the Forth and Clyde Canal; is intersected by numerous excellent roads; and by sundry railways, all of which centre at the capital. The chief towns are Edinburgh, capital of Scotland; Leith, Dalkeith, Musselburgh, and Portobello. The county is divided into 45 parishes, and returns one member to the House of Commons. Registered electors (1850), 2017. Pop. (1851). 259,435.

EDINBURGII [Latin, Edinburgum, or Edina; Celtic, Dunedin; French, Edimboury; Italian, Edinborgo], the metropolis of Scotland, a royal and parl. bor., cap. above co., about $1 \frac{1}{2} \mathrm{~m}$. from S. shore Firth of Forth, 42 m . E. by N. Glasgow, 333 m. N. W. London ; lat. (observatory), $55^{\circ} 57^{\prime} 24^{\prime \prime}$ N.; lon. $3^{\circ} 11^{\prime}$ W. (r.) A city not more remarkable for the extent and beauty of the views it commands at numerous different points, than for its picturesque site, the striking and romantic appearance of the city itself, and the general excellence and elegance of its buildings. It stands on three elevated ridges, lying E. to W., parallel to each other. The centre ridge is terminated at its W. end by the lofty castle rock; while an imposing appearance is imparted to the E. end of the city by the Calton Hill, Salisbury Crags, and Arthur's Seat.
General Description.-Edinburgh is divided into the Old and the New Towns. The former occupies the central, and highest ridge; the loftiness of the houses here, rising in luge, dark, irregular masses, along the edges, and on the steep slopes of its acclivitics, adding greatly to the picturesque appearance of the city; but, like most old towns, exceedingly irregular in the arrangement of its streets. The New Town occupies a ridge of much broader crest, and less abrupt ascent, to the N. of the Old Town, from which it is separated by a deep hollow, formerly filled with water, and called the N. Loch, crossed by two stone bridges and an earthen mound. The houses here, all built of a beautiful white freestone, obtained from quarries in the vicinity, are comparatively modern, and remarkably handsome; while many of the squares, creseents, circuses, \&c., are magnificent. The streets, with a few exceptions, are spacious and regular, and are kept in excellent order-presenting in this, a striking contrast to the former condition of the streets of the Old Town. Extensive and well laid out pleasure-grounds, with the command of beautiful views from various points, complete the attractions of this elegant quarter of the city. On the S . side of the Old Town, and separated from it also by a hollow, occupied by an ancient street called the Cowgate, and crossed by two bridges, stands the remaining portion of the city. With exception of a few unimportant streets, this is also comparatively a new town; but without any of the pretensions or elegancies of the other. It contains many good houses, and one or two good old-fashioned squares; but possesses no other remarkable feature of any kind, and has no distinctive appellation. A bout one-quarter of a mile further S., is a handsome suburb called Newington. The entire city is about $1 \frac{3}{4} \mathrm{~m}$. in length, and the same in breadth, with a circumference of about $5 \frac{1}{2} \mathrm{~m}$. The principal street in the Old Town is that which occupies the crest of the ridge on which the latter is built, and which bears, at different points, the names of Canongate, Netherbow, High Street, Lawn Market, and Castle Hill. This ancient and very remarkable street-for, notwithstanding its varions names, it is but one street, being continuons and uninterrupted from one end to the other-is upwards of 1 m . in length, rising gradually with a regular and steep incline from a small plain at the E. end of the town, on which stands the palace of Ifolyrood, and terminating in the huge rock on which the castle is built, 443 ft . above sea level. The appearance of this street, the scene of many interesting historical incidents, is rendered exceedingly imposing by the loftiness and antique aspect of the houses with which it is lined, many of them ranging from five to seven stories in front, and several more behind. The streets in the New Town most worthy of notice arc Princes Street, Gcorge Street, and Queen Strect, all lying parallel to each other, E. and W. Princes Street runs ahong the edge of the hollow, which separates the New Town from the Old. Being built only on the N. side, a magnificent view of the Old Town, towering high and darkly on its rocky ridge, of the lordly castle, and the interveuing valles, is ob
tained, rendering it one of the most delightful promenades of which any city can boast. At the E. extremity of this street is the Calton Hill, one of the most striking features of this singular city, being a rocky eminence, studded with monuments, with a broad verdant summit, commanding a view of the Firth of Forth, with its shipping, and surrounding
shores, of surpassing beauty. The principal street on the S. side of the town is Nicolson Street, which, with its extensions, S. Bridge Street, and Clerk Street, intersects this part of the city N. to S. On this side, also, are the Meadows, a large level park, surrounded with trees and walks for the recreation of the inhabitants, upwards of $1 \frac{1}{4} \mathrm{~m}$. in circum-

ference; adjoining the Mcadows, are Bruntsfield Links, an extensive common, of uneven surface, much frequented by the golf players of Edinburgh. From the higher parts of the Links, which overlook the beautifully situated village of Morningside, a view is obtained of the Pentland Hills, distant S.W. between 4 and 5 m .; and of the intervening valley, or strath, with the romantic hills of Braid, rendered classical by Sir Walter Scott. Beyond the E. extremity of the town, a huge belt of precipitous rock, called Salisbury Crags, rises to the height of many hundred feet from the deep valley below. Immediately belind, a conical hill, with a narrow, rocky summit, called Arthur's Seat, towers above the Crags, attaining an elevation of 796 ft . A broad pathway winds along the face of the Crags; and a carriage drive leads round the entire hill, from many points of both of which, prospects of unrivalled beauty and splendour are opened up.

Public Buildings, Monuments, Statues, \&cc.-In the Old Town, the most remarkable, and, next to Holyrood, the most interesting public building is the castle, the position of which has been already described. It is composed chiefly of a cluster of irregular buildings, begirt with embrasured walls, excepting on the S . side, where a lofty antique looking edifice rises sheer from the face of the rock, which it emulates in grandeur and sternness of aspect, overlooking the Grass Market. (See Wood cut.) The fortress contains accommodation for 2000
soldiers, and the armoury, space for 30,000 stand of arms. On a small flagged area, occupying the lighest summit cf the castle, and called the bomb battery, stands cor spicuously a huge piece of ancient ordnance called Mons Meg, built of malleable iron staves, cask-fashion, and believed to have been forged at Mons in Flanders, a.d. 1486. In an apartment in the castle is kept the ancient regalia of Scotland, found in the year 1818 in an old oaken chest, where they had lain undiscovered for upwards of a century. They consist of a crown, sceptre, and sword of state. At the E. end of the lofty range of ancient buildings on the S.E. side of the castle, a small room is pointed out in which Queen Mary gave birth to James VI., on June 19, 1566. This castle was anciently called Castrum Puellarum, the 'Camp of the Maidens,' on account, as tradition has it, of its having been the place of residence of the daughters of the Pictish Kings, previous to their marriage. The date of its first erection, however, is unknown. On the esplanade in front of the castle, stands a bronze statue of the late Duke of York, and a little lower down, on the face of the acclivity, the house in which Ramsay the poet died.
The Palace of Holyrood or Holyrood House, as it is more generally called, stands, as already mentioned, at the lower or E. extremity of the street leading to the castle. It is of a quadrangular form, with a central court 94 ft . square. The
front is flanked by two castellated circular towers at either cnd; and between them, in the centre, is the entrance gate. No part of the present palace is older than the time of James
in May. It is used also as a place of worship. Adjoining St. Giles' church is an open area called the Parliament Square, in the centre of which is an equestrian statue of Charles II., erected in 1685. At the S.W. corner of the square is the entrance to the Parliament House, the various higher courts of law, and the Advocates' Library.

The Parliament Hlouse, now known by the name of the Outer House, is the place in which the Scottish Parliament met before the Union. It is a magnificent hall, 122 ft . long by 49 ft . broad, with a lofty open timber roof, and contains marble statues of Henry Dundas, first Lord Melville, and Lord President Blair. The higher law courts enter from this hall, which, in session time, presents a very animated appearance, being thronged with members of the bar in their gowns and wigs. Adjoining the Parliament IIouse, with which it has a communication, is the Advocates' Library, containing the largest and most valuable collection of books in Scotland, the printed works amounting to 150,000 volumes, and the MSS. to 1700 . In an adjoining building is the Signet Library, belonging to the writers to Her Majesty's Signet, containing about 50,000 volumes. The only other buildings of any note in the Old Town are the Tron Church, a very ordinary looking structure, founded in 1637; the County Hall, a heavy mass of building, containing the sheriff courts, and various offices for the management of county business; the Royal Exchange, founded in 1753; the New Corn Exchange in the Grass Market; the Bank of Scotland; and the New or Free Chureh College at the head of the Earthen Mound, an elegant structure in the Tudor style; it is a Theological Seminary, having professors in the theological, moral, and natural sciences; and attached to it an excellent library and a museum.

The principal public buildings on the S. side of the town are the University, situated in Nicolson Street, a large and somewhat heavy looking quadrangular edifice, with a spacious court in the centre, founded in 1789, the University itself having been founded in 1582. The E. front is adorned with a portico, supported by Doric columns, 26 ft . in height. There are 32 professors in four faculties-divinity, law medicine, and the arts. The students are not resident within the college, wear no peculiar dress, and are under no general system of dis-

cipline; their average annual number is about 1200 . The library, which occupies the S. side of the building is a magni

## EDINBURGH

ficent room, measuring 198 ft . in length by 50 in breadth, with an arched roof from 50 to 58 ft . high. It contains about 100,000 volumes. The museum contains a large collection of specimens in the various departments of natural history; the ornithological and anatomical departments being very rich and very complete. Near the college stands the infirmary, a large and commodious edifice, built in 1736 , containing 400 beds; a surgical hospital, fever hospital, and lock hospital, occupying separate buildings apart are connected with it. A little S. of the University is the Royal College of Surgeons, an elegant modern building of the Ionic order, with a beautifully proportioned portico, and pediment supported by six fluted Ionic columns resting on a screen; it contains a valuable museum. Heriot's and other hospitals on this side of the town, are noticed under the head Hospitals and Charitable Institutions.

In the New Town, at the foot of the Earthen Mound, and fronting Princes Street, stands the Royal Institution, one of the finest buildings in the metropolis, though much of its effect is lost from its low situation. It is a Grecian edifice, with an exterior peristyle of doric columns, and a fine octastyle portico in front, three columns in depth, supporting a pediment. The building is surmounted by a colossal statue of Queen Victoria in stone. The Institution was erected for the accommodation of the Royal Society of Edinburgh, and for the board of trustees, instituted in 1727, for encouraging trade and manufactures in Scotland, and for the Royal Institution for encouraging the fine arts. The Dean bridge, a noble structure thrown across a deep ravine, at the bottom of which flows the Water of Leith, connects the ridge on which the New Town stands with the country to the $N$. of it. The height of the bridge to the top of the parapet is 109 ft . above the bed of the river. There are four arches, each 96 ft . span. The Physicians' hall, in Queen Strcet, lately erected, is a handsome edifice, embellished by colossal figures in front. The Assembly rooms and Music hall; the Edinburgh and Glasgow, and the Commercial banks; the Western bank; the British Linen Company's bank, and sundry others, are all elegant, and some of them ornate structures. The Register-office, or General Register-house of Scotland, at the E. end of Princes Street, crected for the preservation of the public records of Scotland, and as a general repository for copies of title deeds and other legal documents affecting property, forms a square of 200 ft ., surmounted by a dome 50 ft . diameter, and contains upwards of 100 apartments for the transaction of public business. On the elevated platform in front is erected a bronze equestrian statue of the Duke of Wellington by John Steelc. The theatre-royal, general post-office, and stamp-office, are substantial cdifices. The jail and bridewell, a cluster of castellated buildings, surrounded by a high wall, on a rocky ledge of the Calton Hill, was founded in 1815, and opened for the reception of prisoners in 1817, when the old jail, poetically called the Heart of MidLothian, was taken down, and its inmates removed to the new prison, now the only one in Edinburgh. A little E. of the prison stands the high school, a splendid doric edifice, extending about 270 ft . in length; and on the Calton IIll, above it, stand the royal astronomical observatory, the monuments to Admiral Nelson; Dugald Stewart, the metaphysician; and Playfair, the mathematician; and the national monument, intended to be a literal reproduction of the Parthenon, to commemorate those who fell at Waterloo, and in the different engagements by sea and land during the last war with France, but want of funds arrested its progress when only 13 columns for the W. end of the edifice had been erected, so that it now appears like a ruincd temple, and imparts to the Calton Hill an aspect somewhat resembling the Acropolis of Athens. There are a number of other handsome cdifices in the New Town which do not come under the designation of public buildings, such as the new club in Princes Strect, finely situated opposite the Castle, \&c.

The most remarkable, and by far the most clegant of the public monuments of Edinburgh, is that to Sir Walter Scott, on the S. side of Princes Street. Its form is that of an elaborate Gothic cross, 200 ft . high, being a composition from Melrose Abbey, designed by George M. Kemp, a self-taught genius. A marble sitting figure, by Steele, of the novelist and poet, occupies the platform of the monument, and over it the groined arches form a canopy. The other noteworthy monuments in the city are those to the poct Burns; Hume, the historian; and Lord Melville; with bronze statues of the Earl of

Hopetoun, George IV., and William Pitt, the last two by Chantrey.

Hospitals and other Benevolent and Charitable Institutions. -Few cities of equal extent are possessed of more numerous and more magnificent hospitals and charitable institutions; indeed so multiplied have they become that it is matter of doubt whether they can rcally be looked upon as an advantage to the community. Many of the edifices built by these institutions are among the finest in the city, and resemble rather ducal palaces than receptacles for orphans or the children of indigent parents. Among these, Heriot's hospital, on the S. side of the city, founded by George Heriot, goldsmith and jeweller to James VI., is a fine old Elizabethan structure, designed by Inigo Jones, and one of lis finest works The object of the institution is the maintenance and education of poor boys, the sons of freemen of the town of Edinburgh; and the surplus funds are employed in establishing and maintaining free schools in various parts of the city. Another large and exceedingly elegant structure, of quite recent erection, is Donaldson's hospital, in the W. part of the city; it is a Tudor building, and intended to maintain 200 poor boys and girls. Of the numerous other hospitals and benevolent insti tutions, many of which have handsome and extensive buildings, the following may be specified: -George Watson's hospital, John Watson's hospital, Gillespie's hospital, the Orphan hospital, \&c. Besides these more important institutions, there are the lying-in hospital, the asylum for the blind, the deaf and dumb institution, the city workhouse, the Canongate charity workhouse, and the West-kirk poorhouse at the W. end of the city; the house of refuge, the house of industry, and the night asylum for the houseless. There are also inany public dispensaries, where medicine and medical attendance are gratuitously afforded to the poor.

Churches and Places of Worship, \&c.-Besides St. Giles' the Tron, and Victoria Hall, already adverted to, Edinburgh possesses 23 churches in connection with the Established church, of which St. George's, St. Stephen's, St. Mary's, and St. Andrew's may be specificd as elegant buildings. There are 25 Free churches, the finest, in an architectural point of view, being Free St. George's, and the Free High church, the latter forming part of the New College buildings, but none of them are very fine, though some are neat. There are 15 U. Presbytcrian, and eight Episcopalian; of the latter, St. John's, in Princes Street, and St. George's, in York Place, are very elegant Gothic structures. The other places of worship include six Baptist, three Methodist, three Congregationalist, two Original Seceders, one Reformed Presbyterian, two R. Catholic, with places of meeting for Glassites, Friends, Jews, \&c. The Greyfriars churchyard, attached to the old and new Greyfriars churches, burned down in 1845, is noteworthy from the numerous remarkable personages interred in it, among whom are George Buchanan, the historian; Alexander Henderson, moderator of the Glasgow Assembly of 1638; Sir George M'Kenzie, well known as 'bluidy M'Kenzie,' a celebrated lawyer in the time of Charles II.; Dr. Pitcairn; Mac laurin, the mathematician; Allan Ramsay, the poet; Robert son, the historian, \&c. In this churchyard are also interred many who suffered martyrdom during the times of the persecution, and here, on the top of the grave stones, the National Covenant was signed in 1638 .

Courts of Lav, \&c.-Edinburgh is the seat of the supreme courts of Scotland. The principal of these is the Court of Session, composed of 13 judges, each of whom is distinguished by the title of lord. It consists of an Inner and an Outer House. The former sits in two divisions, each composed of four judges-a first, in which the Lord Justice General, who is head of the whole court, presides; and a second, in which the Lord Justice Clerk presides. The Onter House is composed of the remaining five judges, who are called Lords Ordinary, and are called to the Inner House, when vacancies occur, according to the seniority of their appointment. Each lord ordinary has a separate court; and any party complaining of the judgment of any inferior court, or originating an action in the Court of Session, must in the first instance bring it before one or other of the lords ordinary. He has the privilege, however, of not only naming his judge, but also the particular division of the Inner House before which the cause is to be carried in the event of review. The judgment of cither division is final in Scotland, but may be appealed to
the House of Lords. When the judges of either division are equally divided in opinion, the other division is called in to decide by a majority of both divisions; and sometimes, in very important questions, what is called 'a hearing in presence,' takes place before the whole judges, including ordinaries. They also constitute the teind court. The court has two terms in the year-the winter session, commencing on 12 th November, and terminating on 11 th March; the summer session, beginning on 20th May, and ending on 19 th July. The court of justiciary, or supreme criminal court, instituted in 1672 , is composed of the Lord Justice General, the Lord Justice Clerk, and five Lords commissioners. The inferior courts are the sheriff, the justice of peace, and small debt courts. The college of justice, established by James V. in 1532 , consists of all members connected with the supreme courts, including the judges, advocates, writers to the signet, advocate's first clerks, clerks to the judges, extractors, \&c. The members enjoy several privileges, and are exempt from some of the city taxes. The faculty of advocates, presided over by a dean, is an association of barristers, who have the privilege of pleadirg causes before the Court of Session, or any other courts of record. The writers to the signet, an incorporated body, conduct cases before the supreme courts, and lave the exclusive privilege of subscribing the writs that pass the royal signet in Scotland. Solicitors also practise betore the supreme courts, but with inferior privileges to those of the writers to the signet.
Elucation, Literature, Science, \&c.-The more prominent educational institutions of Edinburgh, exclusive of the colleges and high school, which have been elsewhere spoken of, are the Edinburgh academy, and the Scottish naval and military academy, established for the purpose of affording education to pupils destined to serve in the army or navy or East India Company's service; and the Royal Scottish academy of painting, sculpture, and architecture. There are also several public seminaries, and a number of schools for the education of the poorer classes, two normal schools, Heriot schools, seven in number, elsewhere spoken of; the school of arts, established in 1821, for the instruction of mechanics and tradesmen in the elements of scientific knowledge. The societies and institutions for the promotion of science and other branches of knowledge, are exceedingly numerous. The principal are the royal college of physicians, incorporated in 1681 ; the royal college of surgeons, the royal society, the Highland society, instituted in 1785 , for the promotion of agricultural improvements in Scotland; the astronomical society; the society of antiquaries, established by royal charter in 1780 ; the medico-chirurgical society, the royal medical society, the Wernerian, the botanical, and the speculative society. There are five public libraries in the city, besides the advocates, writers to the signet, and college libraries, and three public gardens connected with scientific objects-the zoological gardens, the Caledonian horticultural society's garden, and the royal botanic garden, all situated in the N.E. environs of the city.

Manufactures and Trade.-The mannfactures of Edinburgh are neither extensive nor important ; ale brewing, for which it has been famous for upwards of 200 years, is the principal. There were lately 26 breweries in the city, whose annual consumpt of malt amounted, altogether, to 329,606 bushels. Shawl-making, coach-building, type and iron founding, soap and candle making, are carried on to a considerable extent; and also the making of various kinds of machinery, generally of the smaller class. Glass-painting and staining are also prosecuted to some extent, and with much success. Edinburgh is the head-quarters of the book-trade in Scotland, and as a literary mart it is the second town in the United Kingdom, being in this respect excelled only by London. The manufacture of linen was at one time an important brauch of industry here, but is now nearly extinct.

Municipal Government, de.-The affairs of the city are condncted by a lord provost, magistrates, and council, elected by the citizens, according to the burgh reform Act. The council consists of 33 members, 31 of whom are returned by the nive wards into which the city is divided; the dean of guild, elected by the guildry; and the trades' convener, elected by the incorporated trades. The lord provost is high sheriff and lord-lieutenant within the city and liberties. The streets are lighted with gas. The supply of water, which is frequently found inadequate, especially in dry seasons, is obtained
from a large reservoir, formed in a gorge of the Pentland lills, at the distance of between 6 and 7 m . A further supply is abont to be brought from the Bevilaw springs, about 8 m . S.W. from the city.

Edinburgh may be called an aristocratic city, its inlabitants being composed, to a great extent, of persons of independent property, annuitauts, \&c., including a larger proportion of the more liberally educated classes than any other town in the united kingdom. This fact, taken in connection with the advantages it presents, as respects edncation, the beautiful environs of the city, and abundance and cheapness of provisions of all kinds, renders Edinburgh a most desirable place of residence. It has now also become the centre point of several railways-the Edinburgh and Glasgow, North British, and Granton lines have their termini in the low ground between the Old and New Town, W. of the North Bridge; the Caledonian has its terminus in the W., and the Dalkeith mineral line in the E. part of the city; and the Union Canal furnishes an additional means of transit for goods to the W. of Scotland. Leith (which see) is the port of Edinburgl, and may almost be said to form a suburb of it.

History and Name.-The name Edinburgh [Edwin's castle or fort] is supposed to be derived from Edwin, King of Northumbria, a Saxon prince, who, in the seventh century, possessed the S. part of Scotland, and who is alleged to have built a stronghold on the site of the present castle. The Gaclic name Dun-Edin or Dunedin, is merely a translation of the Saxon name; while its poetical name, Elina, was introduced by George Buchanan. Whatever antiquity may be claimed for the city, the period when it first attained the dignity of a capital does not appear to be very remote; not more remote, according to Chalmers, than the time of James V., the principal town of Scotland previous to that period having been Scone, where the Scottish kings were crowned. It was, however, a place of considerable importance long prior to this, having been recognized as a burgh by David I. in 1128. In 1215, Alexander II. held here his first parlia ment; and 20 years later, a provincial synod was held in the city by the Pope's legate. It suffered from the successive attacks of the English during the wars of independence; and was all burned down, excepting the castle, by Richard II. in 1385. The town was rebuilt under shelter of the castle, and for a long period was confined to the central ridge. In the 15 th and 16 th centuries, the city was walled, and the S. loch or morass being drained, became the seat of the Cowgate and Grass Market, in which the wealthicr class of the community took up their residence, and for many years they continued to be the most fashionable localities in the city. In 1513 Edinburgh was visited by the plague; and in 1532 the college of justice was established. It was taken and burnt in 1554 by an English army under the earl of Hertford; but soen recovered from the consequences of that disaster. On Dec. 3, 1557, the first Covenant was signed in the city; and during the remainder of the 16 th century it was the scene of numerous interesting events, including many in the history of Qucen Mary and in the earlier history of the Reformation, more especially in connection with John Knox, whose house (from a window of which he frequently preached) is still standing, near the top of the Canongate. On Feb. 28, 1638, the National Covenart was signed in the Greyfriars' church-yard. After the overthrow of Charles I., the Scots having taken up arnis in favour of his son, Cromwell invaded their country, and took Edinburgh castle, and it remained in the possession of the English till the Restoration, which was followed by the infamous religions persecution in Scotland, carried on for a long period under the auspices of the king's brother, during which the Grass Market, the common place of execution, where so many of the Presbyterian Protestants suffered martyrdom, became the most notable place in the city. During the civil war in 1715, an unsuccessful attempt was made by the Jacobites to surprise the castle. In 1736 took place the famous Porteous Mob, when John Porteous, captain of the city guards, was forcibly taken out of prison by the populace, carried to the Grass Market, and there was hanged upon a dyer's pole. He had been tried and condemned to death for firing and ordering the guard to fire npon the multitude a:sembled to witness the execution of a smuggler, when six people were killed and eleven severely wounded; but Queen Caroline (then regent) granted him a reprieve, which, as soou
as it became publicly known, produced the result above narrated. In 1745 the city was taken possession of by the rebels ander Prince Charles Edward Stuart. The only other event in the history of Edinburgh sufficiently momentous to be noted here took place May 18, 1843, when the Assembly of the Established church of Scotland, then holding its annual meeting in St. Andrew's chureh, was severed in two by the secession of 203 of its members, who, retiring to Tanfield hall, Canonmills, formed themselves, with the addition of other seceding ministers and elders, into the first General Assembly of the Free Church of Scotland. Edinburgh returns two members to Parliament. Registered clectors (1850), 5520. Pop. (1831), exclusive of the parishes of N. and S. Leith, 136,054; of parl. bor. (1841), 138,182; (1851), 158,015. -(Arnot's History of Edinburgh; Hetherington's History of the Church of Scotland; Buchanan's Ten Years' Conflict; Black's Edinburgh Guide; Private information, \&ec.)

EDISTO, a river, U. States, S. Carolina, has its sources in the N.W. part of the state, and falls into the Atlantic by two branches, called, respectively, N. and S. Edisto, the former 16 m. , the latter between 25 and $30 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Charleston. It is navigable for boats only. Entire course about 160 m .

EDITH-Weston, par. Eng. Rutland; 1810 ac. Pop. 343.
EDLASTON, par. Eng. Dcrby; 1560 ac. Pop. 214.
EDLINGHAM, par. Eng. Northumberland; 11,570 ac. Pop. 659.

EDLINGTON, two pars. Eng.:-1, Lincoln; 2900 ac. Pop. 254.-2, York (W. Riding); 1680 ac. Pop. 127.

EDLIPO, a picturesque tn., Asiatic Turkey, Syria, 32 m . S.W. Aleppo, on one of the rontes from that city to the S. It is of modern date. Pop. 2500.

EDMONDBYERS, par.Eng.Durham; 15,260ac. P. 1025.
EDMONDTHORPE, par. Eng. Lcicester; 2100 ac. Pop. 261.

EDMONSHAM, par. Eng. Dorset; 2720 ac. Pop. 298.
EDMONSTONE, an isl. Hindoostan, Bay of Bengal, at the mouth of the Hoogly; lat. $21^{\circ} 32^{\prime} \mathrm{N} . ;$ lon. $88^{\circ} 20^{\prime}$ E.; from a mere half tide sandbank, this alluvial phenomenon rapidly became an island of 2 m . in length, and $\frac{1}{2} \mathrm{~m}$. in breadth, covered with shrubs, and affording a supply of fresh water, in 1817, when a tripod was erceted on it as a sea-mark for ships; and it was adopted as a marine station in 1820. But it has been as rapidly demolished as it was formed, by the encroachments of the sca, being now without a particle of vegetation, and nearly covered by the sea at high tides.

EDMONTON, a vil. and par. England, co. Middlesex. The village, $7 \frac{1}{2} \mathrm{~m}$. N. London, consists of several ranges of good houses, the two principal of which extend for upwards of 1 m . along the road. An extensive trade in timber is carried on here, by means of the Lea river navigation. The 'Bell at Edmonton' has become famous by association with the adventures of John Gilpin. Charles Lamb died at Edmonton, on December 27, 1837, in his 60th year. Area of par. 7488 ac. Pop. 9027.

EDMUND (St.), four pars. Eng.:-1, Norfolk. Pop. 727.-2, Wilts. Pop. 4461.-3, Devon. Pop. 1595.-4, (King and Martyr, St.), Middlesex. Pop. 391.

EDMUND'S (Bury). See Bury St. Edmund's.
EDNAM, par. Scot. Roxburgh; $6 \frac{1}{2}$ sq. m. Pop. 615.
EDOLO, a tn. Austrian Italy, prov of, and 45 m . N.E. by E. Bergamo, at the confluence of the Oglio and Ojolo. The former crossed here by a foot bridge. It is well built, with wide and handsome streets; has a spacious church, with a lofty tower and cupola; a convent, a house of mercy or poors' hospital, an iron foundry; and a brisk trade in iron and cattle. Pop. 1525.

EDREI. See Draa.
EDRENS (St.), par. Wales, Pembroke. Pop. 124.
EDROM, par. Scot. Berwick; $7 \frac{1}{2} \mathrm{~m}$. by 4 m . Pop. 1415.
EDSTONE (Great), par. Eng. York (N. Riding); 1800 ac. Pop. 153.

EDVIN-Loaci, par. Eng. Worcester; 360 ac. Pop. 62.
EDVIN-Ralph-with-Butterley, par. Eng. Hereford; 1060 ac. Pop. 166.

EDWALTON, par. Eng. Notts; 830 ac. Pop. 117. EDWARD (St.), par. Eng. Cambridge. Pop. 619.
EDWARDSTONE, par. Eng. Suffolk; 1780 ac. P. 495. EDWINSTOWE, par. Eng. Notts; 17,270 ac. P. 2418. EDWORTH, par. Eng. Bedford; 1100 ac. Pop. 105. EDZELL, par. Scot. Forfar; 12 m. by $3 \mathrm{~m} . ~ P o p . ~ 1064$. EE, a vil. and four streams, Holland:-1, (Ee, or Ea), a vil. Friesland, 18 m . N.E. Leeuwarden; with a Calvinistic church, a school, and a corn-mill. Pop. (agricultural), 980.-2, Two streams, prov. Groningen.-3, Two streams, prov. Friesland, the smaller of which falls into the Zuider Zee; and the larger, forming several canals, more especially that between Leeuwarden and Dockum, flows N.E., and falls into the Lauwerzce under the name of Dockumer-Ee.

EECHAUK, a tn. Hindoostan, prov. Bahar, dist. Ramghur, 103 m. S.S.E. Patna; lat. $24^{\circ} 10^{\prime}$ N.; lon. $85^{\circ} 46^{\prime}$ E. It is the residence of the rajah of Ecchauk.

EECKEREN, a com. and vil., Belgium, prov. of, and $4 \mathrm{~m} . \mathrm{N}$. Antwerp. It is the seat of some linen-weaving, and other manufactures, including chicory, beer, and spirits; but the people are chiefly agricultural. Pop. 4540.

EECLOO, a tn. Belgium, prov. E. Flanders, 11 m . N.W. Ghent, near the Liève, a canalized stream. It is a clean place, well built, and the seat of manufactures of woollens, cottons, hats, tobacco, chocolate, soap, starch, \&c.; and has breweries, distilleries, vinegar-works, salt-refineries, dyeworks, and oil mills; and a busy trade in grain, linen, cattle, and timber. Pop. 9099.

EEDILABAD, or Idulabad, a small walled tn., Hindoostan, prov. Candeish, l. bank, Poorna; lat. $21^{\circ} 4^{\prime} \mathrm{N} . ;$ lon. $76^{\circ} 8^{\prime}$ E. ; contains now one inhabited strect only.

EELA, or Elie. Sce Idi.
EELDE, a vil. Holland, prov. Drenthe, 10 m. N. Assen, and conncted with Groningen by a canal, along which it sends grain, fruit, \&c., to the weekly market of that town. It is a pleasant village, is surrounded by a number of country seats, and has a Calvinistic chureh, and a school. Pop. 700.

EELS, a name applied to the wandering tribes of Persia. The men have well-made, powerful frames, piercing black eyes, noses generally inclined to aquiline, frequenily overhanging thick moustachios, which, united with black, bushy beards, almost entirely conceal their dark brown skins. Their appearance is altogether strongly characteristic of health, hardihood, and independence. Their dress consists of a coarse blue shirt and trowsers, with heavy cloaks of felt, thrown over the shoulders, the sleeves being left unoccupied; a conical cap of white or grey felt, with flaps for the ears, covers their heads; they usually carry one, and sometimes two guns, slung at the back, and a large knife or dagger at the girdle; a sword or a clubbed stick completes their equipment. The women, when young, are often handsome; their complexion is of a delicate nut brown hue, eyes dark and expressive, nose well formed; the mouth small, and adorned with beautiful teeth; expression of the countenance full of good humour, and the contour of their forms indicative of a beautiful and slender shape. All these attractions, however, soon disappear as they advance in life, their skins become parched and withered, and their complexion changes to a coarse sumburnt red. When aged, they become the most shrivelled and repulsive looking hags it is possible to imagine. -(Fraser's Khorasan.)

EEM, a river, Holland. It originates in numerous streamlets which rise in prov. Gelderland, flow W. by N. into prov. Utrecht, and unite near Amersfoort, whence the stream flows N.W. to its outlet in the Zuider Zee. It is navigable to Amersfoort.

EEMNES, two adjoining vils., Holland, prov. of, and abont 13 m . N. by E. Utrecht. They are called, respectively, Eemnes-Binnendijks and Eemnes-Buitendijks. They have two Calvinistic churches, and a R. Catholic church, and two schools. Pop. (agricultural), 1400.

EERSEL, or Eerzel, a vil. Holland, prov. N. Brabant, 8 m . S.W. Eindhoven, an old, and formerly a well-built, beautiful, and much larger place than now, but reduced by repeated calamitics. It has a church, townouse, and a school; and eight annual cattle fairs. Pop. 270.

EESAUGHUR, a strong fort, Hindoostan, prov. Malwa, 39 m . N.W. Chendarec ; lat. $24^{\circ} 50^{\prime} \mathrm{N}$. ; lon. $77^{\circ} 55^{\prime} \mathrm{E}$. It,
has a large pettah or suburb that extends round the $N$. and W. sides of the fort.

EESSAH SOMAULI, a numerous and powerful tribe, E. Africa, who inhabit a territory on the coast of the sea of Bab-el-Mandeb, between lat. $11^{\circ}$ and $11^{\circ} 30^{\prime} \mathrm{N}$. They lead a wandering life, roving from place to place, wherever they can find pasturage for their flocks and herds. Few of them wear any clothing, excepting a leather apron. They are armed with spear, shield, bows, and arrows; and are said to be very expert in the use of the latter. The arrows are poisoned, and with them they kill the ostrich, zebra, and all kinds of animals. They are very partial to red hair, dyeing it of that colour, and are very particular in dressing it. Those who are not favoured by nature with good heads of hair, make wigs of sheep-skin, dyeing them their favourite colour. They are held in great dread by their neighbours, the Danakils, who describe them as treacherous, thieves, and murderers. Lieutenant Barker formed a different opinion of them; saying that, so far as his experience went, he found them a timid and inoffensive race.

EFBE, an isl. Indian Archipelago, near S. coast, Mysole; lat. $2^{\circ} 12^{\prime} \mathrm{S}$. ; lon. $130^{\circ}$ E., about 5 or 6 m . in length. Birds of paradise migrate hither during certain seasons, and are caught by the natives, who dry them in their feathers and send them to Europe. There are two small villages on the island.

EFENECITTYD, par. Wales, Denbiglı. Pop. 234.
EFFAT, a prov., Abyssinia. See Shon.
EFFERDING, a tn. Upper Austria, near 1 . bank, Danube, 107 m . W. Vienna. It is surrounded by walls, with four gates ; and is, on the whole, well built. It contains a handsome square, a castle, two churches-a Protestant and a R. Catholic, the latter a Gothic parish church, with a number of fine monuments; a townhouse, and hospital. The Danube, which, about a century ago, bathed the walls, is now at some distance from them. Pop. 1300.

EFFIN, par. Irel. Limerick; 5268 ac. Pop. 2060.
EFFINGHAM, a par. and vil. England, co Surrey; 2940 ac ; the latter is $20 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. London. Pop. 581.

EGBELL, a market tn. Hungary, IIther Danube, co. of, and 53 m . N.W. Neutra, r. bank, Sirkovi, not far above its junction with the Mareh. It contains a parish chureh, and carries on a considerable trade in hemp, which it sends chiefly to Moravia and Austria. In the neighbourhood there is a sulphureous spring. Pop. 2860.

EGDEAN, par. Eng. Sussex ; 620 ac. Pop. 121.
EGEDESMINDE, a Danish missionary station and colony, Greenland, N. inspectorate, about $4 \overline{5} \mathrm{~m}$. S. Disco island. It was founded in 1759 ; and is chiefly useful to the Danes, for scaling, eider-down gathering, \&c. It faces the archipelago of islets called Egedesminde; which, as well as the colony, is named after Hans Egede, a Danish missionary to these parts in 1741 .

EGELN, a tn. Prussia, gov. of, and 17 m . S.W. Magde burg. It consists of the town proper, surrounded by old walls, and of a suburb; is poorly built; is the seat of a law court and several public offices; contains three parish churches and four schools : and has manufactures of furs, several distilleries, numerous mills, and three annual fairs. Pop. 2888.

EGELSHOFEN, or EgOLShofen, a vil. and par. Switzerland, can. Thurgau, in a bcautiful district surrounded by vineyards, 3 m . W. Constance. It is well-built, and contains a parish church and two schools. Pop. 1386.

EGENBURG, or Eggenaurg, a tn. Lower Austria, in a valley, at the W. foot of the Mannhartsberg, 38 m . N.W. Vienna. It is surrounded by old walls; contains a liandsome parish chureh, of ancient date, and an hospital ; and has manufactures of woollen and linen eloth. Fine amethysts are often found in the vicinity; and the whole district is rich in monuments of the Middle Ages. Pop. 1262.

EGENHAUSEN, a vil. Würtemberg, circle Schwarzwald, bail. of and 5 m . W. Nagold. 1t has manufactures of rosin and turpentine. Pop. 1059.

EGER, or Cueb [Latin, Egra], a tn. Bohemia, circle, Elnbogen, on a rocky eminence, above r. bank streain of same name, 91 m . W. Prague. It was once an important border fortress ; but only parts of its walls now remain in a very dilapidated state, and its fosses are almost filled with rubbish. It contains several churches, one of them an old Vol. I.
deanery church, very handsome; an old burg or citadel, on an overhanging height, once the frequent residence of kings and emperors, now dismantled, but still interesting in its ruins; an ancient town-house, containing a library, and a painting of the death of Wallenstein, who was assassinated in the house of the burgomaster, which still stands at the E. end of the market-place; a gymnasium, high school, military school, barracks, two hospitals, and several charitable endowments. The manufactures consist of linen and woollen cloth, chintz, and calico; and there is a bleachfield, a powder, a polishing, and several other mills. An avenne, 3 m . long, conducts from Eger to Franzensbrunnen, a celebrated water-ing-place. Pop. 10,500.

EGER [Latin, Egra and Agara; Bohemiau, Cheb], a river, Germany. It rises in the Fichtelberg, in the N.E. of Bavaria, about 16 m. N.E. Baireuth, flows E. into Bohemia, and passing the towns of Eger, Elnbogen, Saaz, and Laun, falls into the Elbe, at Theresienstadt, after a course of 124 m . It has high banks, a stony bed, and a rapid descent.

EGERDIR, a small tn., or vil. and lake, Asiatic Turkey, pash. Anadolia. The town is picturesquely situated on the margin of the lake, on the W. side of its S.E. extremity, in lat. $37^{\circ} 42^{\prime} \mathrm{N}$.; lon. $31^{\circ} 18^{\prime} \mathrm{E}$. It consists of 500 or 600 houses, all Turkish; streets narrow, and extremely filthy. The lake is about 20 m . long, and 5 m . broad. It is a beau tiful sheet of water, surrounded on all sides by lofty mountains, wooded in places to the water's edge. In others, rich and luxuriant vineyards and orchards cover the sloping plains which extend between the mountains and the lake. There are two beautiful islands in the lake, nearly opposite the village, covercd with woods, and inhabited chicfly by Greeks, the neat red roofs of whose houses are seen peeping out from anongst the luxuriant foliage of the trees.

EGERI, or ÆGER1, a lake, Switzerland, in the S.E. of can. Zug, 4 m. long, N.W. to S.E., and near its centre about 2 m . broad. It is surrounded by momatains, particularly on the W., by the Rossberg and Kaiserstock, and on the N. by the Gabel; and though romantically situated, has a very lonely appearance. It is abont 140 ft . deep, and is well supplied with fish. On its S.E. shore stands the village of Morgarten, famous in the history of the Swiss struggle for independence.

EGERÖE, an isl., S.W. coast, Norway, bail. of, and 40 m. S.S.E. Stavanger. It is of very irregular form, somewhat resembling a horse shoe, and is separated from the coast by a narrow channel. Its greatest length is about 6 m ., and its breadth scarcely averages 1 m. ; lat. $58^{\circ} 26^{\prime} \mathrm{N} . ;$ lon. $5^{\circ} 50^{\prime} \mathrm{E}$.

EGERSUND, a seaport and fishing tn., Norway, bail. Stavanger, on the Eger Sound, a strait, between the isle of Egeröe and the mainland; lat. $58^{\circ} 26^{\prime} 10^{\prime \prime} \mathrm{N}$. ; lon. $5^{\circ} 57^{\prime} 8^{\prime \prime}$ E. (L.) It has a good harbour, and some trade, especially in herrings. In 1841, 44 vessels, tonn. 2940, entered; and 68, tonn. 3977 , cleared ; of which 13, in both cases, were British. Pop. 1262.

EGERSZEG-ZALA, a market tn. Hungary, Thither Danube, co. Zalad, r. bank, Zala, 54 m. W.S.W. Veszprim; with a parish church, and a house in which the county meetings are held. Pop. 3116.

EGERTON, par. Eng. Kent; 2750 ac. Pop. 880.
EGG, a vil. and par. Switzerland, can. of, and 9 m . S.E. Zürich, in a fertile grain and fruit district, 2380 ft . above sea-levcl. Some cotton manufactures are carried on. Pop. 2763.

EGG, two harbours and an isl., U. States, New Jersey. Great Egg harbour is in lat. $39^{\circ} 22^{\prime} \mathrm{N} . ;$ lon. $74^{\circ} 30^{\prime} \mathrm{W}$., and receives a river of the same name, which is navigable for large vessels 20 m .-Little Egg harbour is 17 m . N. E. from the former. - Egg island, in Delaware Bay, has on it a fixed light, 42 ft . high ; lat. $39^{\circ} 10^{\prime} 24^{\prime \prime} \mathrm{N}$. ; lon. $75^{\circ} 9^{\prime} \mathrm{W}$. (r.)

EGG-Buckland, par. Eng. Devon; 3800 ac. Pop. 1296.
EGGA, a large tn. of W. Africa, Guinea, Yarriba country, r. bank, Niger, a little below the junction of the Coodoonia; lat. $8^{\circ} 43^{\prime} \mathrm{N} . ;$ lon. $6^{\circ} 10^{\prime} \mathrm{E}$. It is about 4 m . in length and 2 m . in breadtl; the houses are of a conical form, and so closely packed together that in some places there is not room for two persons to walk abreast in the streets. The walls of the huts are of clay, some of them beautifully smooth, and stained with indigo; they are without windows, and have rarely more than one door. Large quantities of a narrow cloth, not exceeding three inches in breadth, are manufactured

## EGGARAH

## EGYPT

here; there having been no fewer than 200 looms in operation in the town when visited by Captain Allen in 1841. This cloth is generally dyed blue. The people are speculative, enterprising, and keen traders; numbers of them employ all their time in trading up and down the river, and live entircly in their canoes, which are generally protected by a shed. The market days at Egga present a singularly lively and animated scene. All are anxious to sell their wares, and are constantly making the most eager, earnest, and often noisy efforts to accomplish this desirable end. Women are the chief, if not the only traders here; most of them are of graceful and prepossessing exterior, and all practise similar enticements in their dealings with those put in requisition with the marketwomen of civilized countries. The articles exposed to sale consist chiefly of beautifully-wrought and carved calabashes, silk and natron from Bornou, country cloth, network, Guinea corn, yams, Indian corn, sweet potatoes, dried fish, a few European articles, beads, and gunpowder. The people dress neatly ; and one-half are Mahometans, the other Pagans.(Allen's Expedition to the Niger ; Lander's Records.)

EGGARAH, W. Africa. See Iddah.
EGGEBEE, a tn., W. Africa, Zeg-Zeg, 80 m. S. by W. Kano; lat. $10^{\circ} 52^{\prime}$ N. ; lon. $9^{\circ} 6^{\prime}$ E.; delightfully situated in the midst of a beautiful and highly-cultivated plain. It is neat and scrupulously clean; and its inhabitants have at least the appearance of prosperity and happiness. It is surrounded by a wall in the form of a square, measuring 1 m . each side. Pop., abo:̈i 14,000.-(Lander's Records.)

EGGENBERG, Eckenberg, or Eggenburg, a vil. and lordship, Austria, Styria, circle of, and abont 2 m . from Grätz. It has a castle, a simple but majestic structure, which contains a good collection of paintings, and is surrounded by fine gardens, much resorted to on holidays by the citizens of Grätz, with which it is connected by a long avenue. Pop. of lordship, 3516 .

EGGENFELDEN, a market tn. Upper Bavaria, l. bank, Rott, 34 m . W.S.W. Passau. It is the seat of a court of law, contains four churches, a chapel, Franciscan hospitium and hospital, and has manufactures of cloth, and a trade in cattle. Pop. 1484.

EGGENSTEIN, a vil. Baden, circle, Middle Rhine, bail. of, and near Carlsruhe. It contains a parish church, and has an extensive manufactory of printers' ink. Pop. 1179.

EGGESFORD, par. Eng. Devon; 2500 ac. Pop. 168.
EGGINGTON, par. Eng. Derby; 2030 ac. Pop. 374.
EGHAM, a par. and vil. England, co. Surrey. The vilLage, 20 m . W. by S. London, near r . bank, Thames, is large and thriving, and is connected with the market town of Staines, on the opposite bank of the river, by an iron bridge It has almshouses, a charity school, and other charities, and a national and infants' schools. Runnymede, famous in English history as the scene of the conference, in 1215, between King John and his barons, which led to the signing of Magna Charta, lies between the village and the Thames. Races are annually run on this ground. Area of par., 7440 ac. Pop. (1841), 4448 , of which about half reside in the village.

EGINA, an isl. Greece. Sec Æaina.
EGLETON, par. Eng. Rutland; 1450 ac. Pop. 138.
EGLINGHAM, par. Eng. Northum.; 17,650 ac. P. 1832.
EGLISAU, a tn . and par. Switzerland, can. of, and 14 m . N. Zürich, r. bank, Rline, here crossed by a handsome wooden bridge. It stands in a narrow valley, along which the river winds between steep and finely-wooded banks, is well built, contains a parish church, with some interesting monuments, and a large and ancient townhouse, and has some shipping; a considerable transit trade, partıcularly in corn. At the extremity of the bridge, on the l. bank, stands the ruins of the old castle of Eglisau, with a lofty and massive square tower. Pop. 1108.

EGLISH, two pars. Ireland.-1, King's co.; 14,800 ac. Pop. 3494.-2, Armagh ; 10,575 ac. Pop. 5601.

EGLOSHAYLE, par. Eng. Cornwall; 6170 ac. P. 1357.
EGLOSKERRY, par. Eng. Cornwall; 3060 ac. P. 552.
EGLWYS, five pars. Wales:-1, (Brewis), Glamorgan; 367 ac. Pop. 24.-2, (Cymin), Carmarthen. Pop. 349.-3, (Fach), Carnarvon ; 7 m . by 4 m . Pop. 1632.-4, (Ilan), Glamorgan; 13,619 ac. Pop. 3813.-5, (Rhos), Carnarvon. Pop. 630.

EGLWYSURW, par. Wales, Pembroke. Pop. 560.

EGMANTON, par. Eng. Notts ; 2220 ac. Pop. 391.
EGMERE, par. Eng. Norfolk; 1440 ac. Pop. 54.
EGMOND, three vils. IIolland, prov. N. Holland:-1, (-aan-Zee), on the sea-coast, 5 m . W. Alkmaar; with a townhouse, two churches, a school, and a light. Pop., chiefly fishermen, 1370.-2, (-Binnen), 5 m. S.W. Alkmaar, with church and school, and inhabitants mostly engaged in agriculture, cattle-rearing, and fishing. Pop. 310.-3, (-op-den$H o f), 4 \mathrm{~m}$. W. Alkmaar, with church and school. Inhabitants, agriculturists and fishers. Pop. 520.

EGMON'T, or Six Islands, Indian Ocean, Chagos Archipelago. The largest is in lat. $6^{\circ} 40^{\prime} \mathrm{S}$. ; lon. $71^{\circ} 26^{\prime} 30^{\prime \prime} \mathrm{E}$. From this, five other islands lie on the circular edge of a coral reef, extending to the N.W. by W., 5 m . ; the N. islands have conspicuous trecs on them. The whole group produce 6000 gallons of cocoa-nut oil yearly ; pigs and poultry in abundance; also pigeons, and the fat-tail land crabs, which are numerous. Fresh water is also easily procured.

EGMONT, an isl., S. Pacific, Low Archipelago; lat. (S.W. point), $19^{\circ} 24^{\prime} \mathrm{S}$. ; lon. $139^{\circ} 14^{\prime} \mathrm{W}$. (R.) It is of coral formation, steep, and well-wooded with cocoa-nut and pandanus trees. The natives go armed, but are friendly, and disposed to barter, particularly for iron.

EGNACH, a vil. and par. Switzerland, can. Thurgau, in a district almost covered with orchards, 12 m . S.E. Constance. It is a large, straggling place, contains a new parish church and parsonage, and has a trade in fruit. Pop. 3276.

EGREMON'T, a par. and market tı. England, co. Cumberland; area, 2850 ac. The town, $38 \frac{1}{2} \mathrm{~m}$. S.E. by S. Carlisle, within 2 m . of the Irish Sea, has an ancient parish church and a Wesleyan chapel. Tanning is carried on to some extent, and checks, sailcloth, linen, and paper are manufactured. Weekly market, Saturday; several fairs annually. Pop. 1750.

EGREMONT, par. Wales, Carmarthen; $2 \frac{1}{2} \mathrm{~m}$. by 2 m . Pop. 140.

EGRES, or Egris, a vil. Hungary, Banat, co. Torontal, on the Maros, about 15 m . from Komlos. It contains a Greek non-united parish church. Pop. 2840.

EGTON, par. Eng. York (N. Riding); 13,570 ac. P. 1128.
EGUISHEIM, Exen, or Exuein, a tu. France, dep. Maut-Rhin, near l. bank, Lauch, 4 m . S.W. Colmar. It owes its origin to a strong castle, supposed to have been erected in the eighth century, of which a nassive hexagonal tower, about 130 ft . high, still exists. Good white wine is grown in the vicinity. Pop. 2149.

EGYEK, a vil. Hungary, Thither Theiss, co. Szaboles, on the Theiss, about 15 m . from Nadudvar. It contains a Protestant and a R. Catholic church. Most of the inhabitants are Protestants. Pop. 2570.

EGYP' [Greek, A九quzros: Latin, Dgyptus; French, Egypte ; German, Egypten; Italian, Egitto; Arabic, Missr; Turkish, $K i b t$ ], a country remarkable alike for its physical peculiarities, and for its place in history, and which still retains, in its wonderful monuments, the earliest records of civilization, extends along the Nile at the N.E. angle of Africa, and embraces properly the lowest and most N. division of the valley of that river, from the last cataracts to the sea. In lat. $24^{\circ} 3^{\prime} 45^{\prime \prime} \mathrm{N}$. the Nile, issuing from the rocky glen of Lower Nubia, sweeps in a smooth but rapid stream round the little island which was called by the Greeks Philæ, by the Arabs Bilak (both names being corruptions of the Coptic pi-lakh, that is, the limit), and then immediately hurries down the cataracts, or rather rapids, of Assouan (Syene), and by the island of Elephantine, about 2 m . below Philæ. Here the obstructions to the navigation of the Nile are at an end, and the river extends in a general course, N. by W., to lat. $31^{\circ} 35^{\prime}$ N., where, in the neighbourhood of Damietta, the principal branch falls into the Mediterrancan Sea. The length of Egypt, measured on the meridian, is but 450 geo. m.; but along the winding valley of the river, which is truly the habitable country, it has an extent of above 600 m . of these, or about 720 statute miles. The average width of the valley of the Nile may be assumed to be 8 m .; the greatest width of the delta, from Alexandria on the W., to the ruins of Pelusium on the E., is about 160 m . The whole area, comprised in the valley and delta, may be taken at 11,000 sq. m.

Name.-Egypt is now called by the natives, and throughout the East generally, Misr or Masr, a name evidently connected with the Mitsraim of Scripture ; and this name being in the

## EGYPT

dual number, seems to refer to the division of the country into Upper and Lower Egypt, which were always considered, under the native dynasties, as distinet kingdoms, symbolized by different crowns. The ancient Egyptian name of the country, Khemi (whence Cham or Ham), signified black, and was probably suggested by the dark colour of the sedimentary soil. As to the origin of the name Egypt (Egyptus), no one has yet been able to offer a plausible explanation of it. The attempts to derive the word from Greek roots are merely puerile, and Bruce's assertion, that $y$-gypt signifies in Ethiopic the land of canals, requires confirmation. Besides, the Ethiopic (or Geez) language is apparently too modern a source to allow us to hope that it could furnish any elucidation of Egyptian archæology.

Description.-The island of Philx, at the S. extremity of Fgypt, has been compared by Arab writers to an emerald set in gold; and this allusion to the luxuriant vegetation of the island, compared to the glowing naked surface of the surrounding desert, is equally applicable to the valley lower down. The Nile, in the valley of Egypt, is everywhere an agreeable object; not so much owing to the majesty of the stream, or the variety of its scenery, as to the strong contrast between the freshness, verdure, and animation of the river's banks, and the desolation which reigns beyond them. The scenery of the river is, in the S. part of Upper Egypt, wild and romantic ; but as we descend, it grows continually more tame and monotonous. till at length every lively and picturesque feature is lost in the uniform level of the delta.
Divisions.-As Egypt embraces two widely different regions, namely, the broad plains of the delta, and the comparatively narrow valiey of the river higher up, so it naturally falls into two parts or divisions, namely, Upper and Lower Egypt. These were anciently regarded as separate kingdoms, denoted in hieroglyphics by different crowns or royal tiaras. Whenever they were united under the same rule, the Pharaoh bore the title of 'The Lord of the two worlds.' But the lower part of the valley, which includes the Fayoum, and the plains watered by the Balır lusef, differs widely again from the narrower portion higher up; hence the division into Upper, Middle, and Lower Egypt; or, to use the Arab names, Saïd or Marés (in Coptic, the South), Wustani, and Er-Rïf. The whole country appears to have been subdivided from the earliest ages into districts, or, as the Greeks termed them, Nomes, to the number of 36 , to which may be added, however, eight more, of later date probably, embracing the territory adjacent to the Delta, but beyond its proper limits. Upper Egypt, or the Saild, was often named by classic writers the Thebais; and Middle Egypt, divided into seven Nomes, the IHeptanomis. These ancient territorial divisions, being founded on nature, have never fallen wholly into disuse, though disguised under new names. Yet the late Viceroy, Mahommed Ali, effected a great ehange by grouping and suhdivision. He divided the whole conntry into seven Múderlyks or provinces, superintended by a Múdyr; each Míderlyk being subdivided into departments, and these again into cantons; each having its proper and responsible chief.

Mountains.-The valley of the Nile, throughout its whole extent, from Philæ to the vicinity of Cairo, is hemmed in on both sides by continuous chains of hills; those on the E. side approach more closely to the river, while the Libyan hills on the $W$. rise with a gradual ascent, and sometimes recede to a distance of 10 or 15 m . Hence they appear less clevated than the E. hills, which vary in height from 400 to 800 ft . Towards the delta these chains of hills diverge; that on the E. side turning E. by Jebel Mokattem (that is, the hewn; so called probably from its quarries), near Cairo, and sinking gradually till it disappears in the isthmus of Suez; while the Libyan chain skirts to the N.W. the plains of the Natron lakes. The desert between the Nile and the Red Sca is intersected by several chains of mountains, which increase in elevation towarls the E., so that the ridges nearest to the Red Sea attain a height perhaps exceeding 6000 ft .; W. of the Nile, on the other hand, the land evidently sinks, so that the Libyan chain separates the river from a wide valley, which is supposed to be not above the level of the sea, and may probably have receivel the waters of the Nile, and condueted them to the sea in early times, while the rocky channel through lower Nubia was as yet but imperfectly opened. The appearance and physical character of this region is well described by the
name 'Bahr bela ma,'or 'river without water,' now bestowed on a portion of it.

Valleys and Roads.-The openings or lateral valleys of the hills confining the valley of the Nile are comparatively few, or, being little frequented, remain unknown. Those on the E. side, with which we are best acquainted, are, the Valley of the Wanderings (of the children of Isracl), leading from the neighbourhood of Cairo to the head of the Gulf of Suez, and that through which passes the road from Koptos to Kosscir on the Red Sea. In early ages, when the commerce of the Red Sea was far more important than it is at present, the roads from the Nile through the E. desert were numerous and frequented; and there still remains indubitable evidence, chiefly in the ruins of guard-houses and of solidly-constructed wells, of the industry which once animated these inhospitable wastes. W. of the Nile, in lat. $29^{\circ} 20^{\prime}$ N., a deep sinuosity in the Libyan chain of hills forms the fertile valley of Fayoum (in Coptic, Ph-iom, the sea or lake), in the N.W. and lowest part of which is the lake named Birket-el Kerun, the level of which is perhaps not above that of the river. The E. part of the Fayoum was anciently the site of the celebrated lake Moeris, the embankments enclosing which were first recognized and traced, in 1842, by M. Linant de Bellefonds. From this valley a road lead3 W., through the hills, to the oasis of Dakhileh. The roads from Jirjeh or Girgeh and Esné to the great oasis are much frequented; and several other openings of less note offer communications with the fertile spots which eharacterize the depressed region W. of the river.

Oascs.-The oases above alluded to extend, in a narrow line, along the hollow region of the Libyan desert, parallel to the general direction of the valley of the Nile, and above 80 m . W. of it The Great Oasis, called, from its chief town, El Walı el Khárijeh, lies immediately W. of the Thebaid, and has a length of 100 m ., from lat. $24^{\circ} 15^{\prime}$ to $25^{\circ} 42^{\prime} \mathrm{N}$. About 50 m . W. of the N. extremity of this oasis, lies the Wah el Dakhileh, 24 m . long and 10 m . broad. In the parallel of Jirjel. and W. by S. from the Fayoum, the date groves of the Little Oasis (Oasis parva), or Wah-el-Baharich, display their unusual verdure. In this fertile spot artesian wells are numerous, and some of ancient construction have been recently discovered, which have a depth exceeding 400 ft . On the road between this oasis and that of E1 Dakhileh, inclining to the W., occurs half-way the Wah-el-Feráfrel, of small extent. W. of Fayoum, and about 200 m . from the Nilc, lies the oasis of Siwah, where the foundations of the once-celebrated temple of Jupiter Ammon may still be traced. The inhabitants of this secluded spot, though tributary to Egypt, are in language and manners wholly Libyan. The region of the oascs terminates towards the N . in the desert of the Natron lakes, which the Copts called Scete, and where, in the midst of the dreary wilderness, prison-like monasteries offered a congenial home to gloomy and ascetic tempers. The deserts on the W. bank of the Nile generally present to view uniform plains of gravel or of fine drifting sand; on the E. the scene is varied by rocks and mountains, but the aridity is extreme, and the heat, reverberated from surrounding eliffs, is often insupportable.

Rivers.-The only river of Egypt is the Nile, whieh receives no accession from tributary streams (oceasional torrents from extraordinary rains excepted) in the last 1500 m . of its course. At Philx it enters Egypt with a breadth of 3000 ft ., and though often contracted lower down to 2000 ft ., its average width throughout may be taken at half a mile, and therefore, with the canals depending on it, bears a considerable proportion to the whole area of the habitable valley. Of the canals alluded to, one of the most remarkable is that commonly called the Bahr Yusef, or Joseph's river or canal, which, leaving the Nile at Deirut (lat. $26^{\circ} 15^{\prime}$ ), runs along the foot of the Libyan hills, which it enters at the opening of el-Lahím; and, having watered the valley of Fayoum, it again issues from the Lihyan chain and joins the Nile. The Bahr Yusef has a length of 140 m ., and the level plain, often 10 or 12 m . wide, included between it and the Nile, forms, with the valley of Fayoum, the most fertile part of Egypt. Popular belief ascribes the construction of this water-course to Joseph, but competent observers pronounce it to be an ancient branch of the river, flowing between banks for the most part of natural origin. It has a gencral breadth of 300 ft ., and winds like the Nile. The apex of the Delta was, in the time of Herodotus, at Cercasorus, 10 m . below Memphis; it is now about

6 m . still lower down, at Batn-el-Bakara. The river, at the early period referred to, separated at once into three branches, the Canopic going N.W., the Pelusiac, N.E., and the Sebennytic branch proceeding directly $N$. to the sea. But the latter threw off also two other branches, namely, the Saitic, W., and the Mendesian, E. Near the former of these flowed the Bolbitine, and, at some distance to the E., the Bucolic branches, both artificial. These were the seven mouths of the Nile as described by Herodotus (from whom later writers differ in many particulars); and it is remarkable that, at the present day, only two of them continue to flow in uninterrupted navigable channels to the sea, and those are the Bolbitine and Bucolic (the artificial) arms, now named respectively, from the towns at their mouths, the Rosetta (Rashíd) and Damietta (Dimyet) branches. The artificial branches probably owed their superior permanence to the circumstance of their being cut in a straight line, so that their banks were not liable to be impinged on by the current. The other ancient arms of the river may still be traced, more or less satisfactorily, among the numerous canals which intersect the Delta, and terminate, for the most part, in the lakes bordering the sea-coast. Among the ancient canals of Lower Egypt, there was one which merits especial notice, namely, that which, starting from the Nile a little below the modern Cairo, ran N.E. and E. into the desert, and then turning S., through the marshy district of the Bitter lakes, terminated at Arsinoe, at the head of the Gulf of Suez, thus uniting the Nile and the Red Sea. Pharaoh Necho was the first who ventured on this great undertaking; he failed, however, and Darius, of the Persian dynasty, had no better success. At length Ptolemy Philadelphus overcame the numerous bindrances opposed by nature to the completion of the work; yet, in a few years, this canal, apparently so advantageous, became choked up and useless, and was restored by Trajan, to fall again to ruin. Some traces of it remain at the present day, but for the most part it is wholly obliterated. One of the greatest works carried on in Egypt in modern times, is that projected by Mahommed Ali for the damming up or barrage of the Nile below Cairo, and for the establishment of canals above the barrage which should carry the water of the stream over the surface of Lower Egypt. The barrage is established at the point of the Delta where the Nile bi-forks into two great branches, which flow, one to Rosetta, the other to Damietta. It is 118 m . from Alexandria, and 99 m . from Rosetta; 12 m . below Cairo, in view of the great pyramids of Gizeh. The works comprehend-1. A sluice bridge on each of the two branches of the river, with a levelling quay, to fix the points of the Delta. 2. Three great canals, one ent on the right bauk of the Damietta branch in the direction of Mansquarah, another running along the left branch of the Rosetta branch in the direction of Alexandria, the third placed in the axis of the Delta. The canal directed towards Alexandria is to be 197 ft . wide-the two others, 328 ft . each. The barrage has a length of 1765 ft . between the extreme abutments on the Damietta branch, and of 1535 ft . on the Rosetta branch, making a length altogether of 3300 ft . The quay wall constructed at the point of the Delta is 5291 ft . in length. The barrage is expected to be finished in the course of 1852 .

Lakes.-The first place among the lakes of Egypt has been hitherto usually assigned to the Birket-el-Kerun, lying N.W. of el-Fayoum, owing probably to the celebrity which attached to it from the supposition that it was a remnant of the ancient lake Moeris. It has a length of about 34 m ., and a general breadth of 6 m .; its direction being from W. by S. to E. by N. On its shores stands a castle, the projecting spouts of which have procured for it the appellation of Kasr-el-Kerún, (Horn Castle), whence the lake takes it name. It abounds with fish, and like Lake Moeris of old, is farmed ont to fishermen, to the great profit of the Government. There can be no doubt that this lake is of natural origin, but it probably owes a great increase of size to the causes which led to the disappearance of Lake Moeris. So long as the great reservoir, on the higher level of the valley, was maintained in good condition, its embankments inust have cut off supplies from the natural lake below. At present the Nile, in cases of high flood, makes its way to the Birket-el-Kerún, which then rises 4 or 5 ft .

About 50 m . N. of the Birket-el Kerún, where the Libyan chain of hills, W. of the Nile, begins to sink in the desert, a
low tract, extending S.E. to N.W., exhibits in the rainy season a chain of pools, known as the Natron Lakes; from which, in the dry season, the water evaporates, leaving the ground thickly encrusted with natron (sesquicarbonate of soda), better known in commerce under the name of trona. The fertile land of the Delta is, for the most part, separated from the sea by a series of lakes, or rather vast lagoons, which are themselves fenced from the sea by very narrow necks of land. On the W. side of the Delta, and proceeding W. to E., these maritime lakes are, Mareotis, Madyeh or Abúkir, and Edkú or Etko. They all communicate with the sea by shallow openings. Between the Rosetta and Damietta arms of the Nile, Lake Bourlos occupies half of the coast, or above 30 m . ; while E. of the latter arm, Lake Menzaleh covers an extent of 500 sq. m.; while Lake Bardowal (Sirbonis) stretches 70 m . still further E. Altogether, the frontier covered by these lagoons has an extent little short of 200 m . They all abound in fish, but more particularly Lake Menzaleh, the shores of which are rendered hateful to strangers by the smell of fish and mud, by filth and pestilence. From the S.E. angle of Lake Menzaleh, a low tract, annually converted into a swamp during the inundation, winds S. by E. across the desert isthmus to Suez; in the S. part of this tract are the Bitter Lakes, which are very like the Natron Lakes on the W.

Geology, de.-The general rocks of Egypt are limestone, sandstone overlying the former, and granite, which breaks through and overspreads both. The granite region lies at the S. extremity of Egypt. In Lower Nubia, the summits of the granitic rocks rise 1000 ft . above the level of the river. This rude and wild scenery continues down to Assouan, where the cataracts are formed by the cliffs and broken masses of granite which lie in the bed of the river. Granite of many varieties may be found here; but the rock at Assouan or Syene is not the syenite of modern geologists. Blackened by the sun's rays, and often highly polished, these rocks have been frequently mistaken for basalt; and, indeed, it is not certain that truly volcanic rocks may not be found mingled with the granite. The cliffs near Assouan have supplied the materials for all the colossal and monolithic monnments of Egypt. From Assouan to Esné (lat. $25^{\circ} 19^{\prime}$ N.) extends the sandstone formation, which is very durable, and easily worked. The quarries at Jebel Silsilis (chain mountain), and a few other points in this region, furnished the materials for the superb structures of Thebes, and, indeed, for most of the temples of ancient Egypt. Below Esné the limestone predominates, though sandstone hills still occasionally interrupt the calcareous range. The limestone region is more tame and monotonous in outline than those of the sandstone and granite, and more frequently affects the form of table lands. Thus the pyramids of Gízeh, built altogether of limestone, stand on an elevated plain of the same material. The Egyptian limestone is generally grey, containing fish, shells, and corals; but in the E. desert, specimens have been found of handsome marble; and in the parallel of Minyeh, lat. $28^{\circ} 4^{\prime} \mathrm{N}$. , and about 100 m . E. of the Nile, were discovered, a few years ago, the splendid ruins of the ancient Alabastropolis, which once derived wealth from its quarries of alabaster. Farther $S$. in the desert, towards the limits of the granite, we come upon the ancient mines or quarries of jasper, porphyiy, and verd antique. The emerald mines of Zebarah lay near the Red Sea, in the parallel of Syene. To complete this brief geological sketch, it may be mentioned that in the calcareous region, dilnvial heaps of oyster and other shells frequently occur at considerable clevations, and that a few miles E. of Cairo, in the Jebel Mokattem, an extensive tract is strewed over with the silicified trunks of trees. This phenomenon of a petrified forest presents itself again in the desert of the Natron Lakes, W. of the Nile, and also far to the S. in Nubia.

Alluvium.-The alluvial soil of Egypt is a no less interesting object of study than the rocky fonndation on which it rests. The Nile, during the floods, deposits in the valley of Egypt the earthy particles with which it becomes loaded in the early and impetuous part of its coursc, and it is easy to recognize, in the dark brown mould of Egypt, the disintegrated trachytes of Abyssinia. Wherever the velocity of the stream is checked, the earthy sediment is deposited, and a thin, slimy film spreads over the ground. The accumulation of this fine sediment becomes very perceptible in the course of ages, the inundated land of Egypt, with the bed of the river, being gradually
raised by means of it. The increase of the soil is said to proceed, in Upper Egypt, at the rate of 4 or 5 inches in the eentury; in the Delta it goes on more slowly. The banks of the Nile, as they first check the current, reeeive the largest share of the deposited soil, and henee they are higher than the adjacent fields, which also generally decline a little from the river. The lower part of the nilometer at Elephantine, or standard for measuring the rise of the waters, deseribed by Strabo, still remains entire; but the highest graven line on it is now eovered to a height of 8 ft . by the flood. From the depth of the sedimentary soil eovering eauseways or heaped round monuments at Thebes, which doubtless stood originally above the reach of the inundation, it has been caleulated that the age of that eity must reach baek at least to the year 2960 b.c., a conelusion which ean be reconciled with the ehronology of Scripture only by adopting the Septuagint or Samaritan text in preference to the Hebrew. Thus it appears that the Greeks were, in some measure, justified in saying that Egypt is the gift of the Nile; but they alluded more particularly to the Delta, and yet it is evident that the Delta has advanced but partially, between the two main branehes, and only a distance of 3 or 4 m . within the period of history. Its coast on the W. side, including Alex andria, and as far E. as Abukir, is formed by a ledge of limestone, and eannot be supposed to have undergone any ehange. On the E. Tineh, one of the most ancient of Egyl ${ }^{\text {- }}$ tian eities, still oceupies the site of Pelusinm (the Sin of Ezekiel xxx. 15); and still on the sea-shore, it fully merits its ancient names, which all had but one meaning-mud. It is, however, conceivable that before the industry of man iusisted on controlling and regulating, by means of dykes and canals, the effects of the inundation of the Nile, the deposition of alluviun at its mouth gained rapidly on the sea.

Climate. - The elimate of Egypt is remarkable for its dryness and general unitormity. In no other country is one day so like another; winter on the banks of the Nile has no rigour, and the heat of summer is rarely oppressive. As the extension of the country, however, is chiefly from N. to S., there is a considerable difference between the mean temperatures of Upper and Lower Egypt; but peeuliar eireumstances, such as the vieinity of the sea, and the freshness of the N . wind, modify at the $N$. and $S$. extremities of the country, respectively, the cold of winter, and the burning heat of summer. In the Delta, the mean temperature of winter is about $54^{\circ}$ Fah.; that of summer, $82^{\circ}$; at Assouan, the thermometer often rises, in the latter season, to $96^{\circ}$. It is, however, eharacteristic of Egypt and the neighbouring deserts, that a great fall of temperature, from $14^{\circ}$ to $20^{\circ}$, takes place at night, owing, as it is usually explained, to the setting in of the N . wind at sunset, or rather perhaps attributabie to the general dryness and perfeet transparency of the atmosphere, which favour rapid evaporation, and the radiation of heat. This noeturnal cooling sometimes, though very rarely, sinks just before sunrise to congelation; and ice has been found on the Nile even at Syene. The hot S. wind or Khamsin (that is, 50 days' wind), sets in at the vernal equinox, and lasts, as the name implies, nearly two months; the thermometer sometimes rising during its continuance to $100^{\circ}$; E. winds prevail after the autumnal equinox; during the remainder, or about eight montlis of the year, the wind blows from the N . and neighbouring points. In the maritime parts of the Delta, smart falls of rain oceur 25 or 3 ) times between October and March; only half of this quantity falls at Cairo, and above the 26th parallel rain is hardty known; hail is very rare, and still more so snow, whieh fell, nevertheless, in 1833, in the Delta, to the great surprise of the people. There seems to be little reason for supposing that the climate of Egypt is insalu-
brious; although the habit of sleeping on the terraced roofs in the open air, regardless of the violent and sudden changes of nocturnal temperature, breeds much feverish disease; while the extraordinary, but unheeded, effulgence of the Egyptian sky, acting on eyes irritated by the fine sand which, as the native adage says, can make its way through an egg shell, gives rise to ophthalmia. As to the plague, it is doubtful whether it be generated in Egypt; but its rapid diffusion, as well as the prevalence of elephantiasis, and other apparently endemic diseases, may be naturally aseribed to the filthy habits and wretched condition of the people.

Seusons.-In Egypt, where there is in faet no winter, the distinetion of seasons depends immediately on the Nile, and with the state of the river, the aspect of the country undergoes the greatest changes. The seasons are there reduced to three-the inundation, spring, and harvest. At the beginuing of June, the hot winds being over, and most of the erops cut, the country begins to resemble the adjacent desert, and the parehed ground eraeks and opens in all directions, when, in the third week of the month, the river is observed to rise. The increase of the water beeomes in a short time regular, till it reaches its maximum, about the second week of Scptember. Its progress is watched witl mueh anxiety, for, should the tlood fall short of the expeeted measure, famine must ensue; but should it, on the other hand, exceed the ordinary limits, it may break down the embankments, sweep away villages, and carry desolation in its course. The Nile may rise at the present day 28 ft . without occasioning any damage. As the canals become filled, the water is allowed to run over the fields and gardens, the low dams which protect them being successively trodden down. This mode of proceeding is alluded to in that passage of Scripture (Deut. xi. 10), which describes Egypt as the country 'Where thou sowedst thy sced, and wateredst with thy foot.' Durirg this season, Egypt resembles a great sea, in whieh the towns, villages, and groves of trees, figure as so many islands. By the middle of November, the river las returned to its old bed, and, as the waters retire, the fields emerge from the inundation in a most unsightly guise, covered with blackish mud; but this state of things does not last long, the seed is quickly sown; the refreshed earth teems with life; and, in an ineredibly short time, the face of the country, lately so deformed, is clothed with the richest verdure. This spring time lasts till the Khamsín or hot winds, after which comes the harvest, and occupies the period that intervenes till the return of the inundation, or from April till June. And here it may be observed that even when the Nile is low, the work of irrigation may be carried on to some extent by means of the sakyah, which is a rudely constructed wheel, plaeed vertieally, and turned by oxen, buekets being fixed to its circumference, the lower part of which passes through the water; or whose eir-

cumference is divided by partitions into separate water compartments, with outlets at the side, as seen in the aceompany. ing figure. It is said that there are 50,000 sakyahs in Egypt, notwithstanding the tax injudiciously levied on them.

Agriculture. - As soon as the waters have retired, the Egyptians sow their wheat and barley, which are quite ripe in May in the Delta, where the produce of the field arrives at maturity generally a month later than in Upper Egypt. Durrah (Sorghum vulgare), the grain on which the natives chiefly subsist, and millet, are sown later, and gathered earlier. Of maize, two crops are often raised in the year. Rice, the sale of which is a monopoly of the Government, is a novelty to the Egyptian husbandman, and is grown chiefly in the low grounds near Rosetta and Damietta. Beans, lupins, lentils, and various kinds of pulse, with onions, bamich (IIybiscus esculentus), and mallow, are cultivated, and consumed in great quantities. The system of husbandry is probably the same now as it was 3000 years ago, wherever the Government has not interfered with it, by introducing new objects of culture. The Egyptian peasant is extremely tenacious of ancient usages; his plough at the present day exactly resembles that figured in the hieroglyphics; for a harrow, he uses a roller made of a piece of the trunk of a palm tree; and he allows no rest to the inundated land, but relieves it only by change of crops. The efforts of the Government, however, to increase the commercial resources of the country, have disturbed the traditional routine. The cultivation of cotton, begun in 1821, has now extended widely; indigo succeeds in the Fayoum and Upper Egypt. The growth of the sugar-cane is confined to the latter country; the manufacture of the sugar being carried on at Minyeh. For the sake of the silk manufacture, three millions of mulberry trees have been planted in Egypt; but the hot winds often prove fatal to the silk worms. The cultivation of the olive, also, is now encouraged; and attempts have been made even to naturalize the coffce plant, slove, and cimnamon.

Botany.-The wild plants of a country such as Egypt, are necessarily few; and these being natives of the desert, have no very interesting character. These desert plants are generally dicotyledonous ammuls, characterized by a hairy or thorny exterior, long roots, and leaves of pale green colour, and dry texture. The most common wild shrub is the Acacia seyal, which is almost leafless, and armed with long thorns; its crooked stem usually collects round it a heap of fine sand. The palm tree is rarely seen in a perfectly wild state; yet forests of the date palm, of great antiquity, exist on the E. borders of the Delta, and on the site of Memphis. This tree attains a lieight of 60 or 80 ft ., and is prolific only when attended to. The dates of inferior quality serve for distillation. The doum palm (Cucifera thebaica), singular in its bifureated forms, arrives at perfection in Upper Egypt, and yields a fruit of the size of an orange; but much less esteemed than the date. The syeamore is the largest and most umbrageous of Egyptian trees, often attaining a circumference of 20 or 30 ft ., but with moderate height; it bears a kind of fig on its trunk and larger branches. The oranges, figs, and tamarinds of Egypt are excellent: the European fruits grown there are of inferior quality. The chief timber trees are the acacia lebekh, the cypress, and the Aleppo pine. The sant or acacia nilotica, valuable for its hard wood, and producing gum arabic, increases in size as we ascend the Nile. The late Viceroy, Mahommed Ali, is said to have planted, chiefly in Lower Egypt. above $16,000,000$ of tree. of various kinds; and bis son, Ibrahim Pasha, planted more than $5,000,000$.

Zoology.-The list of the wild animals of Egypt is even still more scanty than that of its flora. The wolf, hyæna, and jackal, habitual inhabitants of the desert, occasionally visit the valley of the Nile; there the ichneumon or mangonste, which lives chiefly on eggs, and preys on those of the crocodile among others, is still numerons. The jerboa, or kangaroolike rat, burrows in the sands, and frequents, in great numbers, the plains of Gízeh, round the pyramids. The crocodile very rarely descends the Nile below Jirjeh, and the hippopotamus has long since retired to Upper Nubia, and never visits the waters of Egypt, except when foreibly borne down by the Hood, as happened in 1836, when one of these animals rose
into view before Damietta. A remarkable peculiarity of Egypt, handed down from ancient times, is the practice of hatching eggs by the artificial heat of ovens. The poultry reared in this way, are wholly without the instincts which relate to the care of offspring; the artificial method of hatching, therefore, when once resorted to, soon becomes necessary, and the natural system of incubation is totally superseded. It is said that 24 millions of eggs are submitted annually to the vivifying ovens in Egypt, of which number one-fifth fail. Wild swine are still numerous in the marshes and thickets bordering the Delta, but they are little molested by a Mahometan population.

Industry.-The branch of industry for which Egypt is peculiarly adapted by nature, is agriculture; yet in that country, where three successive crops may be gathered in the year, agriculture is still in a very low state; the necessary consequence of the wretehed condition and extreme poverty of those engaged in it. The Egyptian husbandman is ill supplied with the implements of agriculture; he has little stock; he knows nothing of the rotation of crops, or of the use of manure, and, being habitually oppressed, he cherishes no hope of personal advantage to be derived from the inprovement of his art. The Egyptians still adhere to their ancient custom of uniting the followers of each business or profession into a guild or corporation, governed by their chief or sheikh, who acts, if need be, as their representative. These guilds are exccedingly numerous, as might be expected, among a people whose social organization reaches to a remote antiquity. Of all these trades, however, very few can claim especial mention on the score of importance or singularity. Among these few, we must place the business of the malim-al-faríjy or egg-hatching establishments, above alluded to. A very steady heat (about $104^{\circ}$ ) is required for the success of this process; yet the keeper of the ovens never uses a thermometer, but is guided wholly by experience and practised sensation. The business of tanning, also, is one in which the Egyptians succeed perfectly, by a process peculiar to themselves. They make excellent morocco leather, which is goatskin dressed and dyed in a particular manner. The pottery of Egypt, also, deserves a word of praise, chiefly for the merit of the bardaks or water-jars. The best bardaks are those made at Keneh, which, besides being impregnated with a fine and lasting perfume, are, in various degrees and forms, permeable to water; so that while some serve as filters, others exude the purified fluid, and keep it cool by evaporation, which effect, in such a climate as Egypt, is a matter of great importance. These jars are transmitted to Cairo in a

PUTTERY FLO TT ON THE NILE.-From Hay's Sketenes of Cairo.
singular manner. They are tied together in large numbers, with their mouths downwards, and thus forming long rafts, are floated down the Nile. But what may be called the in. digenous industry of Egypt, though it could supply a long list of trades and occupations, is too rude and primitive to figure in commerce, or even to supply the wants of the country under the new system of things. The manufactures, on a large scale, in Egypt, which are carried on with skill and capital, and the aid of machinery, all owe their establishment to the late Malommed Ali, and are, in fact, the property of

## EGYPT

the Government. That energetic ruler had incautiously embraced the doctrine, that it is always more advantageous to produce than to purchase, and, consequently, he sought to supply all the wants of the country from within, imagining that every branch of industry which flourished elsewhere, would prove profitable in Egypt also. He established above 20 cotton mills, on a large scale, horses or oxen being employed as the moving power. His linen manufactories deliver annually $3,000,000$ pieces, and compete in Italy with those of Germany and England. The manufacture of silk, as well as the rearing of the silk-worm, received from him a powerful impulse. Then woollen cloth, hempen cordage, sugar, indigo, oil, gunpowder, and various chemical products. all engaged his attention ; and in every case he established manufactories, to be conducted on the public account. He even went so far as to establish an iron-foundry at Boulak, a suburb of Cairo, on the Nile. 'This experiment, made on a handsome scale, in a country not affording either iron-ore or fuel, and where machinery is soon destroyed by the fine sand, and the corrosion of the atmosphere (owing perhaps to the presence of carbonic acid), must necessarily have proved a serious loss. His establishments for the manufacture of fire-arms, and of military accoutrements in general, merit commentation on grounds of policy, if those of economy be insufficient. For exports and imports, see Alexambhia, the principal port.

Race.-Of the inhabitants of Egypt, the great majoritythose of the peasant class or Fellahs, as they are called-are undoubtedly indigenous, and may be regarded as descendants of the ancient Egyptians. These having embraced Mahommedism, are now generally denominated Arabs, though easily distinguished from the true Arab, who invariably regards the Fellah with contempt. The Copts are the Egyptians who still cling to the Christian faith; though comparatively few, they contrive to hold a respectable position in society, by means of their education and useful talents. They are thus widely separated by their faith and social lot from the Fellahs, though of kindred race with them. The Fellahs are generally peasants and labourers; the Copts fill the posts of clerks and

FEILAHS EMPLOYED in agriculture, EGYit. from Prisse's Oriental Album.
accountints. With these aboriginal Egyptians are mingled, in various proportions, Turks, Arabs (chicfly Bedouins), Armenians, Greeks, Berbers, Negroes, Jews, and Franks. The Turks form a privileged class, or kind of aristocracy, and hold the principal offices under Government. The Arab tribes considered as belonging to Egypt, and to whom lands have been assigned, are the Bedouins, who supply the country with camels, sheep, and, to some extent, with horses. Their haunts are on the borders of El-Fayoum; their numbers about 250,000. The Armenians are generally bankers or jewellers;
the Grecks are all merchants and traders. The Berbers, from Lower Nubia, below the second cat.sract, do all porters' work; while the Negroes are preferred as domestic servants. The whole population of Egypt has been estimated by the Govern-

fellah dressed in the hábá, and female wearing FACE-VELL, EGYY'T.-From Prisse's Oriental Album.
ment, from apparently ample data, at $3 \frac{1}{2}$ or nearly 4 mullions; but the Europeans, who have examined this question on tho spot, coneur in reducing the estimate to $2 \frac{1}{2}$ millions; the Fellahs being nearly $2,000,000$; the Copts 145,000 ; and tho ruling caste of Turks and Mamelukes (that is, slaves chiefly from Caucasus, taken young, and reared as Turks) not above 20,0ल0.

Government. - The Government of Egypt bcing in the hands of Turks, is, as might be expected, an maqualified despotism. Under the first Viceroy, and founder of the present dynasty, Mahommed Ali, it became in practice more enlightened, liberal, and humane: but its simple fundamental principles remain muchanged. He commenced his great reformations in 1808, by abolishing the right of private individuals to hold estates in land. Thus he became the pro prietor of the whole kingdom (houses and gardens excepted), and found himself in a position to carry out his schemes of improvement. He tben divided and subdivided the whole country, the officers of every grade, down to the Sheikh el Belid or village chief, being not merely magistrates, but overscers of work and tax-gatherers. The Fellahs received wages, sowed their fields as they were ordered by the Government, carried their produce to the Government stores, and were paid for it at the Government price. Thus Mahonmed Ali took into his own hands all the agriculture, as well as all the manufactures of the kingdom. He aimed at developing the resources of Egypt, but he never dreamt of turning to accourit the mainspring of national prosperity, namely, the untiring energy with which every man labours to promote his own welfare. To foster this spirit, is to make a nation rich. But the prosperity which Mahommed Ali had in view was that of his own treasury, and not that of his people. He aimed at being the sole farmer, manufacturer, and merchant in his dominion; and to his subjects, who were reduced to abject slavery, and heavily taxed, he left but a wretched subsistence. All the reforms effected by Mahommed Ali, his schools, manufactures, canals, plantations, well appointed army, and increasing navy, all tended towards the organization of a system on which be reckoned for the increase of his financial means and political power ; but as to the instruetion or well-being of his people in general, nothing could be further from his thoughts. The people were reduced by him to the deepest distress, while he certainly amassed no treasures.

Revenues and Expenses.-The revenues of Egypt are derived
from various sources, the chief being the mírí or land tax, for which the districts are answerable, however individuals may fail, so that the Government is sure to be paid. This yields nearly half of the whole revenue. Next in importance are the proceeds of monopolies, namely, of cotton, indigo, sugar, rice, opium, \&c. Then come the capitation, the customs, taxes on grain brought to market, on cattle slaughtered, on date trees, fishing, \&c.; in all producing about $£ 2,500,000$. The Egyptian army is composed of 130,000 regular troops, 12,000 of whom are cavalry, and of about 40,000 national guards. To these may be added about 40,000 irregular cavalry (Bedouins, chiefly in Arabia). The fleet consists of 10 or 11 ships of the line, six frigates, and a dozen smaller vessels; connected with it and with the arsenals, is a force of $40,000 \mathrm{men}$. Thus the forces maintained by a prince whose revenues hardly exceed two millions and a half, cannot altogether fall much short of 270,000 men. The officers, those of high rank especially, experience liberal treatment; while the men, who have been, for the most part, forced into service by conscription, are miserably paid.

Historical Monuments.-As the Arabic language has been for 12 centuries the language of Egypt, the literature of this country necessarily merges in the wide sea of Arabian literature. There, as in other Mahometan countries, the Koran is the only book systematically studied. In the schools, indeed, established by Mahommed Ali for specific purposes, and placed under the direction of Franks, suitable texts of various kinds were indispensible, and these have been generally supplied by translating from the French. The modern Egyptians have as yet acquired, and but partially acquired, the first elements of science. It is not improbable that from the time of the Macedonian conquest, nine centuries and a half before the Arab invasion, the Egyptian langnage began to give way to the Greek, losing its literary cultivation, though it remained in vulgar use. The introduction of Christianity aaturally favoured the inroads of the Greek language, and it is not surprising that the Coptic language, in the specimens remaining to us, should exhibit a large intermixture of foreign words. After the Arabs were settled in Egypt, the Coptic continued to be cherished only by a small and despised sect, and it ceased to be a living language, it is supposed, in the 12th century. Coptic literature belongs to the Christian period, and is almost wholly theological. If, therefore, we would look for the truly indigenous literature of Egypt-that literary cultivation which belonged to the conntry when its historical importance was at its height-we must seek it in the graven monuments of that period. But as the description of those wonderful monuments belongs properly to topography, we shall here confine ourselves to such a brief and general review of them, as will serve to indicate the chief epochs of the history which they record, and the cultivation of the people.

Passing over the 25,000 years during which Eggpt was ruled by gods and demigods, we come to the mortal Menes, the founder of the first of 30 dynasties, recorded more or less perfectly by Manetho, the hirh priest of Isis et Sebennytus, who lived about 300 в.c. But so arbitrarily has the highpriest's information been dealt with by the writers who have handed it down to us, and who have sought to adapt it to their own theories, that we cannot decide whether he places Menes 5400 or 3900 years before the Christian era. However, it is worthy of remark, that the son and successor of Menes is said to have written a book on anatomy, and to have had a temple at Memphis. This city was already, under the second dynasty, the capital of the kingdom; and mention is made, at the same early age, of Bubastos or $\mathrm{Pu}-\mathrm{Pasht}(\mathrm{Pi}-$ bescth, Ezek. xxx. 17), dedicated to the goddess Pasht, the remains of which may still be traced at Tel-Bastah, on the E. side of the Delta. With the fourth dynasty begins the period of undoubted contemporary monuments. Shúfo (Cheops) built the great pyramid, in which his name is writien; his immediate snccessor built the second; and his nephew, Menkare, the third. A portion of the coffin of Menkare, with his name inscribed on it, is now in the British Museum, being probably the oldest specimen of writing extant beyond the pyramids and the tombs of Gizeh and Sakkara. These earliest known specimens of hieroglyphic writing exhibit the art in complete maturity, and, coupled with the pyramids, prove that Egypt, under the fourth dynasty, was already far ad-
vanced beyond the infancy of civilization. The 11 th dynasty was the first of the Diospolitan or Theban kings, whose celebrity, however, commenced with the 12 th, to which belonged Sesortasen, one of those kings whose achievements have been heaped on the half fabulous Sesostris; and of whom there remains an inscribed pillar recording his conquests in Nubia, and his son Ammenemes III., who embanked Lake Moeris, and built the labyrinth. This edifice, the foundations of which may be still traced, appeared to the Greeks, even while Karnak stood in all its glory, to be the greatest and most wonderfnl in the world. The memorials of this distinguished dynasty are written or graven on the walls in the grottoes of Beni Hassen. The 15th and two succeedingdynasties were those of the Iyksos or shepherds, whose tyrannous rule continned for some centuries. These shepherds, that is, pastoral, and comparatively rude tribes, appear to have been the Canaanites, who, on their expulsion from Egypt, founded Jerusalem. With the 18 th dynasty begins the most brilliant period of Egyptian history, and the greatness of Thebes. Aahmes (Amosis), the first king of the 18 th dynasty, is supposed by some to have been the Pharaoh (Ph-re, king), under whom the Exodus took place; though others suppose the Exodus to have taken place in the reign of Ramses (Sesostris), the last king, or last but one of this dynasty. Subsequently comes a series of great princes-Amenoph, Thothmes, Horus, Ramses, and Menephthah, to whom are due the grand monuments of Karnak, Luxor (el-Akhsar), Medinet Abu, Amada, Semneh, \&c. The inscriptions of these victorious kings are found at the present day from Syria (at the Nahr-el-Kelb), to Jebel Barkal, above Dongola in Nubia. Their conquests are recounted on obelisks, temples, tombs, and represented by paintings, with hieroglyphic explanations, so elaborate and frequent, as to furnish the material of a voluminous, though still obscure literature. The tombs of the 12 th dynasty are, many of them, in the valley named Biban-el-Muluk (Gates of the Kings), extending in subterranean chambers, with painted or inscribed walls, to a distance, in some instances, of 350 ft . Some papyri, written in the reign of Menephthah II., the last of this dynasty (and son of Ramses III., the Sesostris of most writers 1340 в.c.), have been partially interpreted, and throw a curious light on the manners of the age. One of them contains instructions written by a minister of state for the secret preparation of a certain feast, whence it appears that the Ethiopian feast, entitled 'Table of the Sun' (in old Egyptian phrase, the King), as described by Herodotus 800 years later, had its origin in Thebes. Under the 20th dynasty began the decline of Egypt and of Egyptian art, while Assyria, on the other hand, now rose. A Pharaoh, probably the last, of the 21 st dynasty (Tanites, by Isaiah called the princes of Zoan), gave his daughter in marriage to King Solomon (1 Kings ix. 16). The 22d began with Sesonchis, the Shishak of Scripture (the first Pharaoh mentioned by name in the Sacred Volume), to whom Jeroboam fied, and who afterwards sacked Jerusalem. In the paintings at Karnak, which represent his conquests, this event is shown in detail, and the written title, 'King of the Jews,' points out the principal captive. The next dynasty was founded by Sabaco (So, the ally of Hosea, 2 Kings xvii. 4), originally from Upper Nubia. His name, as well as that of his follower Tirhaka, or Zerach the Ethiopian, is found on the monuments. The 26 th dynasty is distinguished chiefly by Psammetichus, in whose reign the Greeks began to grow numerous in Egypt. This was followed by the Persian Cambyses and his successors for 124 years, after which period we have again three dynasties of native princes, the last king of Egyptian race being Nectanebus, of whom there remains a temple and inscription at Philæ. He was driven from the throne in 341 в.c. by a usurper, who was soon after displaced by Darius Ochus; and he in turn was obliged, in 332 b.c., to make way for Alexander.

Litcrature.-The monuments here briefly indicated, furnish, in truth, a very ample literary store. The inscriptions, when long, can rarely be read completely; for though the Coptic affords a key to the structure of the ancient language, it supplics but an imperfect vocabulary. These difficulties may, however, be overcome by persevering study, and the monuments of Egypt will probably hereafter enable us to retrace with certainty the earliest dates of civilization. Hieroglyphic writing continued in use down at least to the third century of

## RIBENSCHITZ

the Christian era. Besides the hieroglyphic or monumental graven characters, the Egyptians used also the hieratic, which were, in fact, only the former reduced and adapted to the pen. The demotie or popular writing was probably of later date, derived from the hieratie, but with a more simple and cursive style. In some cases, monuments were inseribed in two or more of these styles, and in later ages, the Greek version of the inscription also was occasionally added; to this cireumstance chiefly, we owe the diseovery of the hieroglyphie alphabet. Among the trophies brought by the British army from Egypt, was the Rosetta stone, now in the British Museum. This is a large black slab, eovered with inscriptions in three different charaeters. The last of these is Greek, and informs us, that in the ninth year of Ptolemy Epiphanes (196 b.c.), the priests of Egypt, convened for the purpose, decreed certain honours to that King, and ordered that their decree should be engraved on hard stone, 'in Sacred (hieroglyphie), demotie, and Greek elaraeters.' 'The certaiuty that the hieroglyphie incription here contained the same matter as the Greek, induced Dr. T. Young, in 1813, to examine it attentively, and he soon detected the often-repeated names of Ptolemy and Cleopatra. The first steps being made suecessfully, the progress that ensued in this new line of investigation was astonishingly rapid, insomuch that Champollion left behind him at his death, in 1830, a complete Egyptian grammar and dictionary of hieroglyphics. The full consequences of this remakable discovery are not yet developed. Patient philological research and the comparison of inscriptions will, doubtless, eventually disperse the obscurity which now hangs over the Egyptian language. But at present we have a mueh better knowledge of the monuments and history of ancient Egypt, than the Greeks or Romans, and we ean ourselves read eritically those reeords of the vietories of Tothmes III. in the temple of Karnak, which, as Tacitus relates, were interpreted by the priests for Germaniens.

Modern History.-In A.d. 639, the Arabs effected the conquest of Egypt, whieh, under its Mahometan rulers, soon beeame totally metamorphosed, at least in spirit. In the great monuments of the aneient Plaraohs, the followers of the Caliphs saw nothing but the work of Jins. In 1250, the government was seized by the Mamelukes (slaves, chiefly from Caucasus, bred to military service), who had grown into power by the favour of Saladin. These were subdued by Selim, the Ottoman Sultan, in 1520; but the deseendants of the defeated chiefs kept the country in disorder for more than two centuries, and when, in the first half of the 18th century, the Ottoman empire was hard pressed by Russia and Austria, Egypt fell again under the turbulent sway of the Mamelukes, who continued to retain the sovereign power during the French invasion in 1798; but on the expulsion of the French by the British forces, the Ottoman Porte effectually urged its claim to sovereignty, and the young officer commanding the Turkish forces, Mahommed Ali Bey, eontrived to shorten the contest ly entrapping and treacherously murdering the Mameluke leaders. Such was the act which founded the fortunes of the future Iasha. As he consolidated his power in Egypt, the Porte, with sinister intentions probally, commanded him to suppress the Waláli, a fanatical seet in Arabia, grown formidable by their numbers and audacity. But his energy and perseverance overcame all difficulties. He subdued the Wahábi, and aunexed to his dominions all the provinees of Arabia bordering on the Red Sea. On the banks of the Nile his couquests extended to Sennár and Kordofan. At length he broke openly with the Porte, and the Ottoman and Egyptian forces meeting in the plains of Nizíb, in Syria, in June 1839, the latter gained a deeisive victory; the result of which was a treaty confirming to Mahommed Ali the viceroyalty of Egypt, as a fief of the Ottoman empire, hereditary in his family. The sway of the Vieeroy of Egypt extends over the country on the banks of the Nile as far S. as Fazoklo and singue (lat. $10^{\prime} 30^{\circ} \mathrm{N}$.), where the gold washings begin, and as mueh further as he can uphold by means of oceasional incursions. He claims the W. oases, though the suljection of Siwah is little more than nominal. IIe possesses Kordofan, and is master of the Hejaz in Arabia.-(Description de l'Egypte, dc.; P'ococke's Description of the East, 1763; Travels of Volney, Savary, Dr. Clarke, Caillaud, Von Minutoli, Cadal vène, \&c.; Histoire de l'Egypt sous Mehemet Ali, per F. Mengin; Wilkiuson's Modern Figypt, Topography of Theles, dc.
Vol. I.

EIIINGEN [anc. Dracuina], a tn. Würtemberg, eircle, Danube, cap. bail. of same name, 1 . bank, Danube, 14 m . S.W. Ulm. It is a very aneient place, contains a Ritter-haus, in whieh the States of Lower Austria used to assemble, a townhouse, four churehes, one of them a fine ancient structure; a gymnasium, and hospital ; and has manufactures of syrup, starch, and vinegar, a bleaehfield, numerous mills, a considerable trade, and several annual fairs. Pop. tn. 3000. Area of bail. 113 geo. sq. m. Pop 24,154.

EIININGEN, a vil. Würtemberg, circle, Schwarzwald, 7 m . W. Urach. It contains a parish chureh, and has a great number of dealers, who traverse into the neighbouring distriets and dispose of their wares. Pop. 5010.

EIIRANG, a tn. Prussian Rhine prov., gov. of, and 4 m. N . Treves, on a height at the confluence of the Kyll with the Moselle. It is surrounded with walls and has extensive ironworks, some trade in cattle, and an important annual fair. Pop. 1050.

EHRENBERG, Alt, or Ober, a vil. and par. Bohemia, eirele of, and 35 m. N.E. Leitmeritz. It has a handsome parish chureh, and important manufaetures. Pop. 2579.

EHRENBREITS'TEIN [honour's broad stone], a tn. and fortress Prussia, r. bank, Rhine, gov. of, and nearly opposite Coblenz, with which it is connected by a bridge of boats. The fortress oceupies a preeipitous hill nearly 490 ft . high, and is so strongly fortified both by nature and art, as to have received the name of the Gibraltar of the Rhine. On three sides steep rocks make it almost inaecessible, and on the N.W. where its only weak point lies, the utmost efforts of engineering skill have been employed to repair the defect, by the erection of a triple line of formidable defences, on which nearly 400 pieces of cannon are mounted. On the top of the rock is a platform used as a parade, and immediately, under it are brick arched cisterns, capable of containing a sufficient supply of water for the garrison for three years. A well also, 400 ft . deep, communieates with the Rhine. Ehrenbreitstein was originally a Roman fort, and in latter times the stronghold of the Electors of Treves, who occupied a castle at the foot of the roek. The French employed their utmost efforts to take it during the 17 th century, but without success. In 1799, however, starvation forced the garrison to surrender it into their hands. On evacuating it in 1801, at the peace of Luneville, they blew up the works, but Prussia has, since 1814, laboured ineessantly to restore them, and they are now stronger than ever.--The town, at the foot of the hill, eontains two R. Catholic churches, and a synagogue, and has a trade in corn, iron, steel, pipe clay, and seltzer water, two eattle-markets, and four general amual fairs. Pop. 2800.

EHRENFRIEDERSDORF, a tn. Saxony, circle, Zwickau, on the slope of the Sanberg, abont 1500 ft . above the sea, 44 m. S.W. Dresden. It contains an old chureh, with a fine altar, and has extensive manufactures of laee and hosiery, a trade in cattle, an aeidulated spring, and two annual fairs. Lead and iron are worked and smelted in the neighbourhood. Pop. 2620.

EIIRENHAUSEN, a market tn. Austria, Styria, circle of, and 10 m . N.N.W. Marburg, r. bank, Mur, here crossed by a covered bridge. It contains a parish church, and $\varepsilon$ castle, a large and handsome structure, on a high hill, and containing a fine mausoleum of the princes of Ehrenberg. The inhabitants live ehiefly by agriculture, but have some transit trade. In 1809, a battle was fought here between the Freneh and Austrians. Pop. 708.

EHRENSTETTEN, a market tn. Baden, eircle Upper Rhine, 6 m . S.W. Freiburg, with a church. Much wine and fruit are grown in the distriet. Pop. 1564.

Eibelstadt, or Elvelstadt, a tn. Bavaria, Lower Franeonia, r. bank, Main, over whieh there is here a ferry, $5 \mathrm{~m} . \mathrm{S} . \mathrm{E}$. Würzburg. It contains a chureh, and a chapel to whieh frequent pilgrimages are made, a townhouse, and hospital. Much wine and fruit are grown in the vieinity. Pop. 1500.

Eibensciittz, or Eibenschütz, a tu. Austria, Moravia, circle, Znaim, 11 m. S.W. Brünn, in a beautiful and fertile valley, enclosed by high hills, at the confluence of the Oslawa with the Igla. It is an ancient place, which early embraced and suffered muel for its adherence to both the IIassite and the great Reformation. It contains a church, barrack,
hospital, and poorhouse, and has manufactures of a fine black earthenware, and a trade in fruit and vegetables, particularly asparagus. In the vicinity is a fine bed of clay, much of which is sent to other towns. Yop. 3000.

EIBENS'TOCK, a tn. Saxony, circle, Zwickaı, cap. bail. of same name, near r. bank, Mulde, 60 m . S.W. Dresden. It is tolerably well built, contains an old church, townhouse, and infirmary, and has extensive manufactures of tinware and lace, chemical products and tobacco, a considerable trade in cattle, numerous mills, and three annual fairs. Medical plants are cultivated on a large scale, and iron and tin have been worked here from a very early period. Pop. 5762.- -The bailimick, on the Bohemian frontiers, is the highest and bleakest district of the country, and belongs to what is sometimes called Saxon Siberia. Pop. 27,281.

EIBERGEN, a vil. Holland, prov. Gelderland, 21 m . E. Zutphen, l. bank, Borkul or Berkel, here crossed by an excellent bridge near the Prussian frontier. It has a Calvinistic and a R. Catholic church, and a school. In its vicinity are some bleacheries, tan-works, breweries, and brickfields; and weaving is likewise carried on. Pop. 1200, or with adjoining hamlets, 2500.

EIBESWALD, a market tn. Austria, Styria, circle of, and 22 m . W.N.W. Marburg, in a valley on the Saggabach. It contains a castle and a parish church, and has blast furnaces and other iron works, which derive their materials from coal and iron mines in the neighbourhood.

EIBSTAD'T (Geoss and Klein), two vils. Bavaria, Lower Franconia, near Königshofen, on the Saale, here crossed by a bridge. They contain a church, an old castle, and a synagogue, and have several mills. Ochre is mined, and wine extensively grown in the vicinity. Pop. Gross Eibstadt, 522 ; Klein Fibstadt, 642.

EICH, a vil. and par. Holland, prov. and forming almost a suburb of Luxemburg. It is a thriving place, and has ironfurnaces, porcelain works, and paper and other mills. P. 4600.

EICH, a vil. Hesse-Darmstadt, Rheinhesse, near r. bank Rhine, 9 m . N. Worms. It contains a Protestant and a R. Catholic parish church, two parsonages, a townhouse, and school. Pop. 1342.

EICHENBUHL, a vil. Bavaria, Lower Franeonia, dist. of, and near Miltenburg, at the confluence of the Schippach and Erf, each of which is here crossed by a stone bridge. It has a parish church, an oil and two other mills. Pop. 985.

EICHORN, a market tn. Austria, Moravia, circle of, and 18 m. W.N.W. Brünn, cap. lordship of same name, near r. bank Schwarsawa, remarkable only for its old castle, on a beight between steep precipices, and surrounded by venerable oaks, founded in 1060 by Duke Conrad of Moravia, and afterwards occupied by the Templars. Iron and argentiferous lead are extensively worked in the lordship.

EICIISTÄD'T', a tn. Bavaria, Middle Franconia, cap. dist. of same name, in a deep valley on the Altmuhl, here crossed by four stone bridges, 67 m . N.N.W. Munich. It consists of the town proper and four suburbs; is the see of a bishop, the seat of an appeal court, with extensive jurisdiction, and of several other courts and public offices; and is tolerably well built, having some good squares, one of them adorned with a fountain and bronze statue of St. Willibald. The prineipal huildings are the cathedral, founded in 1259, a Gothic edifice, surmounted by two towers, and possessed of fine painted glass, curious monuments in bronze and marble, and several fine paintings; the castle, a modern structure, the residence formerly of the prince bishops, and now of the Duke of Leuchtenburg, containing a good museum and some interesting portraits; the townhouse, built in 1440 , and surmounted by a square tower; seven churehes, several of them handsome; an ecelesiastical seminary, a normal school, a Capuchin monastery, a Benedictine nunncry, and, on a height on the opposite side of the river, the old castle of Willibald, formerly a ruin, but now repaired and used as barracks. The manufactures consist of woollen and linen cloth, ironmongery and stoneware, and there are several breweries, and numerous mills. Eichstädt is of Roman origin, and was surrounded by walls in 908. After passing through various hands, it came into the possession of the Bavarians in 1805. In 1815 it became the capital of a principality of the same name, and was bestowed on Eugene Beauharnois, in whose family it still remains. Pop. tn. 7369; dist. 11,402.

EICHSTETTEN, a market tn. Baden, circle, Upper Rhine, on the Treisam, 10 m . N.W. Freiburg. It contains a parish churcb, and has a trade in cattle and wine. Pop. 2517.

EICHTERSHEIM, a vil. Baden, circle, Lower Rhine, bail. of, and near Wiesloch, with a Protestant parish church; and in its vicinity the castle of the lords of Benningen. P. 835.

EIDER [Latin, Eidera], a river, Denmark, falling into the N. Sea. N. of the Elbe, at Tönning, and forming, throughout the greater part of its course, the boundary line between the Duchy of Schleswig on the N., and Holstein on the S. Through the Eider, or Schleswig-Holstein canal, extending from the river at Rendsburg to Kiel Fiord, water communication is established between the N. Sea and the Baltic. The river rises in Holstein, about 12 m. S. by W. Kiel, flows N. W. to the Schleswig frontier, after which its general course is W., though with many windings. Its total length is 92 m ., of which 69 m . are navigable.

EIDSVOLD, or Eidsvold-bakken, a small tn. and riverport, Norway, bail. Aggershuus, r. bank, Wormen, near where it leaves Lake Miösen, 34 m . N.E. Christiania. It lias steam communication along Lake Miösen with the iron works of Lillehammer, and is much resorted to during summer for the mineral waters of its neighbourhood. It has some iron forges, and small quantities of gold were formerly found in the vicinity. Eidsvold is chiefly remarkable for the meeting of Norwegian delegates, held here in 1814, when the constitution was formed and sworn to, declaring Norway independent, and Christian Frederick, Prince of Denmark, king. Though Norway soon after was compelled to submit to a union with Sweden, this constitution continues to be the fundamental law of the country

EIFEL, a range of schistous hills, Prussia, prov. Lower Rhine, connected, W. with the F. Ardennes, and trending E. by S. towards the Rhine, chiefly between the rivers Ahr and Nette. They are cold, wooded; the valleys sometimes bold, often picturesque, and they present numerous crater-like lakes. They are sometimes divided into Hohen-Eifel [high Eifel] Vorder Eifel [hither Eifel], and Schneifel [snowy Eifel]. Culminating peak, about 2300 ft . high. Numerous extinct craters and other traces of volcanic action are met with; and they are still the haunt of the wolf and the boar.

EIG, an isl., W. coast Scotland, co. Inverness, about 10 m . from the mainland; lat. $56^{\circ} 57^{\prime}$ N.; lon. $6^{\circ} 10^{\prime} \mathrm{W} . ; 5 \mathrm{~m}$. long by about 3 broad. It has a bold and striking appearance when approached, proceeding partly from the ruggedness of its shores, but principally from an irregular, curved ridge of rock at its southern extremity, called the Scuir of Eig, which terminates in a peak of columnar pitchstone porphyry, rising 1339 ft . above sea level, generally speaking flat on the top, and perpendicular at the sides, more especially on its E. side, where it is perfectly perpendicular. Dr. M'Culloch avers that, 'to him who may have been satiated with the regularity of Staffa or the magnificence of Skye, this island offers both variety and novelty.' There are numerous caves round the coast, in one of which, whose entrance is so small that a person must creep on hands and knees into it, the M'Donalds, inhabitants of the island, took refuge from the pursuit of their enemies, the M•Leods of Skye. The latter, discovering their retreat, kindled fires at the mouth of the cave, and suffocated the M'Donalds, whose whitened bones in the cave still attest the truth of the tragedy. The general surface of the island is uneven, and consists mostly of heathy or mossy pasture, but some of the low grounds are tolerably productive. Cattle rearing is the principal occupation. Pop. (1841), 546.

EIGELTINGEN, a vil. Baden, Lake cirele, bail. of, and near Stockach. It has a parish church, three breweries, oil, saw, and flour mills, and a limestone quarry. Pop. 793.

EIGH' BROTHERS, or SowaUba, a group of small isls. N.E. coast, Abyssinia, at the mouth of the Strait of Bab-el-Mandeb, about 15 m . N. Ras Bir; the largest in lat. $12^{\circ} 28^{\prime} \mathrm{N}$. ; lon. $43^{\circ} 28^{\prime} 50^{\prime \prime} \mathrm{E}$. They are of a brownish colour, and apparently voleanic ; of considerable height ; and the greater number may be seen from off 20 to 30 m . in clear weather. The highest forms a conspicnous peak, rising about 350 ft . above the sea, with a small bay on its N . side, abundantly supplied with turtle and fish of various kinds.

EIJERLAND, or Eierland [egg-land], a former isl. Holland, prov. N. Holland, now forming the N. part, and about two-fiftlis of the island of Texel. It was formerly a sandbank, but by accumulations from the sea, it is now good
pasture land. It received its name from the numbers of seafowl's eggs formerly and still found upon it. Rabbits, also, ure plentiful.

EIL (Locit), a salt water lake, Scotland, forming the upper part of Loch Linnhe, on the borders of cos. Argyle and Inverness.

EILAU, or Eylau (Deutscia), a tn. Prussia, prov. W. Prussia, gov. of, and 27 m . E.S.E. Marienwerder, at the S. extremity of Lake Geserich. It has manufactures of woollen and linen cloth, hats, and leather, and eight annual fairs. Pop. 1710.

EilaU, or Eylau (Preusiscif), a tn. Prussia, gov. of, and 24 m . S.S.E Künigsberg, cap. eircle of same name, on the little river Pasmer, surrounded by small lakes. It is the seat of a court of law and several public offices, contains a chureh and an old castle, and has manufactures of woollen and linen cloth, hats, and leather, several mills, a trade in horses and cattle, and four anmual fairs. In 1807, on two successive days, bloody but not very decisive battles were fought here between the French and the allied Russians and Prussians. Pop. 2920.-The circle, area, 350 geo. sq. m., is well wooded and well watered, but does not contain much good arable land. Pop. 40,448.

EILDON HILLS, three picturesque conical-shaped hills, scotland, co. Roxburgh, S. of Melrose. Two of them attain to an elevation of about 1400 ft . above sea level, and on the third are the traces of a regularly-formed Roman encampinent.

EILENBURG, a tn. Prussian Saxony, gov. of, and 26 m . N.N.E. Merseburg, on an island of the Mulde, here crossed by two bridges. It consists of the town proper, surrounded by walls and ditehes, and of four suburbs; is the seat of a court of law, and several public offices; contains a castle, two churches, a chapel, hospital, and infirmary; and has manufactures of calico, tobacco, and refined wax, a tilework, several mills, a trade in cattle, and four annual fairs. Pop. 8060.

E1LENDORF, a vil. Rhenish Prussia, gov. of, and 3 m . E. Aix-la-Chapelle. It contains a R. Catholic parish church, and lias a copper mill. Mines of calamine and lead are worked in the neighbourhood. Pop. 759.

EILSEN, a vil. Lippe-schaumburg, bail. Bückeburg, r. bank, Au, about 2 m . N.W. Ahrensburg. It stands at the foot of the IIarrlberg, and has chalybeate and sulphureous waters, and mud-baths-the last the oldest in Germany.

EIMBECK, a tn. IIanover, gov. Hildesheim, cap. bail. of same name, on the Ihn, near its junction with the Leine, 40 m . S. Hanover. It is in the form of an irregular oval, surrounded by old dilapidated walls, with five gates; and is poorly built, consisting of antiquated houses, and narrow, winding, and ill-paved streets, with exception of one part, which, having been burued down in 1826, has been rebuilt in a much improved form. It contains three churehes, a gymnasium, orphans' asylum, and two hospitals; and has manutactures of woollen and linen cloth, carriages, and chemical products; several brandy distillerics, breweries, tanneries, and tobaeco factories; and an active trade in corn, wool, and flax. Eimbeck was a place of considerable importance in the 15th century, and early embraced the Reformation. In recent times it has greatly decayed. Pop. of tn. 5687; of bail. 14,019.

EIMEO, one of the Society Islands, S. Pacific Ocean; lat. $17^{\circ} 30^{\prime} \mathrm{S}$.; lon. $149^{\circ} 47^{\prime} \mathrm{W}$. (r.) ; about 10 m . long by 5 broad. The surface is hilly and rocky, here and there shooting up into isolated picturesque peaks, while on the shores the mountains rise precipitously from the waters to the height of 2500 ft . Eimeo has several harbours, but that of Taloo, on the N. coast, is the best: it is a beautiful inlet, about 3 m . in length, situated in a glen enelosed by precipitous sides, rising in places to the height of 2000 ft .; at its head is an extensive flat of rich alluvial soil, now employed in the culture of sugar, and studded with trees, shrubs, and other interesting objects. The cane here is of superior quality, and the climate well adapted to its production. About 100 tons are made annually. Coffee, cotton, and all other tropical plants succeed well on this island. A considerable quantity of tapa is manutactured. A factory for spinning cotton, and weaving cloth and carpets, was attempted here under missionary auspices, but was unsuccessful. Pop. 1300.

EINDHOVEN, a tn. Holland, prov. N. Brabant, $18 \mathrm{~m} \cdot$ S. by E. Hertogenbosch, near the junction of the Einde with the Dommel. It was formerly fortified, and surrounded with
a ditch, and formed a long parallelogram. But it now consists chiefly of a very long, closely-built street; and has a neat townhouse, with a tower; a prison, courthouse, R. Catholic and small Calvinistic church, a synagogue, and a Latin and several other schools. It is a busy manufacturing town, though much fallen off from its former importance. Its hats are much sought after, and it does a good trade in tobacco and snuff, the latter having a considerable reputation. It likewise has cotton and woollen factories, driven by steam and water power; two breweries, and a vinegar work. Formerly linen weaving, tanning, and shoemaking were largely carried on, but those branches of mannfacture are now extinct. It has a large market place, where weekly and numerous amnual markets are held. lop. 3000.

EINSIEDELN, a vil. Switzerland, can. of, and 9 m . N. by E. Schwyz, 3000 ft . above the sea, on the Alp, here crossed by a covered wooden bridge. It owes its celebrity wholly to the neighbouring Benedictine Abbey, which is visited annually by about 150,000 pilgrims, attracted by a black image of the Virgin, to which faithful IR. Catholics ascribe miraculous powers. The present building, esteemed one of the finest in Switzerland, was built at the beginning of last century, and is the fifth since the foundation of the abbey, in the 10th century. The village is chiefly inhabited by shopkeepers, artizans, and innkeepers, supported by the pilgrimages. There are 55 inns and 20 alehouses in the village. During the dedication festival, in September, the great pilgrimage season, there are two semi-circular rows of tents in front of the abbey, where all kinds of religious wares may be purchased, and in the centre is a well, with 14 spouts, whose water is highly estecmed by the faithful. In 1517, Ulrich Zwingli, the Swiss reformer, then parish priest in Einsiedeln, preached at the dedication festival with such fervour against indulgences, pilgrimages, and monastic vows, that the monks laid aside their cowls, and the abbey was for a time deserted.

EINURU, a tn. of S. Hindoostan, prov. Canara; lat. $13^{\circ} 5^{\prime} \mathrm{N}$.; lon. $75^{\circ} 16^{\prime} \mathrm{E}$. It contains eight temples belunging to the Jains, and one or two to the Brahmins. In its vicinity is a colossal statue of their favourite idol, Pariswanath, formed of one solid piece of granite. The country around is extremely unproductive, and the inhabitants very poor.

EISACII, or Eisak, a river, Austria, Tyrol, which rises on the S . slope of Mount Brenner, and pursues a very circuitous course of about 50 m .; first, S.E. to Brixen, then S.S.W. past Klausen, and finally almost due W. to Botzen, about 3 m . below which it joins 1. bank, Adige. Its torrent is very impetuous, and often, particularly at the melting of the snows, overflows its banks. It is nowhere navigable.

EISENACII, a tn. Saxe-Weimar, cap. principality of same name, beautifully situated amidst wooded hills, belonging to the Thuringian forest; at the foot of the Wartburg, and on the railway from Leipzig to Cassel, 45 m . W. Weimar. It is surrounded by walls, and has well-built houses, an elegant market place, and wide streets, paved for the most part with basalt. It is the seat of a civil, consistorial, and criminal court, and of several public offices; and contains a palace, built for residence by Duke Ernest Augustus, but now occupied as courthouses; four churches, one of them the Nichola kirche, a fine old Gothic structure; a library, a gymnasium, normal, industrial, and burgher schools, a school of midwifery, and school of design; a savings bank, bible society, a house of correction, and four hospitals. The manufactures consist of woollen cloth, fustian, drills, linen thread, worsted, whitening, peach brandy, pottery, especially pipe-heads, and sealingwax; and there are several dyeworks, numerous breweries, a powder, three oil, and spinning and other mills. The trade is in seeds, wine, and the above articles of manufactures. Besides two weekly markets, there are five annual fairs. Sebastian Bach was born here. On a lofty height in the neighbourhood, surrounded by dark forests, stands the castle of Wartburg, the ancient residence of the Landgraves of Thuringia, and memorable as the place to which Luther was carried by a friendly stratagem of the Elector of Saxony, after his appearance at the Diet of Worms. IIere, notwithstanding the papal excommunication, he remained in safety for 10 months, in what he called his Patmos, and executed a considerable part of his translation of the Scriptures into his mother tongue. Pop. of to. 9439 . Area of the principality 320 geo. sq. m. Pop. 76,845.

## EKATERINBURG

EISENBERG, a tn. Germany, Saxe-Altenburg, cap. bail. of same name, on a height near the Saale, $25 \mathrm{~m} . \mathrm{E}$. Weimar. It is partly surrounded with walls; contains three churches, a castle with gardens, a courthouse, townhouse, lyceum, two schools, and a poorhouse; and has manufactures of woollen goods, porcelain, and stoneware; tile-works, a trade in corn and wood, and five annual fairs. Pop. of tn. 4744. Area of bail. 49 geo. sq. m. Pop. 15,730.

Eisenburg, or Vas-Varmegye, a co. Hungary, Thither Danube; bounded, N. by Oedenburg, N.E. Raab, E. Veszprim, S.E. and S. Zalad, W. Styria, and N.W. Archduchy of Austria; area, 1536 geo. sq. m. The surface is mountainous, particularly in the W., where several ramifications of the Styrian Alps terminate; but the valleys and plains are so extensive, that nearly one-half of the whole is arable. The principal river is the Raab, which receives within the co. the Pinka, Sorok, Herpenyo, and Gyöngyös. Though situated on the frontiers of Styria, it possesses few of the minerals for which that duchy is so celebrated, but has a full compensation in the fertility of its soil, which yields abundance of corn and fruit; and is also well adapted for the cultivation of the vine, to which much attention is paid. The woods also are extensive, and furnish excellent timber. For administrative purposes it is divided into six districts; Steinamanger is the capital. Pop. 185,000.

EISENBURG, or Vasvar, a market tu. Hungary, co. Eisenburg, near r. bank, Herpenyo, 27 m . S.E. Güns. It contains a R. Catholic church, and a Dominican monastery. Much good wine is grown in the vicinity. Pop. 670.

EISENDORF, a vil. Bohemia, circle, Klattau, 38 m . W. by S. Pilsen, in the Böhmerwald mountains, on the frontiers of Bavaria. It contains a parish church, and a small castle, and has a saw and two other mills. Pop. 742.

EiSENERZ, or Innerberg, a market tn. and lordship, Austria, Styria, circle of, and 19 m. W.N.W. Bruck, at the foot of the Erzberg or Iron Mountain. It contains a Gothic church of the 13th century, situated on a lofty height; and is celebrated for its iron, which has been worked on the mountain for 1000 years. Instead of lying merely in seams, the whole mass of the mountain scems to consist of iron ore, which, though once worked by mines, is now rather quarried than mined in large open excavations. The blast furnaces, three in number, are about 14 m . distant, and communicate with the workings by railway. The iron produced is of the best quality, and makes excellent steel. Pop. 2575.

EISENSTADT, a tn. Hungary, Thither Danube, co. of, and 11 m . N.N.W. Oedenburg, in a pleasing district on the slope of the Leitha hills. It is surrounded by walls, with two gates; contains an ancient parish church, a townhouse, a Franciscan monastery, in which is the Esterhazy burying vault; an hospital, high school, and barracks. In the neighbourhood is a magnificent palace, belonging to Prince Esterhazy. Pop. 5700 .

EISFELD, a tn. Germany, Saxe-Meiningen, cap. bail. of same name, on the Werra, 23 m . E.S.E. Meiningen. It stands in an extensive valley, more than 1400 ft . above the sea, is divided by the river into the old and new town; the former, surrounded by a wall, is the seat of a court of law, contains an old castle, two churches, a townhouse, and superior school; and has manufactures of woollen, linen, and cotton goods, dimity, and leather; numerous mills, tile-works, a tobaceo factory, a weekly market, and seven annual fairs. Pop. tn. 2796. Area of bail. 54 geo. sq. m. Pop. 12,355.

EISGRUB [Moravian, Lednice], a market tn. Austria, Moravia, circle, Brünn, about 8 m . from Nikolsburg. It contains a parish church, and a castle belonging to Prince Liechtenstein, which is regarded as one of the most magnificent in Moravia. It has manufactures of potash, leather, bricks, and tiles; and four annual fairs. Pop. 1954.

EISEY, par. Eng. Wilts; 1840 ac. Pop. 188.
EISK, a naritime, tn . Russia, at the head of a land-locked bay of same name, E. shore, Sea of Azof, territory of the Cossacks of the Black Sea, 50 m . W.S.W. Azof. The ukase for its erection was issued on March 6, 1848; and as it is intended to form the entrepôt for the agricultural products of the surrounding country, considerable privileges are guaranteed to its inhabitants, with a view to their increase.

EISLEBEN, a th. Prussian Saxony, gov. of, and 25 m . N.W. Merseburg. It consists of the town proper and of five
suburbs. The former consists of the New Town, which is open; and the Old Town, which is surrounded with walls. It contains four churches, a castle, and gymnasium; is the seat of several courts and public offices, and has copper furnaces, saltpetre, and potash work3, manufactures of linen and tobacco, a trade in corn, and three mills. In Eisleben was born Martin Luther, November 10, 1483; and in it he died February 28, 1546. The house of his birth, though partly destroyed by fire, still stands, and with good taste has been converted into a school house, which bears his name, and in which poor children are gratuitously taught. His portrait is placed over the entrance, and within, his cap, cloak, and other relics are shown. The church of St. Andrew's contains the pulpit in which he used to preach. Copper is extensively worked in the neighbourhood. Pop. 8005.

EISLINGEN (Gross), a vil. Würtemberg, circle, Danube, bail. of, and 2 m . E. Göppingen, on the Fils. Pop 1228.

EISNERN, or AIsNern, a vil. Austria, Illyria, circle of, and 24 m . W.N.W. Laybach. It contains a parish church, several mills, and blast furnaces, employed in smelting the iron which is extensively worked in the neighbourhood.

EITERFELD, a market tn. W. Germany, Hesse Cassel, prov. Fulda, bail. of same name, 7 m . S.E. Hersfield, on the road to Fulda. It contains a handsome parish church. Pop. tn. 632; bail. 9516.

EIXO, a tn. and par. Portngal, prov. Douro, near l. bank, Vonga, 32 m . N.N.W. Coimbra. Important mines of copper were once worked here. Pop. 2890.

EJEA-de-los-Caballeros, a tn. Spain, Aragon, prov. of, and 30 m. N.W. by W. Saragossa, at the confluence of the rivers Luesia and Arva de Biel. It has wide, level, and clean streets; two parish churches, some convents, a townhouse, prison, hospital, and public storehouse. There are some remains of its ancient walls and gates, and along the banks of the rivers are beautiful alamedas. Manufactures:-linen and hempen fabrics, wine, and oil. Pop. 2378.

EKaterinburg, Iekaterinenburg, or Yekaterinbura [Catherine's borough], a tn. Asiatic Russia, cap. of the Ural mining district, $\mathbf{E}$. side of the Ural Mountains, gov. of, and 170 m . S.E. Perm; lat. $56^{\circ} 50^{\prime} 14^{\prime \prime} \mathrm{N}$.; lon. $60^{\circ} 34^{\prime} 44^{\prime \prime} \mathrm{E}$., on both banks of the Iceth or Iset, at an elevation of about 860 ft above sea level. The general external appearance of Ekaterinburg very much resembles that of one of the manufacturing towns of Europe. The streets are long and straight but unpaved, having, however, planks or logs laid on each side for foot-passengers. The principal street runs parallel with the river, and is crossed by numerous smaller streets, leading directly to the bank of the Iset. A number of the houses are of wood, but there are also a great many of stone, built in a handsome and substantial style, and possessing as much internal comfort as exterior elegance. On the S.E. bank of the river, the buildings are spread over an extensive plain, which is connected with the city by a handsome bridge; these buildings include the Government magazines, mills, factories, \&c., and enclose an extensive square or market-place. The principal part of the town, however, is on the opposite side. Here the streets are spacious and elegant, and the stono edifices, the habitations of merchants and mine proprietors, exceedingly handsome. In this quarter there are a public granary, a public sale room, a convent and several churches. The cutting, polishing, and engraving of precious stones, forms a principal branch of industry in Ekaterinburg, and the art is here brought to the greatest perfection. Men, women, and children, are met with at every step offering bargains of these tempting valuables, consisting, chiefly, of topazes, amethysts, crystals, jasper, \&c. 'The greatest neatness,' says Mr. Erman, 'is observable in the dwellings of those who work in these gems, who, even when in possession of considerable wealth, retain their native simplicity of dress and manners.'

The in-door dress of the women of Ekaterinburg is the ancient sarafan, and a covering for the head, called a kakoshnik, having a broad staring border, and sometimes covered with jewels. This head dress is worn by married women alone; long plated tresses forming the distinction of the nnmarried, who do not cover the head. The young men delight in flowing locks. Parties of exiles frequently pass through the town, amounting in number yearly, it is stated, to 5000. The women are generally in waggons, the men following, in couples, on foot. Pop. (1851), 15,852.

EKATERINODAR, or Iekaterinodar, a tn. Russia, cap. country of the Black Sea Cossacks or Tschernomorzski Cossacks, 1. bank, Kuban, about 100 m . above its mouth, and 135 m. S. Azof. It has broad, regular, and straight, but excessively dirty streets, being in fact a complete mire. The houses, mostly of earth, with a few of wood, are of one story, generally thatched, and all stand in direct lines, having usually gardens attached. There is here a cathedral, with six lofty wooden towers; and a krepost or timber fortress for frontier defence against the Circassians. Ekaterinodar is the seat of the Cossack hetman, and other authorities for the district. On every side is swamp and morass, forming a mud defence to the town, in which carriage, horse, and traveller. often stick fast for many hours. Pop. (1853), 10,000 .

EKATERINOGRAD, or Iekaterinograd, a tn. and fortress, Russia, gov. Caucasus, 20 m. W. Mosdok, l. bank, Terek; lat. $43^{\circ} 40^{\prime} \mathrm{N}$. ; lon. $43^{\circ} 55^{\prime} \mathrm{E}$. It is an ordinary Cossack town; houses, regular, but poorly built. Pheasants are caught here in abundance, and form a chief article of food. This is the most important military post of the Cossacks of the line, and was founded in 1777 by Prince Potemkin, to whose memory a stone triumphal arch was here erected by the Empress, Catherine II. On the opposite bank of the Terek are seen the lofty summits of the Caucasian mountains, rising in the rear of the steppe, and although at a distance of several days' journey, they appear as if in the immediate vicinity. Pop. (1849), 2722.-(Wagner's Kaukasus.)

EKATERINOSLAV, or Iekaterinoslav, a gov. of S. Russia; lat. $47^{\circ}$ to $49^{\circ} 20^{\prime}$ N.; and lon. $33^{\circ} 30^{\prime}$ to $39^{\circ} 40^{\prime}$ E., bounded, N. by govs. Pultova, Kharkov, and Voronez; E. by the Don Cossacks, S. by Taurida, and W. by Kherson, with a separate portion in Don Cossacks, at the mouth of the Don; area, 19,299 geo. sq. m. The government is divided into two sections by the Dnieper, which intersects it in a semi-circular course, N. to S., about three-fourths lying E., and one-fourth W. of that river. The E. portion belongs to the steppe country of S. Russia, being flat, monotonous. without trees, often without water, and with a lean saliferous soil. The W. portion is more undulating, and more fruitful. The Donetz forms part of the N.E. boundary, and there are sunlry smaller streams, chiefly affluents of the Dnieper, and lakes and morasses are numerous. The minerals are granite, lime, chalk, salt, and garnets. The climate is moderate and healthy ; the winter short, and the rivers are not very firmly frozen; the summer is very warm, and often without rain. Wheat, spelt, barley, and oats are raised in quantity sufficient for local consumpt; and hemp, flax, poppies, pease, vegetables, and fruits are also cultivated. Grapes and mulberries frequently suffer from frost; but melons, cherries, \&c., succeed well. But the chief wealth of the government consists in its innumerable herds of horses, oxen, sheep, many of them merinos; goats, and swine. Bees yield a large return; and the silk culture is carried on by the Greeks at Mariopol, and the Armenians at Nakichevan. In the steppes, wolves, foxes, hares, wild-cats, bustards, pelicans, partridges, quails, ducks, and snipes are found; and in the rivers fish are very plentiful. Wood is wholly wantiug in the E., and quite insufficient in quantity in the W.; fuel consequently is scarce, and the poorer classes are fain to burn dung, litter, and heather. The houses are of clay, thatched with rushes. Of manufacturing industry there is little; still some cloth, leather, candle, and beer are made, and some tallow smelting carried on; and there are no less than 225 distilleries. The exports are chiefly fish, tallow, and other animal substances. Education is in a very low condition. The government is divided into seven districts. Capital, Ekaterinoslav. Pop. (1850), 887,500.

EKATERiNOSLAV, or Iekaterinoslay, a city, S. Russia, cap. above prov., r. bank, Duieper, 250 m . N.E. Otessa ; lat. (Trinity church) $48^{\circ} 27^{\prime} 50^{\prime \prime}$ N.; lon. $35^{\circ} 5^{\prime} 52^{\prime \prime}$ E. (L.) The streets are long, broad, badly filled up with houses, and very dirty. It is the seat of an archbishop, whose jurisdiction extends over the neighbouring governments of Taurida and Kherson; and has three churches, a theological seminary, a gymnasium, 10 public schools, government offices, law courts, barracks, several bazaars, a public park, and botanic garden. In the vicinity is a large palace, in a ruinous condition, with extensive pleasure grouncs attached; onee the residence of Prince Potemkin, who here entertained Catherine 11. in 1784, at which date the city was founded.

It has some cloth manufactures, and an important annual wool fair. In its district are one R. Catholic, and 16 Menonito colonies; the latter came in the end of last century from the vicinity of Danzig and Elbing. 1'op. (1851), 12,117.

EKENÄS, a small seaport, Russia, Finland, prov. Nyland, on a tongue of land near the N.E. entrance of the Gulf of Finland, 60 m. S.E. Abo. It contains a church, and has manufactures of woollens, linen, and sailcloth. At its harbour, which is shallow and small, some provisions and wood are exported. Pop. (1841), 1316.

EKEROE, a small isl. Russia, Archipelago of Aland, entrance of the Gulf of Bothnia, and on the W. of Aland, from which it is separated by a narrow channel. It is about 15 m . long, by 3 m . broad, and contains a small village of its own name, at which there are a chapel and a telegraph.

EKHE, or Iga, a river, Mongolia, issues from the S. end of Lake Koussaigoul, in about lat. $50^{\circ} 28^{\prime} \mathrm{N} . ; \operatorname{lon} .100^{\circ} \mathrm{E}$.; from which it flows S.E., and joins the Selenga at lat. $48^{\circ} 30^{\prime}$ $\mathrm{N} . ;$ lon. $104^{\circ} \mathrm{E}$. It receives several considerable affluents. Entire course about 170 m .

EKHMIM, a tn. Upper Egypt. See Achmin.
EKIM KHAN, a tn. Asiatic Turkey, pash. of, and 140 m . E. Sivas, near the junction of the Kamak or Ana with the Euphrates. It has well-bnilt brick houses, and a good caravanserai, and a mosque. Pop. 1000 to 1500.

EKSJÖ, a tn. Sweden, län Snaïland, on an elevated plain, $160 \mathrm{~m} . \mathrm{S} . W$. Stockholm. It is an old place, but possesses no object of interest. The inhabitants live chiefly by agriculture and rearing cattle. There is a mineral spring in the vicinity. Pop. 1100.

EL, or Al, the only Arabic article, and signifying The. For names compounded with El not found here, seek under the second word, as El-Katif. See Katif (El).

EL-AHSA, El-IIaça, Lachsa, Lassa, and Lahissa, a fertile dist. of E. Arabia, about 90 m. S.W. Katif or ElKatif, about lat. $25^{\circ} 25^{\prime} \mathrm{N}$. ; lon. $49^{\circ} 45^{\prime} \mathrm{E}$. In former times, it was also called Hajár. The word Ahsa, which frequently occurs in Arabian geography, is said to signify a place where water, sinking through the surface of the ground, is retained beneath. El-Ahsa is separated from Katif by a sandy desert; but at the village of Júniah, within 20 m . of the former place, the scene improves, water abounds, and date plantations delight the eye. The date gardens of El-Ahsa are very extensive and productive, being well watered from wells and lakes; but the inhabitants deny the existence of any constant river running through the district and connecting the lakes. The lands adjoining the date gardens produce wheat, barley, millet, and rice. The tamarisk here attains a large size, and serves for roofing timber. The domestic industry of El-Ahsa consists wholly in weaving camelots, and making abas or overcoats; but the inhabitants derive large sums annually from the sale of camcls and of dates; and all the trade between the coast of the Persian Gulf and the Bedouins of Nejd, passes through this oasis. The Turks, at the conclusion of their war with the Wahábi (1819), occupied El-Ahsa, but soon after restored it to its original possessors, the Beni Khalid, who consented to pay a small tribute to the Porte. The whole oasis is supposed to contain a population of 50,000.-(Capt. Sadlier in Trans. of Lit. Soc. Bombay.)

EL-AlialsCh.-1, A tn. Marocco. See Araiscin-2, (or El-Areesh, or Arish), a vil., Lower Egypt, on the Mediterranean, at the mouth of the Torrent of Egypt or Wady-elAreesh, on the route from Egypt to Syria. It is simply a fort surrounded by a few houses, and is supposed to occupy the site of the ancient Rhinoclura. It was taken by the French, Feb. 15, 1799.

EL BALAD, an anc. city, Arabia, of which the ruins only now remain, on the S.E. coast, within 100 yards of the sea; lat. $17^{\circ} 1^{\prime} \mathrm{N} . ;$ lon. $54^{\circ} 12^{\prime} 30^{\prime \prime} \mathrm{E}$. The ruins are spread over a space 2 m . long, and 600 yards broad; and consist of extensive mounds of loose hewn stones, worn and blackened by long exposure to the weather. Groups of columns surmount each mound, with capitals, shafts, pedestals, and fragments of ormanental sculpture strewed around them, and occasionally troughs used for baths; all of which have been skilfully worked out of solid blocks of freestone. It is not certainly known, when, or by whom, this ancient city was built; but there is a tradition that it was founded ahout the middle of the 12 th century.

EL-BASSAN, or Al-Bassan, a th. European Turkey, prov. Albania, 64 m . S.E. Scutari, on a tributary of the Scombi; lat. $41^{\circ} 11^{\prime} \mathrm{N}$. ; lon. $19^{\circ} 56^{\prime} \mathrm{E}$. It lies in a fertile plain, is capital of a sanjak, and seat of a Greek bishop, and has some trade in iron and copper wares. Pop. 3000.

EL-BOTHER, a small, low, sandy isl. Red Sea, Arabian coast ; lat. $15^{\circ} 25^{\prime}$ N.; lon. $41^{\circ} 30^{\prime}$ E.; 3 m . N. W. Kamaran Island, about 3 m . long, E. to $W$., surrounded by a reef, which extends off the $S$. side $1 \frac{1}{2} \mathrm{~m}$.

EL-FUERTE, or Calbuco, a tn. Chili, isl. Chiloe, near its N.E. extremity, on a steep slope. It contains a large wooden church. Abreast of the town there is a good anchorage, in from 20 to 22 fathoms, muddy bottom.

ELLKASAR, a tn ., Upper Egypt, cap. of the Wah-elDakel or W. Oasis, in the Libyan Desert; lat. $25^{\circ} 40^{\prime} \mathrm{N}$. ; lon. $29^{\circ}$ E. It is the residence of a sheikh. Pop. 1200 to 1500 .

EL-KHARGEH, or Great Wany-el-Khargeh, an oasis in the desert of Upper Egypt; lat. $24^{\circ} 35^{\prime}$ to $26^{\circ} \mathrm{N}$. ; and lon. $30^{\circ}$ to $31^{\circ} \mathrm{E}$. The productions are liquorice, rice, barley, wheat, millet, clover, wild cotton, and some fruits, the doum palm, much wild senna, and a few other plants. The caravans from Darfur to Egypt pass through this oasis on their way to Siout. Slaves are also brought this way by 'Takroorees, who are blacks, from the interior of Africa, and Moslems. At the distance of about 13 m . from the hills that bound this oasis on the E., stands the town of the same name, in the vicinity of which are the ruins of the great temple of El-Khargeh, about 142 ft . long, by 63 broad, and about 30 ft . in height. There are many other interesting ruins around. Pop. of the oasis estimated at 4290 ; of which 3000 are in the town of El-Khargeh.

EL-KOS, a beautiful river, Marocco, near the N.W. extremity of the empire, rises in a mountain-range in the interior, from which it flows W., and enters the Atlantic at El or Al-Araisch; lat. $35^{\circ} 12^{\prime} \mathrm{N} . ; \operatorname{lon} .6^{\circ} 8^{\prime} \mathrm{W}$. It flows through a fine valley; its banks are fertile, and adorned with many gardens; whole length, about 40 m .

EL-OBEID, cap. Kordofan. See Obeid.
El-OOS, an isl. Asiatic Turkey. See Eluce.
EL-TYH (Desert OF), Arabia, comprising the extensive tract lying between the upper or N. parts of the gulfs of suez and Akaba, or between lat. $32^{\circ} 38^{\prime}$ and $35^{\circ} \mathrm{E}$. It is traversed by the Egyptian caravan route to Mekka.

ELBA [the Ilva of the Romans; the Etalia of the Greeks; French, Elbe], an isl. Mediterranean Sea, belonging to the Grand Duchy of Tuscany, from the coast of which it is separated by the strait of Piombino, about 6 m . wide. It lies 30 m . W. the N. end of Corsica; lat. (N. extremity, Cape Vita) $42^{\circ} 52^{\prime} 30^{\prime \prime} \mathrm{N}$. ; lon. $10^{\circ} 25^{\prime} \mathrm{E}$. (k.); and is 17 m . E. to W., by 12 m . N. to $S$. at its E., and 6 m . at its W. end. It is traversed in its whole length by mountains, attaining a height of 3335 ft ., and its coasts are bold and very sinuous, forming some good harbours, the best of which is that of Porto Ferrajo, on the N. coast. The climate is healthful and mild; the soil rich and fertile in the valleys, still agriculture is much neglected. Though seven-eighths of the island might be under cultivation, and three-fourths in grain and vines, yet five-eighths are covered with wood, and only three-eighths are under tillage. The grain produced does not suffice for more than three months; wine is superabundant and good; in fact, vine culture, fishing-chiefly tunnies, sardines, and anchovies -and iron-mining, constitute the chief wealth of the inhabitants. Among the numerous kinds of fruit and other trees which flourish here, may be named the date-palm, aloe, almond, fig, orange, citron, chestnut, olive, \&c. Iron abounds, but there is only one mine in operation; travertine, limestone for building and for burning, bole and potter's clay, are wrought, and, to a limited extent, fine granite and marble. Marine salt and medicinal salts are made; there are about 50 limekihs; and some little vinegar, brandy, straw-hats, common pottery, leather, and cottons, are manufactured. Public instruction is much neglected; but, in 1842 , there were 15 sclools. It is divided into four communes - Porto-Ferrajo, Marciana, Porto-Longone, and Rio.

Elba has often changed masters; Etruscans, Carthaginians, and Romans, having become paramount in turn in its earlier days. During the Middle Ages, it belonged to the Pisans; to these succeeded the chiefs of Milan and Piombino. In 1548, the Eniperor Charles V. ceded the territory of Porto-Ferrajo
to the Grand Duke of Tuscany. In 1596 , Philip III. of Spain took and fortified Porto-Longone. Till near the close of the 18th century, the island was shared between the Neapolitans (who had succeeded to the Spaniards in 1759) and its feudal suzerains, the lords of Piombino. From July, 1796, till A pril, 1797, it was in possession of the British forces. It was ceded to France, by the treaty of Amiens, in 1802 ; but reunited to Tuscany in 1807. The treaty of Paris, in 1814, erected Elba into a sovereignty for Napoleon, who resided in it from May 3,1814, to February 26, 1815; and, after his second abdication, it reverted to Tuscany. P. (1853), 21,163.

ELBE (THE), [anc. Albis; Bohemian, Labe; Dntch, Etve], a river of Germany, one of the largest in Europe. It rises on the S.W. slopes of the Schneekoppe or Snoweap, one of the highest mountains of the Riesen-gebirge, which separates, in part, Bohemia from Silesia, at a height of 4440 ft . above sea level; lat. $50^{\circ} 47^{\prime} \mathrm{N}$. ; lon. $15^{\circ} 40^{\prime} \mathrm{E}$. From this point it flows nearly due S. into Bohemia, through a narrow and wild valley, passing Königgrätz, to lat. $50^{\circ} 3^{\prime}$ N., about 50 m ., when it turns to the W., and having held on that course to lon. $15^{\circ}$ E., about 40 m ., takes a general N.N.W. direction till it falls into the North Sea, in lat. $53^{\circ} 55^{\prime}$ N., lon. $8^{\circ} 55^{\prime}$ E., intersecting Saxony, a considerable portion of Prussia, part of Hanover, and, in the latter part of its course, separating the duchy of Holstein from Hanover, the former being on the r., the latter on the 1 . The entire length of the river, including windings, is upwards of 780 m ., direct distance, about 395 m . The tract of country through which the river passes has been divided into two different and well defined basins, namely, the basins of the Upper and Lower Elbe, the former being a plateau surrounded by mountains; and the latter a country entirely of plains, and of twice the extent of the former. The basin of the Upper Elbe, which comprehends nearly the whole of the kingdom of Bohemia, is a hollow space excavated out by the waters of the Elbe, and the Moldau, a species of circus, the interior of which is covered by the low ramifications from the mountains that surround it, and which decrease in elevation as they approach the centre; the two S. sides of this space are formed by the Forest of Bohemia [Böhmerwald], and by the mountains of Moravia; the two N. sides by the Riesen-gebirge and the Erz-gebirge. This basin, which is, for the most part, ill cultivated, and thinly peopled, at the same time possesses vast forests, very extensive iron mines, and a celebrated breed of war horses; its roads are few and bad, and their collective length does not exceed 870 m . The basin of the Lower Elbe is composed almost entirely of plains and of sands, covered with forests, morasses, and small lakes; but slightly fertile, yet well cultivated, well peopled, and having the advantage of extensive communication. The principal affuents of the Elbe are, on the right, the Iser, Schwarz-Elster, and Havel; on the left, the Alder, Moldau, Eger, Mulda, and Saal. In the lower part of its course, namely, between Harburg on its left bank, and Hamburg and Altona on its right, the river is divided into several arms by five large and seven small islands; these arms, however, unite again in a single channel at Blankenese, about 5 m . below Hamburg. Between the two latter places the land rises in gentle slopes, covered with wood, and studded with handsome villas and gardens. A similar scene presents itself on the r. bank, above Dresden, where picturesque hills ascend from the edge of the river, topped with luxuriant woods, while their lower slopes, turned to the southern sun, are covered with vineyards, and form a continuation of the Saxon wine district. The mean depth of the Elbe is 10 ft ., and its average breadth 900 ft ., but it widens at some points to upwards of 1000 ft ., and at its mouth to 5 or 6 m . It is navigable for about 470 m ., but its navigation is much impeded by the lowness of its bed, the greater part of its course being only from 150 to 300 ft . above sea level. Its estuary at Cuxhaven is also much encumbered with sandbanks. It is well stoeked with fish, particularly salmon, eels, and sturgeon.- LLavallée's Military Topography; Johnston's Physical Atlas; Murray's Hand-book, \&e).

ELBERFELD [Dutch, Elbervelle], a tn. Prussia, gov. of, and 15 m. E. Dïsseldorf, cap. circle of same name, in the beautiful valley, and on both sides of the Wupper, enclosed by lofty hills. The older part of the town contains a number of good houses; but, on the whole, is poorly as well as irregularly built; the newer part is handsome and lighted with
gas. Taken in connection with Barmen, whieh is properly a continuation of it, it stretches along the valley, forming an almost continuous street of 6 m . It owes its prosperity to the cotton manufacture, of whieh it is the central locality in Rhenish-Prussia, and has aequired the greater part of its importance during the present century. It thus has no buildings which excite interest by their antiquity; and few of any kind much teserving of notice. The most conspieuous are the townhouse, the great hall of which is adorned by numerous frescoes, of an allegorical character, by modern artists; three parish churches, one of them a handsome strue ture, in the Byzantine style; a museun, a gymnasium, with a library and mathematical and physical cabinet, an exchange, a theatre, an industrial and several burgher schools, a savingsbank, and infirmary. The hill of Hardt, in the neighbourhood, surmounted by a belvidere, from which a fine view of the valley is obtained, and surrounded with richly laid out gardens, furnishes an excellent promenade. In addition to the cotton manufacture, which, under a variety of forms, is the great staple of the town, linen, woollen, silk, and mixed silk goods, ribbons, and velvet are extensively made, and largely exported. There are also numerous mills for spinning cotton twist, linen sarn, and worsted, and dye-works, celebrated for the richness of their colours. The environs are alnost covered with bleachfields. Elberfeld is the seat of a mercantile and other courts, and possesses a chamber of commerce, a harmonic and several other societies. Pop. (1846), 38,249.-_The CIncle, area, 88 geo. sq. m. is a plain, much broken by hills, and well covered with wood; but, in general, ill-adapted for agriculture. The far greater number of the inhabitants are engaged in mannfactures. Pop. 124,736.

ELBERTON, par. Eng. Gloucester; 1420 ac. Pop. 190.
ELBEUF, or Elbeuf, a tn. France, dep. Seine-Inférieure, 11 m. S.S.W. Rouen, and about 4 m . from the Paris and Rouen railway. It is beautifully situated in a picturesque vadey, l. bank, Seine; its newer streets are wide and handsome, some of them opening into a spacious area, bordered with chestnut trees, called the champ de foire; and it has eight artesian wells, with six well-supplicd public fountains; and is lighted with gas. There are two parish churchesSt. Stephen's and St. John's ; the former, a fine Gothic edifiec, with some rich old stained glass; the latter, of similar eharacter, and larger, but less ancient. It is the seat of a tributary of commerce; a cousultative board of manufactures, and a conneil of prudhommes. Elbeuf is chicfly noted for its spinneries, numerous factories, dyeworks, \&c.; for the manufaeture and finish of woollen cloths-being the third town in France for this speeies of manufacture. A rivulet, which traverses the place, in several windings, called the Puchot, is usefully employed in these operations; and in fulling, washing, \&e. Generally speaking, the highest-priced French cloths are not made here; but lighter woollens, such a* zephyrs, habit cloths, ehequered stuffs, fine coloured flannel fabries, mostly for China, biiliard table covers, and all sorts of fancy goods, made to a great extent. Elbeuf is also an entrepôt for the better cloths of Louviers and Sedan ; and for the wool of Spain, Italy, Germany, and England. Soap, chernical stuffs, oils, and all sorts of machinery for the woolleu manufactures, are likewise made. It has also some trade in grain and timber; and daily trafine by steamer with Paris, Ronen, and Le Havre. Flbeuf is an old town; and as early as the 16th ceutury, had 80 eloth manufactories; but its importance as a great exporting eloth mart, dates from about A.d. 1720 Pop. (1831), 10,258; (1845), 16,010.

ELBING [Polish, Elbiag], a tn. Prussia, gov. of, and 32 m. E.S.E. Danzig, cap. cirele of same name, on the Elbing, a navigable stream, which falls a little below into the Frisehe Haff, and communicates by a canal with the Nogath, an arm of the Vistula. It is surrounded by lofty turretted walls, with five land, and two water-gates, is defended by two forts, and consists of the Old and New Towns; three inner and 11 onter suburbs. In the Old Town the streets are narrow, and hemmed in and darkened by lofty houses; in the new town, the streets are generally spacious, and the houses well and uniformly built. The public buildings and establishments include one R. Catholic, and eight Protestant churches, a synagogue, gymnasium, and numerous parish schools, five hospitals, a convent for poor ladies, a poorhouse, house of industry, and several other benevolent institutions. The manu-
factures consist chiefly of soap, tobacco, refined sugar, ehicory, and vitriol. There are also building-yards, at which a considerable number of vessels are built or repaired. The trade has recently increased, and threatens to come into formidable competition with that of Danzig. Elbing is the seat of a law court and several public offices. It is always garrisoned by a body of hussars. Steamboats sail daily for Königsberg. Pop. (1846), 22,246.——The circle, area 207 geo. sq. m., is flat, fertile, and tolerably well wooded. Pop. 53,657.

ELBINGERODE, a tn. Hanover, gov. Hildesheim, cap. bail. of same name, on the Rohbach, which here falls into the Bude, 13 m . W. Quedlinburg. It oceupies a bleak and naked site, about 1500 ft . above the sea, consists of one long street, is the seat of several public offices, contains a chureh, and an old eastle; and has extensive iron mines and blast furnaces in its vicinity. Pop. 3051.

ELBOGEN, Ellbogen, or Elnbogen, [elbow], a ti. Bohemia, cap. circle of same name, situated on a steep, rocky promontory, round which the Eger, here crossed by a chain bridge, makes an elbow-like bend, to which the town owes ita name, 74 m . W. by N. Prague. It is surrounded by old walls, and defended by two forts; and is, in general, well built, and contains eight eliurches; one of them a handsome Gothie structure; an old castle, finely situated, but now ruinous, and used only as a prison; a townhouse, in which a large mass of meteoric iron is preserved; and a courthouse, in which the meetings of the circle are held. The only manufacture of importance is porcelain, of which there is an extensive factory in the suburbs. Pop. 2000.-The circle, area, 828 geo. sq. m. is fertile, and well-adapted for agrieulture; it is also rich in minerals, and contains seams of coal. Pop. 249,800.

ELBURG, a maritime tn. Holland, prov. Gelderland, on the Zuider Zee, 33 m. N. by W. Arnhem; lat. $52^{\circ} 26^{\prime} 56^{\prime \prime} \mathrm{N}$. ; lon. $5^{\circ} 50^{\prime} \mathrm{E}$. It forms a walled parallelogram, with towers at the four corners; and is surrounded by a diteh, now used for steeping hides, flax, \&c., while the wall is chiefly a defence against the sea. It is traversed by the Oostbeek, over which are five stone bridges, on some of which are markets; and is so regularly built, that from the centre of the town the four gates, one on cach side, may be seen. It has an old and a new townhouse, a Reformed church, and a synagogue; some benevolent institutions, and several schools. Besides agriculture and eattle-rearing, the ehief occupations are fishing, espeeially of herrings; tanning and ropemaking. P. 2100.

ELBURZ, or Elbnuz.-1, A range of mountains, Central Asia, occupying a middle position between the Anti-Taurus and the Kuen-lun, and forming the connecting range by which these two systems are united. The Elburz pursue a course nearly E. and W., skirting the S. shores of the Caspian, and stretehing E. to the highlands of Merghab, in the N. W. part of Afgbanistan. This mountain tract, irregular in slape, and spreading out in some parts to a breadth of full 200 m ., is divided longitudinally into ridges, separating valleys which communicate with each other by passes or defiles, and form an extensive aggregate of districts, many of which are well inhabited and cultivated. One of the loftiest peaks is Demavend (which see).-2, The culminating peak of the Caucasus mountains (which see).

EICHE [anc. Allici], a populons tn., Spain, Valencia, prov. of, and 14 m. W.S.W. Alicante, l. bank, Vinalapo or Eleha, crossed here by a substantial stone bridge. It was formerly surrounded by walls, flanked by towers, and a fosse, some vestiges of which yet remain. In general, the streets are wide, clean, well kept, and lined with well-built houses and handsome public buildings; and there are nine squares, of which the Plaza Mayor, containing the spacious townhouse, erected about the middle of the 15 th century, is the largest; and some of the others are surrounded with fine buildings, and have agreeable publie walks. Elehe has three parish churehes. That of Santa Maria is a noble structure, in the composite order, having a majestic dome, five gates, a famous organ, and a great variety of statues, pictures, monuments, \&e., of considerable merit; those of San Salvador and San Juan Bautista are large, and have tastefully decorated interiors. There are, besides, numerous chapels and three convents, one of which is now converted into an hospital; a college, 11 sehools, two prisons, an excellent market-house, and fish market, several store houses, cavalry barracks, ceme-
tery, an extensive feudal palace of the Duke of Arcos, a second of the Counts of Altamira, a third Episcopal ; and in the environs, near the cavalry barracks, an old square fortress, called La Torre, belonging to the Marquis of Carrus. Manu-factures:-linen, woollen, and cotton fabrics, soap, brandy, wine, oil, cigars, hardware, and implements of husbandry. Considerable trade in grain, fruits, barilla, soap, soda, cattle, rice, and wool. Elche contains numerous Roman remains. It suffered considerably in the Peninsular war; and was occu pied by the Carlist general Forcadell in 1837. Pop. 18,060.

ELCHE-de-la-Sierra, a tn. Spain, New Castile, prov. of, and 35 m. S.S.W. Albacete. It has a church, handsome townhall, prison, and two schools ; manufactures of linen, woollen, and hempen fabrics, wine, and oil; and trade in hemp, esparto, silk, grain, and cattle. Pop. 3039.

ELCHINGEN (Ober), a vil. Bavaria, Swabia, r. bank, Danube, 9 m . N.E. Ulin. The Austrians were here defcated by the French under Marshal Ney, who was rewarded by Napoleon with the title of Duke of Elchingen. On a neighbouring heightstand the handsome buildings of an old Benedictine abbey.

ELDA [Latin, Adellum], a tn. Spain, Valencia, prov. of, and 23 m . N.W. Alicante, on a gentle eminence, above l. bank, Vinalapo or Elcha. The houses, generally of two or three stories, are substantially built; and two squares, and a few modern streets, are regular and spacious; but the old streets, forming the greater number, are narrow and

triad figure in the temple of elephanta.-from Ousele's Travels. winding. All the streets are clean. The principal buildings are the parish church, town house, Franciscan monastery, prison, hospital, and a large old castle, in a very dilapidated state. The manufactures consist of paper, and articles of esparto, in both of which there is a considerable trade. Weekly market, and a large annual fair. Pop. 3846.

ELDAGSEN, a tı. Hanover, gov. Calenberg, near r. bank, Haller, $15 \mathrm{~m} . \mathrm{S} . \mathrm{S} . \mathrm{W}$. Hanover. It consists of the town proper and two suburbs, is entered by two gates, contains a church and a townhouse; and has manufactures of starch, tileworks, and two mills. There is a sulphureous spring in the vicinity. Pop. 2210.

ELDE, a river Mecklenburg-Schwerin, which, rising in lake Müritz, forms lakes Kölpin. Flesen, Malchow, and Plau, flows W. by S, receives the waters of lake Schwerin on the right, and falls into the Elbe at Dömitz, about 62 m . S.E. llamburg. Total course, 94 m .

ELDEN, a vil. Holland. See Eist.
ELDERSFIELD, par. Eng. Worcester; 3400 ac. P. 837.
ELDERSLIE, or Elleerslie, a vil. Scotland, co. Renfrew, $2 \frac{1}{2} \mathrm{~m}$. N.N.E. Paisley; inhabitants principally employed in weaving and cotton spinning. Sir William Wallace, the Scottish patriot, was a native of Elderslie. Pop. 1086.

ELEK, two places, Hungary:-1, A vil. Thither Theiss, co. Arad, about 15 m . from Simand. It contains a R. Catholic parish church, and is inhabited almost entirely by Germans. Pop. 2314.-2, (Szent-Elek, or Stegersbach), a vil. Thither Danube, co. Eisenburg, on the borders of Styria, 23 m . S.W Giuns. It stands among low hills, and contains a parish church. Pop. 1725.

ELEMER, a vil. Hungary, Banat, co. Torontal, 9 m . N.W. Nagy-Becskerek. It contains a handsome Greek nonunited church. Pop. 2773.

ELEPHAN'TA [native name, Gerapori], a small isl. IIndoostan, W. coast, in the Bay of Bombay, 7 m . E. from the castle, and 5 m . from the mainland; lat. $18^{\circ} 57^{\prime}$ N.; lon. $73^{\circ} \mathrm{E}$. It is about 5 m . in circumference, and consists of two long hills, with a narrow valley intervening. It is much overgrown with wood, but has several springs of grod water. The inhabitants cultivate rice, but are principally employed
in rearing sheep and poultry for the Bombay market. This island has obtained great celebrity from its remarkable cavetemple, and its innumerable mythological figures, some of them of gigantic proportions. The cave is 130 ft . long, 123 ft . broad, and 18 ft . high, supported by pillars cut out of the rock, many of which were broken down by the Portuguese, while the island was in their possession, leaving capitals attached to the roof without their supporting pillars, and columns split, and without capitals, \&c. It rests on twenty-six pillars and sixteen pilasters; but neither the roof nor the floor being a plain, the height varies from 17 ft . to $15 \frac{1}{2} \mathrm{ft}$. There are eight pillars and pilasters in a line, from the N. to the S. ., and from the E. to the W. entrances. In the centre is a
irregular shape, and, like most of the other islands of this group, long and narrow. Its length is about 70 m ., breadth from 2 to 4 m ., extending at one particular point to 10 m . Pop. 1220.

ELEUTIIEROPOLIS, a great and anc. city, Palestine, supposed to have stood on the site of the modern village Beto-Gabra, or Beit-Jibrin, in the S.W. plain of Judea, 14 m . N.W. Hebron, and $20 \mathrm{~m} . \mathrm{S}$.W. Jerusalem. In and around this village are extensive and massive ruins of different ages. They consist principally of the remains of a fortress of immense strength, encompassed by a very ancient and strong wall, built of large square stones, uncemented; an irregular ancient castle, numerous massive vaults, with fine round arches. Remains of ancient walls and dwellings, and of a church, exhibiting strong and beautiful masonry.

ELFDAL, a vil. Sweden, dist. of, and 70 m . N.W. Falun, amid well-wooded and picturesque scenery, 1. bank, Dal, which here forms numerous falls and cataracts. The chief objects of interest are the perphyry quarries in the vicinity, and the royal manufactory, at which a great variety of articles in porphyry, including slabs, vases, basins, and boxes, of great beauty and exquisite finish, are made and largely exported. There is a mineral spring here.

ELFORD, par. Eng. Stafford; 1840 ac. Pop. 434.
ELFSBORG, or Wenersborg, a län or co. of S.W. Sweden, bounded, N. by Carlstad län, E. Lake Wener and Skaraborg län, S.E. Jönköping, S. W. Halınstad, and W. Göteborg or Gothenburg; and between lat. $57^{\circ} 10^{\prime}$ and $59^{\circ} 20^{\prime} \mathrm{N}$.; and lon $11^{\circ} 50^{\prime}$ and $13^{\circ} 45^{\prime}$ E.; area, 2352 geo. sq. m. In the N. districts it is hilly, rocky, rich in iron, copper, and slate, and well wooded. In the S. parts it is more undulating, a zone of comparatively level and fertile lands stretching W. to E., from Göteborg to Skaraborgs län. Many parts also are marshy, and full of small lakes, frequented by numerous waterfowl. Streams are abundant, and the general drainage is to the Kattegat. Besides the minerals already named, all of which are wrought, building stone, lime, and clay are found in the $S$. parts. Good crops of rye, oats, potatoes, turnips, pulses, \&c., are produced ; cattle-rearing is successfully pursued: and manufactures of various kinds, ineluding cloths and cutlery, flourish. Pop. (1840), 209,572.

ELGG, a vil. and par. Switzerland, can. of, and 18 m . N.E. Zürich. It stands in a pleasant and fertile district; was once surrounded by walls, of which only some traces now remain; is tolerably well built, and contains a large parish chureh, several schools, and a very ancient castle, situated on a height. There are glass works, and coal is worked to some extent in the vicinity. I'op. 1038.

ElGIN, or Elginshire, formerly Morayshire, a N. maritime co. Scotland, bounded, N. by the Moray Firth; W. by Nairnshire ; E. and S.E., by Banffshire ; and S., by Inver-ness-shire ; about 40 m . in length, N . to S. ; and 8 to 23 m . in breadth; area, 840 sq. m. or $536,600 \mathrm{ac}$., of which 120,000 are under cultivation. Along the sea coast, the surface is tlat, but inland it rises into hills of moderate elevation, intersected by fine and fertile valleys. The coast line, which extends upwards of 30 m ., presents, in the middle portion, bold precipitous rocks of sandstone, with a few detached masses, while the two extremities are for several milcs formed of vast mounds and raised beaches of sand and gravel. The chief rivers are the Spey, Lossie, and Findhorn, all remarkable for their romantic and picturesque scenery, particularly the Findhorn, in which, and the Spey, there is also good salmon fishing. There are several loclis in the county, having fine scenery, and abundance of excellent trout. The rocks in the S . consist of granite, felspar, rock-crystal, mica, slate, sandstone, and gravel. The banks of the Spey, towards its mouth, exhibit secondary rocks of red sandstone, which extend $E$, throughout the N. plain of the county. Many large and inexhaustible quarries of freestone are worked, especially near the coast. There are also some slate quarries, but neither coal, nor any metallic ores occur, while lime, even for agricultural purposes, has to be imported.

The climate is noted for its general mildness, dryness, and salubrity. The soil on the low level tract of land which stretches along the entire coast, with a breadth varying from 5 to 12 m ., is, with exception of some sterile lands close by the sea, very fertile, and is occupied by cultivated fields, of which wheat is now the staple production, although of only
comparatively recent introduction. In other parts of the county oats are the chief crop. Barley, beans, peasc, clover, grasses, potatoes, and turnips, are also grown, but, excepting the last two, to no great extent. Turnip husbandry has only been lately adopted, but has been attended with great success. The great majority of farms is small, ranging from 50 to $100 \mathrm{ac} .$, although they sometimes reach 300 ac ; leases almost universally nineteen years. In the hilly districts there are extensives pastures, where considerable numbers of blackfaced sheep are bred, the Cheviots and Leicesters forming the chief stock on the less elevated lands. The breed of native cattle has been improved by importations from Skye, Aberdeen, and Argyle, and those of horses and swine have also been greatly bettered of late years. But a great portion of the surface of the S . and ligh lands is atill covered with native forests, or with uninclosed commons of furze and breom. The exports from the county are corn, timber, whisky, and salmon. The county unites with Nairnshire in returning one member to the House of Commens. Prineipal towns and villages-Elgin, the county town, Forres, Fochabers, and Burgbead. Pop. (1851), 38,959; increase since 1841, 3947.

ELGIN, a royal bor. and market tn. Scotland, cap. co. Elgin or Moray, on the Lossie, about 5 m . from its influx into the Moray Firth, 116 m . N. Edinburgh. It is pleasantly situated in a fertile valley, consists chiefly of one spacions, well paved, prineipal strcet, lighted with gas, nearly a mile long, and a number of narrew lancs. The principal public buildings are the parish church, in the eentre of the main street, a beautiful Grecian edifiee, with a richly ornamented cupola and a doric portico ; Grey's Hospital, the Elgin Institution, the academy, assembly rooms, the Trinity Episcopal chapel, the R. Catholic chapel, several other chapels and churches, including one Established, one Free, two U. Pres byterian, one Episcopal, an Independent, and a Baptist; the jail, and courthouse. The most interesting architectural object in the town, however, is the cathedral, now in ruins, but once the most magnificent in Scotland. Of this venerable building, 'The Lanthorn of the North,' as it wa called, there remains some splendid fragments only. Its entire length was 282 ft . by 86 ft . broad, the transept was 115 ft . in length, and the tower which rose from its centre, 198 ft . high. Its foundation stone was laid by Bishop Andrew Moray, July 19, 1224. It was plundered and burned in 1390 , by the 'Wolf of Badenoch,' Alexander Stewart, son of Robert II.; again, in 1402, by Alexander, third son of the Lord of the Isles; and again, in 1568, when its leaden roof was stripped off by order of the Regent Murray and his conncil, since which period it has gradually fallen into its present state of decay. There are 10 schools in the town, including the Elgin academy, already alluded to; an extensive circulating library, a literary association, a reading reom, dispensary, pauper lunatic asylum, and some minor charities.

The only manufactures in the town are a woollen cleth manufactory, a tannery, and some brewerics, but it has a considerable trade in grain, butter, and other farm produce; 10 eattle fairs annually. It unites with Cullen, Banff, Peter head, Kintore, and Inverurie, in sending a member to the House of Commons. Pop. (1841), 3911. Area of par. 18 sq. m. Pop. (1851), 6334.

ELGOIBAR, a tn. Spain, prov. Guipuzcoa, 22 m . E. by S. Bilbao, r. bank, Deva. It has a parish chureh, some chapels, two schools, a townhall, prison, hospital, cemetery, iron works, an extensive cannon foundry, and manufactory of swords and cutlery. Trade in wool, sheep, and horned cattle. Pop. 2000.

ELGORAB, a small isl. in the Red Sea, near the coast of Arabia ; lat. $16^{\circ} 8^{\prime} \mathrm{N}$.

ELGUE'TA, a tn. Spain, prov. Guipuzcoa, on an elevated plateau, $30 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. St. Sebastian. It has a parish church, townhouse, with prison attached, two schools, and some manufactures of linen, and ironware. Pop. 1517.

ELHAM, a par. and tn. England, co. Kent; area, 6240 ac . The town, $8 \frac{1}{2} \mathrm{~m}$. S. Canterbury, is in general neatly built of brick, has a spacious parish church, places of worship for Wesleyans, and Bryanites; an endowed school, and several annual cattle markets. Pop. 1291.

ELIIENITZ, or Lienicse, a market tn. Bohemia, circle, Prachin, on a height among mountains and forests, $23 \mathrm{~m} . \mathrm{S}$. Pisek. It has a parish church, a chapel, and two mills. P. 1218.

ELIANGOODY, a large vil. S. Ilindoostan, Carnatic, 32 m . S. by W. Tanjore. It is neatly built, and populous.

ELIAS (Mount St.)-1, A lofty mountain, N. America, N.W. coast, on the line of demarcation between the British and Russiars territories; lat. $60^{\circ} 18^{\prime} \mathrm{N}$. ; lon. $140^{\circ} 52^{\prime} \mathrm{W}$. (n.) It forms the N. termination of the coast range of the Sea Alps, and is the culminating point of the whole N. American system; height, $17,860 \mathrm{ft}$. above sea level. Its appearance is magnificent, towering majestically above a crowd of snowclad peaks of lesser, but still of great elevation.-2, The highest peak of the isl. of Santorin, Grecian Archipelago, at the S.E. extremity of the isl.; lat. $36^{\circ} 22^{\prime} \mathrm{N}$. ; lon. $25^{\circ} 28^{\prime} 45^{\prime \prime}$ E. (R.) It is of limestone or marble formation, and is 1887 ft. high.-3, [anc. Taygetus], A peak, Morea, 10 m . S.W. Mistra, $7829 \mathrm{ft}-4$, [anc. Ocha], A peak, isl. Eubœa, Grecian Archipelago, near the S.E. extremity of the island, 4607 ft . ligh.- 5, A peak, S. part of isl. Egina, 1752 ft . high.

ELIE, a seaport, vil. and par. Scotland, co. Fife. The village, at the head of a small bay, l. bank, Firth of Forth, 9 m. S. by W. St. Andrews, has two straight and tolerably well-kept streets ; a parish, and a Free church, a Congregational chapel, two schools; a well-situated, but greatly neglected harbour; and some coasting trade in coals and agricultural produce. Elie is much resorted to during summer for sea-bathing; and is the birth-place of James Horsburgh, the hydrographer. Area of par. $2 \mathrm{sq} . \mathrm{m}$. Pop. (1851), 826. -(Local Correspondent.)

ELING, a vil. and par. England, Hants. The viliage, at the head of the Southampton water, $12 \frac{1}{2} \mathrm{~m}$. S.S.W. Winchester, has an ancient church of stone and flint, with a square tower; and is the seat of a brisk trade in corn, coal, and timber. The parish contains a considerable portion of the New Forest. Area, 14,950 ac. Pop. 5410.

ELIS.-1, A dist. anc. Greece, N.W. coast, Morea, forming, with the anc. dist. of Achaia, a modern nome of that kingdom (see Achaia).-2, The anc. name of the former cap. of the district of Elis, now called Palæopoli (which see).-3, The name of a small river in the same district, an affluent of the Hiaco Peneus.

ELIZABETGRAD, or Ielisawetgrad, a tn. Russia, gov. of, and 180 m . N. by W Kherson, cap. circle of same name, in a plain on the Ingul. It consists of the fortress, surrounded by six bastions, of the town proper, which is bailt with the greatest regularity; and has spacious streets, several of them lined with trees; and of four suburbs. It contains five churches and a large hospital ; carries on a considerable general trade; and has an annual fair, which is one of the most important in the government. Elizabetgrad is the head-quarters of the military colonies on this side the Bug. Pop. 12,000.——The circue has, in the N., an undulating surface, and almost throughout a rich fertile soil, is watered by the Ingul and several other streams, and is well-wooded, having forests, in which the bear is not uncommon.

ELIZABETH, numerous places, U. States, including -1, A vil. N. Carolina, 144 m . E. by N. Raleigh, on the Pasquotank, about 20 m . from its mouth. It has a courthouse, and exports shingles, staves, and pitch-pine lumber to the W. Indies. Pop. about 2000.-2, A tn. New Jersey, 44 m . N.E. Trenton. It has a courthouse, jail, and five churches. Pop. about 2500.

ELIZABETH ISLAND.-1, An uninhabited isl. Strait of Magalhaens; lat. (N.E. point), $52^{\circ} 50^{\prime} \mathrm{S}$. ; lon. $70^{\circ} 30^{\prime} \mathrm{W}$. It is long; and, compared with the adjacent land, low, not being more than 200 to 300 ft . high. It is composed of narrow ranges of hills, extending in ridges in the direction of its length, over which are strewed boulders of various rocks, two kinds-greeustone and hornblende-being the most common. The valleys which divide the hilly ridges are well clothed with grass. Geese and wild ducks are numerous. -2, An isl. S. Pacific Ocean, 120 m . N.E. Pitcairn's Island; lat. $24^{\circ} 0^{\prime} 2^{\prime \prime}$ S. ; lon. $124^{\circ} 45^{\prime} \mathrm{W}$. It is 5 m . long, 1 m . broad, and thickly covered with shrubs and small trees. The island is composed of dead coral, more or less porons, elevated in a flat surface to the height of $80 \mathrm{ft} .-3$, One of the Admiralty Islands, S. Pacific Ocean; lat. $2^{\circ} 55^{\prime}$ S. ; lon. $146^{\circ} 49^{\prime}$ E. (R.)-4, One of the Marshall Islands, N. Pacific Ocean; lat. (S. point), $5^{\circ} 48^{\prime}$ N. ; lon. $169^{\circ} 36^{\prime}$ E. (R.) - 5 , One of the Society group; lat. (E. point), $15^{\circ} 58^{\prime} \mathrm{S}$. ; lon. $145^{\circ} 48^{\prime} \mathrm{W}$. (e.) -6, A group of 16 small isls. U. States, Massachusetts,
S.E. side Buzzard's Bay, between lat. $41^{\circ} 24^{\prime}$ and $41^{\circ} 32^{\prime} \mathrm{N}$. : and lon. $70^{\circ} 38^{\prime}$ and $70^{\circ} 56^{\prime} \mathrm{W}$. Two of them only aru inhabited.

ELIZABETH (CAPE).-1, U. States, Maine; lat. $43^{\circ} 33^{\prime}$ $36^{\prime \prime} \mathrm{N}$. ; lon. $70^{\circ} 11^{\prime} 30^{\prime \prime}$ W. (R.) - 2 , Russian America, E. of the entrance to Cook's Inlet ; lat. $59^{\circ} 9^{\prime} \mathrm{N}$. ; lon. $151^{\circ} 18^{\prime} \mathrm{W}$. (R.) - 3 , Chinese empire, N.E. extremity of Saghalin Island, Sea of Okohtsk; lat. $54^{\circ} 24^{\prime}$ N.; lon. $142^{\circ} 47^{\prime}$ E. (r.)

Elizabeth (Port). See Port Elizabeth.
ELIZABETHPOL, or GANJA, a tn. Georgia, dist. of same name, 90 m. S.E. Tiflis ; lat. $40^{\circ} 42^{\prime}$ N. ; lon. $46^{\circ} 20^{\circ}$ E. It consists of three parts, one of which is fortified by a bastioned wall, built by the Turks. It contains four Armenian churches, and one belonging to the Georgian Greeks, 11 mosques, several caravanserais, about 2000 houses, and 1300 fruit gardens, or vineyards. The chief occupations of the inhabitants of the town, and of the district in which it is situated, are horticulture, the care of silkworms, bees, and cattle, besides farming and mining. Pop. 8258, of which 4230 are Tartars, and 4028 Armenians.--The district contains nearly 1650 sq. m., consisting in part of the mountainous tract near Ganja; this is followed by hilly slopes, and these terminate in plains. The soil varies, being in places sandy, or stony; but it is more generally of black earth. The climate varies between the extreme cold of the mountainous districts, and the powerful heat of the plains. The mountains contain alum, iron, and some gold; also forests, in which a particular sort of poplar grows to an immense size. Domestic animals are numerous. Madder, tobacco, cotton, linen, grain, \&c., are cultivated, and garlic and asparagus grow wild.

ELJAS, a tn. Spain, Estremadura, prov. of, and 58 m . N.N.W. Caceres, in a mountainous district, near the borders of Leon. It has steep, narrow, and uneven streets; a parish church, chapel, townhall, prison, school, storehouse, cemetery, and four copious fountains. The inhabitants are chiefly engaged in weaving linen, cultivating grapes, olives, chestnuts, flax, and vegetables; and in rearing cattle and mules. Trade in oil, flour, linen, soap, and other necessaries. P. 2739.

ELK.-1, A name given to the Athabasca river, during the latter part of its course (see Atilabasca).-2, A navigable river, U. States, Tennessee. It flows S.W., and falls into the Tennessee river, in Alabama.- 3 , A navigable river, U. States, Pennsylvania.-4, A small strcam, U. States, Maryland, which falls into the Chesapeake; lat. $39^{\circ} 30^{\prime}$ N.; lon. $76^{\circ} 8^{\prime} \mathrm{W} .-5$, A river, U. States, Virginia, which falls into the Kanhaway; lat. $38^{\circ} 9^{\prime} \mathrm{N}$.; lon. $81^{\circ} 48^{\prime} \mathrm{W} .-6$, Two small rivers, U. States, Minisotah territory, the one falling into the St. Peter's, near its junction with the Mississippi, in lat. $44^{\circ} 50^{\prime}$; the other joining r . bank, Mississippi, in lat. $45^{\circ} 50^{\prime}$ N.-7, One of the small lakes connecting the Lake of the Woods with Lake Superior.

ELKINGTON, three pars. Eng.:-1, Northampton; 1720 ac. Pop. 46.-2, (North) Lincoln; 1290 ac. Pop. 91. -3, (South) Lincoln; 2660 ac. Pop. 273.

ELKOSH, a tn. Asiatic Turkey, pash. Bagdad, $30 \mathrm{~m} . \mathrm{N}$. Mosul, on the side of a low, rocky hill, and surrounded by a strong stone wall. The houses are substantially built of the same material; all are arched at the lower story, and being built on a declivity, they rise above each other, which, together with their being loop-holed, makes the town a place of great strength. The men here dress like Kurds of the poorer class; the women wear blue trowsers, and over them a large blue shift; they wear no veils; the hair hangs down behind in two plaits or tails; round the head a garland of silver coins is placed, generally old European coins. The inhabitants are all R. Catholics, and speak nothing but Arabic. Pop. between 2000 and 3000.

ELKSLEY, par. Eng. Notts; 2500 ac. Pop. 414.
ELKSTONE, par. Eng. Gloucester; 2100 ac. Pop. 335.
ELLA KIRK, par. Eng., York (E. Riding) ; 4390 ac. Pop. 1061.

ELLAND, a township and chapelry, England, co. York, (W. Riding.) Area, 3360 ac. The village, 3 m. S.S.E. Halifax, is spacious and well-built, lighted with gas, and a station on the Lancashire and Yorkshire railway. The chapel is an ancient structure, with a tower ; and there are, besides, places of worship for Independents and Wesleyans. The inhabitants are principally employed in the manufacture of coarse woollen cloth. Pop. 6479.

## ELLORA

ELLASTONE, par. Eng. Stafford; 7970 ac. Pop. 1308. ElLbogen, a tn. Bohemia. See Elbogen. ELLENHALL, par. Eng. Stafford; 1800 ac. Pop. 280. ELLERBURN, par. Eng., York (N. Riding) ; 4590 ac. Pop. 686.

ELLERTON-priory, par. Engand, York (E. Riding); 2320 ac. Pop. 320 .

ELLESBOROUGII, par. Eng. Bucks; 3310 ac . P. 708.
ELLESMERE, a market tn. and par. England, co. Salop. The town, $15 \mathrm{~m} . \mathrm{N} . \mathrm{N} . \mathrm{W}$. Shrewsbury; has five principal, and several subordinate streets, generally straight, and pretty well kept; is well supplied with water, and lighted with gas. It has a spacious church, recently rebuilt; and several Dissenting chapels; boarding and other schools; a charity school, and a mechanies' institution. In the vicinity are several lakes or meres, well stocked with fish. Malting is the principal, and almost the only trade of the place. The Ellesmere canal passes a little S. the town; weekly market on Tuesday, well supplied with corn ; five fairs annually, for horses, cattle, and sheep. The town gives the title of Earl to the Egerton family. Area of par. 25,280 ac. Pop. (1841), 7080.- (Local Correspondent.)

ELLLESMERE (Port), a vil. and port, England, Cheshire, I. bank, Mersey, $8 \frac{1}{2} \mathrm{~m}$. S. by E. Liverpool. It has a workhouse, a church, Wesleyan chapel, Primitive Methodist meet-ing-house, and a school. It owes its origin to the formation of a canal between Chester and the Merscy; and within the last few years has become a place of great traffic. A new soap manufactory has lately been completed, and is now in active operation; but the place is chiefly important as a transshipping port. The iron ore for the large iron manufacturers of Staffordshire, is brought here in coasting vessels from Whitehaven, Ulverston, and other places, and is forwarded by canals to its destination; and goods arriving by the canals from London, Biruningham, Wolverhampton, Staffordshire, and N. Wales, are here transhipped into barges, and towed by steamers to Liverpool. The docks, wharfs, piers, and warehouses, are spacious, and mostly of recent construction; and the place exhibits all the bustle and importance of a thriving port. Pop. about 600.-(Local Correspondent.)

ELLEZELLLES, a com. and vil. Belgium, prov. Hainaut, 17 m. N.E. Tournai. Agriculture and linen weaving are the principal branches of industry; and there are several flour-mills, some small breweries, and a salt refinery. Pop. 6322.

ELLICE, an isl. group, S. Pacific Occan, consisting of two isls. of considerable size, and a number of islets, about lat. $8^{\circ} 31^{\prime} \mathrm{S}$.; lon. $179^{\circ} 21^{\prime} \mathrm{W}$. (r.) The islets are well covered with cocoa nut and other trees, which give them a sufficient elevation to be seen at 10 or 12 m . distance. One of the larger islands is 5 m . in length by two in width, the other is 13 m . long, N. by E. and S. by W., and upwards of 7 m . broad. The natives are of middle size, and have a deep brown complexion; hair, thick, bushy, and long. They are tattooed in a peculiar manner, small curved figures or zigzag lines forming the most prominent feature. Their canoes are more rudely constructed than those of many of the other S. Sca Islands.

ELLICHPOOR, a decayed city, IIindoustan, Deccan, prov. Berar, between the Sarpan and Beechun rivers, which form a junction in the vicinity, and afterwards fall into the Poorna, 350 m . N.E. Bombay; lat. $21^{\circ} 14^{\prime} \mathrm{N} . ;$ lon. $77^{\circ} 36^{\prime} \mathrm{E}$. It contains no public edifices of any note; but the bazaars and houses near the seat of government are of brick; and in the environs are the tombs of several Mussulmen saints.
ELLINGEN, a tn. Bavaria, Middle Franconia, cap. bail. same name, on the Rezat, here crossed by a bridge, 26 m . S.E. Anspach. It has a palace of the prince of Wrede, a huge structure of little architectural inerit; three churches, two chapels, a townhouse, and Latin school; manufactures of musical instruments and cabinet work, a brewery, and three mills. Pop. 1329. Area of bail. 64 geo. sq. m. Pop. 8021.

INTERIOK OF THE BISMA KURM, ELLLORA.-From Elliott's Viewn in India.
ELLINGHAM, five pars. Eng.:-Three in Norfolk, (1.), (-Little), 1410 ac. Pop. 250.-4, Northumberland; 13,970 ac. Pop. 861.-5, Hants; 1860 ac. Pop. 350.

ELLINGTON, par. Eng. IIuntingdon; 2910 ac. P. 448.
ELLISFIELD, or Illsfield, par. Eng. IIants; 2360 ac. Pop. 246.

ELLON, a par. and vil. Scotland, co. Aberdeen; area about $20,000 \mathrm{ac}$. The village, 15 m . N. by E. Aberdeen, has Established, Free, and U. Presbyterian churehes, an Episcopal chapel, a Congregational meeting house, parochial school, and a savings-bank; considerable traffic, well attended fortnightly market for cattle and grain, and two smual fairs. Pop. 2941.
ellora, elora, or Elourov, a ruinous vil. Hindoostan, Deccan, Nizam dominions, prov. of, and $12 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Aurungabad. Its ruins cover a considerable extent of ground, and are surrounded by a stone wall; but the interest they would naturally create is greatly lessened by the surpassing attractions of the neighbouring cave temples, the most stupendous and magnificent works of the kind in existence. They are excavated in the slope of a hill of red granite, shaped like a horse shoe, and extend about a mile in length. Some are cut down through the rock, and left open above like an isolated building, and both externally and internally richly ornamented with the most elaborate sculptures. Others are excavated under the hill in the manner of caves properly so called, the interior being supported by massive pillars, variously but harmoniously ornamented. The interior walls likewise are often richly carved with mythological designs, among which human figures are the most numerous, in a great variety of grotesque and distorted forms. The cave temples have been divided into three classes, namely, the N. which are Buddhist or probably Jain; the central, which are Bralminical; and the S., which are evidently Buddlist. The most magnificent of the whole is the Hindoo temple of Kailas or Cailas, apparently, like the other Brahminical temples, dedicated to Siva. The central portion is 100 ft . high, and forms an isolated excavated mass or inmense block, 500 ft . in circumference. It is surrounded by galleries or colonades at the distance of 150 ft .. in which the whole Hindoo pantheon is cut in the perpendicular rock. Every part outside and inside of this magnificent temple is elaborately carved in a most finished manner. Another temple, much smaller, though still likewise very fine, but cut nuder the hill, is the Buddhist cave of Bisma Kirm or Vishwa Karma. It is remarkable as being the only one excavated
with a curved roof; and its dcsign is characterized both by its stupendous proportions and its massive simplicity. The extreme depth of this excavation from the outer gate is 166 ft . ; the main cave is 80 ft . long by 40 ft . broad, and $35 \frac{1}{2} \mathrm{ft}$. high ; with 23 octangular pillars, in two rows, besides two pillars supporting a gallery above the door-way. Above the pillars is a narrow architrave, and above this is a broad
frieze ; both are most elaborately carved ; and in niches formed in the latter are sitting figures of Buddh, of whom also there is a colossal figure at the extreme end of the cave. There are six other principal excavations, some in the N., others in the S. quarter of the mountain, filled with sculptures. When these caves were excavated is not certainly known; but being in the vicinity of Deoghir, now Dowletabad, which prior to the Mahometan conquest, A.D. 1293, was the capital of a powerful Hindoo principality; they probably originated in the superstitious feelings of the reigning families of that metropolis.

ELLORE, a th. and dist. of S. Hindoostan, N. Circars. The rown, about 30 m . from the coast; lat. $16^{\circ} 43^{\prime} \mathrm{N}$.; lon. $81^{\circ} 15^{\prime}$ E., is of considerable size, and has a pretty convenient bazaar, and is noted for carpets, and for leather manufactures. The district is one of the five original N. Circars, but is now mostly comprehended in the modern district and collectorate of Masulipatam.

ELLORIO, a tn. Spain, prov. Biscay, on a small brook in a valley surrounded by mountains, 18 m . S.E. Bilboa. It is an open straggling place; contains two churches, a courthouse, and school; and has some trade in cattle, wool, and cheese, and numerons mills. Pop. 1479.

ELLOUGH, par. Eng. Suffolk; 500 ac. Pop. 155.
ELLOUGHTON, par. Eng. York (E. Riding); 2410 ac. Pop. 712.

ELLRICH, a tn. Prussia, gov. Merseburg, on the Zorge, 20 m . W.N.W. Erfurt. It contains three Protestant churches and an hospital; and has manufactures of woollen cloth, leatlier, and paper ; four oil-mills, and four annual fairs. Pop. 2914.

ELLWANGEN, a tn. Würtemberg, cap. circle, Jaxt, at the foot of two hills, r. bank, Jaxt, 45 m . E.N.E. Stuttgart. It is well built, consisting of spacious streets lined with handsome houses, is the seat of a court of law and several public offices, contains a Protestant, and five R. Catholic churches, several of them, particularly the high church, very handsome, and one remarkable for the numerous pilgrimages made to it; a gymnasium, and an old castle seated on a lieight in the vicinity, and has manufactures of leather, iron ware, crucibles, and refined wax. Its cattle and horse fairs, once very import ant, have greatly fallen off. Pop. 2938.

ELM, a vil. and par. Switzerland, can. of, and 10 m . S.S.W. Glarns, 1. bank, Sernft. It stands in a romantic Alpine district, about 3300 ft . above the sea, and on all sides, but the N., is surrounded by lofty mountains, about 8000 ft . ligh. It contains a parish church, and a school. The inlabitants, who are generally in comfortable circumstances, live by rearing and trading in cattle. Pop, 1013.

ELM, two pars. Eng. :-1, Cambridge; 11,230 ac. Pop. 1742 -2, Somerset; 820 ac. Pop. 421.

ELMDON, two pars. Eng.:-1, Essex; 2480 ac. Pop. 680.-2, Warwick; 1180 ac. Pop. 167.

ELMHAM, several pars. Eng. :-1, (North), Norfolk; 5000 ac. Pop. 1219:-Seven in Suffolk, 2, (South All Saints), 1150 ac. Pop. 224.-3, (South St. Cross, or Sandcroft), 1110 ac. Pop. 258.-4, (South St. James), 1530 ac. Pop. 289.-5, (South St. Margaret), 710 ac. Pop. 181.-6, (South St. Michael), 930 ac. Pop. 145.-7, (South St. Nicolas), 450 ac. Pop. 90.-8, (South St. Peter), 900 ac. Pop. 91.

ELMINA, or St. George Del Mina, the cap. of the Dutch settlements on the Gold Coast, W. Africa; lat. $5^{\circ} 10^{\prime}$ N.; lon. $2^{\circ} 30^{\prime}$ W.; kingdom of Ashantee, 5 or 6 m . W. Cape Coast Castle. There is here a large and excessively irregular ard dirty native town, the inhabitants of which consist of traders, fishermen, and persons employed as servants to traders; some among them are wealthy. There are likewise some mulattoes in respectable circumstances, who support a number of slaves performing the duties of carpenters, masons, and blacksmiths; indeed, one-tenth of the people are supposed to be artificers. Elmina is defended by a castle, which stands obliquely on a low rocky peninsula, along the E. side of the small river Beyah, which passes within 20 yards of one of its gates. There are sundry other defensive works, including the fortress of St. Jago, on De Veer's Redoubt, \&cc. Elmina Point is surrounded by a bed of rocks, which extend E. and S. about two cables' lengths, and on which the sea breaks with great violente. From this point the shore recedes to the N. about a third of a mile, forming a small bay; and the surrounding country is undulating and thickly wooded. There
are, nevertheless, some country residences and cultivated farms which belong to the governor and merchants, and which afford very agreeable retreats from the business, the crowd, and the heat of the town. The castle of St. George del Mina was the first European establishment on the coast of Guinea, having been erected by the Portuguese in 1481 . It was captured by the Dutch in 1637 , and was finally ceded to that nation by the Crown of Portugal in 1641, together with some other smaller and dependent settlements of the Portuguese.

EIMLEY, three pars. Eng. :-1, (-Castle), Worcester; 2260 ac. Pop. 403.-2, (Isle of ), Kent; 1640 ac. Pop. 42. $-3,(-$ Lovett $)$, Worcester; 2350 ac . Pop. 381.

ELMORE, par. Eng. Gloucester; 1790 ac. Pop. 379.
ELMSETTT, par. Eng. Suffolk; 1810 ac. Pop. 446.
ELMSHORN, a tn. Denmark, Holstein, co. Rantzau, 20 m. N.W. Hamburg, a station on the Altona and Kiel Railway, and on the Krückan, a navigable stream which separates the old from the newer parts of the town. It possesses few vessels, and little traffic on the river, but it has a boat-building yard, and a considerable amount of land transit trade; also some tanneries; but boots and shoes are the principal articles manufactured, employing about 500 hands in the town. There are some charitable institutions, and an important annual cattle market. Pop. 5600.

ELMS'TEAD, two pars. Eng.:-1, Essex; 3490 ac. Pop. 809.-2, Surrey ; 4400 ac. Pop. 743.

ELMSWELL, par. Eng. Suffolk; 2380 ac. Pop. 671.
ELMTON, par. Eng. Derby ; 2970 ac. Pop. 433.
ELMUNCHILLY, a vil. Hindoostan, N. Circars, 40 m . S.W. Vizagapatam, in a luxuriant valley, ornamented with clusters of date trees, and environed on all sides with green mountains.

ELNE [anc. Illiberis and Helena], a tn. France, dep. Pyrénées-Orientales, beautifully situated within 4 m . of the Gulf of Lyons, 8 m. S.S.E. Perpignan, l. bank, Tech. It has remains of strong fortifications, and the view from its ramparts over the plain of Roussillon is superb. The venerable church here (consecrated in 1058), modelled on that of the Holy Sepulchre at Jerusalem, was once a cathedral, but the seat of the bishop was removed to Perpignan in 1602 . Elne has some trade in cattle, cordage, drapery, and agricultural implements. It was founded at a very remote period. Hannibal is said to have encamped under its walls, B. c. 214 ; the Emperor Constantine much improved the place, and built a castle for its defence. Here his descendant Constantius was murdered, and his body interred; his monument long held a place in the church cloisters. In 1474. Elne was treacherously taken by Louis XI. ; and it was often besieged afterwards. Pop. 2303.

ELPHIN, a market tn., the seat of a bishopric, and par. Ireland, co. of, and 15 m . N. Roscommon. It. consists of thatched stone houses, and has an Episcopal church, a R. Catholic chapel, and several excellent schools, the most important of which is the Diocesan school, at which Oliver Goldsmith received the early part of his education. Weekly market, Wednesday; and four fairs annually. Petty sessions are held every Wednesday. Area of par. 12,545 ac. Pop. (1841), 6781 ; of which in the tn. 1551.-(Local Corresponaent.)

ELSDON, par.Eng. Northumberland; 62,470 ac. P. 1680.
ELSENHAM, par. Eng. Essex; 1810 ac. Pop. 491.
ELSFIELD, par. Eng. Ox ford; 1200 ac. Pcp. 185.
ELSFLETH, a tn. Oldenburg, cap. bail. of same name, at the confluence of the Hunte with the Weser, 12 m . E.N.E. Oldenburg. It is well built, has a church with a bell tower, and a navigation school; building yards, at which only a few vessels are built; several breweries and tile-works; and a considerable trade in wood. Only vessels which draw less than 12 ft . can approach the quay. Pop. tn. 2500; bail. 8063.

ELSHAM, par. Eng. Lincoln ; 4110 ac. Pop. 458.
ELSINEUR, or Elsinore [Danish, Helsingör], a seaport tn. Denmark, isl. Seeland, at the narrowest part of the Sound, here only $3 \frac{1}{2} \mathrm{~m}$. broad, 24 m . N. by E. Copenhagen ; lat. (Kronborg light) $56^{\circ} 2^{\prime} 12^{\prime \prime} \mathrm{N}$.; lon. $12^{\circ} 37^{\prime} 30^{\prime \prime} \mathrm{E}$. (R.) It has two churches, a classical school, and a custom-house; its.
inhabitants are chiefly engaged in commerce and seafaring, and considerable traffic is carried on with Helsingborg, ou the opposite coast, this being the chief point of transit between Denmark and Sweden. Elsineur is defended by the castle of Kronborg, which stands on a projecting spit of land, and commands the Sound. It is a Gothic-Byzantinie edifice, with walls and ditches; it is entered by two drawbridges, and was built 1574-1584. On it is a fixed light, 113 ft . ligh. In the vicinity of Kronberg is the royal country palace of Marieulyst. Elsineur is, however, chietly noted as being the place where the Sound dues are levied on vessels entering or clearing the Baltic; all vessels passing, with some exeeptions, requiring to salute the castle of Kronborg, and elear at Elsineur. The dues, originally instituted for keeping up lights and landmarks on the Kattegat and neighbouring coasts, now consist of dues on the ship, being light or beacon money, and dues on the cargo, a toll paid to the Danish Government. The total number of vessels passing the Sound was, in 1847, 21,526; $1848,16,857 ; 1849,18,959$; of which, in 1847, 4522 were British; 2562 Prussian; 2334 Norwegian; 1630 Swedish; 1507 Danish; 1447 Dutch. Of other countries the numbers were under 1000, and in some cases, as Ainerica, Naples, and Ifamburg, under 100 . The prineipal maritime countries Lave consuls at Elsineur. I'op. 8000.

ELSING, par. Eng. Norfolk; 1530 ac. Pop. 457.
ELST, or Eldex, two vils. Holland-1, prov. Gelderland, $1 \frac{1}{2} \mathrm{~m} . \mathrm{S}$. Aruliem, with a Reformed and a R. Catholie church, three schools, and two annual eattle and horse fairs. In the vicinity tobaceo, cherries, and vegetables are grown; the last for the Arnhem market. Pop. 1100.-2, prov. Utreeht, $14 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Amersfoort. Pop. 700.

ELSTER, two rivers, Germany :-1, The White or the Great Elster [Weisse or Grosse-Elster], a tributary of the Saale, rises 11 W. Bohemia, about 15 m . N. Eger, flows N. through the Saxon Voigtland, the principality of Reuss, part of the Prussian province of Saxony, enters Saxony, and at Leipzig receives the Pleisse and Parde, and, after a course of about 115 m. , falls into the Saale between Halle and Merseburg. 2, The Black Elster [Schwarze-Elster], rises in Saxony, circle of, and about $8 \mathrm{~m} . \mathrm{W}$. by S. Bautzen, flows N., enters Prussia, and then flows N.W., unites with the Pulsnitz and lï̈ler, and, after a conrse of about 100 m ., falls into the Elbe between Wittenberg and Torgau.

ELS'TERBERGi, a tn. Saxony, eircle, Zwickau, l. bank, Elster, 73 m . W.S.W. Dresden. It contains a chureh, a free school, and the ruins of an old feudal castle; and has manufactures of straw plait, leather, and earthenware, dyeworks, several mills, a trade in cattle, and four annual fairs. Pop. 2379.

EI STON, par. Eng. Notts; 1640 ac . Pop. 259.
ELSTOW, a par. and vil. Eing. Bedford; 1522 ae. In the village, $1 \frac{1}{2} \mathrm{~m}$. S. Bedford, John Bunyan was born. Pop. 562.

ELSTRA, a tn. Saxony, eircle, Bautzen, 1. bank, Elster, 21 m . N.E. Dresden. It contains a chureh, with good paintings; a school, and an endowment for widows and orphans; and has a granite quarry, two mills, a eattle market, and four annual fairs. Pop. 1080.

ELSTREE, or Idlestree, par. Fig. Mertford; 1370 ac. Pop. 360.

ELSWORTII, par. Eng. Canbridge; 3700 ac. P. 915.
ELTEN, a vil. Prussia, gov. Diusseldorf, not far from the Rhine, 6 m . N.N.E. Cleves. It contains two R. Catholic churehes, and has three annual fairs. P'op. 1446.

ELT'ERLEIN, a th. Saxony, eirele, Zwickau, in a mountainous district, 53 m. S. W. Dresden. It contains a church, and has manufactures of nails, tile-works, an iron and other mills, and two amnual fairs. Pop. 1910.

ELTHAM, a vil. and par. England, co. Kent. The villige, 8 m . S.E. London, contains a church, an Independent chapel, a free school, and several almshouses. Here, also, are the remains of a royal palace, which was a favourite residence of several monarehs of the Plantaganet and Tudor families. Are of par., 4230 ac. Pop. 2310.

EL'ISLEY, par. Eng. Cambridge; 1941 ac . Pop. 372.
EL'TMANN, a tn. Bavaria, Lower Franeonia, cap. dist of same name. I. bank. Main, here crossed by a bridge, 40 m . E.N.E. Würzburg. It contains a ehapel, a poorhouse, and the ruins of a feudal castle; and has manufactures of leather, potass, and earthenware; and has scveral mills, and a trade
in wood. Mneh fruit and wine are grown in the vicinity. l'op. of tn. 1392. Area of dist. 80 geo. sq. m. Pop. 13,963.

ELTON, a salt lake, Russia, gov. of, and 165 m . S. by E. Saratov, amid vast steppes. It is 11 m . long, and fully 8 broad, but nowhere more than about 15 inches deep. In the hottest season it appears as if covered with ice and snow; so great is the illusion produced by the crystallized salt along the banks, and over the whole surface. The Mongul name of this remarkable saline lake is Elton-Nor, the 'Golden Elton.' Great quantities of hydro-chlorate of magnesia are extracted from its waters; and salt, to the amount of $3,500,000$ ewts. yearly, in collecting which about 10,000 persons are employed.

ELTON, four pars. Eng. :-1, Durham ; 1060 ae. Pop. 92.-2, Hereford; 1700 ac. Pop. 99.-3, Huntingdon; 3250 ae. Pop. $844 .-4$, Notts; 980 ae. Pop. 81.
eltsch, Jolva, or Jelsciauy, a tn. Hungary, co. of, and 8 m . N.N.W. Gömür. It stands in a deep valley, on a stream of same name, here crossed by a marble bridge; contains a Protestant chureh, a large châtean, and a high sehool; and has numerous tanneries, and an active trade in ironware of its own manufacture. Mueh excellent fruit is grown in the district. Pop. 4500.

ELTTVILLIE, or Elfeld, a tn . Nassau, cap. bail. of same name, r. bank, Rhine, 6 m . W. Mentz. It is beautifully situated among vineyards, and is conspicuous from a distance by its Gothic towers, once parts of a eastle built in the 14th century, and long the residence of the Archbishops of Mentz, who had here a mint. The environs of the town are covered with fine villas and country seats. A printing-press was established in Eltville as early as 1465. The town is well built, contains a R. Catholic parish church, is the seat of a court of law, and has a trade in wine. Pop. of tn. 2234. Area of bail. 30 geo. sq. m. Pop. 12,167.

ELUCE, or El-Oos, an isl. and tn. Asiatic Turkey, in the Euphrates, 25 m. N. Hit, and 130 m. N.W. Bagdad. The island, on which the town is situated, is about 1 m . long. The latter consists of 500 houses, and has several mosques.

ELVA [Latin, Helva], a vil. and com. Sardinian States, Piedmont, prov. of, and 18 m . W.N.W. Coni. It lies in a small basin, among the mountains which separate the valleys of Maira and Varaita, near a small stream of its own name. It contains a parish ehurch and townhouse, and has a considerable trade in butter. Pop. 1165.

ELVAS [Latin, Elva; Spanish, Ifelves or Yelves], a fortificd city, Portugal, prov. Alemtejo, 12 m . N.W. Badajos, 118 m . E. by N. Lisbon, within 5 m . of the Spanish frontier, on a hill in the midst of a plain, between the two eastles of Fort Santa Lucia and Fort La Lippe, both also on eminences. It is considered, with its defences, one of the strongest places in Portugal, and, indeed, all but impregnable. The streets are in general narrow, erookel, and dirty, but the Moorish houses, of which a great part of the eity is composed, have a pieturesque and interesting appearance; their arched fronts, latticed windows, verandahs, and flat roofs, profusely adorned with flowers and shrubs, arranged in fancitill pots, baving a singularly agreeable effect. Many of the houses have piazzas in frout, which inereases their aecommodation, but does not improve their appearance. The Moorish houses are, in general, much better arranged, and of more cheerful aspect, than those of the Portuguese; though the better description of the latter display, in many instances, great taste, not ouly in their architeeture, but in their ornamental grounds. Elvas has three gates, all strongly fortified, and by one of which only strangers are allowed to enter; and contains a cathedral, of mixed Arabesque and Gothic; six parish ehurehes, several convents and hespitals, and a bomb-proof barracks for 6000 or 7000 inen. One of the most remarkable objects at Elvas is its aqueduct, constructed by the Moors, which conveys water from a distance of 15 m . to the eity. That part of this stupendous work which crosses the valley of the Campo de Feira, near the town, and which is $1 \frac{1}{2} \mathrm{~m}$. wide, consists of four stories or tiers of arches, the lower ones being nearly 100 ft ., and the upper ones about 40 ft . high, giving a total elevation, allowing for the thickness of the arch, of about 250 ft . The country around is productive in eorn, wine, and oil. Pop. 11,348.

ELVASTON, par. Eng. Derby; 2760 ac. Pop. 518.
ELVEDEN, or Elbex, par. England, Suffolk; 5290 ae. Pop. 240.

ELVEN, a com. and vil. France, dep. Morbihan, 12 m . N.E. Vannes, only remarkable for the numerous druidical remains in its vicinity, and for the ancient keep, commonly called the Tour d'Elven, supposed to have been built in the 12th century. It is in a good state of preservation, and is one of the finest Middle Age remains in Brittany. Pop. 3416.

ELVETHAM, par. Eng. Hants; 2980 ac. Pop. 552.
ELVINGTON, par. Eng. York (E. Riding); 2120 ac. Pop. 478.

ELWICK-Hall, par. Eng. Durham; 4150 ac. Pop. 165.
ELWORTHY, par. Eng. Somerset; 1880 ac. Pop. 210.
ELY [Latin, Elia or Helia], an episcopal city, England, co. of, and 15 m . N.N.E. Cambridge, on an eminence, l. bank, Ouse. It consists of one principal street, and several smaller branching off on either side, is lighted with gas, partially $p^{\text {raved, and has a spacious market-place in the centre. Some }}$ of the houses, particularly those in the vicinity of the cathedral, are very old, as their external appearance indicates. The municipal buildings consist of a commodious townhall, a house of correction, and a corn exchange; the first contains also a chapel and infirmary. The ecclesiastical structures comprise the cathedral, the churches of St. Mary and the Holy Trinity, the latter belonging to the time of Edward II., and one of the most perfect buildings of that age; places of worship for Baptists, Independents, Wesleyans, and the Countess of Huntingdon's connection. The cathedral is one of the most remarkable edifices of the kind in this country. Its entire length, E. to W., is 517 ft .; and its W. tower, which is of the most beautiful workmanship, 270 ft . high. The whole structure comprises an almost unbroken series of the various styles of architecture which prevailed in England from the Conquest to the Reformation, and so judiciously blended, and, generally, so perfect in their kind, as to produce no disagreeable effect by their admixture. The nave is Norman, and is one of the finest specimens of that style in England. This magnificent cdifice is at present (1851), and has been for some years past, undergoing extensive alterations, additions, and restorations, including, amongst numerous other improvements, a new arrangement of the choir, the introduction of new and richly oruamented substalls, and the restoration and re-polishing of the beautiful piers of Purbeck marble. A fine old gateway, of ample dimensions, built in the reign of Richard II., forms the principal entrance to the precincts of the cathedral. There are a grammar, national, and charity school in the city, a mechanies' institute, and a savings-bank. There are no manufactures worth noticing, most of the inhabitants being engaged in agricultural labour. There are extensive gardens in the vicinity, the greater part of the produce of which is sent to London and Cambridge. Pop. (1851), 6500.

ELY (Isle of), a dist. England, co. Cambridge, separated S. by the Ouse from the remaining portion of the county. It is about 28 m . long by 25 m . broad; area, 225,150 ac. Pop. (1841), 61,610 . -The name is now generally restricted to a smaller tract, about 7 m . long by 4 m . broad. It is surrounded by marsh, formerly covered by water. The soil is fertile, but requires a great deal of artificial draining. It produces aquatic plants in great varicty, and is much resorted to by aquatic birds. See Bedford Level.

ELZE, a tn. Hanover, gov. Hildesheim, at the confluence of the Saale with the Ieine, 18 m . S. Hanover. It is an old place, contains a church and a townhouse, and bas some trade in iron. Pop. 2036.

EMADOO, a tn. W. Africa, kingdom Yariba, about 18 m . N. Jenna; lat. $7^{\circ} 10^{\prime} \mathrm{N}$. ; lon. $3^{\circ} 10^{\circ} \mathrm{E}$.; on the route from Badagry to Boosa.

EMATRIS, par. Irel. Monaghan ; 12,298 ac. Pop. 7643.
EMBA, or JEm, a river of W. Asia. It has its rise in the Urkach or Camel Mountains, in the steppes of the Little Kirghis; about lat. $49^{\circ} 5^{\prime}$ N.; lon. $58^{\circ} 30^{\prime}$ E.; from which it flows S.W., and falls into Emba Bay, at the N.E. end of the Caspian Sea. The principal branch of the stream expands, before it reaches the sea, into a great many shallow basins, like lakes; the N. branch of it being nearly choked up with sand. Its principal affluents are the Uzun Temir and the Tem rissa, both flowing from the right. The entire length of the Emba is about 290 m.

EmBACH, or Ammogja, a river, or rather two rivers, Russia, gov. Livonia. It rises in the S.E. of dist. Pernau,
and, under the name of Little Embach, flows S.E. to Vulk, then turns N., and, after a course of about 36 m ., enters S. extremity of Lake Vitzero. The stream which issues from the N. extremity of same lake, takes the name of Great Embach, flows E., past Dorpat, where it becomes navigable, and enters the S.W. extremity of Lake Peipus. Total course, 40 m .

EMBERTON, par. Eng. Bucks; 1860 ac. Pop. 658.
EMBLETON, par. Eng. Northum. ; 12,810 ac. P. 2030.
EMBORROW, par. Eng. Somerset; 2400 ac. Pop. 210.
EMBOTETIU, or Mondego, a river, Brazil, prov. Mato-Grosso, which rises in the N.E. of dist. Camapuan, flows W.N.W., and, after receiving the Verde and Zezere, joins 1. bank, Paraguay, about 20 m . below the junction of the Taquari. It is navigable almost to its source.

EMBRUN [Latin, Eburodunum Caturgium], a tn. France, dep. Hautes-Alpes, 20 m . E. Gap, on an elevated plateau, rising in the middle of a vast plain watered by the Durance, which sweeps past the foot of the rock on which the town stands. It is surrounded by walls and ditches, and has a very picturesque appearance, but, though the houses are good, the streets are irregular, crooked, dark, and dirty. It has a large fine cathedral, with a lofty spire; an archiepiscopal palace, some manufactures of woollen fabrics and hats, some cotton-spinning, and tanneries. It was once the seat of an archbishop, and is still that of a bishop. It was sacked, in turn, by Vandals, Huns, and Saxons; pillaged, burned, and the population exterminated by the Moors, in 966 . It was pillaged and burned again in 1573, and devastated once more by the Duke of Savoy, in 1692. Pop. 2209.

EMDEN [Latin, Embda; Dutch, Embden; anc. Amasia or Amisia], a tn. Hanover, cap., E. Friesland, r. bank, Ems, near where it discharges itself into the Dollart estuary; lat. (Hotel de Ville) $53^{\circ} 22^{\prime} 6^{\prime \prime} \mathrm{N}$. ; lon. $7^{\circ} 12^{\prime} 45^{\prime \prime} \mathrm{E}$. (r.) It has very much the appearance of a Dutch town, occupying a low flat intersected by numerous canals, across which the communication is maintained by 30 bridges. It was originally surrounded by ramparts and ditches. The part of the former which still remains, is used as a promenade. Towards the water, a strong wall and dyke have been constructed to prevent inundation, but the secnrity which they afford is very imperfect, as, in 1826, the water stood in the streets for three months, up to the first floor of the houses. The town is entered by four gates, and is divided into six quarters, of which two are properly only suburbs. The streets are, for the most part, spacious, and well paved; and the houses, built generally of brick, have a substantial, comfortable look, and are remarkable, both within and without, for their extreme cleanness. The principal buildings are the great church, built, in 1455, by Count Ulrich, as part of a Franciscan monastery, a long and slender edifice, surmounted by a lofty tower; the new church, in a better style of architecture; the French Reformed church, the townhouse, built in the model of that of Antwerp, with a lofty tower and a spacious hall; the courthouse, weighhouse, custom-house, spinnhaus or house of correction, and barracks. The educational establishments include a gymnasium with six teachers, and school for navigation ; the benevolent institutions are numerous, and several of them are well endowed. Emden has an excellent roadstead, in which vessels of any size can securely anchor. Its harbour is shallow; but a canal is at present (1851), in progress to connect the town with the deep water of the Dollart. It has the most extensive trade in oats of any port in Europe; and its general trade includes not merely all the export produce of the province, especially grain, dairy produce, gin, tallow, wool, and hides; but it also imports hicmp, potash, timber, wine, and colonial produce. In the building yards a considerable number of vessels are annually built; and the manufactures, though far less important than the trade, include hosiery, leather, brown soap, and tobacco. There are also oil-mills, some breweries, and numerous brandy distilleries. Pop. about 15,000 .

EMERALD, or Macour, a coral isl. Red Sea, coast of Nubia; lat. $23^{\circ} 50^{\prime}$ N.; lon. $36^{\circ} 52^{\prime} 30^{\prime \prime}$ E.; about 1 m . in length, and 100 ft . high in the centre.

EMERINA, a dist. isl. Madagascar, prov. Ankova, and formerly an independent state. It is the highest, and, consequently, the healthiest district in the island; rocky, mountainous, and by $n o$ means remarkable for fertility, neither is tho climate favourable to vegetation, a distressing drought pre-
vailing from April to September, with exeessively cold winds blowing from the E. From October to the end of March, however, the heat inereases, and becomes sometimes excessive, aecompanied by heavy rains during the night. The chief erops raised are rice, manioe, and batatas, these being the chief artieles of food used by the natives; but maize, earthnuts, sugar-eanes, pine-apples, bread-fruit, and the vine, are also cultivated. A variety of European plants and vegetables, for which the climate seems well adapted, have been recently introduced, and are thriving well. Emerina is also productive in eattle, whieh are remarkably large and fat. Sheep, hogs, and poultry, are likewise suecessfully reared. Wild dueks are in great profusion. The natives are skilful workcrs in gold and silver, produeing artieles in these metals which Europeans would have diffieulty in surpassing. The internal commeree of the district consists in rice, eotton, silk, eattle, cloth of their own mannfaeture, and a traffic in slaves. The capital of Emerina is Tannanarivo, which is also the ehief town in the island.

EMFRAS, a considerable tn. Abyssinia, on a hill; lat. $12^{\circ} 12^{\prime} 38^{\prime \prime}$ N. ; lon. $37^{\circ} 38^{\prime} 30^{\prime \prime}$ E. Chief trade, eloves and eivet. EMLAGM, par. Irel. Meath; 2119 ac. Pop. 426.

EMMEN, a vil. twe streams, and a valley, Switzerland:$1, A$ vil. and par. can. of, and $2 \mathrm{~m} . \mathrm{N}$. by W. Luzern, in a fertile dist. r. bank, Reuss, near where it joins the Little Emmen [Klein Emmen, or Waldemmen], a stream which rises in a small monntain lake in the most $S$. part of the canton, flows N., and then N.E., joins the Reuss as above indicated, the united strean falling into the lake at the town of Luzern.-2, A mountain stream, ean. Bern. It rises about 5 m . W. Brienz, flows, N.W., through the extensive valley of the Emmen [Emmenthal], famed for its cattle and horses, forest and flax culture, and numerous thriving mannfactures, and joins the Aar in can. Soleure, 2 m . N.E. the tewn of that name. It is not navigable, but often overflows its banks, causing great damage. Total direct eourse, about 38 m .

EMMENDINGEN, a tn. Saden, circle Upper Rhine, cap. bail. of same name, in a beautiful dist., r. bank, Elz, 9 m. N. Freyburg, on the railway to Carlsrulie. It is walled, well built, contains a chureh, aneient townhouse, and superior burgher sehool ; and has paper, worsted, and other mills, lime-kilns, and tileworks. On the heights above the town stand the extensive and well preserved ruins of the castle of Hochberg. Pop. of tn. 2000 ; of bailiwick, 25,505.

EMMERICII, a tn. Prussia, gev. Düsseldorf, in a fertile plain, r. bank, Rline, 5 m . N.E. Cleves. It is surrounded with walls and ditehes, contains a Menonite, two Protestant, and two R. Catholie churches; a gymnasium, ecelesiastical seminary, and orphan hospital; is the seat of a court of law, and several public offices, and has manufactures of woellen and linen eleth, hosiery, hats, seap, leather, and tebaceo; and possesses a free port, some shipping, and a trade carried en, partieularly with Ilelland, to a very large extent. Pop. (I846), 6582.

EMMINGTON, par. Eng. Oxford; 1230 ac. Pep. 97.
EMNETH, par. Eng. Norfolk; 2810 ae. Pop. 1065.
EMIFINGEN, a vil. of W. Germany, HohenzollernSigmaringen, bail. of, and near Haigerloch. It contains a parish chureh, and has a market. Pop. 1910.

EMPINGHAM, par. Eng. Rutland: 2780. ac. Pop. 914.
EMPORION, a tn. isl. Santorin, Grecian Arehipelago. It is neat and clean, and is inlıabited by a great many respeetable land proprictors. This place derives its name from naving at one time been the residence of most of the mereliants and vine-growers of the island. I'op. 1380.

EMPSIIO'T'T, par. Eng. Ilants; I320 ae. Pep. 148.
EMPOLI, a th. Tuseany, eap. dist. of same name, 1. vank, Arno, in the beautiful and fertile valley of that name, 16 m . W.S.W. Florenee, on the railway to Leghorn. It
consists of the town proper, surrounded by walls flanked with towers, and of several suburbs, and though the streets are narrow, and the fronts of the houses preject eonsiderably over them, is built with considerable regularity, and has several good sqnares, one of them adorned with an elegant fountain. It contains an ancient collegiate church, somewhat defaeed by medern attempts at ornament, but adorned with a fine façade and possessed of a number of geed paintings; another ehureh, formerly belonging to the Augustinians, with goed frescoes; and a palaee, in which the Ghibellines held a parliament, and but for the opposition of Farinata degli Uberti, celebrated by Dante, would have resolved to raze Florence to the ground, and make Empoli the eapital in its stead. It is the seat of a eourt of justice, and several publie offiees, and both from its central position and the remarkable fertility of its envirens, carries on a considerable trade particularly in agrieultural produce, ineluding the straw used in making Tuscan bonnets. The principal manufactures are straw bonnets, beaver hats, and earthen vases. The weekly market is important. Pop. tn. 6141 ; dist. 15,048.

EMS.-1, A ti. Nassan, in a mountainous dist., r. bank, Lahn, 5 m . W.N.W. Nassan. It is beautifully situated on a narrow belt of ground, hemmed in between the river and the elifts of the Baderlei, and consists ehiefly of a long row of ledging houses, occupied by the numerous visitors to the springs, whieh have long enjoyed a European celebrity. The bathing establishment [Kurhaus, or Kursaal] is on a very larce

THE KURSAAL, EMS.-From Bardard's Sketches on the Lahn.
and somewhat gorgeous seale, and the number of visitors annually exeeeds 3000 . The springs, which are of an alkaline nature, vary in temperature from $84^{\circ}$ to $116^{\circ}$, are agreeable to the taste, and easy of digestion, and are used with good effeet, both internally and externally, particularly in stomachic and nervous affections. To many the ehief attraction of the plaee is the beauty of its environs; to ethers, less wisely disposed, it is the gaming table, where large sums are annually lost.-2, (Hohen), A market tn. Austria, Tyrel, Verarlberg, near r. bank, Rhine, $10 \mathrm{~m} . \mathrm{S} . \mathrm{S} . W$. Bregenz. It contains a parish ehureh and a eastle, and a quarry, from which fine whetstones are obtained. A great number of the inhabitants are Jews. Pop. 2133.

EMS, a river of W. Germany. It rises in Lippe-Detmold, in the S.E. extremity of the Teutoburger-Wall, about 28 m . S. by W. Minden; flows first S.W., then N.W. through the Prussian prov. of Westphalia, traverses $S$. to N. the W. seetion of the kingdem of Ilanover, and falls inte the Dollart estuary near the town of Emden. Total course, 234 m. The tide is felt for about 13 m . up, and for that distance the river is navigable for vessels of 200 tons; smaller vessels may aseend to Rheina in Prussia, near the LIanoverian frentier. Its chief affluents are on the right-the IIopster-Aa, Hase, and Leda; and on the left the Werse.

EMSDETTEN, a vil. Prussia, prov. Westphalia, gov. Münster, cirele of, and near Steinfurt-on the-Ems. It con-
tains a R. Catholic parish church, and has a trade in cattle, and two annual fairs. Many of the inhabitants are employed in weaving sacking. Pop. 1180.

EMSKIRCHEN, a market tn. Bavaria, Middle Franconia, l. bank, Aurach, 14 m. W.N.W. Nürnberg. It contains a Protestant church, and an infirmary, and has two mills, and four annual fairs. In the vicinity are the ruins of the castle of Königstein. Hops are grown extensively in the district. Pop. 867.

EMSWORTH, a tn. England, IIampshire, 81 m. E. by N. lortsmouth, a station on the Hastings branch. of the London, Brighton, and South Coast Railway, at the head of limsworth Channel, navigable for vessels of 200 tons, to the English Channel. It has manufactures of sail-cloth, sacking, fishing-nets, ropes, and twine; several coasting vessels, and a number of boats in the oyster fishing. Pop. 1165.

EMU.-1, A tn. Australia, New S. Wales, co. Cook, 35 m . W. by N. Sydney, on a rising ground, on the river Nepean. -2, A bay, Van Diemen's Land, Bass's Strait, between Blackman's Point and Round Hill Point; lat. $41^{\circ} 4^{\prime}$ S.; lon. $146^{\circ}$ E. It is about 3 m . in width at its entrance.

EMYVALE, a small tn. Ireland, co. of, and 5 m . N.N.E. Monaghan, on the road thence to Aughnacloy, with a dispensary, and a constabulary barrack. Pop. (1841), 694.

ENARA, a lake, Russia, in the N. of Finland, of a tolerably regular and nearly rectangular form, about 50 m . long, S.W. to N.E., and 30 m . broad. It is studded by almost innumerable islets, receives several streams, of which the Ivalo, which joins it on its $S$. shore, is the most important, and discharges itself by the Patsjoki into the Arctic ocean. At its S.W. extremity is a small town of same name, which is inhabited chiefly by fishermen, and has an annual fair of some importance.

ENAREA, a country S. from Abyssinia, between about lat. $7^{\circ}$ and $8^{\circ}$ N.; and lon. $35^{\circ}$ and $37^{\prime}$ E.; inhabited by the Gallas. It is principally celebrated for its extensive woods of coffee, the chief locality of which is the valley of the Gibbi, close beyond Sakka, the chief town and great emporium of the kingdom. The inhabitants of Enarea enjoy the reputation of being the most civilized of all the Gallas, and manufactures flourish here in a higher degree than anywhere else in this quarter of Africa. Almost all the coffee, and a large proportion of the ivory and slaves brought to Abyssinia, are from this country.

ENBORNE, or Enbotrne, par. Eng. Berks; 2550 ac. Pop. 384.

ENCINASOLA, a tn. Spain, Andalusia, prov. of, and 62 $\mathrm{m} . \mathrm{N}$. by W. Huelva, on the frontiers of Portugal. It has a parish church, three chapels, town and courthouses, a prison, custom-house, storehouse, three schools, four fountains, and a cemetery. Industry:--linen and coarse cloth, weaving, agriculture, and cattle-rearing. Pop. 3000.

ENCOUNTER BAY, S. Australia, to the N.E. of the gulf of St. Vincent. It is a large slallow indentation.

ENCRUZILHADA, a vil. and par. Brazil, prov. São-Pedro-do-Rio-Grande, to the S. of the Jacuhi, near the little river Santa Barbara, about 50 m . W. Rio-Pardo. It contains a new parish church, built of hewn stone, and situated close to the mouth of the river. Pop. 2000.

ENDEAVOUR.-1, A strait, N. coast, Australia, between Cape York, lat. $10^{\circ} 41^{\prime} 36^{\prime \prime}$ S.; lon. $142^{\circ} 34^{\prime}$ E. (r.), and some off lying islands. It forms the S. entrance from the W. to Torres Strait ; is about 30 m . long, and nowhere exceeds 12 broad, and near its N.E. extremity it is encumbered by a number of islands, called Possession islands.-2, A river, Australia, N.E. coast, falls into the sea at lat. $15^{\circ} 27^{\circ}$ S.; lon. $145^{\circ} 10^{\prime} \mathbf{E}$.; it forms a very good port for small vessels.

ENDELLION (St.), par. England, Cornwall; 3530 ac. Pop. 1154.

ENDENICH, a vil. Rhenish Prussia, 2 m . W. Bonn, on the Kreuzberg. It contains a R. Catholic parish church, which originally belonged to a Servite monastery. Pop. 983.

ENDERBY, par. Eng. Leicester; 1810 ac. Pop. 1336.
ENDERBY-BAG, par. Eng. Lincoln; 860 ac. Pop. 102.
ENDERBY'S ISLAND. See Auckland Islands.
Enderi, tn. Russia. See Andreeva.
Endian, a tn. Persia, prov., Khuzistan, on the Tab, 16 m . from the Persian Gulf. It carries on a busy trade with Bassora. Pop. 4000.

ENDINGEN, a tn. Baden, circle, Upper Rline, at N. foot of the Kaiserstuhl, 12 m . N.W. Freyburg. It is an ancient place, surrounded by walls, and rose to the rank of a free imperial city. It contains two churches, and has a trade in cattle, and three annual fairs. Much wine is grown in the district. Pop. 3000.

ENDRE (St.), Hungary. See Andre (St.)
ENDRED, several places, Hungary, particularly-1, A vil. Thither Danube, co. Sumegh, in a mountainous district, near Szarmardy. It contains a Protestant and a R. Catholic church. Pop. 1239.-2, Endred, or Gross Andra, a vil. Thither Danube, co. of. and 8 m . from Oedenburg. It contains a parish church. Pop. 738.

ENFIELD, a market tn. and par. England, co. Middlesex. The rown, 9 m . N. by E. London, a station on the E. Counties railway, contains an ancient church, and five Dissenting places of worship, the remains of an ancient royal palace, and a handsome stone cross erected in 1826. The market has been some time discontinued, but two annual fairs are held; area of par. 12,460 ac. Pop. 9367.-2, A small tn. Ireland, co. Meath, 20. m. W. Dublin. Fop. (1841), 375.

ENFORD, par. Eng. Wilts; 7880 ac. Pop. 797.
ENGADIN [Italian, Engiadina], a dist. Switzerland, can. Grisons, forming the upper valley of the Inn, which rises in its S.W. extremity. The valley is about 40 m . long, terminating S.W. in Mount Maloya, and N.W. on the Tyrolese frontier. It is generally 3500 to 6000 ft . high, and is divided into Ober and Unter Engadin; produces cattle, hides, cheese, and butter; is one of the most picturesque of Swiss valleys, and is inhabited by an Italian race.

ENGANO, two isls. Indian Archipelago.-1, Off W. coast Sumatra, lat. (W. point) $5^{\circ} 21^{\prime}$ S.; lon. $102^{\circ} 10^{\prime} \mathrm{E}$. (r.) ; about 20 m . by 5 broad. It is high, surrounded by coral reefs, and yields batatas, rice, sugar-cane, bananas, and cocoa nuts.-2, Off N. coast Papua, in Great Bay, lat. $2^{\circ} 20^{\prime}$ S.; lon. $134^{\circ} 40^{\circ} \mathrm{E}$. (r.)

ENGANO (CAPE), the most E. point of island Hayti; lat. $18^{\circ} 35^{\prime} \mathrm{N} . ;$ lon. $68^{\circ} 20^{\prime} \mathrm{W}$. (r.)

ENGEDI, or AIN-JIDY, an ancient tn. Palestine, on W. margin of Dead Sea, at a point nearly equidistant from both extremities of the lake; about lat. $31^{\circ} 30^{\prime} \mathrm{N}$.; lon. $25^{\circ} 30^{\prime}$ E. The site lies among the mountains which here confine the lake, a considerable way down the descent to its shore. Here is the beantiful fountain of Ain-jidy, bursting forth at once in a fine stream, upon a sort of narrow terrace or shelf of the mountain, about 400 ft . above the level of the Dead Sea. Near this fountain are the remains of several buildings, apparently ancient; and in the vicinity are numerous caves, which serve as lurking-places for outlaws.

ENGELBERG, a vil. and par. Switzerland, can. Unterwalden, div. Ob-dem-Wald, in a lofty Alpine valley, on the $\mathrm{Aa}, 9 \mathrm{~m}$. E.S.E. Sarnen. It stands in a deep valley, 3220 ft . above the sea, hemmed in on all sides by lofty mountains, and contains a fine old Benedictine abbey, founded in 1120, occupied by about 19 monks. A silk-mill and cattle-rearing employ the inhabitants. Pop. 1481.

ENGELHARDSZELL, or Engelzell, a market tn. Upper Austria, r. bank Danube, $29 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Wels. It has an old parish charch, numerous fine monuments, a castle of Prince Wrede, and manufactures of porcelain and crucibles. Many of the inhabitants are fishermen. Pop. 1100.

ENGELHOLM, a tn. and seaport, Sweden, län Schonen, beautifully situated at the mouth of the Rönne, on the Kullavik, 54 m . W.N.W. Cliristianstad. It consists chiefly of a square and a single street, is clean and well built, has con siderable manufactures of gloves, and a trade both in them and in salmon. The harbour is encumbered with shifting sands, and is continually decreasing in depth. Pop. 1088.

ENGELSBERG, a tn. Austrian Silesia, circle of, and 26 m. W.N.W. Troppau, with a parish church; manufactures of linen, and a trade in yarn and thread. Pop. 2200.

ENGEN, a tn. Baden, Lake circle, on the Aach, 12 m . N. E. Schaffhausen. It contains an old parish church, in which are the tombs of the lords of Howen; and las several large fairs. The French, in 1800, here defeated the Austrians. Pop. 1472.

ENGENHO-do-Mato, a vil. and par. Brazil, prov. Minas Geraes, about 140 m. N.W. Rio-de-Janciro. It contains a parish cluurch, which stands 2416 ft . above sea-level. P. 3000 .

ENGER, a tn. Prussia, prov. Westphalia, gov. of, and $18 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Minden. It contains an old Protestant church, in which is a sarcophagus erected by the Emperor Charles IV., to the famous Saxon Wittikend, who is said to have been luried here; and has manufactures of linen, a trade in yarn and cattle, and three annual fairs. Much flax is grown in the vicinity. Pop. 1632.

ENGERS, Eungstein Engers, or Zoll Engers, a vil. Prussia, gov. of, and 5 m . N.E. Coblenz, on the Rhine. It has a castle, with a fine botanical garden and park; a R. Catholic church; a sandstone quarry, and two annual fairs. 1'op. 868.

ENGHIEN, a tn. Belgiam, prov. Hainaut, 16 m . N. by E. Mons. It has a fine old château, belonging to the Duke of Aremberg; a college, and several benevolent institutions; with manufactures of linen, lace, hats, and soap, and some dyeworks, breweries, tanneries, \&c. Pop. 3680.

ENGHIEN-les-Bains, a vil. France, dep. Seine-et-Oise, N. of Paris, near Montmorency, with some copious sulphureous springs, batlis, \&c., much visited from June till September.

## ENGIa, an island of Greece. See Fgina.

ENGLAND [Latin, Anglia; French, Angleterre; Italian, Inghilterra; Spanish and Portuguese, Inglaterra; German, England; Dutch, Engeland], forming, with Wales, the southern, larger, and more important division of the island of Great Britain; between lat. $49^{\circ} 57^{\prime} 42^{\prime \prime}$ and $55^{\circ} 46^{\prime} \mathrm{N}$.; and lon. $1^{\circ} 46^{\prime}$ E. and $5^{\circ} 42^{\prime}$ W. The boundary between it and Scotland, the N . division of the island, is not very well defined, but consists of a tract of moor and mountain, stretching, in a N.E. direction, from the Solway Firth to the Tweed. On all other sides it is washed by tha sea-on the W. by the Irish Sea or St. George's Channel, which separates it from Ireland, and has an average width of about 90 m. ; on the $\mathrm{S} . \mathrm{W}$. by the Atlantic Ocean, whose vast surges here beat incessantly and uncontrolled upon its shores; on the S. by the English Channel, separating it from France by distances which, commencing at 100 m . in the W., contract till they diminish to 21 m . at the Straits of Dover ; and, on the E., by the North Sea or German Ocean, separating it from Belgium, Hollard, and Denmark. Its contour is very irregular, the coast-line presenting an almost uninterrupted succession of curves, bays, estuaries, and headlands, the precise form of which can only be learned by minutcly tracing them; but, as it attains its greatest width on its S. shore, and narrows as it proceeds N., till it finally terminates almost in a point, its general shape may be described as that of a triangle, the base of which has its extremities at the Land's End and S. Foreland, while the sides are formed by straight lines, drawn from those two points, and converging till they meet at the town of Berwick. The three sides of the triangle thus formed measure, from Land's End to S. Foreland, 317 m. ; from S. Foreland to Berwick, 345 m ; ; and from Land's End to Berwick, 425 m. ; and thus, when added together, give a perimeter of 1087 m . This, however, is only a very distant approximation to the truth. When, instead of assuming imaginary lines, the distances between the principal headlands are measured, their aggregate amount gives a perimeter of 1200 m. ; and when, for the purpose of still greater accuracy, the actual curvature of the coast is traced, and the opposite sides of its estuaries are included, the perimeter is found to be not less than 2000 m . The space thus enclosed has a length, measured on a meridian, from Berwick nearly to St. Alban's Head, of 365 m . Its breadth, measured on a parallel of latitude, attains its maximum between St. David's Head, in S. Wales, and the Naze, in Essex, where it amounts to 280 m . Elsewhere it falls far short of this, when, as frequently happens, the estuaries of the W. and E. shores are situated opposite to each other. Hence, to the S. of the parallel already mentioned, the estuary of the Severn is only 116 m . from that of the Thames; and to the N. of it, the salt water of the estuaries of the Mersey and the Humber approach within 90 m . of each other. The shortest distance between the waters of the opposite shores is in the N., where the outlets of the Esk and Eden, in the Solway Firth, are only 62 m. from those of the Blyth and Wandsbeck, in the German Ocean. The exact area continued till a comparatively recent period to be rather conjectured than known. According to an early tradition, the area of S. Britain contained $29,000,000 \mathrm{ac}$. This computation, which appears to have been made in Saxon times, must have included only that part of England which

Vol. I.
was actually under Saxon dominion, and comes so near to the truth, as to leave little room for doubt that it must have been obtained either by actual measurement, or by means of those minute computations of superficial extent which the customary mode of levying land-revenue rendered necessary. In subsequent times, writers on geography or political arithmetic, apparently aware of the uncertainty of the data on which they proceeded, gave scope to their fancies, and estimated the area, variously, from $28,000,000$ to $47,000,000 \mathrm{ac}$. The first attempt to obtain a more accurate estimate was made by the celebrated ma'hematician, Halley; who, employing the two mans of highest authority in his time-one general, for the whole area of England and Wales, and the other on 80 large a scale as to allow the areas of the different counties to be calculated separately-found the area given by the former to be $38,660,000 \mathrm{ac}$., and that by the latter $39,938,500 \mathrm{ac}$. The difference, though exceeding $1,000,000 \mathrm{ac}$., was considered not greater than might have been anticipated in the circumstances, and the truth was generally supposed to lie somewhere between the two estimates. There cannot be a doubt that Halley calculated accurately from his maps, but these unfortunately were defective. In those of the counties nearest the metropolis, where the greatest accuracy might have been expected, gross blunders existed; and even the distance between the S. Foreland and the Land's End exceeded the truth by no less than half a degree. The trigonometrical survey commenced towards the end of the last century, for the purpose of measuring an arc of the meridian, corrected many of these mistakes, and, by ascertaining the exact variations in the length of degrees of latitude and longitude, within the space over which England and Walcs extend, furnished an easy means of calculating their area. The process is tedious, and was first performed for a collateral purpose by Dr. Beke, who, dissatisfied with Mr. Pitt's assumption of an area of nearly $47,000,000 \mathrm{ac}$. as the basis of his estimate of the produce of the Income Tax, determined to test its accuracy. He accordingly subdivided the whole surface into a series of minute parallelograms, formed by the intersection of lines of longitude and latitude, at the distance of a minute or the sixtieth part of a degree from each other, and, by adding all the separate areas, obtained an aggregate area of $38,498,572 \mathrm{ac}$. To this a conjectural addition required to be made for inequalities of surface, more especially in the more mountainous districts; but, after all, Mr. Pitt's assumed area was proved to be not less than $8,000,000 \mathrm{ac}$. in excess. More recent investigations have discovered that a deduction of nearly $1,500,000 \mathrm{ac}$. still remained to be made. The true area is now understood to be $36,999,680 \mathrm{ac}$., or $57,812 \mathrm{sq} . \mathrm{m}$., of which 50,387 are in England, and 7425 in Wales; but there is still a lurking error of considerable magnitude, as the general and aggregate areas, instead of coinciding, show a disagrcement of $720 \mathrm{sq} . \mathrm{m}$.
The civil or political divisions of the area have necessarily undergone repeated changes. At the invasion of the Romans, it appears to have been portioncd out among a number of half savage and independent tribes, of which the Danmonii occupied the S.W.; the Durotiges, Belgae, and Regni, the S.; the Cantii, the S.E.; the Trinobantes and Iceni, the E.; the Brigantes and Ottoduni, the N.; the Silures, Dimetao, and Ordovices, the W.; and the Catecuchlani, Dobuni, Cernovii, and Coritani, the centre. Under the Romans, the principal divisions were Britannia Prima, comprehending the whole of the S. as far as the estuaries of the Severn and Thames; Britannia Secunda, nearly equivalent to Wales; Flavia Caesariensis, occupying the centre from the Thames to the IIumber; Maxima Caesariensis, stretching across the island to the opposite coasts, from the Humber to the Tyne, on the E., and the Mersey to the Solway Firth, on the W.; and, lastly, Valencia, occupying the remainder of the N., and extending indefinitely into Scotland. The next great division was the Saxon Heptarchy, so called from the aeven petty kingdoms of which it consisted. It is probable that, even during their subsistence, the modern division into counties had begun to be established, but it does not appear to have assumed a definite form till the time of Alfred the Great, who subdivided his dominions into 32 counties, with the names, and nearly the boundaries, which they still retain. The existing division was first completed in the time of Henry VIII., by Stat. 34, c. 26, which increased the 32 English countics of Alfred
to 40 , by the addition of the three N. counties of Northumber- $\mid$ variety of other changes, of which the most important was
land, Cumberland, and Westmorland, of which the Scots long had de jure or de facto possession; by the formation of Lancashire and Durham out of parts of Yorkshire ; of Cornwall, out of part of Devon; and Rutland out of Northampton, and the annexation of Monmouth to England; and introduced a
the complete incorporation of Wales with the English monarchy, and its subdivision into 12 counties. The names, areas, and population of the different counties, with other matters of statistical importance to be afterwards referred to, are given below :-

England and Wales, viewed as part of the United King. dom, has necessarily many heads, in common with Scotland and Ireland. These properly belong to the general article, British Empire, in which the most important of them lave already been considered; and, therefore, to avoid repetition, the remainder of the present article will be chiefly devoted to those points in which England and Wales may be considered as presenting peculiar features, or possessing peculiar institutions.

General View.-It would be difficult, if not impossible, to point out a portion of the earth's surface, of equal extent, for which nature and art have done so much as for this portion of Great Britain. Situated near the centre of the temperate zone, where heat and cold are seldom in extreme, and are,
moreover, greatly modified by the seas which wash its shores, it enjoys a climate under which, if ordinary care is used, the most valuable productions of the vegetable kingdom are easily matured ; and animal life, also, not only in its lower grades, but in man himself, grows vigorously, and assumes its finest forms. In accordance with the excellence of the climate, are the beanty of the scenery, and the fertility of the soil. It is true, indeed, that some districts are covered with rugged, sterile mountains, or elevated tracts of barren moor, and that, in others, low monotonous flats occur, where much of the rain which falls becomes permanently stagnant, or slowly finds its way into sluggish streams, which are scarcely able to force their passage to the sea. These, however, are only exceptions, and even serve. by contrast, to render the general
rule more conspicuous. After deducting all the land which can be considered absolutely waste, there still remain, out of the $57,812 \mathrm{sq} . \mathrm{m}$., no less than 51,000 available for cultivation, and consisting, generally, either of rural districts, where hill and valley, woods and rivers, magnificent domains, fields of corn, and meadows of richest verdure, unite in forming landscapes of unrivalled beauty, or of manufacturing districts covered with large and populous towns, in which all the great branches of manufacture and commerce have fixed their chosen seat.
Particular Features.-The loftiest heights of England and Wales are situated at no great distance from its W. shores, and consist, not so much of a continuous chain as of a succession of mountains and hills, stretching, with some interruptions, from N. to S., and throwing out numerous branches on both sides, but particularly to the W., where all the culminating summits are found. The N. portion of this range has received the name of the Pennine chain. It is properly a continuation of the Cheviot hills, and, commencing at the Scottish border, proceeds S . for about 270 m ., gradually lowering till, in the counties of Derby and Stafford, it assumes the form of an elevated moorland plateau. Its principal offsets to the E. are in Northumberland and Durham, where they stretch, almost without interruption, to the coast, form the moorlands of those countics, and separate the valleys of the rivers Tyne, Wear, and Tees, which all take their rise in the chain. Several minor offsets proceed into the great plain of Yorkshire, and are finally lost in it. The Ouse, and numerous other streams by which this plain is so liberally watered, have also their sources in the chain. But by far the most important offsets are those of the W., more especially if we include in them, as we properly may, the lofty mountain masses which, from being most largely developed in Cumberland, are sometimes elassed separately under the name of the Cumbrian range. This range, which links with the Pennine chain, on the E. borders of Westmorland, covers a considerable part of that county, stretches across it, and, almost immediately after passing its border, attains, in Scafell, the height of 3166 ft . The heights next to it are Melvellyn, 3055 ft ., and Skiddaw, 3022 ft ., but several others nearly equal them, and usually retain their covering of snow from six to cight months. The proximity of these mountains to the W. coast, and the barrier interposed by the principal Pemnine chain on the E., make it impossible for them to be either the sources or the feeders of any lengthened streams, and hence, perhaps, it is that, having no more immediate outlet for the vast quantities of moisture which they necessarily attract from the overcharged clouds of the Atlantic, they have accumulated it in a number of magnificent reservoirs, which give a pcculiar charm to the romantic scenery of the distriet. The distance of the Pennine ehain from the W. coast, widening considerably as it proceeds southwards, furnishes space for the course of two important streams-the Ribble, the estuary of which, in early times, before eneroaching sands had nearly choked its entrance, formed an admirable roadstead; and the Mersey, at whose mouth an insignificant haven of the last century has rapidly grown up into the second port of the kingdom. The Pennine chain, with its appended Cambrian range, is succeeded by one which surpasses it, both in the loftiness of its mountains and the extent of space covered by them. Viewed as the central portion of the great longitudinal chain, it properly begins where the northern portion terminates, in the Derby and Staffordshire moorlands, and proceeds southwards in the line of the Wrekin and other hills of Salop, the Malvern hills between Hercford and Worcester, and the Cotswold hills in Gloucester. The several hills now mentioned are not remarkable for their elevation, but owing partly to their central position, and partly to the extent of surface which they occupy, they constitute one of the most important watersheds of the country, and furnish several of its largest rivers with their most important supplies. Still, however, the great nucleus of the range must be sought much further to the W., where it covers the greater part of the principality of Wales, and has been designated, from its ancient name of Cambria, as the Cambrian range. Its principal ridge stretches through Carnarvonshire, from N.N.E. to S.S.W., ascending gradually from cach extremity, till near its centre, it attains in Snowdon 3571 ft ., the culminating point of s . Britain. Plenlymmon, in the S.W. of Montgomery, is thuch inferior in height, being only 2463 ft .

In mass, however, it surpasses Snowdon and every other mountain of the range, and may justly claim precedence of thein all as the source of the Severn. The last part of the longitudinal chain has received the name of the Devonian range. It may be considered as commencing in the Mendip hills of Somerset, and then pursuing a S.W. direction through that county, and the counties of Devon and Cornwall, to the Land's End. Its culminating point, Yestor Beacon, near Okehampton, in Devonshire, is 2077 ft ., and the wild and desolate tract of Dartmoor forest, belonging to the range, and forming one of its most remarkable features, is said to have an elevation of 1700 ft . The average height of the range falls far short of this, and cannot be estimated higher than 1000 ft . In addition to the principal ranges which have now been mentioned, there are a number of others which, though of inferior elevation, are so distinctly marked, and have so much influence in determining the general features of the country, that a distinct idea of it cannot be obtained without adverting to them. One of these, which may be considered as a continuation of the Cotswold hills of Gloucester, proceeds in a N.E. direction, between the counties of Warwick and Leicester, on the left, and Oxford, Nottingham, and Rutland, on the right, forming the principal watershed between the basins of the Wash and the Humber. Most of the other ridges may be considered as having a common point of departure in the county of Wilts. The most southerly, commencing near the town of Salisbury, proceeds eastward through Hampshire and Sussex, inclining gradually to the S. till it reaches the coast, near Beachy Head. Another ridge, to the N. of the former, takes a direction nearly parallel to it, across the N. of Hampshire, and the centres of Surrey and Kent, finally bending round to the S.E. and reaching the coast at Folkestone. The third, and longest ridge of all, is very circuitous. First, describing nearly a semicircle in the northern part of Wiltshire, it stretches $\mathbf{E}$., across the centre of Berkshire, then N.E., through Oxford and Bucks, and between Bedford and IEertford, and Cambridge and Essex. On reaching the W. borders of Suffolk it takes a northerly direction through that county, and the W. of Norfolk, till it reaches the S . shore of the Wash. Though lost beneath that estuary, the hills, which commence almost opposite to it on the N. shore, are evidently its continuation. Its direction is now N.N.E., through the E. of Lincoln, to the S. bank of the Humber, at Ferriby. Reappearing on the opposite side of the river, it proceeds northwards, through Yorkshire, where it takes the name of the Hambledon hills, and at last spreads out into a large tract of moorlands. The principal and secondary ridges which have been described, forming what may be ealled the framework of the country, give shape and limits to its valleys and plains, and determine the course of its rivers. To these, therefore, it will now be proper to advert.

Valleys, Plains, and Rivers.-Beginning in the N., where, from the extent of surface oceupied by mountains and moorlands, and the comparative narrowness of the island, the open space left is very limited, the first valleys which we meet with on the E. side are those of the Coquet and Tyne, the former not large, but very fertile, and the latter, though beautiful and romantic in its upper part, more remarkable in its lower for the treasures beneath its surface than for the richness of its soil. To the $S$. of these is the vale of Stockton, bounded on the $N$. by the highlands of Durham, and on the $S$. by the E. moorlands of Yorkshire. Its length, measured by the Tees, which traverse it, is nearly 40 m ., and its breadth, where widest, about 15 m . On the $W$. side of the island, nearly opposite to it, commenees the beautiful valley of the Eden, which, at first hemmed in between the Cumbrian range and Pennine chain, gradually widens as it proceeds northwards, and finally spreads out into a wide plain of about 300,000 acres, with the town of Carlisle in its centre. One remarkable circumstance connected with it is the course of its river, which, with the exception of the Trent, is the only one of any importance in England which flows in the main northerly. The next valley or plain which attracts our notice is in some respects the most important of all. It is known by the name of the Vale of York, and has an area of nearly $1000 \mathrm{sq} . \mathrm{m}$. In the N. it unites imperceptibly with the Vale of Stockton, and is skirted by a number of small sliallow lakes; moorlands proceeding from the Pennine chain bound it on the W., and the Hambledon hills, already mentioned, on the E.; in the S. it sinks down into the marsh lands which line the N. bank of the

Humber. Beyond this vale, on the E., is that of Pickering, in the form of an imperfect oval, of which the longer axis is 35 m . and the shorter 10 m ., and the area about 190,000 acres. To all appearance it is the bed of an ancient lake. To the S. and E. of it is the district of Holderness, an extensive flat, bounded on the E. by the German Ocean, and on the S. by the Humber, and generally composed of a rich alluvium, the productive powers of which appear to be all but inexhaustible. Its area exceeds 400 sq. m. This plain is usually considered to stop here, because its continuity is broken by the Humber, but properly speaking it is still the same plain which stretches, with scarcely a single interruption, across the counties of Lincoln, Suffolk, and Essex, to the mouth of the Thames, and to a considerable distance inland, occupying a large part of several of the counties immediately to the W. Returning again to the opposite side of the island, we meet with several flat and fertile tracts in Lancashire, particularly along the conrse of the Ribble, and in the plain which lies between it and the Mersey. This plain, not confined to the N. bank of the river, but continued along its S . bank into Cheshire, includes in it the rich and beautiful vale of Warrington. Passing over Cheshire, in which, notwithstanding the ridges which traverse its W., and the heights which bound its E. side, there is much level land, we are brought to the confines of Wales. The nature of the country here almost precludes the possibility of extensive plains, and gives the valleys generally a narrow rugged form, which, however favourable to romantic beauty, is not very compatible with great fertility. Still favoured spots do occur. Among others may be mentioned the valley of Clwyd, chicfly in Denbigh, but partly also in Flintshire, extending along both sides of the river of its name for about 20 m ., with a varying breadth of 8 or 9 m ., and so superior in appearance to the general aspect of the surrounding districts, as to have gained the surname of the Eden of N. Wales. Nor can the S . division of the principality be considered destitute of vales, while it has that of the Towy, in Caermarthenshire, and the rich alluvial vale or flat which lines the shore of Glamorgan in the Bristol Channel, and stretches inland from 8 m . to 10 m . Wales, too, by giving rise to the Severn, can justly claim part in its vale or series of almost unrivalled vales, along which it pursues its romantic course through the counties of Montgomery, Salop, Worcester, and Gloncester. The chief vales of the W. counties, as far as the Bristol Channel, and of the E., as far as the mouth of the Thames, have now been mentioned. Of those of central England no notice has yet been taken; but though they are numerous, they need not detain us long, as they are in general more remarkable for their fertility than their extent. As specimens may be noticed the grassy vale of Aylesbury, near the centre of Bucks; that of Catmose, forming a considerable part of Rutland; and that of Belvoir, which follows the course of the Trent, through Nottingham, to the borders of Leicester and Lincoln. In proceeding $S$. we are first attracted by the name of Salisbury Plain, occupying a large portion of S. Wilts. But it is only in name that it can be classed with the other plains and level lands of England, as it has a character peculiarly its own. It is in fact an elevated plateau, of an oval shape, extending about 22 m . from E. to W., and 15 m . from S. to N., and covered generally with a thin chalky soil, too unsubstantial to reward the labours of the plough, and applied to its best use when left undisturbed to form a green sward for the pasture of sheep. Among the remarkable features which it presents, must not be forgotten the huge Druidical blocks of Stonehenge. Immediately to the N.E. of it, is an extensive tract of similar but rather more rugged appearance, called Marlborough Downs. From both tracts a number of streams descend and pursue different directionsN., E., and W. In the S.W., the only vales deserving of notice are those of Taunton in Somerset, and Exeter in Devon, the former containing about 100 sq. m., and the latter 200 sq. m. They lie at no great distance from each other, being only separated by the Blackdown Hills, and possess a beauty, and fertility, rendered still more striking by contrast with the rugged hills and barren moors of the neighbouring districts. A large portion of the S.E. may be regarded as a continuous plain, consisting of what are called the Wealds of Sussex, Surrey, and Kent. It is bounded on the N. and N.E. by the secondary range of hills above described, as terminating near Folkstone ; and on the S., for the most part, by the S. Downs,
and contains an area of about 1000 sq. m., having a length from W. to $E$. of 65 m ., and a breadth varying from 8 to 15 m . As indicated by the Saxon name of Weald, it was originally a forest or hunting ground, occupied chiefly by herds of deer. The soil is not naturally rich, being principally composed of a stiff heavy clay, and occasionally of a sandy and gravelly loam. It is, however, well cultivated, and affords a good specimen of the great and beneficial changes which industry and skill are able to accomplish. The primeval forest has disappeared, but magnificent oaks, for which the soil is well adapted, are still numerous, chiefly in hedgerows or around the enclosures, so as to give the whole district a finely wooded appearance; rich corn fields or luxuriant pastures extend on every side as far as the eye can reach, while the numerous towns, villages, country-seats, farm-houses, and hamlets, bear testimony at once to the opulence, comfort, and density of the population. Few scenes can be imagined more delightful than that which the Wealds exhibit, when overlooked from the adjoining hills. The S.E. angle of this district is occupied by the Romney Marsh, an extensive level tract, which. taken by itself, contains $24,000 \mathrm{ae}$., but with the addition of several other small marshes, which properly form part of it, is not less than $46,000 \mathrm{ac}$. The soil is not of equal quality throughout, but is composed, for the most part, of a rich marine deposit, the whole tract having been not so much recovered as conquered from the sea. In summer it is luxuriantly verdant, and presents the appearance of one vast meadow, covered with herds of cattle and flocks of sheep; but lying so low, that the water which collects upon it can only escape at ebb tide through flood-gates in the lofty embankment, which secures it from inundation, it is by no means favourable to health. Its inhabitants are few in number; and too often, by their sallow looks, justify the description which has been given of its air, as, 'in winter bad, in summer worse, and at no time good.' The mention of Romney marsh, reminds us of other extensive tracts of a similar nature, comprehended under the general names of marsh lands and fens. These are situated partly in Somersetshire, on the shores of the Bristol Channel, and the estuary of the Severn; but more especially on the E. coast, in Yorkshire and Lincoln, where they are washed by the Humber; and in the counties which either border the Wash, or, like Nortbampton, Bedford, Huntingdon, and Cambridge, send their drainage into it, by the Nen and the Ouse. Many of these lands are naturally the richest in the kingdom; but their possession is held by a somewhat precarious tenure, and at the expense of an incessant struggle with the sea, which, having once made them part of its domain, threatens to resume them. In this strife between man and the elements, it long remained very doubtful whether he was ultimately to prove the victor. By means of gigantic cuts, of which that known by the name of the Bedford Level, is the most celebrated, thousands of acres were laid dry, and apparently placed beyond the reach of danger; but large tracts still remained, on which, from excessive moisture, no crops could be raised, or what was in some respects still more grievous, after being raised they were frequently destroyed. In these circumstances, the same mighty engine which has achieved so much in the other departments of industry, was called into requisition, and has accomplished wonders. The idea of lifting up the surplus water, which could not otherwise escape, and sending it off at a higher level, had early occurred, and the embankments of the fens were studded over with wind-mills, which, setting water-wheels and other hydraulic machines in motion, did essential service when the wind blew. But unfortunately the wind did not always blow, and the air was often as stagnant as the water at the time when its active scrvices were most required. The steam engine has no such defect. The moment it was introduced, its superiority was so apparent, that wind-mills have been almost entirely superseded; and, in a paper read to the British Association 'On the application of steam power to the drainage of marshes and fen lands,' Mr. J. Glynn states, that he alone has applied it in 15 districts, and drained $125,000 \mathrm{ac}$. The extent of fen land, meclianically drained, is moderately estimated at $1000 \mathrm{sq} . \mathrm{m}$. , and the benefit to the country is nearly the same as if a rew county, equal in extent to Dorset or Durham, and of the greatest fertility, had been added to its surface.

Several of the rivers have been incidentally referred to in tracing the valleys and plains which are watered by them, and
us each river, of any importance, moreover, is separately described at length uider its own name, it seems unnecessary to do more here than to give a general idea of the principal basins to which the drainage of the country belongs. The opposite sides of the island being necessarily on the same level, and its principal watershed consisting of a mountain chain which extends longitudinally from N. to S., it is easy to understand how the general course of the rivers must be in the opposite direction of W. or E., according to the slope of the watershed in which they take their rise. In the same way, it is easy to understand how the transverse ridges which branch off from the ehain divide the surface into a series of river basins, and by fixing the boundaries, determine the area occupied by each. In the N . the distance between the two shores is so narrow, that there is no room for the formation of an extensive basin, and hence the drainage is effected by a number of comparatively small streams, which, instead of communicating with each other, retain their own independent ehannels, and proceed directly to the sea. The same rule holds in the S., where, by the interposition of transverse ridges, only a very limited tract slopes, so as to send its waters to the English Channel. The extremities of the country being thus excluded, its larger basins are necessarily confined to its more central portion. They are four in number - the Thames, Wash, and Humber, belonging to the German Ocean; and the Severn, belonging to the Atlantic. The basin of the Thames has its greatest length from E. to W., 130 m ., and its average breadth about 50 m . It may be considered as commencing $W$. with the river itself, in the Cotswold Hills, and ineludes, on its N. side, a considerable part of the N.E. of Gloucester, the whole of Oxford, the far greater part of Bucks, the whole of Middlesex, almost the whole of Hertford, and the W. and S. of Essex. Its S. side includes the N. of Wilts, the whole of Berks, and a narrow belt across the N. of Hampshire, with a very small exception, the whole of Surrey, and the far larger part of Kent. On the S. it is bounded by the narrow tract which forms the N. basin of the English Channel, and in which the Avon is the principal stream; on the W. by the basin of the Severn, on the N. chiefly by the basin of the Wash, but partly also by the small independent basins of the Crouch and Blackwater in the E. of Essex. Its area is 6160 sq. m. The basin of the Wash, consisting of the subordinate basins of the Great Ouse, Nen, Welland, and Witham, which all empty themselves into that estuary, is of an irregular shape. Its S . and larger portion, ineluding the whole three first-mentioned basins, is irregularly oval ; while the N. portion, confined to that of the Witham, is nearly square. It receives the whole drainage of the connties of IInntingdon, Rutland, and Cambridge, almost the whole of those of Northampton and Bedford, considerable portions of those of Lincoln and Norfolk, and a small part of that of Suffolk. It is bounded, S.E. by small independent basins, chiefly those of the Stowe and Yare, S. by that of the Thames, W. by those of the Thames and Severn, and N. W. and N. by that of the IIumber. Its area is computed at $5850 \mathrm{sq} . \mathrm{m}$. The basin of the Severn consists of two distinct portions lying on its opposite banks. That on the r. bank is of an irregularly oval shape, and has for its principal tributaries the Teme and the Wye. It commences at Plenlymmon, on the E. frontiers of Cardigan, at not more than 13 m . from the W. coast, and includes a large belt on the S. and E. of Montgomery, the S . half of Shropshire, the W. parts of Worcester and Gloucester, the whole of Radnor, Hereford, and Monmouth, almost the whole of Breeknock, and the larger part of Glamorgan. The portion of the Severn basin on the 1 . bank borders, in the N., on the basins of the Dee and Mersey, and in the E. on those of the Humber and Thames, and with the exception of its E. part, which projects far between the basins of the Ouse and IIumber, and is drained by the Upper Avon, consists of an irregular tract, stretching first from W. to E., and then from N. to S. , and so narrow as not to average above 12 m ., and sometimes not to exceed, even in the lower part of its course, as to the E. of Gloucester, 7 m . On this bank, accordingly, the present strean has no tribntary of the least consequeuce, with the exception of the Upper Avon, already mentioned, and the Lower Avon, which only joins it at its estuary. The counties from which this part of the basin receives its supplies, are a large part of Montgomery, the N. part of Shropshire, the larger parts both of Worcester and

Warwiekshire, a long strip of Gloucester, lying between the river and the Cotswold hills, the N. W. of Wilts, and part of the N. of Somersetshire. The area of the whole Severn basin is $8580 \mathrm{sq} . \mathrm{m}$. The next basin, that of the Humber, has the largest area of all. It forms a quadrilateral figure, the longest side of which extends from the W. cf Warwickshire, a little S . of the town of Birmingham, to the N. frontiers of Yorkshire, beyond the town of Richmond 145 m . Its greatest breadth, measured from the Humber W., is about 85 m . In the N.W., opposite to Morecombe Bay, it approaches within 22 m . of the W. coast. It consists of the three basins of the Humber proper, the Ouse, and the Trent, and receives the drainage of at least three fourths of Yorkshire, the far larger part of Stafford, a part of Warwick, nearly the whole of Derby and Leicester, the whole of Nottingham, and the N. part of Lineoln. On the N. it is bounded by the basin of the Tees; on the W. by small independent basins, of which the largest are the Ribble and Mersey; on the S.W. and S. by that of the Severn; and on the S.E. by that of the Wash. Its whole area is $9550 \mathrm{sq} . \mathrm{m}$., being about one-sixth of the whole area of England and Wales. The following Table, of which the data are furnished by Petermann's Hydrographical Map of the British Isles, exhibits the areas of the larger basins now described, as well as those of the independent minor basins, in the order of their magnitude :-

Mfeans of Communication.-Of these, the most important in the present times is the railway system, which, like a vast net-work, stretches over all parts of England, excepting the central part of Wales, the county of Cornwall, and the W. parts of Devon ; comnecting all the principal cities, towns, and scaports, and conveying daily, from one to another, thousands of passengers, and tens of thousands of tons of goods; the aggregate length of the lines in working operation is abont 5000 m . In connection with the principal of them, another more subtle and more rapid means of intercourse has been established, intelligence being conveyed from one end of the country to the other, and, by submarine wires across the Straits of Dover, to all parts of the Continent, with lightning speed, by the electric telegraph. Of still greater extent, and not less important in their department, are the common roads, of which there are $191,531 \mathrm{~m}$; affording easy means of access to the most secluded districts of the country, and forming veins along whieh the traffic passes to the great arteries of transit-the railways and canals. Besides numerous navigable streams, England possesses 2511 m . of canal. One principal line, proceeding across the island, connccts the Mersey with the Humber; another connects the Severn with the Thames. A third principal line cuts the other two transversely. Begimning in the N. at Kendal, it proceeds S., passing or commmnicating by branches with all the great towns of central England, and uniting them all to the metropolis, and thence continues onwards to Portsmouth.

C'uast Line.-This forms an important part of the geography of every maritime country, and, in the case of such a country as England, requires to be particularly attended to, because it not only furnishes an accurate idea of its contour, but throws great light on its general structure. Commencing then at Berwick, the N. extremity of its E. eoast, we are presented with a sweep of sandy shores, and an island of a similar description, separated from it by a narrow channel. On reaching Bamborough castle, a considerable change takes place. The Fern islands, opposite to it, compose a roeky group, and the castle itself oceupies a promontory forming the commencement of a range of low eliffs, which are continued to the Tyne, and terminate in the bold rain of Tynemouth castle. Beyond the month of the river, the coast becomes bleak and dreary till Sunderland is passed, when it rises into rocky cliffs, hollowed out into deep caverns by the action of the waves. A
flat shore succeeds, but soon again gives place to rocks of inagnesian limestone, the loftiest of which form the promontory on which the town of Hartlepool is seated. Here, by means of piers and docks, a tolerable harbour has been formed, at which vast quantities of coal are shipped. With Hartlepool, forming the N. extremity of the mouth of the Tees, the county of Durham terminates, and, with the S. extremity, the coast of Yorkshire begins. It is for the most part bold, and, in many places, rises into abrupt and naked precipices, 300 ft . in height. Of these, the most conspicuous is Flamborough Head, a round and rocky promontory of chalk projecting far into the sea, and crowned by the castle, while its side is occupied by the town of Scarborough. Many of the cliffs in the neighbourhood of Flamborough Head are worn into caves and needles, and, being decomposed by the salt spray, slowly crumble down and disappear. The Yorkshire coast retains the same character to its termination in the sickle-shaped pro montory of Spurn Point; but the cliffs, consisting frequently of an intermixture of beds of clay, sand, gravel, and chalk rubble, decompose still more rapidly than the chalk. The strong current, formed by the great tidal wave of the Atlantic, which rushes through the Pentland Firth, and sweeps S. along the whole of the E. coast of Britain, is continually preying upon these cliffs and headlands. and, greatly aided by the undermining process carried on by land springs, has already committed such ravages as to give some ground for fear that it will ultimately convert Spurn Point into an island, and, bursting by the new channel into the Humber, cause great devastation. There cannot be a doubt that the month of the Humber has already been the scene of similar disasters, and that the fen lands of Lincoln, which have been recovered by warping and embankment, only form part of more extensive tracts, which, though once dry land, are now buried by the waves; indeed, along great part of the Lincoln coast, a submarine forest is still distinctly traced. By crossing the wide bay or estuary of the Wash, we reach a coast of a somewhat different character, forming a convex line, which curves round the shores of Norfolk and Suffolk. These shores consist of alternate stretches of rocky cliffs and low sands, and furnish interesting examples of the very opposite effects produced by the action of the waves. The cliffs are composed, generally, of masses of chalk, resting on low arenaceous beds or strata of gravel, clay, and sand, alternating like those of Yorkshire, already described. On these the waste is incessant and rapid. Villages, manors, and large portions of parishes have been devoured piecemeal, and the whole site of ancient Cromer now forms part of the German Ocean. On the other hand, where low sands prevail, the agency of the waves appears to be paralysed. What might be thought the frailest barrier, not only opposes an effectual resistance, but acts on the offensive, and has made large conquests from the sea. Thus Yarmouth is built on sands, which first became firm and habitable in 1008 . Since then a line of downs has been formed, and continued to increase in height and breadth, so as to silt up the whole of the original estuary, and give no ingress to the tides except by the narrow passage which the Yare keeps open. In like manner, Norwich, now situated near the centre of the E. division of Norfolk, is represented in the 13 th and 14th centuries as standing on an arm of the sea. The Suffolk coast terminates at the mouth of the Stour, opposite to Essex, where stands the town of Harwich. possessing the first good harbour which we have met with on the E. coast. The possession, however, is somewhat precarious. The wasting process, already described, is here proceeding unchecked, and large parts of the peninsula on which the town is situated have disappeared within very recent times. The cliffs, composed of horizontal beds of London clay, fall an easy prey to the waves; and the removal of the septaria which they contain, for the purpose of making Roman cement, by depriving the beach of its protecting shingle, hastens the work of destruction. The Naze, a hooked promontory to the S. of Harwich, may be considered as the N. extremity of the estuary of the Thames. Its opposite extremity is the N. Foreland, expressly declared by statute to be the most $S$. part of the port of London. Between this point and the S. Foreland, the Kentish coast lies low, and, being marshy and sandy, would seem, at first sight, to indicate that, like the low shore of Norfolk, it has been gained from the sea. An old tradition asserts the contrary. About 7 m . distant from the shore, a
long range of sands stretches from N. to $S$. for 10 m ., with a varying breadtl, which amounts sometimes to 3 m . These banks, the well known Goodwin Sands, lie so near the surface as to be extensively laid bare at low water; and the tradition is, that they originally formed part of the extensive estates of Earl Goodwin, the father of Harold, who died in 1053, and about that time were overwhelmed by a flood. The tradition received some confirmation in 1817, when one of the shoals, on which it was proposed to erect a light-house, was ascertained, by borings, not to be a mere accumulation of sea sand, but to consist of 15 ft . of sand resting on blue clay. The Goodwin Sands are the most dangerons on the English coast, and numerous shipwrecks annually take place upon them; but they have had one good effect. By breaking the force of the waves, they have converted the channel, between them and the shore, into the celebrated roadstcad of the Downs. Towards S. Foreland, the coast becomes elevated, and forms lofty precipices of chalk, among which the beetling cliffs of Dover are conspicuous. On the opposite coast of France, similar cliffs appear; and it has often been remarked, that the projections of the one coast have corresponding indentations on the other. The shortness of the distance across the strait, and the fact that the depth of the sea shallows very much on both sides in approaching them, seem to countenance the idea that England was at one time united to the continent, and became an island, either by the force of some sudden convulsion, which at once burst the barrier, and sent the Atlantic, in full flood, into the German Ocean, or by some wasting process continued, without interruption, through almost countless years, till the barrier was quietly consumed. The identity of the chalk on the opposite coasts, leaves no room to doubt that the formation to which it belongs was at one time continuous; but it by no means follows, that the dry land of England was ever contiguons to the dry land of France. They may, or rather, perhaps, must have been contiguous, when the chalk of which they consist was precipitated from water, and deposited at the bottom of the sea; but whether the whole formation was heaved into dry land at once, or whether the opposite coasts rose at the same or different times, and left the intervening portion of the formation undisturbed in ita ancient ocean, covered with the deep, as at present, are points which the want of proper data makes it impossible to decide without presumption. The Dover, and other cliffs on this shore, are continually diminishing in lieight, and with the greater rapidity, in consequence of sloping to the shore. A great landslip in 1810 shook the town like an earthquake. One still greater occurred in 1710 . In consequence of these falls, Shakespeare's Cliff has probably ceased to be as fearful and dizzy as it was when he described it. The coast now stretches S.S.W., retaining its elevation beyond Folkestone, till it subsides into the low tract of Romney Marsh, which has already been described. Beyond this we reach the coast of Sussex. At its commencement the beach continues low, and a considerable tract of ground has been gained, placing the town of Rye, which once stood close upon the sea, about 2 m . inland. An elevated beach near Hastings is succeeded by the low and marshy level of Pevensey, beyond which a sudden change takes place. A long chalky ridge coming from the $W$. bends round to the sea, and abruptly terminates in the promontory of Beachy Head, which hangs perpendicularly over the shore, and has a height of 564 ft . The bold rocky coast thus formed stretches for some distance to the W., and is the most dangerous on the English side of the channel. A long sweep of shore, with the South Downs for its background, brings us to Selsey Bill, the most S. point of Sussex. From this point a low flat leads to the W. extremity of that county. Hitherto the $S$. coast has proved as barren of harbours as the $\mathbf{E}$. coast; but it no longer continues so. The coast of Hampshire is not only deeply indented, but guarded by a barrier of islands, especially the Isle of Wight, so placed as to break the force of the winds and waves, and afford behind them an ample expanse of smooth water, easily approached, and deep enough to float the largest vessels. In one of these indentations is the harbour of Portsmonth, the largest naval arsenal of England, and consequently of the world. Proceeding along the Isle of Wight, which belongs to, and appears to have been at some remote period actually united to Hampshire, and passing those well-known rocks, the Needles, in which the high ridge of chalk, which stretches
across the isle from E. to W., so remarkably terminates, we are brought to the E. extremity of the coast of Dorset, where the waves have cnt deeply into the soft sands and loams of Poole Bay, and where, by the action of the frost, great landslips are frequently produced. Immediately to the S . of this is the so called Isle of Purbeck, celebrated for its quarries, chiefly of a limestone which, from taking a polish, gets the name of Purbeck marble. The most $S$. point of the isle is St. Alban's Head; and from it the coast, curving slightly, stretches almost due W. till near Melcomb Regis, when it suddenly turns S., forms the Bay of Weymouth, and terminates in the remarkable insulated headland, known by the name of the Isle of Portland. This consists of an immense mass of freestone, admirably adapted for building, and extensively quarried. It is surrounded by high and inaccessible cliffs, from which vast masses, undermined by the waves, are often thrown down; but is not truly an island, the long narrow projection, called Chesil Bank, which consists of a singular aceumulation of pebbles, and extends about 9 m . N.N.W. along the coast, at a short distance from the mainland, becoming finally united to it. This extraordinary barrier rises from 20 to 30 ft . above ordinary high water mark, and is one of the most curions features presented by the S. coast. From it the land sweeps round in a N.W. direction to the W. extremity of Dorset, at Lyme Regis, where lofty cliffs of lias are wasting away at an average rate of one yard annually, and then in a S.W. direction, along the county of Devon, as far as Torbay. Here the geological structure of the coast undergoes a remarkable change. From Berwick, S. to the Straits of Dover, and thence W. along the English Channel to our present position, various sections of strata have appeared; but the prevailing rocks have been chalk, and beds lying sometimes immediately below, but more frequently above it. From Torbay, W. to the Land's End, and thence N. to the Solway Frith, the chalk does not again appear, its place being supplied by rocks of earlier date, and generally of firmer texture. Torbay forms a beautiful semicircular expanse, the N. and S. sides of which are skirted with ramparts of rock belonging to the Devonian system, while its central shore is the level termination of a valley, which slopes gently down from the interior to the water's edge. The spacious basin thus enclosed varies in depth from 6 to 9 fathoms, and having a bottom of strong clay, affords excellent anchorage. The coast now continues S.S.W. past Dartmouth, which possesses an excellent harbour, to Start Point. From this noted promontory it proceeds W.N.W., presenting a succession of bold headlands and intervening bays, till the W. borders of Devon are reached. Here, between that county and Cornwall, at the confluence of the Plym and Tamar, the great harbour and docks of Plymouth have been formed. The width and depth of the estuary, and its complete shelter on the N.W. and E., together with its important position in the channel, evidently marked it out as a great naval station; but it unfortunately lay open to the S. , the heavy swell from which often made the anchorage unsafe. A remedy has been provided by one of the most stupendous works in existence-an artificial breakwater, of about a mile in length, stretching across the Sound; ascending from the bottom of the sca above the level of its highest tides, and founded so deeply, and cemented so firmly, as hitherto to have resisted and tamed its utmost fury. In the greatest storms large fleets ride safely under the cover of this mighty barrier. Nearly opposite to it, in the channel, at the distance of about 9 m ., is the Eddystone lighthouse, another great work, less astonishing by its magnitude, but equal in utility, and perhaps superior as a monument of engincering skill. The coast of Cornwall, which curves round in a W.S.W. direction, is generally bold and stormy, but presents nothing remarkable till the excellent harbour of Falnouth is reached, where there is good anchorage for the largest ships, and where, from its position just within the chops of the channel, those ships which are outward bound can lie in readiness to avail themselves of the first wind that will carry them out to sea. From Falmouth, across the mainland to Portreath, on the W. coast, the distance is only about 12 m. ; and the coast which lies between these two points may be considered as forming the contour of two rocky peninsulas, and of the large cireular expanse of Mounts Bay, which is between them. Each of these peninsulas terminates in a remarkable headland-the one the most
southerly, and the other the most westerly point of England. The former, Lizard Head, is composed of steep erags of serpentine and diallage, surmounted by two lights, 224 ft . above the sea; the latter is less elevated, but more striking in its appearance, and possesses, with the peninsula which it terminates, the peculiarity of being the only part of the English coast composed of cliffs of granite. About 30 m . W. of the Land's End, is the group of the Scilly Isles, open on all sides, and incessantly preyed upon by the billows of the Atlantic. Nothing but the stubborn materials of which they are composed, seems able to save them from destruction. They are thought to have been united to the mainland by a long ridge, which has been completely submerged; and there is a tradition that their number has been greatly increased by the channels which the sea has excavated, thereby subdividing larger islands into a series of sinaller ones. The coast of Cornwall has, in various parts, suffered from similar causes. Within Mounts Bay, from a tongue of land near Penzance, formed of granitic sand, more than 30 acres have been gradually swept away; and even St. Michael's Mount, now a bold insular rock, is said to have once stood in a wood several miles from the sea; indeed, a stratum of black vegetable mould, full of hazel nuts, branches, leaves, roots, and trunks of trees has been traced scaward to the lowest ebb. A bold coast, the cliffs of which are chiefly composed of a clay slate, called killas, and of other slates of the Devonian system, is continued N., along the coasts of Coruwall and Devon to Hartland Point, and thence across Bideford Bay, and E. into the Bristol Channel, as far as Minchead Bay, in Somersetshire. Farther E. it becomes low and marshy. The opposite shore of the Bristol Channel is, at first, of a similar nature, but as we proceed W., becomes rocky, and deeply indented by a number of minor bays, opening into the larger bays of Swansca and Caermarthen. The navigable importance of these bays, and of the Bristol Channel gencrally, has been much increased by the opening up of the great coal field of South Wales, and the extensive iron, copper, and other works that have, in consequence, been established. The coast of Pembroke, properly outside the channel, continues rocky; and, by the force of the sea, has been hollowed out into numerons caves, and other curious openings. It is also deeply indented by bays and creeks, and furnishes, in Milford Haven, one of the noblest natural harbours in the world. It consists of a capacions basin, with several subsidiary inlets, is completely landlocked, and has anchorage of the best description. It has the disadvantage, however, of being at a considerable distance from the shores, where it is of the utmost importance that our naval resources should be chiefly concentred; and hence, notwithstanding its unrivalled excellence as a roadstead, and the erection of a dockyard within it, it holds only a secondary place among our naval stations. Milford Haven is succeeded to the N. by St. Bride's Bay, beyond which, in the same direction, stands the celebrated promontory of St. David's Ilead. The remainder of the coast of Pembroke continues lofty throughout, and, in many places, is bordered by steep or perpendicular cliffs of primary rocks. On reaching the mouth of the Teify, where Pembroke terminates, and Cardigan begins, the coast takes a vast, and almost unbroken sweep, forming what is called the Bay of Cardigan, but including, besides the shores of the county of that name, those of Merioneth, and of the S. and E. of Carnarvon. Along the whole of this line, not one harbour of the least importance occurs. The rocks belong to the most ancient of the formations of S. Britain, and the general character of the scenery is wild and mountainous. Between Cardigan Bay and the Irish Sea, the S. part of Carnarvon forms a peninsula, the coast of which is remarkable for its ruggedness and elevation, the lofty mountains which almost cover the county, sometimes sending out their arms as if to embrace the shore. On some of these mountains, at the height of 1400 ft . above the sea, are beds of gravel and sand, with marine shells similar to those still found upon the beach, thus disclosing the interesting fact, that at a period not more remote than our most recent geological epoch, these mountains, and the beds which cover them, must have been upheaved from the bottom of the sea. The coast of Carnarvon may be considered either as terminating at the entrance of the Menai Straits, or as continued through them. In the former case, we must trace our coast line round the rocky island of Anglesca, where, though the coast is very romantic,
the only object to attract particular notice is the important packet station of Holyhead. In the latter case, our course carries us past the spot on which, perhaps more than any other portion of the globe, the wonders of human genius are displayed, in the bridges which span the tide. At the N. end of the Menai Strait stands the town of Bangor, beyond which the coast of Carnarvon, partly formed by Penmaenmawr, the N. termination of the Snowdon range stretches magnificently E.N.E. to the mouth of the Conway. Here the coast turns suddenly N., and a peninsula is formed, terminating in Great Orme's Head, a vast and lofty limestone rock, hollowed out into deep caverns, and connected with the mainland by a low marshy neck, through which the sea appears to have at one time flowed. Another stretch of the coast E., along Flintshire, reaches the Point of Air at the mouth of the Dee, and terininates the principality of Wales. The rocks at this point belong to the carboniferous formation, which, composed at first of a narrow belt, widens to the S., and forms a coal field. The coast between the Dee and the Mersey bounds the large rhomboidal peninsula which constitutes the maritime part of Cheshire, and is composed of abrupt and wasting cliffs of red clay and marl, belonging, like that county generally, to the new red sandstone. The estuary of the Mersey may be considered as the terminus of the great ocean thoroughfare between the western and eastern hemispheres, but owes its pre-eminence, in this respect, more to its admirable position than to the excellence of its fairway, the navigation of which, in consequence of numerous sandbanks, is intricate and difficult. The Lancashire coast is very much indented by the Irish Sea, and consists of a succession of curved and flat peninsulas, which appear to have once been more elevated, as in one of them a subterranean forest has been traced. In the N . the large expanse of Morecambe Bay penetrates to Westmorland, and isolates the tract of Furness, which, though included in Lancashire, more properly belongs, both locally and geologically, to Cumberland, the coast of which, with Furness included, curves round, nearly in the form of a semicircle, with its convexity towards the sea, and may be considered as terminating at the month of the Eden. From the proximity of the Cumbrian mountains, which send out branches toward the shore, it contains a number of bold headlands, among which that of St. Bee's Head, surmounted by a lighthouse, is conspicuous. Immediately beyond it a coal field begins, and apparently forms a long narrow belt along the shore. In fact, however, it is continued into the sea, and has been extensively worked beneath it. The busy ports of Whitehaven, Workington, and Maryport, bear testimony to its importance. Beyond this coal field the coast loses all its ruggedness, and finally subsides into the marshes and sands of the Solway.

Geology.-In tracing the coast, its principal geological features were noticed in succession, when the different strata were brought into view; and as these strata, instead of merely forming an external border, are generally continued far into the interior, the only parts of the island which might seem to require further consideration, are those situated towards its centre. In some respects, the geology of these is the most important of all, as including our principal coal fields, and in them, one main source of our national prosperity. But these, as well as our other mineral fields, and the geology of the country generally, having been described under the British Empire, it seems sufficient here, while referring to that article, to add the following brief statement:-England and Wales, geologically considered, admit of being divided into three districts-a western, middle, and eastern. The western district is the most ancient. It consists partly of crystalline, but to a far larger extent of sedimentary rocks. The crystalline rocks occur chiefly in the N.W. part of N. Wales, where they are composed of varieties of trap; and in Cornwall and Devon, where they consist of granite, which forms the extremity of the island at Land's End, disappears, and again, as if by a succession of bursts, pierces the surface, and finally spreads out, covering the greater part of Dartmoor Forest. The oldest sedimentary rocks belong to the Silurian series, so called from being most largely developed in that part of Wales supposed to have been occupied by the ancient Silures, and composed of various beds of marl, limestone, slate, sandstones, and conglomerates. It is the oldest series in which remains of animal and vegctable life have been discovered.

Immediately above it, and not unfrequently grouped along with it, is the Devonian series, which not only appears under its own name in Devon, which is almost entirely composed of it, but is supposed to have its equivalent in the old red sandstone, which, commencing on the borders of the Silurian series in Wales, spreads over almost the whole counties of Radnor and Hereford, and a great part of Shropshire and Monmouth. In calling the western the most ancient district, an exception must be made of the Welsh and Cumberland coal fields, which, of course, belong to the carboniferous system. To this system all the strata of the central district belong. It may be considered as commencing in the mountain limestone, in which our richest veins of lead are found, and terminating in the new red sandstone, sometimes called the saliferous series, from the extensive beds of rock-salt, and the great number of brine springs which it contains. Between these extremes, all our workable seams of coal, and all our best seams and bands of ironstone, are situated. The central district, thus limited, does not extend farther S. than the Bristol Channel, nor, as a mineral field, farther E. than a line drawn N. through the towns of Nottinglam and Sunderland, and bence leaves, both to the E. and S., a space which far exceeds it in extent, and to which we have given the name of the eastern district. The rocks belonging to it are very numerous, and have been classified, in ascending order, under the name of the oolitic series, of which the limestones of Portland, Oxford, and Bath, composed of rounded grains, not unlike the roe of a fish, are characteristic specimens; the wealden series, largely developed in the weald of Sussex, and rich in the remains of animals bred on land, in fresh-water and estuaries; and the cretaceous series, composing numerous secondary ridges of the island, and conspicuous in its chalky cliffs. Above these are tracts of deluvial gravels, sands, and clays, in which the remains of existing animals of warmer climates are often found; and higher still, though the boundary is not well defined, alluvial tracts, the formation of which, by natural or artificial processes, may still be witnessed.

Again referring to the article Butish Empire, for information on a variety of important heads, among others, Agriculture, Manufuctures Trade, \&c., which might otherwise have been here appropriately introduced, we proceed to other heads, the consideration of which was, in that article, expressly reserved. The one which first clains attention is the

Church.-In no country are the principles of religious toleration better understood, or more generally practised, and hence all religious sects have perfect freedom to hold their peculiar tenets, and labour as assiduously as they choose in propagating them, whether by the pulpit or the press. But while this cannot be denied, it must also be admitted that there is no country in which the principle of a religious establishment is more distinctly recognized, and its incorporation with the State more fully carried out; for not only is the sovereign declared to be the only temporal head of the Church, but its leading dignitaries sit merely in virtue of their office, or, which is nearly the same thing, of emoluments inseparably annexed to it, in the House of Lords, and are entitled to take part, both by speech and vote, in all its deliberations. The Church of England is Protestant, and its form of government is Episcopal. It divides the whole kingdom into the two provinces of Canterbury and York, each presided over by an archbishop-the former, styled Primate and Metropolitan of all England, crowns the sovereign, whether king or queen; the latter, styled Primate and Metropolitan of England, crowns the queen consort. Each archbishop, considered as the head of his province, has a general superintendence over the diocescs within it, and has, moreover, a diocese of his own, in which he possesses the privileges and performs the duties of an ordinary bishop. The number of dioceses is twenty-eight, of which twenty-one are in the province of Canterbury, and seven in that of York. Each diocese has a dean and chapter, in whom, in the case of a vacancy, the power of election is formally placed, but all archbishops and bishops are nominated, and, as the nomination must take effect, actually appointed by the Crown. Their emoluments are chiefly derived from land, and have been estimated to yield, in the aggregate, a nett produce of about $£ 160,000$. Till recently the incomes were very unequal; but by Stat. 6 and 7, Will. IV., c. 77, an extersive modification has taken place. The archbishop of Canterbury has now $£ 15,000$ per

## ENGLAND

snnum; the archbishop of York, $£ 10,000$; the bishop of London, $£ 10,000$; the bishop of Durham, $£ 8000$; the bishop of Winchester, $£ 7000$; and the bishop of St. Asaph and langor, $£ 5200$. None of the rest have more than $£ 5000$, nor less than $£ 4000$. The aggregate income of the benefices of the Chureh is estimated at about three millions sterling. Several of these are above $£ 2000$, and a considerable number beneath $£ 50$; but the far greater proportion range between $£ 150$ and $£ 400$, making the average nearly $£ 280$. The doctrine of the Church is contained in Thirty-nine Articles, which having been ratified by Parliament, cannot be altered, except by its authority. The public services of the Chureh are regulated by the Book of Common Prayer. There cannot be a doubt that the Church of England possesses a strong hold on the affections of the people, and that nothing of a public nature moves them so suddenly and so strongly as an attempted aggression on its rights. Still a large minority are nonconformists, of whom the Methodists, Independents, and Baptists are the most numerous. What proportion these bear to the whole is not accurately ascertained; but we shall not be far from the truth in assuming that the adherents of the Establishment include about two-thirds, and dissenters onethird of the population Mr. Baines of Leeds, in evidence recently given before a committee of the House of Commons, estimates the number of dissenting chapels at 14,340 , and the churches of the Establishment at about the same number, but guards against being understood to mean that one-half of the population are disicuters.

Education, Crime, \&c.-For the higher and wealthier elasses, and the clergy of the Established ehurch, England possesses in the Universities of Oxford and Cambridge, two of the most celebrated institutions in the world. For the middle elasses, notwithstanding the number of endowed schools, much more scanty provision had been made; but the deficieney has, in a grat measure, been supplied by the ereetion, within comparatively recent times, of a great number of colleges, and similar superior establishments, in which instruction in the various branehes, both of general and professional education, is furnished at a moderate expense. But the education which, in a national point of view, is the most important of all-that suitable to the great masses of the population, and more especially necessary under a free government, was for a long time greatly negleeted. In many quarters the value of universal education was ealled in question; in others, it was thought that the natural affection of parents and guardians would seldom fail to furnish it in sufficient abundance, while not a few satisfied themselves on principles of political cconomy. that education, like all other commodities, might safely be left to adjust itself, by the rule of deniand and supply. The public mind has now been awakened to the necessities of the case, aecurate statistics of the educational state of the most important districts of the kingdom have been obtained, proving both the lamentable extent to which ignorance prevails, and its decided tendency to foster pauperism, immorality, and crime; and all classes of the community, more especially the religious bodies in it, are vying with each other in extending the blessings of education. The two institutes by whieh the great work is at present most extensively carried on, are the national schools in connection with the Established chureh, and the British and Foreign School Society, the constitution of which is so framed as to receive the support of all denominations; but, in alddition to these, there are vast numbers of local associations operating not the less effectually, because they are not under the immediate superintendence of some more public body. Nor can the Government be considered as standing aloof, and acting the part of an indifferent spectator. The mere establishment of a public board of education was one great step in advance, and the original grant of $£ 30,000$, now raised to $£ 125,000$ per annuin, proves that great progress continues to be made. It is of importance, however, to have a distinct view of the immense task which remains to be accouplished, and it ought therefore to be borne in mind, that while a country, to be fully educated must, like some of the Swiss cantons, have at least 1 in 5 of the population actually under instruction, England has barely 1 in 11 . This fact discloses one of the most prolific sources of crime. Ont of 335,429 persons committed for offences in England and Wales between 1836 and 1848, not fewer than 304,772 , in other words, more than 90 per

Vol. I.
cent. were uninstructed. It must be admitted, however, that the state of crime depends not merely on moral, but partly also on physical causes, and that while its amount rises with a diminished, it falls with an increased employment of labour. The rates of increase or diminution, for a series of years, in so far as ascertained by the number of convictions, is exhibited in Table p. 930.

History.-The first historical record of the island is furnished by Julius Cæsar, who, about half a century before the Christian era, having been brought, in the course of his victorious eareer, to the opposite coast, determined to visit its shores, and add it to the number of his conquests. His landing was opposed by hordes of painted and half-naked barbarians, who not only displayed dauntless courage, but possessed some acquaintance with the arts of war. As usual, however, superior discipline prevailed, and though Cæsar, occupied with more ambitious aims, soon withdrew, his successes were followed up by other leaders, and the greater part of the island became a Roman province. It had eontinued so for nearly 400 years, when Rome, attacked in the very heart of the empire, was obliged to withdraw her legions from Britain. The natives were now again independent, but they had lost the spirit of freedom; and when the tribes of the N., which had never ceased to battle for their independence, came pouring down upon the S., the pusillanimous Britons found no better alternative, than first to claim the protection of their old masters, and when that was refused, to call in the aid of warlike tribes from the E. shores of the German Ocean. The N. assailants were thus expelled, but the new allies remained, and, continually reinforeed by large arrivals of their countrymen, spread rapidly over the fairer parts of the island, till the Britons were cooped up in its wildest and almost inaecessible fastnesses. The Saxons were now masters, not united under one head, but governed by a number of independent chiefs, who, having ultimately been reduced to seven, formed what is called the Saxon Heptarchy. This state of matters could not long exist. Each chief was naturally desirous to extend his dominions, and seldom serupulous as to the means of accomplishing it. Feuds accordingly arose, and war and intestine dissensions raged almost without intermission till 827, when Egbert, in whom military prowess and political sagacity were happily combined, made himself sovereign of the whole country, and gave it its name of England. His most distinguished successor was Alfred, who came to the throne in 871 . His reign is one of the brightest in English history; and his numerous virtues, and admirable institutions, have justly proeured him the surname of Great. Long before his time the Danes had gained a footing in the country, and even occasionally acquired the ascendency in it. The vigour of Alfrel's government had kept them in cheek; but when on his death, in 901 , the suecession to the crown was contested by his two sons, the Danes saw their advantage, and so diligently improved it during a few feeble and troubled reigns, that in 1014, Sweyn, King of Denmark, who had recently arrived at the head of a powerful force, obliged Ethelred, the reigning sovereign, to take refuge in Normandy, with Duke Riehard, whose daughter he had married. The Saxon was thus supplanted by a Danish dynasty, under which the only great name which appears is that of Canute. His son, Hardicanute, a compound of cruelty, rapacity, and intemperance, died of a debauch in 1041. With him the Danish dynasty closed, and the Saxon was resumed in the person of Ethelred's son, Edward, who was called to the throne by universal acclamation. His reign, though marred by the excessivo partiality which he showed for the Normans, among whom he had been educated, and the affectation of a sanctity, which the monks found nowhere so vividly manifested as in his negleet and maltreatment of a beautiful and accomplished queen, was long and prosperous; and would, doubtless, have liad a happy issne, had he left an heir of his own body to succeed him. The preposterous virtue to which he aspired, and for which, mainly, he has been ridiculously surnamed the Confessor, made this impossible, and cost his subjects dear. On his death, in 1066, Harold, maternal grandson of Canute, and brother of Edward's queen, assumed the reins of government. He had previously proved himself able to hold them, and the defects of his title might also seem to have been remedied by the voice of the people in his favour. IIis competitor was William of Normandy, whose title, by blood, was
as defective as Harold's, but was strongly aided by the will of Edward, which made him his leir. Harold was not the man to renounce possession, nor William the man to forego his claim; and hence, no alternative remained but leeision by the sword. William landed at Hastings, in 1066 , with a powerful army, and in the great battle which was fought, the Normans proved victorious, and Harold was slain. William thus added to his former titles that of conquest, and though he chose rather to accept the sceptre as a gift, there is no doubt that he wielded it as a conqueror. His abilities were of the highest order; but by his harsh laws, and tyrannical temper, he not only increased the animosity of the English, but created dissatisfaction among his own barons, and narrowly escaped falling in the field by the hands of his own son. He died in 1087, and was succeeded in England by his son William II., surnamed Rufus, who, in 1100, was accidentally shot, during a hunting excursion, by one of his attendants. The crown belonged of right to his brother Robert, then absent in the Holy Land, but was usurped by his brother IIenry, who, aware of the weakness of his pretensions, saw the policy of making concessions to his subjects, but soon proved his innate tyranny, by withdrawing them the moment their purpose seemed to be served. Though he was a usurper, and had occasionally fought his way both through blood and crime, he long seemed to be the most fortunate prince of Cliristendom. His competitors disappeared from the field, generally, when they threatened to become most formidable; a peace, which promised to be lasting, had been made with his great enemy of France; all was tranquil, both in England and on the Continent, and the summit of his wishes seemed to be gained. At this moment a domestic blow struck him, and pierced so deeply, that it is said he never laughed again. His only son, William, a prince of great promise, in his 18th year, the undisputed heir of his crown, perished by shipwreck, with about 140 young noblemen of the principal families of Normandy and England. Henry's daughter, Matilda, married to Geoffrey of Plantagenet, eldest son of the Count of Anjou, had a son named Henry, who, now that William, son of Duke Robert of Normandy was dead, became lawful male heir to the crown. He was not allowed, however, to succeed till after a long struggle, during which England was miserably distracted. The succession opened to him, by the death of his grandfather Henry I., in 1135 ; but in consequence of the usurpation of Stephen, son of a daughter of William the Conqueror, and an interregnum during which his mother was acknowledged as queen, he did not actnally possess the throne till 1154. His reign is one of the ablest in English annals. Among its most interesting events are his struggles with the clergy, the murder of Becket, the conquest of Ireland, and the dissensions in his family, which made him curse the day of his birth, and sent him to the grave with an unrecalled malediction on his undutiful children. IIe died in 1189 , and was succeeded by his eldest son, Richard I., who, partially stung by remorse for his conduct to his father, and partly actuated by a love of military glory, soon set out on a crusade to Palestine. His achievements there gained him the surname of Cœur de Lion; but the kingdom was in the meantime sadlymisgoverned, and intrigues were carried on, chiefly at the instigation of his brother John, with the view of depriving him of his crown. The nation, however, remained faithful to him, and cheerfully paid the ransom which the Duke of Anstria exacted before releasing him from a most iniquitous and ungenerous imprisonment. His return was hailed by his subjects with universal joy; but before he had time to requite their attachment, or even show how far he was inclined to requite it, he met his death in 1199, while besieging one of his vassals in the castle of Chalons, near Limoges. His heir was Arthur, son of Geoffrey bis next brother; but the crown was usurped by a younger brother, John, a cruel, unnatural, and despicable villain. Obtaining possession of the person of his nephew, he put him to death, it is universally believed, by his own hand. The great event of his reign, though no part of the honour of it belongs to him, was the granting of Magna Charta at Runnymede in 1215. He died the following year, and was succeeded by his son, Henry III., an imbecile prince, whose reign, one of the longest and feeblest on record, did not terminate till 1272 . IIe was succeeded by his son, Edward I., a man of a very different stamp. His warlike temper led him to pursue schentes of
conquest, in which honour and justice were too often regarded as matters of very secondary moment. His oppression of the Scots, and barbarous attempt to extinguish all evidence of their national independence, by the destruction of their ancient records, are well known. IIis treatment of the Welsh, though equally cruel, was more successful, and Wales became an in tegral part of his dominions. His domestic government was conducted on better principles, and has a just claim to praise. The existing laws were for the most part impartially executed, and at the same time so many valuable improvements weie introduced by the new laws which he enacted, that be has sometimes been styled the English Justinian. He has, moreover, the merit of being the only prince who, up to his time, ventured to resist, and successfully resisted, the arrogant pretensions of the church of Rome. He was succeeded in 1307 by his son Edward II., whose reign contrasts very unfavourably with that of his father. His attempted subjugation of Scotland met with its just punishment at Bannockburn; his faithless queen wrested the reins of government from his hands, to place them in those of her paramour, and at last, after all imaginable insults had been heaped upon him, he died a horrid death in prison by the hands of assassins. In 1327, when this atrocity was perpetrated, his son and successor, Edward III., was 15 years of age, and the government continued to be carricd on by a regency, which had been previously established. But the young prince soon gave proofs of his fitness for rule, and, assuming the sceptre, wielded it with a rigour which never relaxed for a moment till his death in 1377, a year subsequent to that of his celebrated son. surnamed the Black Prince. The great events of this reign are the battles of Cressy and Poitiers, and a naval engage ment, in which an English fleet of 250 sail, commanded by the king in person, defeated a French fleet of 400 , with the loss of 230 ships, and $30,000 \mathrm{men}$. Edward III. was succeeded by his grandson Richard II., son of the Black Prince. At first great hopes were entertained of him, chiefly in consequence of the intrepidity and presence of mind which he had displayed in suppressing Wat Tyler's insurrection; but he soon belied the promise which he had given, became a mere puppet in the hands of worthless favourites, was formally deposed by Parliament as unfit to govern, confined in Pontefract Castle, and there murdered in 1400 . The chief mover in the rebellions of this reign was the Duke of Lancaster, who immediately assumed the sovereignty, and laid the foundation of the fierce and bloody contest between the houses of Lancaster and York. He took the title of Henry IV., and had he reached the crown by fairer means, would probably have been generally acknowledged not unworthy to wear it. In his time the Lollards and Wickliffites made great progress; and it is said that in early life he had himself embraced their opinions, but the favour of the clergy having become necessary to his ambition, he scrupled not to gratify their bigotry by lighting the fires of persecution. He was succeeded in 1413 by his son, Henry V., whose youth, spent among low and profligate associates, gave little promise, but who afterwards redeemed his character, and proved both an able and a virtuous sovereign. The great blot in his reign was the continued persecution of the Lollards; its most illustrious event the victory of Agincourt. He was cut off in 1422, in the 34th year of his age, and was succeeded by his son, Henry VI., a mere infant. The guardianship of the kingdom was entrusted to the Duke of Bedford, and during his absence in France to his brother the Duke of Gloucester. The king attained majority, but proved too imbecile to hold the reins of government. His reign accordingly was a perpetual scene of distraction, rival factions contending for the superiority, and often securing it by the commission of horrid crimes. Even during Henry's lifetime, the House of York resumed its ascendency in the person of Duke Edward, who was proclaimed king, by the name of Edward IV., in 1461. He maintained his seat till 1470, when he was obliged to flee, and Henry was restored to nominal sovereignty. Factions, however, still continued to rage, and the most barbarous atrocities were openly perpetrated. Henry's eldest son, Edward, Prince of Wales, was despatched by the daggers of Clarence and Gloucester, and he himself, a few days after, met the same fate. Edward IV. was now again sole sovereign, and continued a course of cruelty and profligacy till his death in 1482. He left two sons, the elder called in history, Edward

## ENNISCORTHY

V., though he never reigned, 13 , and the other 9 years of age. They were both murdered by Gloucester, better known as Richard III.; who in shape was scarcely a man, and in mind was less a man than a demon. His possession of the throne, to which he had cut his way by a series of unparalleled atrocities, was short lived. In 1485, only two years after his usurpation, he was slain on the field of Bosworth. The victor was the Duke of Richmond. who mounted the throne as IIenry VII., and by marrying the representative of the house of York, happily united the two roses, and terminated the feuds by which the kinglom had been torn asunder. After a long, prosperous, and peaceful reign, during which the revenue of the kingdom was carefully husbanded, and its trade and commerce greatly extended, he died in 1509, and was succeeded by his son Henry VIII., then in his 18th year. 1 Iis reign is distinguished by many events of importance; but the one which far eclipses all the rest is the Reformation. Very little of the inerit of this great work can be claimed by the king. II is own violent passions appear to have lieen his only law, and it may readily be admitted, that in all the measures he took to free the kingdom from the thraldom of Rome, he followed anything rather than the dictates of a pure conscience. But this only proves him to have been an unconscious mstrument in a higher hand, and throws no disparagement on the Reformation, which stands on its own merits, and is not afraid to be judged by them. He died in 1547, leaving a son and two daughters, who all successively mounted the throne. The son Edward VI., succecded in his 9th, and died in his 16th year, after giving proof of talents and virtues which made his early death more deeply regretted. This regret was doubtless increased by the character of his successor, whose atrocious bigotry and cruelty have transmitted her to posterity under the name of the bloody Mary. Like her father, though not in the same way, she was unconsciously a most important iustrument in promoting the Reformation. The honour of completing it, not as an unconscious or unwilling instrument, but from deep and enlightened conviction, belongs to her illustrious successor Elizabeth, whose reign, though not free from blemishes, proved one of the ablest and most prosperous which the kingdom had till then enjoyed; and is, perhaps, partly the cause of the predilection which Englishmen still continue to show for a female reign. Under her successor, James VI. of Scotland, and I. of England, the history of England begins to form part of that of the United Kingdom, and is accordingly contained in the article British Empire.(Maculloch's British Empire; Lyell's Geology ; Porter's Progress of the Nation; Jour. Stat. Soc. Parliamentry Papers, \&cc.)

ENGLEF1ELD, par. Eng. Berks; 1510 ac. Pop. 373.
ENGLISH BAZAR, a considerable tn. Hindoostan, prov. Bengal, r. bank, Mahanada, an afflucut of the Ganges, $32 \mathrm{~m} . \mathrm{N}$. by W. Moorshedabad.

ENGLISH CHANNEL, the sea which separates England from France, extending, on the English side, from Dover to the Land's End; and on the French, from Calais to the island of Ushant. On the E. it communicates with the German Ocean by the Strait of Dover, 21 m . wide; and on the W., it opens into the Atlantic by an entrance about 100 m . wide. At its greatest breadth, it is about 150 m . On the English side, off the coast of Hampshire, lies the beautiful lsle of Wight ; while Guernsey, Jersey, and the other Channel Islands are situated off the French coast. The pilchard, and mackerel, and oyster fisheries in the Channel are very injortant.

ENGLISH-Combe, par. Eng. Somerset; 1760 ac . P. 486.
ENGLISII COMPAN'Y'S ISLANDS, a group N. coast Australia, at the entrance to Arnhem Bay, a little W. from the gulf of Carpentaria; lat. $11^{\circ} 42^{\prime} \mathrm{S}$. ; lon. $136^{\circ} 44^{\prime}$ E. (r.)

ENGLLSH HARBOUR. See Antigua.
ENGLISH RIVER, E. coast Africa. It is an etsuary in Delagoa Bay, into which three rivers discharge themselves, none of whose sources are believed to be above 30 or 40 m . distant. The shores of English river are an extensive mudflat, covered with mangrove trees. The water is quite salt, and discoloured by mud; depth sufficient for ships of the largest size.

ENGUA-GuAçu, an isl. Brazil, prov. of, and about 30 m . S.S.E. Sio-Paulo. It is quite close to the mainland, and has rcceutly been connccted with it by a road built upon piles. It is low and swampy, and in consequence very unhealthy.

The town of Santos stands at its N. and that of Sio-Vicento at its S.E. extremity. lts circumference, before the erection of these towns had made it look almost like part of the mainland, was 24 m .

ENGUERA, a tn. Spain, prov. of, and 38 m. S. W. by S. Valencia. It has narrow and irregular streets, a large parish church, chapel of ease, convent, townhall, prison, fountain, seven schouls, and a cemetery. Manufactures:-linen, and woollen fabrics, soap, wine, and oil. Trade :-grain, cattle, wool, flax, \&c. Pop. 5242.

ENHAM Kxights, par. Eng. Hants; 2490 ac. Pop. 92.
ENKHUIZEN [Latin, Enchusa], a seaport tn. Holland, prov. N. Holland, 29 m. N.E. Amsterdan, on a point projecting out into the Zuider Zee, from which it is protected by strong sea-walls. Its harbour is good, and is connected by canals with all parts of the town. Enkhuizen is built with great regularity, almost in form of a circle. It has an elegant townhouse, a weigh-house, and other important buildings, several Reformed, and two R. Catholic churches, and a small synagogue, several benevolent institutions and schools. Fishing is the chief occupation, besides which a good trade is done in cheese and seeds. There are three establishments for preparing herrings, two ship, and two boat building yards, with saw-mills, roperies, \&c. Enkhuizen once had a population of 40,000 , a chamber of the East India Company, and numerous other important establishments, and sent annually 400 to 500 boats to the herring fisling. It now only has six herring boats, and its population is reduced to 5000 .

ENKIRCH, atı. Rhenish Prussia, gov. of, and 33 m . S.W. Coblenz, at the confluence of the Grossbach with the Moselle. It contains a parish church, and has a trade in wine, and cattle; slate quarries, and four annual fairs. Lead, copper, and lignite, are worked in the vicinity. Pop. 1971.

ENKÖPING, a tn. Sweden, län, Upsala, on a small stream, which about two miles below falls into lake Mälar, 37 m . N.W. Stockholm. It is tolerably well built, and stands in a fertile district, in which a good deal of corn, garden vegetables, and potatoes, are grown. Pop. 1253.

ENMORE, par. Eng. Somerset; 930 ac. Pop. 302.
ENNEDA, or Ennenda, a vil. and par. Switzerland, can. of, and 1 m . E.S.E. Glarus, l. bank, Linth, here crossed by a bridge at the foot of Mount Sthilt, which has a height of above 6000 ft . It is generally well-built, contains a handsome church and excellent school-house; and is the residence of a number of retired merchants and others. Pop. 2129.

ENNEREILLY, par. Irel. Wicklow; 3214 ac. Pop. 600.
ENNIS, an inland tn. and parl. bor. Ireland, co. Clare, on the Fergus, crossed by four bridges, 19 m . N. W. Limeriek. It lias a mean, straggling, and disorderly appearance; but contains many neat detached houses; streets in general narrow, crooked, and irregular, and not remarkable for cleanliness. The public buildings are the parish church, a R. Catholic chapel, Methodist and Independent meeting-houses, a R. Catholic college, an endowed and a national school, the county court house, a fever hospital, and infirmary; a prison, a union work house, the townhall, markethouse, linen market, and a barrack. None of them, however, have to boast of any great architectural excellence. Adjoining the parish church are the ruins of an old Franciscan abbey, founded in 1240 . Some linen and flannel are manufactured in the town ; and there is a considerable trade in grain, flour, and other agricultural produce, which are conveyed in lighters for shipment to Clare, about $2 \frac{1}{2} \mathrm{~m}$. farther down the river. Races are held annually in the neighbourhood. The borough returns one member to tho House of Commons; registered electors (1850), 118. It is the head-quarters of a constabulary district. Fairs on April 22, and September 3. Markets on Saturdays. Pop. (1841), 9318.

ENNISCOFFEY, par. Irel. Westmeath; 4467 ac. P. 872.
ENNISCORTHY, an inland th. Ireland, co. Wexford, on the Slaney, which is here crossed by a handsome stone bridge of three arches, $60 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Dublin. In the centro of the town are many respectable houses; but the suburbs consist of long lines of poor cabins. It las a parish church, R. Catholic chapel, meeting-houses for Methodists and Friends; a courthouse, markethousc, union workhouse, fever hospital and dispensary, and a convent. Its ancient castle, a massivo square building, flanked at each corner with a round tower, is one of the earliest military structures of the Anglo-Norman settlers. It was built originally by Raymond le Gros, about
the end of the 12 th century ; and at one period belonged, together with its manor, to Spencer, the poet, to whom it was granted by Queen Elizabeth. Enniscorthy has some retail trade and traffic in corn, and other agricultural produce, which is sent in barges by the Slaney to Wexford, for shipment; whence coal, timber, iron, limestone, manure, \&c., are brought up in return. There are here a woollen manufactory, a large brewery and distillery, tanyards, flour-mills, and a ropery. It is a constabulary station. Vinegar Hill, from which the rebels were driven with great loss by the royal forces under Lord Lake, on June 21, 1798, is close by the town. The scenery in the vicinity is beautiful. Pop. (1841), 7016.

ENNISKEEN, par. Irel. Meath and Cavan; 20,810 ac. Pop. 11,548.

ENNISKERRY, a tn. Ireland, co. Wicklow, $11 \mathrm{~m} . \mathrm{S}$. by E. Dublin; consisting chiefly of tastefully built cottages, occupied by respectable families. The beautiful scenery in the neighbourhood, and the mildness and purity of its air, attract numerous visitors and invalids. Pop. (1841), 448.

ENNISKERRY, a number of small isls. off the W. coast of Ireland, co. Clare. Of these, the most important is Mutton Island, about 1 m . from the shore. It contains about 210 ac . of excellent pasture land; and some curious caves, formerly used by smagglers.

ENNISKILLEN, a market tn . and parl. bor. Ireland, co. Fermanagh, on an island in the river, which connects the upper and lower sections of Lough Erne, with suburbs on both sides of the adjoining mainland, with which it communicates by two elegant bridges, 34 m . N.E. Sligo. It is wellbuilt, cleanly, and thriving ; has lately been lighted with gas, and in other respects greatly improved. It has a parish church, R. Catholic chapel, and places of worship for Presbyterians, and Primitive and Wesleyan Methodists; with a county court-house, prison, infirmary, linen hall, several schools, a union work-house and two barracks, one of them for artillery. There are two small forts, one at either end of the town; and in the vicinlty is the royal school of Portora, founded by Charles I., and one of the best endowed in the kingdom. Fort Hill, at the E. entrance of the town, has been tastefully laid out in walks for the recreation of the inhabitants; and on its summit is a monument to General the Hon. Sir G. Lowry Cole. Enniskillen has two tanneries, a brewery, a manufactory of leather, and a small cutlery establishment, and the females make straw plait, and sew muslin. The retail trade is considerable; and a great deal of corn is sent to Derry and Armagh. Live cattle and pigs are also sent to the former place. Timber, coals, and slate, are imported in barges from the lower lake. Numerous fairs, and four weekly markets, are held. Enniskillen is the seat of county assizes, and of quarter and petty sessions, and the head-quarters of a constabulary district; it returns a member to the House of Commons; registered electors (1850), 269 ; and gives the title of Earl, in the peerage of Ireland, to the noble family of Cole, proprietors of the town. Pop. (1841), 5686.-(Local Correspondent.)

ENNISNAG, par. Irel. Kilkenny; 1736 ac. Pop. 594.
ENNISTRAHUL, an isl., off the N. coast of Ireland, co. Donegal, $7 \frac{1}{2} \mathrm{~m}$. N.E. Malin Head. On it is a lighthouse, with bright revolving lights, visible in clear weather at a distance of about 19 m .

ENNISTYMON, a market tn. Ireland, co. Clare, on the Inagh, $15 \frac{1}{2} \mathrm{~m}$. W. by N. Ennis. It is irregularly built; has a church, R. Catholic chapel, male and female free schools, and a dispensary. Weekly market, Saturday; several fairs annually. Pop. (1841), 2089.

ENNS, [Latin, Anisus], a river, Austria, which rises in the N. slope of a branch of the Noric Alps, in Salzburg, about $12 \mathrm{~m} . \mathrm{S}$. Radstadt, flows nearly due N. to that town, then E.N.E. across the N. part of Styria, then circnitously N.N.W. into the archduchy of Austria, separating and giving name to the two great divisions of Anstria above, and Austria below the Enns, or Upper and Lower Austria, and finally joins r. bank Danube, a little below the town of Enns. Its principal affluents are the Styrian Salze on the right, and the Steyer on the left. Total course about 160 m . In the upper part of its course, it flows between parallel mountain ranges, through a country rich in wild and romantic scenery ; in the lower part it becomes navigable, but its importance throughout is chiefly derived from its great amount of valuable water power.

ENNS, [Latin, Anisia], a tn. Upper Austria, circle, Traun, 1. bank Enns, here crossed by a bridge, near its confluence with the Danube, 11 m . S.E. Linz. It is walled; has a townhouse, school, two churches; manufactures of iron and steel, and a weekly market. It is one of the oldest towns in Austria. It is built on Roman foundations; is mentioned in the song of the Niebelungen, and in its vicinity is the castle of Ennseck, belonging to the Auersberg family, where numerous Roman remains have been dug up. Pop. 3640 .

ENODER (ST.), par. Eng. Cornwall; 4050 ac P. 1127.
ENONTEKIS, a vil. Russia, Finland, 258 m . N. W. Uleåborg, r. bank, Muonio ; lat. $68^{\circ} 50^{\prime} 30^{\prime \prime} \mathrm{N} . ; 1755 \mathrm{ft}$ above sea level. Mean temperature about $26^{\circ}$; mean heat, January, $-8^{\circ}$; mean heat, July, $65^{\circ}$ Fah. Pop. 800.

ENORE, a vil. Hindoostan, 8 m . N. by E. Madras, on a small salt water lake. It is composed chiefly of about 100 native, and a few European houses, and is the resort of pleasure parties from Madras, to enjoy buating on the lake.

ENOS, a maritime tn. and gulf, European Turkey, on N. coast, Grecian Archipelago. The rown stands on a point of land at the entrance to the gulf, S . side, 70 m . S. by W. Adrianople ; lat. $40^{\circ} 42^{\prime} \mathrm{N}$; lon. $26^{\circ} 30^{\prime} \mathrm{E}$. (r.) It has a commodious, but shallow harbour, and has a considerable traffic with the adjacent country. It is the port of Adrianople, with which it has some trade in wool, camels' hair, cotton, leather, saffron, silk, wax, and copper. Pop. 7000.The gulf has a very narrow entrance, but is spacious within, running into the land 14 or 15 m ., with an average breadth of about 5 m . One of the mouths of the Maritza falls into the gulf, and the main stream disembogues a little to the W. of its entrance, where a considerable fishery is carried on.

ENOTAEVSK, a tn. Russia, gov. of, and $80 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Astrakhan, in an elevated position on an arm of the Volga, and surrounded by barren plains of moving sand. It has a church, and a fort in which a garrison is kept, and in its vicinity wandering Calmucks encamp both summer and winter. Pop. 3000.

ENSCHEDE, a tn. Holland, prov. Overijssel, 41 m. S.E. Zwolle, near the Prussian frontier. It has Reformed, R. Catholic, and Baptist churches, a synagogue, elegant townhall, three schools, and a spacious market-place; a cotton spinning mill; damask, diaper, and bombazine manufactures; bleacheries, print and dyeworks; and is altogether the busiest manufacturing place in the province. It has four annual fairs. Pop. 3700 .

ENSENADA, a tn. and bay, La Plata, prov. of, and 30 m. S.E. Buenos Ayres, within the estuary of the Rio-de-laPlata; lat. $34^{\circ} 55^{\prime} \mathrm{S}$. ; lon. $57^{\circ} 55^{\prime} \mathrm{W}$. It consists of but a few houses, and a fort.--The bay is narrow and deep, and was the port of the provinces of La Plata before Monte Video was built. Vessels that have to take mules to the E. Indies, repair here for them. Two small rivers, the San Borombon, and the Salado, empty themselves into the bay.

ENSHAM, par. Eng. Oxford; 5060 ac. Pop. 1893.
ENSISHEIM, or Ensheim, a tn. France, dep. Hant-Rhin, $15 \mathrm{~m} . \mathrm{S}$. by E . Colnnar, r. bank Ill, at the junction of the Nenfbrisach canal. It has a large and ancient Hotel de Ville, a Jesuit college, now converted into a prison; a parochial church; manutactures of calicoes and straw hats; and four annual fairs. It was formerly capital of Alsatia, was fortified, and three times taken during the Thirty Years' War. Pop. 2590.

ENSIVAL, a vil. and com. Belgium, prov. of, and 13 m . E. by S. Liége, on the Vesdre, and a station on the railway to Aix-la-Chapelle. It has manufactures of cloth, soap, tiles, and pottery, several quarries, limekilns, breweries, and flourmills. Pop. 2586.

ENSTONE, par. Eng. Oxford; 4850 ac. Pop. 1121.
ENTLEBUCH, or Entlibuch, a vil. Switzeriand, can. of, and 12 m. S. W. Luzern, r. bank, Emmen, 2280 ft above sea level, cap. bail. of same name. It has a picturesquely situated church, surrounded by the neatly built houses comprising the village. It has an important cattle market. Pop. 2741.- The malliwick consists of the upper portion of the valley of the Emmen, with some adjoining valleys; area, 80 geo. sq. m. On either side of the valley lofty mountains rise, but do not reach the snow line. They are frequently cut by deep ravines, and are partially covered with pine forests. Pop. 19,743.

INTRAIGUES, several places, France, particularly a tn. dep. Aveyron, 21 m . N. Rodez, at the confluence of the 'Irayère with the Lot, which here becomes navigable. It lies between three hilts, was formerly a strong place, and has manufactures of turnery wares, and some trade in horn. Pop. 1096.

EN'TRAQUE, Entraigue, or Autraque, a vil. and com. Sardinian States, Picdmont, prov. of, and 13 m. S.S.W. Coni. It has an elegant church, a communal hall, some charities, a cemetery, two schools, and an annual fair. Pop. 3230.

ENTRE-deux-Mers [Latin, Bimaris], a wine dist. France, dep. Gironde, between the Dordogne and the Garonne. Large quantities of good common white wincs are produced, the best of which are exported to Paris and the Baltic ports; the remainder is made into brandy.

ENTRRE douro-e-minio, a former prov. Portugal, now comprised in provs. Douro, and Minho.

ENTRE RIOS, a prov. [between the Rivers] Republic La Plata, lying between the Uruguay and the Parana, the former constituting its E., the latter its W. and S. limits, the province of Corrientes bounding it $N$. Its area is estimated at $32,000 \mathrm{sq} . \mathrm{m}$. The S. extremity is a low alluvial plain, subject to annual inundation; towards the $N$. the country has an undulating surface, with an extensive swamp in the interior, overgrown with low trees. There are, however, some large tracts covered with fine grass, which supplies good pasture for cattle and horses, from which all the articles of exporthides, horns, tallow, and jerked beef, are derived. It has numerous river, affluents of the Uruguay, and Paranà. Cultivation is limited to a few places. The climate is moderate and healthy. The population, which amounts to about 30,000 , is much scattered, and almost entirely occupied in the estancias or cattle farms, in which the wealth of the province chiefly consists. The villa del Parana or Bajada, is, nominally, the capital of the province.

ENTRINGEN, a vil. Würtemberg, circle, Schwarzwald, $15 \mathrm{~m} . \mathrm{S} . \mathrm{E}$. Herrenberg. It contains a Protestant chureh, and has a number of looms employed in cotton-weaving. On a height above the town stands the castle of Hochentringen. Rop. 1344.

ENTRY ISLAND.-1, or KApito, A small isl. E. side Cook's Strait, New Zealand; lat. $40^{\circ} 54^{\prime}$ S.; lon. $174^{\circ} 55^{\prime}$ E. (R.) It is 1800 ft . high.-2, One of the Magdalene isls. gulf of St. Lawrence; lat. $47^{\circ} 17^{\prime} \mathrm{N}$. ; lon. $61^{\circ} 42^{\prime} \mathrm{W}$. (r.) It rises 480 ft . above sea level, and may be seen from 25 to 27 m . off in clear weather; its red cliffs are magnificent and beautiful, rising at the N.E. point to 350 ft ., and at the S. point to 400 ft .

ENVIE [Latin, In Vibiis, or Invie], a vil. and com. Sardinian States, Piedmont, division of, and 23 m . N.N.W. Coni, 1. bank, Giandonc. It was formerly surrounded by walls flanked with towers, of which only a small portion now remains; contains a very ancient church, several chapels, and an old castle, with a fine English garden, and has a trade in corn, wine, butter, and silk. Pop. 2470.

ENYED-Nagy, Eoidistadt, or Strassburg, a market tn. Austria, Transylvania, cap., co. Nieder-Weissenburg, on a small stream not far from the Maros, 19 m . N.N.E. Karlsburg. It possesses some good houses, but is for the most part very poorly built, consisting of a collection of wood or inud huts, thatched with straw. It contains a R. Catholic, a Greek United, a Lutheran, and a Calvinistic church, the two last formed out of an old castle in the centre of the market place; a Protestant college, liberally endowed by Gabriel Iscthlen, and attended by above 800 students; a library, Minorite cloister, casino, hospital, and cavalry barracks. The manufactures consist chiefly of hosiery, paper, and brandy, and there is a weckly market, and three annual fairs.-The Distuict is fertile, and grows much wine. Pop. 5000.

ENYENG, a vil. Hungary, co. of, and abont 10 m . from Veszprim, in a somewhat sandy but still fertile district. It contains a Protestant, and a R. Catholic church. In the vicinity a tolerable wine is grown. Pop. 2117.

ENYICKZE, or Hanyiszka, a market tn. Hungary, Hither Theiss, co. Ava-Ujvar, about 8 m . from Kaschan. It is situated in a plain, and contains a parish church. 1'op. 1050.

EN\%, a river, Wiirtemberg. It rises in the Black Forest, 2505 ft above sca level, 35 m . S.W. Stuttgart, flows
N.E. past Willbad, Pforzheim, \&c., receives the Nagold on the right bank, and falls into the Neckar, at Besigheim, 581 ft. above sea level, 16 m . N. Stuttgart. A considerable quantity of wood is floated down the Enz to the Neckar. Total course, 82 m .

ENZBERG, a vil. Wiirtemberg, circle, Neckar, and 6 m . S. Maulbronn, near the Enz, on the frontiers of Baden. It contains a Protestant parish church, and has a paper, and several other mills. Some wine, and much fruit, are grown in the vicinity. Pop. 1054.

ENZERSDORF, several places, Anstria, particularly:1, A vil. Lower Austria, on the Fischa, about 4 m . from Fischamend. It contains a parish church, and a castle. Good wine is grown in the vicinity. Pop. 1050.-2, Enzersdorf Gross, or Städtel Enzersdorf, a tn. Lower Austria, in front of the isl. of Loben, r. bank, Danube, 9 m . E. Vienna. It is surrounded with walls and ditches, and contains a parish church, and a military school. It was bombarded by the French, in 1809. Pop. 910.-3, Enzersdorf am Gebirge, a vil. Lower Austria, about 5 m . from Vienna. It is the summer residence of many of the Viennese ; contains a parish church, to which numerous pilgrimages are made; a Franciscan monastery, and the ruins of an old castle. The poet Werner is buried here. Pop. 820.

ENZILLI, a tn. Persia, prov. Ghilan, on the Caspian shore, at the extremity of a low spit of land, which, with a corresponding point opposite, called Kazeran, forms a kind of bay or lagoon; lat. $37^{\circ} 27^{\prime} \mathrm{N}$.; lon. $49^{\circ} 25^{\prime} \mathrm{E}$. It is a miserable collection of scattered wood and reed houses, with three brick caravanserais, all separated from each other by reed enclosures. Some low detached towers constitute its only defence. A narrow strait, about 500 yards broad, divides the tongue of land on which Enzilli is built from the opposite point ; its depth seldom exceeds 5 ft . The bay is about 20 m . long by 10 m . broad, and its water, at some seasons of the year, is so fresh as to be drinkable, there being, it is said, about 70 streams that discharge themselves into it. Pop. between 2000 and 3000 .

ENZWEIHINGEN, a vil. Wärtemberg, circle, Neckar, 1 m. S.E. Vaihingen, r. bank, Enz, here crossed by a hand. some stone bridge of four arches. It contains a Protestant parish church, and the remains of an old castle, and bas a paper-mill. Pop. 1520.

EOA, Eooa, or Middleburg Island, one of the Friendly isls., S. Pacific @cean ; lat. $21^{\circ} 24^{\prime} \mathrm{S}$.; lon. $174^{\circ} 57^{\prime} \mathrm{W}$. (R.) It is about 30 m . in circumference, rocky, and high, rising to an elevation of 600 ft . above sea level. The carlier accounts of this island ascribe to it a degree of fertility and luxuriance of vegetation, that more recent accounts do not confirm. It was first discovered in 1643 , by Tasman, by whom it was called Middleburg. Pop. estimated at 200.

EÖRs (Also, Felso, Kıs, and Kövago), four nearly contiguous vils. Hungary, co. Szalad, not far from Füred, on the Platten-Sce. The first contains a Protestant clurch, and grows good wine in its vicinity. Pop. 510.-The second contains a R. Catholic churel, and from the number of antiquities found near it, appears to have been a Roman station. Pop. 607.-The third, which consists only of nine houses, has an acidulated spring.-And the fourth contains a Protestant, and a R. Catholic church, and a synagogne. In its vicinity an excellent wine is produced. Pop. 1397.

EÖRS-Tisza, a vil. IIungary, co. Heves, about 6 m . from Tisza Füred. In the vicinity are the traces of a Roman fort, near which many coins have been found. Pop. 1184.

EPANOMER1A, a tn. isl. Santorin, Grecian Archipelago, singularly situated on the face of the cliffs of the N.W. promontory of the island. The houses are piled one over arother from 15 to 20 deep, the whole surounded by numerous windmills, perched on the very top of the cliff. Many of the dwellings are excavations in the rock; others are built above them, some with arched roofs, others flat, the lower tier full 400 ft . above the decp waters of the gulf; the strata below are perpendicular, and of a bright red and black lava, much calcined, and score. The town is approached from the sea by a zigzag road cut into the cliffs; and has a very striking appearance, the houses towering on high far above the mast heads of the largest ships. At night the voyager would hardly be aware of the presence of a town, were it not for the twinkling lights along the face of the cliffs.

EPE, or Eep, a vil. Holland, prov. Gelderland, 26 m . N. Arnhem. It has an elegant Reformed church, and a school; a copper and nine paper-mills, and some other manufactures. Pop., including adjoining hamlets, 3300 .

EPEHY, a tn. France, dep. Somme, 10 m. N.E. Perronne. It has manufactures of table linen, and various kinds of cotton goods. Pop. 2019.

EPERIES [Hungarian, Heperges], a tn. Hungary, cap. co. Szaros, in a beautiful district, on the Tarcza, 139 m . N.E. Pesth. It is of an oblong shape, is surrounded with walls, and consists of the inner town which is well built, and has one very fine main street; and of two larger suburbs, the streets of which are unpaved. It is the see of a bishop, the seat of a Protestant consistory, with jurisdiction over the whole of Hungary included in Hither Theiss. It is also the seat of several courts and public offices; contains a Protestant and four R. Catholic churches, a townhouse, county buildings, bishop's palace, with a good library; a Protestant college, and a R. Catholic gymnasium and high school; and has nıanufactures of ordinary linen and damask, woollen cloth, flannel, coarse covers, delft ware, \&c.; and a considerable trade, particularly in linen. Three roads meet near Eperies, and form the great thoroughfares between Galicia and Hungary. Pop. 8600.

EPERNAY [Latin, Sparnacum, Eperncuum], a tn. France, dep. Marne, at the opening of a rich valley, whose sides are clothed with vines, yielding the finest champagne wines; 20 m . E.N.E. Chalons, l. bank, Marne, here crossed by a fine bridge of seven arches. The town is well-built of stone, brick, and timber; and is kept clean; and in its suburbs are numerous elegant villas, with extensive vaults attached to them, cut in the chalk, and belonging to the champagne wine merchants. It is the seat of a court of first resort, and of commerce. Its manufactures are hosiery, excellent pottery, woollen thread, sugar-refining, dyeing, tanning, \&c.; and besides wines, there is a trade in building and fire wood, sent down the Marne, to Paris, Rouen, and Le Havre. Pop. 5926.

EPFIG, a tn. France, dep. Bas-Rhin, 7 m . N. Schelestädt. It has manufactures of ribbons and tile-works. Pop. 1946.

EPHESUS, an anc. and celebrated city, now in ruins, Asiatic Turkey, pash. Anatolia, cap. of Ionia and all Asia Minor, 38 m . S.S.E. Smyrna ; lat. $37^{\circ} 55^{\prime}$ N.; lon. $27^{\circ} 28^{\prime}$ E.; l. bank, Little Mendere, or Meinder [anc. Cayster], about 8 m . from its embouchure in the gulf of Scala Nuova, Grecian Archipelago. It was, at one time, one of the most considerable of the Greek cities in Asia Minor, but now presents few traces of human
whose honour it was built, 'Diana of the Ephesians.' No trace of this temple, which occupied, it is said, 220 years in building, now remains, even its site is unknown, though it is supposed to have stood between the town and the port. The original building was of the Ionic order, 425 ft . long, 200 ft . broad, with 127 pillars, each 60 ft . high, and richly ornamented. This edifice, which contained innumerable statues and pictures of the most celebrated Grecian masters, was burned down, s.c. 35̄6, by Herostratus. Subsequently, it was rebuilt with still greater splendour; was robbed of its treasures by Nero, and, A.D. 262, was destroyed by the Scythians, after which it was never rebuilt. Amongst the ruins, in best preservation, are those of the theatre, which appears to have been of the largest and most imposing dimensions; and those of a noble circus or stadium. Another object of no small interest is the marble quarry of Prion, from which large quantities of that material were taken for the construction of the public buildings of the city.

Ephesus, in mythical times called Ortygia or Ptelea, was probably built by Androclus, son of Codrus, though, by Pliny, its erection is attributed to the Amazons. It was included in the kingdom of Alexander after the battle of Granicus, and, under the Romans, became capital of proconsular Asia. The Mahometans took it from Alexis Comnenus, and from them it was wrested, A.D. 1206, by the Greeks; but, in 1283, it fell again into the hands of the Turks, and now its only representative is the miserable village of Aiasalouk. The apostle Paul visited Ephesus, and addressed one of his epistles to its inhabitants.

EPIDAURUS, a port, Greece. See Pidarro.
EPILA [anc. Byspolis], a tn. Spain, Aragon, prov. of, and 19 m . W. by S. Saragossa, r. bank, Jalon. It was formerly surrounded by walls, of which some remains still exist; and has a church, chapel, three convents, two schools, a townhall, prison, cavalry barracks, two hospitals, a palace of the counts of Aranda, and, in the vicinity, an old Moorish castle. Occupations:-agriculture, goat and sheep rearing. P. 2424.

EPINAC, a vil. and com. France, dep. Saône-et-Loire The village, on high ground, 22 m . N. W. Chalons-sur-Saône, in a mining district, lias remains of an ancient castle, manufactures of bottles and beet root sugar, and iron forges, \&c. In the environs are coal mines, whose prodnce is sent, by a small railway, to the Canal de Burgogne, at Pont d'Ouche, about 18 m . distant. Pop. 2723.

EPINAL, a tn. France, cap. dep. Vosges, situated on the Moselle, in a narrow valley, anong the W. roots of the Vosges, and overlocked by the ruins of an old castle,
 190 m . E.S.E. Paris; lat. $48^{\circ} 10^{\prime} 24^{\prime \prime}$ N.; lon. $6^{\circ} 26^{\prime} 25^{\prime \prime} \mathrm{E}$. The Moselle divides the town into three distinct parts : -1 , The 'Grande Ville,' on the r. bank.-2, The 'Petite Ville, on an island formed by the river and a canal, \&c., joined to the foregoing by two bridges, one of stone, and the other of iron.- 3 , The ' Faubourg des Capucins,' on the l. bank of the river. Epinal is well built, and rather handsome. Its streets are wide, badly paved, but clean; and the quays upon the Moselle are spacious. There are an antique Gothic parish chureh, an hospital, a theatre, a public library ( 20,000 volumes), a museum, an abbatoir, an orphan asylum, a communal college, and several model, and other schools. The manufactures comprise works in iron and brass, pottery, cutlery, chemicals, \&c.; and there are oil and paper mills, marble yards, tanneries, and skinncries; and, in the environs, quarries of freestone, and marble of various colours. Trade:-in grain, wine, planks, paper, linens, horses, and cattle. Epinal
life, and little but scattered and mutilated remains of its ancient grandeur ; a desolation strikingly illustrated by Dr. Chandler, who visited the ruins in 1764. 'Its streets are obscured and overgrown. A herd of goats was driven to it for shelter from the sun at noon, and a noisy flight of crows from the quarrics seemed to insult its silence. We heard the partridge-call in the area of the theatre and of the stadium.' The classic celebrity of this city is chiefly owing to its famous temple, the seventh wonder of the world, and the goddess in
was formerly capital of a duchy in Lorraine, and the seat of great religions foundations, dependencies of the bishopric of Metz. It first came into French possession about the middle of the 15 th century; it was then strongly fortified. As a town of independent Lorraine, it was takell by the French in 1670, and dismantled. Pop. 9583.

EPPERSTONE, par. Eng. Notts; 2280 ac. Pop. 518.
EPPINDORF.-1, A vil. Saxony, circle, Zwickau. It contains a large old church; and has tile-works, a worsted, and several other mills. Much flax is grown, and there is a
silver mine in the neighbourhood. Pop. 1515.-2, A vil. in the territory, and 3 m . N. Hamburg, r. bank, Alster. It contains a church and three schools, and has a bathing establishment, supplied by mineral springs, a cattle-market, and annual fair. Pop. 708.

EPPING, a market tn. and par. England, co. Fssex, the former pleasantly situated 16 m . N.N.E. London. It consists of two parts, called Epping Upland and Epping Street, about $1 \frac{1}{2} \mathrm{~m}$. apart, and contains an ancient church, a chapel of ease, and places of worship for Independents and Friends. In Epping Street the weekly market is heh, and there are three annual fairs.--The PARish is noted for the quality of its butter, pork, and sausages; and the famous royal forest of Epping, though much of it is now under cultivation, still presents some fine woodland scenery. Area, 5250 ac. P. 2424.

EPPINGEN, a tn. Baden, circle, Middle Rhine, cap. bail. of same name, on the Elsenz, 25 m . E.N.E. Carlsruhe. It is an ancient place, having had a church as early as the seventh century, and early became a free imperial city. It centains two churches, and has a considerable trade, chiefly in cattle. Pop. of tu., 3237 ; of bail., 14,718 .

EPSOM [Saxon, Ebbsham], a market tn. and par. England, co. Surrey. The town, 15 m . S.W. London, on a branch of the Brighton Railway, is irregularly laid out, but contains a number of good houses, is lighted with gas, and has a church and two Independent chapels. Some brick-making, brewing, and malting are carried on. In the vicinity is a celebrated mineral spring, from which the well-known Epsom salts were at one time manufactured. After the discovery of this medicinal Spa, Epsonn became a fashionable watering-place, and rapidly increased in buildings and population, but afterwards fell into decay. Another source of attraction, however, has since arisen-the annual races, held on the Downs. These commence on Tuesday, and continue to the end of the week preceding Whitsuntide; the Derby stakes are run for on Wednesday, which is the principal day, and the Oaks on Friday. They are fashionably and numerously attended, from 300,000 to 400,000 persons, it is said, visiting Epsom during the race week. The grand stand on the race-course is a spacious and handsome building. Area of par. 3970 ac. Pop. 3533.

EPTE [Latin, Epta], a river, France, which rises near Forge-les-Eaux, arrond. Neufchâtel, dep. Seine-Inferieure, flows S., between deps. Seine and Eure, on its r., and deps. Oise and Seine-et-Oise on its l. bank, and joins r. bank, seine, above Yernon, after a course of about 50 m .

EPTINGEN, a vil. and par. Switzerland, can. BaselLandschaft, in a mountainous district, among precipices so steep that in winter the sun is visible only about mid-day, 15 m . S.E. Basel. It contains a large parish church, and has sulphureons and alum springs, with a well-frequented bathing establishment. Pop. 646.

EPWURTH, a par. and small market tn. England, co. Lincoln; area, 8140 ac. The town, which is situate in the isle of Axholme, 23 m . N.N.W. Lineoln, contains a Gothic church and several Dissenting chapels. The dressing of hemp and flax, which are grown in large quantities in the neighbourhood, forms the principal occupation. Two annual fairs are held, for the sale of cattle, flax, and hemp. John Wesley, founder of the Methodist body, was born here, 1703. Pop. 1843.

EqUATOR, State, S. America. See Ecuador.
ERBA, a tn. Austrian Italy, gov. Milan, prov. of, and 7 m . E. by N. Come, near the r. bank, Lodi, on a hill slope, anul possessing a church, convent, and a manufacture of silken fabrics. A large cattle fair is held in January. Pop. 1554.

ER13ACH, several places, Germany, particularly:-1, A tn. Hesse-Darmstadt, prov. Starkenburg, on the Mimling, 22 m . S.E. Darmstadt. It stands in a narrow valley, overhung by lofty rocks, and contains a parish church, and a castle of the Counts of Erbach, a handsome modern structure, with an interesting armoury, and ether antiquities; and has manufactures of woollen and linen cloth, tile-works, a paper, and several other mills; and two annual wool and cattle fairs. Pop. 2078.-2, A vil. Nassan, beautifully situated on the Rhine, 7 m. W. Mentz. It contaius a Protestant and a R. Catholic parish church, and at a short distance is the old convent of Eberbach, founded by St. Bernard de Clairvaux in 1131, once the largest monastic establishment on the Rhine, and
now uset partly as a prison, and partly as a lunatic asylum. Pop. 1307.-3, A vil. W ïrtemburg, circle, Danube, 8 m . E. Ehingen, near l. bank, Danube ; with a parish church, and a fine old castle belonging to the lords of Ulm. Pop. 1037.

ERBENDORF, a market tn. Bavaria, Upper Palatinate, on the Waaldnaab, 21 m . E.S.E. Baireuth. It contains a Protestant and a R. Catholic church; and has manufactures of mirrors, and two mills. Pop. 1410.

ERBESBUDESHEIM, a vil. Hesse-Darmstadt, Rheinhesse, near Alzey. It contains two churches, two schools, a townhouse, and four mills. Pop. 865.

ERBIL, a tn. Asiatic Turkey. See Arbel.
ERBISTOCK, par. Wales, Denbigh; 1468 ac. Pop. 423.
ERCALL, two pars. Eng. Salop:-1, (-Child's), 3340 ac. Pop. 471.-2, (-Magna), 11,780 ac. Pop. 1999.

ERCE, a vil. France, dep. Ariège, 1 I.m. S.E. St. Girons, on the Garbet. It has some trade in butter and cattle; and in its vicinity iron forges, and mines of marble and iron. Pop. 1236.

ERCSI, or Erecseny, a vil. Hungary, Thither Danube, co. Stuhlweissenburg, 8 m . from Adony, on a height above the Danube, on which there is here a steam-boat station. It contains a parish church, and an elegant castle; and has extensive distilleries, oil-mills, and vinegar works. In the vicinity madder, woad, weld, teazel, and anise are extensively grown. The Roman town Saline stood near this. Pop. 3296.

ERIDING, a tn. Upper Bavaria, 1. bank, Semt, here crossed by a bridge, 20 in . N.E. Munich. It is the seat of a law court; contains five churches, to one of which numerous pilgrimages are made; a townhouse, hospital, and infirmary; and has manufactures of leather, numerous smithies, a trade in corn and cattle, and six annual fairs. Pop. 1826.

ERDINGTON, a vil. and chapelry, England, co. Warwick. The former, 4 m . E. Birmingham, contains a handsome church, and chapels for R. Catholics and Independents; with national, infant, and Sunday schools. The Tame Valley Canal here joins the Birmingham Canal. Pop. 2579.

ERDMANNSDORF.-1, A vil. Prussia, gov. Breslau, circle of, and near Hirschberg; with a Protestant church. Pop. 862.-2, A vil. Saxony, circle, Zwickau, on the Zschopau, here crossed by a long bridge. It contains tileworks, a calico bleachfield, an iron, two large cotton, and several other mills. Pop. 834.

ERDOD.-1, A vil. Austria, Sclavonia, co. Verocze, dist. and 10 m . from Eszek, beautifully situated on a height, covered with vincyards, near the junction of the Drave with the Danube. It contains a parish church, and the ruins of an old castle, on a promontory which projects into the river. Many of the inhabitants are fishermen.-2, A market tn. Hungary, co. and about $10 \mathrm{~m} . \mathrm{S}$. Szathinar, at the foot of lofty hills, forming distant ramifications of the mountains of Transylvania. It has a parish church, and a castle seated on a height; and has glassworks, exteusive limekilns, and an annual fair. Pop. 1670.

ERDOHEGY, a vil. Hungary, Thither Theiss, on the White Körös, 8 m . from Simand. It coutains a Protestant and a Wallachian church. Pop. 1440.

ERDÖVEGH, or Erdewich, a market tn. Austria, Sclavonia, co. Syrmia, dist. of, and 8 m . from Illok, in a plain near the Bahony. It contains a Greek church, and has numerous mills. Pop. 2460.

ERDRE, a river, France, which rises in a billy district on the W. of dep. Maine-et-Loire, flows E. into dep. LoireInferieure, past St. Mars-la-Jaille, and on reaching Joue begins to turn S. At Nort it communicates with the Nantes and Brest Canal, and is thereafter navigable to its junction with r. bank, Loire, at Nantes; course about 60 in .

EREBUS volcano. See Antarctic Ocean.
EREE, or Erif, one of the Sonakin isls. Red Sea; lat. $18^{\circ} 10^{\prime} \mathrm{N}$.; lon. $28^{\circ} 20^{\prime}$ E.; about $4 \frac{1}{2} \mathrm{~m}$. long N. to S., of very irregular shape, low, and sandy. On the E. part are the ruins of the ancient Ptolemais Theron; the highest part is a mound of ruins, which is visible from a distance of 3 m . Many tanks, also, are to be scen. A bay, W. side of the island, has 3 and 4 fathoms water, muddy bottom, the former depth being pretty close to the island.

EREKLI, or Eregli.-1, [anc. Heraclea], A tn. and seaport, Asiatic Turkey, S. ceast of the Black Sea, 130 m. F.N.E.

## ERIE

Constantinople; lat. $41^{\circ} 15^{\prime} 30^{\prime \prime} \mathrm{N}$. ; lon. $31^{\circ} 30^{\prime}$ E.; consisting of an ancient and modern town. The latter stands at the head of a beautiful bay on the W. side, and near the extremity of Cape Baba. When viewed from the sea, its walls and towers form a conspicuous and pleasing feature in the general landscape. It contains several mosques, baths, and a Greek church. It has still a considerable coasting trade, and some manufactories of red and yellow Morocco leather. The walls of the ancient town, which consists of about 250 houses, and 50 of Greek-Christians, are now in a ruinous condition, and constructed chiefly of the remains of a former rampart. In that part which fronts the sea, and where there are remains of an outer as well as an inner wall still existing, huge blocks of basalt and limestone are piled upon one another, and intermingled with columns and fragınents of Byzantine cornices and tablets, with sculptured crosses and Christian inscriptions. On a height overlooking the town are the ruins of an ancient castle. The ancient IIeraclea was founded by the Megareans, and was the port where the fleet of the Goths awaited the return of the second expedition that, in the time of Galienus, ravaged Bythyuia and Mysia.-2, An inland tn. Asiatic Turkey, supposed to be the aucient Amballa, 80 m . E. by S. Koniyeh; lat. $37^{\circ} 32^{\prime}$ N.; lon. $34^{\circ} 6^{\prime}$ E.; agreeably situated among gardens full of fruit and forest trees. It is, however, but a poor place; streets dirty; small market; and containing 800 to 1000 Turkish, and 50 Armenian houses. There are some remarkable hot springs a few miles N. from the town, and a large shallow lake a short distance W. of it.

ERFURT, a gov. Prussian Saxony, bounded, N. by Hanover and Brunswick, N.E. and E.gov. Merseburg, principality of Schwarzburg-Sondershausen, and grand duchy of Saxe Weimar; S. by same grand duchy, principality of Schwarz-burg-Rudolfstadt, duchy of Saxe-Coburg-Gotha, and duchy of Saxe-Meiningen; and W. by Hesse-Cassel ; area, 988 geo. $\mathrm{sq} . \mathrm{m}$. It does not form one compact whole, but is extremely irregular and dislocated, consisting of a long narrow belt, and of nine minor portions mixed up with other states. Its surface is very much diversified. In the S. and S.W., in the circles of Erfurt, Langensalza, and Weissensee, it presents a large and fertile plain, only occasionally broken by a few low ridges. In the circle of Nordhausen, on the S. slope of the Harz, and also in circle Mülhausen, it becomes more hilly, and higher up in the Harz, and in the Thuringen forest, it rises up into moun tains, many of which are bleak and bare, while others are densely wooded. The culminating point is the Beerberg, $3060 \mathrm{ft} . ;$ and next to it the Finsterberg, 2900 ft .; the Eisenberg, 2700 ft .; the Adlersberg, 2580 ft .; and the Döllberg, 2480 ft . At least four other summits exceed 2000 ft . It is watered by numerous streams, which almost all take an E. direction, and belong to the basin of the Elbe. The principal exception is the Werra, which only traverses a small portion of the W. of the government, and belongs to the basin of the Weser. The minerals are both numerous and valuable, including copper, iron, silver, cobalt, coal, lignite, limestone, gypsum, and potter's clay. In the fertile plains of Erfurt, Weissensee, and Langensalza, heavy crops of wheat and pulse are grown, and a considerable portion of surface is devoted to the culture of oil seeds, hemp, flax, fruit, and dye plants. In the more elevated arable districts, oats, and potatoes, are the principal crops. Higher still, the country, where not absolutely bare or covered with forest, becomes entirely pastoral, and feeds great numbers of cattle, sheep, and swine. Manufactures, though still far behind those of the Rhenish provinces, have made considerable progress. They include all the ordinary tissucs of wool, linen, and cotton, ribbons, worsted, leather, starch, tobacco, and chicory, and particularly iron, steel, and numerous articles of iron ware. The inhabitants, of whom nearly two-thirds are Protestants, are very industrious. For administrative purposes, the government is divided into nine circles-Erfurt, the capital; Heilyerstadt, Langensalza, Mülhausen, Nordhausen, Schlesingen, Weissensee, Worbis, and Ziegenrack. Pop. (1846), 343,617.

ERFUR'T [Latin, Erfordia, Erfurtum], a tn. Prussian Saxony, cap. gov. of same name, advantageously situated near the centre of Thuringia, on the Gera, the great thoroughfare through Germany, and the railway from Frankfort to Dresden, 62 m . W.S.W. Leipzig. It is a place of considerable strength, being both surrounded by walls with six gates, and defended by two forts and other outworks, on which exten-
sive repairs and improvements bave recently been made, and from its numerous towers presents, at a distance, a very imposing appearance. It consists of the town proper and six suburbs, and covers a large extent of space, but is dull and inanimate, exhibiting marks of decay. It has two principal squares-the great market, with a large obelisk in memory of the elector Frederick Charles Joseph, and the fish market, in which there is a statue of Roland. The most remarkable building is the dom or cathedral, belonging to the R. Catholics, a fine gothic structure of the 14th century, situate on a height, and surmounted by two stately towers. It was much injured by war, but great sums have recently been expended on its improvement. It has a famous bell, called Grosse Susanna, weighing nearly 14 tons. Its N. portal is much admired, and several of its altars are very elegant. Among its pictures are one, a Holy Family, by L. Cranach, and another still older, supposed to be by Van Eyck. The Severuskirche, in the neighbourhood of the dom, is conspicuous by its three towers covered with copper, and has a good organ, and fine high altar. The orphan asylum called Martinstift, in honour of Luther, was originally the Augustinian monastery in which he was a monk. His cell has been preserved as nearly as possible in its original condition, and contains his portrait and Bible. The other buildings and institutions deserving of notice, are the churches of Laurentius, and Allerheilgen [All Saints], the townhouse, library, museum, college, gymnasium, normal, industrial, and other schools, Ursuline nunnery, public courts and offices, asylum for the blind, deaf and dumb asylum, poorhouse, barracks. and other military buildings, botanical garden, \&c. The manufactures consist chiefly of woollen, cotton, and mixed goods; leather, shoes, candles, bells, ironmongery, oil, vinegar, chicory, brandy, and liqueurs. Erfurt is an ancient town, and had acquired considerable importance in the time of Charlemagne. It became one of the Hanse towns, and shared largely in the trade which passed through Germany, between Italy and the Baltic. At this time it was the capital of Thuringia. Its university, once of some celebrity, was suppressed in 1816. Pop. (1846), 31,277, including 4599 military.

ERGENZINGEN, a vil. Würtemberg, circle Schwarz wald, bail. of, and 6 m . W.N.W. Rottenburg. It has a parish church; manufactures of hosiery and pipe-bowls, and several worsted mills. Pop. 1528.

ERGHEN, a river, Central Asia, Turkestan Proper, region, Thian-Chan-Nanloo, rises in the Karakorum mountains, on the N.E. borders of Little Tibet, under the name of the Yarkand, and flows N.W.W. to lon. $75^{\circ}$ E., when it bends round to the N.E., passes the town of Yarkand, and at lon. $80^{\circ} 30^{\prime}$ E., is joined by four large rivers, three from the left, one of which is the Kashgar, and one from the right, the Khoten. From this point it flows E. by S., under the name of the Tasim, which it retains till it reaches about lon. $85^{\circ} \mathrm{E}$., when it is called the Erghen, or Ergono, and subsequently falls into the W. end of the lake called Lob Nor. Entire course about 700 m .

ERIBOLL (Loci), an inlet of the sea, N. coast, Scotland, co. Sutherland, about 10 m . long, and from 1 to 3 broad. It forms a spacious harbour, and affiords good anchorage.

ERICEIRA, a tn. and par. Portugal, prov. Estremadura, com. Torres Vedras, on a small bay, 22 m . N.W. Lisbon. It has an annual fair. Almost all the inhabitants are employed in fishing. Pop. 3000.

ERICHT (Loch).-1, A lake, Scotland, cos. Perth and Inverness, about 15 m. long, by 1 broad. It lies N.E. and S.W., in one of the wildest and most inaccessible districts of Scotland, and by the small stream Ericht, from its S. end, sends its surplus waters to Loch Rannoch.-2, A river, Scotland, in the N.E. of co. Perth, formed by the union of the Shee and the Airdle. After a S.E. course of about 17 m ., through a beautiful and romantic country, it falls into the Isla.

ERIE, a lake, N. America, the most S. of the Canadian lakes. It lies N.E. and S.W., between lat. $41^{\circ} 30^{\prime}$, and $42^{\circ} 52^{\prime} \mathrm{N}$. ; and lon. $78^{\circ} 53^{\prime}$, and $83^{\circ} 25^{\prime} \mathrm{W}$. It is about 265 m . long, $63 \frac{1}{2} \mathrm{~m}$. broad at its centre, 658 m . in circumference, and from 40 to 45 fathoms deep at the deepest part. Its surface is 565 ft . above sea level, and 30 ft . below Lake Huron, which is $45 \mathrm{~m} . \mathrm{N}$. from it. The whole of its S . shores is within the territory of the U. States, and its N. within that of Upper Canala. It receives the waters of

Lakes Superior, Michigan, Huron, and St. Clair, through the St. Clair and Detroit rivers, at its S.W. extremity, and discharges its waters into Lake Ontario, by the Niagara river, at its N.E. end. Several sinall islands are seattered over the W. end of the lake; only one of which, Point Pele Island, is inhabited. This is the most dangerous of all the lakes to navigate in stormy weather, in consequence of the heavy ground swell, proceeding from its shallowness. It has, how ever, a vast and increasing traffie, upwards of 50 steamers, and several hundred sailing vessels, navigate it, and find abundant employment. The banks vary in height; no portion of them, however, is above 100 ft . high. There are considerable quantities of red cedar on particular portions of the eoast. The prineipal harbours on the Canadian side are Port Dover, Port Stanley, and the Roud Eau; those on the U. States side are Buffalo, Erie, and Cleveland. An engagement in the W. waters of Lake Erie, between the armed flotillas of Great Britain and the U. States, ended to the advantage of the latter country. - (Smith's Canadian Gazetteer; Bouchette's Canadas; U. States Gazetteer, \&e.)

ERIE, a tn. and port, U. States, Pennsylvania, finely situated on Presquile Bay, S. shore, Lake Erie, 307 m . N.W. Philadelphia. It eontains a court-house, a jail, seven churches, and several academies and sehools. The harbour is one of the best on the lake, and the trade of the place is considerable. The value of the exports and imports, in 1846 , amounted to $\$ 6,373.246(£ 1,254,649$. Pop. 3412 .

ELISK A Y, an islet, Scotland, Hebrides, co. Argyle, immediately S. of S. Uist, about $2 \frac{1}{2} \mathrm{~m}$. long, by 1 m . medium breadth.

ERISWELL, par. Eng. Suffolk; 6620 ac. Pop. 501.
ERITH, par. Eng. Kent; 3860 ac. Pop. 2082.
ERIVAN, a tn. Asiatic Russia, cap. gov. Armenia, formerly prov. Erivan, l. bank, Zengia or Sanga, a considerable river that flows from the lake Ghokeha or Sevan to the Aras, 33 m. N.N.E. from the foot of Mount Ararat, on the border of the great plain of the Aras ; lat. $40^{\circ} \mathrm{N} . ; \operatorname{lon} .44^{\circ} 30^{\prime}$ E.; 3311 ft . above sea level. It stands partly on a hill, and partly on the margin of the stream, which is here crossed by a handsome stone bridge of several arehes, and is very unhealthy during the summer heats. It is irregularly built, with narrow, dirty, and ill-smelling streets, and is mean in appearance, the houses being built of boulders, and mortar made of clay and straw. It contains a large bazaar, five mosques, five Armenian churches, and several caravanserais. On the summit of the hill on which the town is partly built, there are some fortifications, which inelose the palace of Sardar, with the houses of the public functionaries. Erivan being on the caravan route between Persia and Russia, has a considerable transit trade. It manufactures cottons, and has some potteries and tanneries. Pop. (1842), 12.310.

ERKE, par. Irel. Kilkenny and Queen's co.; 18,584 ac. 1'op. 5678.

ERKELENZ, a tn. Prussia, gov. of, and 24 m . N.N.E. Aix-la-Chapelle, cap. circle of same name, in a plain. It is the seat of several courts and public offices; contains a R. Catholic parish ehurch, and a superior burgher sehool; and has manuactures of linen cloth, ribbons, hats, pins, and lace, a dye-work, flax-mill, and several breweries, a trade in corn and linseed, and three amnual fairs. Pop. 2058.--The cIRCLE, area, 84 geo. sq. m., is, for the most part, flat and well adapted for agriculture. Pop. 34,586 .

ERKENE, a river, European Turkey, formed by several head streams that have their sources in the Little Balkan mountains, near Viza, about lat. $41^{\circ} 30^{\prime} \mathrm{N} . ;$ lon. $27^{\circ} 40^{\prime} \mathrm{E}$. It flows first S.S.W. for about 18 or 20 m ., then turns W . by N., and falls into the Maritza at Djesr Erkene, lat. $41^{\circ} 30^{\circ}$ N. ; lon. $26^{\circ} 35^{\prime} \mathrm{E}$.; after a course of about 60 m .

ERKENEK, a pass and vil. Asiatic Turkey, pash. Marash, 45 m . N.E. Samisat, r. bank of the Euphrates. The pass occurs in Mount Taurus, where the Gok.Su forces its way throngh the mountains.--The village, 3828 ft . above sea level, is beautifully situated in the ravine, where the river, continually descending amidst rocks and precipices to the W., finally reaches a varied and boundless mountain scene. It is surrounded by gardens and trees, watered by innumerable springs.

ERLAN(iEN, a tn. Bavaria, circle, Middle Franconia, In a plain not far from the Regnitz, 10 m . N.N.W. Nïrnberg, on the railway to Bamberg. The greater part of it having
been consnmed by a fire in 1706 , it has been rebuilt in a much improved form. It is nearly of a square shape, is entered by seven gates, and its streets cross each other at right angles. The buildings most deserving of notice are the French ehureh, a massive structure, with a tower 180 ft . high; the town chureh, with a still loftier tower; the German Reformed church, the old eastle, and the townhouse, both forming part of the finest square which the town contains; the theatre, a capacions building, of an imposing appearance; and the university, attended by about 250 students, provided with a good library and museum, and celebrated at present as a school of Protestant theology. In addition to the university, the educational institutions inelude a gymmasium, a Latin, an agricultural, and an industrial school; the chief charitable establishments are an infirmary and a poorhouse. The manufactures, which are numerous and important, owe their existence and prosperity to the French emigrants who found an asylum here after the revocation of the Edict of Nantes. The leading articles are mirrors, tobacco, hosiery, gloves, steelwares, gold and silver wire, musical instruments, paper, hats, woollen and linen cloth, calieo, leather, and gingerbread. There are also tile-works, potass-works, and a great number of breweries. The environs are laid out in gardens and fine walks. Pop. 10,630.

ERLAU, or Eger [Latin, Agria], a tn. Hungary, eap. co. Heves, in a beautiful and fertile valley on both sides of the Eger, a small affluent of the Theiss, 65 m. E.N.E. Pesth. It consists of the town proper, surrounded by old walls, with six gates, and of two suburbs; is the seat of an archbishop, and of several courts and public offices, has plain, but generally well-built houses; contains a cathedral, a handsome moderı strueture, finely situated on a height ; six other churehes, a castle, now ruinous, but celebrated in early Hungarian history for its resistance to the Turks; an archbishop's palace, lyceum, in the buildings formerly oceupied by a university; a seminary, gymnasium, library, high school, monastery, hospital, and county buildings; and has manufactures of woollen and linen cloth, combs, hats, shoes, leather, harness, \&c. There are here two thermal baths, one on each side of the river, and both well frequented. Erlau repeatedly distinguished itself by its valiant resistance to the Turks, but ultimately fell into their hands in 1595, and continued under their sway till 1687, when King Leopold I. wrested it from them. Pop. 19,800.

ERLBACH, or Markt-Erlbach, numerous small places, Germany, particularly:-1, A market tn. Bavaria, Middle Franconia, 16 m . N.W. Nürnberg. It contains a parish chureh, eastle, and townhouse. Hops are extensively grown in the vieinity. Pop. 1211.-2, A market tn. Saxony, eirele, Zwickau, bail. of, and near Voigtsberg. It consists of an upper and under village ; contains a parish ehureh; and has manufactures of musical instruments and wooden combs, a paper, saw, and flour mills; and two annual fairs. Pop. 817.

ERLENBACH, a vil. Wïrtemberg, eircle, Neckar, bail. of, and near Neekarsulm; with a parish chureh, and a market. Pop. 1053.

ERLENBACII, a vil. and par. Switzerland, cam. of, and 20 m . S. by E. Bern, in a lofty valley, surronnded by mountains, l. bank, Simme. It consists of a number of wooden houses, generally of comfortable appearance; contains a parish chureh, handsome schoolhouse, and parsonage; and has sulphureous springs. Pop. 1242.

ERMATINGEN, a vil. and par. Switzerland, can. Thurgat, on S. shore of the Untersee, 4 m . W. Coustance. It stands in a beautiful and fertile distriet, in which much wine, finit, and hemp are grown ; and has manufactures of eopper utensils, several distilleries, and a small harbour on the lake, at which a considerable trade is carried on. There are several fine castles in the vieinity. Pop. 1584.

ERME (St.), par. Eng. Cornwall; 3780 ac. Pop. 552.
ERMELAND [Latin, Warmia; French, Warmie], an anc. dist. Poland, comprised now in the Prusian prov. of Königsberg, and circles of Braunsberg, Rossel, Heilsberg, and Allenstein. It forms a bishopric of same name, the seat of which is Frauenburg.

ERMELO, a vil. Ilolland, prov. Gelderland, 125 m . N.W. Arnhem, in the midst of a heath. It has a chureh and school, and, with some dependent hamlets, a population of 1400 , chiefly engaged in agriculture, cattle-rearing, the wood trade, and paper-making.

## ERMENONVILLE

946
ERZEROOM

ERMENONVILLE, a vil. France, dep. Oise, 28 m . N.E. Paris; with a Gothic parish church, and a château with beautiful grounds, which was a favourite retreat of J. J. Roussean, who died here, July 2, 1778. Pop. 488.

ERMENT, a vil. Upper Egypt. See Arment.
ERMINGTON, par. Eng. Devon; 4920 ac. Pop. 1607.
ERMSLEBEN, a tn. Prussian Saxony, gov. of, and 40 m . N.W. Merseburg, r. bank, Selke. It contains a parish church; and has manufactures of woollen and linen cloth, hats, frieze, and flannel, a dyework, linen printfield, oil-mills, and a trade in cattle. The poet Gleim was born here. Pop. 2288.

ERNE.-1, (Lough), a lake, Ireland, co. Fermanagh, which it intersects N.W. to S.E., 148 ft . above sea level. It consists of two expanses of water, connected by a narrow winding channel, and called, respectively, the Lower and Upper Lakes. The former, the most N., is about 15 m . in length, and about 5 m . in breadth at the broadest part, with a depth, in some places, of 225 ft . It contains nearly $28,000 \mathrm{ac}$. , and embraces 109 islets, some of the larger varying from 10 to 150 ac . Its N. shores consist of gentle slopes, the S . of bold and picturesque acclivities, but towards the N . or lower end, the margins on both sides become flat and boggy. The upper lake is about 12 m . in length, and about 2 to $2 \frac{1}{2} \mathrm{~m}$. broad at the broadest part; depth nowhere exceeding 75 ft ., but, generally, not more than 20 . Area, 9278 ac. The islands in this division are also numerous, amounting, altogether, to 90 ; but the greater part of them very small. The shores here are, in general, tame and marshy. There are several ruins of ancient castles along the margin, and on the island of Devenish is a round tower, in good preservation. Several rivers empty themselves into the lake, which are navigable for boats from 2 to 3 m . up. The boats in use on the lake are flat bottomed, on account of the numerous shoals and fords, and are chiefly employed in supplying the town of Enniskillen with turf. Both lakes abound with trout, salmon, pike, perch, bream, eels, \&c. There is not a single village on the banks, and the country around is thinly peopled. -2, A river which, rising in Lough Gounagh, co. Longford, flows N., traverses co. Cavan, and falls into the Upper Lough Erne. It appears again at the N. end of the Lower Lake, forming the outlet of both lakes, carrying their waters to Donegal Bay, below Ballyshannon, a distance of about 8 m . A succession of falls occur from Balleck to Ballyshannon.

ERNÉE, a vil. France, dep. Mayenne, 16 m. N.W. Laval, agreeably situate on river of its own name. It is well built, has broad straight streets, bordered with good-looking houses; and some trade in wine, brandy, thread, and linen. In the environs are iron mines and forges. Pop. 3577.

ERNSTBRUNN, or Ehrensbrunn, a market tn. Lower Austria, in a beautiful valley, 12 m . N. Kornenburg. It contaius a parish church, and a college; and about 2 m . N.W. on a height, isolated on three sides, stands the castle of Ernstbrunn, with a fine garden. The inhabitants are chiefly engaged in agriculture. Pop. 1400.

EROOB, or Erroob, an isl. Torres Strait. See Darnley.
ERPEL, a tn . Prussia, gov. of, and 20 m. N. W. Coblenz, r. bank, Rhine. It contains a R. Catholic parish chureh. High and steep behind the town rises the Erpeler Lei, a basaltic hill, 700 ft . high, the S . and W . slopes of which produce the much estecmed Lei winc. Pop. 890.

ERPFINGEN, a vil. Würtemberg, circle, Schwarzwald, bail. of, and 10 m . S. Reutlingen. It contains a Protestant parish church, and the ruins of an old castle. Much flax, hemp, corn, and fruit are grown in the vicinity. Pop. 744.

ERPINGHAM, par. Eng. Norfolk; 1350 ac. Pop. 475.
ERRIGAL, three pars. Ireland:-1, Londonderry; 19,625 ac. Pop. 5748.-2, (-Keerogue), Tyrone; 21,140 ac. Pop. 9171.-3, (-Trough), Monaghan and 'Iyrone; 24,793 ac. Pop. 9585.

ERRIS.-1, A wild and desolate maritime dist. Ireland, in the N.W. part of co. Mayo. Area, 232,889 ac. Pop. 26,428.-2, (-Head), a lofty promontory in the above district, forming the W. point of Broadhaven Bay; lat. $54^{\circ} 17^{\prime}$ N.; lon. $10^{\circ} \mathrm{W}$. (r.)

ERROAD, a tn. Hindoostan, presid. Madras, prov. of, and 55 m. N.E. Coimbatoor ; lat. $11^{\circ} 21^{\prime} \mathrm{N}$. ; lon. $77^{\circ} 45^{\prime}$ E.; on a canal from the Bhawani. It was formerly a much larger and more important place than it is now, having fallen off greatly during 'Tippoo's reign. Since then, hewever, it has
much recovered, and is still improving. The situation of the town is said to be healthy.

ERROL, a vil. anil par. Scotland, Perthshire. The parisir, about $15 \mathrm{sq} . \mathrm{m}$. of highly fertile land, or about 8600 ac .; and the village, on rising ground, near centre of Carse of Gowrie, 9 m . E. by S. Perth, and a station on the Dundee and Perth Railway, has a large and somewhat heavylooking parish church, a Free, and two U. Presbyterian churches, three sclools, and a subscription library. The weaving of the coarse linen fabric, called Hessian, is the principal oceupation of the inhabitants. Area of par. 9600 ac . Pop. (1851), 2796; of vil. 1113.

ERROMANGO, a large isl. S. Pacific Ocean, one of the New Hebrides group, N.E. New Caledonia; lat. $18^{\circ} 46^{\prime}$ S.; lon. $169^{\circ} 15^{\prime}$ E. (r.); of volcanic origin, and rich in vegetable productions, including sandal-wood. It is inhabited by a race of Papuan aegroes, who are rude, savage, and cannibals. It was on this island that the late lamented missionary, the Rev. John Williams, was murdered, November 20, 1839.

ERRONAN, or Footoona, an isl. S. Pacific Ocean, New Hebrides; lat. $19^{\circ} 31^{\prime} \mathrm{S}$. ; lon. $170^{\circ} 8^{\prime}$ E. (r.); about 15 m . in circumference.

ERSKINE, par. Scot. Renfrew; 20 sq.m. P. (1851), 1232.
ERsteIn, a tn. France, dep. Bas-Rlin, 15 m. N.E. Schelestädt, on the Ill. It has tanneries, dyeworks, tile and brickfields, roperies, potteries, manufactories of cotton, hosiery, and bleaelifields. Much tobacco is grown in the distriet. Pop. 3357.

ERTH (St.), par. Eng. Cornwall; 3050 ac. Pop. 2452.
ERTINGEN, a vil. Wiirtemberg, circle, Danube, bail. of, and S. from Riedlingen. It contains a R. Catholic parish chureh, and has manufactories of linen. Flax is grown extensively in the district. Pop. 1879.

ERTVAAG, one of the numerous islands which line the W. coast of Norway. It belongs to dist. Romsdal, and is 65 m . W.S.W. Trondhjem. It is nearly of a square form, abont 10 m . across.

ERVAN (St.), par. Eng. Cornwall; 3110 ac. Pop. 477.
ERVAZ, or Ervazze, a vil. Austria, Dalmatia, circle of, and 17 m. N.N.E. Spalato, near the Cettina. It consists of thatched houses, beautifully situated among trees, on an elevated knoll, the summit of which is crowned by a white ehureh.

ERWA, an isl. Red Sea, one of the Dahalac group ; it is moderately high, and about 12 m . in circumference; inhabited by a few fishermen.

ERWARTON, par. Eng. Suffolk; 870 ac. Pop. 199.
ERW ASH, a river England, co. Nottingham, which falls into the Trent about 4 m . S.W. Nottingham.

ERXLEBEN, a vil. Prussia, gov. Magdeburg, circle of. and $10 \mathrm{~m} . \mathrm{S}$. Neuhaldensleben. It contains a parish church, castle, and poorhonse, and stone quarries, and several mills. Pop. 1587.
erzeroom, Erz-Rus, or Arzerona, a tn. Turkish Armenia, cap. pash. of same name, 166 m. N.N.E. Diarbekir ; lat. $40^{\circ} 9^{\prime} \mathrm{N}$. ; lon. $41^{\circ} 46^{\prime}$ E.; on a plain, and 6114 ft . above the level of the Black Sea, from the S.E. coast of which it is distant about 90 m . It is composed of a central portion, called the Ark or Citadel, surrounded by a wall, and extensive suburbs stretching out on all sides. The streets are narrow and filthy, and infested with savage dogs. They present, however, a lively and bustling appearance, being thronged with a motley assemblage of Kurds, Persians, Georgians, Armenians, and Turks, exhibiting their various physical characteristics, and different costumes. In the centre of the town stands the citadel, now nearly in ruins; it is surrounded by a donble wall, flanked by bastions, on which are a few brass guns. There are here several respectable bazaars, some clean and well attended baths, a large custom-house-said to be the largest in the empire-and no fewer than 36 khans, the latter an evidence of the extent of the trade of the town, or, at least, of the number of visitors; and numerous mosques and minarets, many of them, however, in ruins. Although an old town, Erzeroom boasts of but few antiquities; the most remarkable is the Chifteh or Tchifteh Minareh, so called from its two lofty minarets, now in ruins. The architecture of this structure is a modification of Byzantine and Saracenic; the minarets are composed of small coloured bricks and glazed tiles, and deeply fluted. It appears to have been originally a
church, but is now occupied as an arsenal. The principal manufactures of Erzeroom are morocco leather, carpets, silk, and cotton fabrics, and articles in iron and in brass, the former comprising swords and horse shoes, the latter drinking cups and candlesticks; it has also an extensive transit trade, being
on the great line of travel between Constantinople and the Eastern portion of the empire. It has been estimated that $£ 300,000$ worth of British goods pass through the town annually. Pop. cstimated at $30,000,35,000$, and 50,000 . According to Col. Chesney, it was formerly 130,000 .

The pashalic includes a large pertion of Armenia. It lies letween lat. $38^{\circ} 42^{\prime}$ and $41^{\circ} 7^{\prime} \mathrm{N}$., and lon. $39^{\circ} 10^{\prime}$ and $44^{\circ} 30^{\prime}$ E.; bounded, N. by pash. Trebizond, Akhalzik, and Kars; E. by Russian Armenia, and Persia; S. by pash. Van and Diarbekir; and W. by sivas. It is a lofty plateau, very meuntainous, with a long, cold winter, aceompanied with heavy falls of snow, and a shert, very hot summer, and watered by the head streams of the Euphrates, Aras, and Tehoruk. It is treeless, and has a poor soil, but well cultivated; in this respeet presenting a favourable contrast to most other parts of the Ottoman empire, and has excellent pastures. It is divided into 12 distriets.- (Southgate; Col. Chesney ; Ilamilton; Flandin, Voyage En Perse, dec.)

ERZGEBIRGE [ore mountains]:-1, A mountain range, Gernany, part of the Sudetes chain, and forming the boundary het ween Sax ony on the N.W., and Bohemia on the S.E. From the narrow valley of the Elbe, which separates them from the Riesengebirge, they extend S.W. to the Fichtelgebirge, in Bavaria, lowering down considerably towards their S.W. extremity. Total length of the range, nearly 100 m . On the Bohemian side the mountains are steep and abrupt, and send out few streams, and those small; but towards Saxony they sink gradually down, and send forth numerous and impertant streams, ineluding all those in Saxony W. of the Elbe, to which river they all flow. They are composed of gneiss and granite; perphyry and basalt appearing only as superimpesed or as inserted masses. In Saxony the gneiss and granite is followed by clayslate, above which again are porphyry, granite, and syenite. Towards Bohemia, brown-coal and clay-slate are developed ever a considerable space. The Erzgebirge are well wooded, and rich in silver, tin, and cobalt ; copper and lead appearing only as aecessories. The richest mines are these of Freyberg. The highest peaks are Schwarzwald, or Sonnenwirbel, 4124 ft ., and the Little Fichtel, 3712 ft 2, (Erzgebirge, or Erzgebirger.Kreis), a dist. or circle, Saxony, prior to the new division of the kingdom in 1835 . It lay along the mountains of same name, and is now included ehicfly in the cirele or prov. of Zwickau, excepting small portions in the cireles or provs. of Dresden and Leipzig.

ERZINGAN, a tn. Asiatic Turkey, pash. of, and 82 m . S.W. Erzeroom, r. bank of N. branch, Euphrates, and at the W. extremity of the well eultivated and thickly peopled plain of Erzingan. It contains about 3000 houses, and is noted for the excellent breed of sheep which is reared in the environs.

ESA [Latin, Isia], a vil. and cem. Sardinian States, Piedmont, prov. of, and 6 m . E.N.E. Nice, on a lofty height, commanding a view of the sea, and, in elear weather, of the mountains of Cersica. It contains a parish chureh, with
seme paintings, and the remains of an old castle. The olive thrives well, and is the chief product of the district.

ESCALA, a tn. and port, Spain, Catalonia, prov. of, and 19 m. N.E. Gerona, on the Mediterranean. It lias a church, convent, and customhouse; and some trade in wine, oil, grain, fruit, fisl, barilla, wool, and lime. Many of the inhabitants are empleyed in agriculture, cattle-rearing, and fishing. Pop. 2212.

EsCALAPLANO, or Scalaplano, a vil. isl. Sardinia, prov. of, and 15 m . E. Isili, on the S . slope of a hill, between two streams. It contains a parish and three minor churehes, and a primary school; and has manufactures of woollen and linen eloth, and a trade in eorn, wine, cheese, and cattle. P. 1220.

ESCALONA, two tns. Spain:-1, New Castile, prov. of, and 26 m. N.W. by W. Toledo, near r. bank, Alberche, liere erossed by a good stone bridge. It is bally built, has narrow, crooked, dirty and ill-paved streets; old and dilapidated dwellings; a parish church, eliapel, townhall, prison, school, hospital, theatre, and the old and once superb palace of the counts; a trade in grain, wine, oil, fruits, and cattle. Pop. $581 .-2$, Old Castile, prov. of, and 16 m . from Segovia, and has a townhouse, storehouse, two schools, and a parish chureh. Trade in agricultural produets. Pep. 831.

ESCALONILLA, a vil. Spain, New Castile, prov. of, and $20 \mathrm{~m} . W . N . W$. Toledo, in a pleasant valley. It has goud streets, a parish church, townhall, prison, two schoels, a fountain, and a cemetery, with a chapel attached. Manufac-tures:-serge, coarse eleth, wine, and oil. Pop. 2195.

ESCATRON, a tn. Spain, Aragon, prov. of, and 45 m . S.E. Saragossa, 1. bank, Martin, at its confluence with the Ebro. It is indifferently built, has badly kept streets, a parish ehureh, chapel, sehool, townhall, prison, and hospital. Wine and oil are made, and silk worms reared. Pop. 1698.

ESCAU'T, a river, Belgium. Sce Scueldt.
ESCHAU, a market tn. Bavaria, Lower Franeonia, on the Elsava, 30 in . W. Wuirzburg, with a Protestant chureh, manufactures of nails, and red and white leather, dyeworks, a trade in wood, a monthly cattle market, and four annual fairs. Pop. 760.

ESCHELBACH, a vil. Baden, circle, Lower Rhine, bail. of, and near Wiesloch. It has a parish chureh, a townhouse, and old castle, now used as a R. Catholic chapel; and manufactures of linen and shoes. Jop. 973.

ESCHENAU, a vil. Wïrtemberg, cirele, Neckar, 6 m . E. Weinsberg, with a parish ehureh and a castle. Good wine is produced in the vicinity. Pop. 951.

ESCHENBACH, several places, Bavaria:-1, A th. Upper Palatinate, cap. dist. of same name, 16 m . S.E. Baireuth. It is surrounded with a wall, is the seat of a court of
jnstice, contains a castle and three churches, and has manufactories of cloth and two mills. Pop. of tn. 1800. Area of district, 192 geo. sq. m. Pop. 18,194.-2, A vil. Middle Franconia, dist. of, and near Hersbruck, on the Pegnitz, here crossed by a bridge. It contains a parish church and a castle, and has a stone quarry and a mill. Pop. 338.-3, A tn. Middle Franconia, dist. Heilsbronn, 21 m. S.W. Nürnberg, with two churches and a courthouse. Pop. 936.

ESCHENZ, a vil. and par. Switzerland, can. Thurgau, 1. bank, Rhine, 13 m . E.S.E. Schaff hausen. It consists of Ober and Unter Eschenz, is well built, contains a R. Catholic parish church, a R. Catholic and a Protestant school. Roman coins and other antiquities have been found in the vicinity. Pop. 2016.

ESCHERSHAUSEN, a vil. Brunswick, circle, IIolzminden, on the Lenne. It contains a church and a townhouse, and has manufactures of linen, and three annual fairs. Pop. 1070.

ESCHOLTZ BAY, an inlet, W. shores of Russian America, in the bay of Good Hope; lat. $66^{\circ} 15^{\prime}$ N.; lon. $161^{\circ}$ W. Several remarkable fossil bones were discovered here by the naturalists of Kotzebue's expedition, which they believed to have been encased in ice, but were really, as Captain Beechy has shown, imbedded in clay.

ESCHOLZMATT, a vil. and par. Switzerland, can. Luzern, bail. Entlebuch, nearly 3000 ft . above sea level. Pop. 2908.

ESCHREFF, a tn. Persia. See Ashruff.
ESCHWEGE, a tn. Hesse-Cassel, Niederhessen, in a beautiful valley, on the Werra, 26 m . E.S.E. Cassel. It is walled, has six gates, consists of the old and new town, and a suburb, and is well built, having good houses, lining spacious well-formed streets. It contains a castle, long the residence of the landgraves of Hessen-Rotenberg, three churehes, a townhouse and infirmary, and has manufactures of linen and woollen cloth, numerous extensive tanneries, several glueworks, a soap-work, oil, and other mills, and a trade in meal, fruit, lard, hams, and sausages. Pop. 6042.

ESCHWEILER, a tn. Rhenish Prussia, gov. of, and 9 m. E.N.E. Aix-la-Chapelle, a station on the railway to Cologne, at the confluence of the Inde and Dente. It is the seat of a court of justice, and has extensive malleable ironworks and rolling-mills, a large machine factory, and manufactures of woollen cloth, wax cloth, velvet and silk, needles and ironwire, lace, vinegar, vitriol and leather, glass-works, and smelting furnaces. Calamine and lead are mined in the vicinity, and at some distance are extensive coal-works. Pop. (1846), 9036.

ESCONDIDO.-1, A port, Yucatan, at the N.E. end of Lake Terminus, lat. $19^{\circ} \mathrm{N}$. ; lon. $91^{\circ} \mathrm{W} .-2$, A harbour, Cuba, S. eoast, 60 m. E. Santiago. - 3, An inlet, New Grenada, W. coast, Bay of Panama, lat. $7^{\circ} 40^{\prime}$ N. ; lon. $78^{\circ} \mathrm{W}$. -4, A harbour, Gulf of California, lat. $25^{\circ} 55^{\prime} \mathrm{N}$. ; lon. $91^{\circ} 5^{\prime} \mathrm{W}$.

ESCORIAL, a tn. Spain, Estremadura, prov. of, and 32 m . S.E. Caceres, on the side of a hill. It is badly built, has irregular, mean, and unpaved streets, a parish church, townhouse, prison, storehouse, and two schools. Agriculture, and the manufacture of linen, baize, serge, \&c., are the chief oceupations. Pop. 2300.

ESCORIAL, or Escurial, a small tn. and celebrated palace and monastery, Spain, New Castile, prov. of, and 27 m . N.W. Madrid, 2700 ft . above sea level, in a barren, rocky, mountainous district. The town is well built, and has a townhouse, prison, neat theatre, two schools, a parish church, and two palaces, and is surrounded by fine walks and beautiful gardens. Pop. 1442.-The palace and monastery, properly desigrated El real Sitio de San Lorenzo el real del Escorial, and formerly looked upon as the eighth wonder of the world, is a vast grey granite, chiefly doric, building, with slate and leaden roofs, combining the purposes of a palace, monastery, and mausoleum; but its multitude of small windows impart to it much of the appearance of a huge factory; in form it is a rectangular parallelogram, measuring, N. to S., 744 ft ., and E. to W. 580 . It was built by Philip II., in fulfilment of a vow made after the victory of St. Quiutin, gained over the French, August 10, 1557, and was dedicated to San Lorenzo [St. Lawrence], who, according to tradition, suffered martyrdom by being broiled on a gridiron. In
commemoration of this event, the ground plan of the buildings represents that instrument of torture. The interior is divided into courts, which represent the intersections of the bars of the gridiron, while the royal residence forms the handle, and towers at the four corners supply feet. The first stone was laid April 23, 1563, by Juan Bautista de Toledo, and the edifice was finished September 13,1584 , by his great pupil, Juan de Herrera.

The building comprises a convent, with cloisters, two colleges, a royal palace, three chapterhouses, three libraries, with about 30,000 volumes, and some valuable MSS.; five great halls, six dormitories, three halls in the hospital, with twenty-seven other halls for various purposes; nine refectories and five infirmaries, with apartments for artizans and mechanics. There are altogether 1110 windows in the outside of the building, and 1578 within; there are also sixtythree fountains, twelve cloisters, eighty staircases, sixteen court-yards, and 3000 ft . of painted fresco. In the centre stands the church, the most remarkable part of the entire structure. It is in the form of a Greek cross, with three naves, 320 ft . long, 230 ft . wide, and 320 ft . high to the top of the cupola. It is gorgeously adorned with gold, silver, and precious stones, and has altogether an air of extraordinary grandeur and magnificence. Eight of the compartments of the vaulted roof are painted in fresco. The ligh altar is ascended by a flight of red-veined marble steps. Many of the columns are of jasper, with bronze gilt bases and capitals. In the sacristy are a number of pictures by the old masters. In 1802 it was sacked by the French, and everything of value carried off. It was subscquently gradually going to decay; but grants of public money have been made for its restoration since the accession of the present sovereign, Isabella II.(Madoz's Diccionario de España; Ford's Hand-book of Spain.)

ESCORIAZA, a tn. Spain, prov. Guipuzcoa, l. bank, Deva, in a deep valley among mountains, on the great road from Madrid to France, 30 m . S.W. St. Sebastian. It is well built, contains a parish church, townhouse, primary school, and the buildings of a magnificent hospital, not now in use; and has some manufactures of linen, a trade in cattle and hams, numerous nills, and some sulphureous springs. P. 1896.

ESCRICK, par. Eng. York (E. Riding); 6400 ac P. 895.
ESCUDO, an isl. Caribbcan Sea, about 9 m . from N. coast, Veragua; lat. (W. point) $9^{\circ} 6^{\prime} 24^{\prime \prime} \mathrm{N}$. ; lon. $81^{\circ} 34^{\prime} 30^{\prime \prime}$ W. (R.) It is low, but covered with cocoa and other trees, and is surrounded on the E . and N. parts with various kays of a chalky clay, also covered with foliage. All the island and kays are surrounded by a shoal of sand and gravel, which extends out 5 m . On the S . and $\mathrm{S} . \mathrm{W}$. parts there is an anchorage, well sheltered from the N. winds ; and W., on the mainland, is a promontory of same name.

ESCUIN'TLA, a tn. Central America, state of, and 42 m . S.W. Guatemala; with a fine parish church. Pop. 2500; mostly Indians.

ESENS, a tn. Hanover, principality, Aurich, on the Tief, 27 m. N.E. Embden, not far from the German Ocean. It contains a church, townhouse, an orphan, and a widows' hospital; and has manufactures of linen, a lirewery, and distillery, and a trade in agricultural produce. Pop. 2248.

ESGUEIRA, a tn. and par. Portugal, prov. Douro, 30 m . N.N.W. Coimbra. It contains a Benedictine convent, said to be the oldest in the kingdom; an hospital, and almshouse; and has an annual fair. Pop. 1527

ESHER, a vil. and par. England, co. Surrey, the former 15 m. S.W. London, and a station on the South-western Railway. The royal palace of Claremont, in this parish, was built by Lord Clive, and purchased for the Princess Charlotte and Prince Leopold, now King of the Belgians. Here her Royal Highness resided till her death. Louis Philippe took up his abode here, after his abdication of the French throne, in 1848. Esher Place is another celebrated mansion in this parish, once occupied by Cardinal Wolsey. Area, 2120 ac. Pop. 1261.

ESIAN(), a vil. isl. Sardinia, prov. Cagliari, in an exposed and rugged district on the elevated plateau of Planargia. It is poor, irregularly built, and filthy in the extreme; has a parish and two auxiliary churches, a primary school, and manufactures of woollens and linens, and some trade in wine, oil, and fruit. Pop. 1500.

ESINE, a vil. and com. Austrian Italy, gov. Milan, prov. Bergamo, dist. of, and 4 m . S. Breno, in the Val Cammonica,

1. bank, Ollio. It contains two churches, one ancient, and the other a handsome modern structure, with some good paintings; and has several saw-mills, and a trade in wood, both for fuel and carpentry. On a rock above the town are the ruins of an old castle. Pop. 131 I.

ESK.-1, A beautiful lake, Ireland, co. of, and 3 m . N.E. Donegal.-2, A mountain range, lreland, between cos. Cork and Kerry.--3, A small river, England, co. Cumberland, which rises in the S. Fell, and after a S.W. eourse, of 20 m ., falls into the Irish Sca, near Ravenglass.-4, A river, Scotland, formed in co. Dumfries, by the junction of the Black and White Esk; after forming for a short space the boundary between England and Scotland, it enters Cumberland, and falls into the Solway Firth, about 2 m . from Sarkfoot. Total course, about $24 \mathrm{~m} .-5$, A river, Scotland, co. Edinburgh, formed by the junction of the N. and S. Esk, which unite $1 \frac{1}{2} \mathrm{~m}$. N. by E. Dalkeith. It flows N., and falls into the Firth of Forth at Musselburgh.-6, (N. Esk), A river, Scotland, co. Forfar, which rises among the Grampians, and after a S.E. course of about 22 m ., during part of which it forms the boundary between the cos. of Forfar and Kincardine, falls into the German Ocean 3 m . N. Montrose. The salmon fisheries on this river are of considerable value.-7, (or $S . E s k$ ), A river, Scotland, eo. Forfar, whieh rises in the Grampians, flows S.E. and E. past the town of Brechin, and falls into the German Ocean at Montrose, inland from which it forms a large basin. Its salmon fisheries are valuable; but it is navigable for only a short distanee from the sea.

ESKDALE, a dist. Scotland, co. Dumfrics. It is the most E. part of the co., and is, for the most part, rugged abil mountainous.

ESKDALEMUIR, par.Scot.Dumfries; 42,250ac. P.646. ESKER, par. Irel. Dublin; 2509 ac. Pop. 857.
ESKI-Hissar [old castle], a small tn. Asiatic Turkey, pash. Anatolia, 117 m. S.S.E. Smyrna, supposed to occupy the site of the ancient Stratonicea, which was founded by a colony of Macedonians; and there still exist here the ruins of a theatre, pilasters, columns, inscriptions, and sepulchres. Tobacco is grown in the vicinity.

ESKI-Sagra, a tn. Turkey in Europe, on a S. slope of the Balkan monntains, 170 m . N. W. Adrianople. It has a manufacture of carpets and coarse linen, with some tanneries. In the environs roses are extensively cultivated, and there are numerous orchards, with scveral well-frequented mineral springs. Pop. 20,000.

ESKI-Shehr, a tn. Asiatic Turkey, pash Anatolia, 22 m. N.E. Kutaya, r. bank of an afflıent of the Sakaria. It consists of two portions, one at the foot of a range of hills, the other between two rivulets in the plain, where the market is held. It contains a khan, and a manufactory of neerschaum pipe-heads.

EsKl-Stambul [old Constantinople], a maritime tn . Asiatic Turkey, about 18 m . N. from the S.W. entrance into the Dardanelles. Many remains of antiquity are to be met with in the vicinity.

ESKlLTUNA, a tn. Sweden, läı Nykoping, 54 m . W. by S. Stockholm, intersected by the Eskiltuna or Hyndevad, which flows from Lake Iljelmar to Lake Malar. It is a good looking place, and is the principal scat in the kingdom of the iron manufactures. It has copper and iron forges, a steelwork, mills, and machine shops; and in its vicinity is a famed factory of arms. Pop. 2486.

EsKimos. See Esquimaux.
ESLA, a river, Spain, which rises in the N. of prov. Leon, near Valdeburon, in the S. slope of the mountains of Asturias, flows N.S.W., and joins r. bank, Douro, about 15 m . betow Zamora, after a course of about 125 m . It receives a great number of small streams, and abounds with fish.

ESMERALDA [emerald], a missionary vil. S. Ameriea, Venezuela, r. bank, Orinoeo, about 10 m . S. from the base of the celebrated mountain Duida; lat. $3^{\circ} 10^{\prime} \mathrm{N}$.; lon. $66^{\circ} 3^{\prime} \mathrm{W}$. It obtained its name from a mineralogical error, which consisted in mistaking the rock crystals, and elloritic quartzes of Duida, for diamonds and emeralds. It is extremely miserable, and the inhabitants, noted for their ability in the manufacture of wonrali poison, are in great poverty; bnt the country around is extremely beautiful and fertile, and capable of producing, in great abundance, plantains, sugar, and cacao.

ESMERELDAS, a maritime tn. Ecuador, prov. Imbambura, 95 m. N.W. Quito, at the mouth of the Esmereldas; lat. $1^{\circ} \mathrm{N} . ;$ lon. $79^{\circ} 35^{\prime} \mathrm{W}$. (R.) It is one of the principal commercial ports in the republic. In its vicinity excellent cacao is produced; and, from mines along the river, emeralds are gathered, chiefly by Indians. The river, formed by the junction of numerous streams about 40 m . S.E. the port, has a N.W. course, and is bordered by impenetrable forests.

ESNEH, or Esna [Coptic, Sne; Latin, Latopolis], a tn. Upper Egypt, 1. bank, Nile, opposite to Taud, which is hence called Anti-Latopolis, 28 m. S.S.W. Thebes. The extensive mounds, evidently covering the remains of ancient buildings, prove it to have been once a place of great extent and consequence; but the only buildings exposed to view is the portico of a temple, in the finest style of the time of the Pharaohs, and supported by colunins, many of which are remarkable for elegance and massive grandeur. The number of the pillars is 24 , each about $5 \frac{1}{2} \mathrm{ft}$. in diameter, and 40 ft . high. All their capitals are adorned with leaves of various kinds of trees; and, being all formed on one plan, harmonize with each other. The portico is 112 ft . long, by 53 ft . broad. On its cuiling is a zodiae similar to that of Dendera; and on the

NTEAIOR OF THE TEMPLE OF ESNEH From Horeau, Panorama d'Fgypte.
pilasters, on either side of the front row of columns, are several lines of hieroglyphics, containing the names of the Egyptian months. Over the dedication, at the entrance, are the names of Tiberius, Clandius Casar, Germanicus, and Vespasian; and within are those of Trajan, Adrian, and Antoninus. This has led several distinguished antiquaries to maintain that the whole temple, or at least the portico, the only part of it exposed to view, is not of the early date which its style would seem to indicate; but was built in imitation of that style in the time of the Romans. The nudern town of Esneh is a poor filthy place, composed chiefly of mull huts. and a bazaar of similar construction. It is the place of banishment for all the Almehs and other women of Cairo who offend against the rules of the police. At Esneh the Nile widens out into an extensive and well cultivated plain, and is bounded, E. and W. by pieturesque looking lills. Pop. about 4000 .

ESO, an isl. Adriatic Sea, off the coast of Dalmatia, lying parallel to, and nearly midway between the islands of Lunga or Grossa, on the W., and Ugliano on the E.; greatest length, N.N. W. to S.S.E., $7 \mathrm{~m} . ;$ average breadth little more than 1 m .

ESOOAN, a tn. Upper Egypt. Sce Assouan.
ESPADA (Santiago de la), a tn. Spain, Audalusia, prov. of, and 50 m . N.E. Jacn. It is tolerably well built, has two squares, and level streets, a parish church, three chapels, a townhouse, prison, storehouse, fountain, and an extramural cemetery. Manufactures:-cloth, linen, and woollen fabrics, wine, oil, \&e. Trade in grain, cattle, and fruits. Pop. 4335.

ESPALION, a tn. France, dep. Aveyron, 17 m. N.E. Rodez, 1. bank, Lot, here crossed by a bridge; with some ruined Gothic castles crowning several neighbouring heights. lt is neatly built, and thriving; is the seat of a sub-prefect, and has a communal college. It has manufactures of coarse woollens, leather, glue, \&c., with wool-spinning, and a traffic in timber and buckhorn wares. Pop. 2487.

ESPARDELL, one of the Balearic isls. Meditcrrancan, a little N. of Formentera, and between that isl. and Iviza; lat. $38^{\circ} 48^{\prime}$ N. ; lon. $1^{\circ} 25^{\prime}$ E.

ESPARLAGOLA-de-Lares, a th. Spain, Estremadura, prov. of, and 80 m . E. Badajos, l. bank, Guadalema. It has four squares, a church, four clapels, school, townhall, storehouse, fountain, and the ruins of an ancient palace. Manu-facture:-linen, Trade:-grain, fruits, and cattle. P. 2450.

ESPARRAGUERA, a tn. Spain, Catalonia, prov. of, and 21 m. N.W. Barcelona. It cousists chicfly of one street, about $1 \frac{1}{2} \mathrm{~m}$. long, and has a parish churel, school, hospital, and storehouse. Manufactures:-linen, woollen, and cotton fabrics; paper, soap, wine, oil, \&c. Pop. 2647.

ESPEJO, a th. Splain, Andalusia, prov. of, and 20 m . S.E. Cordova, on the slope of a hill. The streets, in gencral, are wide, regular, and paved, the houses indifferently built. It has a townhouse and prison, a parish church, eight clapels, a convent, college, two schools, an hospital, storehouse, cemetery, and an ancient castle of the Duke of Medina Celi. Manu factures:-linen, woollen, and hempen fabrics, earthenware, wine, and oil. Trate:-grain, cattle, wool, and lemp. P. 5284.

ESPERANCE, a bay, Australia, S. coast ; lat. $33^{\circ} 36^{\prime}$ S.; lon. $121^{\circ} 46^{\prime}$ E. (1..) ; about $1 \frac{1}{4} \mathrm{~m}$. wide, and above 4 m . in extent, flrst in a N.W., and afterwards in a S.W. and W. direction. The bay contains several inlets, the principal of which, Lahage, is half a mile long, and covered with trees. The coast is barren, consisting cliefly of sand hills, with low vegetation; mountains appear in the interior, and there are salt lakes near the shore.

ESPERANCE PORT. Sce Adamson's Ifarbour.
ESPICIIEL [anc. Barbarium Promontarium], a cape, W. coast, Portugal, 21 m. S. by W. Lisbon ; lat. (lighthouse) $38^{\circ} 24^{\prime} 54^{\prime \prime}$ N.; lon. $9^{\circ} 13^{\prime}$ W. (R.) The coast, immediately N., is low and sandy, but becomes lofty on approaching the cape, which rises perpendicularly out of the sea; is of a whitish colour on the N., and reddish on the S. side, and is erowned by a small chapel and lighthouse; the latter 617 ft . above the sea.

ESPINARDO, a tn. Spain, prov. of, and 2 m. N.N.W. Murcia. It forms chicfly one long street, along the high road to Albacete; has a church, townhouse, two schools, a prison, storehouse, two rural chapels, and a palace of the Marquis of Espinardo, with delightful gardens. Manufactures: -Silk and linen fabrics, earthenware, and glass. P. 1887.

ESPINOSA de-los Monteros, a th. Spain, Old Castile, prov. of, and 49 m . N. by E. Burgos, l. Lank, Trueba, at the N. base of a mountain. It is indifferently built, and has six churches, one chapel, a townhall, prison, school, three fountains, and a stronghold belonging to the Count Mostard. Pop. (agricultural), 2298.

ESPIRITO (SANTO), a maritime prov. Brazil, between lat. $18^{\circ}$ and $21^{\circ} 40^{\prime} \mathrm{S} . ;$ and lon. $39^{\circ} 40^{\prime}$ and $42^{\circ} 40^{\prime} \mathrm{W}$. ; length, about 260 m .; breadth, 120 m. ; area, $43,290 \mathrm{sq} . \mathrm{m}$. ; bounded, N. by prov. Bahia; W. by Minas-Geraes ; S. Rio-de-Janeiro; and E. the Atlantic. The N. frontier is formed by the Mucury; the W. by the Guandu and the Cordillera dos Aimores; and the $S$. by the Cabapuana. The province, on the whole, is very impertectly known. It is tolerably well peopled along the sea coast, where a number of small towns have been built, but the interior, covered with lofty mountains and impervious forests, is almost entircly in the hands of wild Judians, descend-
ants of the ancient Aimores and Tupis, and now known by the name of Puris and Botecudos. The principal rivers are the Benevente or Reritigba, Cabapuana, Carahipe, Cricaré, Doce, Guaudu, Guarapari, Itape Mirim, Jecu, and Santa Maria. They all flow E., in courses nearly parallel, and fall into the Atlantic; and are frequented at their mouths, which are generally safe and deep, by coasting vessels, and in the interior by canoes, some of which ascend almost to their sources on the slopes of the Cordillera. The climate is in general healthy, and the land fertile, but very little of the soil is under proper cultivation. Considerable attempts at improvement have recently been made, but as yet the exports are of little importance. They consist of unrefined sugar, rum, cotton, mandioca flour, rice, maize, timber and dyewoods, drugs and salt fish. The province is not yet properly divided into administrative districts, but nominates three candidates for the appointment uf a senator, and sends two deputies to the General Assembly, and 22 members to the Provincial Legislative Assembly, which holds its sittings in Victoria. Pop. 140,000.

ESPIRITO (SANTo), a tn. Brazil, anciently cap. of above prov. and at the S. entrance of the bay of same name. It is better known as Villa Velha, which it owes to the erection of Victoria, which is now the capital. Though once a place of importance, and visited by numerous vessels from all quarters, it has degenerated into a mere village, of about 40 thatched houses. Pop. of dist. about 1000 .

EsPIRITU (Santi), Spirito Sancto, or Spiritus Sanctus, a th. isl. Cuba, 202 m . E.S.E. Havannalı; lat. $21^{\circ} 57^{\prime} \mathrm{N}$. ; lon. $79^{\circ} 28^{\prime} \mathrm{W}$. It is the centre of a thriving district, and was founded by Velasquez. It has some trade in sugar, coffee, \&c. Pop. tn. 5296 whítes, 2722 free coloured, and 7466 slaves; pop. dist. 21,969 vhites, 4958 free coloured, 6784 slaves.

ESPIRITU SANTO.-1, A spacious bay, U. States, W. coast, Florida ; lat. $27^{\circ} 50^{\prime} \mathrm{N}$; lon. $82^{\circ} 45^{\prime}$ W.. having, on its E. side, Hillsboro bay, and at its N. extremity Tampa bay.2, A bay and inlet, 'lexas, on the Gulf of Mexico; lat. (inlet) $28^{\circ} \mathrm{N}$.; lon. $97^{\circ} 30^{\prime} \mathrm{W}$. The bay is landlocked, having the long narrow island of Matagorda between it and the open sea.

ESPLUGA de Francoli, a tin. Spain, Catalonia, prov. of, and 22 m. N.N.W. Tarragona, r. bank, Francoli, overlooked by the ruins of a spacious and once strong castle. It has a handsome Gothic church, four schools, an hospital, storehouse, and cemetery. Manufactures:-linen and cotton fabrics, brandy, soap, white wax, and tiles. Trade:--manufactured goods, agricultural produce, hardware, and salt fish. Pop. 2702.—Espluga, with different affixes, is also the name of four small villages in Catalonia, and one in Aragon.

ESPORLAS, a tn. Spain, isl. Majorca, 8 m . N.W. by N. Palma, in an agreeable valley surrounded by hills. It is irregularly built; has a parish church, two schools, a townhouse, prison, and cemetery; and in its vicinity are some curious natural caverns. Manufactures:-paper and earthenware. Pop. 1857.

ESPOZENDE, a tn. and par. Portugal, prov. Minho, at the mouth of the Cavado, where it has a small hartoour. It contains a chureh, hospital, and almshouse. Pop. 1170.

ESPRIT (St.), a suburb of Bayonne (which see.)
ESPRI'T (The St.), a group of small isls. China Sea, between Borneo and the S.E. extremity of the Malay peninsula; they extend about 12 m. W. by N., and E. by N., the body of them being in about lat. $0^{\circ} 34^{\prime} \mathrm{N} . ;$ lon. $107^{\circ} 10^{\prime} \mathrm{E}$.

ESQUEIMMES, a vil. France, dep. Nord, about 2 m . from Lille; with manufactures of ivory black, cotton tluread, and paper ; some bleaehing grounds and oil nills. Pop. 1707.

ESQUILLADO ( $\mathrm{L}^{\prime}$ ), a small isl. Mediterranean, near the coast of France; lat. $43^{\circ} 3^{\prime} \mathbf{N}$. ; lon. $6^{\circ} 36^{\prime} \mathbf{E}$.

ESQUIMAUX, or Eskimos [caters of raw flesh], the present inhabitants of Arctic America and Greenland, of Mongol origin, and consisting of three principal stocks:-the Kalalits, better known by the name of Greenlanders; the Esquimaux proper, on the N. and E. coast of Labrador; and the Western Esquimaux, found along Iludson's Bay, the W. side of Baffin's Bay, the polar shores of America, as far as the mouths of the Coppermine and Mackenzie rivers, and both on the American and Asiatic sides of Behring's Straits. This last locality gives them the remarkable peculiarity of being the only aboriginal race common to the Old and the New World. Their leading physical peculiarities are a stunted
stature, flattened nose, projecting cheel-bones, eycs often oblique, and yellow and brownish skin. The dress of the men consists chiefly of a cloak of seal-skins, which reaches to the knecs; and that of the women differs from it only in a few minute peints, often scarcely discernible. In summer they live in tents, covered with the skins of rein and fallow deer; in winter they may be said to burrow beneath the snow. Vegetation being extremely stunted within the limits of their territories, their chief dependence for food is on fishing, particularly on that of the seal, which seems to be as essential to them as the reindeer to the Laplanders. Their weapons are bows and arrows, and spears or lances, generally pointed with stones or bones, but sometimes also with copper. Their language consists of long compound words, and has regular, though remarkable, inflections. In grammatical structure, at least, it is American. In intellect they are by no means deficient, and show a considerable aptitude for instruction; in manners they are kind and hospitable, love freedom, and manifest a deep attachment to their homes and native land. Their religious ideas appear scanty, but the success which ultimately attended the labours of the Danish missionaries, after they had alnost begun to despair of it, proves their capability of receiving Christianity, of understanding its truths, and conforming to its precepts.

ESQUIMAUX, an isl. and harbour, N. America, gulf of St. Lawrence, N. or Labrador coast ; lat. $54^{\circ} 35^{\prime} \mathrm{N}$.; lon. $56^{\circ} 21^{\prime} \mathrm{W}$. (r.) The island is $23 \frac{3}{4}$. long, and $1 \frac{3}{4}$ broad, and about 200 or 250 ft . in height on the N. side. 'The harbour is between the N. side of the island and the main. The tides ruming through Espuimaux harbour seldom exceed a mile; the flood setting in from the E., and the ebb the contrary.

ESQUIPULAS, a tn. central America, state, Guatemala, $18 \mathrm{~m} . \mathrm{S}$. by E. Chiquimala. It is chiefly remarkable for a fair, which continues for three days, commencing on January 15th, and is attended by a vast concourse of people from all quarters, some attracted by the hope of gain, others by the prospect of amusement and dissipation, but the greater portion by religions motives, there being a celebrated image of the cruenfixion in a handsome new church, about 1 m . from the town, a pilgrimage to which is deemed highly meritorious by faithful R. Catholies. Pop. 1800.

ESROM, a lake, Denmark, isl. Secland, 11 m. W. Elsineur, area $8 \mathrm{sq} . \mathrm{m}$., from 30 to 36 ft . deep in the centre, with well wooded shores. A canal, 6 m . long, is used for floating timber from it to the small harbour of Dromingemölle, on the Kattegat. Near its N. end is a small village of same name.

ESSEN, a vil. lIanover, gov. of, and 13 m. E.N. E. Osnabruck, with a parish chureh, and an important market for Hax. Pop. 832

ESEEN, a tn. Whenish Prussi:t, gov. of, and 18 m . N.E. Diisseldorf, on the Bernc. It is surrounded by walls, is the seat of a court of law, and several public offices; contains two Protestant and two R. Catholic churches, a synagogue, gymnasium, Capuchin monastery, orphan and ordinary hospitals; and has manufactures of woollen and linen cloth, iron, and steel-ware, leather, and vitriol; a trade in colonial produce, drugs, wine, and wool; and seven annual fairs. Coal is worked in the neighbourhood. Pop. 7912.

ESSENDON, par. Eng. Hertford ; 2170 ac. Pop. 690.
ESSEQUIBO, a dist. British Guiana (which see).
ESSEQUIBO, a large river, British Guiana, formed by several head streams which rise in the sierra Aricua or Acaray, on the S . limits of the territory, about lat. $1^{\circ} 30^{\prime} \mathrm{N}$. ; lon. $57^{\circ} \mathrm{W}$. From this point it flows N.E. to lat. $4^{\circ} \mathrm{N}$., when it proceeds due N., and falls into the Atlantic about lat. $7^{\circ}$ N., lon. $55^{\circ} 20^{\prime}$ W., after a course of about 430 m . Its principal tribu ary is the Cayuni, which rises in Venezuela, and joins the Essequibo about lat. $6^{\circ} 20^{\prime} \mathrm{N}$. The other tributaries of any note are the Mazaroni, Arasari, Siparona, and Quitaro from the left, and the Amu from the right. This river has been ascended about 400 m . from its mouth. It is impeded by numerous falls and rapids, which cease to occur only 50 m . from its mouth, to which the tides ascend. Five miles lower down it enters a plain, where it is 1 m . wide, and it grows continually wider until at its mouth it forms an cstuary 14 m . across. The entrance is very dangerous, and difficult even for small vessels, on account of the numerous banks of mud and sand. For a great part of its course the Essequibo flows through dense and magnificent forests, the
majestic trees of which are intertwined with convolvuli and parasitical plants of every variety, the flowers of which make the woods appear as if hung with garlands. The most remarkable fish met with in the Essequibo is the peri or omah, 2 ft . long; its teeth and jaws are so strong that it cracks the shells of most nuts to feed on their kernels, and is remarkable for its voracity. The electric eel is also an inlabitant of these waters, as is also the manati or river cow, which sometimes attains a weight of 22 cwt.

ESSEX, a maritime co. England, E. coast, bounded, N. by Suffolk, S. by the Thames, W. by Hertford and Middlesex, and E. by the German Ocean; 60 m . in length, S.W. to N.E.; greatest breadth, about $4 \overline{5} \mathrm{~m}$. Area, $981,120 \mathrm{ac}$., of which about 15,000 are reckoned waste lands. The surface, though generally level, is not wholly so, being in many parts diversified by gentle hills and dales, especially towards the N.W., where there is a continued inequality of surface. The most level tracts are those of the S. and E. hundreds, where there are extensive marshes, that give rise to fever ind ague; but the middle and N . districts are remarkably healthy. Agriculture is in a forward state here, the farmers of Essex being reckoned amongst the best in the kingdom. The soil is in general extremely fertile, and particularly well adapted for the growth of corn, as the superiority of the Essex wheat sufficiently proves. Beans and pease also thrive uncommonly well, perhaps better than in any other land in England. The other principal productions are potatoes, barley, oats, turnips, tares, rape, mustard, rye-grass, and trefoil. $\mathrm{Il}_{\mathrm{cp}}$ are also raised to a considerable extent, and their cultivation is on the increase. The raising of caraway, coriander, and teazel, is peculiar to this county. There is no particular breed of cattle here. Grazing is chiefly confined to the marsh lands, the prineipal stock fed on which is composed of Welsh and Scotch runts. Lincolns, Leicesters, Southdowns, and most other breeds of sheep are met with, but the Southdown is the most prevalent. A good many hogs are kept, chiefly of the Berkshire breed, especially in the S. parts; in the N. there is greater variety. The suckling of calves, for which Essex is celebrated, is carried on to a great extent. They are fattened for about three months, when they are slaughtered for the London markets. The principal dairy farms are in the parish of Epping and vicinity, and have been long famous. for the excellence of their cream and butter. The size of farms varies greatly, but averag's from 150 to 200 ac. Fish are plentiful on the coast, and in its various creeks. Near Colchester, and about the Mersey island, are some valuable oyster beds, the oysters from which are exported in considerable quantitics. Above 30 decked boats, from 8 to 50 tons burden, belonging to the island of Mersey, are engaged in this trade; but many more from different places may be seen on the fishing ground. It is calculated that 15,000 bushels are taken in a season, and that the capital employed in the trade is from $£ 60,000$ to $£ 80,000$. The manufactures of the county are not very extensive, with the exception, perhaps, of the silk mills at Colchester and several other towns. The woollen manufacture was at one time of some import ance, but is now extinct. Many of the industrious poor are employed in making straw plait for the London market. The principal rivers in the county are the Roding, Cronch, Chelmer, Blackwater, Colne, \&c. It has also the Thames, Lea, and Stour, as boundary rivers-the first on the S., the second on the W., and the third on the N; and it is traversed S.W. to N.E. by the Eastern Counties Railway. The chief towns are Chelmsford, the capital; Colehester, Maldon, and Harwich. Essex is divided into 14 liundreds, 5 half hundreds, and a royal liberty, and into 406 parishes. It returns 10 members to l'arliament, namely, four for the county, and two each for the boronghs of Colchester, Jarwich, and Maldon. Pop. (1841), 344,979 ; (1851), 369,318.

ESSINGTON (Port), an inlet, N. coast of Australia, Arnhem's Land, on the N. side of the Coburg Peninsula, which projects N.N.W. from the maiuland; lat. $11^{\circ} 6^{\prime} \mathrm{S} . ;$ lon. $132^{\circ} 12$ E. The approach to it is perfectly open and unobstructed by any danger whatever. At its entrance it is 7 m . wide and its gencral direction, which extends between 17 and 18 m., is S.S.E., having a depth of water throughout of 9,12 , and 5 fathoms; its average breadth is 5 m ., and at the S . end it forms three spacious harbours, each of them extending inwards 3 m ., with a width of about 2 m ., the depth of water
being 5 fathoms. These harbours are sheltered from every wind, and afford excellent and secure anchorage. The shores of Port Essington present a pleasing variety of little bays and sandy beaches, alternating with bold cliffs and steep clay banks, whilst, inland, continuous forests of monotonous darkgreen foliage spread over a great extent of country. The climate is extremely hot, often as high as $96^{\circ}$ in the morning and 100 at noon, while long periodical droughts almost extinguish vegetation during their continuance. In the rainy season, again, the rain falls in torrents, but seldom continues above two or three hours at a time. The soil in the vicinity is various, but mostly of an indifferent quality. There are a few palms and pandanus trees on the coast. The animals and birds most numerous are kangaroos, bandicoots, iguanas, pigeons, quails, curlews, wild geese, ducks, swamp pheasants, besides great varieties of parroquets, cockatoos, hawks, herons, cranes, and gulls. Fish and trepang are also abundant. A government settlement, called Victoria, was founded on the W. shores of Port Essington, in 1838; but, owing to the heat and unhealthiness of the climate, unproductiveness of the soil, and want of markets for such produce as miglt be raised, it gradually declined, and was altogether abandoned in 1849, when the last unfortunates stationed there were removed by Captain Keppel.

ESSLINGEN, a tn. Würtemberg, circle, Neckar, cap. bail. of same name, beautifully situate on the Neckar, 7 m . E.S.E. Stuttgart, on the railway to Ulm. It is surrounded by walls flanked with towers, and is divided into seven distinct portions, of which one is occupied by the castle, and three are properly suburbs. It is the seat of a law court for the circle, and of several public offices; contains two churches, one of which, the Liebfrauenkirche, is a handsome gothic structure, built in 1440, and surmounted by a tower, 230 ft . ligh ; two townhouses, one ancient, and adorned with paintings and stuccoes, and another of modern construction; an hospital, theatre, and the buildings of an old Dominican monastery; and has manufactures of articles in wood, gold, and silver, of cutlery, optical and philosophical instruments, tinware, \&c.; dyeworks, paper, spinning, and other mills; and a trade in the above articles, and in wine, wood, vegetables, and fish. Esslingen is of Roman origin, and was long a free imperial town. It came into the possession of Würtemberg in 1802. Pop. tn. 6833 . Area of bail. 37 geo. sq. m. P. 25,300 .

ESSONE, a river, France, which rises in arrond. Pithiviers, dep. Loiret, flows circuitously N.N.E. past Malesherbes, into dep. Seine-et-Oise, and joins l. bank, Seine, at Corbeil, after a course of about 50 m . It has been proposed to employ the river in feeding a canal between Orleans and Corbeil, uniting the Loire with the Seine.

ESSONNEs, a tn. France, dep. Seine et Oise, 19 m . S. by E. Paris, in a fertile valley, near the junction of the Essonne and Seine. It is neat and pretty, has several fine villas around it, and manufactures of wool-cards, lime, indianas, linen, gingerbread, paper, copper, \&c., with cotton and wool spinneries, numerous mills, and tanneries. Pop. 2776.
estaca (Punta de la), a promontory on the N. of Galicia, forming the most N. point of Spain ; lat. $43^{\circ} 48^{\prime} \mathrm{N}$.; lon. $7^{\circ} 42^{\prime} \mathrm{W}$. It presents a steep and lofty front to the sea.

ES'TAGEL, a tn. France, dep. Pyrénées-Orientales, 12 m . N.W. Perpignan, on the Agly. It is a handsome and proslerous place, finely situated amid vineyards and olive groves; and has oil-works, distilleries, extensive bee-culture, and some quarries of grey marble, with a trade in wine, wax, and honey, brandy, wool, and cattle. It is the birthplace of Arago, the astronomer and politician. Pop. 2225.

EsTAIRES, a tn. France, dep. du Nord, 10 m . S.E. Hazebrouck, l. bank, Lys, which is here navigable. It has a communal college, and considerable manufactures of linen, table-clotls, soap, starch, and nails; also flax-mills, bleacheries, and barge-builders' yards; and well-frequented markets and fairs. Pop. 3207.

ESTANCIA, a tu. Brazil, prov. Sergipe, about 20 m. S.S.W. São-Christovão, or Sergipe del Rey, I. bank, Piauli, which is a tributary of the Real, and is here crossed by a bridge. It contains two handsome churches, and lias a considerable trade, chiefly in cotton and tobacco, exchanged against articles of European manufacture. Pop. 3000.

ESTARREJA, a th. and par. Portugal, prov. Douro, r. bank, Antuã, 23 m. from Oporto. Pop. 2035.

ESTAVAYAR-Le-Lac, or Staffis, a tn . and par. Switzerland, can. of, and 15 m . W. by N. Fribourg, beautifully situated on the E. shore, Lake Neufchâtel. It is well built, contains a parish church, an old castle, and a nunnery; and has manufactures of linen, and a considerable transit trade. Pop. 1368.

ESTE [anc. Ateste], a tn. Austrian Italy, gov. Venice, prov. of, and 16 m . S.W. Padua, cap. dist. of same name, beautifully situated on the S. edge of the Enganean hills, and on the canal of Restara. It is an ancient place, with an unaltered Lombard aspect, most of the houses being supported by picturesque arches. Its principal buildings are a fine old castle, with a donjon tower, overhanging the town, and with its frowning embrasures and batulements presenting a very imposing appearance; and the duome or clurch of St. Martin, externally in the romanesque style, and surmounted by a campanile, which hangs over like the leaning tower of Pisa, but internally disfigured by having been completely modernized. The manufactures consist of silk goods, saltpetre, hats, and articles of earthenware and najolika, and there are numerous silk-mills and whetstone quarries in the vicinity. The family of Este, of which the castle here is the original family seat, is one of the oldest and most celebrated in Europe. Pop. 6600.

ESTEBAN-de-Nogales, a tn. Spain, prov. of, and 32 m . N.N.E. Leon, l. bank, Erid; meanly built ; irregular and unpaved streets. Pop. 720.—Esteban, with various affixes, is the name of several other places in Spain.

ESTELLA [anc. Alba], a city, Spain, prov. Navarre, 24 m. S.W. Pampeluna, l. bank, Ega, crossed here by two fine bridges. It has clean, well-paved streets; several squares, of which the Plaza-de-la-Constitucion, is the largest, and surrounded by the finest buildings. It has six churches, that of San Juan being magnificent, and having a very lofty tower; a townhouse, prison, hospital, college, several public schools, three convents, a bull ring, cemetery, and ancient castle. In the environs are a variety of agreeable promenades and pleasure grounds. Manufactures:-woollen and linen fabrics, brandy, earthenware, leather, wine, and oil. Trade:-fruits, wool, hardware, grain, cattle, \&c. Annual fair in November. Estella was long the head quarters of Don Carlos, who was proclaimed king here in November 1833. Pop. 5750.

ESTEPA [anc. Astapa], a tn. Spain, Andalusia, prov. of, and 50 m . E. by S. Seville, N. side of Mount San Francisco. It has three principal, and numerous smaller streets; the former wide and level ; the latter, in many cases, steep, but nearly all are paved. Of its four squares, only that one is noteworthy which contains the townhiouse, and is used as a market-place. Estepa has two churches, Santa Maria and San Sebastian ; the former, once a mosque, is a noble gothic edifice, having three naves, and a tastefully decorated interior; several convents, five chapels, a college, and various public schools, an hospital, orphan asylum, prison, storehouse, cemetery, and some remains of the walls and towers of an old feudal fortalice, once considered impregnable. Manufactures :- coarse cloth, baize, and oil. Trade:-grain, fruits, oil, brandy, wool, and cattle. Several quarries of marble and building stone are wrought in the above named mountain. Pop. 7339.

ESTEPONA, a tn. and port, Spain, Andalusia, prov. Malaga, 23 m . N.E. Gibraltar, on the Mediterranean; lat. $36^{\circ} 25^{\prime} \mathrm{N}$. ; lon. $5^{\circ} 9^{\prime} \mathrm{W}$. (r.) The streets are wide, clean, and well paved; the houses regularly built, and there are seven squares, all small, with the exception of the principal, which contains the municipal buildings, prison, and other spacious and well-constructed edifices. Its parish church is a large and handsome structure, with three naves, a lofty tower, and four bells. The other church belongs to the suppressed Franciscan convent, and also has three naves, and a bell tower. There are, likewise, three chapels, a college, and several public seliools; a custom-house, storehouse, hospital, cemetery, and an ancient castle, called St. Lewis. Manufac tures:-leather, woollen-stuffs, pottery, tiles, wine, and oil. Many of the inhabitants are also engaged in fishing, and salting fish; and in the vicinity mines of argentiferous lead are wrought. Trade:-cattle, grain, fruits, hardware, lead, and colonial produce, but of no great extent. Pop. 8475.

ESTERHAZ, a vil. Hungary, co. of, and 14 m. E.S.E. Oedenburg, on the S. extremity of Lake Neusiedel. It gives
its name to the Esterhazy family, whose original seat, though now deserted for that of Eisenstadt, is still deserving of notiee. It is a huge structure, in the most florid Italian style, and though already uninhabited for nearly 80 years, its marble halls are still brilliant with gold aad paintings. The chamber in which the Empress Maria Theresa once reposed, remains unchanged as when she occupied it; and the whole interior is so entire, that it might easily be rendered habitable. Haydn lived nearly 30 years with Prince Esterhazy, as his macstro di capello, and his portrait is almost the only picture of interest which the palace contains. The possessions of the prince are said to have a territorial extent nearly equal to that of the kinglom of W ürtemberg.

ES'l'ElisciolV, par. Irel. Roscommon; 6457 ac. P. 1114.
ESTlIONlA, Esthland, or Revel, a maritime gov. Russia, bounded, N. by the Gulf of Finland, E. Petersburg, S.E. Lake Peipus, S. Liefland, or Livoni:a, and W. the Baltic. Besides the mainland thus bounded, it includes several islands, of which the most important are Dagoe and Oesel; area. about 5280 geo. sq. m. It is of an irregularly oval shape, having its greater axis E. to $\mathbb{W}$., and has, for the most part, a flat or undulating surface. A few low heights occasionally appear, but scarcely deserve the name of hills. The whole of the N. side, however, rises considerably above the sea, and presents to it ranges of cliffs, on which the waves often break with considerable vinlence. The air is somewhat moist, but the sky, notwithstanding, is gencrally clear, and the climate lealthy. Winter lasts long, and wind, with more or less violence, is nlmost incessant throughout the year. The Narva, which merely bounds the government on the E., is the only river of any importance; but minor streams, as well as small lakes, are very numerous. The soil is by no means fertile. A great part of it, particularly in the N., is sandy; and in other quarters, it is often covered with boulders and gravel; but fertile tracts of clayey or chalky loam occur, and the grain raised is said to equal the consmoption. The crops inclute a little wheat, much barley and oats, and some flax, hops, and tohacco. The breeds of domestic animals are very inferior; but improvement las commenced by the importation of better stock, and promise to make rapid progress. Very little fruit is grown. Wood, however, chicfly pine, kirch, and alder, is abundant; and the forests are well supplicd with game. Fish abound, both in the lakes and on the coast, and active fisheries are carried on. The minerals are of no importance; and the manufactures, confined to coarse articles of primary necessity, are almost entirely domestic. The only exception is brandy, which is made in numerous distilleries, and partly exported. The only other exports of any importance are hides and salt fish. The chief imports are herrings and salt. The peasantry are almost all of Finnish origin, and speak a Finnish dialect, the vocabulary of which is described as scanty. The land is farmed chicfly by Germans and Danes. The prevailing religion is Lutheran; but education is miserably neglected, the proportion of persons at school being only 1 in 148 . For administrative purposes, Esthonia is under the governor-general of Riga, and consists of fonr districtsRevel, the capital; Hapsal, Weissenstein, and Wesenberg. Pop.1(1850), 317.000).

Es'trella.-1, (Serra Da), a low, chieffy calcareous mountain range, Portugal, prov. Beira, extending E. to the sierra de Gata, in Spain, and W. to the N. limits of Portuguese Estremadura, where it joins the serra Alvayazere; length, about 90 m .; mean breadth, 9 m .; culminatiner peak, 958 ft . It is a continuation of the Spanish sierra Gindarana, and separates the valleys of the Tagus and Douro.--2, A river, Central America, state, Costa Rica, which flows from the S.W. slope of the mountains in the centre of the state, and falls into the Pacific, near Quaypo, after a course of about $60 \mathrm{~m} .-3$, A til. New Granada, prov. Antioquia. 5793 ft . above sea level. Pop. 682.

ESTREMADURA [Latin, Estremadura; French, Estremadure], a former region or prov. in the W. of Spain, now divided into provs. Badajoz and Cacercs. It lies between lat. $37^{\circ} 5 t^{\prime}$ and $40^{\circ} 38^{\prime}$ N., and lon. $4^{\circ} 50^{\prime}$ and $7^{\circ} 24^{\prime}$ W., having Leon and Ohl Castile N., New Castile E., Andalusia E. and S., and Portugal W., from all of which it is separated by mountain-barriers; 190 m . in extreme length, N. to S. ; greatest breadth, about 150 m .; mean breadth, 90 m . Area, $21,497 \mathrm{sq} . \mathrm{m}$. The N. and S. parts are mountainous; and
another lofty range, a continuation of the mountains of Toledo in New Castile, intersects it in the centre from $\mathbf{E}$ to $\mathbf{W}$., and joins the sierra del Portalegre, on the frontiers of Portugal. The portion of the province N. of this range is called Estremadura Alta [Upper], that S. of it Estremadura Baja [Lower]. Estremadura consists chiefly of extensive plains, capable, from their fertility, of yielding corn, wine, and oil, in the greatest abundance, but which are left neglected and uncultivated, some of the finest lands being used as sheep-walks, while others are overrun with a useless vegetation; the result of a wretched government, of the insecurity of property, poverty, and a liability to an arbitrary and ruinous taxation, which takes away all interest in the cultivation or improve ment of the soil. The climate is hot in summer, but not ungenial ; nor is the winter severe. With trifling exceptions, occurring in the $S$., it belongs to the basins of the Tagus and Guadiana, which intersect it E. to W., the former passing through Alta, and the latter through, Baja Estremadura, and thus dividing it into three nearly equal parts. It is well watered by the numerons affluents of these two important streams. Copious dews supply the place of rain, of which but little falls during the warm season. There are some extensive forests of oak, beech, chestnut, and pine trees, in which numerous herds of swine feed, bacon being almost the only article in which anything like a brisk trade is carried on in the province. Game of every sort is plentiful; and excellent honey and wax are also gatherel, the bees feeding on the odoriferous plants with which some of the most fertile districts are unprofitably covered. Immense flocks of sheep graze on the rich plains of this neglected country. They are of the Merino breed, the greater part of them being driven down amually from the highlands of the neighbouring and more mountainous provinces, by their owners, without leave asked or obtained, to quarter for the winter season on the warm, fertile lowlands of Estremadura.

The minerals, of which there are copper, lead, iron, and silver, are cutirely neglected; and there are no manufactures. The roads are miserable, being chiefly made by sheep, and the inns are of the most wretched description. The people [Estremeños] are simple, honest, and kind-hearted; but being without any stimulus to industry, are indolent and apathetic, although capable of exercising both energy and perseverance in a remarkable degree, when induced thereto by a sufficient motive, of which the achievements of Cortes, the two Pizzaros, the Almagros, all natives of the province, and other adventurers, may be adduced as evidence. They are filthy in their habits, fiving in common with the swarms of swine they rear. The young pigs are the playmates of the children, and young and old ones have free access to all parts of the house, to which they impart their own strong and peculiar odour.

The population was formerly much greater than it is now, as is apparent from the number of ruined and deserted villages, and the many traces of former cultivation which are so frequently to be met with. Pop. 601,124.

ESTREMADURA [Latin, Extrema-Durii, Estremadura, Lusitanica; French, Estremadure], a maritime prov. Portugal, between lat. $38^{\circ} 5^{\prime}$ and $40^{\circ} 15^{\prime}$ N., and lon. $7^{\circ} 50^{\prime}$ and $9^{\circ} 30^{\prime} \mathrm{W} . ;$ about 162 m . in length N. to S., and about 75 m . in breadth at the broadest parts; bounded, N. and E. by Beira, E. and S. by Alemtejo, and W. by the Atlantic Ocean. It is divided into two nearly equal parts by the Tagus, of which the $N$. is the more mountainous, and includes the last slopes of the serra da Estrella, from which the serra Alvayazere proceeds S.W., culninating in Mount Junto, 2320 ft ; forming the heights of Torres Vedras, and ending on the N. bank, and near the mouth, of the Tagus. W. of this ridge the country is mostly flat and sandy, especially towards the coast; and S.E. of it, especially in the N. parts, it is more fertile. Wine (including those of Setubal, Bucellas, and Carcavellos) and olives are the principal produce; but wheat, harley, maize, hemp, legumes, and fruits of all kinds, including chestnuts, oranges, and lemons, are grown; and from the forests sumach and cork are obtained. Cattle-rearing is little attended to, but swine are numerous. Minerals abound, but only salt is wrought. There are some woollen and linen manufactures, and some crystal is made at Leiria. The climate is generally healthy. The principal city is Lisbon, the metropolis of Portugal, in which, and in setubal, the
most of the trade is concentrated. The province is divided into 136 concelhos. Pop. between 600,000 and 700,000 .

ESTREMERA, a tn. Spain, New Castile, prov. of, and 32 m. E.S.E. Madrid, near r. bank, Tagus. It has level and clean, though unpaved streets, two squares, a townhouse, with a portico supported by six stone arches; a parish chureh, three chapels, two schools, a prison, storehonse, and cemetery. Esparto, cordage, and coarse cloth and oil are mannfactured; and there is some trade in grain, eattle, rice, \&c. Pop. 2996.

EST'REMEZ, or Estremoz.-1, A fortified tn. Portngal, prov. Alemtejo, 22 m . W. Elvas, consisting of an upper and lower town, the former on an eminence, the latter on the level ground bclow, both indifferently built. It contains several churches and convents, and an hospital, and is now the seat of the Government authorities. Its fortifications, at one time formidable, are falling to decay. It has tanneries, some manufactories of pottery, a small trade in hardware, an annual fair of five days, and in the vicinity are marble quarries. Pop. 6577.-2, A tn. Brazil, prov. Rio-Grande-doNorte, on the lake of Guajirn, about 16 m . N. Natal, and 12 m . from the sea. It is the seat of an electoral college, and contains a parish church and a primary school. The district consists generally of low sandy grounds, and the whole population does not exceed 1700 .

ESZEK, or Esseck [anc. Mursia, or Mursa], a tn. Austria, Sçlavonia, cap. co. Verocz, r. bank, Drave, here crossed by a bridge, 63 m . W.N.W. Peterwardein. It stands in a marshy district, subject to frequent inundations, and very unhealthy; and consists of the town proper, partially fortified, and divided into the upper, inner, and lower town, and of three suburbs. It is the seat of an appeal court, with jurisdiction over three counties, and of several public offiees; contains a handsome square, with a pillar in its centre; a Greek non-united and three R. Catholic churehes, a townhouse, county buildings, gymnasium, and normal school; two convents, a burgher hospital, and cavalry barracks. The manufactures are trifling; but there are some silk mills, and four large annual fairs, chiefly for corn, cattle, and raw hides. A lofty embankment, nearly 3 m . long, lines both banks of the Drave. Eszek was originally a Roman colony, founded by the Emperor Adrian, under the name of Mursia, and became the capital of Lower Pannonia. In 335̆, Constantine made it a bishop's see, which was suppressed about two centuries after. In the 11th century, sliortly after the incorporation of Sclavonia with Hungary, it sunk into a mere village, but gradually rose into importance, especially in the 17 th century, when it was fortified by Leopold I. P. 12,000.

ETABLEs, a maritime tn. France, dep. Côtes dn-Nord, 8 m . N.N.W. Brienc. It has a fine church, with a neat spire : and some fisheries. Pop. 1018.

ETAIN [Latin, Fines Verodunorum], a tn. France, dep. Meuse, 38 m . N.E. Bar-le-dnc, l. bank, Ornes. It has a fine townhouse, a parish church, of the 15 th century, and is generally well built and neat. It has a commmal college ; manufactories of cottons and thread, oil-works, tanneries, and limekilns; and a trade in timber, clover, and lucerne seeds, bacon, sausages, and hams. Etain is an old town, and was once capital of the great plateau of the Woëvre, and strongly fortified. Pop. 2981.

ETAMPES [ane. Stampa], a tn. France, dep. Seine-etOise, 30 m . S. by W. Paris, situated on the confluence of the Etampes and Juine, a station on the Paris and Orleans Railway, in a fertile and beantiful valley. Here is a communal college. It is well built and clean, with rows of trees skirting its outer promenades. Among the chief public buildings are the church of Nôtre Dame, a remarkable pile of the 13th century, with three other antique gothic churches; the Hotel de Ville, of quaint architecture; an immense store granary, re-
cently built; and some remains of a strong castle built by cently built; and some remains of a strong castle built by King Robert, and dismantled by IIenry IV. There are num. erous flour mills, some tanneries, skinneries, and woollen bleacheries; with extensive quarries of paving stones for the Paris streets. It is a great grain market, and has a considerable trade in flour, sent chiefly to the capital, and prepared wool for the manufacturers of Sedan, Lonviers, and Elbeuf. Pop. 7672.

ETAPLES [anc. Stapuloc], a maritime tn. France, dep. Pas-de-Calais, on the Canche, near its embouchure in the Strait of Dover, 52 m . W.N.W. Arras, a station on the rail-
way from Paris to Boulogne. It is a desolate-looking place, with some ruins of a castle, built in 1160 , and has some coasting trade; but the inhabitants subsist chiefly by fishing. Some archæologists think Etaples was the Portius Itius, where Cæsar embarked to invade Britain. Pop. 2030.

ETAWEH, or Etawah, a tn. and dist. N.W. Ilindoostan. The rown, prov. of, and 70 m . S.E. Agra, l. bank, Jumna; lat. $26^{\circ} 47^{\prime} \mathrm{N}$. ; lon. $78^{\circ} 53^{\prime}$ E., is built on heights, and, as it approaches the river, is divided by deep ravines. Etaweh was once a flourishing place, the abode of grandees of the Mogul empire, but is now a mass of ruin and decay. It still possesses a splendid ghaut, but is, on the whole, one of the most dreary and desolate places of residence in India. A few bungalows, scattered over a wide sandy plain, nearly destitute of trecs, intermixed with other buildings of an inferior kind, announce the presence of civil and military resid-ents.-The District, one of the five into which province Agra is divided (area, 1265 geo. sq. in.), lies chiefly between lat. $26^{\circ}$ and $27^{\circ} \mathrm{N}$., and comprehends a large portion of the doab between the Jumna and the Ganges. It is intersected, N.W. to S.E., by the Rinde. It is very bare of wood, has a variable, and frequently intensely hot climate. Tobaceo, cotton, indigo, sugar-cane, millet, maize, \&c., are grown, and some coarse cloths are manufactured. The district is thinly peopled, there being only 3625 to the geo. sq. m. Total pop. 458,610.

ETCHEMIN, or Echemin, a river, Lower Canada, S. side of the St. Lawrence, flowing from a lake of the same name; lat. $46^{\circ} 21^{\prime} \mathrm{N}$. ; lon. $70^{\circ} 37^{\prime} \mathrm{W}$. It pursues a N.W. course, and falls into the St. Lawrence between 3 and 4 m . above Quebec. Entire length, about 50 m . The margin of the strean generally consists of flat rock, with only a shallow covering of soil upon it; but at some distance from its banks the land is good, and in high cultivation.

ETCHINGHAM, par. Eng. Sussex; 4240 ac. P. 820.
E'TED, or Eteta, a vil. Austria, Transylvania, Udvar-hely-Szekler-Stuhl, on the Küsmöd, 25 m . E.S.E. MarosVasarhely. It contains a Protestant church, and has an annnal fair. Pop. 1283.

ETHELBURGA (St.), par. Eng. Middlesex. Pop. 669.
ETHELDRED (St.), par. Eng. Norfolk. Pop. 308.
ETHIOPIA [Greek, Adfosts], the name given by ancient geographers to the countries S. of Egypt. It was vaguely applied to the whole S. part of Africa, from the Red Sea to the Atlantic; but, in a more restricted sense, it was confined to a definite region, including the countries now known by the names of Nubia and Sennaar, and probably a part of Abyssinia. The government of this country was established at a very early period. It was monarchical; but the monarch was subordinate to a priesthood, possessing greater power than even that of Egypt, which is believed by many to have been indebted to Ethiopia for her religion. Meröe was the ancient capital of the kingdom.

ETIENNE (Sr.), a tu. France, dcp. Loire, advantageously situated on both sides of the Furens, and in the centre of one of the most valuable coal fields of France, 32 m . S. W. Lyons. It has sprung up in recent times with almost unexampled rapidity, in consequence of the manufactures which are carried on in it; and though not regularly bnilt, contains several spacious streets, formed of lofty and substantial honses of free stone, originally white, but rendered dingy and black by the clouds of smoke which numerous public works are continually pouring forth. The finest street, lying in the line of the great public road from Paris to Marseilles, crosses the town almost centrally, is lined with rows of trees, and divided into two parts by the Hotel de Ville, a large but not handsome edifice, which includes, in addition to the townhouse, a courthouse, exchange, small library, and museum. The only other building deserving of notice is the cathedral, which furnishes an ancient specimen of romanesque. St. Etienne also possesses a court of first resort and commerce, a consulting chamber of manufacturcs, a conseil de prud'hommes, a communal college, and mining school. The staple manufactures to which it owes all its prosperity, are hardware, including fire arms, and all kinds of cutlery, which have carned for it the name of the French Birmingham; and ribbons and other flowered silks, equally admired for the excellence of their texture and the beauty of their design. The former of these two staples employs about 7000 workmen, and, in addition to other articles,

## ETNA

produces annually, in time of peace, 40,000 stand of arms, but in a push might be able to produce nearly 300,000 . The latter staple is the more important, and employs within the town, and in the adjoining districts, about 40,000 persons. The number of looms is estimated at 20,000 . To the abundance of coal, to which the prosperity of its manufactures is mainly owing, St. Etienne also owes the rather rare privilege, in France, of being well lighted with gas. The coal, inoreover, besides meetirg the consumption within the town, forms a very important branch of trade, both furnishing the supplies of several blast furnaces and other extensive iron works, and a general export of about 500,000 tons. 'Two railways branch off from the town, the one connecting it with Roanme, and the other with Lyons. Pop. 47,302.

ETIENNE (St.), the name of several small places, France, particularly:-1, (de-Baigorry), A vil. and com. dep. BassesPyréncée, on the Nive, 27 m . S.S.E. Bayonne. It contains a barish church, and has in its vicinity mines of spathose iron, and a copper mine, which, from coirs found in it, appears to have been worked liy the Romans. Pop. 3266.-2, (-dle-Dlont$L u c$ ), a vil. and com. dep. Loire-Inferieure, at the foot of a slope, surrounded by verdant meadows, 9 m . S.E. Savenay. It contains the renains of an old castle, and has two annual fairs. Fine porcelain earth is found in the vicinity. P. 4540.

ETIVE (Locit), an inlet of the sea, W. coast, Scotland, co. Argyle, dist. Lorn, nearly 20 m . long, of very unequal brealth, but broadest part about $1 \frac{1}{2} \mathrm{~m}$. It has a narrow entrance, and contains numerons creeks, which afford safe anchorage in all weathers. About 3 m . from the sea, where it is narrow, a ridge of sunken roeks erossing it causes a turbulent rapid, which at lialf tide forms a loud sounding eataract, believed to be the Lora of Ossian. The scencry of its shores is very beantifnl.

E'TNA [Latin, Aena; Sieilian, Mongibello; a corruption of the Gibbel Uttamat or mountain of fire of the Saracens], a celebrated volcano, in the N.E. of Sicily, near the coast, and within a short distance of Catania. The loftiest summit is in lat. $37^{\circ} 43^{\prime} 31^{\prime \prime} \mathrm{N}$; lon. $15^{\circ} \mathrm{E}$., and is $10,874 \mathrm{ft}$. above sea level. The base covers an area of nearly 90 m . in circnmferenec, and is pretty accurately defined by the rivers Alcantara and Giaretta, by which it is nearly encircled, the sea marking its limits on the E. The dimensions of the crater have been variously stated, the circumference from $2 \frac{1}{2} \mathrm{~m}$. to 4 m ., and the depth from 600 to 800 ft ; but the height of the cone, the diameter of the crater, and its depth, are liable to constant change from eruptions. Although when viewed from a distance, Etna presents a very symmetrical cone, it is found, on a nearer approach, and when examined more in detail, to present an exceedingly diversified surface, and to be studded on its flanks by numerous minor cones or secondary volcanos of considerable dimensions. These are altogether ahout eighty in number, and the largest about 700 ft . in height. When viewed from above, they present one of the most striking scencs imaginable, being arranged in beautiful picturesque groups, and richly clothed with wood; those in the higher parts with lofty pines, and those at lower elevations with chestnutz, oaks, beech, and holm. The great terminating cone, at the summit of which is the principal crater or opeuing, and which is continually throwing ont sulphurous vapours, rises from an irregular plain 9 m . in circumference, and about 1100 ft . below the culminating point of the mountain. The interior of this erater, as described by Captain Smyth, is incrusted with various coloured efflorescences of ammonia, sulphur, and martial vitriolic salts, to the depth of about 100 yards. The efllorescences of a beautiful orange yellow are the most predominant. The bottom of the crater is plain, and tolerably hard, though, from being composed of loose cinders, the fect sink in some places. Near the eentre are two mounds of scoriæ and ashes, each with a large aperture at the summit, and several fissures around, from whence, at intervals, issue volumes of thick smoke, with a rumbling noise and hissing sound. There is also a light thin vapour, occasionally oozing from the bottom and sides of the huge amphitheatre, in every direction. 'I endeavoured,' adds Capt. Smyth, 'to look into the principal chasm, but the rapid ejection of the cinders, ant the strong sulphnrous vapours that exuded, prevented me from attaining my object; and, indeed, I conld not bnt feel appreliensive that a nearer approach, where the footing was so frail. might prove too
hazardous, besides which, the heat and smoke had inereased to such a degree that it was high time to regain the summit.'

The cone is divided by nature into three distinct zones or regions, called respectively the fertile, the woody, and the desert. The first of these comprises the delightful country around the skirts of the monntain, the superficies of which

## the crater of etna.--From Light's Sicilian scenery

is estimated at nearly 700 m. ; it is well cultivated, thickly inhabited, and covered with olives, vines, corn, fruit trees, and aromatic herbs. Higher up, the woody region encircles the mountain, an extensive forest composed of various species of trees, but chiefly chestnut, oak, and pine. The climate is here extremely mild and agreeable, the air cool and reviving, and every brecze surcharged with delicious odours. The area of this region, which forms a girdle of vivid green round the monntain, is estimated at $140 \mathrm{so} . \mathrm{m}$. Above is the desert or barren zone, a waste of black lava and scoriæ, where all vegetation disappears, and where cold wintry blasts sweep over a dreary expanse of snow and ice. Here sulphurcus vapours are continually evolved, sometines so abundantly as to endanger life, and here is the sonree of dangerons torrents of melted snow, nearly as destructive as those of burning lava. This friyid zone is from 8 to 10 m . in extent, and is in part oceupied by the irregular plain already alluded to, from which the terminating cone rises to a further height of 1100 ft . Some anthorities divite the cone into seven different zones, by subdividing those above enumerated in strict accordance with their botanical characteristics, and closing with the sterile region in which it terminates.

The E. side of Etna is broken by a deep valley or amphi theatre, called the Val del Bove, 4 or 5 m . in diameter, and surrounded ly nearly vertical precipices, varying from 1000 to above 3000 ft . in lieight. The scenery here is of the most magnificent description, but stern and desolate; the face of the precipices is broken in the most picturesque manner, by the vertical walls of the lava which traverse them. These masses usually stand out in relief, are exccedingly diversified in form, and are of immense altitude. When Lyell visited this valley in 1828, nine years after the ernption of 1819 , he saw hundreds of the white skeletons of trees, which had been stripped of their bark and leaves by the scorching heat of a flood of lava.

The symptoms which precede an cruption are generally irregular clouds of smoke, ferilli or volcanic lightnings, hol low intonations, and local earthquakes. These agitations increase mutil the vast cauldron becomes surcharged with the fused mincrals, when, if the convulsion is not sufficiently powerful to raise it to the grand crater, which, from its great altitude, requires a prodigious force, it is pressed through
the sides of the mountain where it is weakest. From these months or openings, the lava bursts forth in a state of fusion, and glides at first with an awful velocity ; but progressively deereases its rate as it cools. As it increases in density, the sides begin to cake, and the surface becomes loaded with scorix, which, falling over repeatedly in sealy waves, with a erackling noise, retard the progress of the lava until its motion is so slackened as to be scarcely perceptible. The lavas of Etna consist of felspar, augite, olivine, and tetaniferous iron, and the alternating breceias of scoriz, sand, and angular bloeks of lava. There are not more than 60 eruptions of Etna recorded in history, from the earliest to the present times. Among the more remarkable ones of later periods are those of $1792,1811,1819$, and 1832 . The eruption of 1792 continued for a whole year; the streams of lava which flowed from the mountain on that occasion were often 30 ft . high, while in their fluid state, and in their progress, overwhelmed numerous vineyards. In 1811, loud detonations from the great erater, gave intimation that a column of lava had ascended to near the summit of the mountain. This was followed by a violent shock, when a stream of lava broke ont from the side of the cone, at no great distance from its apex; other openings suceeeded lower and lower down, but in the same line, giving rise to the belief that the pressure and intense heat of the internal column of lava had rent the mountain from top to bottom. The stream of lava which flowed from the mountain during the eruption of 1819 , moved at the rate of 2 m . in the first 24 hours, and nearly as far in the succeeding day and night. Coming to a high and almost perpendicular precipice, it poured over it in a eascade; and, being hardened in its descent, made an ineonceivable erash as it was dashed against the bottom. But the phenomena attending the eruption of 1832 were still more remarkable. On that occasion, numerous fiery mouths opened in the sides of the mountain, from which, in the midst of violent explosions and other convulsions, accompanied by tremendous discharges of ashes and cinders, vast streams of lava issued; and, pouring down the declivities, overran cultivated fields, and threatened with destruction the town of Bronte, from which a great part of the inhabitants had fled; but which it did not eventually reach. The stream of lava which inspired this terror was 18 m . in length, 1 m . broad, and 30 ft . high. The suddenness with whieh the progress of the lava floods are arrested by eooling, give rise sometimes to very singular appearances. In 1669, one of these burning streams of molten matter overtopped the ramparts of Catania, 60 ft . in height, and fell in a fiery cascade into the city, a part of which it destroyed; it however ultimately cooled, and the solid lava may etill be seen curling over the top of the rampart like a cascade in the act of falling.

An opinion is eutertained that Etna is rapidly exhausting its volcanic powers, and that it is far less active now, and its eruptions much less formidable than they were in ancient times. This is inferred from the greater magnitude of the ancient beds of lava, and masses of basalt, and from the smaller quantity and number of vitrified substances ejected; there being now none, many of the present products being scarcely altered by the heat.-(Smyth's Sicily ; Lyell's Geology; Sommerville's Physical Geography; Humboldt's Cosmos; Hooker's Journal ; Voyages Nouveaux, \&c.)

ETOILE (Ile L'), one of the Amirantes, Indian Ocean, lat. $5^{\circ} 55^{\prime}$ S. ; lon. $53^{\circ} 4^{\prime}$ E. (n.) ; about $1 \frac{1}{2} \mathrm{~m}$. long; low, and covered with bushes.

ETOILE, several places, France, particularly, an anc. tn., dep. Drôme, 7 m . S. Valence, begirt with partly ruinous walls. There was a strong fendal stronghold here, in which resided Louis XI. while in Dauphiny, as also Diana of Poitiers, one of whose titles was 'Dame d' Etoile.' A silk factory now oceupies the site of the chateau. In the district much red wine is produced. Pop. 1058.

ETOLIA, a division, Greece. See Ætolia.
ETON, a th. and par. England, co. Buckingham, in a pleasant valley, l. bank, Thames, within $\frac{3}{4} \mathrm{~m}$. of the Windsor station on the Great Western Railway, and 22 m . W. London. It eonsists principally of one narrow street, well paved, and lighted; and has of late years been much improved. It contains a chapel of ease, five daily schools, and some almshonses. A neat iron bridge across the Thames connects Eton with Windsor, from which it is about 1 m . distant. Eton derives its
celebrity wholly from its college, founded by Henry VI. in 1440, under the name of the College of the Blessed Virgin Mary, beside Windsor. The present collegiate edifice, a conspicuous and ornamental Tudor building, was erected at various periods; it contains, in two quadrangles, the chapel, the two schools, upper and lower; the masters' chambers, the provost's lodge, the private residences of the fellows, and the library. The scholars must be lawful children, born in England, and should be edueated gratis, but $£ 6$ or $£ 7$ a-year is charged for their instruction. They consist of collegers or scholars on the foundation, admissable from the age of 8 to 16 , who are lodged and boarded in the institution; and oppidans or scholars, not on the foundation, who do not board in the institution, and are, in every respect, stipendary pupils; of these last, the usual number in attendance is about 600. There are various foundation seholarships at Cambridge and Oxford, and also some exhibitions. At present the income is about $£ 7000$ a-year. The course of instruction is essentially classical, but of late years the study of French, German, Italian, mathematics, and other branches of education, have been introduced. Area of par. 690 ac. Pop. 3526.

ETRETAT, a maritime vil. Franee, dep. Scine-Inférieure, 17 m. N. N. E. Havre. It is situated in a roek-bounded valley. It has a parish chureh, a remarkable Gothic edifice; and near the shore are the remains of the ancient chapel of St. Vallery. Inhabitants chiefly employed in fishing, oysterdredging, and making kelp. Pop. 1518.

ETRURIA, a vil. England, co. Stafford, $1 \frac{1}{2}$ m. N.E. Neweastle-under-Lyne; the residence, and the seat of the poreelain manufactures, still carried on, of J. Wedgewood, father of the ceramic art in Great Britain, who died here in 1795. It has a church, a small Episcopal chapel, and places of worship for Wesleyans, and New Connection Methodists.

## ETRURIA, Italy. See Tuscany.

E'TSCH, a river, N. Italy. See Abigr:
ETSED, or Ecsed, several places, Hungary, particu-larly:-1, A vil. co. Ileves, abont 5 m . from Gyöngyös. It contains a $R$ Catholic chureh, and stands in a fertile district, in which much wine is grown. Pop. 1861.-2, A vil. Thither Theiss, eo. of, and 24 m. W.N.W. Szathmar, near an extensive morass of its name, l. bank, Kraszna. It contains a Protestant church, and an old castle, in which the Hungarian crown was long deposited. Pop. 1275.

ETSKA, a vil. Iungary, co. Torontal, on the Bega Canal, about 5 m . from Nagy-Beeskerek. It contains a R. Catholic, and a Greek non-united parish chureh. The district is very fertile, and the inhabitants are chiefly employed in agriculture. Pop. 3243.

ET'TAGH, par. Irel. King's co. ; 7102 ac. Pop. 1934.
ETTE, or Ete'titz, a vil. Hungary, Hither Danube, co. of, and about 12 m . from Komorn, on the road from Papa to Dotis. It eontains a Protestant church, and a mill. Pop. 1080.

ETTELBRUCK, a vil. Holland, duchy, Luxemburg, dist. of, and $3 \mathrm{~m} . \mathrm{S}$.W. Diekirch, on the Alzette. It contains an elegant parish church, a school, poorhouse; and has good tanneries, gypsum-mills, a trade in cattle, and several important annual fairs. Pop. 2218.

ETTEN, a vil. Holland, prov. N. Brabant, 7 m . S. Breda, with a Reformed and a R. Catholic church, two sehools, and elegant townhouse, an hospital for old women, and two annual horse markets. The inhabitants, chiefly agricultural, number 950 , or with adjoining and dependent hamlets, 2738.

ETTENHEIM, a tn. Baden, cirele, Upper Rhine, on the Ettenbach, 16 m. S.S.W. Offenburg. It is an old place, and contains a parish church, chapel, and hospital. The Duke d'Enghien was seized here by orders of Napoleon, sent off to Vincennes, and there, six days after, inhumanly murdered. Pop. 2730.

ETTISWEIL, a vil. and par. Switzerland, can. of, and 16 m . W.N.W. Luzern, in one of the most beautiful and best cultivated districts of the canton, on the Roth. It contains a handsome parish ehurch, and a castle, surronnded by a small lake; and has an annual fair. Pop. 876.

ETTLINGEN, a tn. Baden, circle, Middle lihine, cap. bail. of same name, on the Alb, 5 m . S.E. Carlsruhe, on the railway to Baden. It is entered by three gates, contains two public squares, a castle, with gardens; a church, townhouse, hospital, normal and superior burgher schools; and has manufactures of linen and cotton goods, starch, leather, and paper;
a corn, two cotton, two gypsum, two oil, and nuinerous other mills. Ettlingen is of Roman origin, and contains some Roman remains. Pop. 4250. Area of bail. 60 geo. sq. m. Pop. 16.584.

ETTON, two pars. Eng.:-1, Northampton; 1270 ac. Pop. 118.-2, York (E. Riding) ; 3960 ac. Pop. 425.

E'TTRICK, several places, Scotland:-1, A river rising in the S.W. portion of co. Selkirk, which it traverses in a N.E. direction till it falls into the Tweed, between Selkirk and Mclrose, after a course of about 26 ml . The Yarrow is its principal affluent.-2, (-Forest), a beautiful pastoral dist., watered by the above river and its tributaries; so called, on account of having once formed a part of the great Caledonian Forest, although it is now almost entirely divested of trees. -3 , A par. near the head waters of the Ettrick, $15 \mathrm{~m} . \mathrm{S} . W$. Selkirk, was the ancient seat of the Buccleuch fanily, and was the birthplace, and, for the greater portion of his life, the residence of James Hogg, the Ettrick Shepherd. Area, 43,963 ac. Pop. 525.-4, (-Pen), a mountain, 2200 ft . high, near the source of the Ettrick.

E'TTYEK, a vil. Hungary, Thither Danube, co. Stuhlweissenburg, near the source of the Bia , about 12 m . from Martonvasar. It contains a Protestant and a K . Catholic ehureh; and las a stone quarry. Pop. 1787.

ETWALI, par. Eng. Derby; 3680 ac. Pop. 689.
EU [Latin, Auga, or Augium], an anc. but decayed tn. France, dep. Seine-Inférieure, 17 m . N.E. Dieppe, 1. bank, Bresle, 2 m . from its embouchure at Treport, on the British Chamel, and in a fine wooded valley, environed by easy heights. It is the seat of a commercial tribunal and a communal college. The town has few remarkable edifices, except its noble cathedral, the college church (both gothic), and an old embattled gate, said to be Roman. Outside are the spacious chateau and park of En, from 1822 till the revolution the favourite summer residenee of Louis Plilippe, and in which he received Queen Victoria in 1843 . The palaee is built on the site of a stronghold of Rollo, Duke of Normandy; but the oldest existing buildings were founded by the Duke of Guise (le Balafre), in 1581 . The whole pile is lofty, and the exterior imposing; the interior is richly furnished, and contains a fine gallery of historical portraits. The town has a little manufaeture of canvas, lace, wax, soap, \&e.; in or near it are brick and tile fields, lime-kilns, flax-mills, saw-mills, bleacheries, \&c. It has some trade in grain, hemp, flax, coarse linen, and timber. In 1445, Ea was burned, all but the churehes and one or two public edifices, by order of Louis XI., lest the English might take and occupy it! This ruthless act drove out the whole inhalitants, the clite of whom never returned; and the place seeme'l to have fallen into hopeless decay, when the patronage of the Orleans family gave it a temporary importance, up to the time of their fall. Pop. 3749.

EU IIO, or Yun liang, a large river, China, which rises in the S.E. part of prov. Shansee, trom which it flows N.E., traversing the S. portion of prov. Petchelee, and the N.W. margin of Shantung, when it again enters the prov, just named, at lat. $37^{\circ} 40^{\prime} \mathrm{N}$.; it subsequently falls into the Gulf of Petehelee, in lat. $38^{\circ} 59^{\prime}$ N.; lon. $117^{\circ} 22^{\prime}$ E.; whole course about 140 m . It has numerous large afluents, of which the principal is the Tehang-Ho, the Hou-to-Ho, the Iloen-IIo, and the Pei-Ho, all from the left.

EUBA, a vil. Saxony, circle, Zwickau, near Thum; containing a handsome chureh, and has manufactures of linen and losiery, a stone quarry, three saw, and several other mills. Pop. 1539.

EUBGEA, Negropont, or Egripos [Greek, Eubias: Latin, Euboia; Italian, Negroponte], a long and narrow isl. Greeee, the largest in the Archipelago, lying close to the N.E. coast of Attica, from which it is separated by a channel, so narrow at one point as to be crossed by a bridge. The N. part of this strait is called the Channel of Talanti, the S. the Channel of Egripo, or Negropont. The island lies N.W. and S.E. is 100 ml . long; 26 broad in the centre, about 16 at either end, and as narrow as 6 at some intermediate points between both extremes and the centre; area, $1454 \mathrm{sq} . \mathrm{m}$. It is traversed in its whole length by a range of lofty mountains, whose culminating peaks are Delphi, near the centre of the island, 6259 ft. ; Kandili, $4337 \mathrm{ft} . ;$ Lithuda, at the N. extremity, 3099 ft ; and Ocha, or St. Elias, the S. extremity, 3198 ft . They are mostly barren, and the summits covered with snow
during a great part of the year. The scenery is generally of the most magnificent deseription, presenting in some parts a resemblance to the most beautiful parks and forests inaginable; in others, wild and eraggy heights covered with luxuriant woods, consisting principally of pines, oaks, and holly, under which are found, in more than usual beauty, all those flowering shrubs which the soil of Greece so plentifully produces; anong which the cystus, arbutus, oleander, and heath are conspicuous. The valleys and plains are singularly fertile, producing grain, wine, oil, and fruits in great abundance, and depasture fine cattle. Amongst the exports are cotton, wool. pitch, and turpentine, but the quantities are small. There are mines of marble and copper in the island. The $\mathbf{E}$. eoast is rocky, irregular. precipitons, and destitute of harbours, but on the W. side there are several. and some of them very good. The roads throughout the island are in general bad, and the population scanty and poor. Several Englishmen, and other foreigners, have recently purehased cstates here, and are gradually improving the agriculture, and the condition of the people. There are two towns-Negropont or Chalcis, the capital; and Karysto. The island forms the nome or prov. of Eubœa, and the dioceses of Eubœa and Karysto. In 1210 it was occupied by the Venetians, when it had 800 villages, and 60,000 inhabitants; it was taken from them, in 1469 , by Mahomet II., and remained in the hands of the Turks till the Greck insurrection in 1821. Pop. 40,268.

EUERDORF, a market tn. Bavaria, Lower Franconia, cap. dist. of same name, on the Saale, here crossed by a bridge, 29 m. N.N.E. Würzburg. It contains a parish ehurch and a courthouse, and has manufactures of organs, a trade in corn, wine, and cattle, numerous mills, and five annual fairs. Pop. 998. Area of dist. 53 geo. sq. m. Pop. 11,050.

EUFEMIA (St.), several small places, Naples, particularly a vil. and eom. prov. Calabria Cltra I., on a small streain 17 m . N.W. Reggio. Pop. 5499.

EULE, two places, Bohemia.-1, (Eule, Elau, or Eulaw) [Latin, Gilovium], A tn., circle, Kaurzim, r. bank. Sazawa, near its junction with the Moldau. It contains a parish church, chapel, bathing establishment, and townhouse, with a belfry. In early times the gold-washings here were very productive, and small portions of gold are still obtained. Pop. 1462.2, (Eule, or Eulan), a market tn. circle. Leitmeritz, about 12 m . from Aussig. It lies at the foot of the Schneeberg, on a small stream of same name, and eontains a parish church and old castle. Pop. 947.

EULENBERG, a market tn . Moravia, circle of, and 18 m . N. Olmiitz, in a mountainous district ; with a church, hunting lodge, and old feudal castle. It has several mills, and threo annual fairs. Pop. 331.

EUPATARIA, Eupatoria, Jeupatoria, formerly Koslov, or Keslov, (anc. Pompeiopolis), a maritime th. liussia, on the Black Sea, gov. Taurida, cap. dist. of same name, 45 m. N. W. Simferopol ; lat. $45^{\circ} 9^{\prime}$ N.; lon. $33^{\circ} 9^{\prime}$ E. This town has an Asiatic rather than a European aspeet, from its having long been possessed by the Tartars of the Crimea. It contains 13 mosques, the chief being that of Devlet-GhiriKhan, built in 1552 ; a showy and rather remarkable edifice, a Tartar college, custom-honse, government offices, \&c. ; and an Artesian well, 460 ft . deep, which supplies 120,000 gallons of water daily. The harbour has deep water, and the roadstcad good anchorage; but is inconveniently exposed to all winds, except those from the N. and N. W. The chief trado is in salt, grain, and skins. In the environs, mnch salt is drawn from saline lakes; and at Sak, in the neighbourhood, is a mud-bath, used for rheumatic ailments, \&c. The inhabitants, a wealthy commercial people, are chiefly Caraïte Jews and Tartars. Pop. 12,000.

EUPEN [French, Neaux], a tn. Prussia, gov. of, and 7 m. S.S.W. Aix-la-Chapelle, cap. cirele, of same name, on the Wenze, in a rich pastoral vale, near the frontiers of Holland. It is the seat of a eourt of law, and several public offiees for the eirele, contains four churches and chapels, customhouse, superior burgher sehool, and orphan hospital ; and has manufactures of woollen cloth, cassimeres, hats, soap, leather, carriages, chicory, and chemical products, paper, flan, and worsted mills, an impertant trade in linen and eattle, anl seven annual fairs. Pop. 12,196.-The circle, area 51 geo. sq. m. is mountainous, being traversed by the Eitel hills, contains several extensive swamps, and is ill adapted for agri
culture, but is well wooded, and rears a large number of cattle. Pop. 21,629.
euphinates, or el frat, a celebrated river of w. Asia, in Asiatic Turkey, having its sources in central Armenia, at no great distance from the shores of the Euxine, and its embouchure in the Persian Gulf; area of basin, 195,680 geo. sq. m. ; direct length, 600 geo. m. ; length, including windings, 1492 geo. m . It is formed by the junction of two large streams, called, respectively, the Kara-Su [black river], and the Mourad-Chai. The sources of the former are situated in the Anti-Taurus, 25 m . N.E. Erzeroom, not more than 90 m . from the S. E. shores of the Black Sea, about lat. $40^{\circ} \mathrm{N}$.; lon. $41^{\circ} 30^{\prime} \mathrm{E}$. ; those of the latter or Mourad, the most southerly and largest branch, are in the same range, but 70 or 80 m . further E., or about lon. $42^{\circ} 55^{\prime} \mathrm{E}$. These two head streams unite near Kaban Maden, about lat. $38^{\circ} 58^{\prime} \mathrm{N}$. ; lon. $38^{\circ} 30^{\prime}$ E.; from which point the river, now strictly the Euphrates, flows S.W. for 50 m ., when it suddenly bends to the E., and, forming a semicircle, returns to a point more W. than that from which it had diverged. Here it approaches within about 90 m . of the Gulf of Iskenderoon in the Mediterranean, and continues to flow at nearly the same distance parallel to the shores of that sea, to lat. $35^{\circ} 50^{\prime}$, or for about 110 m ., when it turns to the S.E., and continues in that direction generally, till it falls into the Persian Gulf, having been previously joined by the Tigris, after which it takes the name of the Shatt-el-Arab. The breadth of the Euphrates varies between 200 and 400 yards, but is occasionally much broader. A little below Kaban Maden, where its two head streams unite, it is 120 yards wide, while below the junction of the Tigris it is nearly half a mile. The general depth of the Upper Euphrates exceeds 8 ft . In point of current, it is for the most part a sluggish stream; for except on the height of the flooded season, when it approaches 5 m . an hour, it varies from $2 \frac{1}{4}$ to $3 \frac{1}{2}$, with a much larger portion of its course under 3 than above. The upper portion of the river is enclosed between two parallel ranges of hills, covered for the most part with high brushwood, and timber of moderate size, having a succession of long narrow islands, on several of which are moderate-sized towns. The scenery above lit (lat. $33^{\circ} 42^{\prime} \mathrm{N}$.; lon. $42^{\circ} 28^{\prime}$ E.), in itself very picturesque, is greatly heightened by the frequent recurrence of ancient irrigating aqueduets of beautiful architecture. Below Hit, the country becomes flatter, with few hills; the river winds less, and the banks are covered with Arab villages of mats or tents, and by numerous herds and flocks. Towards Lemlun or Lemloom (lat. $31^{\circ} 45^{\prime} \mathrm{N} . ;$ lon. $44^{\circ} 59^{\prime} \mathrm{E}$.), the country is level, and little elevated above the river; irrigation is therefore easy, in consequence both banks are eovered with productive cultivation, and fringed with a double and nearly continuous belt of luxuriant date-trees, extending down to the Persian Gulf. The Shatt-el-Arab, or last reach of the river from Korna, where it is joined by the Tigris, has a depth of from 3 to 5 fathoms, and presents banks covered with villages and cultivation. The permanent flooding of the Euphrates is caused by the melting of the snow in the mountains along the upper part of its eourse. This takes place about the beginning of Mareh, and it inereases gradually up to the end of May. The river continues high, and its course very rapid for 30 or 40 days; but, afterwards, there is a daily decrease, which becomes very small and regular towards autumn. From the middle of Scptember to the middle of October, the river is at the lowest. The quautity of water discharged by the united streams Euphrates and Tigris, through their common channel, the Shatt-el-Arab, has been estimated at 236,907 cubic ft. per second, which is about 10,000 enbic ft. less per seeond than that discharged by the Danube. The increment of land about the delta has been found to be a mile in 30 years, about double the increase of any other delta. This phenomenon has been attributed, by Sir R. I. Murchison, in part to the circumstance of the mud and sand carried down by the Euphrates and its associated streams, being derived in immense volume from the slightly coherent tertiary formations through which these rivers flow for such enormous distances; and specially to this detrital matter being deposited in so landlocked a body of water as the Persian Gulf, in which, aided by the inset of the tide, the sediment is poured back, instead of being swept out by a boisterous open sea. The length of the navigable part of the Euphrates, reckoning from Bir to

Bussora, is 143 m . The water is somewhat turlid, but, when purified, is pleasant and salubrious. Fish are abundant.(Col. Chesney's Euphrates Expedition; Jour. Roy. Geo. Soc.; Kitto's Cyclopedia of Biblical Literature ; Athenceum, April 26, 1851.)

EURE, a dep. France, bounded, N. by dep. Seine-Inférieure, N.E. Oise, S. Eure-et-Loir, S.W. Orne, and W. Calvados; between lat. $48^{\circ} 40^{\prime}$ and $49^{\circ} 30^{\prime}$ N., and lon. $0^{\circ} 20^{\prime}$ and $1^{\circ} 50^{\prime}$ E.; greatest length, E. to W., 66 m .; average breadth, about 50 m .; area, 2248 sq . m. The surface consists of an extensive plain, subdivided by the rivers which water it, into a number of minor plains, which nowhere rise more than 300 ft . above the level of the sea. Thus, in the N.E. of the dep., one minor plain lics onr. bank Seine, between its tributaries Epte and Andelle, and forms the isolated arrond. of Andelys. On I. bank Seine a second plain, entering this department from that of Seine-ct-Oise, forms a comparatively narrow belt between the Seine and the Eure. A third plain lies between the Eure and the Iton, and terminates in a point at their confluence. A fourth plain, of larger extent than any of those yet mentioned, is bounded on the E. by the Iton and Eure, and on the W. by the Rilli, and slopes gently down towards 1. bank Seine. A fifth plain, nearly of a rectangular form, lies between the Rilli and the Charentonne; and a sixth and last plain includes all the country between the Charentonne and Rilli, on the E., and the W. frontiers of the department. In all these plains the surface arpears almost monotonously flat, except at their edges, where the descent to the streams which separate them is generally narrow and abrupt. The Seine, which, by its estuary, bounds the N.W. portion of the department, traverses a considerable portion of it in a N.W. direction, and receives all its other streams. The climate, though somewhat humid and variable, is temperate, and not unhealthy. The prevailing wind is the S.W., which occurs so frequently as to give the trees which are exposed to it a visible inclination to the N.E. Almosi the whole surface is profitably occupied, the waste not amounting to one-thirtieth of the whole. Nearly two-thirds are arable, and one-fifth under wood. The vine grows vigorously, but the climate is not so genial as to allow the cultivation of it on a large seale for the purpose of making wine. Its place is found to be more profitably occupied by the plum, cherry, apple, and pear. From the last two much excellent cider and perry are made. The arable land generally consists of a good vegetable mould, capablo of raising all the ordinary cereals in abundance. Occasionally the mould contains a considerable intermixture of clay, whieh converts it into a heavy loam, well adapted for the growth of wheat and beans. In several districts the subsoil is chalk, and the soil covering it so thin as to be almost incapable of profitable cultivation. From the whole, however, the corn raised is fully adequate to the consumption. In particnlar spots hemp and flax, of excellent quality, are grown. The rearing of stock is well understood, and attracts eonsiderable attention. The horses in particular, known by the name of the Norman breed, have long been in great repute, and form a lucrative branch of trade. Both game and fish are abundant. The only metal of much consequence is iron, which is raised in sufficient quantities to maintain 11 blast furnaces. The quarries produce building stone, millstones, and pavement, and there are good seams of fuller's earth and potters' clay. Manufactures have made considerable progress. A mong others may be mentioned fine woollen eloth, linen and cotton fabrics, prints, cotton hosiery, woollen covers. and earpets, ironmongery, pins, leather, paper, glass, and Paris lace. The trade includes, in addition to these articles, eider, perry, cattle, horses, wool, flax, and hemp. For alministrative purposes, the department is divided into five arrondissements-Lvreux, the capital; Les Andelys, Bernay, Louviers, and Pont-Audemer; subdivided into 36 cantons, and 703 communes. Рор. (1846), 423,247.

EURE et-Loir, a dep. France, bounded, N. by Eure; W. Orne ; S.W. Sarthe; S. Loire-et-Cher ; S E. Loiret; and N.E. Seine-et-Oise; between lat. $47^{\circ} 58^{\prime}$ and $48^{\circ} 57^{\prime}$ N., and lon. $0^{\circ} 45^{\prime}$ and $2^{\circ}$ E.; central length, N. to S., 55 m .; central breadth, 44 m ; area, $2117 \mathrm{sq} . \mathrm{m}$. The surface may be regarded as forming an extensive platean of considerable elevation, which in the E. presents an almost unbroker flat, very scantly watered, but in the W . is less monotonous, being both partially covered by hills and intersected by valleys, in which numerous streams flow. The principal watershed of
the department is formed by a ridge of no great height, which stretches aeross it from S.E. to N.W., and divides it into a N. and a S. basin, traversed by the two rivers which give the department its name-the Eure, which flows N. and earries its waters to the Seine; and the Loir, whieh takes an opposite direction and ultimately joins the Loire. Eael of these rivers receives several small tributaries, and there is also a considerable number of lakes, of which Bois-Ballu is supplied by a series of eurious subterranean channels. The elimate is variable and humid, but is consitered healthy at all seasons except autumn, when intermittent fevers, eaused apparently by the quantity of staguant water allowed to collect round the farm offices and villages, beeome prevalent in many of the rural communes. The waste land is extremely limited, amounting to little more than one inundredth part of the whole. Little more than one-tenth is occupied with wood. Almost all the rest is arable, but a considerable extent is oecupied by orehards and vineyards. The produce of the orehards is made into execllent eider, but that of the vineyards affords a very indifterent wine. The soil is in general exeellent, consisting of a heavy loam, admirably adapted for wheat, which is usually eonverted into flour within the department, by mills situated along the banks of the Eure, and after satisfying the home eonsumption, leaves a large surplus for export. In several distriets the soil is of a lighter texture, and is better adapted for barley and oats. Vegetables also, particularly onions and turnips, are extensively grown. In some places hemp, flax, and madder, are prineipal erops. Artıfieial meadows are extensive, and the art of irrigation is well understood and generally practised. The domestic animals include horses, eattle, and sheep, of good breeds. Great numbers of swine are reared, and large supplies of poultry are sent to the Paris market. ( iame, partieularly hares, rabbits, partridges, and plovers, is very abundant. The ouly mineral of any consequenee is iron, whieh is worked at several spots, but not very extensively. The department being essentially agricultural, has few manu taetures. That of flour already mentioned is by far the most important. The only others whieh deserve mention are hombasine, and flannel covers. The leading branches of trade are corn, flour, and wool. Eure et-Loir is divided into four arrondissements-Chartres, the eapital; Chateaudun, Dreux, and Nogent-le-Rotrou-sublivided into 24 cantons, and 432 eommunes. 1op. (1846), 292,337.

EUROPA, or Bassas da India, an isl. E. African coast, Mozambique Channel ; lat. $22^{\circ} 22^{\prime} 30^{\prime \prime} \mathbf{S .}$; lon. $40^{\circ} 24^{\prime}$ E., about 3 or 4 m . in dianeter, of circular form, with an indentation on the N. side; it is highest at the N. part, with several small hummocks in other places, and a sandy beach fronting the sea; it is of easy access and abounds, in turtle. The N. end is covered with trees of small size, the other parts chiefly with brushwood.

EUROPE [Latin and German, Europa], a prineipal division of the earth, forms the N.W. portion of the old world. Though ealled a continent, it might be more justly entitled a great peninsula, which is again characteristically divided into several smaller peninsulas. It is the least of the prineipal divisions of the earth, Australia exeepted, and yields to the others not only in general grandeur of seale, but also, in appreciable gifts, noble rivers, luxuriant variety of vegetation, and mineral treasures. Yet it is remarkable for its deeided superiority in arms and industry, and as the quarter wherein civilization, almost eonstantly progressive, has hitherto attained its most perfeet development. The sovereignty of European nations now extends into every quarter of the carth. The origin of this striking superiority will be found, on examination, to be attributable more or less to certain physicogeographical eonditions, such as elimate, productions, maritime convenience, \&e., more happily combined in Europe than elsewhere, and which, though they may escape attention, yet exercise a profound and inevitable influence on the carly growth of human soeiety. The natural characteristics, theretore, of Europe, taken as a whole, with the peculiar advantages or disadvantages of its several portions, well deserve to be carefully considered.

Name.-As to the name of Enrope, which first oceurs in one of the hymms attributed to IIomer, we may be sure that it sprang, like language in general, from the wants of soeial intereourse, and not from ingenions or far fetehed coneeits. Its origin cannot mow be traced, and the attempts to derive it
from Hebrew or Greek roots, deserve little attention. It cannot be expected that mythology and the nympl Europa, will throw any valnable light on such a question. Europe was probably a loeal name, of Plurygian origin, for the country W. of the Hellespont. IIesyehius is the only aneient writer who throws out a hint on this subjeet, worthy of sound philology, for he says that the word Europe signified 'the place of sunset ' and 'darkness.' Thus we may infer that in the language of some people bordering on Grecee, it signified, in effeet, 'the West.'

Boundaries.-Europe is bounded on the W. by the Atlantic, on the N. by the Arctic Oecan or N. Polar Sea. On the $S$. it is separated from Africa by the Mediterranean (inland) Sea, which is eonnected with the Sea of Marmara or Propontis loy the strait ealled the Dardanelles or Hellespont, and the Sea of Marmara, again, is joined on the E.N.E. by a similar strait-the Bosphorus-to the Black Sca or Euxine. The Dardanelles and Bosphorus with the intervening sea, divide Europe from the adjacent shores of Asia Minor. N.E. of the Black Sea is its shallow continuation, the Sea of Azof (Palus Mœotis), which eloses the series of inland waters encompassing the shores of Europe on the S. and S.E. From the head of the Sea of Azof, the line which separates Europe from Asia, or in general terms, the E. boundary of Europe, is merely arbitrary and speculative ; the practical and authoritative determination of it is neither prompted by any interest, nor facilitated by natural landmarks. Some geographers trace the boundary line from the Sea of Azof up the River I on, to the point where this river approaches nearest to the Volga; thence up the latter river and its E. tributary, the Kama, to the Uralian Mountains. Others prefer the line of lowest level, which is partially marked by the River Manytseh between the Sea of Azof and the Caspian Sea, and then continue the boundary up the River Yaik or Ural, to the mountains. Others again earry the bounds of Europe and Asia further S. to Caucasus, where this mountain chain extends from the Black Sea to the Caspian in a W.N.W., E.S.E. direction. All agree in assuming the Uralian Mountains to form part of the natural boundary between Europe and Asia. This opinion, however, which is of modern origin-for the ancients eonsidered Europe as extending indefinitely towards the N.E., and embracing the eountry now called N. Siberia-is founded merely on the apparent convenience of referring the demareation of the two continents to a chain of mountains, supposed to run for 1200 m . nearly in the direction of the meridian. But the region of the Ural, whieh is still but imperfectly known, presents, to a great extent, only a moderate elevation, attained by imperceptible degrees, and offering to the eye no landmark whatever. In fact, the true E. boundary of Europe is a contested question, which has ealled forth much futile diseussion; nature has drawn in the region referred to no decisive line of separation between the E. and W.; neither has political power, and the limit of jurisdiction-the line which separates Russia from Siberia-lies not in the Ural, but mueh further E., at the river Tobol.

Position, Area, \&c. - The most N. point of Europe, on the mainland, is Cape Nordkyn in Lapland, in lat. $71^{\circ} 6^{\prime}$; N . Cape, on the island of Mageroe, lies about 4 m . further N . Tho most $S$. points of the continent are Punta da Tarifa; lat. $36^{\circ}$ in tho Strait of Gibraltar, and Cape Matapan, lat. $36^{\circ} 17^{\prime}$ whieh terminates the Morea. The island of Candia reaches a little S. of $35^{\circ}$. On the W., Cape Finisterre (eoas of Spain), is in lon. $9^{\circ} 27^{\prime} \mathrm{W}$.; Cape Roca ('ortugal), in lon $9^{\circ} 28^{\prime} \mathrm{W}$; while Ekaterinburg in the Uralian Mountains, lies in lon. $60^{\circ} 36^{\prime}$ E. Thus Europe may be sail to extend, in round numbers, through 35 degrees of latitnde, and 70 of longitude. From Cape Matapan to N. Cipe is a direct distance of 2400 m . from Cape St. Vincent to Ekaterinburg, N.E. by E., 3400 m . But the area of the continent must not be deduced from these large numbers, which are indeed only the extreme dimensions of a very irregular and mueh broken figure. Europe will be seen at the first glanee to be made up of the following parts, each, in sone measure, naturally independent of the rest, namely, the Scandinavian Peninsula, Jutland, and the Danish Islands; the British lslands, the Iberian Peninsula or Spain and Portugal, the peninsula of Italy, and that of Greece. Ieeland also, though not physically eonneeted with Europe, Iras been always reckoned as part ot it, becanse it was known to Europeans and colonized by them, long before the discovery

## EUROPE

of America, to which it more properly belongs. Owing to this incompactness of figure and separation into peninsulas, the area of the European continent, notwithstanding its considerable length and breadth, does not exceed $3,600,000 \mathrm{sq}$. m., or $3,800,000$ if Caucasus be taken as the S.E. limit towards Asia. Towards the E. it grows more compact, or in other words, it loses in Russia its characteristic peninsular features, and takes a transitional form before it commingles with Asia. But W. of Cracow and the Russian territory,
there is hardly a spot in the European continent which is 300 m . distant from the sea.

Before describing the physical features of Europe, the following Table is introduced, for the purpose of showing by what States the continent is occupied, and in what proportion they extend over its surface. Besides the name and area, the Table shows the form of government in each state, as indicated by its designation, the prevailing religion, the population, revenue, debt, army and navy, and capital city :-

Area, Population, \&c., of all the European States.

| States. | Designation. | Religion. | Area $\mathrm{sq} . \mathrm{m}$. | Population. | Revenue. | Debt. | Army. | Nary. |  | Capitals. |

* And 440 gun-boats.

Seas. - The Atlantic Ocean takes different names in the various portions of it which wash the W. shores of Europe; thus between the N. coast of Spain and the W. coast of France, lies the Bay of Biscay, where the ocean swell rolling into the region of variable and restless winds, makes a perpetually troubled sea. Further N. between the coasts of France and those of the British Islands, the Sea of St. George's Channel is still more noted for uncertain and tempestuous weather. From the channel a branch running N. between Great Britain and Ireland, is named the Irish Sea. Here at one spot (lat. $52^{\circ} 30^{\prime}$ ) on the E. coast of Ireland, the streams of opposite tides from N. and S. are so exactly counterbalanced, that the sea remains always at its mean level, while in the British channel, not far off, the tides often rise 24 ft .; and at St. Malo on the coast of Normandy, 40 or even 50 ft . The sea between Great Britain and the Low Countries of Holland and Ger-
many, is named the German Ocean or North Sea. From this a great gulf or inland sea branches off to the E., S., N and E.; taking successively the names of Skagerack (the Pass of Rack), Kattegat (the Strait of the Catti), the Baltic (the Sea of the Balts or Belts, that is, narrow passes), called by the Scandinavians and thence by the Germans also, the East Sea (Ostsee). In lat. $59^{\circ} \mathrm{N}$., the Gulf of Finland hranches off to the E. from the Baltic for a length of 250 m . From the same latitude extends N . the Gulf of Bothnia, nearly 500 m . The whole length of the Baltic Sea, from the mouth of the Skagerack to the head of the Gulf of Bothnia, cannot be less than 1200 m . There is no appreciable tide in the Baltic, and as this sea receives many rivers, while it loses little by evaporation, its waters are much less salt than those of the occan, and it is popularly believed that a continuance of N. winds renders them quite fresh. N.E. of the Gulf of Finland, a depressed
tract of country with numerous lakes, separates that gulf from the White Sca, which is a deep inlet nearly 400 m . in length, from the Arctic Ocean and extending from N.E. to S.W. between the shores of Lapland, Finland, and Russia. The shores of the White Sea are annually frozen up for some months. The Strait of Gibraltar, in one place only 19 m . wide, forms the communication between the Atlantic Ocean and the Mediterranean Sea, which latter has an extension from W. to E. of 2500 m ., with a general width perhaps of 500 m ., but owing to its sinuous shores and deep indentations, it stretches through 15 degrees of latitude. Its chief gulfs are the Adriatic Sea, above 500 m . in length N.W. to S.E., between Italy and Illyria; and the Archipelago (a name corrupted from Aegio-pelagus, the Egean Sea), which lies be tween the Grecian Peninsula and Asia Minor. The Black Sea which is connected with the Archipelago, as described above, extends from W. to E. nearly 700 m ., while its width is from 200 to 300 m , and here again, on the N . shores of this sea, even in lat. $45^{\circ}$ N., we find the rivers and harbours frozen, and navigation prevented during five months of the year. The Mediterranean lying generally under a warm zone (lat. $30^{\circ}-45^{\circ}$ ), is much exhausted by evaporation, and a constant current sets into it from the Atlantic on the one side, as well as from the Black Sea on the other. Hence its waters rather exceed in saltness those of the ocean. Owing to the great magnitude of the Mediterrancan Sea, the phenomena of tides are perceptible in it ; in the Black Sea there is no tide.

Mountains.-The mountains of Europe form several distinct groups or systems, of very different geological dates, and capable of being considered as a whole, only from that point of view which discloses their combined influence on the climate, physical character, and capabilities of the continent around them. Into the succinct account here about to be given of them, no particulars shall be admitted which have not this unity of bearing. The Scandinavian nountains, to which the great N. peninsula owes its form, and in some respects its peculiar climate, extend through 13 degrees of latitude $\left(58^{\circ}-71^{\circ}\right)$, or above 900 m ., from the Polar Sea to the $S$. point of Norway. Their direction in the middle portion is E.N.E. and W.S.W.; towards the extremities N.N.E. and S.S.W. They bear many names in succession; first, descending from the N., we have the Lapland mountains; then, on the borders of Sweden, the Kioelen; then the Dovre; after which come the Sognafield and Hardangerfield. The highest summits of the chain are Skagetöltind, in Sognafield (lat. $61^{\circ} 24^{\prime} \mathrm{N}$. ), 8128 ft ; and Sneeh:itten, on the Dovre (lat. $62^{\circ} 20^{\prime} \mathrm{N}$.), 7550 ft . The highest part of the chain is from the middle, southwards; but there are many points in the N .
 elevation excceding 6000 ft . The Scandinavian mountaina nowhere form a narrow crest at their summits, but, on the contrary, they expand into plains, fells, fields, or fjelds, often 30 or 40 m . wide. In the S . part of the chain, these elevated plains afford pasture during the summer to sheep and cattle; but towards the N., the bleak wilds produce nothing but moss, which yields subsistence to scattered herds of rein-deer. Towards the E., the mountain mass declines gradually; while on the W., it falls abruptly to the sea, which forms numerous deep inlets, or fiords, along the coast of Norway. The traveller from the shores of the Baltic ascends to these highlands by such imperceptible degrees, that he recognizes the fact of his ascent only in the changed aspect of nature, the trees disappearing, and then even the stunted brushwood, the grey moss alone clothing the Alpine plains; but on a sudden he finds himself on the brow of a rock overhanging, at the height of some thousand ft ., the waves of the W . Ocean. Behind him extends a monotonous, naked, and dreary plain; in front, he sees beneath him rocks and precipices, cascades, pine forests, and comfortable hamlets, creeks covered with the foam of the waves; and coves, where the fisherman's boat rides securely. The further N. we go in Norway, the more closely do the mountains approach the sea; and we may reasonably infer that a deep ocean washes these precipitous shores.

In the British islands, as in the Scandinavian peninsula, the mountains rise chiefly on the W.; and indeed the older rocks, in both cases, seem to lie in parallel courses, as if they formed parts of one system. In the form of Scotland, the direction of Glenmore, of the estuaries of the Clyde and

Vol. I.

Severn, and in the deep inlets on the S. W. coast of Ireland, may be seen stronz traces of parallelism with the Scandinavian range. But the mountains of the British group aro neither so simple and uniform in their geological characters, nor 80 elevated as those of Norway. Ben Nevis, in Inver-ness-shire, attains the height of 4380 ft . ; Snowdon, in N. Wales, 3554 ft . In Ireland, the highest point is Carran-tual, in Kerry, 3412 ft . In Scandinavia, there are no traces of volcanic rocks; but on the W. side of Scotland, and N. shores of Ireland, basalts and trap-rocks are widely spread, and appear to have proceeded from a source lying between, perhaps uniting, the two countries, and now sunk in the ocean.

The mountains of France occupy chiefly the S. and E. departments ; for the N. and W. parts of that kingdom belong to the great plain of N. Europe. The mountains of Auvergne extend about $80 \mathrm{~m} . \mathrm{N}$. to S ., between the sources of the Allier, Dordogne, and Lot, thus separating the basins of the Loire and Garonne. They form a table-land 3500 ft . high, from which again rise some conical peaks, evidently the remains of extinct volcanoes; the Puy de Sancy, or Mont d'Or, attains the height of 6680 ft ; Cantal, 6075 ft . E. and S. of this volcanic mass extend the Cevennes, for about 200 m ., the N. portion of the chain running N. and S., with the Rhone on the E. ; while the S. portion, bending to the S.W., approaches the Iyrenees, from which it is separated by the depression through which passes the canal of Languedoc, uniting the Mediterranean Sea and Ocean. The Cevennes form the demarcation of the waters flowing into these two seas. Their general elevation is about 3600 ft ; but a few points rise 2000 ft higher. The Jura mountains, extending about 200 m . N.E. and S.W., form a barrier between France and Switzerland. The parallel ridges, chiefly limestone, of the Jura, present steep descents towards the S.E., gentle slopes in the opposite direction, and are separated by longitudinal valleys of great length, with few transverse breaks. The average height of the Jura is 3700 ft .; but its highest point, the Molesson, reaches the elevation of 6560 ft . N. of the Jura, the banks of the Rhine continue mountainous for a long way. On the $W$. of that river, between it and the Moselle, rise the Vosges, which form a chain 120 m . in length, N . to S., with a mean height not exceeding 2650 ft . The dome-like summits of this chain have received the name of Ballons; and the highest of them, the Ballon-de-Sulz, attains an elevation of 4680 ft . Granite predominates in the S . part of the Vosges, while sedimentary rocks of many kinds are found in the $N$. portion. From this brief sketch of the mountainous chains of France, it may be easily understood why the chief rivers of that country (the Rhone excepted), flow generally to the N . and W .

Pyrences.- On the S., France is divided from Spain by the Pyrenees, a narrow chain, 250 m . long, and hardly 50 m . in breadth, extending in an E.S.E., W.N.W. direction, from the shores of the Mediterranean Sea to those of the ocean; though some consider the mountains of Asturias and Galicia, which stretch above 300 m . W., as a continuation of the Pyrenees. The central line or axis of this chain is composed of granite, on which lies limestone; the latter rock, however, not being deposited in a line strictly parallel to the granitic axis, but inclining rather. The highest point in the chain, La Maladetta, or Mont Mauduit, called also, in the provincial language, the Pic de Netou, has an elevation of $11,430 \mathrm{ft}$. Several other points exceed $10,000 \mathrm{ft}$. ; and as the limits of perpetual congelation are found here at the heights of 8300 ft . and of 9100 ft ., on the N . and S . faces of the mountain respectively, it is evident that a large area in the Pyrenees must be covered by perpetual snow; but the glaciers of these mountains are few, and of small extent, and never descend into the lower valleys. The Pyrenees are separated, on the S., by the valley of the Ebro, which flows into the Mediterranean, from the elevated plain of the Spanish peninsula. This great plain, or table-land, the elevation of which varies from 2200 ft . to 2800 ft . ; has a superficial extent of not less than $90,000 \mathrm{sq} . \mathrm{m}$. It descends gradually on the W. towards Portugal ; but on the E., towards the provinces of Catalonia and Valencia, it presents an abrupt steep or line of cliffs, with the characters of an ancient sea margin. This table-land is bounded N. and S. by chains of mountains running E. and W., and between which again lie three other chains, inclining from N.E. to S.W. The first, or northernmost of these chains, is, in truth,

## EUROPE

a continuation of the Asturian chain, the highest point of which, the Peñas de Europa, probably reaches an elevation of 8500 ft . The sierras de Teberga and del Somiedo, also seem to approach the limits of perpetual snow. The second mountain chain of the Iberian table-land is the Guadarama, which separates the valleys of the Douro and the Tagus. Towards its W. extremity, it is better known as the sierra d'Estrella. The highest point of these mountains, which are visible from Madrid, is the Peñalara, 8200 ft . high. On their sides stands the royal palace of Ildefonso, at the absolute height of 3800 ft . Between the Tagus and the Guadiana, comes the sierra Guadaloupe, the fourth chain; and between the valleys of the Guadiana and Guadalquivir, the sierra Morena, both lower than the preceding, the highest ridge of the former not exceeding 5100 ft ; while the Cumbre de Aracena, the culminating point of the latter, on the borders of Andalusia, probably rises 5380 ft . above the sea. But the fifth chain of mountains, that of Grenada, called also, in its highest part, the sierra Nevada which bounds the table-land on the S ., rises in a few points higher even than the Pyrenees; and the Cerro de Mulhacen, attains the heiglit of $11,660 \mathrm{ft}$. Between the sierra Nevada, and the sea on the S., extends the chain of the Alpujarras, rising to a height of 9000 ft . at the utmost, richly clothed with vineyards, to a height of even 3000 ft ., and in some places descending abruptly, in precipices, to the sea. The low country of the Iberian peninsula is of comparatively small extent, embracing only the plains of Aragon and Catalonia, the maritime districts of Valencia and Andalusia, and the middle part of Portugal.

The Alps.-The Alps, the lighest mountains in Europe, extend uninterruptedly from the mouth of the Rhone to the plains of Hungary, through 4 degrees of latitude ( $44^{\circ}-48^{\circ} \mathrm{N}$.), and about $12^{\circ}$ of longitude $\left(5^{\circ}-16^{\circ} 30^{\prime} \mathrm{E}\right)$. On the S., they are bounded by the valley of the Po; on the W., by that of the Rhone; and on the N., by the vallcy of the Danube, and some of the affluents of the Rhine; on the E., they meet the Illyrian chain, and their elevation being decreased, they lose their name also. With respect to direction, the Alps are not uniform, but are divided by geologists into two distinct chains, supposed to be of different ages. The maritime Alps, the most W. part of the system, strike S.S.W. to N.N.E.; the high Alps, or principal chain, stretch W.S.W. to E.N.E. It is at the point where these two chains cross each other, that the Alps attain their greatest elevation, and that Mont Blanc rears its snowy crest, $15,732 \mathrm{ft}$. above the sea. Mont Rosa, about 70 m . furtlier E., rises to within 300 ft . of the same elevation, and the average height of the whole range between these two summits, cannot be taken at less than $11,000 \mathrm{ft}$. The mean height of the Alps throughout their whole extent, is probably about 8000 ft ; and many points reach an elevation exceeding $12,000 \mathrm{ft}$. These mountains are divided by longitudinal valleys of great extent, in some of which are formed lakes, so that a chain of lakes extends along the foot of the Alps on both sides, namely, on the N., the lakes of Geneva, Neuchatel, Thun, Luzern, Zürich, Constance, \&c.; on the S., the Lago Maggiore, the Laghi di Lugano, d'Iseo, di Garda, \&c. As the limit of perpetual snow lies but little above the mean height of the Alps, being on the N. side, about 8700 ft . above the sea; while towards the S . its elevation varies from 8500 ft . to $10,100 \mathrm{ft}$., it is manifest that an extensive area in this region must be covered with perpetual snow. From the snowy heights vast glaciers also descend along the valleys, till they reach, in some instances, the moderate elevation of 3000 ft ; accumulating at their lowest edge, by their downward movement, immense banks of stones and gravel, called moraines. The chief glaciers of the Alps are at the N.W. side of Mont Blanc, in the valley of Chamouni ; in the country of the Grisons, between the Splügen, and the valley of Engadin; and in the Bernese Alps, between the sources of the Aar and Rhine. Here the snows and ice gathered round a group of towering summits, cover an area of perhaps $300 \mathrm{sq} . \mathrm{m}$. ; and the traveller who should ascend the glacier that stretches N., at the foot of the Wetterhorn, then pass S., along the flanks of the Schreckhorn, and turning W., between the Jungfrau and Finsteraarhorn, should descend the Aletsch glacier to its termination, would certainly, in so doing, have marclied 30 m . at least over continuous ice.

Apennines.-The Apennines, may be conveniently, though,
from the geological point of view, not perhaps correctly, considered as a branch of the Alps. After a winding course round the Gulf of Genoa, they turn to the S.E., and constitute the central ridge of the Italian peninsula. This chain has a length of 600 m ., with a breadth varying from 20 m . to 60 m . In Puglia, it spreads into a wide table-land, about 1500 ft . high. The highest point of the Apennines is the Monte Corno, in lat. $42^{\circ} 27^{\prime}$ (the summit of the mountain called Il Gransasso d'Italia) ; 9519 ft . high. The loftiest ridges of the chain are not in the centre of the perinsula, but on its $\mathbf{E}$. side, towards the Adriatic Sea. The prevalent and characteristic rock of the Apennines is a primitive limestone, without fossils. The Euganean hills, near Padua, the Albanian hills, near Rome, and Vesuvius, at Naples, are all of volcanic origin, and quite distinct from the Apennines. To the latter, however, belong the monntain groups which, often attaining the height of 6000 ft ., form the island of Sicily ; but here again the volcanic Etna, 10.874 ft . high, must be regarded not as a part of, but as an accident in, the system. At the foot of the crater of Etna, 9770 ft . above the sea, stands a small building called the English House, probably the highest inhabited place in Europe. This house is covered with snow till the middle of June, and fresh snow falls on it again in August. At the level of the sea S. of Naples, snow is rare, and melts immediately.

The Dinarian or Illyrian Alps branch off from the high Alps at the head of the Adriatic Sea, in a direction parallel to that of the Apennines. They rise nowhere higher than 6000 ft.; but overhanging the sea, and occasionally covered with fine forests, they have a grand appearance. After continuing in the same direction for about 200 m ., this clain merges in the Balkan, the Hæmus of the ancients, which extends to the Black Sea, but the character of which is little known in W. Europe. As the Pyrenees and Alps cut off the two W. peninsulas, so the united chains of the Illyrian Alps and the Balkan separate that of Greece from the rest of Europe. S. of these, and parallel to the Balkan, runs the Despoto-Dagh, the Rhodope of the ancients, the E. portion of which attains the height of 8000 ft . Still further S., Pindus strikes to the S.E., and forms the central ridge of the Grecian peninsula; it reaches 7000 ft . above the sca, at its highest point; and Taygetus, in the Morea, about 1000 ft . higher. The mountains of Greece, though covered deeply with snow during the winter, nowhere reach the line of perpetual congelation.

German Mountains.-N. of the Alps, and extending E., there rise several groups and chains of mountains which collectively separate the basin of the Danube, on the N., from the basins of the rivers that flow into the North and Baltic Seas. At the sources of the Weser we find the Harz, and, S. of this gronp, the Thuringerwald mountains; the Brocken, in the former, the Beerberg, in the latter, attain the heights of 3660 and 3075 ft . respectively. Then come the Fichtelgebirge, the Erzgebirge, and Böhmerwaldgebirge; these last two chains diverging, the former N.E., the latter S.E., so as to embrace Bohemia. After the Erzgebirge follow the Sudetes, the N. portion of which takes the name of Riesengebirge, and here the Riesenkoppe, the highest mountain of Germany, N. of the Dannbe, reaches the elevation of 5390 ft . Further to the E., the Krapatski or Carpathian chain encloses the great plain of Hungary, attaining, in several places, an elevation of 8000 or 8500 ft . The Ural Mountains, which serve as a boundary between Europe and Asia, extend nearly in the meridian, or from N. to S., through $18^{\circ}$ of latitude, or from lat. $49^{\circ}$ to $67^{\circ}$, but N. of $60^{\circ}$ they are not habitable by civilized man. The highest known summit of the Ural-the Konjakofskoi-kamen, in lat. $60^{\circ}$-reaches an absolute elevation of 5700 ft ; but, generally speaking, the chain is low, and presents to the eye only a series of rounded hills. Towards the S., it spreads out into a fan-shaped group of low mountains, covered with thick forests and fine pastures, and therefore much frequented by the Bashkirs. In a line with the Ural (lon. $60^{\circ}$ E.), towards the N., the island of Novaïa Zemlia [Nova Zembla], 300 m . long, stretches N. to lat. $77^{\circ} \mathrm{N}$.

Plains.-To complete the physical delineation of Europe, it remains only to describe bricfly the plains which, together with the framework of mountains already sketched, make up the Continent. The great plain of N. Europe commences at the N. foot of the Pyrenees; comprehends W. France, W. and N. Belgium, Holland, and part of Denmark ; thence all

## EUROPE

the N. provinces of Germany into Russia, where it expands and terminates in the E. only at the Ural. A large portion of this plain, beginning at the Scheldt, and extending through Holland, Bremen, Ditmarsh, Hanover, and the N. provinces of Prussia, is a low sandy level, sometimes covered with heath and brushwood; sometimes resembling a sandy desert, not unfrequently, also, below the level of the sea or rivers, and protected from inundation only by means of strong dykes; or if liable to be submerged, then converted into marsh. Nearly the entire of European Russia is a plain, diversified only by moderate undulations; and that plain is, in superficial extent, equal to all the rest of Europe; or, in other words, it is half of Europe. Owing to its vast extent, it can attain a considerable elevation by an ascent quite imperceptible; and the ridge of Vallai, which separates the basins of the Volga and Dinieper, flowing into the Caspian and Black Seas, from that of the Dwina, which runs into the Baltic, has an absolute height of nearly 1200 ft . Besides this great plain or series of plains, there are two others too important to be passed over in silence; these are, the plain of Bohemia, and the plain of Hungary; the latter with an area of $40,000 \mathrm{sq}$. m., a great part of which is perfectly level.

Rivers.-With respect to the rivers of Europe, it is not necessary here to enter into details; their general claracteristics may be sufficiently explained in a few brief remarks. The various chains of mountains, from the Cevennes to the Carpathians, which divide the waters runring into the Mediterranean from those flowing into the $\Lambda$ tlantic Ocean, the Baltic, or the North Sea, form collectively a ridge which is parallel to the high Alps, or from W.S.W. to E.N.E.; and consequently the streams flowing from its N. side, or through the plain, all incline more or less to the W., and, owing to the breadth of the plain, which they traverse with a moderate fall, they are all navigable to a considerable extent. The Ebro, at the S. foot of the Pyrenees, holds a course parallel to these mountains, but the other large rivers of the Spanish peninsula run, like the mountain chains which confine their basins, in a direction parallel to the High Alps. From these last named mountains descend, as might be expected, some of the largest of the European rivers-the Danube, the Rhine, the Rhone, and the Po, all have their sources in this central chain. The first and greatest of these-the Danube -has a length of perhaps 1000 m ., or about half of the estimated length of the Nile. It is remarkable that the Volga, which, among European rivers, holds the first rank for length of course, having a run of nearly 1700 m ., derives but a small proportion of its waters from the heights of the S . Ural ; its chief sources are little more than 1000 ft . above the sea; but, on this very account, its basin is less confined, and it drains an immense extent of country with so moderate a fall, that its channel is always full. The lakes of Europe accompany the chief mountain systems, and may be divided into two groups-the Alpine and the Scandinavian. A chain of lakes runs along the N. side of the Alps, through Switzerland and the Tyrol; and, along the S. side, through Lombardy and Styria. The Scandinavian lakes extend across Sweden, from W. to E., beginning at the S. termination of the mountains; and on the E. side of the Baltic a number of lakes stretching in the same direction across Finland, on the borders of Russia, mark the continuation of the line of depression.

Geology.-It may be convenient at times to consider the Pyrenees, Alps, and Balkan, as forming a single chain of mountains, ramifying, on the one side, through the Italian and Grecian peninsulas, and, on the other, into Germany and IIungary; but geologists acknowledge no such unity or simplicity of system. They discover, in almost every group of mountains, proofs of many distinct revolutions, differing widely in age and in dynamic elements. Their reasonings, founded on the carcful observation of many minute particulars, such as the mineral character of rocks or strata, their position more or less altered, their relations to the adjacent strata, the relative age of the organic remains found in them, if they be fossiliferous, \&c., will not easily bear abridgment. Here it will be sufficient to state, succinctly, the deductions of geological science respecting the formation of Europe; and perhaps a very general and rapil outline will, after all, convey as correct a view as could be given by an elaborate picture
filled in with details, since the decisious of filled in with details, since the decisions of geologists respect-
ing the age of rocks cannot yet claim the confidence due to exaet truths. It seems to be admitted on all hands, that the first rank among European mountains, in respect of age as well as of extent, belongs to the Scandinavian range. It consists almost wholly of what were heretofore called primary rocks, and, on their flanks, the oldest deposited strata (Cambrian, Silurian, Devonian), containing, in their fossils, proofs of relative age, lie horizontal and undisturbed, their formation having taken place subsequent to the upheaval of the mountains. In the W. of England, and on the W. side of the Ural, analogous strata are found distorted or raised vertically, showing that the mountains on which they lean have risen since their deposition, but, at the same time, proving the antiquity of the frame-work of N. Europe, from its W. to its E. extremity. The several ridges or chains of mountains which arose successively at later dates, and are now distinguisliable by the nature and position of the strata resting on them, cannot be here enumerated in their proper order. It will suffice for our present purpose to state, that the ninth great change, in the physical aspect of W. Europe, was produced by the raising of the Pyrenees, which chain, being comparatively recent, raised with it recent strata, such as chalk and the earlier tertiary formations; and as the chalk, the formation of which was arrested by the convulsion which raised the Pyrenees, occupies but a small portion of Europe, it is supposed that the effects of that convulsion were very widely felt, and that, in fact, the emergence of a large proportion of the Continent, from the waters which then covered it, took place suddenly at the upheaval of the Pyrences. The 11 th great revolution was effected by the npheaval of the W. Alps; the 12 th by that of the High Alps; so that these, the greatest mountains of Europe, are also unquestionably the youngest, with the exception of one inconsiderable chain in Greece, the upheaval of which may be assigned to a volcanic action still partially surviving in Etna and Vesuvius. It is remar kablo that the European land which first rose above the ocean, is that which still continues most constantly to rise; for it is fully ascertained that the waters of the Baltic are retiring from the shores of Sweden at a uniform rate, or, in other words, the land is rising at the rate of about 5 ft . in a century. During the formation of the tertiary strata, nearly three-fourths of Europe - most of lussia, the basin of the Danube, N. Germany, Holland, part of France, the E. shores of Swedert, of England, of Italy, \&c.-were under water. The rising of the Pyrenees made Europe a continent; the convulsion which separated England from France, is supposed to have been caused by the rising of the High Alps. Scotland and Ireland renained connected, probably till a much more recent period, by volcanic formations, which have subsequently crumbled and suuk in the ocean. It is near the contact of the older sedimentary rocks with those of eruptive or volcanic origin, that the great metallic deposits are found. These lie chietly in England, Sweden, the Ural, and in a line from the IIarz, through the Erzgebirge, to the (arpathians.

Climate. - Europe enjoys the great advantage of lying almost wholly within the temperate zone. A small portion of it indeed, comprising Lapland and the N. coast of Iussia, does extend beyond the Arctic circle, but it nowhere reaches to the line of perpetual congelation. On the other hand, the most S . point of Europe does not rach within $12^{\circ}$ of the Tropic, nor even attain a zone where snow is a rare phenomenon. Another great advantage is the great extent of its maritime boundaries, the European continent being, as alrearly stated, a great peninsula, again divided into several peuinsulas. This frequent mixture of sea and land, tends to difluse over the latter the equable temperature of the ocean. It is also the means of conveying to the land an immense quantity of vapour, which, falling in rain, furnishes to the atmosphere an accession of heat. It is well known that $W$. coasts are in general more warm and humid than those that face the E. Now this difference of climate is due wholly to the difference between the ruling winds. The W., or rather S.W. wind, in our latitudes, is in reality the equatorial current of the atmosphere, which flowing at first due N. towards the pole, continually inclines more and more towards the E., because the velocity of the earth's movement of rotation is greatest at the equator, and diminishes towards the poles, and consequently that motion from W. to E., which is latent in the equatorial current at its first starting N., becomes apparent

## EUROPE

## EUROPE

as the circles of latitude become less; and the wind from the intertropical regions describing a curve, arrives on our shores as a S.W. wind. A like train of reasoning, with an obvious inversion of circumstances, will show that the N.E. wind is generally nothing else than the polar current, bent from its originally S. course, because it falls short of the E. motion of the lower circles. Now the equatorial current of the atmosphere, determined in its course by circumstances, the explanation of which belongs to physical geography, flows N. with little intermission, over the Atlantic Ocean, and inclining E., becomes a S.W. wind. This is the predominating wind of W. Europe. In Ireland the S.W. wind, warm and humid, prevails during nine months of the year; on the Continent, its duration, strength, and temperature, decline uniformly towards the E. At St. Petersburg it is still the prevalent wind, but further E. it gives way to the cold and dry N.E. wind, which thenceforth has the upper hand, and exercises a powerful influence on the climate. From this it will be evident, that the heat and moisture of the equatorial zone are continually flowing into the atmosphere of Europe. But this effect is greatly heightened by an oceanic current. The equatorial current of the ocean runs W.; but being checked by the Amcrican continent, it turns N.; flows round the Gulf of Mexico, and then, under the name of the Gulf Stream, runs at a little distance from the coasts of the U. States, and passing S. of Newfoundland, falls with a relatively high temperature, chicfly on the shores of Ireland, Scotland, and Norway. At the same time, the N. shores of Europe are guarded from accumulation of ice by fortunate accidents of structure. The great projection of the continent $W$. of the Obi, and the position of Novaïa Zeinlia, stretching forward to lat. $77^{\circ}$, screen Europe effectually from the ice formed on the N. shores of Siberia. This ice, when it breaks up, drifts to Greenland, the E. coasts of which are never open, while the W. shores of Norway in the same latitude are never closed. Thus it appears, that many circumstances concur to favour Europe generally with a peculiarly genial climate, in which the vicissitudes of season are felt without their rigour, and the luxuriance of nature is so far subdued as never to overpower the efforts of industry.

The increase of temperature from N. to S., and from E. to W., as it takes place throughout Europe, will be found amply exhibited in the following table, which gives the mean, the summer, and winter temperatures, in degrees of Fahrenheit's thermometer (fractions omitted), of the chief cities where those elements have been accurately determined :-

|  | Latitude. | Mean Temp. | Winter. | Summer. |
| :---: | :---: | :---: | :---: | :---: |
| North Cape.............................. | $71^{\circ}$ | $32^{\circ}$ | $22^{\circ}$ | $42^{\circ}$ |
| Trondhjem (Norway)................ | 633 ${ }^{\frac{1}{2}}$ | 40 | 23 | 57 |
| Umeä (Sweden)........ | 64 | 35 | 14 | 56 |
| St. Petersburg ............................. | 60 | 38 | 14 | 62 |
| Stockholm..... | 593 | 42 | 24 | 61 |
| Edinburgh.. | 56 | 47 | 37 | 57 |
| Kasau ....... | 56 | 36 | 10 | 62 |
| Copenhagen | $55 \frac{1}{2}$ | 46 | 30 | 63 |
| Danzig ....... | 54 | 45 | 30 | 62 |
| Dublin.. | $53 \frac{1}{2}$ | 49 | 39 | 59 |
| Ilamburg | $53 \frac{1}{2}$ | 47 | 32 | 63 |
| Berlin.... | $52 \frac{1}{2}$ | 46 | 30 | 62 |
| Warsaw | 52 | 48 | 29 | 67 |
| Loudon. | 5) $\frac{1}{2}$ | 50 | 39 | 61 |
| Penzance.... | 50 | 51 | 42 | 60 |
| Prague.. | 50 | 49 | 31 | 67 |
| Paris.... | 49 | 51 | 38 | 64 |
| Carlsruhe | 49 | 51 | 34 | 66 |
| Vienna.. | 48 | 51 | 32 | 69 |
| Oien.... | 473 | 51 | 31 | 70 |
| Bordeanx. | 45 | 57 | 43 | 71 |
| Rome... | 42 | 60 | 46 | 73 |
| Naples.. | 41 | 62 | 50 | 74 |
| Lisbon............. | 381 | 62 | 53 | 71 |

From this it will be manifest to what an extent the severity of winter is mitigated by the vicinity of the ocean, N. Cape has a milder winter, and Trondhjem even a better climate altogether, than Kasan, which is situate in a much lower latitude, in the same parallel indeed as Edinburgh. That the lines of equal mean temperature decline S . as we go further E ., is obvious from the comparison of Penzance, Paris, Carlsruhe, Vienna, and Ofen. It is also to be observed, that if the same mean temperature be traced E ., the difference of temperature of the seasons will be found constantly increasing, the sum-
mer growing hotter, the winter colder. Thus, compare Edinburgh and Hamburg, Dublin and Prague, Penzance and Ofen, Naples and Lisbon; and it will be seen that equability is the character of the W. Hence it is that some plants, as the vine for instance, which suffer little from the cold of winter, but the successful cultivation of which depends chiefly on the summer heat, have a wider range towards the E., or in other words, they flourish within limits which run to the N. of E., and thus make an angle with the line of constant mean temperature. The same advantages of mild and genial temperature, which W. has over E. Europe, the continent collectively has over the rest of the earth. The diminution of mean temperature, as well as the intensity of the opposite seasons, increase as we go E. across the old world. Pekin, in lat. $40^{\circ}$, has as severe a winter as St. Petersburg. The hills near the sea side S. of the Chusan Islands, lat. $30^{\circ}$, are covered with snow four or five months in the year, and the snow has hardly disappeared, when the peach trees are in full blossom. The E. side of the American continent also exhibits the same relative defect as E. Asia, in respect of absolute and equable temperature, and although the W. coast, at the mouth of the Columbia, has a much milder climate than the E., yet it is still much inferior to W. Europe, as will be seen from the following table:-

|  | Latitude. | ${ }_{\text {M }}^{\text {M }}$ (min | Winter. | Sumamer. |
| :---: | :---: | :---: | :---: | :---: |
| Netr York. | $40^{\circ}$ | 520 | 320 | $73^{\circ}$ |
| Halifax. | 44 | 40 | 21 | 59 |
| Quebec... | 46 | 39 | 10 | 68 |
| Cumberland House(iludson's Bay | 54 | 32 | -4 | 67 |
| Fort Vancouver(Colombia, W.coast) | 45 | 51 | 38 | 64 |
| Fort George (Colombra) .............. | 46 | 48 | 37 | 61 |

As a large proportion of the rain which falls on Europe is borne to it by the S.W. wind, the quantity of rain diminishes towards the E., but not with regularity. The precipitation of the aqueous vapour suspended in the atmosphere, being determined by great masses of high land, the heaviest rains fall, as might be expected, round the Alps, particularly on their S. side, and at the W. side of the Scandinavian range. The peninsulas of S. Europe, namely, Spain, Italy, and Greece, all feel the effects of their exposure to the heated S . winds, which come to them from the great African desert, and they have little or no rain in summer. Some distriets in Spain are often without rain for nine months together. The Pyrenees, the Cevennes, the Alps, and the Carpathians, form a limit of climate between the dry region on the S., visited only by winter rains, and the humid region on which rain falls at all times of the year, but chicfly in summer. Sweden, however, on the E. side of the Scandinavian range, has but little summer rain, exhibiting in this as in other particulars, a strong contrast with the maritime climate of Norway. At Bergen in the latter country, the quantity of rain that falls within the year amounts to 80 inches; at Stockholm, it is but $17 \frac{1}{2}$ inches. Ireland, exposed to constant S .W. winds, completely saturated with vapour, has 208 rainy days in the year; but the rain is gentle though frequent, and probably does not amount to more than 32 inches. London has 178 days of rain, and England, collectively, 31 inches, though, in the mountainous districts, Cumberland especially, the annual rain often exceeds 60 inches. The Alps, at their S. foot, have 60 inches; Friuli, 100 inches; Palermo, 21 inches; Lisbon and Madrid, the one on the W. coast, the other inland, on a plain, have respectively 35 and $9 \frac{1}{2}$ inches of rain. Going over the continent from W. to E., we find that Holland has 26 inches of annual rain, and St. Petersburg 21 inches; W. France has 24 inches, Ofen 18 inches. The snow which covers the ground in Russia during five months, from October to April, amounts, when measured as rain, by inches, to only a very small quantity. The line of perpetual snow is found at N. C'ape, at the height of 2300 ft . above the sea, in S . Norway, at the height of 5500 ft . In the Alps the general height of this line may be taken at 9100 ft ., but on the N. side and E. end of the chain, it descends to 8500 ft ., while on the $S$. face of Mount Rosa it rises to $10,000 \mathrm{ft}$. On the Pyrenees, the snow line occurs on the N. and S. sides respectively, at heights of 8300 and 9100 ft . Thus it appears that the line of perpetual congelation falls lower on the Pyrenees than on the Alps; though the latter mountains lie $3^{\circ}$ further $N$. than the former; but
this is the inevitable consequence of the vicinity of the ocean, which diminishes the intensity of the summer heat.

Vegetation.-With respect to the vegetable kingdom, Europe may be conveniently divided into four zones. The first, or most N., is that of fir and bireh. This may be subdivided into the zones of lichen, bireh, and fir. The tundras, or mossy plains of Scandinavia, do not equal in extent those of E. Russia. The heights inaccessible to other vegetation up to the borders of perpetual snow, are occupied by lichens, the most valuable of which are the rein-deer moss, and the Iceland moss. The birch reaches almost to N. Cape; the fir ceases a degree further $S$. The cultivation of grain extends further in these rude latitudes, than might be at first supposed. Barley ripens even under the 70th parallel; wheat ceases at $64^{\circ}$ in Norway, $62^{\circ}$ in Sweden. In the country of the Samoyedes, in E. Russia, the limit of barley is in about $67^{\circ}$. Within this zone, the S . limit of which extends from lat. $64^{\circ}$ in Norway, to lat. $62^{\circ}$ in Russia agriculture has little importance, its inhabitants being chiefly occupied with the care of rein-deer or cattle, and in fishing. The next zone, which may be called that of the oak and beech, and cereal produce, extends from the limit above-mentioned to the 48 th parallel. The Alps, though beyond the limit, by reason of their elevation belong to this zone, in the moister parts of which eattle husbandry has been brouglit to perfection. Next we find the zone of the chestnut and vine, occupying the space between the 48 th parallel, and the mountain chains of S. Europe. Here the oak still flourishes; but the pine species become rare. Rye, which characterizes the preceding zone, on the Continent, gives way to wheat, and, in the S . portion of it, to maize also. The fourth zone, comprehending the $S$. peninsulas, is that of the olive and evergreen woods. The orange flourishes in the S . portion of it, and rice is cultivated in a few spots, in N. Italy and E. Spain. The deciduous oak here gives place to the evergreen and eork oaks, with edible acorns. The lines which define the region favourable to the growth of each plant generally incline $S$. towards the E.; but it is otherwise with the vine, olive, and a few other plants within certain limits. The cultivation of the vine begins on the coast of France, in lat. $48^{\circ}$, passes N. of Paris, in lat. $49^{\circ}$, and goes still further N. in Germany, where it reaches its N . limit; it is still, however, carried on with success on the Volga, in lat. $50^{\circ}$.

Zoology.-The zoology of Europe offers little for remark. The rein-deer and polar bears are peculiar to the N. The S. alone has lizards and serpents. In the forests of Poland and Lithuania, the urus or bonasus, a species of wild ox, is still oceasionally met with. Bears and wolves still inhabit the forests and mountains; but in general, cultivation and population have expelled wild animals. The domesticated animals are nearly the same throughout. The ass and mule lose their size and beauty N. of the Pyrenees and Alps. A few camels are bred in the neighbourhood of Siena, in Italy, in which country also buflaloes are used for drauglit. The Mediterranean Sea has many species of fish, but no great fishery; the N. seas, on the other hand, are annually filled with conntless shoals of a few speeies, chiefly the herring, mackarel, cod, and salmon. The fisheries thus arising are intrinsically valuable, and have unquestionably exercised a great influence on the early history and advancement of N.W. Lurope.

Ethnography and Language.-Europe is occupied by many different races, wholly distinct or very remotely connected. The Celts once possessed the W. of Europe, from the Alps to the British islands. The names, Alps and Albion, it may be observed, are derived from the same Celtic root, alb, white. The only remnant of the pure Celtic language, at the present day, is the Gxiic, or Erse, spoken in some districts of Ireland, the Scotch Highlands, and the Hebrides. The Welsh are the descendants of Belgian colonists, of mixed Celtic and German race. A portion of these Cambrians, or Kymry, as they call themselves, fled from the attacks of the Anglo-Saxons, into Brittany, where the people still speak a language resembling the Welsh. The Celts adopted the Anglo-Saxon writing; they also used the Ogham, which was a sacred, but not an ancient, character. Their literary cultivation began with their conversion to Christianity, and does not seem to have ever advanced far. From their comparative inaptitude for maritime pursuits, it may be inferred that they were origin-
ally mountaineers. In Spain, also, they were driven to the W. side ; the E. shores, the I'yrenees, and part of Aquitania, were held by the Iberians, of whom the Basques are now the representatives. Their language, the Eskuara, has no discoverable affinity with any other; and the Basques are the only European race who eannot be traced into Asia. Next to tho Celtic comes the Teutonic race, who have long predominated, and have supplied everywhere, except in Russia, the reigning families. Under this name are comprehended the Germans and Scandinavians; the language of the former, including Gothie, Lithuanian, Flemish, Frisian, Anglo-Saxon, \&e., extended from Transylvania to N. Britain, and from the Alps to the Baltic Sea. The Scandinavians, Danes and Norwegians chiefly, colonized Iceland, and the Faroe islands, Shetland, Orkney, and others of the Scotch islands; and traces of their presence in Ireland may be discerned even in Ptolemy's map of that island, A.D. 150 . The literature of this race goes back to pagan times, and is extremely abundant. To the E., in general, of the Teutonic race, though sometimes mixed with it, come the Selavonians, that is, the Poles, the Chekes, or Bohemians, Esthonians, the Servians, Croatians, about one-third of the population of Hungary, and the Russians. The Vends, or Veneti, formerly a powerful nation on the $S$. shores of the Baltic, but now absorbed in the German name, were of this race. An offset of the same stoek penetrated to the head of the Adriatic Sea, and founded Venice. Among the Sclavonians, the great mass of the people were serfs, and subject to harsh treatinent. Hence their national name (Slave), which means renowned, has become, in W. Europe, the designation of one deprived of liberty. Selavonian literature is all of modern date. In the S . and S.E. of Europe are the offspring of the Pelasgian stoek, speaking the Greek and Latin, which latter absorbed the Etrusean and other languages of ancient Italy. Greck was the language not merely of the Grecian peninsula, but of all the islands and Asiatic shores of the Agean Sea; it was this lan-guage-rich, vigorous, and singularly perspicuous-that first gave expression to that pure taste, manly conception, and perfeet freedom of speculation, whieh now form the distinction of Europe. Modern Greek is spoken within a comparatively limited range, and differs from the ancient tongue, chiefly, in having lost many grammatical inflexions; hence it is called Aplo-Hellenic or Simple Greek. The Albanians on the W. side of the Grecian peninsula, are probably sprung from the mixed Celtic and Dacian population of the Illyrian Mountains. At the present day, the language of the Skipetars (as they call themselves) is one-third Celtic, and contains much Sclavonian. The Latin or Roman language was connected with the Greek, through the least cultivated dialect of the latter-the Eolian; and contained many words of W. origin. The Teutonic, Sclavonian, Greek, and Latin (with the modern tongnes derived from them), all belong to what is called the Indo-European family of langnages. They may be all traced from the Sanscrit, the ancient language of Upper India, and the Himalaya, though, perhaps, the Sclavonian may be more conveniently referred to a cognate tongue-the Zend or ancient Persian. The Gypsies also speak a language of Indian origin, and related to the Pali. The Celtic language has so much analogy with the Indo-European stock, as to eountenance the belief, that the Celts were but an older wave of the same great stream of emigration from the IIighlands of Central Asia. From the neighbourhood of the Altai Mountains, N.E. of the Himalaya, flowed westward another similar stream. Turkish tribes occupied the steppes N. of the Blaek Sea, probably at an early age. At present, the Bashkirs in the S. Ural, are of Turkish race, to which belong also the Tatars of Kasan, those of the Krim, and the Nogays on the Don. The Ottoman or Othman Turks (so named from their early Sultan, Othman or Osman), after being settled for ages in Asia Minor, at length took Constantinople in 1453, and established their empire in Europe. Previous to this event, a body of Turcomans had forced their way into Macedonia, where their descendants still remain. The fishing and hunting tribes of N. Siberia, also took part in this W. movement, and the Finns advancing from the Obi, settled themselves in the countries now called Lapland and Finland. Higher up, from the banks of the Irtish, other hordes of the same nation mingled with, and led by Turks and Mongols, poured down on the valley of the Danube, in the 7 th century, and founded the kingdom of

Hungary. The language of the Magyars, as the Hungarians call themselves, has not yet lost all resemblance to that of the Ostyaks on the Obi. The inconvenience arising from diversity of speech, is much diminished in Europe by the great predominence of the languages of the Indo-European family, which are spoken by nine-tenths of the whole population; the Teutonic, Sclavonian, and Latin groups, each numbering about 60 millions.

The literary cultivation of Europe, considered in the aggregate, and apart from the separate national literatures of which it is composed, suggests a few important observations. It has proceeded altogether from ancient Greece. In poetry, history, and speculative philosophy, the Greeks certainly excelled in their time; but their original and peculiar merit, was that of laying the foundations of exact science, and of the scientific examination of nature. They commenced rearing the solid and enduring edifice of human knowledge. Pythagoras, Hipparchus, Ptolemy, and Euclid, were the forernnners of Copernicus, Kepler, Galileo, Newton, Laplace, and Herschel; and Aristotle broke the way for Locke and for Cuvier. It was fortunate that Christianity, while spreading W., raised in general consideration, the two languages which contained the seeds of civilization. When the Arabs, having overrun with great rapidity the N. of Africa, and part of Spain, laid aside their arms, and turned to cultivate the arts of peace, they created, in the latter country particularly, a literature which was as remarkable for its extreme copiousness, as for its superficial character and general worthlessness. Their example, however, worked on the poets of Catalonia, Provence, and Italy; and to them, probably, we owe the introduction of rhyme into European verse. It will be sufficient to mention here briefly, as an epoch in the history of letters, and as a cause of European superiority, the discovery of the art of printing, which, with the liberty of the press, wherever it is established, is sure to advance the interests of humanity.

History. - The history of modern Europe starts from Rome, as its literature from Greece. In the early years of the Christian era, the Romans subdued all W. and N. Europe, as far as the Baltic. The Roman power was favourable to civilization; it increased the measure of general liberty, and promoted intercourse, and the nations of Europe ought to be grateful to the Romais for the example of good roads, on a great scale, and for the civil law. As the Roman empire declined, the Northmen, or maritime adventurers of Jutland and Norway (including Danes and Anglo-Saxons), rose into importance, and obtained at last a firm footing in England and W. France. With these people rose into vogue the feudal system, which made the tenure of land depend on the condition of military service. But the feudal system proved a failure as a military organization; it created turbulent vassals, and not trained soldiers, and after experiencing, in the 16 th century, the great superiority of the Ottoman troops in the field, European nations adopted the system of standing armies. This change, however, was unfavourable to liberty, to morals, and to public economy; and the gradual discovery of the immense power connected with a well-trained standing army prompted inordinate ambition. IIence the wars and revolutions of the last and present centuries. The extinction of ancient European dynasties, however, will hereafter be thought a matter of little importance, compared with the colonization which now proceeds from the westernmost part of Europe over the whole earth, carrying with it a widely-spread and cultivated language, a ripe literature, useful arts, and enlightened sentiments.-(Boue's Geological Map of Europe; Schouw's Physical Geography of Europe, 1833 ; Crome, A General Survey of the Power and Resources of the States of Europe, 1818 ; Balbi's Political Balance of the Globe, 1833 ; Dupin, The Commercial Pover of Great Britain, 1825; Progress of France in Trade and Production, 1827; Jabob, A View of the Agriculture, Manufactures, Statistics, and State of Society of Germany, and parts of Holland, France, dec., 1820 ; Tegoborski's Productive Powers of Russia, 1851.)

EUROTAS, a river, Greece, Morea, rising in a mountainous district, about lat. $37^{\circ} 15^{\prime} \mathrm{N}$. ; lon. $22^{\circ} 15^{\prime} \mathrm{E}$. ; from which it flows S.E., and after having formed a junction with several other streams, becomes the Basili, which falls into the Gulf of Kolokythi.

EURUQUE, one of the nomade tribes of Asiatic Turkey, inhabiting the country about the upper branches of the Kizil

Irmak, pash. Karamania. They have no villages, but, like the Kurds, are truly nomadic, living on the produce of their flocks and herds, but generally in mountainous and wooded districts. They breed camels, and one of their principal occupations is burning charcoal. They live in tents made of black goats' hair.

EURYTANIA, a dist. or diocese, Greece, nome or prov. of Etolia and Acarnania. Its cap. is Karpenisi. Pop. (1839), 21,533.

EUSKIRCHEN, a tn. Prussia, gov. of, and 16 m . S.S.W. Cologne, circle, same name. It is surrounded by walls, in a very dilapidated state, is entered by three gates, contains three churches, and has manufactures of linen and woollen cloth, woollen covers, and potass, a trade in cattle, and four annual fairs. Lead, iron, and copper, are worked in the vicinity. Pop. 3104.-The circle, area 607 geo. sq. m., is partly hilly and partly flat, does not contain much arable land, but has rich meadows along the Erft. Pop. 29,710.

EUSTATIUS (ST.), an isl. Dutch W. Indies, 11 m. N.W. St. Kitt's; lat. (N. point), $17^{\circ} 32^{\prime} \mathrm{N}$. ; lon. $63^{\circ} 5^{\prime} \mathrm{W}$. (r.) It is oval-shaped, and scarcely 30 m . in circumference; area about 190 sq. m. There are two hills-the Punch Bowl and Signal Hill, the former of which is an extinct volcano; between is a deep valley, forming the centre of the island. One side of the valley is precipitous; the other shelves to the sea, forming the flat ground on which the town of Eustatius is placed, and, at the same time, the only accessible part of the island, all the rest of the coast being abrupt and steep, though presenting several other bays. Climate said to be healthy; but the people have no water, except that supplied by rain. Hurricanes and earthquakes are frequent. The level parts are covered with cane fields and provision grounds; the latter are the chief lands attended to, for only about 1000 barrels of sugar are produced yearly in the island; and other vegetable products are little attended to. Game is plentiful, and exported to other islands. St. Eustatius, at one time, carried on extensive contraband traffic. It was plundered by Admiral Rodney, in 1781 . The prosperity of the island is now gone, and little commerce is carried on. The language of the people is English, and they are mostly Methodists. Pop. (1780), 25,000 ; (1828), 2273.-The Town, divided into the upper and lower town, lies on a level piece of ground, on a bay S.W. side of the island. It is irregularly arranged, and consists chicfly of shops and warehouses, with the fort Hollandia in the centre. It has a Calvinistic and a Methodist church, and a small hospital. The roadstead is open and unprotected, but has good anchorage in certain winds.

EUSTON, par. Eng. Suffolk; 3910 ac. Pop. 255.
EUTIN, a tn. Germany, Grand Duchy, Oldenburg, cap. principality of Liibeck, in an agreeable district on a lake of same name, which partly belongs to Holstein, 17 m . N. Liibeck. It is well built, is the seat of a superior court and several public offices, has a large square castle, surrounded by ditches; fine gardens, a handsome town church, a library of 16,000 volumes, a townhouse, a normal industrial seminary and other schools, a savings-bank, poorhouse, and hospital ; and manufactures of leather, stoves, and soap; dyeworks, a weckly market, and several annual fairs. The musician Weber was born here. Pop. 2816.

EUTINGEN, two places, Germany :-1, A vil. Baden, circle, Middle Rhine, bail. of, and near Pforzheim on the Enz. It contains a parish church, and has a sandstone quarry. In the vicinity are the remains of a Roman tower. Pop. 896.2, A vil. Würtemberg, circle, Schwarzwald [Black Forest], bail. of, and 3 m. N.E. Horb. It contains a parish church. Pop. 1191.

EUXINE (The). See Black Sea.
EVAL (ST.), par. Eng. Cornwall; 2970 ac. Pop. 349.
EVANGELIST ISLANDS, a group of rocky islets, S. America, off W.coast, Patagonia, lat. (southernmost) $52^{\circ} 24^{\prime}$ 'S.; lon. $75^{\circ} 7^{\prime}$ W. (R.) ; consisting of four principal ones, and some detached rocks and breakers. They are very rugged and barren, and suited only to afford a resting-place or breeding haunt for seals and sea birds. There is landing on one of the islands, and anchorage round them. The largest and highest may be seen in tolerably clear weather at a distance of upwards of 20 m . They form an excellent leading mark for the W. entrance of the Strait of Magalliaens, near which they are situated.

EVANTON, a vil. Scotland, co. Ross, 13 m. N.N.W. lnverness. It is neat and well-built, contains a U. Presbyterian ehurch and a school, and has two annual fairs. P. 462.

EVAUX, an ancient vil. France, dep. Creuse, 31 m. E. Gueret, on a high plateau, in a well cultivated distriet. It contains an antique church, and the remains of some Roman baths. Near it are 15 hot springs (between $80^{\circ}$ and $140^{\circ} \mathrm{Fah}$.), inclosed in three establishments, and well frequented. Pop. 1391.

EVEDON, par. Eng. Lincoln; 2300 ac. Pop. 91.
EVENLOAD, par. Eng. Worcester; 1560 ac. Pop. 325.
EVENLY, par. Eng. Northampton; 2760 ac. Pop. 487.
EVERBECQ, a com. Belgium, prov. Hainaut, 23 m. N.N.W. Mons, with manufactures of linen, two breweries, a chicory factory, and several flour-mills, and a trade in agricultural produce. Pop. 4338.

EVERCREECH, par. Eng. Somerset; 3130 ac. P. 1449.
EVERDON, par. Eng. Northampton; 1900. ac. P. 777.
EVERGEM, a com. Belgium, prov. E. Flanders, and 4 m . N. Ghent, with considerable manufactures of linens and cottons; some breweries, a distillery, salt-work, soap-work, and several flour-mills. Pop. 7801.

EVERINGIIAM, par. Eng. York (E. Riding); 3080 ac. Pop. 318.

EVERLEY, or Everleigh, par. Eng. Wilts; 3370 ac. Pop. 354.

EVERTON, two pars. Eing. :-1, Bedford; 975 ac . Pop. 233.-2, Nottingham ; 4630 ac. Pop. 1094.

EVESBATCH, par. Eng. IIereford; 830 ac. Pop. 98.
EVESHAM, a parl. bor. and market tn. England, co. of, and 13 m . E.S.E. Worcester, beautifully situated in the vale of Evesham, on an acelivity rising from the Avon, by which it is almost encircled, and over which is a stone bridge of eight arches. It consists principally of four wide and regular streets, with well built houses, and is well paved, and lighted with gas. Of the three churches, that of St. Lawrence, lately rebuilt, is the most elegant. There are also ehapels for Baptists, Wesleyan Methodists, and Unitarians, and a Friends' meetinghouse; a free grammar-school, several other seminaries, a mechanics' institution, reading-rooms, and library. The abbey of Evesham, founded in 709. and of which only a tower 110 ft . high, and some outbuildings now remain, was at one time one of the most stately in the kingdom, and its tower is esteemed one of the finest existing remains of the time of Henry VIII. Parchment and stockings are manufaetured here, and many of the females are employed in sewing gloves for the Worcester trade. A considerable business is also done in hops and malt; but gardening is the clicf occupation of the inhabitants, who supply the markets of Cheltenham, Birmingham, Tewkesbury, Worcester, and even London, with large quantities of fruit and vegetables. Evesham is a borough by prescription. It sends two members to the House of Commons. Registcred electors (1850), 352. Market-day, Monday. Five annual fairs. In the immediate vicinity of Evesham was fought the decisive and sanguinary battle that reinstated II enry III. on the throne, August 4, 1265. Pop. (1851), 4605.-(Local Correspondent.)

EVIAN [Aquianum], a tn . Sardinian States, Savoy, beautifully situate S. shore of Lake Geneva, 24 m . N.E. Geneva. It was once surrounded by walls, flanked with towers, of which part still remains, contains a public square, a gothic parish church, a Latin and a primary school, two convents, and an hospital; and has a trade in agricultural produce, a weekly market, and three annual fairs. In the neighbourhood are the chalybeate springs of Amphion. Pop. 2084.

EV1E, and RENDALL, par. Scot. Orkney; 5 sq. m. Pop. (1851), 1447.

EVINGTON, par. Eng. Leicester; 1360 ac. Pop. 285.
EVORA [anc. Ebora, or Liberalitas Julia], a in. Portugal, cap. prov. Alemtejo, situated on a height in the middle of a fertile plain, 80 m . E. Lisbon. It is surrounded by a wall, and defended by a citadel and two forts, all alike ruinous. The houses are old and ill built, and the streets narrow and winding. The principal edifices are the cathedral, which is
large and handsome; four other charches, several convents and hospitals, and several Roman antiquities, of which the most important is a magnificent aqueduct by Sertorious, called Agoa de Prata, or Silver Water. Evora is the see of an archbishop, and possesses an ecclesiastical seminary and a college. It has some manufactures of ironware and leather, and a large annual fair. The Moors were defeated here in 1166, by Gerard, surnamed the Fearless. Pop. 9299.

EVORA MONTE, a tn. Portugal, prov. Alemtejo, beantifully situate on the side and crest of a hill, 15 m . N.N.E. Evora. It is surrounded by walls, and defended by a castle. Here, in 1834, the Miguelites, after being defeated at Santarem, were forced to lay down their arms. Pop. 940.

EVREUX [Roman, Civites Eburovicum], an anc. city, France, cap. dep. Eure, 57 m . W.N. W. Paris, in a fertile valley on the Iton, whieh, branching out, divides the city into three parts. It is well built, but the streets rather narrow. The cathedral is a venerable pile, founded in the 7th century, and in several styles of gothic architecture, richly sculptured both in the exterior and the interior, and with a bold airy spire 256 ft . high. The church and cloisters of the abbey of St. Thaurin, another fine gothic edifice, were founded in the 7 th century. The Tour de l'Horloge is a lofty and handsome clock-tower, built in 1417. The Hotel de Ville was once the palace of the Dukes of Bouillon. Evreux has a town-library of 10,000 volumes, a botanic garden, and a theatre ; an agricultural association, and a literary society. It is the seat of a court of first resort, a prefect, a bishop suffragan of the arehdiocese of Rouen; a chamber and tribunal of commerce, council of prud'hommes, two theological seminaries, a commercial college, and a normal primary head school. Evreux has manufactures of bed-tieking and hosicry, tanneries, bleacheries, dyeworks; corn, tan, oil, fulling, saw, and flatting mills; some limekilns and tilefields; a trade in grain, seeds, and timber; with an inportant fair for horses and cattle. It was sacked by the Normans in 892 ; taken and pillaged, in 1119, by Henry I. of England. The English were finally expelled from it in 1441. Pop. 8137.

EVRON, a tn. France, dep. Mayenne, 17 m . E.N.E. Laval, situated in a swampy locality, but possessing some trade in the produce of its rich district, and in linens and woollens of local manufacture. It contains the buildings of a Benedictine abbey, founded in the 7th century, now occupied by sisters of charity. The conventual church and chapel are remarkable antique edifices. Yop. 2256.

EWANOWI'TZ, or Eywanowitz, a tn. Austrian Moravia, circle of, and 24 m . E.N.E. Brünn, l. bank, Hanua. It contains an old castle, parish church, chapel, and hospital; and has three annual fairs. Pop. 2006.

EWE (St.), par Eng. Cornwall; 6100 ac. Pop. 1468.

EXBOURNE, par. Eng. Devon; 1600 ac . Pop. 593.
EXBURY. par. Eng. Hants; 2600 ac . Pop. 406.
EXCIDEU1L, an anc. tn. France, dep. Dordogne, 20 m . N.E. Périgueux, on the Loue. It has two antique towers, with other remains of former defences, and ruins of a monastery. Marshal Bugeaud was born here in 1784. In the environs are iron mines, furges, potteries, tanncries, \&c. Pop. about 2000 .

EXE, or Ex [Latin, Exa, Icta], a river, England, which rises in Exmoor, co. Somerset, and, after a S. course of about 50 m. , falls into the English Channel at Exmouth, by an estuary, navigable for 8 m . to Topsham. Its chief tributaries

## EXETER

are the Yeo and Clist. The principal places on its banks are Exeter, Bampton, and Tiverton.

EXETER [Latin, Isca, Exonia, Uxcla], a city, co. of itself, seaport, and parl. bor. England, co. Devon, l. bank, Exe, 10 m . N. W. from its outlet in the English Channel, 159 m. W.S.W. London, on a branch of the Great Western Railway; lat. $50^{\circ} 44^{\prime}$ N.; lon. $3^{\circ} 33^{\prime}$ W.; pleasantly situated on the summit and slopes of an acclivity rising from the river, over which, at the W. entrance to the city, is a handsome stone bridge. Two principal streets cross each other at right angles, from which a number of smaller diverge; the latter extremely narrow, and consisting chiefly of old houses. Though still presenting many indicatious of antiquity, the city has been, for several years past, undergoing a process of renovation, and can now boast of as handsome squares, terraces, streets, and houses, all of modern erection, as any other in the kingdom. It is well paved and lighted, amply supplied with water, and kept, on the whole, remarkably clean. The principal object of interest in the city is the cathedral, a noble edifice, of high antiquity. It is crnciform, 408 ft . in length, and consists of a nave, with two side aisles; two short transepts, formed out of two heavy Norman towers, each 130 ft . in height; a choir of the same width as the nave, and 128 ft . in length; 10 chapels or oratories, and a chapterhouse. The W. front is richly decorated, presenting one of the most beautiful façades of any building in the kingdom, perhaps in Europe. The interior is also magnificent. The other architectural antiquities are the remains of the eastle of Rougemont, on a high eminence N. of the city; St. Jolin's Hospital, now appropriated to a free grammar-school, \&c., and the chapels of St. Wynard and St. Anne, and the chapel of the Leper's Hospital. The modern edifices worthy of notice are the theatre, assembly or ball-room, bridewell, jail, sessions'-house, eavalry and artillery barracks, guildhall,
an cye infirmary, a lying-in charity, a humane society for the recovery of the apparently drowned, a stranger's friend society, \&c., besides a number of minor charities. The scientific and literary institutions are-the Devon and Exeter institution for the promotion of science, literature, and the arts, established in 1817 , and containing about 10,000 volumes; the athenæum, a litcrary institution, established in 1835 ; a mechanics' institute, established in 1825 ; a literary and philosoplical society, founded in 1836 , \&c. Woollen goods were formerly manufactured here to a great extent, but the trade is now all bnt extinct, being limited to small quantities of serges. The cotton and shawl manufacture, at one time considerable, has entirely ceased. The principal market-day is Friday, on which is held one of the greatest corn and provision markets of the W. of England. There are markets also on Wednesday and Saturday. Notwithstanding the cessation of the woollen manufactures of the city, the weekly meetings of the woollen manufacturers of Devon are still held here. There are several large breweries and iron foundries in the town, and some tanyards and paper-mills in the vicinity. The principal exports are serges and other woollen goods, paper, and manganese ; imports, general merchandise, timber, coals, chiefly from Newcastle, and limestone. By means of a canal, 5 m . in length, and 15 ft .indepth, vessels of 400 tons can now reach the city. A large floating basin has also been recently formed; extreme length, 917 ft .; width, $110 \frac{1}{2} \mathrm{ft}$. at the entrance, 90 ft ; depth, 18 ft . On December 31, 1850, the vessels registered at the port were 182 ; tonn., 18,358 ;entered coastwise, inwards, in the same year, 910 vessels; tonn., 76,938;-outwards, 613 ; tonn., 38,682. Colonial and foreign, inwards, 184 vessels ; tonn., 7654 ;-outwards, 97 ; tonn., 7654.

Exeter is said to lave been one of the first cities that returned members to the House of Commons. It is, at any

## the guildhall, high street, exeter.

haths, and the new markets. There are 24 churches and Episcopal chapels in the city and suburbs, besides two Independent churches, two Baptist, a Presbyterian, and several other places of worship for Methodists and Unitarians, a Friends' meeting-house, a R. Catholic chapel, and a synagogue. There are 56 daily schools in the city, several of which are endowed; and 13 seminaries devoted to infant training. This enumeration includes a free grammar-school, founded by the citizens in the time of Charles I., in which the sons of freemen are instructed gratuitously. It has sixteen exhibitions to either of the universities of Oxford or Cambridge. The charitable institutions of various kinds are numerous. Of these about 10 are devoted to cducation, of which the principal are St. Mary Arches school, the Devon and Exeter Central school, and the Exeter British school. The charitable institutions comprise the Devon and Exeter hospital for the sick and indigent, opened in 1747 , and containing 200 beds, supported partly by subscription, and partly from income derived from funded property; a dispensary, a well-conducted lunatic asylum, a deaf and dumb institution, a penitentiary for destitute females,
rate, certain that it has done so since the time of Edward I. It is a place of remote antiquity, having been a British scttlement long prior to the invasion of the Romans, by whom it was called Isca Damnoniorum, being spoken of by this name both by Antoninus and Ptolemy. A number of coins, small bronze statues, some tesselated pavements, and other Roman antiquities, have been found in the immediate vicinity of the city, showing that it had been an important lioman station. The number of its religious establishments was at one time so great, that the Saxons called it Monktown. Baldwin, Archbishop of Canterbury, Sir Thomas Bodley, founder of the Bodleian library, and several other persons of note, were natives of the city. The Cecil family derive the titles of Larl and Marquis from Exeter. Pop. (1851), 32,810.

EXETER, several places, U. States, America :-1, A vil. and township, New Hampshire. The village, on a branch of the Piscatagua, 37 m . S.E. by E. Concord, contains a courthouse, jail, three churches, and a well endowed academy. The river is navigable to this place for ships of 500 tons. Pop. of township, 2925.-2, A township, Rhode Island, 24 m. S.W. Providence. Pop. 1776.-3, A township, New York, 77 m . W. Albany. Pop. 1423.-4, A township, Pennsylvania, 129 m. N.N.E. Harrisburg. Pop. 1529.

EXILLES, or Esiglie [Latin, Exilia], a vil. and com. Sardinian states, Picdmont, prov. of, and 7 m . W.S.W. Susa, in the valley of Oulx, l. bank, Dora Riparia, about 3000 ft . above the sea. It contains a fortress, on a lofty rock, and commanding the pass from France to Italy, over Mount Matrona; and a gothic parish chureh; and has manufactures of coarse woollens and nails, two foundries, and two annual fairs. There are several remarkable caverns in the limestone rocks of the vicinity. Pop. 1785.

EXIN, or Keynin, a tn. Prussia, prov. Posen, gov. of, and 24 m . W.S.W. Bromberg, on a gentle height. It cou-
sists of the town proper and a suburb; contains two churches, a synagogue, Carmelite monastery, and hospital ; and has a trade in horsea and cattle, and four annual fairs. Pop. 1900.

EXMINSTER, par. Eng. Devon; 4040 ac. Pop. 1177.
EXMOOR, an extra-parochial liberty, England, W. division of co. Somerset. Area, 19,270 ae. It was formerly a forest, but, with exception of a considerable portion lately taken into cultivation, it is now mostly heath and marsh. It consists of ranges of hills of considerable elevation, and in the time of the Druids was a favourite spot for the celebration of their religious rites. l'op. 163.

EXMOUTI, a small maritime and market tn. England, co. Devon, 10 m . S.S.E. Exeter, E. side of the entrance to the estuary of the Ex, picturesquely situated in an opening of the cliffs which line the shore, and forming one of the handsomest and most fashionable sea-bathing places on the S. coast of Devonshire. In the lower and older parts of the town, the streets are narrow, and the houses irregularly built; but the modern portions are composed mostly of terraces surmounted by good houses, mansions of considerable size, and detached villas. There are numerous pleasant promenades, one of which is tastefully planted with trees, and commands a beautiful view of the opposite shores of the estuary. Below the town is a gradually sloping sandy beach, well adapted for bathing. The shops are numerons and abundantly stocked. The church is a handsome structure in the perpendicular style, having a tower 104 ft . high. The other places of worship are one Independent, and one Wesleyan chapel, also a small chapel belonging to the Plymouth Brethren. There is here a national sehool, attended ( 1850 ) by about 200 children; a mental improvement society, and several charitable societies. A considerable number of the male population are employed in fishing, the estuary abounding with various kinds of fish, while about 300 females are engaged in lace-making. Exmouth is said to have been one of the principal ports of the county in the reign of Edward 1II., although it had subsequently dwindled down to a mere fishing hamlet. It gives the title of Viscount to the Pellew family. The S. Devon, Bristol, and Exeter Railway passes close by the estuary of the Ex, on the opposite or W. side. lop. (1841), 4356; (1851), 5103 .

EXMOUTII GULF, Australia, W. coast, lat. $22^{\circ}$ S., formed by a peninsula about 80 m . long, and terminating with N.W. Cape. It is 30 miles in width at the entrance, and about 65 m . in length.

EXNING, par. Eng. Suffolk; 5710 ac. Pop. 1259.
EXPLORING ISLANDS, S. Pacific Ocean, a group of the Friendly lslands; lat. $17^{\circ} 10^{\prime} \mathrm{S} . ;$ lon. $178^{\circ} 38^{\prime} \mathrm{W}$. They are well situated for the resort of vessels; anchorages safe and easily reached; fruit and vegetables abundant.

EX'TON, three pars.Eng.:-1,Rutland; 4860 ac. P. 881.2, Somerset; 3870 ac. P. 380.-3, Hants; 2210 ac. P. 282.

EXUMA (Great and Little), two isls. W. Indies, in the Bahana group ; the former in lat. $23^{\circ} 33^{\prime} \mathrm{N}$. ; lon. $75^{\circ} 48^{\prime}$ W. (R.) It is about 28 m . long by 3 broad, and possesses one of the finest harbours in these islands. Sce Bahima Islands.

EYAM, a vil. and par. England, co. Derby. The vilifage, $10 \frac{1}{2} \mathrm{~m}$. S.W. Sheffield, contains a picturesque parish church, a Methodist chapel, and an endowed school. In 1665 and 1666, this place was visited by the plague, which carried off four fifths of its inhabitants. By the advice and example of Rev. Wm. Mompesson, rector of the parish, the people carefully confined themselves within the district, lest they should communicate the infection to others. Area, 5030 ac. P. 1426.

EYBAR, a tn. Spain, prov. Guipuzcoa, 18 m . N.E. Vittoria, in a valley. It is tolerably well built, and possesses a parish chureh, townhouse, prison, cemetery, convent, and two schools. Fire arms, and cutlery are extensively manufactured, and some trade is carried on in wine, grain, and fruits. lop. 4000.

EYBAU, or Eibau (alt), a vil. Saxony, circle, Bautzen, 10 m. N.W. Zittau. It has a fine chureh, three schools, a celebrated brewery, several factories, mills, \&c., and a good trade. Pop. 4320.

EYDON, par. Eng. Northampton; 1620 ac. Pop. 647.
EYE, a bor. market tn. and par. England, co. Suffolk. The town, in a well watcred and fertile valley, 19 m . N. Ipswich, is irregularly built ; streets narrow. It has a large and commodions church, with a handsome square tower; Baptist

Vol. I.
and Methodist chapels, a townhall, and jail ; two daily schools, a house of industry, with alinshouses for poor widows, or aged unmarried women. It has no manufactures beyond a little lace-making by the poorer classes of females, the inhabitants being chiefly employed in agriculture. It is a borough by prescription, and sends a member to the House of Commons. Registered electors ( 1850 ), 351. Its earliest charter was granted in the reign of King Jolin. Area of par., 2370 ac. 1'op. (1841), 2493.

EYE, two pars. Eng. :-1, Hereford; 4530 ac. Pop. 739. -2, Northampton; 2670 ac. Pop. 1359.
EYE, an isl. Indian Arehipelago, the outermost island bounding the E. side of the N. entrance of Gillolo Passage; lat. $0^{\circ} 23^{\prime} \mathrm{N} . ;$ lon. $129^{\circ} 53^{\prime} \mathrm{E}$. It is small, low, and covered with trees.

EYEMOU'TH, a market tn. par. and seaport, Scotland, Berwickshire, in the bay at the mouth of the Eye, a small stream which here falls into the N. Sea, 41 m . E. by S. Edinburgh ; lat. $55^{\circ} 53^{\prime} \mathrm{N}$. ; lon. $2^{\circ} 5^{\prime} \mathrm{W}$. It is well supplied with water, lighted with gas, and has altogether a respectable appearance. It has Established, Free, and U. Presbyterian churches; a Methodist chapel, five sehools, a reading club, and library. The harbour, with 10 ft . at neap, and 16 ft . at spring tide, being near the mouth of the Firth of Forth, and easily accessible, is much frequented by vessels detained by contrary winds. Timber, bones and rags, coals, slates, bricks, tiles, stones, and merehant goods, are imported; and grain, oatmeal, flour, malt, and spirits, exported. Cod and haddock fishing is carried on, and large quantities of the latter, cured and slightly smoked, are sent out; the herring fishing has greatly fallen off. A weekly grain market on Tuesday; two fairs annually. Area of par., $1 \frac{1}{2}$ sq. m. Pop. (1851), 1478. -(Local Correspondent.)

EYEO, or Katunga, a tn. N.W. Africa, kingdom, Yarriba, near r. bank, Niger; lat. $9^{\circ} \mathrm{N} . ;$ lon. $6^{\circ} 15^{\prime} \mathrm{E}$. It is surrounded by walls said to be 15 m . in circuit, built of clay, 20 ft . high, and having 10 gates. Its markets are abundantly supplied with all sorts of provisions.

EYFORD, par. Eng. Gloucester; 1380 ac. Pop. 83.
EYGUIERES [anc. Aquaria], a tn. France, dep. Bouches-du-Rhône, 20 m . E. Tarascon. It consists of old, well-built houses; and has a manufacture of coarse woollens, with some trade in olives, wine, silk, wool, madder, \&c. In the environs are stone and lime quarries, and silkworms are reared. Pop. 2660.

EYKE, par. Eng. Suffolk; 2970 ac. Pop. 502.
EYLAUU, a tn. Prussia. See Eilau.
EYMOUTIERS, a tn. France, dep. Haute-Vienne, 24 m. E.S.E. Linoges, in a rugged valley, l. bank, Vienne. It has a communal college, and a fine gothic church, of early date; manufactures of cotton yarn, boulting cloths, wax, \&e., and several tanneries; with a trate in wax, leather, \&c. Pop. 1842.

EYNE, a com. Belgium, prov. E. Flanders, 12 m . S.s.W. Ghent, with manufactures of linens and cottons, two breweries, two distilleries, two flour-mills, and a well-frequented market. Pop. 2463.

EYNESBURY, par. Eng. Huntingdon; 1750 ac. P. 1003.
EYNESFORD, par. Eng. Kent; 3640 ac. 1'op. 1313.
EYRAGUES, a vil. France, dep. Bouches-du-Rhône, near Arles, in a fertile plain, on the Réal. It is begirt with walls, raised during the wars of religion; and is well built, having several good streets. It likewise has some trade in raw silk and good white wine, both produced in the district. Pop. 1844.

EYRE CREEK, the channel of a stream in Central Australia, between lat. $25^{\circ}$ and $26^{\circ} \mathrm{S} .$, and lon. $138^{\circ}$ and $139^{\circ}$ E., traversing a flat flanked by high red-sand hills, and containing abundance of water and grass. Capt. Sturt traced this creck for 60 m ., when penetrating into the interior of Australia in 1845.

EYRECOURT, a market tn . Ireland, co. of, and 39 m E. by S. Galway, with a parish chureh, R. Catholic chapel, two schools, and a dispensary. Market, Tuesday and Saturday; several fairs annually. Pop. 1419.

EYSDEN, a vil. Holland, prov. Limburg, 6 m . S. Maastricht, in the midst of good meadow land, and in a fins butter country. It has many good houses, and a church, used both by the Protestants and R. Catholies in the greatest harmony; a small synagogue, and a well-attended achool. Pop. 930.

## FAHLIYAN

EYTHORN, par. Eng. Kent; 1430 ac. Pop. 423.
EYTON, two pars. Eng.:-1, Hereford; 850 ac. P. 149. -2, (upon the will moors), Salop; 1420 ac. Pop. 389.

EyWANOWITZ, a tn. Moravia. See Ewanowitz.
EYWORTH, par. Eng. Bedford; 1370 ac. Pop. 128.
EZCARAY, a tn. Spain, Old Castile, prov. of, and 26 m . W.S.W. Logroño, l. bank, Oja. It is well built, and contains
a church, three chapels, Latin, and two primary schools, 3 townhall, prison, hospital, and a storehouse. Manufactures:woollen fabrics, pottery-ware, bricks, tiles, and soap. Trade:grain, wine, oil, cochineal, wool, and cattle. Iron, copper, lead, silver, gold, and coal are found in this district, but the quantity is insufficient to defray the expenses of mining. Pop. 3084.

FAABORG, a market tn. Denmark, isl. Funen, on a bay or fjord of the Little Belt, 22 m . S.W. Odense ; lat. $55^{\circ} 5^{\prime} 37^{\prime \prime}$ N .; lon. $10^{\circ} 14^{\prime} 43^{\prime \prime} \mathrm{E}$. (L.) It has a busy export trade, chiefly in grain; and it has regular communication with Kiel and the adjoining ports. It was founded in the 12th century. Pop. 2200.

FABARA, a tn. Spain, Aragon, prov. of, and 68 m . S.E. Saragossa, r. bank, Matoranna ; with a church, hermitage, two schools, and a prison; and in the neighbourhood are the ruins of a castle, once belonging to the Templars. Industry:agriculture, linen weaving, and flour and oil mills. Pop. 1370.

FABIANHAZA, a vil. Hungary, Thither Theiss, co. Szathmar, on the Szamos, about 4 m . from Vallaj. It contains a Greek church. Pop. 1130.

FABIUS, a river, U. States, Iowa and Missouri, which falls into the Mississippi, 100 m. N. by E. Jefferson, after a S.E. course of about 100 m .

FABRIANO, a city, Papal States, 36 m . W.S.W. Ancona, at the foot of the Apennines, with a cathedral, several convents, and manufactures of felt-cloth, paper, parclment, and glue. Pop. 8500.

FABRICA, a vil. and com. Sardinian States, prov. of, and 12 m. S.E. Tortona, r. bank, Curone. It contains an ancient parish, and several minor churches; and has a trade in corn, millet, and rice, which are grown in the district. Pop. 2150.

FABRIZIA, a tu. Naples, prov. Calabria-Ultra II., 16 m . S.E. Monteleone, and near the E. slope of the Apennines. It suffered greatly by the earthquake of 1783. Pop. 2941.

FACCOMBE, par. Eng. Hants; 3170 ac. Pop. 276.
FACHES, a vil. France, dep. Nord, 4 m . from Lille. It has manufactures of beet-root sugar. Pop. 1257.

FACHINGEN, a vil. Nassau, dist. of, and so close to, as to be properly a suburb of Diez, l. bank, Lahn. It contains a parish church, and has a celebrated mineral spring. The water resembles that of Seltzer, and is annually exported to the extent of half a million of bottles. It is of great efficacy, particularly in bilious complaints.

FACONE, a lake, Japan, isl. Niphon, 57 m . W.S.W. Yedo. It is $9 \frac{1}{2} \mathrm{~m}$. long, by $4 \frac{1}{2}$ broad, and gives rise to a small river of same name, which falls into the Gulf of Yedo. The Japanese attach peculiar sanctity to this lake.

FACSET, two places, Hungary:-1, (Nemet), a market tn . Thither Theiss, co. Krasso, on the Bega, 50 m. E.N.E. Temesvar. It contains a R. Catholic church, and a castle in ruins. Pop. 680.-2, (Ola), a market vil. nearly contiguous to Nemet Facsct. It contains a parish church. Pop. 1190.

FACTORY ISLAND, one of the Isles de Los, W. coast, Africa ; lat. $9^{\circ} 25^{\prime} \mathrm{N}$. ; lon. $13^{\circ} 45^{\prime} \mathrm{W}$. There is a small factory on the island, which keeps up a communication with the main, the natives thus procuring English goods for rice, wax, hides, a little ivory, bullocks, goats, fowls, and various kinds of vegetable products. Factory Island is well cleared of its woods; like all the others of the group, it is of volcanic origin, being formed chiefly of hard blue and iron-coloured lava, with occasional masses of porphyritic hornstone, at different elevations. Of the vegetable productions the most remarkable are the palms, which furnish palm oil and wine, and the silk cotton tree. The natives belong to the tribe named Baccas or Barkas, who also occupy other islands along the coast.

FADD, a vil. Hungary, Thither Danube, and about 2 m . from Tolna, on the Danube. It contains a Protestant and a R. Catholic church. Pop. 3831.

FAEDIS, a vil. and par. Austrian Italy, gov. Venice, prov. Friuli, 1. bank, Grivo, 7 m . N.E. Udine. It is the seat of a court of law, and several public offices; contains a parish and three auxiliary churches, and has numerous mills. Pop. 2839.

FAEMUND, a lake, Norway, prov. Aggerhuus, bail. Hedemark, a little W. of the Swedish frontier. It forms a long, narrow, and irregular expanse of water, stretching N . to S . about 42 m ., and not averaging above 3 m . in breadth. It is fed by the outlets of a number of small lakes, and discharges itself at its S.W. extremity by a stream of its own name, which, uniting with others, forms the Klar.

FAENZA [anc. Faventia], a tn. Papal States, deleg. of, and 19 m . S.W. Ravenna, on the Lamone. It is well built, in the form of a square, divided by four principal streets, which meet in the Piazza Publica in the centre, a spacious area, surrounded by arcades, and containing the townhall, cathedral, a lofty tower, and in the centre some beautiful fountains. It is surrounded with walls, contains a number of churches and convents, several of which contain valuable paintings. Among the more remarkable public buildings are some of the private palaces, the hospital, and lunatic asylum, and a Corinthian church, belonging to the Dominicans. The cathedral, which is in the gothic style, is an indifferent building. Facnza has been long celebrated for its earthenware, and is supposed to have been the first Italian city in which the manufacture of that article was introduced. It still flourishes there, although now surpassed by other places. Spinning and weaving silk are also carried on to a considerable extent; and in the vicinity of the town there is a large papermill. Faenza is connected with the Adriatic by the Zanelli Canal, which was opened in 1782 . Within 4 m . of the town are feriuginous and saline springs and baths, both held in high repute. In 1376 it was sacked, and 4000 of its inhabitants were put to death, by Sir John Hawkwood, an Englishman in the service of Gregory XI. It is the birthplace of Torricelli, the inventor of the barometer. Pop. 19,752.

FAERDER, an isl. in the N. of the Skager Rack, on the S.E. coast of Norway, at the entrance of the bay of Christiania. A lighthouse has been erected upon it.

FAGAGNA, a vil. and par. Austrian Italy, gov. Venice, prov. Friuli, 8 m . W.N.W. Udine. It stands partly on a height, and partly on low ground; contains a parish, and six auxiliary churches, and the remains of an old castle; and has several mills.

FAGAN'S (St.), par. Wales, Glamorgan. Pop. 424.
FAGNANO, or FAgnano-Olona, a vil. Austrian Italy, prov. of, and 20 m . N.W. Milan, r. bank, Olona, here crossed by a stone bridge. It is well built, on the side of a hill, clothed with fine trees, and surmounted by a castle, once strongly fortificd, now converted into a country seat of the Viscount of Fagnano; and contains a handsome modern church, with a lofty tower. Manufactures:--silk and bombazne. Pop. 2571.

FAHAN, two pars. Irel. Donegal :-1, (Lower), 24,783 ac. Pop. 5823.-2, (Upper), 10,040 ac. Pop. 2949.

FAHLIYAN, a small tri. Persia, prov. Farsistan, 42 m . N. Kazerun, enclosed by walls now in ruins. It was formerly a place of more note than now, having had at one time 5000 inhabitants, a mosque, and four public baths. It is surrounded by fine palm trees, and has a fort in ruins on the summit of a small hill. The town is supplied with water from a distance of 14 m . by a canal cut through the hills.

Fahlun, Sweden. See Falun.
FAHRAFELD, a vil. Lower Austria, on the Triesting, 20 m. S.W. Vienna. It has manufactures of brassware and uirrors, a rolling and an extensive cotton-mill. Pop. 700.

FAHRWASSER (New), port of Danzig (which see).
FAHY, par. Irel. Galway; 3824 ac. Pop. 998.
FAIDO, a vil. and par. Switzerland, can. Tessin, l. bank, Tessin, in the Val Levantina, 16 m. N.N. W. Bellinzona. It stands in a district remarkable for softer beauties than is common in Swiss scenery, and contains a church and a Capuehin monastery. Pop. 597.

FAIFO, a tu. and port Anam, prov. Quang. nan, on a river, 11 m . from its embouchure, in the China Sea, and 20 m . S. by E. Turon, with which it communieates by a canal; lat. $15^{\circ} 45^{\prime} \mathrm{N} . ;$ lon. $108^{\circ} 1^{\prime} \mathrm{E}$. It has several Bhuddist temples, and is inhabited chiefly by Chinese. It was formerly the mart of most of the N. provinces of Cochin-China, but was ruined by the wars which desolated the country towards the end of last century. Its trade has again begun to revive. Principal exports:-cinnamon and sugar. Pop. about 15,000.

FAIR ISLE, an isl. North Sea, lying between Orkney and Shetland, but considered as belonging to the latter, 25 m . S. by W. Sumburg-head; lat. $59^{\circ} 33^{\prime} \mathrm{N}$.; lon. $1^{\circ} 38^{\prime} \mathrm{W}$. (к.) It is about 3 m . long, by nearly 2 broad, and is inaccessible, except upon the S.E., where it affords a safe harbour for small craft. The flag ship of the Duke of Medina Sidonia, admiral of the Spanish Armada, was wrecked here in 1588. lop. 232.

FAIRFIELD, par. Eng. Kent; 1290 ac. Pop. 68.
FAIRFIELD, a vil. England, co. Lancaster, $3 \frac{1}{2} \mathrm{~m}$. E.S.E. Manchester, containing a Moravian establishment. The inhabitants are chiefly employed in cotton manufactures.

FAIRFORD, a market town and par. England, co. Gloucester, the former situated on a gentle deelivity, on the Colne, 4 m . above its confluence with the Thames, $20 \frac{1}{2} \mathrm{~m}$. E.S.E. Gloueester. It consists of substantially-built stone houses, and has a spacious and elegant gothic chureh of the 16 th century, with a tower, and magnificent stained-glass windows; ehapels for Independents, Baptists, and R. Catholies; a free school, and mechanics' institution. No manufactures, and traffic much reduced by the opening of the Great Western Railway; weekly market, Thursday, greatly deelined; two annual fairs for horses, cattle, and sheep. Area of par. 4220 ac. Pop. 1672.-(Local Correspondent.)

FAIRHAVEN.-1, A bay, N.W. coast, Spitzbergen; lat. $79^{\circ} 50^{\prime} \mathrm{N}$. ; lon. $10^{\circ} \mathrm{E}-2, \mathrm{~A}$ small seaport, U. States, Massachusetts, in Buzzard's Bay, about lat. $41^{\circ} 35^{\prime} \mathrm{N}$; lon. $70^{\circ} 40^{\prime} \mathrm{W}$. It contains three churches, and has a considerable shipping, much of which is employed in the whale fishery. Pop. 3951.

FAIRILEAD, a remarkable promontory, N.E. eoast, Ireland, co. Antrim, $3 \frac{1}{2} \mathrm{~m}$. N.E. Ballycastle; lat. $55^{\circ} 13^{\prime} 18^{\prime \prime}$ N.; lon. $6^{\circ} 8^{\prime} 42^{\prime \prime} \mathrm{W}$. (r.) See Antrim.

FAIRLEY, a maritime vil. Seotland, co. Ayr, Firth of Clyde, 3 m . S. Largs. It has the remains of an old castle, and is much resorted to for sea-bathing. Pop. 521.

FAIRLIGHT, a par. England, Sussex; 2230 ac. Pop. 631.

FAIRSTED, par. Eng. Essex ; 1590 ac. Pop. 306.

FAIRWEATHER.-1,A cape, E. coast, Patagonia ; lat. $51^{\circ} 32^{\prime} 1^{\prime \prime} \mathrm{S}$.; lon. $68^{\circ} 55^{\prime} 5^{\prime \prime}$ W.; forming the N . entrance to the river Gallegos. The cliffs are from 300 to 400 ft . high, and are composed of soft elay, horizontally stratified, the strata rumning for many miles withont interruption. The country inland is formed by open undulating plains, covered with grass plants, but entirely destitute of trees: guanacoes and fresh water are abundant.-2, A cape, Russian America, New Norfolk; lat. $58^{\circ} 51^{\prime}$ N.; lon. $137^{\circ} 50^{\prime}$ W. (r.)

FAITH (St.), two pars. Eng.:-1, (the Viryiu), Middlesex. Pop. 781.-2, ILants; 2250 ac. Pop. 430.

FAITIILEGG, par. Irel. Waterford; 1494 ac. Pop. 786.
Faizabad, or Fyzabad. Sce Buduksilan.

THE CASTLE OF FALAISE, from the North, -From Cornan's Antiquitues of Nuruandy.

FAJEMMIA, atn. Africa, Senegambia, state, Konkodoo, 1. bank of one of the head streams of the Seucgambia, 60 m . S.E. Bambouk; lat. $12^{\circ} 50^{\prime} \mathrm{N}$.; lon. $10^{\circ} 35^{\prime}$ W.

FAKENHAM (Lancaster), a market t . and par. England, co. Norfolk. The town, $23 \mathrm{~m} . \mathrm{N}$. W. Norwich, on an acelivity on the Wensum, has three priucipal, straight, well-kept streets, is well supplied with water, and lighted with gas, and has a handsome church, with an embattled tower 108 ft . high; ehapels for Baptists, Independents, and Primitive and Wesleyan Methodists; three publie and two private schools, a subseription library, and several benevolent and charitable institutions. There is an extensive flour-mill on the Wensum, which is here spanned by a handsome bridge of three arches. Corn and cattle market, Thursday; two fairs annually. Area of par. 2360 ac. Pop. (1851), 2245.(Local Correspondent.)

FAKENHAM (Magna), par. Eng. Suffolk; 1660 ac. Pop. 213.

FAL, a river, England, co. Cornwall, which rises uear the centre of the county, and after a course, first S. and then S.W., of about 25 m ., falls into the estuary which forms Falmouth harbour.

FALA and Soutra, a par. Scotland, eos. Ediuburgh and IIaddington; 5 m . by $3 \frac{1}{2}$. Pop. 393.

FALABA, a considerable tn . of W. Africa, about 210 m . N.E. Sierra Leone, dist. Sulimana; lat. $9^{\circ} 45^{\prime} \mathrm{N}$. ; lon. $10^{\circ} 25^{\prime}$ W., at the base of the mountain Konkodoogor, and on the river Falaba or Fala, from which it derives its name. It stands on a gently rising eminence in the centre of a large plain, is of an oblong form, about $1 \frac{1}{2} \mathrm{~m}$. long by 1 m . in breadth, and contains about 4000 circular houses or huts, which, though built of clay, and covered with pyramidical roofs of thatch, are extremely neat and clean, and, in many instances, even elegant. The palaver or courthouse stands on an open piece of ground towards the S . extremity of the town, and is a place of recreation as well as business. In the centre of the town another large space is left vacant for the purposes of exercise, of receiving strangers, and of holding great meetings. Falaba is more closely built than African towns generally are, and is surrounded by a strong thick stockading of hard-wood, which is again encompassed by a diteh, 20 ft . deep by as many broad.-(Laing's Trarcls in W. Africa.)

FALAISE [ane. Falcria], a tn. France, dep. Calvados, on an clevated but broken flat, bordering on a rocky preci pice or falaise, whence its name, 23 m . S.S.E. Caen. It consists of three distinct parts-the town proper, almost con pletely surrounded by old walls; the suburbs of St. Laurent and Val d'Ante, extending into the narrow ravine below the
the appearance of the town as a whole dull and lifcless. The churches of St. Laurent, St. Gervais, and St. Guibray, the townhouse, general hospital, Hotel-Dieu, and public library, are deserving of notice, but the great object of attraction is the castle, the ancient seat of the Dukes of Normandy, and the birthplace of William the Conqueror. It occupies a commanding position, on a promontory connected with the plateau on which the town is built on one side only, and isolated on the others by steep ravines, and before the invention of gunpowder was a place of great strength. It is now only a grand and picturesque ruin. It covers nearly 4 ac ., and is surrounded by ramparts, varying in height according to the nature of the ground, from 16 ft . to 50 ft . Immediately within the court and somewhat incongruously, the communal college has been erected; beyond, a grassy terrace along the ramparts leads to the donjon-keep, a large rectangular tower, rising abruptly from the surrounding precipices, and propped by high and massy buttresses. A small stone chamber within this tower is pointed out as William's birthplace. Beside this tower is another of loftier elevation and more architectural merit; it is round and smooth, and terminates with a machicolated rim. It bears the name of Talbot's Tower, and is said to have been built by the English after the capture of Falaise, by Henry V. A colossal bronze equestrian statue of the Conqueror, by Louis Rochet, was inaugurated here, October 20, 1851. The manufactures of the town consist of cotton hosiery, lace, cotton goods, leather, and paper, and there are numerous cotton-mills, dyeworks, and bleachfields. The trade consists of the above articles of manufacture, and of wool, horses, and cattle, and is chiefly carried on at the fairs, which are six in number. One of them, called the fair of Guibray, from being held within that suburb, lasts 15 days, was at one time celebrated throughout Europe, and though greatly fallen off, still does business to the extent of about $£ 600,000$. Falaise is the seat of a court of first resort and commerce. According to the Normandy Chronicle, it had risen to be a place of some importance at the commencement of the 11th centnry. Pop. 8621.

FALASHAS, a people of Abyssinia, who adhered to the Jewish religion when the rest of the kingdom embraced Christianity. They are found in all parts of Abyssinia, but chiefly on the banks of the Bahr-el-abiad. The Falashas do not permit any one to enter their houses, or to touch them or their clothes. In case of the former law being infringed, they desert the house; and in the case of the latter, they wash their whole persons and clothes in running water, on which account their residences are always in the vicinity of some stream. They are mostly weavers, a few are smiths, and the women potters.

FALCES, a tn. Spain, prov. Navarre, 25 m. S. by. W. Pampeluna, near r. bank, Arga, crossed here by a stone bridge. It is situated on a declivity crowned by an ancient castle, is tolerably well built, and comprises a parish church, chapel, townhouse, prison, school, hospital, and storehouse. Oil is manufactured here in large quantities. Trade:-in grain, flax, hemp, cattle, and fruits. Pop. 2500.

FALCON, a cape, forming the most S. point of the island of Iviça, one of the Balearic Islands. It projects far into the sea, and is lofty, but lowers gradually towards its extremity. Off it are three small rocky islands. Cape Falcon on the W., and Portas Point on the E., enclose the deep bay of Cueva Larga, within which there is a wharf, and some cisterns of good water.

FALCONARA, a tn. Naples, prov. Calabria Citra, 6 m. S.S.E. Paola; near the sea. Pop. 1600.

FALDINGWORTH, par. Eng. Lincoln; 1820ac. P. 350.
FALEMEH, or Faleme, a river, W. Africa, Senegambia, the principal tributary of the Senegal, into which it falls, 10 m . above Bakel ; lat. $14^{\circ} 48^{\prime}$ N.; lon. $12^{\circ} 8^{\prime}$ W., after a devious course of about 560 m . It has many tributaries, the chief of which is the Sanou-kolez, which reaches it on the right bank. Much of its lower course is navigable for vessels of small draught; and it is 400 ft . broad at its embouchure. The banks are very irregular ; sometimes rocky and scarped, at others so low as to be periodically submerged, the waters forming a kind of natural canals called marigots; usually abounding in fish. Gold is found in the sands of the Falemel ; the richest spots lying between Tamboura, 13 m . below Sansandig (lat. $13^{\circ} 44^{\prime} \mathrm{N}$. ) and Lahandy, about 40 m . higher
than the latter place. M. Raffenel strongly advocates the navigation of this river, for trading purposes, by means of flat-bottomed steamers; and gives the following as the lowest depths of water, taken from his own experience:-From the embouchure to Senou-Debou, June 15 till October 20, 5 ft .; at other times, 10 to 12 ft . At any time, never less than 4 ft . for 100 m . above the mouth. Between Senou-Debou and Debou (which see), there is, indeed, a bar, but it is easily surmounted. Little of the upper course has hitherto been explored - (Voyage dans l'Afrique Occidentale, en 1843-4, par A. Raffenel.)

FALKENAU, a tn. Bohemia, circle, Elbogen, r. bank, Eger, 80 m . W. Prague. It contains a parish, and several other churches, a Capuchin monastery, hospital, and a large castle, surrounded by a deep moat, entered by three bridges, and with a fine park and garden; and has alum works. Hops are extensively grown, and coal is worked in the neighbourhood. Pop. 1900.

FALKENBERG.-1, A tn . Prussia, gov. of, and 16 m . W. Oppeln, cap. circle, of same name, 1. bank, Steine, in the midst of marshes. It is surrounded with walls, is the seat of a law court, and several public offices, contains a parish church, two chapels, townhouse, courthouse, two hospitals, a castle, once the residence of princes of that name; and has tile-works, two distilleries, and a weekly market. Pop. 1559.-The chrcle, area, 177 geo. sq. m., is flat, well watered, well wooded, and tolerably fertile. Pop. 35,052.2, A seaport tn . Sweden, län of, and 20 m. N.W. Halmstad, r. bank, Athra, at its mouth in the Kattegat. It is an old and unimportant place, and has a small harbour almost silted up , at which a little trade is carried on. The salmon fishing, however, is considerable. In the neighbourhood are the ruins of an old castle, supposed to have been destroyed in the 14th century. Pop. 819.

FALKENBURG, a tn . Prussia, gov. of, and 46 m . S.S.W. Koslin, on a gentle height above 1. bank, Drage. It is surrounded with dilapidated walls with three gates, and defended by a fort, contains a church, castle, and hospital, and has manufactures of woollen and linen cloth, a brewery and a distillery, a trade in horses and cattle, and six annual fairs. Pop. 2560.

Falkenhain (Nieder, Mittel, and Ober), a vil. Prussia, gov. of, and 18 m . S.W. Liegnitz. It contains a castle, a Protestant, and R. Catholic church, and has two mills. Pop. 1431.

FALKENHAM, par. Eng. Suffolk; 1550 ac. Pop. 290.
FALKENSTEIN.-1, A tn. Saxony, circle, Zwickau, bail. of, and 10 m . E.S.E. Plauen, on a height above the White Golsch. It contains a large old church with a tower, and has manufactures of cotton, embroidery, and sounding boards, a trade in cattle, and three annual fairs. A great deal of iron and tin used to be smelted here, but the mines are almost abandoned. Pop. 3372.-2, A market tn. Lower Austria, in a beautiful valley at the foot of the Schlossberg, 38 m . N.N.E. Vienna. It is irregularly built, contains an old gothic church with a crypt, an old castle, on a height above the church, and an hospital. It is surrounded by vineyards, in which the celebrated Falkenstein wine is produced. Pop. 941.

FALKINGHAM, par. Eng. Lincoln; 1700ac. Pop. 820.
FALKIRK, a market tn., parl. bor., and par. Scotland, co. Stirling. The town, $21 \frac{1}{2} \mathrm{~m}$. W. by N. Edinburgh, is situated on a gentle eminence in a beautiful and fertile country, and is a station on the Edinburgh and Glasgow railway. It consists of one long, and somewhat irregular street, about $\frac{3}{4} \mathrm{~m}$. in length, lying E. and W., with a number of narrow streets and lanes branching off to the N. and S. Many of the houses, though having little outward pretension, are good substantial buildings; and large and well-stocked shops are numerous. It is lighted with gas, and supplied with water. The only public edifices of note are the parish church, the office of the Commercial Bank, and a handsome spire, 140 ft . in height. It has a Free, and three U. Presbyterian churches, and several other Dissenting chapels; a number of wellconducted, and well-attended schools; several public libraries, and religious and benevolent societies; with an agricultural and horticultural association. A school of arts was established in 1827, in which weekly lectures are delivered during the winter season; and there are two public reading-rooms. The only manufactures of the town are leather, shoes, brushes,

## FALKLAND

and cooper-work. There are also a brewery, and the usual artizanships of a country town. In the vicinity are quarries, collieries, brick and tile-works; a saw-mill, corn-mills, and two pyroligneous acid works. There is, likewise, a large foundry, called the Falkirk Iron Works, at Bainsford, a suburb of the town; and about $2 \mathrm{~m} . \mathrm{N}$. are the celebrated Carron Iron Works. The trysts of Falkirk are the greatest cattle fairs in Scotland. They are held on a dry sandy level moor or heath, in the adjoining parish of Larbert, about 2 or $2 \frac{1}{2} \mathrm{~m}$. N. from Falkirk, on the 2 d Tuesday of August, September, and October. At the first tryst there are generally about 4000 head of black cattle present, and about 400 horscs and ponies; at each of the second and third trysts there are present about 17,000 black cattle, 20,000 sheep, and 700 horses and ponies. The larger portion of these cattle are bought up for the English market. The government of the burgh is vested in a provost, three baillies, a treasurer, and seven councillors. Falkirk is of great antiquity, and is associated with many interesting and remarkable historical events. Being near the boundary that separated the Romans and Caledonians, it was the seene of many sanguinary conflicts between them. In one of these, fought in 415, a commander of the latter, Robert Graham, was slain, from which event, it is supposed, the wall of Antoninus, which passed near the town, obtained the name of Graham's Dike, which it still bears. In July, 1298, a battle was fought a little N. of the town, on the spot where the village of Grahamstown now stands, between the forces of Edward I., and those of Sir William Wallace, in which the latter was defeated. In this battle, Sir John Graham, and Sir John Stewart, commanders in the Scottisharmy, and noted warriors of the day, were slain, and both interred in the church-
 yard, where their grave-stones are still to be seen. About 1 m . S.W. from the town, a battle was fought on Jannary 17, 1746, between the Highlanders under Prince Charles, and the royal forces under General IIawley, in which the former were victorious.

Falkirk unites with the burghs of Linlithgow, Lanark, ILamilton, and Airdrie, in returning a member to the IIouse of Commons. The Union Canal, and the Clyde and Forth Canal, pass within $\frac{1}{2} \mathrm{~m}$. of the town. Pop. (1841), 8209 ; (1851), 8769 . Area of par. 9 m . by 5 m . Pop. (1851), 16,303.

FALKLAND, an anc. bor. of regality and par. Scotland, co. Fife. The town, 21 m . N. Edinburgh, lies at the foot of the E. Lomond Hill, which rises so abruptly over it as to ex clude the rays of the sun for many weeks together during winter. The town consists principally of a single street; many of the houses thatched, and of an antique appearance. It has an Established, a Frec, and an Independent ehurch. Falkland was long a favourite residence of the Scottish kings; and has, in consequence, obtained a prominent place in Scottish history. The only object of interest, however, which it now possesses, is its ancient palace, begun, it has been supposed, by James II., and completed by James V., who died here in 1542. Falkland ceased to be a royal residence on the accession of James V1. to the English throne; but was visited, subsequently, by both Charles I. and II. There was formerly an ancient castle here also, in which David, Duke of Rothesay, eldest son of Robert III., was imprisoned, and starved to death, by order of his uncle, the Duke of Albany; but no trace of it now remains. Iland-loom weaving is earricd on principally for the manufacturers in the ncighbouring towns of Newburgh, Kettle, and Kirkaldy. Seven markets, for horses and eattle, annually. Falkland was erected into a royal burgh by James II., in 1458. It gives the title of Viscount to the English family of Carey. Pop.
of burgh (1841), 1313. Area of par., 6 m. by 4 m . Pop. (1851), 3103.

FALKLAND ISLANDS [French, Malouines; Spanish, Malvinas]; an island group, S. Atlantic Ocean, belonging to Great Britain, consisting altogether of about 200 islands, large and small, 250 m. N.E. Tierra del Fuego, between lat. $51^{\circ}$ and $53^{\circ} \mathrm{S}$., and lon. $57^{\circ}$ and $62^{\circ} \mathrm{W}$. Only two of these islands are of any considerable size; these are callcd, respectively, East and West Falkland, separated from each other by a sound (see Falkland Sound), varying in breadth from $2 \frac{1}{2}$ to 18 m . East Falkland is about 85 m . in length, and about 53 in breadth; area, $3000 \mathrm{sq} . \mathrm{m}$. West Falkland, 80 m . long by about 40 broad; area, 2000 sq . m. The other islands vary from 16 m . in length by 8 broad, to mere islets of half a mile diameter. The whole group is indented in a remarkable manner by bays, harbours, and sounds; two of the latter, Choiseul and Grantham, penetrating so deeply inte either side
of East Falkland as nearly to divide that island into two parts, the intervening isthmus being little more than 2 m . broad. On the W. coast of West Falkland the indentations are at once so spacious and numerous as to reduce the intervening land to a series of narrow peninsulas. These arms of the sea form excellent harbours, and, together with the varied outline of the mountains, constitute the principal relief to the general aspect of the scenery.
The general appearanee of the islands is by no means attractive. Ridges of rocky hills, about 1000 ft . in height, are seen traversing extensive tracts of sombre-looking moorland, unenlivened by a tree, and limited, seaward, by a low rocky coast, on which the surf beats with great violence. On the N. part of East Falkland the hills attain a considerable elevation, but the whole of the S. portion is so low that it cannot be seen from the deck of a vessel 5 m . distant. The principal range of hills are the Wickham Ileights, stretching E. to W., and rising to a height of from 1400 to 2200 ft . The average height of the western island is greater than that of the eastern, althongh the lighest hills are in the latter. The more elevated parts of East Falkland are quartz rock; clay-slate prevails in the intermediate districts. Sandstone, on whieh are beautifully perfect impressions of shells, occurs in beds, within the slate formation, and upon the slate is a stratum of clay, fit for making bricks. A peculiar feature in the geology of these islands is presented in streams of stones, which appear to flow down the sides of the hills. These streams are 20 or 30 ft . wide, spreading out in some places to cven a quarter of a mile in width. The stones are of various sizes, from 1 to 4 or five ft. cube. Scarcely any view can be more dismal than that from the heights; moorland and black bog extend as far as eye can discern, intersceted by innumerable stregms, and pools of yellowish brown water. The soil of the islands. so
far as has been explored, is generally peat, although much of what seems to be a barren moor, is solid sandy clay, covered by a thin layer of vegetable mould, on which grow shrubby bushes, and a coarse grass, affording ample nourishment to cattle. There are few rivers in the Falklands, so far as yet known. The largest is the San Carlos in East Falkland, W. side, about 30 m . long, and navigable for boats for about 8 m . The only other stream of any note in this island is the Arwyo Malo or Matson, which flows parallel to the Wickham Heights, and falls into Port San Salvador, on the N.E. coast.

The climate is equable, and remarkably salubrious, there being no extremes of either heat or cold. The ordinary range of the thermometer is between $30^{\circ}$ and $50^{\circ}$ in winter, and from $40^{\circ}$ to $65^{\circ}$ in summer. Rain and high winds are frequent, but lightning and thunder are rare.

A peculiar feature of the Falklands is the entire destitution of trees, but there are a great variety of sweet-scented flowers, which, in November and December, ncarly cover the ground. The tussac grass is the most useful and singular plant in the flora of these islands. It covers all the small islands of the group like a forest of miniature palms, and thrives best on the shores exposed to the spray of the sea. Each tussac is an isolated plant, occupying about 2 square yards of ground. Peculiar species of European genera are found here. Ferns and mosses are few, but lichens are in great variety and abundance, among which are many identical with those in Britain. So far as yet tried, all the useful kind of vegetables and green crops generally, have thriven, but fruit has not been found to succeed; and it is doubtful whether corn would ripen.

The rearing of cattle and the cultivation of vegetables appear to form the natural resources of this country. In proof of the adaptation of the islands for cattle grazing, it is stated that the very few animals landed originally by the Buenos Ayreans, and others, have gone on increasing in numbers, entirely in a state of nature, until they are now, according to various estimates, reckoned at from 35,000 to 100,000 or more. They grow to a great size, and are extremely fat. The wild horses of the islands, of which there are several thousands, are also highly thought of ; and although many of the districts are too moist and swampy for sheep, still there is a sufficient quantity of land on which flocks conld be kept advantageously. Pigs and rabbits also are plentiful. The numerous creeks abound at particular seasons with a description of fish resembling a gray mullet, weighing up to 15 lbs., and which are caught in large quantities by the simplest means. Sea elephant and seal frequent the shores, and whales resort to the surrounding waters, though now in diminished numbers.

There are no reptiles of any kind in the Falkland Islands, and of the quadrupeds, a peculiar species of fox is the only animal indigenous to them. These animals are large, and remarkable for their ferocity and disregard of man. Of the feathered tribe there are numbers, but no great varicty. The principal are geese, snipes, ducks, hawks, vultures, albatrosses, gulls, petrels, penguins, \&c., and a very few land birds.

A British settlement has been recently formed in East Falkland, called Stanley, sitnated at the head of Port-William, an inlet on the N.E. coast; lat. $51^{\circ} 40^{\prime} 30^{\prime \prime} \mathrm{S}$. ; lon. $57^{\circ} 49^{\prime} \mathrm{W}$. It is a free port, and is said to possess pecnliar advantages, being easily entered, well protected, and affording safe anchorage. Ships may here obtain fresh beef, vegetables, and water in abundance, and at very moderate charges.
The Falkland Islands were discovered by Davis, on the 14th August, 1592. They were afterwards visited (1690) by Strong, who gave them the name which they now bear. In 1710, a French vessel from St. Malo touched at them, and named them Isles Malouines. Settlements were afterwards formed on them by the French, Spaniards, and English, alternately, but the latter have ultimately retained possession of them. The Falkland Islands were the subject of a controversy between Dr. Johnson and Junius, the former depreciating, as much as the latter overrated them. The geograplical position of these islands, together with the advantages they present for colonization, render them of great importance, forming, as they do, a key to the Pacific, and a convenient place of resort for the sonthern whalers.-(Ross's Antarctic Expedition; Voyage of Adventure and Beagle; Nautical Magazine, 1851.)

FALKLAND SOUND, a narrow strait, separating E. and W. Falkland Islands from each other. It extends 45 m .
in a N . and S . direction, varying in breadth from 18 m . to $2 \frac{1}{2} \mathrm{~m}$. In its S . end there are many flat islands, clothed with tussac, and some shoals. The E. side of the Sound is low, with gently undulating hills, seldom exceeding 150 ft . in height; its shore is indented with excellent harbours and creeks, affording good shelter in all weathers, and fronted with flat tussac islands. The W. side, again, is high and bold, forming a singular ridge, varying from 300 ft . to 500 ft . in height. The tides, at both entrances, are strong, and between the islands; but in the main stream they are moderate.

FALKONERA, a small isl. Grecian Archipelago, 45 m . from the S.E. coast of the Morea, and 28 m . N.W. Milo; lat. $36^{\circ} 50^{\prime} 54^{\prime \prime}$. N. ; lon. $23^{\circ} 53^{\prime} 45^{\prime \prime}$ E. (R.)

FALKÖPING, a tn. Sweden, län. Skaraborg, in a fertile plain between the Mosseberg and the Alleberg, about 30 m . S. of lake Wencr. It is an old and insignificant place, contains a parish church, and has several annual fairs. In 1318, Margaret, Queen of Denmark and Norway, surnamed the Semiramis of the North, here defeated Albrecht, King of Sweden, and made both him and his son prisoners. P. 532.

FALL, a river, N. America, Oregon, which rises about lat. $43^{\circ} \mathrm{N}$. flows N., and after a course of about 170 m ., joins the Columbia, under the parallel of $45^{\circ} 45^{\prime} \mathrm{N}$. It receives numerous tributarics; and, near its junction with the Columbia, falls occur, from which it derives its name.

FALL RIVER, a port, and large manufacturing vil., U. States, Massachusetts, on the river Taunton, 49 m . S. Boston. It contains several churches, an academy, and various other schools, 10 cotton-mills, a woollen-mill, and two print-works. It has, besides, manufactories of leather boots, shoes, hats, nails, machinery, brass, tin, and copper-ware, \&c. Several ships from this port are engaged in the whale fishery. Pop. (1850), 13,209.

FALLERSLEBEN, a tn. Hanover, principality, Lüneburg, cap. bail. of same name, 9 m . S.E. Gifhorn. It is the seat of several public offices; contains a church and townhouse, and has tile-works and a mill. The poet Hoffman was born here. Pop. 1414.

FALMER, par. Eng. Sussex ; 2840 ac. Pop. 493.
FALMOUTH, a small maritime $t n$. W. Indies, S. coast, Antigua, 10 m . S.E. St. John's. It is defended by two ports.

FALMOUTH, a parl. bor. and scaport tn. England, co. Cornwall, S. coast, 45 m . S.W. Plymouth, and 28 m . N.E. the Land's End; lat. $50^{\circ} 8^{\prime} 48^{\prime \prime}$ N.; lon. $5^{\circ} 2^{\prime} 42^{\prime \prime} \mathrm{W}$. It stands on the S.W. side of the harbour, on a steep acclivity, and extends down to the water's edge. It consists of one principal street, ncarly a mile in length, from which several smaller diverge at different points. The strects are generally very narrow, but are straight and well kept. The houses are mostly modern, of stone, and well built. There are also some fine terraces at the N. and S. parts of the town. The latter is lighted with gas, and is well supplied with water. It has a parish church, and chapels for Independents, Wesleyan and Primitive Methodists, Bible Christians, Baptists, Bryanites, R. Catholice, Jews, and Unitarians, and a Friends' meetinghouse. The means of education are sufficiently ample, there being, besides several good boarding and other private acalemies, five schools more or less of a public nature, the Falmouth classical school, national, British, and national infant schools. There are several charitable institutions in the town, including an almshouse, an hospital for the relief and support of disabled seamen, \&c., a dispensary, a benevolent society, a lying-in hospital, a humane society, and other minor charities. There are also some literary and scientific institutions, both public and private; a custom-house for the Cornish towns, bonded warehouses, a jail, townhall, and market-house. The harbour of Falmouth is one of the best in England, and, since the lighthouse was erected on St. Anthony's Point, may be entered at any time. The light, which is 65 ft . above sealevel at high water, consists of a rapid succession of bright flashes, appearing every 20 seconds, and which are visible from a distance of 4 leagnes. The harbour is defended by Pendennis castle on the W., and the castle of St. Mawes on the E., both strongly fortified. The entrance is about 1 m . in width, the stretch of the bay inland between 6 and 7 m . It has always been a favourite resort of our fleets in time of war, and was a principal packet station for more than a century, the Spanish, Portuguese, West Indian, and American mails having been despatched from it; but steamers being
now employed for this purpose, it has no longer an exelusive elijoyment of that advantage, to the great loss of the port, which carried on, at the same time, an extensive trade with the places above-named. Its principal exports are tin, fish (pilchards), and copper. Imports:-timber, hemp, tallow, truits, wines, rum, sugar, and grain. Falmouth is the only bonding port for tobacco, except Plymouth, in the counties of Cornwall and Devon. It has a good retail trade, also some roperies, breweries, and shipbuilding yards of considerable extent; but the prineipal trade consists in furnishing supplies to the shipping frequenting the harbour, of which there are frequently from 200 to 300 sail at one time, of all burdens, and from all quarters, awaiting orders. With Penryn, it returns two representatives to the Ilouse of Commons. Pol., bor. and $\mathrm{tn} ., 4844$. Area of par. 1210 ac. Pop. 7695.

FALMOU'TH, several plaees, U. States, ineluding:-1, A vil. Virginia, 1. bank, Rappahannoek, at the foot of the falls, nearly opposite Fredcricksburg, 64 m . N. Richmond. It contains a chureh, and flour-mills, produeing 30,000 barrels annually. Pop. $500 .-2$, A township, Maine, $45 \mathrm{~m} . \mathrm{N}$. Augusta. It possesses cousiderable shipping, engaged in the eoasting trade and the fisheries. Pop. 2589.-3, A township, Massachusetts, on the S.W. point of Cape Col, between Buzzard's Bay and Vineyard Sound It has extensive shipping and manufactures. Nearly 40,000 bushels of salt are produced annually. Pop. 2071.

FALOUR, or Filor, a tn. Punjab, 6 m. N. W. Loodianah, r. bank, Sutlej. It is defended by a fort, and has a ferry across the river, eonnecting the line of communication between Amritsir and Lahore.

FALSE BAY, a spacious bay, S. Africa, formed by the Cape of Good Hope, on the W. side, and False Cape, on the E. The entrance from eape to cape is about 20 m . wide; its length, N. into the land, about the same alistance. The bay is large and open, and of a square form. Across the entrance the depths of water are from 40 to 50 fathoms.

FALSE CAPE, various headlands, including:-1, A cape, N.W. coast, Africa, lat. $26^{\circ} 25^{\prime}$ N.; lon. $14^{\circ} 12^{\prime} \mathrm{W}$. (r.)-2, (Horn), Tierra del Fuego, W. Cape Ilorn, lat. $55^{\circ} 43^{\prime}$ S.; lon. $68^{\circ} 6^{\prime}$ W. (r.) -3, On the eoast of Central America, 32 m. N.W. Cape Gracias à Dios, lat. $15^{\circ} 13^{\prime}$ N.; lon. $83^{\circ} 22^{\prime}$ W. (r.) - 4 , On the W. coast, A frica, Sierra Leone, lat. $8^{\circ} 26^{\prime}$ N.; lon. $13^{\circ} 18^{\prime} \mathrm{W}$. (R.) - 5 , On the S. eoast of Ilayti, lat. $17^{\circ} 45^{\prime} \mathrm{N} . ;$ lon. $71^{\circ} 40^{\prime} \mathrm{W}$. (R.)

FALSET, a th. Spain, Catalonia, prov. of, and 23 m . W.N.W. Tarragona, on a plain at the foot of Mount Morral. It is indifferently built, surrounded by the ruins of its ancient Lioman walls and castle; and has two squares, erooked, steep, and ill-pared streets, a handsome parish ehurch, with a lofty tower; several elapels, a townhouse, prison, two schools, an hospital, barracks, three fountains, and an ancient ducal palace of Medinaceli. Manufactures :-soap, hardware, chocolate, and brandy. Trade:-wine, brandy, fruits, soap, wheat, oil, iron, hemp, \&c. Two annual fairs. Pop. $299{ }^{\circ}$.

FALSTER [Latin, Fulstriu], an isl. Denmark, having, N. Seeland; N.E. Möen; W. Lolland or Lalland, from which it is separated by Guldborg Sound; and washed, S.W. and E., by the Baltic. In shape it resembles a triangle, the apex of which is in the $S$. The base, formed by the N. coast, is about 30 m ., and the sides, formed by the E. and W. coasts, respeetively 23 m . and 33 m . The greatest length across the island, from Ourewhed, its most N., to Sjudserodule, its most S . point, is 27 m .; its breadth varics from 2 to 14 m .; area, 136 gco. sq. m . The eoast, on the N.E., consists of flat banks, eovered with large boulders to sueh an extent, as to make landing difficult. The sea between it and Möen nowhere cxeecds from 4 to 12 fathoms in depth, and the opposite shores so mueh resemble each other, as to countenance the belief that they were at one time united, and the Grönsund [Green Sound] betwcen them is a passage whieh has at some period been formed by the sea. The $E$. cuast, in its $N$. front, consists of steep cliffs, about 40 ft . high, and often covered witl wood; on its $S$. front it becomes low and sandy. On turning round the S . extremity, and proceeding nortliwards, the coast becomes steep and rocky, and attains its greatest height, 70 ft . The N. coast is mostly low, and has a great number of small bays, almost filled up with sand. The interior of the island is an extensive flat, the highest point of which does not exceed 190 ft . It is watered by numerous
small streams; but its most remarkable hydrographieal featura is the shallow lake or lagoon of Bötöe-Noer, which occupies the greater part of the narrow portion of the island on the $S$., and is only separated from the sea, on the W. and E. sides, by two sandy belts. The soil consists generally of a strong rich loam, oceasionally containing a considerable mixture of sand. It produces great quantities of corn. The island is well wooded, and exports timber. It is divided into 29 parishes. Pop. 22,000.

FALSTERBO, a small maritime tn. Sweden, lian of, and 17 m . S.S.W. Malmö, on the promontory in which the S.W. extremity of Sweden terminates. It is an old and insignificant place, with no proper harbour, and almost no tradc. A dangerous reef of the same name extends nearly 3 m . into the sea. Its position is shown by a beacon-light near it. Vast numbers of swans frequent this part of the coast. Pop. 213.

FALSTONE, par. England, Northumberland; 57,700 ac. Pop. 560.

FALTSI, a tn. Mo!dayia, eap. dist. of same name, r. bank, Pruth, 70 m. S.E. Jassy. From the extent of the ruins in the vicinity, and the remaius of walls and strects, it appears once to have been a place of great extent and importance; but even the name of the ancient town is mknown, and the present town is very insignificant. An annual fair is held in it. In 1711, Peter the Great was here hemmed in by the Turks, and obliged to conclule the treaty of Pruth.

FALUN, or Failiun, a tn. Sweden, eap. län of same name, on both sides of the stream whiel, unites the lake of Varp, on the N., with that of Rum, on the S., 130 m . N.W. Stockholm. It is regularly built, consisting chiefly of two long and tolerably spacious streets, one on each side of the stream, and parallel to it, and severul small squares; but the houses, almost entirely of wood, are low, and the whole place has a dull and antiquated appearance. It is the residence of a governor, and the seat of a mining directory, contains two churches, a townhouse, infirmary, hospital, and institute, in which a eomplete eourse of mining, both scientific and practical, is given; and has manufactures of woollen and linen eloth, silk ribbons, tobacco, and spirits, worsted and cotton mills, a trade in copper, vitriol, grain, and salt provisions; and several large anmual fairs. The distriet, at some distance from the town, is bcautiful; but in its immediate vicinity is bleak in the extreme, not from any want of natural fertility, but the destruction of vegetation and blackening of the grass by the fumes of the copper-works, which are the most extensive in the kingdom. The mines are very produetive, and the workings are carried on by numerous pits, the deepest of which is about 100 fathoms. They are drained by waterpower, of which there is here an almost unlimited supply. The smelting works, and establishments connected with them, sitnated to the W. of the town, are very complete. The ontput of ore has been estimated at 140,000 tons, but the produee of pure copper does not exceed 4000 tons. Besides copper, small quantities of gold, silver, and lead are obtained from the ore. Pop. 4379.

FAIUN, or Stomakorparbrig, a län or co. Sweden, nearly corresponding to the former prov. Dalarne or Dalecarlia, bounded, N. by Ostersund, E. Gefleborg, S.E. Wästuriis, S. Örebro, S.W. Carlstad, and W. Norway ; area, 9446 gro. sq. in. The surface is very mountainous. In the E. three chains, under the names of Nup Riä Ile, Falu Ekoll, and Tiockosu, form three large valleys. In the N.E. the Brattasen rise, first forming the boundary between this province and Gefleborg, and then stretehing N.W., when they link with other mountain chains, and form a central valley, much of which is occupied by the large lake, Siljan, which has an area of about 50 sq . m . The mountains are generally eomposed of gneiss, granite, and porphyry, overlain occasionally by limestone and sandstone. The higher summits have a very rugged and sterile appearance; the lower heights, on the contrary, are generally well wooded. The eulminating point does not exceed 4000 ft . Almost the whole province belongs to the basin of the Dal, which drains it directly by its two arms of the E. and W. Dal, and also by numerous tributary streams. Cultivation is confined to the valleys, which, however, from their rocky nature, and the number of stones whieh eover them, are better adapted for pasture than for the plough. The soil is sometimes of a sandy texture, but more frequently eonsists of a good loau. In the S.E., in
partícular, much rye, barley, and oats are grown. Potatoes grow well, and are extensivcly cultivated. The rearing of cattle is much attended to, and considerable quantities of butter and cheese are made. But the chief riches of the province are in its wood, which furnishes excellent timber, fuel, both for domestic use and the blast furnace, potash and resin; and in its minerals, which include valuable mines, particularly of copper and iron, and quarries of slate, grindstone, granite, and porplyyry. The latter takes a fine polish, and is made into numerous articles of great beauty. Both the lakes and rivers are well supplied with fish, and these add greatly to the means of subsistence. The principal manufacture is iron. Other branches of industry have made little progress. For administrative purposes, Falun is divided into seven fögderi. Pop. about 130,000.

FAMAGOSTA, or Famagusta [Latin, Fama Augusta; French, Famagouste], a seaport tn. E. side of isl. Cyprus, lat. $35^{\circ} 7^{\prime} 42^{\prime \prime}$ N.; lon. $33^{\circ} 57^{\prime} 15^{\prime \prime}$ E. (r.); 10 m . N. Cape Pila. It stands upon a rock, and is nearly two miles in circumference. It was at one time strongly fortified, but both the works and the town itself are now in a state of decay, the ancient streets of the latter being choked up, and its churches and public buildings in ruins. The harbour is narrow, but in the roadstead before the town there is safe anchorage, in ten, nine, and eight fathoms water. Ahout 5 m . N.E. are the ruins of Constantia, a celebrated city under the reign of the Lusignan princes, occupying the site of the ancient Salamis, once the chief city of the island, but of which no trace now remains, having been swept away by an inundation of the sea. The ruin of Famagosta, with that of the whole island, in rapid progress, through Turkish despotism and misgovernment, was completed by an earthquake, which occurred in 1735 . The vicinity is bleak and barren.

FAMBRIDGE, two pars. England, Essex:-1, (North), 2100 ac . Pop. 142.-2, (South), 1670 ac. Pop. 94.

FAMENNE, a small dist. Belgium, prov. Luxembourg, named from its inhabitants, called by Cæsar, Pæmani or Phæmani. Marche has always been esteemed its capital.

FAMINE (Pont), Strait of Magalhaens, E. coast, Brunswick Peninsula, lat. $53^{\circ} 38^{\prime} 3^{\prime \prime}$ S.; lon. $70^{\circ} 58^{\prime} 15^{\prime \prime} \mathrm{W}$. Landing may be almost always effected, except in E. gales, on one side or the other. There is firewood in abundance on the beach; and wells, containing excellent fresh water, may be dug in various places in the vicinity. Fish are plentiful, particularly mullet and smelt, which may be taken with the seine in great quantities. Geese, wild ducks, teal, and snipe, are to be found at a short distance inland, and, now and then, woodcocks. This port was formerly called San Felipe, having been settled by some Spanish colonists, in 1582-83, all of whom, excepting one man, perished of hunger and attendant diseases. Hence its name, port Famine.

FAMMA, par. Irel. Kilkenny; 492 ac. Pop. 106.
FAMMAMATZ, a tn. Japan, isl. Niphon, 136 m . W.S.W. Yedo, defended by a fort. The principal street is long and straight, and on a height are several temples. Pop. about 6000 .

FANAGORIA, a small Russian vil and fortress, gov. Cossacks of the Black Sea, on the Strait of Jenikali, near Taman. It is a miserable place, and supposed to occupy the site of the ancient Phanagoria.

FANAYE, a large vil. W. Africa, near 1. bank. Senegal ; lat. $16^{\circ} 24^{\prime} \mathrm{N}$. ; lon. $15^{\circ} 8^{\prime} \mathrm{W}$. Its people are industrious, and have a brisk trade in millet, fish, and matting. Its ruler is a marabout of Fouta.

FANCSIKA, or Fancikora, a vil. Hungary, co. Ugocs, in a large and bcautiful plain on a small arm of the Theiss, 3 m . from Nagy-Szallos. It contains a Protestant and a R. Catholic church, and stands in a fertile and well-wooded district. Pop. 891.

FANE, a river, Ireland, cos. Armagh, Monaghan, and Lowth, rising in a number of lakes, and falling into Dundalk Bay, after a S.E course of about 20 m .

FANGFOSS, par. Eng. York (E. Riding) ; 930 ac. P. 185.
FANLOBBUS par. Irel. Cork; 35,606 ac. Pop. 12,253.
FANNICH (Loch), a lake, Scotland, co. Rose, par. Contin; 12 m . long, by 1 broad.

FANO.-1, [anc. Fanum Fortunce], A seaport tn. Papal States, deleg. Urbino, on the Adriatic, 29 m. N.W. Ancona; lat. $43^{\circ} 50^{\prime} \mathrm{N}$.; lon. $13^{\circ} \mathrm{E}$. It is situated in a rich and fertile
plain, is well built, and handsome, and is one of the most agreeable and interesting towns in Italy. The town walls were erected by Augustus; one of the gates is a triumphal arch of white marble, erected in honour of that emperor. The churches are numerous and handsome, and contain some valuable paintings; and there is a fine old theatre. There are several convents, a college of Jesuits, a public school, and public library. Fano has manufactures of silk stuffs and twist, and some trade in corn, oil, \&c. The port was once a well-known resort of the traders of the Adriatic; but its commerce has declined, and the harbour is now choked up with sand. The first printing press known in Europe, with Arahic types, was established here by Pope Julius II. in 1514. The scenery of the neighbourhood is very beautiful, and numerous excellent roads communicate with all the great towns. Pop. 6860.--2, One of the smaller Ionian islands, 14 m . N.W. Corfu; lat. (S.W. summit) $39^{\circ} 50^{\prime} 12^{\prime \prime} \mathrm{N}$.; lon. $19^{\circ} 20^{\prime}$ E. (r.) Pop. 500.

FANÖE, an isl. Denmark, bail. Ribe, $1 \frac{1}{2} \mathrm{~m}$. from W. coast, N. Jutland; lat. (S. point) $55^{\circ} 21^{\prime}$ N.; lon. $8^{\circ} 30^{\prime}$ E. It is about 10 m . long, by 2 to 3 broad; and two-thirds of it are covered with sand and heath, only one-third, and that wholly on the E. being cultivated. There are two villages on it, Nordby and Sönderho; and the inhabitants subsist by fishing and seafaring. Pop. 2800.

FANTEE, or Fanti, a maritime dist. or country, W. Africa, in the Ashantee territories, about lat. $5^{\circ} 30^{\prime}$ N.; lon. $1^{\circ}$ W., having the state Agoona on the E., Wassaw on the W., Assin and Dubbin on the N., and the ocean on the S. The soil is represented as fertile, the country populous and prosperous, owing to the protection afforded by Cape Coast Castle. The Fantees were formerly a powerful race, and their influence extended over a great extent of country; but both have been greatly reduced, if not altogether annihilated, by the Ashantees. The dress of hoth sexes consists of a piece of cloth wrapped looscly about the body. Both are particularly cleanly in their habits and persons. A Fantee is known from other Africans by small scarifications on the upper part of the cheek bones, and on the back of the neck. Those on the sea-coast have large and bony joints, head round rather than oval, and rising to a great height. The face long, and the chin protruding forward to an unusual extent; nose flat, lips thick, and ears large. The skin brownish black, in many of them dry, and inclined to be harsh, with little gloss. The females, though not much better featured, have generally a better appearance than the other sex. The Fantees are under the nominal dominion of chiefs or cabooceers, and each of the different towns or krooms has a pynim or chicf magistrate.

FAOUET, a tn. France, dep. Morbihan, 44 m. N.W. Vannes, on the Elle. It has manufactures of paper, Prussian blue, and potato flour; witl a trade in cattle, tallow, butter, flax, honey, and wax. Pop. 1474.

FARA, a vil. and com. Sardinian States, Piedmont, prov. of, and 11 m . N.N.W. Novara, beautifully situated on a lill, crowned by a castle, and studded over with fine villas. It contains a parish church, elegant chapel, with good paintings, and a superior school ; and has a weekly market. Pop. 2000.

FARA di Gera d'Adda, a vil. and par. Austrian Italy, prov. Bergamo, 3 m . W. Treviglio, ncar l. bank, Adda, on the road from Bergamo to Milan. It was once surrounded with walls, and defended by a castle, of which, however, only some traces now remain; and its environs are laid out in orchards and gardens. It contains a parish church, and four chapels, and limekilns and tileworks. Pop. 1341.

Fara San Martino, a vil. and com. Naples, prov. Abruzzo Citra, 12 m. S.W. Larciano, r. bank, Aretino. It contains several churches, and has manufactures of fine cloth and other woollen stuffs. Pop. 2515.

FARADEESE, a tn. Tunis, N. Africa, near the seacoast, 30 m . S. Tunis. In the 16 th century its inhabitants were the greatest pirates and the most skilful mariners in the country.

FARAHABAD, a in. Persia, prov. Mazanderan, S. coast, Caspian Sca, $75 \mathrm{~m} . \mathrm{W}$. Astrahad ; lat. $36^{\circ} 45^{\prime} \mathrm{N}$. ; lon. $53^{\circ} 5^{\prime} \mathrm{E}$.; at the month of the Tejin. It carries on some trade in rice, salt, fish, and pottery. Sugar, cotton, and silk, are produced in the vicinity.

FARAHY, par. Irel. Cork; 5494 ac. Pop. 2092.

FARAJGHAN, a vil. Kafiristan, on the S. slope of the Hindoo Koosh, near the source of the Tagoo; lat. $35^{\circ} 42^{\prime} \mathrm{N}$.; lon. $70^{\circ} 22^{\prime}$ E., where the Afghans and the inhabitants of Kafiristan meet to barter goods; and in time of war held as neutral ground.

FAKALLONES, two groups of islets and rocks, N. Pacific, off the coast of New California, extending S.E. to N.W., and about 12 m . distant from one another; lat. (S.E. group) $37^{\circ} 42^{\prime}$ N.; lon. $122^{\circ} 59^{\prime}$ W. (r.) Seven of these islets scarcely appear above water. The largest, which rises from 150 to 200 ft . belongs to the S.E. group; it is 28 m . distant from the fort at the entrance of the harbour of San Francisco; near its S.E. part there is ancherage in 11 fathoms water, with a rocky bottom.

FARAY, an islet, Scotland, co. Orkney, E. of the Island of Hoy. Pop. 55.

FAREIIAM, a market tn. and par. England, Hampshire, on slightly elcvated ground, at the head of a short arm of the sea, off Pertsmouth harbour, $4_{4}^{3} \mathrm{~m}$. N.W. Pertsmeuth. It has a rather handsome parish church, places of worship for Independents and Wesleyan Methodists, a free school, and a school for the children of the poor upon the national system, and a hall for the philosophical institution recently erected. Shipbuilding is carried on here to a considerable extent, vessels of 200 tons being built; and ships of 500 tons repaired in its floating dock. Earthenware and bricks are manufactured in large quantities; great part of the latter are exported. The trade in corn, coal, and timber, is also considerable. The government is vested in a bailiff, two constables, and two aleconners. Market every alternate Monday; a fair on June 29. Area of par. 6670 ac. Pop. (1841), 6168.

FARESCOUR, or Fareskur, a to. Lower Egypt, prov. of, and 8 m . S.W. Damietta, r. bank, Nile. Near this place Louis IX. of France was made prisoner, with all his army.

FAREWELL, par. Eng. Stafford; 470 ac. 1'op. 203.
FAREWELL (Cape).-1, The S. extremity of an island directly off the remarkable point of land in which Grecnland terminates S., and which forms the E . side of the entrance to Davis' Strait ; lat. $59^{\circ} 49^{\prime} \mathrm{N}$. ; lon. $43^{\circ} 54^{\prime} \mathrm{W}$. (r.) A strong current sets round this cape, and continues N. along the E. coast of the strait as far as lat. $67^{\circ} \mathrm{N} .-2$, New Zealand, Tavai-Poenammeo or Middle Island, N.W. extremity; lat. $40^{\circ} 31^{\prime} \mathrm{S}$.; lon. $172^{\circ} 47^{\prime} \mathrm{E}$. A little N. from this cape are some rocks known by the name Farewell Rocks.

FARFORTH, par. Eng. Lincoln; 1940 ac. Pop. 92.
FARGEAU (St.), a tn . France, dep. Yonne, 26 m . E.S.E. Auxerre, agreeably situated on the Loing, down which is floated the timber cut for the Paris market, in the adjoining forests. IIere are a finc old dilapidated castle, and spacious park, once the residence of Mademoiselle Montpensier, cousin of Louis XIV., built in the 15th century, but now only partly hatitable, having been much damaged by fire in 1752 . Manufactures:-leather. In the envirens are iron-forges, glass-works, aud potteries. Trade in firewood supplied to Paris. Pop. 1858.

FARIGLIANO [Lat. Farilianum], a vil. and com. Sardinian States, Piedmont, prov. Mondovi, div. of, and 21 m . N.E. Coni, at the foot of a gentle slope, r. bank, Tanaro, which here often commits great ravages by its inundations. It contains a very ancient parish clurch, supposed to have been erected on the site of the temple of Diana, and a monastery; and has a large silk mill, a trade in agricultural produce, and three annual fairs. Pop. 2039.

FARINDOLA, a vil. and com. Naples, prov. Abruzzo Ultra I., dist. of, and 6 m . W.S.W. Civita di-1'enne, I. bank, Saline. It has an impertant annual fair. Pop. 2680.

FARINGDON, par. Eng. Devon; 4000 ac. Pop. 381.
FARINGTON, a vil. England, co. Lancaster, $3 \mathrm{~m} . \mathrm{S}$. Preston, consisting of four small straight and clean streets, the houses, chiefly cottages for labourers, all well built of brick. It has a handsome romanesque church, and two schools for boys and two for girls. Cotton spinning and weaving are carried on extensively, and a number of the inhabitants are employed in agricultural labour. There are several chalybeate springs in the neighbourhoo.t. Pop. 2500.

FARKASD, a market tn. Hungary, Hither Danube, co. of, and $19 \mathrm{~m} . \mathrm{S} . S . W$. Ncutra, r. bank, Waag. It contains a Protestant anl a R. Catholic church. Pop. 3330 .

FARLAM, par. Eng. Cumberland; 5680 ac. Pop. 1035.
Vol. I.

FARLEIGII, four pars. Eng.:-1, (East), Kent, 2050 ac.; Pop. 1377.-2, (West), Kent ; 1050 ac. Pop. 403.-3, (Hungerford), Somerset, 840 ac. Pop. 154.-4, (Wallop), Hants, 1820 ac. Pop. 94.

FARLEY, two pars. Eng.:-1, Surrey, 960 ac. Pop. 86.-2, (Chamberlayne) Hants, 1930 ac . Pop. 149.

FARLINGTON, par. Eng. IIants; 2070 ac. Pop. 793.
FARLSTHORPE, par. Eng. Lincoln; 1140 ac. Pop. 109.
FARMBOROUGII, par. Eng. Somerset; 1310 ac. Pop. 1149.

FARMINGTON, par. Eng. Gloucester; 2470 ac. P. 359 .
FARMINGTON, a vil. and township, U. States, Connecticut. The village, seated on an elevated plain, 9 m . W. by S. IIartford, contains two churches, a flourishing academy, and several handsome dwellings. In the township are paper manufactories, and a variety of mills. Pop. 2041.

FARMSUM, a vil. Holland, prov. Groningen in Fivelgo, 3 m . E. Appingedam, hard by the fortress of Delfzijl. The inhabitants are chicfly engaged in agriculture; but there are likewise some boat-building, lime burning, brick and tile fields, and saw, oil, grain, and fulling mills. Pop. 1184.

FARNBOROUGHI, four pars. Eng.:-1, Kcnt, 1420 ac. P. 680.-2, Hants, 2370 ac. P. 356.-3, Warwick, 2430 ac. P. 367.-4, (or Farmborough), Berks; 2720 ac. P. 204.

FARNDISH, par. Eng. Bedford; 810 ac . Pop. 86.
FARNDON, three pars. Eng. :-1, Chester, 3050 ac. Pop. 999.-2, Nottingham, 1710 ac. Pop. 575.-3, (East), Northampton; 1070 ac. Pop. 250.

Farne, Fearne, or Fern Islands, several small isls. German Ocean, N.E. coast, England, off N. part of co. Northumberland, 2 m . E. by S. Bamborough Castle; lat. $55^{\circ} 37^{\prime}$ N.; len. $1^{\circ} 39^{\prime} 15^{\prime \prime} \mathrm{W}$. (r.) ; separated from the mainland by a channel about $1_{4}^{3} \mathrm{~m}$. bread, called the Inner Fairway, and from the group, named Staple Islands, on the N.E., by Staple Sound, about $\frac{1}{3} \mathrm{~m}$. wide. The largest Farne island is a recky islet, about 100 paces over, having two lighthouses upon it. It is steep and cliffy to the S.W., but sloping downward to the N.E. The high lighthouse is situated about 80 ft . from the S.W. cliff, the low light near the N.W. part of the island, and can be seen only in a N. direction. At the N.E. part is a remarkable old square building, called St. Cuthbert's Tower, whereen a light was formerly exhibited; and at the N . end of the isle is a deep chasm, through which, in stormy weather, the sea forces its way, with such violence as to form a jet d'eau, 60 ft . high, called the Churn. On the 5 th September, 1838, the Forfarshire steamer, from Hull to Dundec, with 53 persons on beard, was wreekel on the Farne Islands, when 38 people perished, and 9 were saved by the heroic exertions of the Onter Farn light-keeper, J. Darling, and his noble laughter, Grace; the small remainder escaped by other means. A similar catastrophe occurred here, July 20, 1843, when the Pegasus steamer, from Leith to IIull, struck on the imer Farn islaud, and went down, and upwards of 60 individuals perished.

FARNELL. par. Scot. Forfar, 6 sq. m. Pop. 62.
FARNHAM, a market tn . and par. England, co. Surrey. The town, 35 m . S.W. Lenden, on the Wye, consists of four principal streets, diverging nearly at right angles from a central market-place, and of several subordinate streets, indifferently paved; lighted with gas; water abundant. The houses are in general well built, and the town has a thriving and prejossessing appearance. It has a spacious and handsome gothic chureh, an Independent chapel, and a congregation of Bible Cliristians; a free grammar-school, national and British schools, and almshouses for eight aged persons. The cloth manufacture, formerly extensive, is now extinct; but sacking, sail-cloth, painted canvas, and floor-cloth, are still made to a considerable extent, and also a kind of carpeting, of 1ndian hemp; but the staple article of the trade of Farn ham is hops, for which it has been long celebrated. North of the town, on a commanding eminence, is a residence of the Bishops of Winchester, a fine structure, originally built by lienry de Blois, Bishep of Winchester, and brother to King Stephen. It contains an extensive library, and some good paintings. About 2 m . S. of the town stood the abbey of Waverley, founded in 1123, by Gifford, Bishop of Winchester, for monks of the Cistertian order. The remains of this noble structure extend in detached pertions over an area of 3 or 4 ac. Market day, Thursday; several fairs amually. In

1762, William Cobbet, the well-known political writer, was born at Farnham, and he died in the vicinity in 1835. Area of par. 10,510 ac. Pop. 6615.

FARNHAM, several pars. Eng.:-1, Essex, 1360 ac. Pop. 549.-2, Suffolk, 740 ac. Pop. 186.-3, York (W. Riding), 2780 ac. Pop. 580 -4, (Little), Dorset, 2200 ac. Pop. 117.-5, (Royal), Bucks, 2910 ac. Pop. 1258.

FaRNHURS'T, or Fernhurst, par. England, Sussex; 4680 ac. Pop. 762.

FARNINGHAM, par. Eng. Kent; 2880 ac. Pop. 701.
FARNLEY, a vil. and chapelry, England, co. York (W. Riding), comprised in the bor. and par., and 3 m . W. by S. Leeds. It contains a chapel in connection with the Established church, and a place of worship for Wesleyans. Many of the inhabitants are employed in the woollen manufacture. Pop. (1851), 1722.

FARNSFIELD, par. Eng. Notts; 3920 ac. Pop. 1099.
FARO.-1, A seaport city, Portugal, S. coast, prov. Algarve, on a fertile plain at the mouth of the Valformosa, 62 m . S.E. Cape St. Vincent ; lat. $36^{\circ} 59^{\prime} 24^{\prime \prime}$ N.; lon. $7^{\circ}$ $50^{\prime} 30^{\prime \prime} \mathrm{W}$. It is surrounded with walls, said to have been constructed by the Moors.-The rown is well built, and the streets spacious. It is the see of a bishop; and has a cathedral, a church, a college, an academy, three hospitals, a house of charity, a customhouse, and a large square. It is the seat of a corregidor, a military governor, and of various judicial courts.- The post, defended by a small citadel, is not very commodious; but good anchorage is to be obtained in the roads, formed by three small islands at the mouth of the river. The principal exports are oranges, dried fruits, shumac, cork, articles of esparto, and of palm leaves. It has an active coasting and fishing trade, and two annual fairs, one of which lasts three days. Pop. 7687.-2, A tn. Brazil, prov. Para, on the N. extremity of Lake Jamunda, about 30 m . above the confluence of the Jamunda with the Amazon, and $50 \mathrm{~m} . W$. Obidos. It contains a parish church, raises a great quantity of cacao, makes a kind of butter from the eggs of the tortoise, and exports some cotton.

FARO [anc. Pelorus], a promontory, forming the N.E. extremity of Sicily, at the entrance to the straits of Messina; lat. (lighthouse) $38^{\circ} 15^{\prime} 48^{\prime \prime} \mathrm{N}$.; lon. $15^{\circ} 40^{\prime} 15^{\prime \prime} \mathrm{E}$. (r.) It is low and sandy, and has a lighthouse upon it, built upon the ruins of an ancient tower, and 200 years old. The point is strongly fortified, being defended by two batteries and two martello towers, and commanded by a redoubt, situated on a hill, about $1 \frac{1}{2} \mathrm{~m}$. W. The village of Faro, a small dirty place, stands about $\frac{1}{4} \mathrm{~m}$. S.W. of the lighthouse. In its vicinity the famous Falernian wine is grown, and the adjacent country is very picturesque. Between the beach and the hills two lakes, called, from their shape, the Round and Long Lakes, and united by a canal, contain the best eels and cockles in Sicily.

FARÖE, a vil. Denmark, isl. Seeland, bail. of, and near the bay of Prästö̈e, 34 m . S.S.W. Copenhagen, on a limestone hill. It contains a church, which stands near 244 ft . above sea level. A good deal of limestone is shipped, the quarries of that mineral being very extensive.

FÄROE, an isl. Sweden, in the Baltic, on the N.E. of isl. Gothland, from which it is separated by a channel of its own name; lat. $58^{\circ} \mathrm{N}$.; lon. $19^{\circ} 22^{\prime} \mathbf{E}$. (r.) It is very irregular in shape, but bears some resemblance to a crescent. Measured on a line curving from its extremities through its centre, it is about 8 m . long; its breadth scarcely averages 3 m . The surface consists generally of a plateau, which rises nowhere more than 200 ft . above the sea. The prevailing strata are limestone, and the soil is tolerably fertile. Its coasts are much encumbered by shifting sands.

FARÖE, or Faero [Danish, Färöerne; German, Färöer; French, Farce; Spanish, Ferro], a group of isls. N. Atlantic, belonging to Denmark, about 170 m. N.W. the Shetland Isles, between lat. $61^{\circ} 20^{\prime}$ and $62^{\circ} 20^{\circ} \mathrm{N}$., and intersected centrally by lon. $7^{\circ} \mathrm{W}$. They are 22 in number, but of these 17 only are inhabited. The whole group stretches about $65 \mathrm{~m} ., \mathrm{N}$ to S., and 44 m. , E. to W., forming something like a triangle, with the apex to the S . The largest isle is Stromöe, in the centre of the group; area, 104 geo. sq. m.; the other larger ones are Osteröe, Suderöe, Sandöe, Vaagöe, and Bordöe; aggregate area, 376 geo. sq. m. The islands generally present eteep and lofty precipices to the sea, which, in running be-
tween them, often forms fiords and bays, in which good anchorage is found. The surface rises towards the interior, and terminates in peaks. Of these, the culminating point, Slattaretind, in the island of Osteröe, has a lieight of 2800 ft . The climate, being insular, is much milder than the latitude might seem to indicate. Both sheep and horses can winter in the open air. The weather, however, is very variable, and mists are extremely prevalent. The longest summer day is 20 hours, the shortest winter day 4 hours; but the dawns

and twilights, and the brilliancy of the aurora borealis, considerably prolong the period of light. The soil has sometimes a depth of 4 ft .; but for the most part is thin, and does not exceed 6 inches. It is not naturally unfertile; but barley is the only cereal that comes to maturity, and even it often fails. Turnips and potatoes thrive well. There is no wood, but the want of it is so far compensated by abundance of excellent turf. The minerals of the island include fine opal, and, it is said, also coal. The feathers of wild fowl form an important article of trade; but the wealth of the inhabitants is derived chiefly from fishing, and the feeding of sheep. The stock of them is estimated to amount to at least 80,000. Many individuals have flocks of 200 each. The horses are small, but strong, hardy, active, and sure-footed. The cattle are not very numerous. The want of a sufficiency of winter fodder has hitherto been the great obstacle to an increase of their numbers; but, from a trial made in 1843 , it appears that cows throve well on the flesh of the caaing whale [Delphinus Melas], cut into slices of two or three inches long, and slightly boiled, and gave a large increase of milk, in which no deterioration of quality was perceptible. Should future experiments justify the hopes entertained of this food, exhaustless supnlies of it may be obtained, and the number of cows greatly increased. The islands were originally peopled by Norwegians. In the Legislature of Denmark they are represented by a deputy, named by the king. Their chief magistrates are an amtmann, who is also commandant, and a landvogt, who is also liead of police. The capital is Thorshavn, in Stromöe. Pop. (1851), 8150.

FARQUHAR'S GROUP, an extensive range of shoals and islets, off N.E. coast, Australia. Several of them are covered with shrubs, and the whole connected by a reef, the sca breaking high on its edge. Lat. (westernmost) $17^{\circ} 39^{\prime} \mathrm{S}$.; lon. $151^{\circ} 27^{\prime}$ E.

FARR, a par. Scotland, Sutherland; 40 m . by 20 m . Pop. 2217.

FARRAR, isls. Red Sca, $5 \frac{1}{2} \mathrm{~m}$. off the coast of Arabia; lat. (S. end) $19^{\circ} 17^{\prime} \mathrm{N}$; lon. $40^{\circ} 40^{\prime}$ E. They extend N.N.W. 13 m., and are low and sandy, with a few bushes.

FARRingdon, or Faringdon (Great), a market tn. and par. England, co. Berks.-The town, 15 m. S.W. Oxford, on a gentle eminence, in the vale of Whitehorse, is cleanly kept, well paved, amply supplied with water, and lighted with gas. It has a large and handsome church, in the gothic style, of various periods, the spire of which was battered down by the army of Cromwell; chapels for Independeuts, Baptists, Wesleyan, and Primitive Methodists, and a Friends' mecting-house; two national schools, a seminary for young gentlemen, and two for young ladies. Trade in hogs and bacon, malting and brewing; a well-attended corn market on Tuesday; excellent monthly cattle and shcep markets; several annual fairs. Area of par. 6910 ac. ; Pop. 3593.(Local Correspondent.)

FARRINGDON, par. Eng. Hants; 2430 ac. Pop. 545.
FARRINGTON-Gurnex, par. Eng. Somerset; 890 ac. Pop. 605.

FARS, or Farsistan [anc. Persis], a prov. Persia, between lat. $27^{\circ} 40^{\prime}$ and $31^{\circ} 45^{\prime} \mathrm{N}$., and lon. $50^{\circ}$ and $55^{\circ} 20^{\circ} \mathrm{E}$., having S. and W. the Persian Gulf, E. Kirman, S.E. Laristan, W. Khuzistan, and N. Irak-A jemi and Khorassan; length, E. to W., about 300 m .; breadth, about 250 m . Although a great portion of this province is desert, consisting, in part, of tracts of arid sand, especially towards the E., and along the shores of the Persian Gulf, where the country is flat, there are yet many well-cultivated districts, and extensive vales covered with wood and verdure. The N.W. section, bordering upon Irak and Khuzistan, consists chiefly of rocky mountains, enclosing long narrow glens, many of which afford excellent grazing. Several of the former attain an elevation of from 2500 to 3000 ft . A chain of high mountains also runs along its S.E. borders, separating it from Laristan; and towards the centre it is generally hilly, but flat in the N. and N.E. One of the more remarkable valleys is that of Shiraz, in which the city of that name stands. It is 24 m . in length, and 12 m . in breadth, and is bounded by low hills, entirely destitute of vegetation. The oriental plane, the willow, poplar, and medler tree grow luxuriantly here. There are several salt lakes in the province, the principal of which is Bakhtegan (which see). The chicf rivers are the Bandamir or Araxes, and the Nabon; the former flowing S.E. to lake Bakhtegan, and the latter S.S.E to the Persian gulf. In the lower districts the climate is extremely hot and unhealthy; in the mountainous regions it is temperate and salubrious-here the spring season is delightful. Agriculture was formerly in a more prosperous condition in Fars than at present, but it is still more attended to here than in any other part of P'ersia. Grain, fruit, wine, oil, cotton, and tobacco are raised in great quantities, and all of the finest quality; the tobacco is particularly esteemed. Silk, cochineal, and attar of roses are also produced. The inhabitants of this province are reckoned the most industrious people in Persia. They manufacture woollen, silk, and cotton stuffs, and carry on an active trade with Hindoostan, to which they export wine, horses, woollen manufactures, and various other articles. The government of Fars is confided to a prince of the blood-royal, under whom are the governors of districts, of which there are six. It is thinly peopled, in proportion to its extent. The principal cities are Shiraz, the cap.; Bushire, Ferozabad, Darabjerd, and Kazeroun. Fars is remarkable for the number of ancient ruins it contains. 1'op. 1,700,000.

FARSAN, isls. Red Sea, E. side, about lat. $16^{\circ} 30^{\prime}$ N.; lon. $42^{\circ} 45^{\prime} \mathrm{E}$. 'They are two in number, and are the largest all along this coast, but may be considered as forming one island only, being connected by a sandy spit of shoal water, across which camels frequently pass from one to the other. They are of very irregular shape. The westernmost, Farsan Kebeer, is 31 m . long; and the other, Farsan Seggeer, about 18 m . The land is of considerable height, interspersed with some plains and valleys. The hilly parts are coral rock.

Farsistcan, a prov. Persia. See faks.
FARSUND, a seaport tn. Norway, prov. Christiania, bail. Mandal, 47 m. E. by S. Cluristiansand, on the N. Sea;
lat. $58^{\circ} \mathrm{N}$. ; lon. $7^{\circ} 30^{\prime}$ E. It exports dried smoked fish, herrings, and millstones. Pop. 881.

FARTASH, or Fartak, a cape, S. coast, Arabia; lat. $15^{\circ} 38^{\prime} \mathrm{N}$. ; lon. $52^{\circ} 20^{\prime} \mathrm{E}$. It is a beautiful promontory, very high, and may be seen, in clear weather, from a distance of nearly 80 m .

FAlRTHINGHOE, par. Eng. Northampton; 3320 ac. Pop. 409.

FAR'THINGSTONE, par. Eng. Northampton; 1820 ac. Pop. 315.

FARWAY, par. Eng. Devon; 3420 ac. Pop. 376.
FASANO, a tn. and com. Naples, prov. of, and 33 m . S.E. Bari, and 5 m . W. of the Adriatic, cap. circondario of same name. It contains three churches and a convent. Pop. circondario, 9974.

FATARELLA, or Fatorrella, a tn. Spain, Catalonia, prov. of, and 37 m . W.N.W. Tarragona, in a mountainous district. It contains a parish church, courthouse, prison, and primary school; and has flour mills and distilleries. P. 1495.

FATATENDA, a considerable tn. of W. Africa, r. bank, Gambia; lat. $13^{\circ} 22^{\prime}$ N.; lon. $14^{\circ} 10^{\circ} \mathrm{W}$. The English African Company had a factory here, situated on a rock, and overlooking a fine country, but were driven from it by the hostile conduct of a native prince.

FATCHIOU, an i.sl. Japan, strait of Corea, in the Tsussima group, lat. (S. point) $34^{\circ} 6^{\prime} 30^{\prime \prime}$ N. ; lon. $129^{\circ} 15^{\prime \prime}$ E. (r.)

FATESCH, a tn. Russia, gov. of, and 38 m . N.W. Koursk, cap. circle, and on a river of same name. It stands on a height in a beautiful district; contains a church, and has manufactures of cloth, tile-worke, and a little general trade. Around it are orchards and gardens. Pop. (1849), 3575.

FATSA, or Fatsah [anc. Phadisana], a seaport tn. Asiatic Turkey, pash. Sivas, on the Black Sea, 118 m. E. Trebisond; lat. $41^{\circ} \mathrm{N}$. ; lon. $36^{\circ} 38^{\prime} \mathrm{E}$. It is now the scala or seaport of Niksar, 50 m . S.S.W., and to which there is a difficult road over the mountains, through thick and luxuriant woods. It contains an old palace and a large khan, and has still some trade. Close by the town is a small fort, near to which large ships of war are sometimes built. Two miles E. of Fatsa are the ruins of a city, the site of the ancient Polemoniam.

FATSIZIO, an isl. Japan, a dependency of prov. Yzon, isl. Niphon, lat. $33^{\circ} 6^{\prime}$ N.; lon. $140^{\circ} \mathrm{E}$. (R.) It is 21 m . long, by $7 \frac{1}{2} \mathrm{~m}$. broad, and contains a town of same name. Its shores are steep, and almost inaccessible; soil extremely fertile, and well cultivated. State criminals are banished to this island, and employed in manufacturing silk stuff 3 for the Court.

FATTECONDA, a tn. of W. Africa, kingdom, Bondou, on E. bank of the Falémé; lat. $14^{\circ} 20^{\prime} \mathrm{N}$.; lon. $10^{\circ} 20^{\prime} \mathrm{W}$.

FAUCIGNY, a prov. Sardinian States, div. Savoy; bounded, N. by prov. Challais, E. by the Swiss canton of Valais and prov. Aosta, S. by provs. Upper Savoy and the Genevese, and W. by that part of the dukedom of Savoy which formed prov. St. Julien; length, N. to S., 36 m. ; breadth, 21 m . ; area, about $840 \mathrm{sq} . \mathrm{m}$. It is one of the loftiest districts in Europe, being partly covered by the Pennine Alps, in which its culminating point occurs. It belongs almost entirely to the basin of the Arve, which, taking its rise in the glaciers of Mont Blanc, traverses the province circuitously, S.E. to N.W. From the nature of the ground, the far greater part of it is necessarily waste, and unfit either for the hahitation of man or the sustenance of beast. According to an estimate which has been made, one-fifth of the province consists of bare rock, one-sixth of barren uncultivated ground, one-fourth of forests, chiefly of pine, and barely one-third of ground fit for culture. For administrative purposes, it is divided into ten mandamentos-Bonneville, the capital; Annemasse, Cluses, La Roche, Regnier, St. Gervais, St. Jeoire, Sallenches, Samoens, and Faninges Pop. 101,792.

FAUGHALSTOWN, par. Irel. Westmeath; 7050 ac. Pop. 1618.

FAUGHANVALE, par. Irel. Londonderry; 18,582 ac. Pop. 5929.

FAUGHART, par. Irel. Louth; 2480 ac. Pop. 1869.
FAUGLIA, a vil. and par. Tuscany, in the Val di Tora, 11 m . E. Leglorn. It has a parish church, finely situated on the top of a hill, and a trade in silk, maize, corn, and wine. Pop. 2422.

## FAULHORN

980
FE (Santa)

FAULHORN, a lofty mountain, Switzerland, can. Bern. It is situated between the valley of Grindelwald and the lake of Brienz, and has a height of 8140 ft . The extent and magnificence of the view, and the comparative easiness of the ascent, induce numerous travellers to visit it. For their accommodation, an inn of considerable extent, and three stories high, has been erected of limestone quarricd on the spot. It is within 300 ft . of the summit, and is more than 600 ft . higher than the Hospitium of St. Bernard. Travellers often pass the night here to witness the rise of the sun.

FAULKBOURN, par. Eng. Essex; 750 ac. Pop. 157.
FAUSSE RIVIERE, a lake, U. States, Louisiana. It formed part of the bed of the Mississippi till about 1714, when the river took another course. Its banks are extremely fertile, and laid out in fine farms.

FAVALE (Latin, Fagale Ligurum), a vil. and com. Sardinian States, prov. Chiavari, div. Genoa, in the valley of Fontanabuona, almost surrounded by lofty precipices. It contains a parish church, and has manufactures of cotton and linen, a trade in cattle, and an annual fair. Pop. 1598.

FAVAIOS [anc. Flarias], a tn. and par. Portugal, prov. Tras-os-Montes, near the Tua, 61 m . E. by S. Braga. It is situated on the side of a hill composed of fine granite, contains a large church, and a fountain of excellent water, and has a chalybeate spring. It is an ancient place, and possesses several Roman antiquities. Pop. 1130.

FAVARA, a vil. and com. Sicily, prov. and 5 m . E.S.E. Girgenti, in a mountainous district. Pop. 7598.

FAVERGES [Latin, Fabricae], a tn. Sardinian States, prov. Upper Savoy, in the valley of Faverges, at the foot of the mountains of Tamié, near the lake, and 14 m . S.S.E. the town of Annecy. It contains an old castle, now converted into a silk factory, a small cburch, and an hospital, and has considerable manufactures of silk goods, which are largely exported, and of agricultural and other implements, a brass and iron foundry, several smelting furnaces, a weekly market, and four annual fairs. Pop. 3642.

FAVERSHAM, a bor. par. and seaport tn. England, co. Kent, 45 m . E.S.E. by S. London, near a branch of the Swale. It consists principally of four streets, spacious, well paved, and well lighted. In the centre is the townhall and market place. On the opposite bank of the river is a suburb called Brent's-town, consisting of a number of recently-built houses. There is another suburb called Ospringe-street. Faversham has a handsome church, with a light and elegant spire; chapels for Baptists, Independents, and Wesleyan Methodists, Bible Christians, and Latter-day Saints; a free grammar school, a national, and three other schools, several well-supported almshouses, and other small charities, a theatre, and set of assemblyrooms. Market days, Wednesday and Saturday. Two fairs in the year, February and August. Vessels of 150 tons come up the Swale to the town at common tides. On December 31, 1850, the number and tonnage of vessels belonging to the port was 289 ; tonnage, 11,999; and one steam-vessel of 19 tons burthen. The vessels, coastwise and foreign, which entered in 1850 , were 1438 vesscls; tonnage, 107,319 ; cleared, 1303 ; tonnage, 42,199 . The principal exports are corn, hops, fruit, wool, and other produce; importz-timber, iron, coal, tar, \&c. Faversham has long been celebrated for the manufacture of gunpowder. Roman cement is also manufactured here, but the oyster fishery has now become the principal trade of the place. It is carried on by the company of free fishermen, and free dredgermen of the hundred of Faversham, and employs between 200 and 300 persons. Area of par. 2270 ac. Pop. 4621.-(Local Correspondent.)

FAVIGNANA [anc. Agura, or AEthusa], an isl. Mediterranean, 8 m . off W. coast, Sicily ; lat. $37^{\circ} 57^{\prime} \mathrm{N}$. ; lon. $13^{\circ} 43^{\prime}$ E. It is about 5 m . long, by 2 to 3 broad. On its E. side is a good harbour, with the town San Leonardo on one side, and a small fortress on the other. It is the residence of a military governor. The soil is fertile. Pop. 3000.

FAVORITA, a vil. and beautiful country seat, Austrian Italy, in the vicinity of Mantua, memorable as the scene of several scvere contests between the French and Austrians, in which the former were victorious. One immediate result was the surrender of Mantua, with its garrison of 20,000 men.

FAVRIA [Latin, Fabrica], a vil. and com. Sardinian States, Piedmont, prov. of, and 19 m . N. Turin, in a fertile plain. It contains a parish church, of modern and elegant
construction, another small church, a charitable endowment and an old castle, and has a large spinning-mill, and a trade in wine, which is extensively grown in the district. P. 2745.

FAWKHAM, par. Eng. Kent; 1060 ac. Pop. 277.
FAWLEY, thrce pars. Eng.:-1, Bucks; 2010 ac. Pop. 280.-2, Hants; 6590 ac. Pop. 1972.-3, (North), Berks; 2870. Pop. 225.

FAWSLEY, par. Eng. Northampton; 1550 ac. P. 48.
FAXARDO, a tn. isl. Porto-Rico, E. coast, near the mouth of a small river of the same name. Pop. about 3000 .

FAXÖE, a vil. Denmark, isl. Seeland, bail. Prästöc, 33 m . S.W. Copenhagen, about 2 m . from the sca. It has noted quarries of building limestone, of a pale yellow colour, and coinposed mainly of petrifactions of marine animals.

FAYAL, one of the Azores, or Western Isles, in the N Atlantic Ocean; lat. (W. point) $38^{\circ} 35^{\prime} 36^{\prime \prime}$ N.; lon. $28^{\circ} 50^{\prime} 30^{\prime}$ W. (R.); area, 27,520 ac., of which it is estimated that $10,020 \mathrm{ac}$. are under cultivation. The uncultivated portion, however, is not unproductive; a great part of it serving for grazing land, and the supply of firewood. The island produces annually about 12,000 quarters of Indian corn, 4000 of wheat, 2000 of potatoes and onions, 200 pipes of wine, and 17,000 boxes of oranges. The principal exports are oranges and wine. The imports are manufactures, cotton twist, and flax, chiefly from England; colonial produce from Brazil and Portugal; tea tobacco, and soap from the latter. Fayal has, besides, a considerable transit trade. About 170 American whalers tonch at the island every year, and land the oil of such fish as they have caught on their outward voyage. This oil is afterwards shipped for the American market, and amounts in value to between $£ 10,000$ and $£ 50,000$. Fayal has a good bay opposite to Pico. The common anchorage is opposite the town of Orta, in the bay of that name. It is the best anchorage in the Azores, but open to winds from the N. to N.E., and from S.E. to S.W. The chief town is Villa Orta, on the S.E. side of the island. Pop. (1840), 25,900.

FAYENCE [Latin, Faventia], a tn. France, dep. Var, 13 m . N.E. Draguignan. It is a mean place, built on a high site, but has a fine climate. It has a gothic church, of the 12th century; some olive oil-mills, potteries, tanncries, and a glass- work. Pop. 1403.

FAYE'TTEVILLE, numerous places, U. States, particularly a tn ., N. Carolina, 50 m . S. by W. Raleigh. It is regularly laid out with broad streets, has a courthouse, several churches, and banks, and is the seat of a considerable trade in grain, flour, tobacco, and naval stores. It also contains several schools, two printing-offices, and two weekly newspapers. In 1831, this place was nearly destroyed by fire. Pop. 4285.

FAYOUM, or Faioun, a valley and prov. Central Egypt, between lat. $29^{\circ}$ and $30^{\circ} \mathrm{N}$., and lon. $30^{\circ}$ and $31^{\circ} \mathrm{E}$. It is of an oval form, about 40 m . in length, E. to W., and about 30 in breadth. It rises in the centre, but is altogether considerably lower than the valley of the Nile. In the N. part of the valley is the Birket-el-Kerun (see EGYPT). It is sup plied with water from the Nile by the canal of Joseph [BahrYoussouf]; a number of canals, of smaller dimensions, are also distributed through the valley, for the purposes of irrigation The parts thus watered are extremcly fertile, and produce corn cotton, and immense quantities of fruit, including apricots, figs, grapes, and olives. Roses are also grown in great abundance, for making rose water, which is sold at Cairo, and all over Egypt. Near Medinet-el-Faioum, the principal town of the province, are the remains of the celebrated labyrinth, those now above ground consisting of several broken columns of fine red granite, in the old Egyptian style, with lotus-bud capitals. At the N. extremity of the area occupied by the labyrinth, with which it was connected, is the pyramid of Howara, which, when entire, was 348 ft . square, but is now much reduced, the bricks of which it was built having been carricd off to erect new buildings.

Fays Billot, or Fayl Billot, a tn. France, dep Haute-Marne, 30 m. S.S.E. Chaumont. It has five annual fairs. Pop. 2324.

FAZILPOOR, a small tn. of S.W. Hindoostan, 1. bank, Indus, Bahawulpoor; lat. $28^{\circ} 30^{\prime}$ N.; lon. $69^{\circ} 50^{\prime}$ E. It is defended by a fort, which, with the town itself, is now greatly decayed.

FE (Santa), a tn. and prov. La Plata. The prov. lies mostly between lat. $30^{\circ}$ and $33^{\circ} \mathrm{S}$. ; lon. $61^{\circ}$ and $63^{\circ} \mathrm{W}$.;
bounded, N. and W. by deserts, which separate it from Santiago and Cordova; S. by Buenos Ayres, and E. by the Parana, which separates it from Entre Rios. It has no mountains, but contains a number of considerable lakes, and is intersected by several rivers, of which the Salado and the Tercero are the most considerable. The plains are covered with grass and mimosas, and cattle and horses are rcared in abundance. The principal places are Santa Fe, the capital; Rosaris, and Espiritu Santo. Pop. between 15,000 and 20,000.—— The crty of Santa Fe, l. bank, Salado, 9 m . N.W. Bajada, was formerly a place of considerable importance, forming the centre of communication between Beunos Ayres and Paraguay; as also between the latter country and the province of Tucuman; but this prosperity has passed away, and the inhabitants are now reduced to great poverty. It has a church and three convents. Pop. about 4000.

FE (Santa de Bogota). See Bogota.
FE (Santa, de San Francisco), a tir., U. States, cap. New Mexico; lat. $35^{\circ} 41^{\prime}$ N.; lon. $106^{\circ} \mathrm{W} . ; 15 \mathrm{~m}$. E. of the Rio del Norte, at the W. base of a snow clad mountain, on a beautiful stream. It is irregularly laid out, and most of the streets are little better than common highways, traversing scattered settlements, which are interspersed with corn fields. Still four tiers of buildings, whose fronts are shaded with coridors of the rudest possible description, stand around the public square, and comprise the governor's house, custom house, barracks, the consistory of the Alcaldes, the military chapel, besides several private resitences, as well as most of the shops of the American traders. There are also two liandsome churches, sevcral convents, a college, and an hospital. It is the entrepot for the agricultural productions of the province. The vicinity is fertile in corn and rice, and contains a silver mine. 'The rearing of horses, sheep, and asses, is the chief occupation of the inhabitants. Pop. about 3600 .

FEADS and GOODMAN'S LSLANDS, S. Pacifie Ocean, C. from New Ireland; lat. $3^{\circ} 27^{\prime} \mathrm{S}$. ; lon. $154^{\circ} 45^{\prime} \mathrm{E}$. (r.) They consist of an irregular chain of low isles and sandbanks, encircled by a reef, extending nearly N.W. and S.E. 27 m . They abound with cocoa nuts, and some of them are inhabited.

FEAKLE, par. and vil. Irel. Clare; 36,972 ac. 1' 10,156 .
FEALE, a river, Ireland, rising near Coolnakenny, co. Limerick, which it divides for some distance from co. Cork; it then enters co. Kerry, and, after a N.W. course of abont 30 m ., falls into the shammon by a navigable estuary, called the Cashen, 11 m . above Kerry Head.

FEAR (Cape), a headland, U. States, N. Carolina, F. end of Smith's Island; lat. $33^{\circ} 4 \mathrm{~S}^{\prime} \mathrm{N}$. ; lon. $77^{\circ} 57^{\prime} \mathrm{W}$. (R.)

FEARN, two pars. Scot.: -1, Forfar ; 7 m . by 3 . Pop. 404.- 2 , Ross; 2 m . by $1 \frac{1}{2}$. It contains the ruins of a fine abbey, founded A.D. 1230, by the first Earl of Ross. Pop, (1851), 2123.

FEATHEL [Spanish, Plumas], a river, Upper California, an aflluent of the sacramento, has its rise in the sierra Neveda, about lat. $41^{\circ} \mathrm{N}$., from which it flows S. W., and falls inte the Sacramente, aboutlat. $38^{\circ} \mathrm{N}$. or 15 m . above New Helvetia. At its junction it appears nearly as broad as the former, but is closed by a bar. The Feather river is joined by the Iuba, about 20 or 25 m . above its junction with the Sacramento. Its entire course is about 40 m .

FEATHERSTONE, a par. Eng. York (W. Riding); 4050 ac. Pop. 1065.

FECAMP, a maritime tn. France, dep. Scine-Inferieure, 23 m . N.E. II avre; lat. $49^{\circ} 46^{\prime} 6^{\prime \prime}$ N.; lon. $0^{\circ} 22^{\prime} 15^{\prime \prime}$ E. (в.) The town is long and narrow, lying in a hollow, cooped up between two parallel ranges of hills, between which flows the small river Fécamp. It is composed of but one considerable street,
nearly 2 m . long, and has a spacions port, the water deep, and the outer anchorage good. The only noteworthy edifice is the parish church, once the collegiate church of the fameus abbey of Fécamp, refounded, in 983, by Richard I., Duke of Normandy. Fécanp is the seat of a tribunal of commerce; has a customhouse, a school of liydrography, and a theatre; and is the residence of consuls from various countries. It manafactures cottons, plain and coloured; linen, hosiery, cordage, oil, hooks, anchors, wool-cards, blankets, salted meat, kelp, \&c.; and has cotton spinneries, beet-root sugar-works, grain and tan mills, tanneries, and coopers' and shipbuilders' yards. The articles of trade include colonials, tea, gin, Baltic timber, salt, \&c. The fishery of cod, herring, mackerel, \&c., is carried on. The access to the port is easy, at the proper time of the tide, except with gales from the S.W. or W.; and the harbour has been much improved of late years. A fine lighthouse tower, on the Mont de la Vierge, on the left of the harbour entrance, is 56 ft . above the ground, and 427 ft . above the sea's lighest lcvel. The people of Fécamp are noted for personal beauty. The district around produces abundance of flax and colza. Pop. 9737.

FECKENHAM, par. Eng. Woreester; 6740 ac . Pop. (1851), 3245.

FEDALA, a seaport, W. coast, Marocco, on a promontory, 40 m . S.S.W Salee, surrounded by a fine fertile country, and has an excellcnt roadstead.

FEDAMORE, par. and vil. Irel. Limerick; 6739 ac. Pop. 4076.

FEDER-See, a lake, W ïrtemberg, about 6 m. S. E. Ricdlingen. It is nearly circular; diameter of about $2 \frac{1}{2} \mathrm{~m}$; and falls into the Danube, by the Kanzach. Its shores are so marshy as to make it almost inaccessible. It abounds with fish.

FED'T, a vil. and par. Norway, dist. Aggerhuus, r. bank, Glominen, at its indux into lake Ojeren, 12 m . E. Cliristiania. Pop. 2360.

FEEJEE, Fidji, Fiji, or Viti Islands, an isl. group, S. Pacific ocean, E. of the New IIebrides, between lat. $15^{\circ} 30^{\prime}$ and $19^{\circ} 30^{\prime} \mathrm{S}$.; and lon. $177^{\circ} \mathrm{E}$. and $178^{\circ} \mathrm{W}$. The entire group, which comprises altogether 151 islands, 65 of which are inhabited, is subdivided into two minor groups, the Eastern and Asaua groups, the latter forming the W. side of the A rchipelago. There are numerous spacious outlets or passages, to and from the central space, enclosed by the group, known as the Goro sea. Two of the islands only are of large size, namely, Viti Levu, and Paou or Sandalwood islands. The other principal islands are Vuna, Kantaou, Ovolau, Bau or Aimbow, Muthuatu, and Goro; some of the others, though smaller, are populous.

Valley of voona, in the island of ovalau. -From the Uaited Statet Fxploring Expedition,
They each contain from 5000 to 13,000 inhabitants. Most of the remainder are mere islets. They are of volcanic origin, but no signs of volcanic heat have been met with, excepting at Savu-Savu, ou the S. shore of the large island of

Paou. Appearances of craters, however, are frequent. The peaks are usually basaltic cones or needles, some of which rise to the height of several thousand ft . A luxuriant foliage covers these islands to their summits, giving them a singularly pleasing and picturesque aspect. Some beautiful and fruitful valleys occur in nany of them. That of Voona, in the island of Ovolau, shown in the wood-cut in preceding page, is strikingly characteristic of this description of Feejee scenery. One of those almost inaccessible peaks, on which the natives locate their towns for safety, is alse conspicuous in this view. The soil of the Feejees consists of a deep loam, of a yellowish colour, with a large portion of decayed vegetable matter, which, aided by a fine climate, and abundance of water, is extremely productive. Fruits of various kinds abound, including the bread-fruit, of which there are nine different sorts, the banana, cocoa, shaddocks, papaw apple, Tahiti chestnut, and a number of other fruits peculiar to the islands. Pumpkins, cucumbers, Cape gooseberry, guava, pineapples, water melons, and large red capsicums also abound. But the chief food of the inhabitants is the yam, of which they have five or six varieties. Sugar cane, turmeric, and tobacco are also cultivated by the natives. Saudalwood, for which these islands were formerly noted, has wholly disappeared. Vegetation is exceedingly rapid here. According to a statement made by the horticulturist to the U. States Exploring Expedition, turnips, radish, and mustard seed, after being sown 24 hours, the cotyledon leaves were above the surface. Melons, cucumbers, and pumpkins, sprung up in three days; beans and pease made their appearance in four. In four weeks from the time of planting, radishes and lettuce were fit for use, and in five weeks, marrowfat pease. The climate is agreeable and healthful. The mean temperature at Ovolau, one of the most beautiful islands of the group, about 8 m . long, by 7 broad, during the six weeks that the observatory of the U. States Exploring Expedition was establislied there, was $77^{\circ} 81^{\prime}$. The barometer stood at $30 \cdot 126 \mathrm{in}$. The lowest temperature was $62^{\circ}$; the highest $96^{\circ}$. The winds from April to November prevail from the E.N.E. to S.E., at times blowing a fresh trade-wind. From November to April, N. winds are often experienced, and in the months of February and March, heavy gales are frequent, and generally last for two or three days. The coasts abound with fish, including several of peculiar species. Crabs are also numerous amongst the mangrove bushes. The inhabitants of these islands are a barbarous and savage race, remarkable for cruelty, deceit, and cowarlice. They are also extremely covetous, and so addicted to lying, that they prefer telling a falsehood even in cases where truth would have served their purpose better. They are generally above the middle height, complexion between that of the black and copper-coloured races. Faces long, with a large mouth, good and well-set teeth, and a well-formed nose, eyes black and penetrating. Hnman sacrifices are frequent amongst them, and cannibalism common. The gratification of the latter propensity is not limited to enemies, or persons of a different tribe, or satisfying revenge; they will devour with equal avidity the flesh of their dearest relatives. When victims of this kind are selected, they are often kept for a time to be fattened. When about to be sacrificed, they are compelled to sit on the ground with their teet drawn under their thighs, in which posture they are tightly bound, thrust into an oven, and roasted alive. Many, however, are killed prior to being roasted. Shipwrecked people are uniformly eaten; not in fulfilment of any religious duty, as was at one time supposed, but wholly from the extreme relish the natives have for human flesh. The Feejeeans, however excel their neighbours in the useful arts, such as building large canoes, and the manufacture of native cloth and pottery, and they are polite in their communications with those they respect. They are ruled by chiefs, to whom great deference is paid, and who in turn appear to acknowledge the supremacy of the chief of Ambow, who has recently assumed the title of Tui Viti, king of the Feejees. The missionarics have made great progress
in the windward group. The frames of Feejeean houses are constructed of the bread-fruit tree, and are filled in with reeds, whilst the roof is covered with a thatch of the wild sugar cane. They are usually oblong in shape, and from 20 to 25 ft . in length. But the most remarkable structure is the mbure or spirit house, represented on the wood-cut. It is built on a raised and walled mound, and is of uncouth proportions, being nearly twice as high as it is broad at its base, and las a singular sharp-peaked roof. In these structures certain deities

MBURE, OR SPIRIT HOUSE ——From the Unlted States Exploring Expedition
are worshipped by priests called ambati. Of such structures, each town has at least one, and often several. The towns are usually fortified with strong palisades, and have but two entrances, in which are gates, the passage being so narrow as to admit of only one person at a time. Pop. estimated at 133,500.- (U. States Exp. Exped.; Capt. J. E. Erskine, R.N., in Jour. Roy. Geo. Soc. 1851.)

FEENAGH, par. Irel. Clare; 2854 ac. Pop. 1018.
FEERING, par. Eng. Essex; 2430 ac. Pop. 817.
FEG Y VERNEK, two places, Hungary:-1, A vil. co. Heves, near Tisza-Beo. It contains a church. Tobacco is extensively grown in the district. Pop. 1396.-2, (Also and Felsö), Two contiguous vils. Hither Danube, co. Honth, on the Szekincze, about 5 m . from Zsclesz. They contain a Protestant and a R. Catholic church, and have several mills. Pop. 900.

FEHRBELLIN, a tn. Prussia, gov. Potsdam, on a height near the confluence of the old and new Rhin, 31 m. N.W. Berlin. It is the seat of a law court; has a church; a distillery; a trade in cattle; and three annual fairs. The Prussians here, in 1675, defeated the Swedes. A monument has been erected to commemorate the victory. Pop. 1551.

FEIA, a lake, Brazil, in the N.E. of prov. Rio-de-Janeiro, about 8 m . S. the Parahiba. It is of a very irregular shape, two deep indentations on the N.E. and S.E. siles leaving only a narrow passage between them, and dividing the lake into two distinct portions, an E. and a W., of which the latter is the far larger ; circuit estimated at about 100 m . At tho E. side it communicates with the sea by an artificial canal, called Furado. Much land has thus been gained, and converted into excellent meadows. The lake abounds with fish; but it is so very shallow, that it is navigated only by canoes.

FEIGHCULLEN, par. Irel. Kildare; 4176 ac. P. 1357.
FEILI, a numerous tribe, Persia, living compact and united in one region, and not dispersed, like most of the others, in amall detachments, in different parts. The tribe occupies altogether about 100,000 houses, on the W. side of the mountains of Laristan, the territory of Shuster, and other places.

FEILLENS, a vil. France, dep. Ain, arrond. and 15 m . W.N.W. Bourg-en-Bresse. Pop. 2684.

FEIÖE, a small isl. Denmark, off N. coast, Lolland, and about 2 m . W. the island of Femöe, to which, as well as

Kragenas, there is a ferry. Feiöe unites with Skalöe and Weiröe in forming a parish; area 3 geo. sq. m. Pop. 1500.

FEISTRITZ, several places, Austria, particularly:-1, A market tn . Styria, circle of, and 9 m . N.N.W. Grätz, r. bank, Muhr. It has a parish church ; and two annual fairs. Lead, silver, and copper are worked and smelted in the neighbourhood. Pop. 550.-2, (or Wisterza-Nusta), A tn. Styria, circle of, and 18 m . N.E. Cilli, on the Feistritz. It has a church, townhouse, castle, and hospital; six cattle markets, and four annual fairs. Pop. of town, 917.

FEL-GYOGY, or Feisü Gyooy Alpestris, and FelsöGrogy Subalpestris, a vil. or rather scries of scattered vills. Austria, Transylvania, co. Nieder Weissenburg, about 8 m . from Tovis. It contains a Greck united, and two Greek non-united parish churches, and the ruins of an old castle; and is inhabited by Wallachians.

FELADELPIA, a vil. and com. Naples, prov. Calabria Ultra II., 13 m . S. Nicastro, in a plain. It has two churches, and a number of other handsome edifices. Pop. 3227.

FELANitX, or Felaniche [anc. Canatix], a tn. Spain, isl. Majorca, 28 m . E.S.E. Palma, in a valley surrounded by mountains. It is well built, has six squares, wide and convenient streets, and a parish church, chapel, townhouse, prison, two schools, an hospital, cemetery, and, on the neighbouring mountain of St. Salvador of Felanitx, an ancient castle, with subterrancan vaults, constructed by the Moors. Manufactures:-linen and woollen fabrics, brandy, and ropes. Trade:-rice, coffee, sugar, wine, brandy, fruit, and cattle. The town is of great antiquity; and among the hills hard by are numerous Moorish remains. Pop. 9752.

FELBACHI, a vil. Würtemberg, circle, Neckar, near Canustadt, about 6 m . E.N.E. Stuttgart. It is one of the prettiest villages in the kingdom, contains a parish church, and has some trade in an excellent wine, the growth of the district. Pop. 2777.

FELBRIGG, par. Eng. Norfolk; 1440 ac. Pop. 133.
FELDA, a vil. Hesse-Darmstadt, Oberhesse, circle, Grünberg, ncar Ulrichstein. It contains a Protestant parish church; and has a distillery, brewery, a trade in cattle, and three cattle markets. Pop. 880.

FELDBACH, a market tn. Anstria, Styria, circle of, and 22 m. E.S.E. Grätz, r. bank, Raab, here crossed by four bridges. It is partly surrounded with walls and ditches, has a townhouse, barrack, hospital, and poorhouse; and four annual fairs. The inhabitants carly embraced the Reformation, and were in consequence subjected to cruel persecution. P'op. 708.

FELDBERG, a market tn. Mecklenburg-Strelitz, cap. bail. of same name, on a peninsula, formed by the Ilaussee, 15 m . E. New Strelitz. It is irregularly built, and contains a courthouse and church. Pop. $715 .-$ The ball., area, 88 geo. sq. m., is well wooded, and contains numerous lakes. P’op. 7813.

FELDKIRCLI, or Campo di St. Pietro, a ti. Austria, Tyrol, cap. dist. of same name, on the III, and on the road over the Arlberg, 20 m. S.S.W. Bregenz. It stands in a narrow, but fertile valley, has spacious and handsome streets, is the seat of a civil and a criminal court, and of several public offices; contains six churches, olie of them a handsome gothic structure, of 1478; a Capuchin monastery, a massive tower, with a large bell, a gymnasium, high school, industrial school, school of design, an hospital, poorlouse, and establisliment for the cure of leprosy; and has two large cotton mills, a machine factory, and factory of fire engines; a bell foundry, oil-press, tile-work, manufactures of articles of wood, and distilleries of cherry brandy. The old castle, on the site of a Roman fort, of which traces still remain, was once the key of the Tyrol, but is now only used as a barrack. Pop., tn. 1941. Area of district, 72 geo. sq. m. Pop. 19,84.

FELDKIRCHEN, a market tn. Austria, Carinthia, circle of, and 14 m . N.E. Villach, on the Tiebelbach. It has a parish church, and manufactures of scythes and shovels. In the neighbourhood are two iron-mills, and a bathing establishment; and at some distance a ruinous old castle, the original seat of the family of Prince Dietrichstein.

Feldsberg, or Veltspurg, a tn. Lower Austria, in a valley, near the frontiers of Moravia, 39 m . N.N.E. Vienna. It consists of the town proper and a suburb; the former, surrounded with old walls, with three gates, is built with toler-
able regularity, contains twe churches, one of them large and stately, in the Ionic style, surmounted with two towers and a dome, and pessessed of fine paintings; a townhouse, with a turret; a monastery, and hospital. On a gentle height, E. of the town, stands the palace of the Prince of Lichtenstein, a large and handsome edifice, with fine gardens, and the magnificent park of Deimwald. Pop. 2322.

FELETTO [Latin, Felectum], a vil. and com. Sardinian States, Piedmont, prov. of, and 14 m . N.N.E. Turin, on the Orco. It contains a handsome square, with well-built houses, lined by au arcade; and a parish church, adorned with frescoes and paintings; and has a trade in cattle, mules, and hemp; a weekly market, and an annual fair. Pop. 1704.

FELICES de Buelna (San), a tn. Spain, prov. of, and 14 m . S.S.E. Santander; with a prison, and two schools; some mills, and an annual sheep fair. Pop. $126 \overline{5}$.

FELICUDI (anc. Phoenicusa), an isl. Mediterranean, off N. coast, Sicily, belonging to the Lipari group, and 10 m . W. Salina. It is 9 m . in circuit, and is evidently an extinct volcano with three lofty summits. The only trace of fire is in a hot sulphureous spring. The coasts are rugged and broken, and exhibit everywhere bold masses of basaltic lava. On the W.side is a remarkable cavern, entered by a natural colonnade, which terminates in a spacious hall, 160 ft . long, 120 broad, and 50 ft . high. Felicudi is fertile and well cultivated. The inhabitants, who are hardy and industrious, have a small church. Pop. 800.

FELIPE (San), a tn. Spain. Sce Jativa.
FELIPE (San), a tn. Chili. See Aconcagua.
FELIPE (San).-1. A tn. Venezuela, 38 m . S.W. the Gulf of Triste, and 135 m . W. by S. Caracas. The streets are spacious and regular. The soil in the vicinity is remarkably fertile, producing cocoa, coffee, maize, rice, indigo, and a little cotton, the cultivation of which forms the chief occupation of the inlabitants. Pop. 7000.-2, A tn. Mexiean Confederation, dep. of, and 22 m . N. Guanaxato, nearly 7000 ft . above sea level. Pop. about 8000 .

FELIS-Saõ, a tn. Brazil, prov. of, and 280 m . N.N.E. Goyaz, on a small auriferous river of same name, a tributary of the Maranhaz. It contains three churches, one of which is very old. The inhabitants only cultivate the provisions necessary for their own consumption, but have some trade in cattle. On a hill about $9 \mathrm{~m} . \mathrm{S}$. of the town, are some remarkable caverns, and at a considerable distance S.S.E. are the thermal springs of Caldas-de-Frei-Reinaldo, in which the water is almost boiling hot.

FELISKIRK, or Felixkirk, par. Eng. York (N. Riding); 6990 ac. Pop. 931.

FELITTO, a tn. Naples, prov. Principato-Citra, 20 m. S.S.E. Campagna, r. bank, Calore. Pop. 1500.

FELIX, a vil. Spain, Andalusia, prov. of, and 16 m . W.N.W. Almeria, at the foot of the sierra de Almejijar. It has wide paved streets, two squares, a parish church, a townhouse, two chapels, a prison, school, storchouse, and cemetery. In the vicinity antimony is still, and lead was formerly wrought. Trade:-with Almeria in cattle, grain, antimony, and rice. Pop. 2140.-Felix, with various affixes, is the name of several small villages.

FELIX.-1, An isl. S. Pacific ; lat. $26^{\circ} 20^{\prime}$ S.; lon. $80^{\circ} \mathrm{W}$. At its N.W. extremity is a remarkable rock, which, in almost every point of view, resembles a ship under sail.- 2, A cape, Arctic America, forming the N. point of King William's Land; lat. $69^{\circ} 55^{\prime}$ N.; lon. $98^{\circ} 5^{\prime}$ W. (r.).-3, A harbour, Arctic America, E. coast, Boothia Felix; lat. $69^{\circ} 58^{\prime} 42^{\prime \prime} \mathrm{N}$. ; lon. $92^{\circ} 1^{\prime} \mathrm{W}$. (r.) Captain Ross wintered here in 1829-30.

FELIXSTOW, par. Eng. Suffolk; 1170 ac. Pop. 552.
FELIZZANO [Latin, Felicianum], a tn. Sardinian States, Picdmont, prov. of, and 9 m . W. Alessandria, cap. mandamento of same name, l. bank. Tanaro, on the high road leading to Turin. It was formerly a place of considerable extent, but now consists principally of a small town, inclosed within the walls of its old castle, and of several suburbs. It contains two parish churches, a convent, and two charitable endowments. Pop. 2175.

FELKA, or Folk-Velka, a tn. Hungary, co. Zips, in a plain on the Felkbach, $8 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Kasmark. It contains a Protestant chureh, and has manufactures of linen, several distilleries and mills, and a trade in cattle. Pop. 1322.

FELKIRK, par. Eng.York (W.Riding); 6360 ac. P. 1186

FELLATAHS, Foulahs, or Fulais, a remarkable race of the negro type, the original locality of which is unknown, but which is now widely diffused throughout W. Africa, particularly Senegambia. Though of the negro family, they differ widely in their physical characteristics from that race, having neither their deep jet colour, crisped hair, flat nose, nor thick lips. In person, they are decidedly handsome, and mostly of a light copper colour; features regular and good, mouths small, European lips, and noses inclining to aquiline; hair soft and silky, well-defined black eyebrows, long egelashes, and fine black eyes; tall, well proportioned, and of erect and graceful figure; some of the young women are very good looking, and would be considered beautiful even in Europe. They are shrewd and intelligent; possess great influence in the districts where they reside; extremely active, polished, and insinuating in their manners, and said to possess great bravery and perseverance. They are extensive and active traders, and industrious agriculturists, which is their chicf and favourite employment. They have now many large commercial towns, large tracts of highly-cultivated lands, and numerous schools, in which their children are carefully educated. They are mostly Mahometans, to which religion they became converts about 400 years ago. They wear great numbers of greegrees or amulets, composed of paper of all sizes, upon which portions of the Koran are transcribed, and covered with silver, copper, or leather.

FELLETIN, a th. France, dep. Creuse, 24 m. S.E. Guerct, a ncat and thriving place, on an agreeable hilly site, at the foot of which flows the river Creuse. It has a high school, and manufactures carpets, cottons, thread, and yarns, and has dye-works, and paper-mills. Pop. 2959.

FELLIN, a tn . Russia, gov. Livonia, on a river of same name, 112 m . N.E. Riga. It is a poor place, composed of wooden houses, contains a church and a school, and has an annual fair. It was once defended by a strong castle, which makes some figure in the early history of the country, but is now a mere ruin. Pop. (1849), 1909.

FELLONICA, a vil. Austrian Italy, prov. of, and 28 m . S.E. by E. Mantua, r. bank, Po, having a good church, and a small brandy distillery. Excellent grain and fruits are grown in the vicinity, and in the rich meadows by the river side, numerous flocks and herds are depastured. Pop. 2301.

FELMERSHAM, par. Eng. Bedford ; 2400ac. Pop. 531.
FELMINGHAM, par. Eng. Norfolk; 2010ac. Pop. 408.
FELOOI'S, an African people, inlabiting a maritime territory in Senegambia, between the rivers Gambia and Casamanza, about 75 m . in length, W. to E., and about 45 m . in breadth, with between 60 and 70 villages. The chief occupation of the natives is rearing cattle and goats. Their colour is deep black, skin rough, features tolerably regular, hair woolly, but longer than that of negroes in general. Stature small, but muscular. They are of sullen and morose dispositions, and savage in their resentments, but inoffensive when unprovoked. They are supposed to number about 50,000 .

FELPHAM, par. Eng. Sussex ; 1800 ac. Pop. 555.
FELSBERG, a tn. Hesse Cassel, prov. Niederhessen, cap. bail. same name, l. bank, Edde, 14 m. S.S.W. Cassel. It contains an ancient parish church, a chapel, and the ruins of an old castle, now partly used as a powder magazine, and has dye-works, and four annual fairs. Pop. 1233.

FELSHAM, par. Eng. Suffolk; 1440 ac. Pop. 398.
FELSTEAD, par. Eng. Essex; 7170 ac. Pop. 1798.
FELTHAM, par. Eng. Middlesex ; 2620 ac. Pop. 1029.
FELTHORPE, par. Eng. Norfolk; 2250 ac. Pop. 574.
FEL'TON, three pars. Eng.:-1, Hereford; 990 ac. Iop. 113.-2, Northumberland; 13,950 ac. Pop. 1585.-3, (West), Salop; 6160 ac. Pop. 1087.

FLLTRE [Latin, Feltria], a to. Austrian Italy, gov. of, and 44 m. N.N.W. Venice, cap. dist. of same name, on a height above the little river Colmeda. It is the see of a bishop, and the seat of several public offices, is partly fortified and tolerably well built, having spacious well-paved strcets, contains a cathedral and several other churches, a gymnasium, ecclesiastical seminary, two convents, an ordinary, and an orphan hospital, and has silk-mills, a considerable trade in silk, wine, and oil, and an annual fair of three days. Pop. 5500.

FELTWELL, St. Mary, or St. Nicholas, par. Eng. Norfolk; 14,810 ac. Pop. 1512.

FELTZ, a vil. Holland, Duchy Luxemburg, l. bank, Erens, 12 m . N.N.E. Luxemburg. It contains a parish church, and a school-house, and has manufactures of woollen cloth, tanneries, a cotton and several other mills, and four annual fairs. Pop. 926.
feludsh, or Pheleche, an isl. at the head of the Persian Gulf, E. side, off the entrance to Graen Harbour; lat. $29^{\circ} 27^{\prime}$ N.; lon. $48^{\circ} 16^{\prime}$ E., length, $7 \frac{1}{2} \mathrm{~m}$. N.W. and S.E ; breadth, 2 to $3 \frac{1}{2} \mathrm{~m}$.; the chief town is situated on the N. side of the island.

FELYGEHAZA, a tn. Hungary, dist. Little Kumania, 67 m. S.S.E. Pesth. It contains a large R. Catholic parish church, and handsome townhouse, and has four famous annual cattle fairs. The surrounding district is fertile, and produces much wine and excellent fruit. From antiquities found in the vicinity, the Romans are supposed to have here had an important station. The town was almost destroyed by the Turks in the 17th century. Pop. 17,000.

FEMERN, or Fehmarn [Latin, Fimbria, Cimbria-parva], an isl. Denmark, duchy, Schlcswig, off N.E. coast, Holstein, from which it is separated by the narrow and shallow Femersund ; lat. (N.W. point) $54^{\circ} 32^{\prime} 44^{\prime \prime}$ N.; lon. $11^{\circ} 4^{\prime} 33^{\prime \prime}$ E. (c.); length, about 12 m .; breadth, 8 m . It is very flat, and has a marshy fertile soil. In the N. and W. parts are several lagoons, the waters of which in summer are nearly evaporated, and the swamps thus formed exhale pestilential vapours. On the W. shore is a lighthouse. The island is divided into four parishes; its principal town is Burg. Inhabitants chiefly agriculturists. Pop. 8600.

FEMINA, a small isl. off N. coast, Sicily, in the E. extreme of Carini Bay, about 10 m . N.W. Palermo. It is merely a small rock, rather steep at its N . end, on which an old tower of considerable strength is placed. In this tower Cottisona, one of the numerons personators of Don Sebastian of Portugal, was executed as a sorcerer in the 16 th century.

FEMOE, a small isl. Denmark, N. of the coast of isl. Lolland, area, about $2 \frac{1}{2}$ geo. sq. m. Pop. about 700.

FEN-Ditton, par. Eng. Cambridge; 1862 ac. Pop. 537. Fen-Drayton. See Drayton-Fen.
FEN-Stanton, par. Eng. Huntingdon; 2400 ac. P. 1032.
FENAGH, par. Irel. Leitrim; 9765 ac Pop. 4426.
FENERIF, or Finerive, a tn. and bay, isl. Madagascar, N.E. coast ; lat. $17^{\circ} 28^{\prime} \mathrm{S}$.; lon. $49^{\circ} 23^{\prime}$ E. The town is well situated for the purposes of traffic, having the advantage of water carriage for a considerable distance into the interior, by which means rice, yams, and other vegetables, are con veyed to the coast with greater despatch and facility, and at less expense than in most other ports; but the anchorage is exposed to violent currents, and a heavy surf.

FENESTRELLE [Latin, Finis Terre], a tn. Sardinian States, Piedmont, prov. l'inerolo, div. of, and 32 m . W. Turin, near the Chisone, in a very mountainous district. It stands in a narrow pass, and is so strongly dcfended by forts and outworks, that it is regarded as the N. bulwark of Piedmont. It contains a handsome parish church, a small college, and an hospital; and has several tanneries and mills, and a trade in flax, hemp, larchwood, and honey. Pop. 1291.

FENIT', an isl. and par. Ireland, co. Kerry, 7 m . W.N.W. Tralee; containing the remains of an old church and castle. Area, 686 ac. Pop. 315.

FENITON, par. Eng. Devon; 1340 ac. Pop. 315.
FENNAGII, par. Irel. Carlow ; 10,524 ac. Pop. 4314.
FENNOR, two pars. Irel.:-1, Meath; 1127 ac. Pop. 201-2, Tipperary; 7918 ac. Pop. 2338.

FENOAH, par. Irel. Waterford; 3613 ac. Pop. 1164.
FENTON, two pars. England:-1, co. Lincoln; 1220 ac . Pop. 120.-2, (-Kirk), co. York (W. Riding); 4410 ae. Pop. 120.

FENWICK, a par. and manufacturing vil. Scotland, co. Ayr, 4 m. N.N.E. Kilmarnock. John Howie, author of the Scots Worthies, was a native of the parish. Area, 9 m . by 6 m . Pop. 2018.

FENY, or Föny, a vil. Hungary, co. Torontal, 15 m. from Temesvar. It contains a Greck non-united church, and stands in a fertile district. Pop. 1947.

FEOCK (St.), par. Eng. Cornwall; 2530 ac. Pop. 1476.
FeOdosia, a maritime tn. Russia. See Kaffa.
FEOU-Leang, or Fow-Lleang, a tn. China, prov. Kiang see, 45 m . N.E. You choo.

FERAI KHOLM, an elevated dist. Afghanistan, having E. and S.E. the river Helmund, and W. and N.W. the Koh-i-Baba range ; lat. $34^{\circ} 20^{\prime} \mathrm{N}$.; lon. $67^{\circ} 54^{\prime} \mathrm{E}$. It is well cultivated, fertile, and populous.

FERBANE, a small tn. Ireland, King's co., $12 \frac{1}{2} \mathrm{~m}$. W. Tullamore, on the Brosna. It is neatly built, and contains an Established church, a R. Catholic chapel, Wesleyan and Baptist meeting-houses; a dispensary, and a loan fund. Marketday, Thursday; fairs, Angust 2, and October 20. Pop. 537.

FERE, three ths. France:-1, (La), [Latin, Fara], dep. Aisne, $15 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Laon, on an isl. in the Oise. It is forti fied, and has a large arsenal, and an artillery school; and manufactures of chemical stuffs, soap, linen, \&c. It was taken by the Spaniards in 1536, and by the allies in 1814. After the battle of Waterloo, it was taken by the Prussians, after a resistance of several months. Pop. 3129.-2, (-Champenoise), dep. Marne, arrond. of, and 21 m. S. Epernay, agreeably situated on the Pleurs. It has a manufactory of sacking, \&c., and some transit trade. The French imperial forces were defeated in the environs by the allies, March 25, 1814. Pop. 1526.-3, (-en-Tardenois), dep. Aisne, 25 m . S. by W. Laon, on the Oureq. It has a manufactory of cotton and woollen thread and yarn, hosiery, beet-sugar, meal, sabots, \&c.; and a trade in grain, wood, wine, wool, and flax. The town was once a stronghold, and a chief place of Tardenois. It was taken in 1567 by the IIuguenots; and in 1589 retaken by the Leaguers; in 1652, it was pillaged by the Spaniards. Pop. 2212.

FEREDJIK, Phereh, or Feret, a tn. Turkey in Europe, $56 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Adrianople, agreeably situated on the declivity of a hill, $r$. bank, Maritza, which is navigable to the town. It is surrounded by a low wall, flanked with towers, and contains a mosque and baths. The hill on which it stands is covered with vines, alternated with cultivated fields. In the vicinity are hot springs, much frequented for their medicinal qualitics. Pop. 3000.

FERENTINO [anc. Ferentinum], a tn. Papal States, deleg. of, and 6 m . N.W. Frosinone, on the road from Naples to Rome, by Mount Casino. It was anciently a considerable town of the Volsci, and is still surrounded by remains of old walls, built of hewn stone, without mortar. It is the see of a bishop, and contains a cathedral, several parish churches, and three convents. Pop. 8000.

FERET, a tn. Turkey. See Feredin.
FEREZ, a tn. Spain, Murcia, prov. of, and 40 m . S. by W. Albacete, on a gentle height, in a mountainous district. It contains a parish church, and a townhonse ; and has some trade in grain, wine, oil, and checse. Pop. 1336.

FERGUS, a river, Ireland, co. Clare, which it traverses in a S.E. direction past Ennis and Clare, and, after a course of about 27 m ., enters the Shannon by a broad estuary, navigable for vessels of considerable burthen.

FERIA, a tn . Spain, Estremadura, prov. of, and 35 m . S.S.E. Badajos, on a lofty hill, crowned by an ancient and ruinous castle, near l. bank, Guadajira. It has narrow, stecp, and badly-arranged streets; a townhouse and prison, parish church, chapel, three schools, seven fountains, and a cemetery. Manufactures :-woollen and linen fabrics, wine, and oil. Trade:-manufactured goods, cattle, fruits, hardware, earthenware, agricultural implements, \&c. Pop. 2069.

FERINGABAD, a vil. Beloochistan, agreeably situated 6 m . N.E. Moostung, on the route thence to the Bolan Pass. The climate is delghtfful, and the fertile country in the vicinity abounds in gardens and orchards. Pop. about 800.

FERLACH, a tn. Austria, Carinthia, circle of, and 7 m . S. Klagenfurt, r. bank, Drave, in the Rosenthal. It is divided into Upper and Lower Ferlach; and has numerous manufactures of fire arms, bayonets, cutlery, wine, steel, and ironware, which furnish the materials of an extensive trade. Pop. 2000.

FERMANAGH, an inland co. Ireland, prov. Ulster, having N. Tyrone and Donegal, S. Cavan, E. Tyrone and Monaghan, W. Cavan and Leitrim. Greatest length, N.W. and S.E. 45 m. ; greatest breadth, 26 m .; area, $714 \mathrm{sq} . \mathrm{m}$. , or 457,195 ac., of which 289,228 are arable. The county is divided lengthways into two nearly equal portions by lough Erne, which occupics 36,348 ac. of its surface. The country generally exhibits a succession of abrupt eminences of slight elevation, but is mountainous towards its W. boundary, the

YoL. 1 .
highest summit here, called Cuilcagh, on the borders of the county Cavan, attaining an altitude of 2188 ft . Few of the other elevations exceed 1000 ft . The soil is variable, and not remarkably fertile. Oatz, barley, wheat, flax, and potatocs, are the principal crops. Considerable numbers of cattle are bred on the high grounds. Most of the farms are under 10 ac . This county is better wooded than most othcrs in Ireland, there being about 8000 ac . appropriated to the growth of timber, chiefly oak, ash, elm, beech, and fir. Coal and iron ore are fond in small quantities, limestone in abundance. Manufactures unimportant, consisting chiefly of coarse linen for domestic use. The county is divided into 8 baronies-Clanawley, Clankelly, Coole, Knockninny, Lurg, Magheraboy, Magherastephena, and Kilmore, and 23 pars. Principal town, Enniskillen. It returns three members to the llouse of Commons, two for the county. Registered electors (1850), 852. Pop. (1841), 156,481; (1851), 116,007.

FERMANVILLE, a vil. France, dep. Manche, arrond. of, and about 9 m . from Cherbourg. It has extensive quarries of granite. Pop. 1162.

FERMO, a deleg. Papal States, bounded, N. and N.W., by deleg. Macerata, W. Camerino, S. Ascoli, and E. the Adriatic ; greatest length, N. to $\mathrm{S} ., 27 \mathrm{~m}$. ; greatest breadth, 18 m . Area, about $370 \mathrm{sq} . \mathrm{m}$. In the W. it is partly covered by ramifications of the Apennines, but has a general slope E.N.E., and becomes flat as it approaches the coast. The principal streams are the Chienti, which waters the N., and the Tenna and Aso, which traverse it centrally. All these streams flow E. to the Adriatic. The soil is fertile, raising good crops of corn and maize, and rearing many cattle. Much attention is paid to the culture of bees and silk-worms, and the fishery on the coast is very productive. Pop. 89,000 .

FERMO [anc. Firmum Picenum], a city, Papal States, cap. deleg. of same name, 4 m . from the Adriatic, and 30 m . S.S.E. Ancona. It stands on high ground, and is surrounded by old walls and ditches. It has a cathedral, a number of other churches and convents, a nniversity, attended, in 1841, by 235 students; two collections of statuary and paintings, and a palace, built by Jerome Bonaparte. It carries on some trade by means of the small neighbouring harbour of Porto di Fermo, from which grain, silk, and woollen cloth are exported. Fermo was founded by the Sabines, befure Rome existed. Pop. 6331.

FERMOSELLE, a tn . Spain, Leon, prov. of, and 28 m . S.W. Zamora, on a hill slope, at the confluence of the Tormes with the Douro. It is commanded by an ancient castle, and has clean wide streets, a parish clurch, with a handsome square tower; a chapel, townhouse, prison, two schools, an hospital, several fountains, and a cemetery. Manufactures:linen fabrics, wine, oil, and brandy. Trade:-grain, oil, wine, fruits, brandy, and wool. Pop. 2501.

FERMOY, $a$ tn. and par. Ireland, co. Cork. The town, one of the largeat military establishments in Ireland, is $18 \frac{1}{2} \mathrm{~m}$. N.N.E. Cork, r. bank, Blackwater, here crossed by a stone bridge of 13 arches. It has spacious and regular streets, houses, in general, handsome and uniform; an elegant pointedgothic parish church, with a beantiful spire ; two R. Catholic chapels, three Presbyterian, and four Weslcyan meetinghouses; a small neat courthouse, several schools, a loan fund, savings-bank, two lending libraries, a newsroom, and a dis pensary. The barracks, adapted for both cavalry and infantry, have accommodation for about 3000 men , and occupy an elevated situation on the l. bank of the river. There are some large flour-mills, and a brewery. Weekly market on Saturday; three annual fairs. P. (1841), 6379. Area of par. $3481 \mathrm{ac} . \mathrm{P}$. including town, 7513.-(Local Correspondent.)

FERNAN Nux̃ez, a tn. Spain, Andalusia, prov. of, and 11 m. S. Cordova, in a fertile plain. It is well built, has clean, wide, and paved streets, two squares, a parish church, several chapels, two schools, a townhall, prison, hospital, orphan asylum, three fourtains, a cemetery, and handsome ducal palace. Manufactures:-linen and woollen fabrics, earthenware, tiles, wine, oil, and soap. Pop. 5652.

FERNANDEZ, isl. Pacific Ocean, See Juan Fernandez.
FErNando-de-Apure (Sas), a tn. Venezuela, dep. Apuré, r. bank, Apure, near its junction with the Portuguesa, 170 m . E. Varinas or Barinas. It carries on a considerable trade in the produce of the herds of cattle which pasture on the lowest parts of the Llanos. Pop. 6000.
the lowst parts of the Llanos. Pop. 600.
124

FERNANDO-de-Noronha, a group of isls. belonging to Brazil, consisting of one large, and several smaller, N. Atlantic, about 210 m. N.E. Cape St. Roque, prov. Rio-Grande-do-Norte, Brazil. Extreme point of the principal island on the S.E. side, lat. $3^{\circ} 50^{\prime} 24^{\prime \prime}$ S.; lon. $32^{\circ} 28^{\prime}$ W. (r.) The group extends nearly 7 m . about S.W. and N.E., and is less than 2 m . broad; the shores are rocky, and the surf frequently high ; at such times there is no safe landing. The large island is about 20 m . in circumference; its most remarkable feature is a conical hill about 1000 ft . high, the upper part of which is exceedingly steep, and, on one side, overhangs its base. The rock is phonolite, and is divided into irregular columns. The whole island is covered with wood; but, from the dryness of the climate, two years sometimes passing without rain, there is no appearance of luxuriance. Viewed from the sea, Fer-nando-de-Noronha has a picturesque aspect, its lofty barren peak being conspicuous from every point, while, at some elevation, great masses of the columnar rock, shaded by laurels, and ornamented by a tree covered by fine pink flowers, like those of a fox-glove, but without a single leaf, give a pleasing effect to the nearer parts of the scenery. There is good fishing round the island, in which there are two harbours, but not very safe in stormy weather. Fernando has long been a place of exile and imprisonment. The Portuguese had formerly no fewer than seven forts here. No woman is allowed to land on this island. There is a garrison for preventing the escape of criminals.-(Surveying Voyage of the Adventure and Beagle ; Horsburgh; M'Gregor's Progress of America).

FERNANDO PO, an isl. Bight of Biafra, W. Africa, about 20 m . from the mainland, between lat. $3^{\circ} 12^{\prime}$ and $3^{\circ} 47^{\prime}$ N .; and lon. $8^{\circ} 26^{\prime}$ and $8^{\circ} 57^{\prime} \mathrm{E}$. It is of voleanic origin, and in form an oblong square, broadest at the S. extremity, 35 m . long, and 22 m . broad. A ridge of mountains traverses twothirds of its length, S. to N., terminating in a magnificent cone, $11,040 \mathrm{ft}$. high, called Clarence Peak, the summit of which is almost constantly enveloped in clouds. It is doubtful whether this peak be yet perfectly extinct, as smoke is said to be occasionally seen; but the highest part, composed evidently of volcanic ashes, has been so decomposed, that it is mantled with grass. There are numerous streams and brooks in the island, which are described as being remarkably pure, but

150 ft . from the base to the first branch, and have, in the dry seasons, festoons of beautiful climbing plants pendant from the branches. The other trees are the goora or sterculia, a species of ebony ; a dark-coloured wood like mahogany, and several species of shrubs. The sugar-cane also grows here wild, and in great abundance; yams, likewise, are grown in great quantities, and are esteemed the finest in Africa; they form the chief article of food of the inhabitants. The animals aremonkeys and squirrels of various species, a kind of porcupine, antelopes, bush rats, land crabs, and snakes; the latter in great numbers, and very large. Birds are numerous, some of them rare, and of remarkable fine plumage. Fish are also abundant at certain seasons, particularly a species of clupea, about the size of an English sprat. An opinion at one time obtained, that the climate of Fernando Po was more healthy than that of the contiguous mainland, but subsequent experience proved this to be an error, most of the Europeans who attempted to settle in the island having been seized with fever, from which few recovered. It was on this account abandoned as a military station in 1834, the detachment of British troops by which it was occupied baving been then withdrawn. The rainy season commences about the latter end of May or beginning of June, and terminates about the middle or end of November.

The natives of Fernando Po, called Edceyahs, are a peculiar race, and wholly different in their physical characteristics and language from their neighbours on the continent. Their appearance is by no means prepossessing at first, but, on further acquaintance, they are found to be a singularly amiable people, generous, hospitable, and of the most humane and kindly dispositions, brave, yet forbearing, and reluctant to spill the blood even of an enemy. In physical conformation, they are, for the most part, well made and muscular, with an average height of 5 ft .6 in . The hands and feet, especially of the females, are smaller than in the generality of the African races. The face, also, is more inclined to be round, the cheekbones not so high, the nose less expanded, the lips thinner, and the mouth better formed, than in their continental neighbours. The skin, too, is not so black, hair silky rather than woolly, countenance open, good-natured and agreeable, and the eye expressive of intelligence. Their habitations are extremely rude, being nothing more than a coarse mat of palm leaves thrown over four uprights, and open to all the winds of heaven.

There are several harbours in the island, the most spacious of which is Maidstone Bay, at the N.E. end, where, in a creek or cove, is situated Clarence Town, the principal English settlement, established in 1827. It is built on a rocky point of land, about 100 ft above sea level. There is but one principal street; on each side of which the wooden houses, amounting to 180, are placed at irregular intervals. The population is between 800 and 900 , chiefly liberated Africans from Sierra Leone. George's Bay, on the W. side of the island, is also a remarkably fine har bour, surrounded by the most beautiful scenery, but the water is too deep for anchorage, except close in shore. The island was discovered in 1471 by the Portuguese, who, in 1778, ceded it to Spair. In 1827, it was taken into the possession of England, by
much infested with alligators, and, consequently, dangerous to bathe in. The whole appearance of this beautiful island is picturesque in the extreme, being covered to its highest elcvations, on the $N$. part, with dense forests and luxuriant vegetation, while, on the S., some fine park scenery compensates a comparative deficiency of trees. The latter consist chiefly of palms and the magnificent bombax, or silk cotton tree, 'looking in the distance,' says Captain Allen, 'so like the white sails of vessels, hull down, that one might almost have supposed they saw a numerous fleet with canvas loosened to dry.' Many of these giants of the African forests measure
consent of the latter country.-(Allen's Niger Exped.; Boteler's Africa, d.c.)

FERNANDO (SAN), a tn. Chili, prov. Conchagua, 80 m . S. Santiago, r. bank, Tinguaririca. It contains two churches, one of which was built by the Jesuits, and is a beautiful structure; a college, and a convent. This town was founded in 1741 . Pop. 7500.

FERNANDO (San), or Isla de Leon, a tn. Spain, Andalusia, prov. of, and 7 m . S.E. Cadiz, near the S.W. extremity of the Peninsula, on a flat, in the Isla Gaditana or Isla de Leon (see Plan of Cadiz Harbour), where, from the
absence of any surrounding beights, it stands exposed to all winds, and in summer suffers much from excessive heat, which makes fever frequent. It is strongly fortified, both by nature and art. The intricacy of the channel, and the works which guard it, make a hostile approach by aea almost impossible; the salines which surround it, when filled with water, give it the protection of a wet fosse of about 8 m . in length, and the only approach by land is across a pavement about 30 yards wide, and the fine old bridge of Inazo, built over the navigable channel of San Pedro, and defended by batteries of the most formidable description. The town is in general very indifferently built. Many of the houses are untenanted, and not a few of them absolutely minous, and the great majority of the streets are unpaved. The only street which can be considered handsome is the Calle Real, which is nearly $1 \frac{1}{2} \mathrm{~m}$. long, and lined with substantial, commodious, and elegant houses, generally three stories high. The squares are seven in num ber, but none of them deserve notice except that of the Tres Cruces, which is finely planted, and furnishes the only promenade, and the Plaza de la Constitucion, in which the courthouse, prison, and other official buildings are placed. These are on a magnificent scale, but remain unfinished. The other edifices and establishments of any importance are, two parish churches, one of thein a large and handsome structure, with three naves and two towers; another church, belonging to an old Carmelite monastery, the buildings of which are now used as artillery barracks; a nunnery, in which a girls' school is kept, a large hospital, a naval college, and an endowed school. To the district of San Fernando belong the arsenal and extensive establishments of La Carraca (which see). The manufactures consist of leather, starch, and vermicelli, and there are numerous flour-mills, and extensive salt-works. A great many of the inhabitants live by fishing. The trade is almost confined to salt and fish, and at the annual fair, which lasts 10 days, a great many articles, chiefly of primary necessity, are sold. Pop. 9729.

FERNE, isls. England. See Farne.
FERNEX, or Ferney, a frontier tin. France, dep. Ain, 6 m . S.E. Gex, $1 \frac{1}{2} \mathrm{~m}$. N. Geneva, in a beautiful locality, at the foot of the Jura, in a picturesque and fertile conntry. It is small, and its only manufactules are a few watches and some pottery. It is chiefly noted for having been the resid ence of Voltaire, who in fact founded it, in 1759 , and lived here mostly afterwards, till near the end of his career (left, Feb. 6, 1778 ; died in Paris, May 30, same year). The house in which he lived is still standing, and the church, with the inscription, Deo erexit Voltaire, is now a farmhouse. Pop. 1214.

FERNO, a vil. and par. Austrian Italy, prov. of, and 23 m . N.W. Milan; with a parish church. Pop. 2180.

FERNS, a par. and decayed tn. Ireland, co. Wexford; area of par. $10,413 \mathrm{ac}$. The town, 17 m . N. by W. Wexford, although formerly a place of considerable importance, and a bishop's sce, embracing the whole co. of Wexford, until united, in 1835 , with Ossory, is now little better than a mean village. It contains, however, the ruins of an abbey, a modern cathedral, a R. Catholic chapel, and dispensary. Four fairs anaually. Pop. (1841), of tn. 632 ; of par. 2860.

FEROE ISLANDS. See Faröe.
FEROZABAD [the victorious residence], a tn. Hindoostan, prov. of, and 24 m . E. Agra.——2, A tn. Persia, prov. Fars, $64 \mathrm{~m} . \mathrm{S}$. Shiraz. It is surronuded by ancient walls, and has a large temple and other remains of antiquity.

FEROZEPOOR, a tn. of N.W. Hindoostan, l. bank, and 3 m . from the Sutlej, 66 m . W. Loodiana. It has a strongly fortified castle and good bazaars, and is fast rising into importance under the protection of the British. In December 1845, the British here defeated the Sikhs.-2, A tn. Hindoostan, prov. Agra, 5 m . S.S.W. Delhi.

FEROZESHAH, a vil. Hindoostan, 10 m . E.S.E. Ferozepoor, where the British defeated the Sikhs, Nov. 18, 1845.

FERRANDINA, a to. kingdom, Naples, prov. Basilicata, 35 m. E.S.E. Potenza, near r. bank, Bassento. It contains a college, several churches, a monastery, three convents, an l:ospital, and two charitable institutions. Two annual fairs. Good wine is produced in the vicinity. Pop. 5200.

FERRARA, a deleg. Papal States, bounded, N. by Austrian Italy, W. by duchy of Modena and deleg. Bologna, S. by deleg. Ravenna, and E. by the Adriatic; greatest length, E. to W., 50 m. ; greatest breadth, 42 m. ; area, $1200 \mathrm{sq} . \mathrm{m}$.

It is almost entirely composed of a delta, formed by branches of the Po, and by the Panaro and Primaro, and including within it the extensive marshes and lagoons of Commachio. These marshes are far too wet to admit of cultivation, and the exhalations from them make the surrounding districts very unhealthy. The soil in general is remarkably fertile, and, under a very imperfect system of agriculture, raises heavy crops of corn, hemp, and flax. Wine, fruit, and oil are also produced in abundance. The pastures are numerous and excellent, and great numbers of cattle are reared. Both in the rivers and lagoons, and on the coasts, active and productive fisheries are carried on. There are no manufactures of any consequence. The delegation includes the far greater part of what was formerly the duchy of Ferrara, and was long governed by princes of the house of Este. On the death of Alphonso II., without heirs, in 1598, 1'ope Clement VIII. succeeded in uniting it to the Papal States. It was dissevered, in 1796 , by the French, and becaine one of the departments of the kingdom of Italy, but re-united in 1814 , with exception of the parts on the l. bank of the Io di-Maestra and Po-diGoro, now amexed to Austrian Italy. It is divided into two governmental districts, and 21 communes. Pop. (1833), 210,883.

FERRARA, a celebrated city, Papal States, cap. deleg. of same name, 26 m. N.N.E. Bologna, in a fertile but unhealthy plain, at a short distance from the N. branch of the Po. It is a large and well-built town, with spacious and regular streets, and is enclosed by a wall 7 m . in circuit. It is defended on the W . side by a citadel regularly fortified. In the middle of the city is a castle, flanked with towers, and

the castle of ferrara.-From a Sketch by S. Prout.
surrounded by wet ditches, which was once the residence of the dukes, and is now that of the legate. Ferrara, though still retaining many traces of its former grandeur, has long been falling into decay; its pavements are overgrown with grass, and the staircases and balconies of many of its noble palaces are overrun with ivy, while others are without either doors or windows. The population has also fallen to one fourth of its former amount. It has numerous cathedrals and churches, most of which contain valuable paintings, together with some interesting specimens of sculpture. There are here a public gallery of paintings, called the Palazzo del Magistrato, containing many excellent works by the leading painters of the Ferrara school; a school of medicine and jurisprudence, and a public library, containing 80,000 volumes and 900 MSS. , the latter including some of those of Ariosto and Tasso. The house in which Arinsto was educated, and that in which be lived during his latter years, and known by

## FERRARA

FERROL
the names respectively of the Casa degli Ariosti and the Casa d'Ariosto, are shown to strangers. The latter is now national property, and is ranked among the national monuments. Another object of interest is the cell in the Hospital of St. Anna, in which Tasso was imprisoned. The house occupied by the author of the Pastor Fido - the Casa Guarina-is still inhabited by the marquises of that name. The theatre is one of the finest in the Papal States. Ferrara is one of the eight archbishoprics of the latter; the bishopric dates from 661; its archbishopric was founded by Clement XII. in 1735. It carries on some trade in corn, and other produce of the soil. There are manufactures of silk ribbons, wax candles, brazen utensils, and stoves; tanneries and glassworks. Pop. 30,948.

FERRARA, or Ferrera [Lat. Ferraria], a vil. and com. Sardinian States, Piedmont, prov. Lomellina, div. of, and 8 m . from Novara, near the Albogna or Arbogna. It contains two small squares and a parish ehurch, and has a large silk-mill, and a trade in silk, corn, and fruit. The climate is very moist, and the inhabitants are subject to intermittent fevers. Pop. 1692

FERRATO, a cape, S.E. coast, isl. Sardinia, about lat. $39^{\circ} 17^{\prime} 30^{\prime \prime} \mathrm{N}$., lon. $9^{\circ} 40^{\prime} \mathrm{E}$. (R.) It is crowned by the tower $39^{\circ} 17^{\prime} 30^{\prime \prime}$ N., lon. $9^{\circ} 40^{\circ} \mathrm{E}$. (R.) It is
of Mount Ferro, and behind it, inland, are seven rugged peaks, called the Seven Brothers, which are 2300 ft . above the sea, and form a good landmark.

FERRAZANO, a tn. Naples, prov. Sannio, dist. of, and 2 m . S.E. Campobasso. There are mines of iron and sulphur in the vicinity. P. 2400.

FERREIRA, two places, Portu-gal:-1, A tn. and par. prov. BeiraBaixa, com. Thomar, about 40 m . S.S.E. Coimbra. Pop. 1735.-2, A tn. and par., prov. Algarve, on a height, near 1. bank, Safrins, 16 m . W. Beja. It is defended by a strong castle. Pop. 1804.

FERREIRA, a vil. and par. Spain, Andalusia, prov. of, and about 36 m . E. Granada, at the foot of the Sierria Nevada, 1. bank, stream of same name. It contains a parish church, townhouse, primary school, and old Moorish tower, now used as a prison; and has numerous flour-mills. Pop. 1558.

FERREIROS, two places, Por tugal:-1, A tn. and par. prov. Douro com. of, and 12 m. E.N.E. Aveiro, near 1. bank, Vouga. Pop. 1418.2, (de Tendaes), A tn. and par. Beira-Alta, com. of, and about 16 m . from Lainego. Pop. 1644.

FERRERE [Ferraria Astensium], a vil. and com. Sardinian States, Piedmont, prov. of, and 8 m . W. Asti. It contains the remains of an ancient castle, a parish church in the Tuscan style, and a beautiful palace, finely situated on a height; and has a trade in wine and silk. Pop. about 1600.

FERRERIAS, a tn., isl. Minorca, 19 m. N.W. Mahon, in an unhealthy district. It contains a parish church, and several oratories; and has some trade in cattle and cheese. Pop. 1128.

FERRET (Col), a celebrated pass over the Pennine Alps, from the town of Orsieres in Switzerland, on the N., to that of Cormayeur in Piedmont, on the S.; the ascent from the former direction being made by the Val d'Entremont, and that from the latter by the Val de Ferret, a continuation of the Allée Blanche. The ascent on both sides is somewhat monotonous, but from the Col, which has a height of 7641 ft ., and separates Mont Blanc on the W., both geographically and geologically, from the chain on the E., of which Mont Velun is the culminating point, the view, though Mont Blanc himself is hid by the enormons masses of the Grand Jorasse and the Geant, is one of the most magnificent in Switzerland, extending, along a range of glaciers, through the Val d'Entréves and the Allée Blanche, to the Col de Seigne, a distance of 40 m .

FERRIBY, two pars. Eng.:--1, (North), York (E. Riding); 3760 ac. Pop. 935.-2, (South), Lincoln; 1750 ac. Pop. 542.

FEKRING, par. Eng. Sussex ; 1070 ac. Pop. 285.

FERRINTOSH, a vil. and barony, Scotland, forming a detached portion of co. Nairn, pars. Logie and Urquhart, $1 \frac{1}{2} \mathrm{~m}$ S.E. Dingwall, formerly famed for the quality of its whiskey.

FERRO, or Hierro, the most S.W. and smallest of the Canary Islands; lat. (N. extremity) $27^{\circ} 50^{\prime} 30^{\prime \prime} \mathrm{N}$. ; lon. $17^{\circ} 55^{\prime}$ W. (r.) ; lat. (W. extremity, or meridian of Ferro) $27^{\circ} 42^{\prime} 30^{\prime \prime} \mathrm{N}$. ; lon. $18^{\circ} 9^{\prime} 42^{\prime \prime} \mathrm{W}$. (r.) It is about 18 m . long, and 9 m . broad, presents on all sides a face of bold and craggy rocks, but in the interior the appearance of the country improves, and a great part of the island is tolerably level and fruitful. Good wine and brandy are made, and a considerable portion of both exported to Teneriffe. Figs abound, and bees thrive exceedingly, on account of the multitude of aromatic flowers, but water is scarce. This island having once been supposed the most W. point of the Old World, was formerly employed by all geographers as their first meridian, and the longitude reckoned from it.

FERRO, an islet and cape, Algeria, the latter also named Ras Hadid; lat. (cape) $37^{\circ} 5^{\prime} 6^{\prime \prime}$ N.; lon. $7^{\circ} 10^{\prime}$ E. (r.)

FERROL, a tn. Spain, Galicia, prov. of, and 12 m. N.E. Coruña, advantageously situated on the N. side of a fine inland bay, connected with the sea by a narrow channel of samo

name. The bay forms one of the best natural harbours in Europe, and the channel which leads to it is so completely defended by strong batteries, on both its sides, as to present formidable obstacles to any hostile attack by sea. The town itself also possesses great strength, being both surrounded by strong walls and bulwarks, and otherwise defended. It consists of three parts-Old Ferrol, the New Town or Centro, and Esteiro. Old Ferrol, forming the W. part, is, as its name implies, of ancient date, and is in general both poorly and irregularly built, though, from the removal of old, and the erection of new houses, considerable improvements have been made on its original form. Esteiro, occupying the E. part, is much superior to Old Ferrol, having several streets of handsome appearance, though many of them are uneven. By far the best part is the New Town, sometimes called Centro, from its standing in the middle between the other two, and some times New Ferrol or Magdalena, and consisting of a quadrangular space, laid out with the greatest regularity, subdivided by seven longitudinal and nine cross streets, and forming at their points of intersection a series of squares, so uniform in size and appearance as to be almost monotonous, and to a stranger perplexing. The principal buildings are the townhouse, situated in the centre of the new town, a large and handsome structure, not confined to municipal purposes, but partly occupied by a Latin and other public selools; the parish church, richly decorated within, adorned with a fine façade, and surmounted by two towers; the old Franciscan monastery, the general and military hospital, the custom-
house, tax office, and residences of the heads of the different departments, civil, military, and maritime. But hy far the most remarkable sight in Ferrol is the arsenal, an establishment the almost unrivalled magnificence of which might well fill Spaniards with pride, were it not counterbalanced by the humiliating thought that, instead of bearing testimony to a present, it is only the memorial of a past naval greatness. The manufactures consist chiefly of swords, general eutlery, and military and naval equipments; and there are monthly fairs, chiefly for cattle and agricultural produce. The principal imports are steel, yarn, woollen and silk goods, ship timber, earthenware, and colonial produce; the exports are salt meat, salt fish, vinegar, potatoes, garlick, onions, soap, and dried fruits. Pop. 16,641.

FERRY-Port-on-Craig, a seaport, vil., and par. Scotland, co. Fife. The village is $10 \frac{1}{2} \mathrm{~m}$. N.E. by N. Cupar, r. bank, Firth of Tay, and a station on the Edinburgh, Perth, and Dundee Railway; lighted with gas, and amply supplied with excellent water. It has a commodious parish ehurch with a spire, handsome Free and U. Presbyterian churches, a Baptist meeting-house, a well-attended parochial school, and various other educational establishments. Extensive works have recently been erected at the harbour in connection with the Edinburgh, Perth, and Dundee Railway, to facilitate the embarking and disembarking of laden trains between this point and Broughty Ferry, on the opposite side of the river. Coals and timber are imported, and agricultural produce exported. Inhabitants chiefly seafaring, but some employed in hand-loom weaving for the Dundee manufaeturers. Here are the remains of an old castle. Area of par. 2598 ac. Pop. (1851), 2238.

FERSFIELD, par. Eng. Norfolk; 1390 ac. Pop. 295.
FERTAGH, par. Irel. Kilkenny; 5446 ac. Pop. 2792.
FERTE, several towns, France, the principal of which are-1, La Ferté Bernard, dep. Sarthe, on the Huine, 25 m . N.W. Le Mans. It is a neat old town, with walls and fosses; has a large church of debased gothic, about 300 years old; a townhouse, once a feudal stronghold; a handsome towngate, public square, and fountain; a considerable manufacture of linen, some calico weaving; with spinneries of fine wool, several corn-mills, and a trade in cattle, seed, and clover. Pop. 2595.-2, La Ferté-sous-Jouarre, dep. Seine-et-Marne, 37 m . E.N.E. Paris, in a pretty valley, and intersected by the Marne. It is well built, has remains of an old castle, with the fine chateau of La Barre; some manufactures of tiles and coarse pottery, ultra marine, smiths' work, linen, lime, ovens, paper, leather, \&c.; but the great artiele of produce in the locality is millstones, of superior quality, made to the number of 70,000 yearly, many being exported to Great Britain and the United States. There is a trade henee by means of the Marne, in timber, firewood, grain, meal, \&e., for the supply of laris. Here were born the Cardinal de Bourbon, and Madame de Pompadour. Pop. 3267.-3, La Ferté Gaucher [Latin, Firmitas Galteri], dep. Seine-et-Marne, on the grand Morin, 45 m . E. Paris. It is pleasantly situated in a narrow valley, and has manufactures of serge, tile-works, tameries, numerous paper-mills, a trade in eorn, wool, and cattle, and four annual fairs. Pop. 1914.-4, La Ferté Milon, dep. Aisne, 15 m . N.W. Chateau-Thierry, on the Oureq, on a slope, and traversed by the river. It is walled, and was fur. ther defended by a strong castle of the 12 th century, the ruins of which still exist. There are several bleaching-grounds in the vicinity, and a depôt for the wood and grain destined for Paris. The dramatist, Jean Racine, was born herc, December 22, 1639. Pop. about 2000.-5, Ferté Mace, dep. Orne, 13 m. E. by N. Domfront. It has manufactures of cottons, prints, ginghams, calico, tape, box-wood combs and snuff boxes, lamp cottons, trimmings, \&e.; and distillerics, tanneries, tile - works, dye - works, bleaching - grounds, \&e. I'op. 2891.-6, La Ferté St. Aubin, or Ferté-Senneterre-Nabert [Latin, Firmitas Naberti], dep. Loiret, 14 m. S. by E. Orleans, l. bank, Cosson. It contains an old castle, partly ancient and partly modern, and has five annual fairs. Pop. 1533.

FEL'TIANA, par. Irel. Tipperary; 3607 ac. Pop. 1174.
FELiTI'T, or Fertyt, a little-known country or dist. of E. Africa, S. of Darfur and Kordofan, watered by aflluents of the Bahr-el-Abiad, with a tn. of same name, in a hilly region, about lat. $9^{\circ} 35^{\prime} \mathrm{N}$. ; lon. $26^{\circ} 42^{\prime} 18^{\prime \prime} \mathrm{E}$. Fertit is said to contain rich copper mines.

FERWERD, a vil. Holland, prov. Friesland, 11 m . N.E. Leeuwarden. It is well built, and composed chiefly of a row of houses on either side of the highway, and has an elegant courthouse, a handsome church, a school, and, in the vicinity, chicory and grain mills. Pop. 1600.

FERZAH, a vil. Afghanistan, finely sitnate in a beantiful and highly cultivated district of same name, 30 m . N.W. Cabool. The latter contains 12 villages and four forts. Pop. about 4000 .

FESTENBERG, or Twardagora, a th. Prussia, gov. of, and 25 m. N.E. Breslau. It contains two market-places, two churches, a castle, hospital, a Jewish, and other schools; and has manufaetures of cloth, a large worsted mill, tobacco factory, a little trade, and four annual fairs. Pop. 2458.

FES'TINIOG, par. Wales, Merioneth; 8431 ac. P. 3133.
FETCHAM, par. Eng. Surrey; 1750 ac. Pop. 373.
FETERNE [Latin, Fistcrna], a vil. and com. Sardinian States, Savoy, prov. Chablais, near the Dranse, 24 m . N.E. Geneva. It contains a parish church, and the remains of an ancient castle, and has a trade in wine and cattle, and an annual fair. Mines of lignite are worked, and there are some fine alabaster grottos in the vicinity. Pop. 1256.

FETHARD. -1 , A market tn. and par. Ireland, co. Tipperary. The rown, beautifully situated on a gentle declivity, 9 m . N.E. Clonmel, consists of two main streets, quite straight, and well kept; houses generally of stone. It has a very handsome ancient gothic church, two R. Catholic chapels, a very small Presbyterian meeting-house, several schools, a dispensary for the poor, and two flour mills. Fethard was formerly a place of considerable strength and importance. Its walls are still standing, and some of the gateways perfect. Weekly market on Saturday, unimportant; four fairs annually for cattle. Pop. (1841), 3915. Area of par., 1530 ac. Pop. (1841), 4410. - (Local Correspondent.) - 2, A seaport tn. and par. Ireland, co. Wexford. The town, 21 m . S.W. Wexford, consists chiefly of neat and well-built houses. Its harbour, capable of accommodating a few small craft, has 12 ft . water at spring tides. Coals and timber are imported, and cattle and pigs exported. The town and neighbourhood are much resorted to during the sea bathing season. Pop. (1841), 406 Area of par. 3930 ac. Pop. (1841), 2178.

FETIO, an inlet or port, Greece, E. coast, at the entrance to the Gulf of Volo, S.W. side ; lat. $39^{\circ} 3^{\prime} \mathrm{N}$. ; lon. $23^{\circ} 0^{\prime} \mathrm{E}$.; 6 m . long, and from 2 to 3 broad.

FETLAR, one of the Shetland isls. separated from Unst on the N., and N. Yell on the W., by a sound of considerable breadth; lat. (E. point) $60^{\circ} 36^{\prime} 12^{\prime \prime} \mathrm{N}$. ; lon. $0^{\circ} 46^{\prime} 1^{\prime \prime} \mathrm{W}$. (R.) It is irregular in form, about 7 m . long, by 4 broad, and is indented by a number of bays, none of which are considered as safe harbours. Inhabitants are agriculturists and fishers. Pop. 761.

FETLAR, and Nortif Yell, par. Scot. Shetland; 7 m . by 4 m . Pop. 1745.

FETTAN, a vil. and par. Switzerland, can. Grisons, 34 m . E.S.F. Coire. It stands, amidst magnificent scenery, nearly 5000 ft . above the level of the sea, and is well built. It contains a parish chureh, and has an acidulated spring. The inhabitants speak Romansh. Pop. 558.

FETTERCAIRN, par. Scot. Kincardine; 13,192 ac. Pop. 1793.

FETTTERESSO, par. Scot. Kincardine; 24,914 ac. Pop. 5212.

FEUCHTWANG, a tn. Bavaria, circle, Middle Franconia, on the Sulz, here crossed by a stone bridge, 37 m . W.S.W. Nürnberg. It contains a Protestant town church, castle, Latin school, hospital, and infirmary; and has manufactures of woollen and linen cloth, hats, and leather; an ironmill, and eight large annual fairs. Pop. 2550.

FEUERBACII, a vil. Würtemberg, circle, Neckar, bail. of, and 2 m . from Stuttgart. It contains a parish chureh, and has an annual fair.-The district is fertile, both in corn and wine. Pop. 2538.

FEURS [anc. Forum Seguisianorum], an old tn. France, dep. Loire, 11 m. N.W. Nontbrison, on the railway from Lyons to Roanne. It lies in a fertile, well watered plain, near r. bank, Loire, on which is a well-frequented port. It has some trade in grain and hemp. It was formerly fortified, and was taken by the Calvinists after a siege of 10 days. In its vicinity is an acidulated mineral spring. Pop. 2063.

FEVERSHAM, a tn. England. See Faversham.
FEWS, par. Irel. Waterford; 6818 ac. Pop. 1570.
FEWSTONE, par. Eng. York (W. Riding); 16,660 ac. Pop. 2118.

FEYE, a small isl. W. coast, Norway, 32 m. N.W. Bergen, at the S.E. entrance of the Feus Fiord.

FEZ (Kinglom of), once an independent state, now the most N. section of the empire of Marocco; bounded, N. by the Mediterranean, E. by Algeria, S. by the river Om-er-begh or Morbeza, which separates it from Marocco Proper; and W. by the Atlantic. It was conquered and united to Marocco in 1548.

FEZ [Latin, Fezza; Arabic, Fas], an important city, Marocco, nominally the second, but in reality the principal city in the empire ; lat. $34^{\circ} 6^{\prime} 3^{\prime \prime} \mathrm{N}$. ; lon. $5^{\circ} 1^{\prime} 11^{\prime \prime} \mathrm{W}$. (L.); 100 m . E. the Atlantic, 85 m . S. the Mediterranean, and 245 m . N.E. the city of Marocco. It is finely situated on the slope of several hills, which surround it on every side, except on the N. and N.E., and whose acclivities are covered with orange groves, orchards, and gardens. It is divided into the New and Old City. Both are surrounded by walls, now in a state of utter decay. The streets are narrow, dark, and extremely dirty, especially in rainy weather. The honses are high, with a projection on the first floor, which intercepts much of the light, an inconvenience increased by galleries or passages, with which their upper stories are connected. They have flat roofs, on which the families spread carpets in summer to enjoy the cool breezes of the evening. Many of them are so much decayed, as to require propping, and almost all are without windows. Every trade or profession has a street or section of the town allotted to it. Provision markets are numerons, and abundantly supplied. There are, it is said, upwards of 200 mosques in the city, the principal of which is called El Caroubin which contains 300 pillars, a number of gates, and two handsome fountains in the court. Within this mosque is a covered place for women who may choose to participate in the public prayers, an indulgence not allowed to the fair sex in any other Mahometan place of worship, it being thought that, as the prophet has not assigned them any place in paradise, there was no occasion for them attending public devotions. The most frequented mosque is that of Sultan Muley Edris, the founder of Fez , who is venerated as a saint, and whose remains are deposited here. The minaret of this temple is the finest and loftiest in Fez. This mosque is the most sacred sanctuary in all the country, affording safety and protection to the most atrocious criminal. All the other mosques, with exception of that belonging to the palace of the Sultan, are small and mean. The only other remarkable building to be seen at Fez is the Sultan's palace, situated on an elevation in the new city. It is composed of a great number of court-yards, some half-finished, others going to decay. Its gates are always kept closed, and are, besides, vigilantly guarded, no persons but those particularly privileged being admitted. There is close by a common kitchen garden, belonging to the palace, with some trees, and a few buildings for ornament. The city is well supplicd with water from the river Fez. There are a great number of public baths, which are open all day; and several hospitals, one of which is very richly endowed, but is used only for the treatment of lunatics. There are nearly 200 caravanserais or inns, but the guest must find his own food and bedclothes, nothing being furnished him excepting water and a mat. The manufactures consist of woollen cloaks, sashes, silk handkerchiefs, slippers, the leather of which they have the art of tanning in high perfection; red caps of felt, extensively used throughout the N. of Africa, and, fromi the place of manufacture, named Fezes; coarse linen, fine carpets, common earthenware, saddlery, and copper utensils. The city is governed by a kaid or governor, who, as the lieutenant of the sovereign, has the executive power; the kadi is charged with the civil jurisdiction. A minister, called Al Motassen, fixes the price of provisions, and decides all points that arise in this department of the public service. The climate of Fez is intensely hot in summer, and is, on the whole, unhealthy. Fez, founded in 793, by Muley Edris, was capital of an independent state, and subsequently became aо famous as a seat of Arabian learning, that its schools of pliilosophy and physical science were resorted to, not only from all the Mahometan states of Africa and Spain, but even from Christian countries. The remains of its
institutions still attract round them a number of Mahometan doctors, and the schools are frequented by a great many scholars; but the studies are confined to the Koran and its commentators, with a slight tincture of grammar and logic, metaphysics, alchemy, and astrology. Fez is considered a holy town by the Western Arabs, and was also resorted to by them as a place of pilgrimage, when the way to Mecea was obstructed. After its conquest, in 1548, by Marocco, it commenced to decline, but recovered for a time after the fall of the kingdom of Cordova, and in consequence of edicts of Philip II. against the Mahometans. Pop. estimated at 88,000; composed of Moors and Arabs, 65,000; Berbers, \&c., 10,000; Jews, 9000 ; Negroes, 4000.

FEZARAH, a lake, Algeria, 30 m . S.S.W. Bona. It is abont 30 m . long, and 24 broad, very shallow, and abounds with flamingos and wild fowl, and its shores with snipe and wild boar.

FEZZAN [anc. Phasania], a kingdom of N. Africa, usually considered as lying between lat. $24^{\circ}$ and $31^{\circ} \mathrm{N}$. ; and lon. $12^{\circ}$ and $17^{\circ}$ E.; being thus about 460 m . in length, and about 300 m . in breadth, although its limits have not been accurately defined. It is bounded by Tripoli on the N., and on all other sides by the Sahara or Great Desert. In the N. parts are three ranges of mountains or rather hills, as none of their elevations exceed 1200 to 1500 ft . One of these. called the Soudah or Black Mountains, is composed of basalt, nearly black, with a shining or polished appearance. They are perfectly barren, of irregular form, occasionally broken into detached masses, and sometimes rising into conical peaks. To the S . of these ranges, the country consists of extensive sandy plains, destitute of vegetation, alternating with ridges of low hills, the valleys of which contain nearly all the cultivable soil in the territory. Dates are the principal produce, and form the chief food of the inhabitants, small quantities of maize and barley are also grown. Figs, pomegranates, lemons, and legumes are plentiful ; as are also pot berbs and garden vegetables. There are no rivers or brooks, and few natural springs; but water is found in abundance at varions depths, generally from 10 to 20 ft . There are a few small lakes, the surfaces of which are sometimes covered with a thin crust of carbonate of soda. In summer it is extremely hot, but in winter the cold is pretty severe. Early in 1850, snow fell at Sockna, and ice, the thickness of a man's finger, was formed at Mourzouk. Rain seldom falls; in some districts it does not rain for years together, and but little at a time. With exception of goats, few domestic animals are reared. In the S. parts, some flocks of a peculiar kind of sheep are met with, and in the most fertile districts a few horned cattle. The wild animals, which are abundant, are lions, panthers, hyenas, jackals, tiger-cats, gazelles, and foxes. The birds of prey are vultures, falcons, \&c., ostriches, and bustards. The lower classes of the people are industrious, and some of them work skilfully in gold, silver, and iron; those who excel are held in great respect. The only manufactures of the country are a little coarse linen and cotton cloth. But a considerable trade is carried on by caravans with Timbuctoo and Bornou; while Mourzook, the capital, is the rendezvous of caravans coming from Cairo, Bengazi, Tripoli, Ghadames, Touat, and Soodan. The natives of Fezzan are of a mixed race, between those of various African countrics. They are of middle stature, black complexion, with hair inclining to woolly, high cheek-bones, nose less depressed than in the negro, small eyes. They are cheerful, fond of dancing and music, obliging to each other, neither passionate nor revengcful, but fraudulent, cowardly, and abject. Their houses are mostly of mud. The principal towns are Mourzook, towards the S. boundary; and Sockna, towards the N., distant from each other about 230 m . There are other eight or 10 towns, and a vast number of villages. Fezzan is governed by a chief, who has the title, and exercises the power of a Sultan within his own territory, but is dependent on the Pasha of Tripoli, to whom he pays tribute. In time of war. the Sultan is said to be able to bring from 15,000 to 20,000 men into the field. The pop. has been variously estimated at 75,000 and 150,000 .

FlACCONE [Lat. Flaco], a tn. Sardinian States, div. Genoa, prov. of, and 7 m. S. Novi, in a mountainous district. It contains two parish churches, an elementary school, a charitable endowment, and the remains of a very ancient fort.

The inhabitants are all employed in agriculture, but the soil is very unproductive, and during the greater part of the year is covered with snow. Pop. 1040.

FIaNONA, Valle di Fianona, or Flunona, a market tn. Austria, Styria, 41 m. S.S.E. Trieste, on the gulf of Quarnero. It contains a parish church, and has a good harbour, at which there is a considerable export of oats and chestnuts. There is a coal mine in the neighbourhood. Pop. 810.

FICCAROLO, a vil. and par. Austrian Italy, gov. of, and 56 m . S.W. Venice, l. bank, Po, here crossed by a flying bridge. It contains a parish church, has a harbour, and carries on a considerable trade in corn, silk, eattle, fish, and wine. In 1152, the Po burst its banks opposite to Ficcarolo, and formed its present channel. Pop. 3000.

FICHTELBERG, or Ficitelgebirge, a mountain-range, Bavaria, forming a kind of central nucleus, from which the principal ranges of Germany may be considered as taking their departure. It commences near the town of Baireuth, and, stretching N.E. for about 36 m ., terminates near the town of Asch, on the Bohemian frontiers, where the Erzgebirge begins, and continues the chain in the same direction. Its breadth is also about 36 m ., but is not so easily deterinined, as it forms an almost imperceptible junction with two other ranges-the Böhmerwald on the S.E., and the Frankenwald, a ramification of the Thitiringerwald, on the N.W. Its principal summits are the Ochsenkopf, 3397 ft ., and the Schnceberg, 3450 ft . The average height of the extensive plateau from which they rise is about 1750 ft . The Fichtelgebirge takes its name (Fiehtel, pine) from the pine forests with which much of it is covered. The summits are principally composed of granite, surrounded by a belt of gneiss, micaccous schist, and argillaceous schist, containing rich seams of iron ore. West from the gneiss, beds of sandstone and clay streteh S.E. In the S. part of the chain, a series of heights are composed of basalt. From the central position of the Fichtelgebirge, and the ranges with which it is linked, its relation to Germany resembles that of St. Gothard to Europe, no less than four important rivers taking their rise in it. Of these the Mayn or Main, which is the largest, flows W., towards the Rhine; the Naab, S., towards the Danube; and both the Eger and the Saale to the Elbe, though by different directions, the one E., and the other N.

FICULILE, a tn. Papal States, 10 m . N.N.W. Orvieto, with some Roman remains in its vicinity. Pop. 1766.

FIDA [Chinese, Feitan], a prov. Japan, in the central part of isl. Niphon, covered with well-wooded mountains, but producing very little corn. It is divided into four districts; chicf town, Taka-yama; in Chinese, Kao-chan.

FIDALA, a maritime tn. Marocco, Fez, 50 m . S.W. Sallec. It has a good roadstead, and formerly had a considerable trade in grain.

FIDALGO, a spacious harbour, Russian America, N.E. Prince William's Sound; lat. $60^{\circ} 50^{\prime} \mathrm{N}$.: lon. $145^{\circ} 45^{\prime} \mathrm{W}$. It is nearly 30 m . long, by 3 m . nean breadth; is surrounded by great plains covered with trees, and in the distance is a range of lofty mountains covered with perpetual snow.

FIDDICHOW, a tn. Prussia, gov. of, and 22 m. S.S.W. Stettin, on two lofty heights, $r$ bank, Oder. It contains a market-place, church, and townhouse; and has a fishery, a trade in cattle, and two mills. Pop. 2159.

FIDDINGTON, par. Eng. Somerset; 1070 ac. P. 220.
FIDDOWN, par. and tn. Irel. Kilkenny; 11,109 ac. Pop. 4519.

FIDELIS (São), or São-Fidelis-de-Simaringa, a vil. and par. Brazil, prov. Rio-de-Janciro, l. bank, Paraliba, about 45 m . below the town of Campos. It is almost entirely occupied by civilized Indians, called Coroados, and possesses a fine church, a majestic edifice, of pure Tuscan architecture, surmounted by an octagonal dome. It was commenced at an early period, under the auspices of two missionaries, but not consecrated till 1809 ; and unhappily, for want of better materials, it was built of a kind of clay which hardens in the sun, but absorbs much moisture, consequently, the alternations of drought and rain have produced extensive cracks in the walls.

FIDERIS, a vil. and par. Switzerland, can. Grisons, beautifully situated on a lofty height, above l. bank, Lanquhart, 11 m . N.E. Coire. It contains a parish chureh, and has two old castles in its vicinity, but is best known by its
baths, which stand about 2 m . from the village, in the wild and romantic valley of the Raschitsch. The water is alkaline, acidulous, and is considered efficacious in intermittent fevers and obstructions. Pop. 505.

## FIDJI, isls., S. Pacific. Sce Feejee.

FIELD-Dallina, par. Eng. Norfolk; 1620 ac. Pop. 403.
FIESOLE [anc. Fcesulec], an ancient Etruscan city, now a small tn. Tuscany, prov. of, and 4 in . N.E. Florence, on the top of a steep hill, the front of which is cut into narrow terraces, faced with stone; and its recesses, swells, and breaks covered with groves of pines, holly, and cypress, above which rises the dome of the cathedral. The town itself has little to boast of, being indebted for all its celebrity to its antiquity and happy situation; but possesses a townhouse, some churches, an Episcopal seminary, and some Roman remains. In its vicinity are excellent freestone quarries. Under the name of Fæsulæ, it was one of the 12 Etruscan cities. It submitted, with the rest of Etruria, to the Roman power, and was colonized by Sylla. In the commencement of the 11 th century it was destroyed by the Florentines, and a number of its inhabitants transported to the city of Florence. Pop. 3025.

FIF, or Fuf, a tn. Arabia, cap. of the dist. of El Alisa, about 115 m . W. from the Persian Gulf; lat. $24^{\circ} 53^{\prime} \mathrm{N}$.; lon. $49^{\circ} 47^{\prime} \mathrm{E}$. It is protected by an earthen wall, 50 ft . high, and a dry ditch. The houses within the wall are of an limmble kind. Outside of it, on the E., is an open village, interspersed with cultivated grounds and date gardens. The walled town and its suburbs together were, in 1819 , estimated to contain 15,000 inlabitants, of whom 600 were capable of bearing arms.

FIFE, or Fifesimes, a maritime co. Scotland, forming the peninsula between the Firths of Forth and Tay. Extreme length, S.W. to N.E., 43 m. ; extreme breadth, 17 m ., decreasing $W$. to about 12 and 6 m . Bounded, S. by the Forth, N. by the Tay, and cos. Perth and Kinross; E. by the German Ocean, and W. by the cos. of Clackinannan, and an isolated portion of Perth. The surface of the country is finely diversified by mountain, valley, and plain. The principal elevations are the Lomond Hills, whose highest summit is 1720 ft . above sea level; Largo Law, 1020 ft ; and Norman Law, 850 ft . There are, besides these, a number of lesser, thongh still considerable eminences, in various other parts of the county. The soil is of different kinds and qualities in different districts, but so productive generally, that two-thirds of the whole extent- $300,800 \mathrm{ac}$.-is under cultivation. The principal valley, ealled the 'Howe [hollow] of Fife,' watered by the Eden, is remarkably fertile, highly cultivated, and thickly studded with beautiful mansions and villas. Its entire length is about 10 m .; breadth, from 2 to 3 m . But, perhaps, the most fertile tract is that lying along the shores of the Firth of Forth, extending inland, from 1 to 3 m ., where the most luxuriant crops of corn, turnips, \&c., are grown. The least productive, again, lies between the town of St Andrews and the N.W. parts of the county. The soil throughout this tract consists of a wet clay, and is, in general, cold and poor. There is also a good deal of barren land, composed of moss, moor, and rocky hill, in the W. districts of the county, and alongst the shores of the Firth of Tay. During the last 40 years, agriculture has made extraordinary advances in Fifeshire, now, in this respect, not behind any other county in Scotland, particularly in the essential point of draining, which is prosecuted with great vigour and success. In the higher grounds, and on inferior soils, oats are the principal crop; but, in general, all the most approved rotations are regularly followed out, and wheat, barley, beans, potatoes, and turnips, are extensively cultivated. The Fife breed of cattle bave been long celebrated, and bring high prices both at home and in the English market, where they are well known. The brced of cows is also of high repute. Sheep, formerly not numerous, have become rather a favourite stock, and recently a good many have been slaughtered at Kirkcaldy, and shipped by steamers for London. The breed of horses, once very indifferent, has been much improved, chicfly by crossing with that of Clydesdale. Coal, iron, limestone, and freestone, abound. The coal has been worked for several centuries, but the ironstone, especially that species of it known by the name of black-band, is a comparatively recent discovery. It already supplies a number of blast furnaces on the spot, and is also shipped, to some extent, for

Newcastle. The chief manufacture of the county is linen of different kinds, such as damasks, diapers, checks, ticks, \&c. The first two are made principally at Dunfermline; the last two at Kirkcaldy. There are salmon fisheries on the Leven and Eden, and at Newburgh, and extensive herring fisheries along the N.E., E., and S. coasts. Cod, turbot, haddock, and other sea fish, are also taken in great quantities on the coasts. The number of towns and villages in this county is remarkable, the entire S. and E. coast being lined with them. The principal of the former are Dunfermline, Kirkcaldy, Cupar, the county town; and Dysart. Fife contains 61 parishes, 13 royal burghs, and a university, St. Andrews, the oldest in Scotland. It returns four members to the House of Com-mons-one for the county, and one for each of thrce districts of boroughs. Pop. (1841), 140,140; (1851), 153.546.

FIFEHEAD, two pars. Eng. Dorset:-1, (Magdalen), 1070 ac . Pop. 229.--2, (Neville), 2310 ac. Pop. 83.

FIFIELD, two pars. Eng. : -1, Oxford; 810 ac. Pop. 213.-2, (Bavant), Wilts; 860 ac. Pop. 45.

FIGARI, a cape, N.E. coast, isl. Sardinia, forming the N. entrance of the gulf of Terra Nova. It stretches far out into the sea, and has, immediately to the S. of it, the high island of Figarello.

FIGASI-Sima [Chinese, Toung-tao], an isl. Japan, Gotoo group, a little N.W. Kiusiu, and belonging to the province of Fizen.

FIGEAC, a to. France, dep. Lot, arrond. Figeac, 32 m . E.N.E. Cahors, exceedingly agreeably situate on a rounded hill slope, the foot of which is bathed by the Celle, in the midst of a hollow surrounded with an amphitheatre of wooded hills, dotted with villas, \&c., and rich in vineyards, orchards, and gardens. The town itself, however, is generally mean, having narrow crooked streets, and few good modern houses; many of the older are interesting for their quaint gothic fronts, among which are the townhouse, once a feudal keep, called the château of Baleine; the collegiate church of the abbey that long flourished here; and the church Nôtre Dame du Puy. Two singular obelisks, named Aiguilles, still exist, one on the S., another on the W., and appear to have been used, in early times, to support lighthouses for the direction of travellers coming to the town through the extchsive forests that once surrounded it. Figeac was a walled town, and some remains of its old defences still exist. It has a communal college, manufactures of linens and cottons, with some dye-works and tanneries, and a trade in cattle. Lead is found in the environs. Champolion, jun., was born here in 1790; died, 1832. Pop. 5982.

FIGHELDEAN, par. Eng. Wilts; 5150 ac. Pop. 510.
Fighig, or Figuig, a tn. and dist. N. Africa, Maroceo, country of Sigilmessa, S. from the Atlas, 165 m. E.S.E. Fez; a considerable trade is done with Fez, Tafilelt, and Touat, and it is a rendezvous for the Mecca and Timbuctoo caravans, and the seat of a fine woollen cloth manufacture. The people are warlike, and adepts in mining.

FIGHTING ISLAND, an isl. Upper Canada, in the Detroit River, 3 m . below Sandwich; area, 1800 ac., of which 300 are arable. There is a good fishery here.

FIGLINE, or Fighine, a tn. Tuscany, prov. of, and 17 m . S.E. Florence, in a plain, near I. bank, Arno, here crossed by a stone bridge. It is of a rectangular shape, and enclosed by a wall ; is traversed by a handsome street, forming a continuation of the public road; contains a large and elegant square, one side of which is occupied by a fine church, and another by a well managed hospital; is the seat of a civil and criminal court, and has an important weekly market. Pop. 4054.

Figuig, tn. and dist. Marocco. See Fighig.
FIGO [Chinese, Fei-Heou], a prov. Japan, isl. Kinsiu; lounded, N. by Tsikougo and Boungo, E. by Boungo and Fiyouga, S. by Satsouma, and W. by the bay of Sambara. It is more than 60 m . long, and includes the island of Amakousa. It is covered with mountains clothed with forests, and abounds in sulphur ; the valleys produce corn, pulse, silk, and cotton, and the coasts swarm with fish. It is divided into 14 districts. Chief town, Koumamoto.

FIGUEIRA, a tn. and par. Portugal, prov. Douro, chief place, com. of same name, 24 m . W.S.W. Coimbra; lat. $40^{\circ} 8^{\prime}$ N.; lon. $8^{\circ} 51^{\prime}$ W.; r. bank of, and at the mouth of the Mondego. The harbour, defended by a fort, is safe, but of difficult access, particularly for large vessels. It has a consider-
able trade. Principal exports :-salt, oil, wine, vinegar, dried fruits, oranges, \&c. Pop. 4100.

FIGUEIRO-das-Vinhos, a tn. Portugal, prov. BeiraBaixa, com. of, and 26 m . N. Thomar, in a deep valley, in the midst of lofty mountains, 1. bank, Aiso, an affluent of the Zezere. It has two hospitals, two convents, a manufactory of iron utensils and implements, and a fair, which lasts three days. Excellent wine is produced in the vicinity. Pop. 3150.

FIGUERAS, a tn. Spain, Catalonia, prov. of, and 21 m . N.N.E. Gerona, in a plain between the rivers Muga and Manol. The streets, in general, are wide, straight, level, and well paved, and the principal square contains the court-house and other spacions edifices. It also has a large and ancient parish church, several convents, two chapels, a college, six schools, civil and military hospitals, a prison, orphan asylum, customhouse, cavalry barracks, theatre, and public storehouse. Manufactures:-linen and woollen fabrics, leather, soap, corks, brandy, wine, oil, \&c. Some trade is carried on with France in grain and liqueurs. On a hill N.W. of the town, is the castle of San Fernando, considered one of the strongest fortresses in Europe. It is an irregular pentagon, and its approaches are everywhere commanded by batteries; almost all its outer buildings are bomb-proof, and its walls, of immense strength, are surrounded by wide and deep fosses. Throughont the whole are covered ways and mines ramifying in every direction. The magazines, store-houses, stables, barracks, \&c., are very extensive, the latter capable of accommodating nearly $20,000 \mathrm{men}$. The fortress is commanded by a military governor. Notwithstanding its strength, this fortress was taken by the French in 1808, 1811, and 1823. P.8352.

FIGURINA, an isl. Arctic Ocean, being the most N. in the New Siberian Archipelago ; lat. $76^{\circ} 15^{\prime} \mathrm{N}$.; lon. $140^{\circ} 40^{\prime} \mathrm{E}$.

FIIL-see, a lake, Denmark, Jutland, W. coast, bail. Ribe, and separated by a narrow, lofty sandbank, from the sea, with which it communicates by a small stream. It is about 30 m . in circuit ; greatest deptl, 22 ft ; contains three small islands, and is well supplied with fish.

FIJI, isls., S. Pacific. See Feejee.
FILBY, par. Eng. Norfolk; 1450 ac. Pop. 553.
FILEY, par. Eng. York (E. Riding); 3090 ac. Pop. 1590.
FILEY, a seaport, tn. and par. England, co. York (N. and E. Ridings). The rown, situated on the bay of same name, 6 m . S.E. Scarborough, contains as ancient cruciform church, and places of worship for Wesleyans and Primitive Methodists; and has of late years become a favourite seabathing place. It has long been celebrated as a fishing station for cod, herring, and various other kinds of fish. The harbour is safe and commodious. A rea of par. 3090 ac. Pop. 1590.

FILIPPO D'Argira (San), [anc. Agyrium], a tn. Sicily, Val di Noto, $27 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Catania; celebrated for its saffron, the best in Sicily being grown in its vicinity. Pop. 7156.

FILIYAS, a river, Asiatic Turkey, pash. Anadolia; it rises in a mountainous district, about lat. $40^{\circ} 35^{\prime} \mathrm{N}$. ; lon. $31^{\circ} 35^{\prime}$ E., flows nearly due N.; and, after a course of about 75 m. , falls into the Black Sea, 20 m . S.S.W. Amasserah. It has several affluents of considerable size, all joining it from the $\mathbf{E}$. The occasional floods of the river are very great.

FILKINS, a hamlet, England, co. Oxford, par. Broadwell, 3 m . N.E. Lechlade, containing a school. Pop. 555.

FILLAN'S (ST.), a vil. Scotland, co. of, and $26 \mathrm{~m} . \mathrm{W}$. by S. Perth, E. end of Loch Earn. An annual meeting is held here of the St. Fillan's society, for the encouragement of Highland games. Pop. 172.

FILLE-FIELD, a mountain plateau, Norway, on tho W. of prov. N. Bergenhuus, connected with the Sogne-Fjeld, on the N., and the Hardanger-Fjeld, on the S. The summits vary in height from 4900 ft . to 6300 ft . The central sum mit of Suletind, in which the Lerdal takes its rise, is 6043 ft .

FILLEIGH, par. Eng. Devon; 2260 ac. Pop. 395.
FILLINGES [Latin, Filingia], a vil. and com. Sardinian States, Savoy, prov. Faucigny, 12 m. E. Geneva, on the Menoge, and the S. slope of Mount Voiron. It contains a handsome parish church, and the remains of several old forts; and has a cotton mill, and an annual cattle fair. Pop. 1952.

FILLINGHAM, par. Eng. Lincoln; 3980 ac. Pop. 312.
FILLONGLEY, par. Eng. Warwick; 4310 ac. P. 1030.
FILS, a small river, Würtemberg, which rises in the Alpine district, not far from the centre of that kingdom, about 10 m . S.E. Kirchheim, flows first E.N.E., then turns suddenly
round, and, pursuing a circular course W., past Göppingen, joins r. bank, Neckar, about 7 m . below Esslingen, after a course of about 35 m .

FILTON, par. Eng. Gloucester; 1040 ac. Pop. 276.
FINAL BORGO [Latin, Finale], a tn. Sardinian States, prov. Albenga, between the Aquila on the E., and the Calice on the W., 32 m . W.S.W. Genoa. It is surrounded by walls, flanked with bastions; is the seat of several courts of law, and public offices; is well-built; contains a collegiate church, with a fine old belfry, a handsome townhouse, Dominican convent, theatre, hospital, superior and primary schools; and has manufactures of hemp and flax, and articles in bronze, a tannery, silk-mill, a trade in cattle and fruit, particularly oranges, which grow in the adjoining valleys with the greatest luxuriance, and four annual fairs. Pop. 1817.

FINALE MARINA [anc. Finarium], a th. and seaport, Sardinian States, prov. Albenga, 30 m . W.S. W. Genea. It is defended by a castle and several forts, mostly in a ruinous state ; contains a magnificent collegiate, and several minor churches, a large townhouse, a college, with a fine façade, two palaces, two hospitals, and several schools; and has buildirg yards, in which a considerable number of merchant vessels are built; manufactures of soap, paper, and refined wax; a ropery, brass foundry, and three silk-mills. The harbour is not well sheltered; but a considerable trade is carried on in chestnuts, leather, iron, pruning-hooks, and ship timber. Pop. 3201.

FINALE-di-Modent, a tn. Modena, l. bank, Panaro, here crossed by a stone bridge, 23 m . N.E. Nodena. It is surrounded by walls; and has manufactures of linen and silk, an active trade, and an annual fair, which lasts three days. Pop. 6000.

FIÑANA, a tn. Spain, Andalusia, prov. of, and 38 m . N.W. by N. Almeria, on the skirt of a hill, crowned by an old ruined fortress, near l. bank, Almeria. It is composed of one principal, several smaller streets, mostly paved, and a square, of considerable extent, containing the town and session houses. The church is a large and handsome building, with a tower, containing the town clock and three naves. There are also three chapels, a small hospital, prison, cemetery, storehouse, and two schools. Wine and oil is expressed, and some trade is carried on in silk, wool, grain, and cattle. Pop. 3273.

FINBOROUGH, two pars. Eng. Suffolk -1, (Great), 1960 ac. Pop. 467.-2, (Little), 220 ac. Pop. 64.

FINCHAM, par. Eng. Norfolk; 2980 ac. Pop. 807.
FINCHAMPS'TEAD, par. Eng. Berks; 4130 ac. P. 530 .
FlNCHINGFIELID, par. Eng. Essex; 9410 ac. P. 2262.
FINCHILEY, par. Eng. Middlesex; 3350 ac. Pop. 3664.
FiNDIIORN, a vil. and scaport, Scotland, co. Elgin, on the Findhorn, at its embouchure in the Moray Firth, 26 m . N.E. Inverness; lat. $57^{\circ} 40^{\prime} \mathrm{N}$. ; lon. $3^{\circ} 36^{\prime} \mathrm{W}$. The harbour, which is, in great part, a natural one, forming a large bay or loch, several miles in extent, is amongst the safest on the coast, and affords good accommodation for shipping; but the entrance, which 18 only about $\frac{1}{4} \mathrm{~m}$. wide, is rendered somewhat difficult by a slifting bar. The depth of water in the shallowest part of the channel is $10 \frac{1}{2} \mathrm{ft}$. during the lowest neap tide. Iron, tar, and timber, are brought from the Baltic ; and coals, slate, salt, and bone-dust, are also imported. The exports are fish, grain, eggs, and timber, the last chiefly from the neighbouring forests. But the principal business of the place is in taking and curing herring, cod, and ling, of which large quantities are annually exported. The site of the village has been frequently changed, in consequence of the encroachments of the sea. Pop. (1841), 805 ; (1851), 940.

FINDHORN, a river, Scotland, rising in the Monaghlea mountains, co. Inverness, between Strathdern and Stratherrick, flowing N.E. through that co., and cos. Nairn and Moray ; and, after a total course of about 45 m ., direct distance, falling into a harbour or land locked bay of same name, in the Moray Firth. It has excellent zalmon fishings. During the memorable Moray floods of August 1829, the Findhorn rose in some places 50 ft . above its ordinary level.

FINDÖE, an isl., W. coast, Norway, torming one of a numerous group in the Bukke fiord, 15 m . N.E. Stavanger. It contains a church, and a monument, said to commemorate a victory gained over the Scots. The Norwegian hero, Thorsin, is also said to be buried in it.

Vol. I.

FINDON, or Finnan, a fishing vil. Scotland, co. Kincardine, on the sea-coast, $6 \mathrm{~m} . \mathrm{S}$. Aberdecn, celebrated for its smoked haddocks. The smoking is effected by burning the green branches of fir, which imparts a bright yellow colour, and most agreeable flavour to the fish. Haddocks, thus cured, are sent to all parts of the country. Pop. 190.

FINDON, par. Eng. Sussex ; 4250 ac. Pop. 589.
Finedon, or Thingdon, par. Eng. Northampton; 3650 ac. Pop. 1378.

FINESTRAT, a tn. Spain, Valencia, prov. of, and 25 m . N.E. Alicante, at the S . base of a lofty mountain, 3 m . from the sea. It is poorly built, has steep and irregular streets, a parish church, chapel, townhouse, prison, two schools, and an ancient and ruinous castle. Manufactures:-linen and esparto fabrics, soap, wine, and oil. 'Trade :-gypsum, grain, esparto, hardware, earthenware, \&c. Pop. 2633.

FINGAL, a dist. Ireland, co. Dublin, between Dublin and Drogheda. The inhabitants, who were originally Finish or Norwegian, still retain traces of their foreign origin. It gives the title of Earl to the Plunkett family.

FINGES'I, par. Eng. Bucks; 1100 ac. Pop. 379.
FiNGHALI, or Fingall, par. Eng. York (N. Riding); 4460 ac. Pop. 458.

FINGLASS.-1, par. and tn. Irel. Dublin; 4696 ac. Pop. 2187.-2, par. Irel. King's co.; 702 ac. Pop. 312.

FINGOES, or Wanderers, a race of S. Africans, belonging to various scattered tribes, originally from the E. coast, N. from Kafraria, but now chiefly iuhabiting a tract of country formerly called the neutral ground, between the Lower Keiskamma and Great Fish River, but now forming part of the prov. Victoria, to which they were brought, to the number of 17,000 , and there settlcd under the auspices of the Colonial Government. The men of this tribe have woolly hair, round noses, thickish lips, straight and muscular limbs, and average 5 ft .8 in . in height. They are active, brave, and, in general, extremely good-natured. Their clothing is a dressed ox lide, worn with the hair inwards. They decorate themselves with ornaments of brass; and wear rude sandals on their feet. Tbeir huts are hemispheres of boughs covered with grass; their food curdled milk and millet. Previously to their removal to their present settlement, the Fingoes lived in a state of abject slavery under the Amakosa Kafirs. Since that period, they have remained faithful to the British, and have recently distinguished themselves in the war at present (1852) raging in S. Africa.

FINGRINGIIOE, par. Eng. Essex ; 2490 ac. Pop. 581.
FINHAVEN, par. Scot. Forfar; 6 m . by 3 m. Pop. 420.
FINIS'TERE, or Finisterre [Land's Ent], a dep. France, so named from occupying its most W. extremity ; bounded, E. by deps. Côtes-du-Nord and Morbihan, and on all other sides by the sca; N. by the English Channel, and W. and S. by the Atlantic ; greatest length, N. to S., 68 m .; greatest breadth, 56 m .; area, 2516 geo. sq. m. The coast line is bold and precipitous, composed almost throughont of lofty granite cliffs, in which the violence of the waves has made numerous deep indentations, the two most important of which, both on the W., form the extensive bay of Duuarnenez, and the famous roadstead of Brest. The interior is traversed by two chains of hills. The more N., called Mount Arré, entering on the E. from Côtes du-Nord, stretches first W.N.W., then W.S.W., terminating in Mount Faou, in Brest roads. It is about 38 m . long, and rises to the height of 900 ft . above the sea. The other chain, known by the name of the Montagnes Noires or Black Mountains, enters on the S.E., also from Cotes-du Nord, and proceeds nearly due W. for about 35 m . to the coast, where it forms the lofty tongue of land between Brest roads and the Bay of Douarnenez. These chains send out numerous ramifications, which extend in all directions, and give the whole department a very hilly appearance. In some parts it looks bleak and desolate, as in arrondissement Chateaulin, where are those extensive tracts, almost barren, known by the name of Landes; but in many other parts the scenery is rich, and beautifully diversified. The number of streams is very great; but the only navigable rivers are the Aulne, Elora, and Odet. An important addition to the water communication is the canal which connects Brest witl Nantes. The climate is more equable than that of the interior of France, the range of the therinometer being much more limited. In winter, it seldom descends below
125
the freezing point, and then only for short intervals; snow seldom falls, and in some years ice is never seen. On the other hand, summer is often deficient in heat, and mists and rains are very frequent. Winds, more or less W., blow during three-fourths of the year, and often with great violence. Owing to the rocky nature of the surface, scarcely one-half of the whole is available for cultivation, and much more than one-third is waste. The arable land, however, is of good quality, and well cultivated; and the grain raised, after satisfying the home consumption, leaves a considerable surplus for export. The principal crops are wheat, rye, and oats. Potatoes and flax are also extensively grown, and from the produce of the orchards a good deal of cider is made. The domestic animals are generally of good breeds. The horned cattle are rather small, but the horses for draught are excellent; and asses, of a large size, are reared in great numbers. From 10,000 to 12,000 are annually disposed of to other departments. The fisheries on the coast are extensively carried on, and that of sardines is particularly valuable, employing a great number of hands, and producing an annual value of about $£ 80,000$. The minerals of the department are of considerable importance, including iron, zinc, bismuth, and lead. The mines of the last, at Poullaonen and Huelgoat, are considered the most productive in France. The manufactures consist chiefly of sailcloth, ordinary linen, soap, oil, candles, ropes, leather, paper, and tobacco. Shipbuilding also is carried on to a large extent. The trade, greatly favoured botli by internal communication and a number of good harbours, is extensive. The principal exports are grain, oil, brandy, sardines, sailcloth, and tobacco; the imports, Dutch cheese and colonial produce. For administrative purposes, the department is divided into five arrondissements-Quimper, the capital ; Brest, Chateanlin, Morlaix, Quimperlé ; subdivided into 43 cantons, and 282 communes. Pop. (1846), 612,151.

FINISTERRE CAPE.-1, [anc. Artabrum Promontorium], the most W. headland of Spain, Gallicia; lat. $42^{\circ} 54^{\prime}$ N. ; lon. $9^{\circ} 21^{\prime}$ W. (R.) It is of considerable elevation, with a flat summit.-2, [Latin, Promontorium Celticum], The most W. headland in France, dep. Finistère (Brittany); lat. $48^{\circ} 20^{\prime} \mathrm{N}$. ; lon. $4^{\circ} \mathrm{W}$.

FINKENWÄRDER, an isl. in the Elbe, belonging partly to Hamburg, and partly to Hanoverian bailiwick of Harburg. It is protected by a surrounding wall, 20 ft . high; and has two churches, and two schools. Its inhabitants are engaged in boat-building, and fisling and agriculture. Pop. 1700.

FINLAND (Grand Principality of) [Latin, Finnia, Finonia, Finlandia], a dist. or gov. in the N. W. of Russia, bounded, N. by Norway, W. by Sweden and the Gulf of Bothnia, S. by the Gulf of Finland, a corner of gov. Petersburg, and Lake Ladoga, and E. by govs. Olonetz and Archangel ; length, N. to $\mathrm{S} ., 650 \mathrm{~m}$. ; breadth near the centre only $112 \mathrm{~m} .$, but toward the $\mathrm{S} .$, where it is greatest, 370 m . ; area, about 84,800 geo. sq. m. The coast generally presents a face of bold and precipitous granite cliffs, and is lined by numberless small islands and rocks, which make the navigation extremely dangerous. The interior may be described as a vast table land, with an average height of 400 to 600 ft . above the sea. It is not, however, by any means a monotonous flat, but is much broken by hills and valleys, and occasionally rises into mountains, of which a chain, which at Maanselke, in the N., has a height of nearly 4000 ft ., is continued S., though with several interruptions, and terminates in lofty cliffs in the Gulf of Bothnia. The great mass of the mountains is composed of red granite, and vast quantities of the same rock lie in boulders on the lower grounds, and prove a very serious obstacle to their cultivation. Many of the heights are bare, but the greater part of those of moderate elevation are covered with forests, chiefly of pine-wood; and, in combination with the vast number of lakes enclosed by their bases, often form very romantic scenery. These lakes, both by their number and individual extent, furnish one of the most characteristic features of the country. The most important of them are Lake Ladoga, the greater part of which belongs to the grand duchy; Saima, Paijäne.järwi, all in the S., where the greater part of the surface is occupied by water; the Uleå, near the centre, and the Enara, in the extreme N. These lakes form the chief basins of Finland, receiving the far greater part of its streams, in the first
instance, and afterwards discharging their waters into the sea, by rivers generally of no great length, but of much width and depth. The longest rivers are in the N., where the lakes are fewest. Among others may be mentioned the Torneå, forming a long stretch of the boundary between Finland and Sweden, the Keni and the Ijo. The climate varies much, according to locality. In Lappmark, in the N., it is polar, but somewhat modified. Further S., the winter begins in the middle of October and continues to the middle of May, but even during the coldest season thaws of several days' duration are not unfrequent. Spring appears suddenly, and continues for about a month, leaving only about four months for snmmer and harvest. The summer months are so hot, and the weather so dry, that the crops near the Gulf of Finland, where the soil is of a sandy texture, often suffer from drought. The soil consists generally of a clayey or sandy loam, and must be of good natural fertility, since, notwithstanding a very imperfect system of culture, and the unfavourable circumstances in which the crops are reared, a considerable quantity of grain is exported, and Finland, when in possession of Sweden, was regarded as its most important granary. The principal crops are barley and rye. Owing to the nature of the surface and climate, a great part of the land is fit only for pasture, but the number of stock is greatly limited by want of winter fodder. In the N., where vegetation is almost confined to the growth of moss and lićhen, other domestic animals are superseded by the reindeer, of which great herds are kept. The forests are very extensive, and furnish one of the chief sources of public revenne. In addition to timber, chiefly fir, large quantities of potash, pitch, and rosin are obtained from them, and form the principal articles of export. The minerals are chiefly confined to iron, lead, sulphur, nitre, slate, and granite. The first only is wrought to some extent, and supplies several furnaces; of the last, a great number of excellent quarries have been opened, chiefly on the borders of the lakes or seacoasts, to secure the advantage of water carriage. From these, blocks of extraordinary magnitude and beauty are obtained, and employed both for architectural and artistical purposes. One of the finest specimens is furnished by the obelisk monolith recently erected in St. Petersbnrg to the Emperor Alexander. In its rough state it was 12 ft . in diameter, and 80 ft . long. Manufactures are insignificant; the principal articles of trade have already been incidentally mentioned. The inhabitants of the W. coast are of Swedish, and those of the S.E. of Russian origin; but the far larger portion, amounting to nearly five-sixths of the whole, are Finns, with a slight mixture of Laplanders. The latter, in a pure state, are only to be found in a few very limited districts of the N. The Finns have been divided by ethnographers into two great families of W. and E. Finns, but they are so much intermixed, and possess so many common features, that it seems impossible to deeide between them. Up to the 12 th century, the Finns lived under their own sovereigns, and were Pagans. Their conversion to Christianity took place about the middle of that century after their conquest by the Swedes. They are almost all Lutherans. They are somewhat phlegmatic in their temperament, but patient, laborious, not without enterprise, and very hospitable. Their prevailing vice is an excessive fondness for ardent spirits. In 1721 the part of Finland which formed prov. Wiborg, was secured to Peter the Great by the treaty of Nystadt. The remainder was conquered from the Swedes in 1809, and now forms a division of the Russian empire, under the name of a Grand Principality, the emperor exercising his supremacy as Grand Prince. 'The states, composed of the representatives of four social orders, are convoked by him; and no new laws can be enacted, nor new taxes imposed, without their sanction. Some modification of this constitution has been made by the substitution of a senate for the states, but it still continues to be at least virtually recognized; and the ordinary procednre of the courts of law is in accordance with the forms in existence under Swedish rule. The proper seat of government is at Petersburg; but a governor-general, representing the emperor, resides in Helsingfors. Administratively, Finland is subdivided into eight läns or counties - Wiborg, St. Michael, Nyland, Tawasthuus, $\AA$ bo - Biörncborg, Wasa, Kuopia, and Uleáborgkaiana. It is sometimes also subdivided into the two lappmarks of Kami, Tornea, and the dist. of Viborg. Pop. (1850), 1,539,000.

FINLAND (Gulf of), a great arm of the Baltic, on the E. side, having Finland on the N., and the Russian gevs. Esthenia and St. Petersburg on the S. The length of the gulf, E. to W., is about 250 or 260 m . ; breadth at the entranee, or narrowest part, 40 m ., towards the head, where it is widest, about 80 m . Its N . shores are consilerably serrated, but present ne very deep indentations. The s . coast is still less marked. It receives but few rivers, and nene of them, with exception of the Neva, of any great size. The latter enters the head of the gulf, eommunieating with Lake Ladoga. The other rivers that may be mentionel are the Luga and Narva, which disembogue within a short distanee of each other, near the head of the gulf, on the s . side. It contains numerons islands, of which Cronstadt is the largest. There are various towns of considerable importance along its sheres, St. Petersburg oeenpying its E. extremity. Amongst them may be named Narva, Revel, Port Baltie, Ekenäs, Borgo, Frederikshain, Helsingfors, and Wyborg or Viborg.

FINMARK [Danish and Swedish, Finmarken], a bail. Norway, prov. Tromsüe, forming the most N. part of the kingdom, bounded, E. by Russia, S. by Sweden and bail. Nordland, and on all other sides by the Arctie Ocean. It consists of a mountainous and usually sterile tract, stretehing 140 m . N.E. to S.W., with an average breadth of about 40 m. ; its coast deeply indented by bays, and lined by numerous islands. Both the severity of the climate, and the general barrenness of the soil, eonfine enltivation within very narrow limits. Where it is practicable, the ehief crops raised are barley and potatoes. The only trees are birch and pine, and occasionally willow and mountain-ash. The prineipal rivers are the Tana, forming the Russian boundary on the E., and the Alten. The valley of the latter is the finest part of the country, and presents some fine Alpine, and even rural seenery. The islands alrealy mentioned, known by the general name of Loffodens, form a long line of ceast, where important fisheries are established, and give employment to the greater part of the population. The cod fishery alone employs 2916 boats and 15,324 men, and the produce is upwards of $16,000,000$ of fish, 21,500 barrels of cod liver eil, and 6000 barrels of roe. The inhabitants are Fimns and Laplanders. Pop. (1845), 36,854.

FINMERE, par. Eng. Oxforil; 1650 ae. Pop. 387.
FINNAN.-1, A vil. Seotland. See Findon.-2, A small river, Scotland, co. Inverness, which flows through the valley of Glenfinnan, and falls into the E. extremity of Loeh Shiel.

FINNINGIIAM, par. Eng. Suffolk; 1560 ae. Pop. 480.
FINNINGLEY, par. Eng. Notts; 5970 ae. Pop. 1209.
FINNOE, par. Irel. Tipperary ; 5054 ae. Pop. 1576.
FINO, or Ponto Fiso, a promontory, Sardinian States, on the shore of the gulf, and 17 m . E.S.E. Genoa. It is a large and lofty headland, of a round shaje, rendered eonspicuous from a distanee at sea by the towers and square fort whieh crown its summit. There is deep water almost to its base, and inmediately E. of it are the town and harbour of same name.

FINO, a vil. and com. Austrian Italy, prov. of, and 6 m . S. Como, on a gentle eminence, at the foot of which the Seveso rises. It is a cheerful-looking place, and contains a parish ehurch, and the remains of an ancient eastle. I'op. 1475.

FINSBURY, a parl. bor. England, eo. Middlesex, forming the N. part of London, having E. the Tower Hamlets, W. Marylebone, and S. the city of London and liberty of Westminster. It embraces Clerkenwell, Islington, and other parishes; and near its S.E. extremity are a square, circus, and distriet of its own name. Within its limits are situated several important buildings and institutions, including St. Bartholomew's and the Foundling Hospitals, the Charter-house, Gray's Imm, and the British Museum. Since the passing of the Reform Bill it has sent two members to the House of Commons. Resistered electors (1850), 17,735. Pop. 265,043.

FINSTERWOLDE, a vil. Holland, prev. of, and 23 m . E. by S. Groningen, near the estuary of the Dollart. It is a scattered place, and has a neat ehureh, a sehool, and a poerhouse. Inhabitants agriculturists. Pop. 1067.

FINTONA, a market til. Ireland, co. Tyrone, 7 m . S. Omagh. It has a parish ehureh, places of worship for I'resbyterians, Methodists, and R. Catholics, twe national sehools, and a dispensary. The linen manufaeture, onee extensively carried on here, has lately been revived. Spades, and other
agrieultural implements, are made to a great extent ; and considerable quantities of sewed muslin work are done for Belfast and Glasgow houses. Weekly market on Friday; monthly fairs. Pop. (1841), 1327.-(Local Correspondeut.)

FINTRAY, par. Seot. Aberdeen; 15 sq. m. Pop. 1032.
FINTRY, a vil. and par. Seotland, co. of, and 12 m . W.S.W. Stirling. The viliage contains a neat parish ehurch, two endowed schools, and a cotton factory, employing nearly 300 hands. Area of par. 13,000 ac. Pop. 884.

FINUGE, par. and tn. Irel., Kerry; 3695 ac. Pop. 1103.
FINVOY, par. Irel. Antrim; 16,474 ae. Pop. 6405.
FlORANO' [Lat. Florianum], a vil. and com. Sardinian States, Piedment, prov. of, and 2 m . W. Ivrea, on the Dora. It eontains a parish chureh, a fine villa with English garden, and the remains of an old fort; and has a considerable trade in iron ore, mined in the valley of Brosso, and carried over inte the valley of Aosta. Pop. 1040.

FIORENZUOLA.-1, [Latin, Florentiola], a tn. duchy, l'arma, in a beautiful plain, on the Emilia, and r. bank, Arda, here erossed by a handsome moderu bridge, 15 m . E.S.E. Piacenza. It is well bnilt. nearly in the form of a perfeet square ; contains a cellegiate ehureh, riehly decorated; a convent, a palaee, with the remains of an ancient theatre; a remarkable tower, with chains hanging from it, to whieh eriminals are said to have been hound; an hospital, a primary, a secondary, and a Jewish school; and has a weekly market and three annual fairs, two of which last each three days. Pop. 2870.—2, A tn. Tuseany, prov. of, and 25 m . N.N.E. Florence, at the bottom of a deep valley, l. bank, Santerno. It is situated in a mountainous district, known by the name of the Florentine Alps, is the seat of a court of justice, and contains a parish ehurch, hospital, and ceelesiastical seminary. It was once fortified, and makes a figure in the early Italian wars. Pop. 679.

FIRAN, a small isl. Red Sea, about 18 m . from the coast of Arabia; lat. $17^{\circ} 13^{\prime} \mathrm{N}$. ; lon. $41^{\circ} 30^{\prime} \mathrm{E}$.; celebrated for its pearl fishery.

FIRANDO, or Frrato, a long and lofty isl. Japan, about 10 m . off N.W. coast of Kiusiu. It stretches E.N.E. and W.S.W., between lat. $33^{\circ} 10^{\prime}$ and $33^{\circ} 25^{\prime}$ N., while the village of same name is said to be in lon. $129^{\circ} 37^{\prime} \mathrm{E}$. The Dutch had their faetory in this place, from its first settlement in 1609 till its transference to Desima in 1641. The village lies on a bay, in which is a vast round basin, connected with the bay by a narrow eliannel. At low water, however, this basin is generally dry, and the entrance is narrow and dangerous, but in the bay is good and safe anchorage.

FIRAO, a considerable tı. Japan, isl. of Niphon, prov. Yamato, 45 m . S.s.E. Meaco.

F1RBECK, par. Eng. York (W. Riding); 1330 ac. P. 191.
FlRENZE, a tn. Italy. See Florence.
FIRLE (West), par. Eng. Sussex; 4410 ae. Pop. 722.
FIRMINY, a manufacturing tu. France, dep. Loire, 6 m . S.W. St. Eticnne. Its chief manufactures are cast steel, nails, smiths' bellows, forge hammers, window glass, and bottles. Some ribbon-weaving is carried on. There are several collieries in the vicinity. Pop. 2255.

FIROZABAD.-1, (Giaour or Gur), a tn. Persia, prov. Fars, 65 m. S.S.E. Shiraz; lat. $28^{\circ} 54^{\prime}$ N.; lon. $52^{\circ} 37^{\prime}$ E. It contains many interesting ruins, and is famous for its attur of roses, which is reekoned the finest made in P'ersia. It carries on a considerable trade in horses, cotton, and various agricultural produets. Pop estimated at $2000 .-2$, A tu. Hindoostan, prov. Agra, l. bank, Jumna, 59 m . N. by E. Gwalior.

FI RSBY, two pars. Eng. Iincoln :-1, 910 ac. Pop. 196. —2, (East), 690 ae. Pop. 8 ?.

FIRS' ISLAND, or Murder Island, a small isl. Mozambique Channel, S.W. coast of Madagasear, from which it is distant about 3 m .; lat. $22^{\circ} 5^{\prime} \mathrm{S}$. ; lon. $43^{\circ} 7^{\prime}$ E.; named Murder Island by Captain Owen, in eonsequenee of the murder there of two of his midslipmen by the natives.

FIRTH and Stenness, par. Scotland, Orkney; 9 sq. m. Pep. 1167.

FISCHA, or Fiscinamend [ane. Aquinoctium], a market tn. Lower Austria, r. bank, Fischa, here erossed by a bridge, with an old massive tower, at its junction with the Danube, 12 m . E.S.E. Vienna. It is an ancient place of Roman origin surrounded by hills on the W. and S. ; contains a castle, and
has mannfactures of cotton, a print-field, and a cotton-mill. The Templars had an establishment here. Pop. 1220.

FISCHA, a river, Lower Austria, which rises S. of Vienna, in the Schneeberg, between the Piesting and Leitha, flows N.E., receiving the Piesting and the Riesenbach, and passing the towns of Guttenstein, Piesting, and Solenau, joins r. bank, Danube, at Fischamend, 12 m . E.S.E. Vienna, after a course of 55 m .

FISCHBACH, a vil. Prussia, prov. Silesia, gov. of, and about 30 m . S.S.W. Liegnitz. It stands in a beautiful district; contains a Protestant and a R. Catholic parish church, and a castle, with fine gardens, belonging to Prince William of Prussia; and has tile-works, a saw, and two other mills. Pop. 1250.

FISCHENTHAL, a vil. and par. Switzerland, can. of, and 18 m . E.S.E. Zürich, on the Töss. It stands in a valley of the same name, inclosed by lofty mountains, of the range of Allmann. It consists of a parish church, and a number of huts scattered through the valley. The inhabitants are not in comfortable circumstances, and have repeatedly been brought to the point of starvation; but the introduction of silk and cotton spinning has tended greatly to ameliorate their condition. Pop. 2814.

FISCHHAUSEN, a tn. Prussia, prov. E. Prussia, gov. of, and 21 m . W. Königsberg, cap. circle of same name, on the Wieke, a beautiful bay on the N. side of the Frische Haff. It is the seat of a court of law and several public offices; has a church, manufactures of cloth, a fishery, and four annual fairs. Pop. 1914 . -The circle (area, 318 geo. sq. m.), is flat, and well wooded; but has a sandy soil. Pop. 36,873.

FISCIANO, a vil. Naples, prov. Principato Citra, 7 m . N.N.E. Salerno, with two parish churches and two convents. Pop. 1296.

FISH RIVER (Great).-1, S.E. Africa, near the E. frontier of Cape Colony. It rises in about lat. $31^{\circ} 30^{\prime} \mathrm{S}$.; lon. $25^{\circ}$ E., flows N. and E. to about lon. $25^{\circ} 45^{\prime}$ E., when it takes a S. direction to lat. $32^{\circ} 55^{\prime}$ S.; here it again turns to the E., and at lon. $26^{\circ} 50^{\prime}$ once more flows S. and S.E., till it falls into the sea, at lat. $33^{\circ} 30^{\prime} \mathrm{S} . ;$ lon. $27^{\circ} \mathrm{E}$. Its course, like that of most of the rivers in this part of Africa, is singularly tortuous, rarely flowing more than 3 or 4 m . in one direction; thus its entire length, in a straight line, may not much exceed, perhaps, 180 m ., while, following its sinuosities, and the larger of these only, it will extend to considerably upwards of 400 m . The Great Fish river traverses the counties Cradock. Somerset, and Albany, and forms the boundary between the latter co. and that of Victoria to the E.2, A river, British N. America (see Back's River).

FISHBOURNE (New), par. Eng. Sussex; 610ac. P. 295
FISHER'S ISLAND, a small isl., U. States, New York, 14 m. E. Long Island. It is 8 m . long, by 1 m . broad, and sustains a valuable dairy.

FISHER SOUND, a channel, British N. America, W. coast, which separates Princess Royal Islands from the Continent, and forms the N. continuation of Fitzhugh's Strait; lat. $52^{\circ} \mathrm{N}$. ; lon. $130^{\circ} \mathrm{W}$. It was discovered by Vancouver in 1793.

FISHERTON, two pars. Eng. Wilts:-1, (Anger), 660 ac. Pop. 1739.-2, (De la Mere), 3300 ac. Pop. 324.

F1SHGUARD, a seaport, tn., and par., S. Wales, co. Pembroke. The town is beautifully situated $13 \frac{1}{2} \mathrm{~m}$. N. Haverfordwest, at the month of the Gwayn, on Fishguard bay; streets, for the most part, steep and irregular ; houses of indifferent appearance; water excellent and plentiful. Besides the parish church, there are places of worship for Baptists, Independents, and Calvinistic Methodists; with a number of daily and Sunday schools. The port is one of the best in St. George's Channel. About 100 vessels belong to the port; but its trade is inconsiderable ; exports, chiefly corn, butter, and slates; imports, general goods, coal, culm, limestone, and timber. The fisheries off the bay are also productive, and employ a considerable number of the inhabitants. In 1797, a French force, of about 1100 men , landed in the neighbourhood; but were captured by the troops under Lord Cawdor. Pop. (1841), 2013; (1851), 2304.

FISHLAKE, par. Eng. York (W. Riding) ; 6170 ac. Pop. 1257.

FISHLEY, par. Eng. Norfolk; 476 ac. Pop. 9.
FISHTOFT, par. Eng. Lincoln; 4580 ac. Pop. 562.

FISKERTON, par. Eng. Lincoln ; 204 ) ac. Pop. 410.
FISMES [Latin, Fines Remorum], a tn. France, dep. Marne, 39 m. N. W. Chalons, once strongly fortified, and part of the defences still existing. It has manufactures of pottery, tiles, and bricks, and a liquor called vin-de-Fismes, for colouring rose champagne. A church council was holden here in 881, and another in 935. Pop. 2190.

FITATS [Chinese, Tchang-loo], a prov. Japan, E. part of isl. Niphon, bounded, N. by Monts, E. by the Pacific, S. by Simosa, and W. by Mousasi; length, nearly 100 m . It is mountainous; watered by several large rivers, and has a fertile soil. A great trade is carried on in cattle and silk fabrics. It is divided into 11 districts; and, besides Mito, its capital, has a town of same name, on a small river, near the coast, 108 m. E.N.E. Yedo.

FITERO, a tn. Spain, prov. Navarre, 15 m . S. W. Tudela, 1. bank, Alhama. In the older portion of the town, the houses are ill built, and the streets narrow, and badly kept; but in the more modern part, the streets are good, the dwellings substantial, and agreeably interspersed with gardens and olive plantations. It has a large monastery, fine gothic parish church, and two public schools, and, in the vicinity, some thermal springs and baths, and gypsum quarries. Linen and woollen fabrics, hempen shoes, earthenware, soap, wine, and oil, are manufactured. Pop. 2190.

FITFUL HEAD, a promontory, near the S. part of the mainland of Shetland, W. of Quendal bay, rising 929 ft . above the level of the sea. It has been rendered famous by Sir Walter Scott, in his novel of the Pirate.

FITTLETON, par. Eng. Wilts; 3050 ac. Pop. 336.
FITTLEWORTH, par. Eng. Sussex; 2390 ac. Pop. 713.
FITTRE, or Fiddri, a lake, Central Africa, kingdom Waday or Bergoo ; lat. $13^{\circ} 45^{\prime}$ N.; lon. $20^{\circ} 30^{\prime}$ E., about 200 m. E. Lake Tchad. It is said to be four days' journey in circumference during the dry season, but in the wet season increases to double that extent, and is represented as having no outlet, although it receives a large river 400 yards wide at its embouchure. This lake is understood to be the same called Cauga by Edrisi, in the 11 th century, who asserts that it has a communication with the Niger.

## FITZ, par. Eng. Salop; 1670 ac. <br> Pop. 246.

FITZABADING, a beautiful and fertile district, in the S. W. part of Abyssinia, prov. Gojam ; described by Dr. Beke as more resembling an English than an African landscape; its rich and extensive pastures being interspersed with numerous trees, amongst which herds of cattle are seen grazing.

FITZHEAD, par. Eng. Somcrset; 1190 ac. Pop. 339.
FITZROY, an isl., near the N.E. coast of Australia, 5 m . N.E. Cape Grafton, N. peak 550 ft . high ; lat. $16^{\circ} 55^{\prime} \mathrm{S}$.; lon. $146^{\circ}$ E. (R.)

FIULINAS, or Florinas, a vil., isl. Sardinia, prov. of, and 9 m. S.S.E. Sassari, near the Pianora, on a height open on all sides, and commanding a magnificent view. It contains an ancient parish church, with three naves; three other churches, and a primary school ; and has some trade in cattle, wine, fruit, and poultry, and an annual fair. Pop. 2025.

FIUMARA di MURA, a vil. Naples, prov. Calabria Ultra I., dist of, and 7 m. N. Reggio. Pop. 1739.

FIUME [German, St. Veit am Flaum; Illyrian, Reka], a seaport tn. Austria, cap. of the Hungarian Kuistenland or Littorale, on the small river Fiumara, where it falls into the Gulf of Quarnero, in the N.E. extremity of the Adriatic; lat. (clock tower) $45^{\circ} 19^{\prime} 36^{\prime \prime} \mathrm{N}$.; lon. $14^{\circ} 26^{\prime} 45^{\prime \prime}$ E. (R.) It consists of the old town, built on a height, and composed of very indifferent houses, and gloomy, dirty, winding, and illpaved streets; and of the new town, situated along the shore, and presenting a very marked contrast to the old town, by the number of its handsome buildings, and the general spaciousness and regularity of its streets, provided not only with good central, but also side pavement. The objects most deserving of notice are the old capitular or high church, Maria Himmelfahrt, rich in marble, and adorned with a fine front; the church of St. Veit, formerly belonging to the Jesuits, a handsome structure, in the form of a rotunda, with a dome, and eight marble pillars, resembling the church of Maria della Saluti, in Venice; the casino, an elegant edifice, the first story of which is used as a theatre; the governor's residence, barracks, townhouse, monasteries, \&c. Fiume is the seat of a military governor, a mercantile and commercial court, a maritime con-
sulate, sanitary directory, custom-house, and bridewell; and possesses a gymnasium, a high school, and a burgher hospital. Its manufactures include linen, leather, woollens, refined sugar, refined wax, tobacco, and especially rosoglio, but shipbuilding is the main-stay of the place, for which the splendid forests of the Julian Alps afford the greatest facilities. The harbour is very indifferent, and admits only small vessels; but the roadstead has sufficient depth of water for vessels of any size, at a few hundred yards from the shore, and if not completely, is at least well sheltered. The principal exports are corn, tobacco, wood, fruit, and salted provisions; the principal imports-sugar, rice, spices, and salt. The commercial importance of Fiume was early perceived, and easy communication with the interior has been secured by a magnificent road of 73 m . to Carlstadt, where the navigation of the Save and Culpa becomes available. Still the road being over the Julian Alps, is hilly, and carriage to and from the interior being wholly by land, is expensive. The trade of the port is thus greatly limited; for being the only important seaoutlet for the produce of Hungary, it ought to be extensive; yet, on an average of seven years, the exports from that country through Fiume only amounted to $£ 200,000$ a year. Pop. (1846), 11,000.-(Raffelsperger; Paton's Mighlands of the Adriatic.)

FIUME-Freddo, a tn. Naples, prov. Citra Calabria, 10 m. S. Paola, agreeably situated near the Tyrrhenean Sea. It has a handsome chureh, two monasteries, and a numery; and an annual fair. Pop. 2814.

FIUMICELIO, a vil. and com. Anstrian Italy, prov. of, and within 1 m . of Brescia, of which it is properly a suburb. lt is beautifully situated on a mountain slope, near the Milla, and contains a parish chureh, and a great number of handsome villas. Pop. 2138.

FIUMICINO, a small seaport, Papal States, $16 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Rome. It stands at the mouth of the right or W. branch of the Tiber, a channel artificially made by Trajan, and now the principal communication of the capital with the sea. It contains a line of well-built houses, and a lofty square tower of five storics, surmounted by a beacon, to guide the entrance into the river, which is narrow and difficult. An active fishery is carried on, and furnishes a considerable supply of fish to Rome. Owing to its low site, Fiumicino requires the protection of strong embankments. It is much resorted to by the Romans as a holiday excursion.

FIVE ISLANDS.-1, A group of small isls. China Sca, S. coast, China, prov. Quangtong; lat. $21^{\circ} 40^{\prime} \mathrm{N}$. ; lon. $112^{\circ} 38^{\prime} \mathrm{E}$. They are of moderate height, and most of them covered with grass.-2, A group in the Tanasserim or Mergui Archipelago, 5 m . S.E. Pine-tree Island, about lat. $10^{\circ} 20^{\prime}$ N.; lon. $98^{\circ}$ E.- 3 , (Cinque Islands), Bay of Bengal, off the S.E. end of Rutland Island, one of the Andamans; lat. $11^{\circ} 22^{\prime} \mathrm{N} . ;$ lon. $92^{\circ} 45^{\prime} \mathrm{E}$.

FIVE-MILE-TOWN, or Blessingbourn, a small market tm . Ireland, co. Tyrone, par. and $6 \frac{1}{2} \mathrm{~m}$. W. by S. Clogher. It has a neat chapel of ease, two Presbyterian meeting-houscs, and a Methodist chapel. Market-day, Friday; several fairs annually. Pop. 693.

FIVEIIEAD, par. Eng. Somerset; 1740 ac. Pop. 412.
FIVES, a vil. France, dep. Nord, arrond. of, and within 1 m . of Lille, with which it is so connected as to be properly its suburb. It has manufactures of chemical products, glue, and gelatine, several beet-root sugar factories, and numerous oil-mills. Pop. 2749.

FIVIZZANO, a tn. Tuscany, in a detached part of the dushy in the Val di Magra, 35 m . N.N.E. Pisa. It is surrounded by walls, flanked with towers; is the seat of a court of law, and several public offices; is well built and well paved, contains a large and handsome square, situated near the centre of the town, and adorned with a fine fountain; an elegant parish church, superior school and hospital; and has two weekly markets, and a trade in corn and oil. Pop. 2005.

FIZA, or Föred, a market tn., co. Heves, on the Theiss, 27 m. S.E. Erlau. It contains a Protestant parish church. Pol. 4020.

FlZEN, a prov. Japan, W. part of isl. Kiusiu; bounded, N. by Tsikusen and the Corea Channel, E. by Tsikugo, S.E. by the Girlf of Simabara, and S.W. by the Yellow Sea. It includes 1016 islands and islets, of which the Gotto group and the isl. of Firando are the most important. Fizen is of a
volcanic formation, and exhibits evidences of former eruptions. It is famous for its bedutiful porcelain manufactures. The method of preparing the clay for use is curious and ingenious. A tree is hollowed in the form of a trough from 20 to 25 ft . long, and 2 ft . thick at one end; this trough is placed on an axle, and properly balanced; to the thin end a heavy wooden hammer is attached, made more weighty with iron; water is poured into the thick end, causing it to sink, by which means the hammer is raised, till the water flowing out again at the lowered end, it falls with all its weight upon a mortar of marble or granite containing the porcelain earth, which it bruises without difficulty.

FLAACH, a vil. and par. Switzerland, can. of, and 15 m . N.N.E. Zürich, beautifully situated not far from the confluence of the Thur with the Rhine. It contains a parish church, a small castle, and two schools. The wine made here is in high repute. Pop. 1002.

FLADBURY, par. Eng. Worcester; 7830 ac. Pop. 1448.
FLADS'TRAND, Denmark. Sce Fredericksilavn.
FLAGSTAD, two isls. Norway. The one, on the W. coast, and belonging to the group of the Lofodens, in lat. $68^{\circ}$ N., is about 15 m . lung, and forms a parish with 905 in habitants; the other, off the S.E. coast, 43 m . N.E. Christiansand, has a length of about 6 m .

FLAMANVIILE, a vil. and com. France, dep. Manche, $13 \mathrm{~m} . \mathrm{S} . \mathrm{W}$ Cherbourg; with extensivo granite quarrics.

FLAMBOROUGH, a vil. and par. England, co. York, (E. Riding.) The village, 4 m . E.N.E. Bridlington, about the centre of the celebrated promontory Flamborough Head, contains, besides the parish church, places of worship for Primitive and Wesleyan Methodists. It was formerly a place of some note, but is now merely a large fishing village. Area of par. 2980 ac. Pop. 1191.

FLAMBOROU(iH IIEAD, a remarkable headland, E. coast England, co. York ; lat. $54^{\circ} 7^{\prime} \mathrm{N}$. ; lon. $0^{\circ} 5^{\prime} \mathrm{W}$. (R.) It consists of a lofty range of chalk cliffs, about 6 m . long, and rising in many places to an elevation of 300 ft . perpendicularly from the sea. At the base of the rocks are several extensive caverns, and on the extreme point of the promontory, at a height of 214 ft . above sea level, is a lighthouse, with a revolving light, visible from a distance of 30 m . During the summer scason the cliffs here are the resort of immenso numbers of sea fowl.

FLAMS'TEAD, par. Eng. Hertford; 5660 ac. P. 1492.
FLANDERs [Latin, Flandiia; Spanish, Flandes; Italian, Fiandra; French, Flandre; German and Flemish, Flandern; Dutch, Vlaanderen], a former country or district, Europe, now included in Holland, Belgium, and France. It stretched from the Schelde, below Fort-Lillo, W. along the Hond, or West Schelde, and W.S.W. along the German Ocean, to the entrance of the Straits of Dover, near Gravelines, and was bounded E. by the duchy of Brabant, S. Hainaut, and W. the French provinces of Artois and Picardy. The origin of the name is unknown. It occurs for the first time, but in a very restricted sense, in the seventh century. The erection of the territory into a county took place in the ninth century, and was made by Philip the Bold, king of France, in favour of his son in-law, Baldwin, of the Iron Arm. It afterwards passed to the united houses of Spain and Austria, and ultimately to the latter, but underwent considerable curtailment by the conquests of the French in the west, when part of it became French Flanders, and is now included in departments Nord and Ardennes; and the conquests of the Dutch in the north, who succeeded in including the most northerly portion of it in the province of Zeeland. The remainder still retains its ancient name, and forms the modern provinces of East and West Flanders, in Belgium.

FLANDERS (EAST), [French, Flandre Orientale], a prov. Belgium, bounded, N. by Holland, E. provs. Antwerp and Brabant, S. Hainaut, and W. West Flanders; length, N. to S., 34 m. ; central breadth, E. to W., 32 m .; area, 1154 sq. m. The surface forms an extensive plain, sloping gently eastwards. It wholly belongs to the basin of the Schelde, while by itself, its tributaries, and canals connected with them, furnish ample water commnnication. Its soil, partly of a sandy and partly of a clayey texture, is so industriously and skilfully cultivated that it has the appearance of a vast garden, and presents one of the richest rural landscapes which anywhere exists. The Pays de Wacs, included almost wholly in the arrondissement
of Termende, is regarded as the most fertile and populous spot of the same extent in Europe. The principal crops are wheat and flax, but almest all the plants which can be grewn under the same latitude are cultivated with success. Among others are rape seed, hemp, potatoes, lucerne, hops, madder, chicory, and tebacce. The domestic animals, particularly horses and cattle, are of excellent breeds. The dairy husbandry, which alone can supply the manure necessary to maintain the fertility of the soil, under the exhausting theugh very profitable system of agriculture pursued, is particularly attended to. Sheep are not numerous. There are no forests, properly so called, but owing to the general practice of planting hedge-row trees, there is no want of wood. In general, however, it consists of peplar and other trees of soft texture, and makes only indifferent timber. There are no minerals of any value, but manufactures have made great progress, and all the ordinary, as well as the fine tissues of woel, cotton, and flax are well and largely made. There are also numerous tanneries, breweries, distilleries, soap-works, roperies, sugar and salt refineries, \&c. The trade includes, in addition to these articles, flax, hops, and oil. For administrative purposes, the province is divided into six arrendissements-Gand, or Ghent, the capital; Alost, Audenarde, Termende, St. Nicolas, and Eecloo. Pop. 779,466.

FLANDERS (West), [French, Flandre Occidentale], a prov. Belgium, beunded, N. and N.W. by the German Ocean, W.S.W. and S. France, S.E. prov. Hainaut, E. East Flanders, and N.E. Holland ; greatest length, N.N.E. to S.S. W., 54 m. ; greatest breadth, 48 m . ; area, 1250 geo. sq. m. The surface is generally flat, but a few low hills occur in the S. and E., and a range of sand hills or downs lines the greater part of the coast. The S.E. pertion of the province belongs to the basin of the Scheldt, which, forming the boundary between it and Hainaut, receives part of the drainage directly, and the remainder by the Lys; but the far larger part of the province sends its waters directly to the German Ocean by a number of small streans, of which the Yperlee is the only one deserving of notice. The others are chiefly employed in feeding canals. Much of the soil is naturally sandy and poor, but the untiring industry of the inhabitants has converted the far greater part of it into fertile plains. Large tracts of moor, however, still exist, and cannot well be dispensed with, as they form the principal source of fuel. The most important crops are flax, both abundant in quantity and excellent in quality; eats, barley, hops, oil sceds, tobacco, madder, and chicory. The cattle, of all sorts, are of excellent breeds; and fish, poultry, and game abound. The mest important branch of industry is linen, ordinary and damask. Great quantities of lace also are made, and there are numerous breweries, distilleries, tanneries, dye-works, eil-werks, soap-works, salt and sugar refineries, \&c. For administrative purposes the province is divided into eight arrondissements-Bruges, the capital; Courtrai, Ypres, Furnes, Thielt, Reulers, Ostend, and Dixmude. Pop. 646,054.

FLANNEN, or Fannan Isles, or the Seven Hunters, a group of seven small isles, Scotland, in the Hebrides, 17 m . W. Lewis ; lat. (N.W. extremity of Flannen) $58^{\circ} 13^{\prime} \mathrm{N}$.; lon. $7^{\circ} 37^{\prime}$ W. (R.) They afford excellent sheep pasture, and contain a number of Druidical remains.

FLAT-HOLMES, a small isl. England, co. Somerset, Bristol Channel, 6 m . W. Uphill, $1 \frac{1}{2} \mathrm{~m}$. in circumference, containing a lighthouse 80 ft . in height.

FLAT ISLAND.-1, A small isl. or rock, Bay of Bengal, S.S.E. from the Great Andaman; lat. $11^{\circ} 7^{\prime}$ N.; len. $93^{\circ} 37^{\prime}$ E.-2, An isl. Bay of Bengal, coast Aracan, S.E. isl. Cheduba; lat. $18^{\circ} 36^{\prime}$ N.; lon. $93^{\circ} 45^{\prime}$ E.-3, A group of small isls. China Sea, between the Great Natunas and Point Datto, W. ceast Bornee; lat. $3^{\circ} 3^{\prime}$ N.; len. $108^{\circ} 54^{\prime}$ E.4, An isl. Indian Archipelage, Fleres Sea, Alloo Strait, about 2 or 3 m . N.W. Pantar; lat. $7^{\circ} 59^{\prime} \mathrm{S}$. ; lon. $120^{\circ} 59^{\prime}$ E.5 , An isl. Indian Archipelage, Flores Sca, off the N. coast of Sumbawa; lat. $8^{\circ} 7^{\prime}$ S.; lon. $117^{\circ} 28^{\prime}$ E. (к.)

FLAT'BUSH, a vil. and township, U. States, New York. The village, 8 m . S.E. New Yerk, contains two churches, and a flourishing academy. In 1776 the British here defcated the Americans, with great loss. Pop. 2099.

FLA'THEAD INDIANS. Tribes established on both sides of the Columbia river, N. America, to a distance of many miles from its month. They are commonly of diminu-
tive stature, and badly made; a wide mouth and thick lips, nese thick and nestrils large. But the mest remarkable feature is the almest universal flattening of the head by various mechanical contrivances, a constant pressure being applied to the skull of the infant during the first four or eight months. It does net appear that this operation has any effect in diminishing the capacity of the cranium, or the whele volume of brain.

FLATOW, or Czlottowo, a tn. Prussia, prov. W. Prussia, gov. of, and 84 m . W.S.W. Marienwerder, cap. circle of same name. It is situated between three lakes; centains a Protestant and R. Catholic parish church, a chapel, and synagogue, and has manufactures of cloth and lace, a trade in corn, horses, and cattle, and seven amual fairs. Pop. 2312. The cincle, area, 427 geo. sq. m., is flat and well wooded, and contains a number of lakes, but is net very fertile. Pop. 46,290 .

FLAVY-Le Martel, a vil. France, dep. Aisne, 9 m . S.S.W. St. Quentin. It has manufactures of cotton goods, and a trade in cider. Pep. 1553.

FLAXILEY, par. Eng. Gloucester; 1980 ac. P. 229.
FLAYOSC [Latin, Flayoscum], a vil. France, dep. Var, 5 m . from Draguignan, in a fertile district. It was formerly a place of some strength, is surrounded by walls flanked with towers, contains a chapel of very ancient date, and has manufactures of delft-ware, brick-works, and three annual fairs. Pop. 1826.

FLECHE (La), [Latin, Fixia], a tn. France, dep. Sartbe, r. bank, Loir, 24 m . S W. Le Mans, finely situated in a smiling valley. It is well built, has wide, handsome, and clean streets, and is well supplied with water. In the middle of the river, which separates the town from its suburbs, are the ruins of a streng castle, built in the 10 th or 11 th century, and leng held to be the strongest fortress in Anjou. The chief building in the town is the military college, once the college of the Jesuits, founded in 1603. It encloses five large courts, and contains a fine church, and a library of 20,000 vols. The church of St. Themas is a remarkable pile, of Byzantine gothic, the old fleche or spire of which gave name to the place. It alse has a townheuse, courtheuse, and public hespital. At the W. end of the pert, formed by the Leir, is a fine walk, bordered with elms. The manufactures comprise linen, hosiery, glue, wax, leather, gloves, \&c. There is a trade in grain, fruit, penltry, and cattle. Pop. 5838.

FLECKERÖE, a small isl. S.E. coast, Norway, near the entrance of the bay, and 3 m. . . of the town of Christiansand. It was once defended by a fort, which has been destroyed.

FLECKNEY, par. Eng. Leicester; 1630 ac. P. 473.
FLEDBOROUGGH, par. Eng. Notts; 1300 ac. Pep. 112.
FLEET, two pars. Eng.-1, Dorset; 1400 ac. Pop. 140. -2, Linceln; 6710 ac. Pep. 960.

FLEET, a small river, Scotland, co. Kirkcudbright, issuing from a lake of same name, flows S.S.E. past Gatehouse, and falls into Wigton Bay by a considerable estuary.

FLEETWOOD-on-Wyre, a seaport and watering-place, England, co. Lancaster, on the Wyre, near its entrance into Lancaster Bay, 18 m . N.W. Preston, with which it is connected by railway, joining the London and North-western line. This place has sprung up since the year 1836 , and is now a considerable town, containing a number of regular streets, well lighted with gas. It has a handsome church, an elegant hotel, a market-house, lighthouse, custom-house, and bending warehouses. The harbour is safe and commodious, and there is regular communication by steamers with Glasgow through Ardrossan, with the Isle of Man, Ulverstone and the lake districts Belfast, and ether places. Pep. (1841), 2833; (1851), 3373.

FLEHINGEN, a vil. Baden, circle Middle Rhine, 5 m . from Bretten. It contains a parish church, and has a papermill in its vicinity. Pep. 1138.

FLEKKEFJORD, a seaport, Norway, bail. Mandal, 50 m. W. Christiansand, on a fjord of same name. Trading, fishing, and making wooden houses, are the chief employments. Considerable quantities of herring and cod are exported to Sweden and elsewhere. Pop. 1471.

FLEMINGSTON, par. Wales, Glamergan. Pep. 74.
FLEMPTON, par. Eng. Nutfolk; 720 ac. Pop. 210.
FLENSBORG [Latin, Flenopolis], a market tn. Denmark, Schleswig, W. end, Flensborg Fjord, an inlet about

20 m . long, by 2 to 10 broad, with 5 to 12 fathoms water, and 20 m . N.N. W. Schleswig ; lat. $54^{\circ} 46^{\prime} 54^{\prime \prime}$ N. ; lon. $9^{\circ} 26^{\prime} 12^{\prime \prime}$ E. (r.) It is well built, and improving; has several handsome streets, and three market squares, a high school, and several others, four churches, an hospital, a penitentiary, and several charitable and useful institutions. The industry of the place comprises sugar-refining, tobaeco-spinning, soapmaking, iron-founding, brewing, distilling, \&c. In 1847 the port had 140 vessels, of 14,666 total tonnage, some of which traded to the West Indies. In 1848, 705 vessels arrived in the port. Flensborg is the most populous and important town of the duchy of Sehleswig, and of aneient foundation. As early as the 12 th century it was a wealthy place; but it afterwards suffered greatly from wars and conflagrations. In the war with Britain in 1807, its eommeree greatly suffered. In the war of 1848 , the Germans took possession of Flensborg, and its environs beeame the scene of hostile operations. Pop. 16,500.

FLERS, a tn. France, dep. Orne, 37 m . N. W. Alençon. It contains the remains of a fine old castle, built of granite, in good preservation, and has manufactures of linen, fustian, and particularly of ticking, which, in the town and neighbourhood, employs about 3000 hands, and of which from 1000 to 1200 pieces are sold weekly. Pop. 4063.

FLETCHING, par. Eng. Sussex; 5830 ac. Pop. 1914.
FLETTON, par. Eng. IIuntingdon; 780. ac. Pop. 256.
FLEURA NCE [Latin, Florentia], a tn. France, dep. Gers, 14 m. N. by E. Auch, prettily situated 1 . bank Gers. It is well built, has a fine public promenade, and a good trade in grain, legumes, wine, and goose quills. Pop. 2250.

FLEUIRUS, a tn. and com. Belgium, prov. Hainant, 7 m . N.E. Charleroi. It has manufaetures of coarse woollens and flax, with some tanneries and salt-works, and a trade in agricultural produce. In the vicinity, August 30,1622 , the Spaniards, under Gonzales, defeated the army commanded by Mansfeld; July 1, 1690, the Freneh, under Marshal Luxembourg, defeated the Germans under Prince Waldeck; June 26, 1794, the French republican forces, under Marshal Jourdan, defeated the Austrian army; and in June, 1815, the French gained a victory over the allies. Pop. 3544.

FLILDDEN, a vil. Hesse Cassel, prov. of, and 9 m . S.W. Fulda, l. bank, Flieden. It has numerous mills, and two annual fairs. Pop. 1752.

FL1MBY, par. Eng. Cumberland; 1620 ac. Pop. 546.
FLIMS, a vil. and par. Switzerland, can. Grisons, 11 m . W. Coire, about 2700 ft . above sea level. It contains two churches; one old, situated on a lofty eminence, the other new, situated within the village. It is supposed to derive its name from the Latin flumina, on account of the number of streams which rise near it, and often cause damage by inundation. The inhabitants are Protestants, and speak Romansh. rop. 997.

FLINDERS.-1, A gronp of four isls. off N.E. coast, Australia, near Cape Flinders, mouth of Jathurst Bay; lat. $14^{\circ} 11^{\prime} 5^{\prime \prime} \mathrm{S}$. ; lon. $144^{\circ} 12^{\prime} 5^{\prime \prime} \mathrm{E}$. Two of the islands are each 3 m . long; and they are high and rocky, and are visible from a distance of 36 m . to $40 \mathrm{~m} .-2, W$. Australia, co. Sussex, between Cape Leenwin and Cape Beaufort; lat. $34^{\circ} 20^{\prime} \mathrm{S}$. There is no landing for a boat on its E . and N . shores.-3, A river, N. Australia, flowing into the Gulf of Carpentaria. Discovered by Capt. Stokes (see Australia.)

FLINSIBERG, a tn. Prussia, prov. Silesia, gov. of, and 33 m . S.S.W. Liegnitz, about 1530 ft . above the sea. It contains a Protestant parish chureh, and has a slate quarry, and two glass-polishing, as well as several other mills. In the vicinity a mineral spring rises up near the source of the Queis. A bathing establishment has been erected over it, and is well frequented. Pop. 1534.

FLIN'T, or Flintsiife, a maritime co. N. Wales, consisting of two separate portions, a larger and smaller, the former having the Dee on the E., the Irish Sea on the N., and the cousity of Denbigh on the S. and W.; the latter, which is distant 6 m . S.E. from the main portion, and separated from it by the county of Denligh, has Cheshire on the N.E., and Shropshire on all other sides. Flintshire is the smallest county in Wales; but the most populous in proportion to its extent. The larger portion is about 27 m . long, with an average breadth of 6 or 7 m .; the smaller, 8 m . by about 5 m . broad, area, $244 \mathrm{sq} . \mathrm{m}$. A range ol hills, of moderate elevation, in-
terseets the county lengthways, S. W. to N.E. There are numerous well-watered and fertile valleys, including a portion of the celebrated vale of Clwyd. The coast is in general low, and skirted by sands, in some places nearly 4 m . wide, which are dry at low water. Agriculture has made considerable advances in this county of late years, and the condition of the peasantry has much improved. The grains principally cultivated are wheat and rye. The breed of cattle is small, but they are excellent milkers. Butter and cheese are also made to a considerable extent. The county is rich in minerals, partieularly lead, the mines of which are the most productive in Britain. Coal also abounds, and copper is obtained in considerable quantities. The principal smelting works are at Holywell and Mold. Flint returns two members to the House of Commons; one for the county, and one for the county town of Flint and its contributory boroughs; registered electors for the county ( 1850 ), 2951. It is divided into five hundreds, and 28 parishes. The Chester and IIolyhead railway crosses the N. extremity of this county. Pop. 1851), 68,156.

FLINT, a parl. bor. and seaport tn. N. Wales, cap. co. Flint, S.W. shore estuary of the Dee, 13 m . S.W. Liverpool ; lat. $53^{\circ} 15^{\prime} \mathrm{N}$. ; lon. $3^{\circ} 5^{\prime} \mathrm{W} .$, at the foot of a steep hill; houses tolerably well built, mostly of brick, covered with slate. It has a handsome church in the Gothie style, ereeted in 1848 , and five chapels, belonging to Baptists, Calvinists, Methodists, and Independents; substantial guildhall and county jail; and in all, five sehools, the most important of which are the national and British schools, and several benevolent associations or societies. Shipbuildirg is carried on to a considerable extent, as is also brickmaking, and the manufacture of various articles from box and other woods; there is also a saw-mill. In the vicinity are extensive lead and alkali works, a large forge for iron and steel, and several extensive coal mines, which employ the greater number of the working population. The shipping trade of the port, which had greatly tallen off, in consequence of the sanding up of the harbour, has again revived since recent improvements were effected. The chief articles of export are coals, and manufactured lead; imports, timber, lead ore, slate, pyrites for the alkali works, pig iron, and iron ore. A little N.E. the town, on the shore of the estuary, stands the ancient castle of Flint, an object of some historical interest. Flint is a station on the Chester and IIolyhead railway, whieh passes throngh the town at a small elevation. A eemetery is in progress of formation here. Pop. (1841), 1961.

FLINTHAM, par. Eng. Nottingham; 2450 ac. Pop. 611.
FLISK, par.. Scot. Fife; $4 \mathrm{sq} . \mathrm{m}$. Pop. (1851), 214.
FLITCHAM-with-Appleton, par. Eng. Norfolk; 3960 ae. Pop. 428.

FLI'T'SCH, or Pless, a market tn. Austria, Carniola, r. bank, Isonzo, in a bleak and sterile district, 49 m . N.N.W. Trieste. In the neighbourhood are the old castle of Flitseher Klause, or Chiusa di Pless, whieh guards a pass through the mountains, a bcautiful waterfall, and some mines of antimony. The inhabitants are chiefly weavers and carriers. Pop. 2100.

FLITTON, par. Eng. Bedford; 3185 ae. Pop. 1363.
FLI'TWICK, par. Eng. Bedford; 1700 ae. Pop. 693.
FLIX, a tn. Spain, Catalonia, prov. of, and 41 m . W. by N. Tarragona, r. bank, Ebro, on a height, erowned by the massive ruins of an ancient eastle. It contains two planted walks, a parish church, courthouse, prison, and primary school, and has numerous mills, and a trade in corn and flour. Pop. 1933.

FLIXiSOROUGH, par. Eng. Lineoln; 2650 ac. P. 231.
FLIXTON, three pars. Eng. :- Lancaster; 2710 ac . Pop. 2230; two in Suffolk.-1, 820 ac. Pop. 23.-2, 1460 ac. Pop. 192.

FLOBECQ, a vil. and com. Belgium, prov. Hainaut, 19 m . N.E. Tournai. It has a large manufactory of linens, the staple for whieh is raised in the locality; several breweries, saltworks, and flour and oil mills ; and two half-yearly fairs. Pop. 5486.

FLODDEN, a vil. England, co. Northumberland, 5 m . S.E. Coldstream, memorable for the sanguinary eonflict which took place here and in the vieinity, September 9, 1513, between the Seots, under James IV., and the English, under the Earl of Surrey, in which the former were defeated with a loss of about $10,000 \mathrm{men}$, besides the King himself, who fell
fighting desperately, in the midst of a devoted band of followers, 12 earls, 13 lords, five eldest sons of peers, and a number of knights and gentlemen. A large upright pillar of whinstore, called the King's stone, marks the spot where James fell. The loss of the English on this occasion was estimated at only 1500 men, a disproportion which has been attributed to the superiority of the English artillery and bowmen.

FLOH, a vil. Hesse Cassel, prov. and E.N.E. Fulda, on the Nesselwasser. It contains a parish church, and has a paper, an iron, and several other mills. There are iron mines and iron works in the vicinity. Pop. 1140.

FLONHEIM, a market to. Hesse Darmstadt, circle, Rheinhesse, r. bank, Wisbach, 16 m . S.S.W. Mainz. It contains a Protestant and a R. Catholic parish church, a synagogue, townhouse, and two school-houses; and has an annual fair and a stone quarry. Pop. 1602.

FLOORE, par. Eng. Nor thampton; 3390 ac. Pop. 1032.

FLORAC, a tn. France, dep. Lozére, plcasantly situated among vine slopes, in a narrow valley, near the confluence of the Tarnon with the Tarn, 15 m . S. by E. Mende. It con. sists chiefly of a small square, and a single street, along which the ligh road passes; contains a Protestant and a R. Catholic church, is the seat of a court of primary jurisdiction, possesses an agricultural society; and has several mills, and seven annual fairs. At the village of Crissac, in the vicinity, Pope Urban V. was born. Pop. 1904.

FLORDON, par. Eng. Norfolk; 1020 ac. Pop. 193.
FLORENCE, or Compaftimento Fiorentino, a prov. Tuscany, consisting of four detached portions, enclosed by the Sardinian States and the duchies of Parma, Lucca, and Modena, and of Florence proper; bounded, N. and E. by the Papal States, S . by compartimento Sienna, and W. by compartimento Pisa and the duchy of Lucca; area, including detached portions, about $3500 \mathrm{sq} . \mathrm{m}$. The surface is beautifully diversified by mountains, valleys, and plains. On the N. and N.E. it is covered by the N. Apennines, and on the E. by the central Apennines and the Tuscan sub-Apennines. Enclosed by these mountains lies the beantiful valley of the Arno, watered by the river of that name, and opened into by numerous minor lateral valleys, each drained by its tributary streams. In the N.W. are some plains, in which the lakes of Fucecchio and Bientina are situated. The climate is generally mild and healthy, and the soil very fertile, producing wheat, maize, beans, and all kinds of leguminous crops. The vine, olive, orange, citron, and fig thrive well in the low grounds; while the mountainous districts afford excellent pasture, admirably adapted for the rearing of sheep. The minerals include mines of copper, lead, and mercury; and quarries of marble, alabaster, and fine building stone. For administrative purposes, the Compartimento Fiorentino is subdivided into 91 communes. Pop. (1836), 671,857.

FLORENCE [Italian, Firenze or Fiorenza; anc. Florentia Tuscorum; German, F'lorenz], a celebrated city, Italy, cap.grand duchy, Tuscany, 143 m. N.W. Rome, and 50 m. E.N.E. from Leghorn ; lat. (cathedral) $43^{\circ} 46^{\prime} 36^{\prime \prime}$ N.: lon. $11^{\circ} 15^{\prime} 30^{\prime \prime}$ E. (R.) It is intersected by the Arno, which divides it into two unequal parts, the larger being on the N. side of the river. The latter varies here in width from about 100 to 150 yards. and is crossed by four bridges, one of these, the Ponte della

Santa Trinita, is of marble, and remarkable for its lightness and elegance; it is formed of three elhptic arches, and is adorned with statues. There are, besides. two suspension bridges. All these bridges are within a few hundred

the ponte santa trinita, \&e., florence.-From the Landscape Annual.
yards of each other. On either side of the Arno is a spacious quay, called the Lungo l'Arno [along the Arno], a favourite lounge or promenade of the Florentines. The city is surrounded by an old wall, $4 \frac{1}{4} \mathrm{~m}$. in circuit, in which there are seven gates. There are also two fortresscs on the line of the walls, one on the S., and the other on the N. side of the city. These defences are now wholly useless for military purposes. The streets are generally narrow, but are clean, and well paved with thick flagstones, chiselled into grooves, to prevent the horses from slipping. The private dwellings are mostly handsome, and the palaces, of which there are a great many, are noble and impressive structures, though somewhat gloomy, in consequence, partly of a paucity of windows, and of the lower tiers of the latter being strongly guarded with iron bars, giving them, in some instances, the appearance rather of prisons than palaces. Many of these stately mansions are magnificently fitted up, and contain extensive libraries, and valuable collections of paintings, one of the choicest in Italy being in the Pitti palace, formerly the residence of Luca Pitti, the for-

midable opponent of the Medici family, now occupied by the grand duke. The city contains numerous piazzas or squares, the most important of which, and the centre of public life, is the Piazza del Granduca, adorned with a marble fountain, and
a bronze statue of Cosmo I. by John of Bologna. Several of the other squares are of a considerable size, and many of them are named from the church they contain.

The most remarkable building in Florence, and perhaps the most remarkable of the kind in Europe, is the Duomo or cathedral of St. Maria del Fiore, situated in a spacions square, nearly in the centre of the city. The dome of this stupendous building is the largest in the world, and is said to have excited at

proudest boast of Florence, however, is its grand gallery [Galeria Imperiale e Reale]. It occupies the upper story of a fine building, called the Uffizi, erected by command of Cosmo I., after a design by Vasari. The prevailing order is the Italian or modern Doric. In its form it consists of three sides of a lengthened parallelogram, resting on a noble loggia. In this gallery are contained specimens of painting and statuary, by the greatest masters in these arts. In statuary, among numerous antiques may be specified the celebrated Venus de' Medici, and the group of Niobe and her children ; and in painting, there are works by Michael Angelo, Raphael, Titian, Guercino, Correggio, Guido, and numerous others of the first names in various sehools.

The Laurentian Library, a long and lofty gallery, with beautiful windows of stained glass, contains upwards of 9000 ancient MsS., equalled in importance by no collection except the Vatican. The Magliabecchian Library is the great repository of printed books, as the Laurentian is of mamuscripts. There is a third library, called the Biblioteca Marucelliana, composed of a large and excellent collection of books, bequeathed to the public by Abate Francesco Marucelli, who died in 1703. The Biblioteca Riccardiana is a fourth public library. It was founded in the end of the 16 th century by Riccardo Romolo Riccardi, and has recently been purchased by the Government. It contains 23,000 volumes, and $35,000 \mathrm{MSS}$.; these last more especially belonging to the literature of the Middle Ages. As already mentioned, the private libraries of Florence are numerous and extensive; that of the grand duke contains upwards of 60,000 volumes, and 1500 MSS . The charitable institutions of this superb city of palaces, squares, and fountains are numerous and important, some of them manifesting, in a very remarkable manner, the wide and active benevolence of the Italian claracter. Several of these institutions are of very ancient date; one of these, called the Buonuomini
once the admiration and emulation of Michael Angelo. Its walls are of brick, incrusted with black and white marble, and its floors are paved with the same material, of various colours; it is also adorned, both within and without, with marble statues, the works of the most eminent seulptors; and its paintings are, in general, masterpieces of the art. The Huomo was begun at the end of the 13 th century by Arnolfo di Lapo, was centinued by other successive arehitects, and completed in the 15 th century by Brunelleschi, who erected its vast done. Opposite the gates of the cathedral is the small octagonal chureh of St. John [San Giovanni], now used as a general baptistry for the city, the three bronze gates of which are celehrated as the most beautiful castings extant. One of them, the work of Ghiberti, was said by Michael Angelo to be worthy of being the gate of paradise. None of the other churches, the number of which is said to be 170 , exhibit any remarkable architectural excellence, though, in many instances, their internal decorations are sufficiently imposing. The church of St. Croce, the Westminster Abbey of Florence, contains, amongst other interesting tombs, those of Michael Angelo, Buenarotti, Galileo, Machiavelli, and Alfieri. The two market-places, the Mereato Vecehio, and the Mereato Nuove, are deserving of notice; the gallery [loggia] of the latter was built by Cosmo I., from designs by Tasso. These markets are amply supplied with merchandise and provisions of all sorts, and with a profusion of the most gergeous flowers, on which, it has been said, more money is spent in Florence than in any other part of the world. Immediately behind, and extending S.W. from the Palazzo Pitti, are the Buboli gardens, about $1 \frac{1}{4} \mathrm{~m}$. in circumference, having the city wall for their boundary on the S. They were first plamed in 1550 by Il 'Tribolo, under Cosino I. They are laid out in long embowered walks, to afford protection from the sun during the heat of the day, and open glades for recreation in the morn ings and evenings. Magnificent laurels, cypresses, yuceas, \&e., form the ehief natural ornaments of these beautiful gardens; the artificial consist of terraces, statues, and vases, including four unfinished figures by Michael Angelo, said to have been intended for the tomb of Pope Julius II. The

Vol. I.
[good men] di San Martino, consists of a society of 20 gen tlemen, who collect and distribute alms among the poor who are ashamed to beg, unfortunate persons starving under a genteel appearance. This benevolent society has been in existence for 400 years. Another, called the Misericordia, is diffused over Tuscany. At Florence it consists of 400 persons chosen promiscuously from every rank, who volunteer their services to the sick, the hurt, and the dead. It includes many noblemen, who may be seen with aprons on, and ladles in their hands, dealing out soup to the siek in the hospital. It has existed for 500 years. Amongst those of recent creation is the Societá di San Giovan Batista, chiefly for the purpose of endowing poor maidens; amongst whom between $£ 3000$ and $£ 4000$ are distributed annually in Florence alone. Schools, and other literary and educational establishments, are also numerous. The most eminent of these is the Accademia Della Crusea, elsewhere aliuded to in this article; a society of Italian philologists, who compiled the great dictionary of the Italian language, and which continues, under another name, to diseuss and decide upon questions concerning that language, its grammatical rules, and the choice, application, and etymology of its words, on all of which subjects it is con sidered by the Italians as the highest existing authority. It has also published very correct editions of several Italian classies. The society took its name, Crusea, which means 'bran,' with a mill for its device, to intimate that its purpose was to sift the good from the bad, the chaff from the corn. The manufactures of Florence have greatly fallen off, but still silk worms are reared to a considerable extent; and woollens, silk, straw-hats, porcelain, mosaies, and pietra dura, are manufactured, and likewise numerous objects in the fine arts; but the ehief dependence of the city is on the visits and temporary residence of foreigners, particularly the English. "'o half Florence,' says a correspondent of the Jistminster Review, vol. 46, p. 599, 'no English,' is equivalent to 'no bread, 'from the impeverished noble who lives on the rent paid by an English family for the best floor of his ancestral palace, down to the ragamuffin, whose aspiration is to hold a "milor's" horse, or sleos him the way to the Ufiizi.

Florence is. altogether, one of the most desirable places of residence in ltaly. The climate is, in general, fine, though somewhat foggy in autumn; provisions abundant and moderate, excellent reading-rooms, profusely supplied with foreign publications; and, besides the beauty of the city itself, a delightful vicinity, studded with villas, country houses, and gardens. Two railways enter the city, one connecting it with Prato and Pistoia; the other with Leghorn, Pisa, and Sienna.

Florence owes its origin to a colony of Roman soldiers, sent thither by Octavianus after the victory of Perugia, to whom he allotted part of the territory of the colony of Fiesole, established about 40 years before by Sylla. Little more is known of it under the empire, and hardly any remains exist of that period, except some relics of an amplitheatre, and a few inscriptions. Christianity was established here in the third century, and early in the fourth a bishop of Florence attended a council at Rome. In the beginning of the 12th century, the eity had risen into importance through the industry and enterprise of its inhabitants, who had now commercial establishments in the Levant, France, and other parts; and had become money-changers, money-lenders, jewellers, and goldsmiths. In the latter end of the 14th century, the wealthy fanily of the Albizzi became chief rulers in Florence. These again were overthrown in 1434 by Cosmo de Medici, a popular citizen and princely merchant, who assumed the first place in the state. On the fall of the republic in the 16th century, a member of a lateral branch of the Medici, the line of Cosmo having become extinct, was placed by Charles V. as Duke of Florence. The ducal dynasty of Medici continued to rule till the year 1737, when, becoming extinct, they were succeeded by Francis of Lorraine, afterwards emperor of Germany. From this period the history of Florence merges into that of Tuscany. This famous city, the cradle of the arts and literature during the revival, and for a long time their seat, is not more remarkable for anything than for the number of illustrious men it has produced. Amongst these are Dante, Petrarch, Boccaccio, Guicciardini, Lorenzo de' Medici, Galileo, Michael Angelo, Leonardo da Vinci, Benvenuto Cellini, Andrea del Sarto, Amerigo Vespucci, and several others of well known name. Pop. (1855), 115,701.

FLORENCE, numerous places, U. States, particularly a vil. Alabama, 112 m. N. by W. Tuscoloosa, r. bank, Tennessce. It is advantageously situated for trade, has a courthouse, jail, two churches, and two female academies, and in the vieinity a large cotton factory. Pop. about 2000.

FLORENCE (St.), par. Wales, Pembroke; 2470 ac. Pop. 396.

FLORENSAC, a tn. France, dep. Herault, 14 m . E.N.E. Béziers, near the Herault; in a fertile territory abounding in vineyards. It has some brandy distilleries. Pop. 3465 .

Florent (St.)-1, A vil. France, dep. Cher, on the Cher, 9 m . S.W. Bourges. Pop. 1689.-2, (or Fiorentino), A maritime vil. France, isl. Corsica, 7 m . W. Bastia, beautifully situate on a hill slope overlooking a gulf of same name, and at the entrance of a rich valley. It is, however, a miserable and unhealthy place; the inhabitants being annually decimated by the mephitic vapours exhaled from the neighbouring marshes. Pop. 475.

FlORENTIN (St.), a tn. France, dep. Yonne, 16 m . N.E. Auxerre, agreeably situate on the Burgundy Canal, at the confluence of the Armance and Armançon. It is neatly and regularly built, with four principal gates, each leading, by a straight street, to the central place, where is the great public fountain, to which water is brought for the supply of the town by a fine aqueduct. It has some trade in corn, hemp, charcoal, firewood, and leather. Pop. 2205.

FLORES, or Floris.-1, [Latin, Forum-insula], An isl. N. Atlantic Ocean, the most W. of the Azores ; lat. (N. extremity) $39^{\circ} 31^{\prime} 30^{\prime \prime} \mathrm{N}$. ; lon. $31^{\circ} 13^{\prime} \mathrm{W}$. (r.) It is about 30 m . long, and 9 m . broad; its produce consists chiefly of wheat, pulse, and poultry, the last of which are highly esteemed. Cattle numerous, but small. Principal townsSanta Cruz and Lagena, on the E. coast. It obtained its name from the Portuguese, from the multitude of flowers with which it appeared to be adorned. It is hilly, and contains an ancient crater filled with water, of which a view is given in the article Azores, p. 283.-2, An isl., S. America, entrance of the Rio de la Plata, off the coast Urugnay; lat. $34^{\circ} 56^{\prime} \mathrm{S}$. ; lon. $55^{\circ} 55^{\prime}$ W. (r.) It extends nearly N.E. and S.W., having
a small hummock in the middle, and one at each end, that to the S.W. 39. ft. high. Between these the land is low and marshy, and overflowed sometimes between the central and N.E. hummock. Seals, and sea-lions, also various aquatic birds, resort to this small island, and in the months of August and September great quantities of excellent eggs may be procured. There is good anchorage all round the island, which may be seen in clear weather from a distance of 15 or $18 \mathrm{~m} .-3$, (Endé, or, Mándfirei), A large isl. Indian Archipelago, one of the chain of islands extending E. from Java, lat. (S.W. extremity) $8^{\circ} 48^{\prime}$ S.; lon. $119^{\circ} 54^{\prime}$ E. (r.) It is upwards of 200 m . long, and between 40 and 50 m . broad. It is mountainous, and has several volcanic peaks, of which Lobetobie, near its E. end, is 7200 ft . high. Little more is known of the interior than that it is monntainous and woody, but more open towards the coast. Sandal wood was formerly obtained here in great abundance, but it is now scarce. Ende, situated near the middle of the S. coast, although little known, is said to be the principal port of the island, capable of holding any number of ships in safety.-4, (Flores Head, or Iron Cape), The most N.E. point of above 1sl.; lat. $8^{\circ} 1^{\prime} \mathrm{S} . ;$ lon. $122^{\circ} 50^{\prime}$ E. (в.) -5 , (Flores Strait), the passage between the E. end of above isl. and the islands of Solor and Adenara. It is about 3 m . broad at its narrowest part, between Flores and Adenara.-6, (Flores Sea), That part of the S. Pacific Ocean lying N . of the islands of Flores, and S. of the island of Celebes, extending N. to S. upwards of $3^{\circ}$ of latitude. It is interspersed with numerous islets and coral reefs.-7, An isl. N. Pacific Ocean, W. coast, British N. America, on the coast, and near the centre of Vancouver's Island; lat. $49^{\circ} 20^{\prime} \mathrm{N}$. ; lon. $125^{\circ} 45^{\prime} \mathrm{W}$. It is 15 m . long, from N.W. to S.E.; and from 2 m . to 6 m broad.

FLORES, a tn. Brazil, prov. of, and 280 m . N.E. Goyaz, near r. bank, Paranan. It is the seat of an electoral college, and contains two churches, and a primary school. The district is generally fertile, but in some parts subject to intermittent fevers. Pop. 2400.

FLORIAN (St.), a market tn. Upper Austria, on a hill, 11 m. N. by W. Steyer, near I. bank, Enns. It contains an old Benedictine monastcry, a magnificent structure, with a fine library, museum, and picture gallery, and a church which possesses one of the finest organs in Germany. Pop. 900.

FLORIDA, a peninsula, and state, N. America, U. States, extending from lat. $24^{\circ} 30^{\prime}$ to $31^{\circ} \mathrm{N}$; and from lon. $80^{\circ}$ to $87^{\circ} 30^{\prime}$ W., having the States of Georgia and Alabama, N.; the Gulf of Mexico, W.; the Atlantic, E.; and the Gulf of Florida, S.; length, N.W. to S.E. about 720 m. ; average breadth, about 80 m .; area, $57,000 \mathrm{sq} . \mathrm{m}$. The surface is in general level, rising little above the sca, especially in the $\mathbf{S}$. parts, where it is almost one continued swamp or marsh. The N. portion is more broken and elevated, but the whole coast is flat, and skirted by low, narrow islands of sand, which lie parallel to the mainland, and are separated from it by shallow unnavigable lagoons. The principal river is the Appalachi cola; the next in importance are the Suwanee, St. John's, Ocklockonne, \&c., the first two affluents of the Gulf of Mexico; the last two flowing to the Atlantic. The entrance to most of the rivers in this state has a bar that unfits them for the navigation of vessels drawing much water, but they are all navigable to a considerable extent by steamers, and other vessels of light draught. There are a great many lakes throughout the peninsula, some of which are of extraordinary depth. The largest vary from 8 to 15 m . in length. Numerous islands are scattered along the whole coast, the most remarkable of which is a group called the Florida Keys or Cays, stretching out for more than 100 m . S. and W. of Cape Florida, and much dreaded by mariners. There are also several spacious bays, and many good harbours, the former from 12 to 40 m . long, and from 4 to 7 m . in breadth they are mostly on the E. coast, and include Chatham Bay, Charlotte Harbour, Killsbro' or Espiritu Santo or Tampa Bay, and Vascasana Bay on the peninsula, with the Bays of Appalachie, St. Joseph, St. Andrew, Chactawhatcliee or St. Rosa, Pensacola, \&e., on the mainland. Although there is comparatively little cultivable soil in this country, what there is, especially that on the banks of the rivers, is of remarkable fertility, and, aided by a favourable climate, produces tropical plants and fruits in great perfection, especially oranges, which are not excelled by those of any other country ;
cotton, olives, pumpkins, and melons, also succeed well. In 1847, the erop of the principal articles was as follows :-cotton, $15,000,000 \mathrm{lbs}$; tobacco, $300,000 \mathrm{lbs} . ;$ sugar, $300,000 \mathrm{lbs} . ;$ maize, $1,000,000$ bushels; potatoes, 350,000 bushels; oats, 10,000 bushels. The pine barrens produce grass, on which immense numbers of cattle are reared. On the river courses, and richer swamps, the trees and shrubs grow luxuriantly. The pine forests are of great extent, and the trees of extraordinary height and beauty. White cedar, cypress, and liveoak abound, the latter attaining great perfection. The cabbage palm is also common. The climate from October to June is generally salubrions; but the months of July, August, and September are extremely hot, and during this season fevers are prevalent. The only minerals yet found are coal and iron, although it is said that amethysts, turquoises, lapis lazuli, and other precious stones, have been met with. The wild animals consist of wolves, wild cats, panthers, raccoons, opossums, and the common brown bear, which is sometimes seen in the swamps. Rabbits and squirrels also abound. Birds are extremely numerous and various, ineluding vultures, hawks, turkeys, herons, cranes, cormorants, pelicans, \&c. The coasts, rivers, and lakes swarm with tish, and in the latter two, tortoises also abound. The swamps, and other inland waters, are infested with alligators, and inhabited by multitudes of frogs. Snakes are numerous, but most of them are harmless. 'The native Indians of Florida are active and athletie, expert hunters, fond of war, and of gay and joyous dispositions. Most of them subsist by rearing cattle. Neither the trade nor manufaetures of the country are important, the latter consisting chiefly of hats, caps, leather, brieks, earriages, and waggons. There are also several tanneries, a very little shipbuilding, and a number of grist and saw mills. The principal exports are cotton, sugar, oranges, and timber, chiefly live-oak, to the Government navy-yards. The following table exhibits the state of its foreign trade from 1844-1847:-

|  | Vescels Eintered | Tons. | Vessels tleared | Tons. | Value of Imports | Value of Fxports. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 184. | 151 | 18,017 | 136 | 16,346 | £56,497 | L 561,893 |
| 1815. | 223 | 32,555 | 180 | 26,607 | 59,926 | 841,525 |
| 1846. | 131 | 9,149 | 113 | 9,572 | 78,102 | 95,026 |
| 1847. | 157 | 21,160 | 149 | 20,545 | 79,610 | 1,005,854 |

The chief towns and scaports are Tallahassec, the capital, and seat of Government; St. Angustine, and Pensacola, a naval station of the U. States. Florida is divided into 20 counties. The governor is elected by the people for four years, and is inelegible for re-election until four years out of office; the senate is elected for two years, and the representatives annually. The General Assembly meets every two years.

Florida was discovered in 1497, by Sebastian Cabot, sailing under the English flag; explored in 1512 and 1516 by Ponce de Leon, a Spanish adventurer; and, in 1539 , overrun with an armed force by Hernando de Soto, governor of Caba. In 1553, the French attempted to establish a colony, which occasioned contests between them and the Spaniards, in which, after alternate successes, the latter were victorions. Florida was ceded to Great Britain, by Spain, in 1763 , in exchange for Havanah; reconquered by the Spaniards in 1781 ; and confirmed to them at the peace of 1783 . It was ceded to the U. States in 1819 , and in 1845 was adnitted into the Union. Pop. (1840), 54,477; (1850), 89,450, of whom 40,385 are slaves.

FLORIDA (Cape), the most E. point of E. Florida, towards the extremity of the peninsula, in the Gulf of the same name; lat. $25^{\circ} 41^{\prime} \mathrm{N}$. ; lon. $80^{\circ} 3^{\prime} \mathrm{W}$. (r.)

FLORIDA (GULF of), a channel between the peninsula of Florida and the Bahaina islands, through which the Gulf stream, originating in the Gulf of Mexico, finds a passage N. At the N. end of this gulf, in the parallel of Cape Cannaveral, the stream attains a velocity of 5 m . an hour. On issuing from the strait or gulf the water is of a dark indigo blue colour, and the line of separation between it and the green waters of the Atlantie is plainly visible for hundreds of miles.

FLORIDA KEYS. See Florida (State).
FloRIDA (Rio), a vil. Mexico, State of, and 180 m . N. by W. Durango. Pop. about 2000.

FLORIDIA, a vil. and com. Sicily, prov. and 7 m . N.N.W. Syracuse ; pleasantly situated on a hill surrounded by orchards, and between two arms of the Anapo. It is tolerably well built. Pop. 4130.

FLORISDORF-Am-spitz, a vil. Lower Austria, on the Danube, about 4 m . from Vienna. It is well built, and contains a parish chureh, but suffers much from overflowings of the river. Pop. 1060.

FLÖRSIIEIM (Ober), a tn. Hesse Darinstadt, prov. Rhein Hessen, $24 \mathrm{~m} \mathrm{S.W}$. . Darmstadt. It is an ancient commandery of the Teutonic order. Pop. 1061.

FLORSIIEIM, a vil. Nassau, r. bank, Main, E. Mainz. It contains a parish chureh; and has manufactures of linen, delftware, and porcelain. The vine is extensively cultivated in the vicinity. Pop. 2215.

FLOTAY, an isl. Scotland, Orkneys, between isls. Faray and S . Ronaldshay. It is about 3 m . long by 2 m . broad. Pop., with some adjacent islets, 405.

FLOT'IE (La), a maritime tn. France, dep. CharenteInférieure, 9 m . W.N.W. La Roehelle, N. side of isle Ré, Bay of Biscay. Its harbour can receive vessels of 200 to 300 tons. Its exports are chiefly salt, wine, and vinegar. P. 2227.

FLOUR (Sr.), [Latin, Indiciacum], a tn. France, dep. Cantal, eap. arrond. of same name, 34 m. E. by N. Aurillae, on a steep basaltic plateau, of the igneous formation of Auvergne. It is the seat of a sub-prefeet, and of a bishopsuffragan of Bourges, and has a tribunal of commerce, and a communal college. The houses have a straitened site, and the streets are narrow; but there are a few remarkable edifiees, including the cathedral, an ancient pile; the Jacobite convent, founded in 1353 ; the Jesuits' college, founded 1590 ; the convent of the Visitation, foumted 1625 , now an edacational cstablishment ; the priests' seminary, with a fine garden; episcopal palace, public hospital, \&c. The town promenade is a large area, with a terrace, whence there is a fine view. The suburb, nearly 100 feet below the town, with which it eommunicates by a winding way cut in the rock, is a seat of busy industry, having mamfactures of leather, pottery, metal, glue, cudbear, lace, copper wares, \&c. Trade in grain and mules. Pop. 4818.

FLOW'TON, par. Eng. Suffolk; 800 ac. Pop. 179.
FLUELEN, a vil. and par. Switzerland, can. Uri, in a marshy and nuhealthy situation, on the S.E. shore of the Lake of Luzern, near the influx of the Reuss. It contains a parish church and a sinall castle, and being the port of Uri has a considerable trade. A steam-boat from Luzern touches daily. The most of the inhabitants are boatmen and fishermen. Goitre and cretinisin are very prevalent. Pop. 599.

FLUMENDOSA [anc. Soeprus], a river, isl. Sardinia, which rises near the town of Orgosolo, on the E. slope of Mount Ginargento, flows S., through the valley formed by that range on the E., and that of Oghastre on the W., and then, turning gradually round, flows circuitonsly S.S.E. to the S.E. coast, where it falls into the sea by three mouths; whole course about 48 m .

FLUMINI-majorı, a vil. isl. Sardinia. div. Cagliari, prov. of, and $10 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Iglesias. It stands in a mountainous district, on a slope, above a river of same name, and contains a parish church, chapel, and elementary school. The males are mostly employed in agriculture or feeding cattle; the females usually spin and weave wool and flax, and not only supply their domestic wants, but leave a surplus for sale. Pop. 1760.

FLUMS, a vil. and par. Switzerland, can. of, and 23 m . S. St. Gall, near r. bank, Seez. It is a very ancient place, contains a parish church, and a townhouse remarkable for the peculiarity of its structure; and has a consillerable trade in horses, cattle, and wood. It has often suffered severely by inundation. Pop. 2634.

FLUSHING [Latin, Flesinga; Duteh, Vlissingen; French, Flessingue], a fortified seaport tn. Holland, prov. Zeeland, isl. Waleheren, at the mouth of the Hond, or W. schelde, here between 2 and 3 m . broad, $50 \mathrm{~m} . S . W$. Rotterdam, 38 m . W.N.W. Antwerp; lat. $51^{\circ} 24^{\prime} 24^{\prime \prime}$ N.; lon. $3^{\circ} 34^{\prime} 45^{\prime \prime} \mathrm{E}$. (R.) It is strongly fortified, and in commection with its outwork at Breksen, on the opposite side of the Sehelde, completely commands the river, with whieh it communieates by two large, deep canals, by which the largest merehantmen enter the town, and unload at quays elose to the warehouses. It has a Calvinist, an evangelical Lutheran, an English, a

Baptist, and a R. Catholic church, several benevolent and charitable institutions, a commercial, and several common schools, and five market places. The townhouse is a roomy, suitable edifice; the exchange is a simple bnilding; and ncar it is a statue, erected in 1841, of Admiral de Ruyter, born in Flushing in 1607. The inhabitants are chiefly engaged in commerce, and in the branches of industry incident to a seaport town. The manufactures, comprehending brewing, soap-making, and fulling and oil mills, are unimportant. Flushing has suffered several times from fire, water, and war, and in 1809 was bombarded by a British fleet, under Lord Chatham, composing the unfortunate Walcheren expedition; when the beautiful townhouse, built in 1594, several churches, and other important buildings, and 300 inhabitants, were destroyed. Pop. 7871.

FLUSIIING, a small seaport, England, co. Cornwall, $\frac{1}{4} \mathrm{~m}$. N. Falmouth. It contains a district church, places of worship for Baptists, Wesleyans, Unitarians, and Bryanites; and a national school, supported by subscription. Here are docks for slipbuilding, and a dry dock, 190 ft . long, with corresponding breadth and depth. On account of the mildness of its climate, the place is much resorted to by invalids.

FLYFORD, two pars. England, Worcester :-1, (Flavel), 730 ac. Pop. $156 .-2$, (Grafton), 1640 ac. Pop. 229.

FOATY, or Fota, a small isl. Ireland, co. Cork, in Cork harbour, 6 m . N. Queenstown, connected with the mainland and with Great Island by two handsome bridges.

FOBBING, par. Eng. Essex ; 1830 ac. Pop. 428.
FOCA, a small isl., W. coast, Africa, at the mouth of the Calabar river. It contains a town of the same name, and furnishes snpplies of wood, water, and provisions.

FOCHABERS, a vil. Scotland, co. Moray, on an eminence, r. bank, Spey, 8 m . S.E. Elgin. The town consists of two principal streets that cross each other at right angles, with a square in the centre, and contains altogether 260 houses, of which nearly three-fourths are thatched, the others are slated. On one side of the square is the established church, with a portico and neat spire. The town contains, besides, a handsome R. Catholic and an Episcopal chapel ; and has several schools, and an educational fund of 100,000 dollars, bequeathed to the town by Alexander Mylne, merchant, New Orleans, a native of the place. In the immediate vicinity of the town is Gordon Castle, a superb mansion, formerly the residence of the noble family of Gordon, but now the property of the Duke of Richmond. Pop. (1841), 1135.

FODDERTY, par. Scot. Ross; 9 m . by 11 m.. Pop. 2437.

FÖDEMES (Nagx), a vil. Hungary, Hither Danube, co. Honth, about 8 m . from Ipoly-Sagh. It contains a R. Catholic church. Excellent melons are raised in the vicinity. Pop. 1600.

FOGARAS, or Fragetschmarkt [Jatin, Lignopolis], a market tn. Austria, Transylvania, cap. dist. of same name, on the Alt or Aluta, here crossed by a handsome bridge, 32 m . W.N.W. Kronstadt. It is well built, contains an old castle, which figures in the early wars of Hungary; a very handsome Protestant, a R. Catholic, and a Greek non-united church; a gymnasium, and courthouse; and has manufactures of morocco leather. Pop. 5100. The District, area, 500 m ., is very mountainous, particularly in the S., where it is covered by a lofty mountain-chain; is well wooded, abounds with game and fish, and has extensive pastures, on which great numbers of cattle are reared. Where the land is arable, it is of considerable fertility, and yields good crops of rye, barley, oats, flax, and hemp. The minerals include gold, silver, lead, and salt. Pop. 24,040.

FOGGIA, a city, Naples, cap. prov. Capitanata, 76 m . N.E. the city of Naples, in the midst of the Apulian plain, and considered, for wealth and importance, the second town in the kingdom. It is regularly built, with wide streets, and has many handsome houses. The principal public buildings are, the residence of the governor, a gothic cathedral, a number of other churches, a custom-house, and theatre. It has a grammar-school, several elementary schools, a school of agriculture and rural economy, and a tribunal of commerce for the provinces of Apulia, established in 1818. It carries on
an extensive trade in corn, wool, and cattle, cheese, wine, oil and capers; and has immense granaries under the streets and squares for storing corn. It is the chief inland market for the agricultural produce of Apulia, and is also the residence of the provincial nobility and landholders. A great fair is held in the month of May. The climate is unwholesome in the summer months. Pop. 20,687.

FOGLIA, a river, Italy, which rises in the E. slope of the Apennines, in Tuscany, about 3 m . W. Sestino, shortly after enters the Papal States, and flowing E.N.E., through the delegation of Urbino-e-Pesaro, falls into the Adriatic at the latter town, after a course of about 38 m .

FOGLIZZO [Latin, Foicium], a vil. and com. Sardinian States, Piedmont, prov. of, and 16 m . N.N.E. Turin, l. bank, Orco. It contains a handsome parish church, castle, and communal school; and has some trade in hemp, of excellent quality, grown in the district. Pop. 2917.

FÖGLÖ, a small isl. Russia, Aland group, at the entrance of the Gulf of Bothnia; lat. $60^{\circ} \mathrm{N}$.; lon. $20^{\circ} 30^{\prime} \mathrm{E}$. It contains a parish church, and makes the best $\AA$ land cheese.

FOGO, par. Scot. Berwick ; 4800 ac. Pop. 455.
FOGO, one of the Cape Verd islands. See Fuego.
FOHANAGH, par. Irel. Galway; 8686 ac. Pop. 2004.
FOHR, or Fora, an isl. Denmark, North Sea, the E. portion belonging to Schleswig, and the W. to N. Jutland; lat. (S.E. point) $54^{\circ} 42^{\prime}$ N. ; lon. $8^{\circ} 34^{\prime}$ E. It is about 8 m . long, by 5 m . broad, and about 5 m . from the coast of Schleswig. It is generally flat, marshy, and barren, though containing some little arable land; the tilling of which, rearing a few cattle, along with fishing, sea-faring, and the catching of wild fowl, especially ducks, employ the inhabitants, who are all Frisians. There are several small villages in the island, of which the chief is Vick or Wyck. Pop. 4750.

FOIX [Latin, Fuxium], a tn. France, cap. dep. Ariège, picturesquely situated across the mouth of a valley, hemmed in hy lofty precipices, at the junction of the Arget with the Ariege, here crossed by a bridge of two arches. It is partly surrounded by ancient ramparts, and is very irregularly built, having narrow, ill-formed streets, and old, ill-built houses, of which only a few are interesting from their antiquity. It

THE TOWN AND CASTLE OF FOIX.-From Oliver's Sketcher in the Pyrenees.
contains an old castle, crowning an isolated rock on the W. side of the town, and of considerable historical celebrity, though now only used as a jail; a handsome parish church, with a semicircular choir, and several fine chapels; a pre fecture, originally part of the abbey of St. Volusien; a court house, an clegant building of the 15 th century; a public library of 8000 volumes, and barracks; and has manufactures of serge, cottons, candles, and especially of articles in iron and steel; a trade in these articles, and in coarse woollens, leather, cattle, pitch, turpentine, \&c., and seven annual fairs. Foix is the seat of a court of first resort, and possesses a consulting chamber of manufactures, a communal college, and a society of agriculture and arts. Foix is a very ancient place, was long capital of a county of same name, and distinguished itself in several sieges, particularly in 1210 , when it maintained the cause of the Albigenses, and gallantly repulsed their infamous persecutor, Simon de Montfort. Pop. 3414.

FOJANO, a tn. and com. Tuscany, occupying one of the highest points near the centre of Val di Chiana, between the canal and river of that name, 43 m . S.S.E. Florence. It is an ancient, but well-built, handsome town, surrounded by modern walls, and also containing the remains of a double wall and chain of towers, which made it in early times a place of great strength. It is divided into thrce districts or terzieri, each forming a parish; and adorned with a handsome parish chureh; contains also a Benedictine convent, with an educational establishment, and a large hospital ; is the seat of a court of justice, and several public offices, and has a trade in corn and cattle, and an important weekly market. Pop. 7039.

FOKIEN, a maritime prov. China, between lat. $23^{\circ} 35^{\prime}$ and $28^{\circ} 22^{\prime} \mathrm{N}$.; lon. $115^{\circ} 55^{\prime}$ and $120^{\circ} 40^{\circ} \mathrm{E}$. ; bounded, N. by Che kiang, N. W. and W. by Kiang-see, S. by Quangtong, and S.E. by the China Sea; area, $53,480 \mathrm{sq} . \mathrm{m}$. The coast is deeply indented with bays, and stndded with numerous islands, including Amoy, Quemoy, and Hai-tan, which, with the large island of Formosa, are comprised in the province. The country is generally mountainous, and is drained by several rivers, of which the Min and its tributaries are the most important. The soil is turned to good account, the higher mountains being covered with trees; and the hills, eut in terraces, rising above each other sometimes to the number of 30 or 40 , and cultivated from the base to the summit. The agricultural products include rice, wheat, barley, and sweet potatocs. Black tea, of superior quality, is grown, and the orange, lemon, and mulberry are abundant. Camphor, sugar, iron, indigo, tobaeco, and alum are also produced, and, along with porcelain and cloths of various kinds, form the chief articles of export. Grain, drugs, fruits, and salted meats form the ehief imperts. Besides Foo-choo-foo, the capital, the province contains Amoy and other important commercial towns, with numerous villages. Pop. 14,777,410. See Foo-cnoofoo, Aboy, and Formosa.

FOKSCHANI, a tn . Wallachia, on the frontiers of Moldavia, r. bank, Miklov, 92 m . N.E. Bueharest, with an upper district school. In 1789, it was devastated by the Russians, and, after being rebuilt, it was, in 1822 , burnt by the Turks, since which time it has been again partially restored. Pop. 1000. On the l. bank of the Miklov, in Moldavia, is a suburb of Fokschani. Pop. 2000.

FOLDEAK, a vil. Hungary, Thither Theiss, co. Csanad, about 12 m . from Tot Komlos. It contains a R. Catholic parish ehurch, and has a trade in horses and cattle. Good wine and tobaceo are grown in the vicinity. Pop. 1649.

FOLDVAR, a market tn. Austria, Transylvania, on a hill, washed by the IIomorod, about 12 m . from Kronstadt. It contains a castle, a Protestant and a Greck nonunited parish church. Pop. 2100.

FOLDVAR (Dexa), a market town IIungary, Thither Danube, co. Tolna, cap. dist. of same name, r. bank Dantibe, 17 m . E.N.E. Simontornya. It is pleasantly situated, partly on the erest, and partly on the side of a hill; had once strong fortifications, of which some remains still exist; contains a R. Catholic and a Greek nonmuited church, a high school, barracks, and Franciscan monastery, and has an important sturgeon fishery. The district is fruitful both in eorn and wine. Foldvaris a steamboat station. Pop. 10,400.

FOLDVAR, or Marienburg, a vil. Austria, Transyl-vania, stuhl of Mermannstadt, r. bank Alt, about 12 m . from Porumbuk. It consists chiefly of a spacious main street, and contains a united and a nonunited parish church, and the pictur esque ruins of an old castle. The iuhabit ants are Wallachians. They suffer much from a deficiency of good water. lop. 1100.

FOLDVAR TISZA, a vil. Hungary, Hither Danube, co. Heves, on the Theiss, 8 m . from Szolnok. It contains a Protestant parish church, and has a trade in eattle. Much wine is produced in the vicinity. Pop. 3349.

FOLEMBAY, a vil. and com. France, dep. Aisne, 15 m . W. Jaon. Here are the royal glass works of Vivier, employ-
ing 900 workmen, and producing ammally $8,000,000$ bettles and 100,000 bell-jars. Pop. 1057.

FOLESHILL, par. Eng. Warwiek; 2810 nc. P. 7063.
FOLGARIA, or Füllgreit, a vil. and par. Austria. Tyrol, circle of, and not far from Roveredo. It contains a parish church. The inhabitants speak Italian, but are of German origin. Pop. vil. 1430 ; par. 4597.

FOLGEFONDEN-Field, an elevated plateau and mountain range, Norway, on the S . of prov. Bergenhuus, stretching N. to S., at no great distance from the W. coast. Its culminating point is 5790 ft ., but its most remarkable feature is its glacier, which is about 5000 ft . above the level of the sea, and 40 m . long by 20 m . broad. Its depth has been estimated at 600 ft . A stream, issuing from its base, forms a magnificent waterfall.

FOLIA, a vil. Hungary, co. Temes, on the Oburda, 4 m . from Zebely. It contains a Greek nonunited and a R. Catholic ehureh; and has a brewery. The district is only moderately fertile. Pop. 1609.

FOLIGNO [anc. Fulginium], a tn. Papal States, deleg. of, and 20 m . S.E. Perugia, in a beantiful vale winding among the Apennines, 40 m . in length, by about 10 in width, watered by the Clitumnus. The town is large, but indifferently built, the inhabitants active and industrious. The only public buildings worthy of notice are, the Cathedral, and the Palazzo Communale. The former, dedicated to St. Felician, is unfinished without, but neat within; the latter is a handsome building, recently erected, in the Ionic style. There are several other churches, some of which contain good pictures. Foligno has a high reputation throughout the Papal States for its manufactures of woollens, parchment, and wax candles. Soap and playing cards are also made; there are silk-mills and tanneries, and it has some trade in cattle. The town was nearly destroyed by the earthquakes of 1831 and 1832 . It was anciently a place of some importance, being at the head of a confederaey of Umbrian cities. In 1439 it was incorporated with the States of the Church, by Cardinal Vitellesehi, on the extinction of the Friaci family. Pop. (1832), 15,400.

FOLKE, par. Eng. Dorset; 1260 ac. Pop. 318.
FOLKESTONE [Latin, Lapis populi], a bor. seaport tn., and par. England, co. Kent, 7 m . W. by S. Dover, 64 m . S.E. by E. London; lat. $51^{\circ} 4^{\prime} 48^{\prime \prime}$ N.; lon. $1^{\circ} 11^{\prime}$ E. (r.) ; a station on the S.E. railway. It is built, partly on the level shore, and partly on the summit of a stcep eminence, immediately behind, topped by the church of St. Mary and St. Eans with, a venerable pile of cruciform structure, with a tower in the centre. It consists chiefly of three 'rough rugged streets, that run crookedly up a sharp hill, dirty, narrow, and awk

FOLKESTONE, from the South Cliff, looking towards the Ilarbour.
ward ; while, on either side of them, you see ever and anon a steep and lofty flight of steps, running up or down, into another street or passage.'-(The Land we Live in.) It is said that the town could boast, formerly, of five churches; but that all of them, excepting that which now erowns the hill, have been swept away by the sea. There are here two Method.
ist chapels, a Fricnds' meeting-house, and several schools and small charities. Amongst the schools is one built and partly endowed by Sir Elias Harvey, nephew of the celebrated William Harvey, the discoverer of the circulation of the blood, who was born here, April 1, 1578, and after whom a literary institution, lately founded, has been named. The harbour was formed at an expense of $£ 50,000$, and has 12 ft . depth at high water. In the last century, a large fishing, and still larger smuggling trade, was carried on here. On the suppression of the latter, the town fell into decay, and its fishing also declined. The prosperity of the place, however, has been restored, by its having been converted, by the S.E. Railway Company, into a leading station for the steamers to Boulogne; since which, a custom-house has been established, warehouses erected, a handsome hotel opened, and new streets laid down. Folkestone is a member of the cinque port of Dover. It unites with Hythe in returning a member to the House of Commons. Considerable numbers of sea bathers frequent the town in the summer season. Folkestone was a Roman station, and the Saxons had a monastery and castle there. It was frequently ravaged by the Danes, and, in more recent times, visited by the French. There is now a strong battery on the heights, and the coast is further defended by three martello towers. It gives the title of Viscount to the earls of Radnor. Area of par. 4360 ac . Pop. (1841), 4413.

FOLKINGTON, par. Eng. Sussex ; 2110 ac. Pop. 198.
FOLKSWOR'TH, par. Eng. Huntingdon; 770 ac. P. 186.
FOLKTON, par. Eng. York (E. Riding); 5040 ac. P. 580.
FOLLISTOWN, par. Irel. Meath; 653 ac. Pop. 138.
FOLLO [Latin, Follum], a vil. and com., Sardinian States, div. Genoa, prov. of, and 7 m . from Levanto, on the Vora. It contains a parish and several auxiliary churches. Inhabitants mostly engaged in agriculture. Pop. 2276.

FOMBIO, a vil. and com., Austrian Italy, prov. Lodi, dist. of, and $2 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Codogno. It stands in a rich corn and grazing district ; contains a parish church ; and has a ricemill. In 1796, the French here defeated the Austrians. Pop. 1485.

FONDETTES, a vil. and com. France, dep. Indre-etLoire, 4 m . N.N.W. Tours. It has manufactures of pavingtiles and vermicelli; and in the vicinity good red wine is produced. Pop. 2471.

FONDI [anc. Fundi], a tri. Naples, prov. Terra di Lavoro, on the confines of the Papal States, 50 m . N.W. Naples, in a plain sheltered by hills, on the Via Appia, which here retains its ancient form. It consists of one principal strect, and a few subordinate ones, all narrow and dirty, houses mean, and most of them unglazed, the whole presenting an extremely miserable and repulsive appearance. It contains a cathedral, a college, and two houses of charity. Close by, is the ancient Lacus Fundanus, or Amyelanus, a stagnant water, from which, and from the marshes it occasions, the most noxious exhalations arise. The dilapidated walls, by which the town is still partly surrounded, are of Cyclopean structure. The vale on which Fondi is situated is as remarkable for its fertility as the latter is for its poverty. Tho wines produced in the vicinity were anciently in high repute, and are still in some request. Pop. 5000.

FONDO, a market tn. Austria,'Tyrol, at the confluence of the Wildbach and Rovella, 25 m . N. Trent. Its streets are irregular, but its houses well built. It contains a parish church, with a handsome portal, and a tower, covered with tin; and has a trade in corn, cattle, wood, and wine. Many of the inhabitants of the lower valley of the Adige make this their summer residence. Pop. 1426.

FONDON, a vil. Spain, Andalusia, prov of, and 28 m. N.W. Almeria, in a valley between the sierras Nevada and
antimony, and gypsum, wrought in the neighbouring mountains. Pop. 1951.

FONG, or Fung-Yang, a tn. China, prov. Nganhoci, on a mountain, near the r. bank of the Hoait-ho, 495 m . S. by E. Peking. It is the birthplace of the founder of the Ming dynasty.

FONNI, a vil. isl. Sardinia, prov. of, and 13 m. S. Nuoro. It stands on the S. slope of Montespada. The strects are irregular, narrow, and dirty ; and most of the houses are very indifferent. It contains an ancient parish and four minor churches, a Franciscan convent, and an elementary school; and has manufactures of linen and woollen cloth; a trade in cheese; and an annual fair, which lasts five days, and is the best frequented in the island. Pop. 3150.

FONSECA (Gulf of). See Conchagua.
FONSI, the loftiest mountain in the empire of Japan, commonly called by the Japanese Fousi-yama. It is situated in lat. $35^{\circ} 15^{\prime} \mathrm{N}$. ; lon. $138^{\circ} 35^{\prime} \mathrm{E}$. ; in the prov. of Sourouga, isl. Niphon. Its heiglit, according to Siebold, is $12,440 \mathrm{ft}$.; it stands in an isolated position, in the centre of a boundless landscape of uncommon beanty. It is an ancient volcano, formerly the most active in all Japan, but a century and a half have now elapsed since the last eruption, and its crater is now filled with water. It is regarded with a superstitious reverence; and in the month of August, Buddhist devotees make pilgrimages to its summits, to offer prayers to the idols which have been placed in the ravines of the rock by their ancestors. According to Japanese historians, this mountain emerged from the bosom of the earth in the year 285 в.c., and a corresponding depression of the ground produced, in a single night, the great lake Mitsou, or as Siebold names it, Biwako. In 799 occurred an eruption which lasted 34 days, and covered the whole base of the mountain with ashes. Others followed in 800,863 , and 864 , preceded by earthquakes; but the most violent one took place in 864 , when for 30 m . round the country was devastated. The last eruption occurred at the close of the year 1707. This mountain has been described as covered by perpetual snow; but there is reason to bclieve the snow disappears for a month or two in the course of the year.

FONTAINE-l'Eveque, a tn. Belgium, prov. Hainaut, 6 m . W. Charleroi, on the Bablone, a tributary of the Sambre. It is a very ancient place, and has some remains of old defences; and a church. The inhabitants are chiefly nailers; but there are also some breweries, distilleries, tanneries, oil and flour mills, and in the vicinity are limestone quarries. Pop. 3100.

FON'ГAINEBLEAU [Latin, Fons Bleaudi], a tn. France, dep. Seine-et-Marne, cap. arrond., and in the midst of the forest of same naine, about 2 m . from l. bank, Scine, and 37 m. S.S.E. Paris. It is well built, partly of stone, and partly of brick, with spacious and regular streets; is the scat of a

the chateau of fontainebleac.-From Anecdotes of Fontaioebleau. de Gador. .It has crooked, but wide and generally paved streets, and its principal square contains a handsome townhall, and a fine central fountain. It has a parish church, two chapels, two schools, a prison, storehouse, and cemetery. Inhabitants engaged in the mines of lead,
of sandstone, extensively used in paving the streets of Paris and the roads of the surrounding districts; and a trade in wine, truit, preserves, horses, and cattle. Pop. 7816. The castle or palace of Fontainebleau, from which the town derives its chief importance, is one of the most magnificent in France. Many of its sovereigns have made it their favourite residence, and vied with each other in lavishing upon it all the embellishments that art could furnish, withont any limitation as to expense. Henri IV. expended upon it about $£ 100,000$; Louis XiV.above $£ 200,000$; Napoleon $£ 250,000$; and Louis l'hilippe, it is said, still more than any of his predecessors. The park, laid out like a vast garden, and adorned with statues, temples, fountains, lakes, and waterfalls, corresponds to the magnificenco of the palace. The forest, which has an area of 64 geo. sq. m., abounds with all kinds of game.

FONTANA, a vil. Austrian Italy, prov. of, and $1 \mathrm{~m} . \mathrm{N}$. Milan. It is well built, and has a spacious and handsome church; an extensive bronze foundry; and a large cemetery, in which are many fine specimens of monumental statuary. Grain, wine, and fruits are raised in the vicinity. Pop. 2682.

FONTANA, a tn. Naples, prov. Terra di Lavoro, dist. of, and 9 m. S.S.W. Sora, on the eonfines of the Papal States. Pop. 2500.

FONTANALOSA, a tu. Naples, prov. Primeipato Ultra, dist. of, and 9 m . N.W. San Angelo dei Lombardi. It has two churches. Pop. 4000.

FONTANE-Mone [Latin, Fontana-Maura], a vil. and com. Sardinian States, Piedmont, prov. of, and 36 m . E.S.E. Aosta, r. bauk, Hellex or Lys. It contains a parish chureh, and four elementary schools, and has a trate in eattle, butter, and cheese, three weckly markets, and a large annual fair. 1'op. 1190.

FONTANELLA-del-piano, a vil. Austrian Italy, prov. of, and 14 m . S. by E. Bergano, near r. bank Serio. It is well built, and possesses a fine gothic church, hospital, convent, and manufactures of silk. Graia and fruits are produced in large quantities in the vicinity. Pop. 1221.

FONTANELLATO, or Fontanalata, a vil. and com. Italy, duchy, Parma, in a plain, 11 m . N.W. Parma. It is surrounded by a fosse, contains a collegiate ehureh of gothic architecture, with two good paintings, and a high altar of the finest marble, a celebrated shrine of the Virgin, said to be visited by more than 40,000 persons annually ; public schools, and a monte-de-pićté; and has a weekly market, and an annual fair, which lasts two days. Pop. vil. 580 ; com. 5314 .

FONTANETO, two places, Sardinian States:-1, (-di Nocara), $\Lambda$ vil. and com. I'iedmont, prov. of, and about 15 m . N.N.W. Novara, in a beautiful and fertile district, near the Agogna, here crossed by a stone bridge. It contains a parish chureh of modern construetion, with a façade, adorned by several statues, and an old eastle, now converted into three large and handsome residences; and has a trade in silk, corn, wine, and eattle. Pop. $2531,-2,(-d i$ Vercelli $), ~ A$ vil. and com., prov. of, and 15 m . S.W. Vercelli, near l. bank, Po. It contains a handsome parish church, with three naves, and several fiue sculptures; and has a trade in corn, rice, and fudder, and two annual fairs. Pop. 2231.

FONTARABIA, a th. Spain. See Fuentembama.
FONTCONVER'TE [Latin, Fons Opertus], a vil. and com. Sardinian States, div. Savoy, prov. Moriaua, l. bank, Arvan, here crossed by a wooden bridge, about 3 m . W.S.W. S. Giovanni di Moriana. It stands in a mountainous district, contains a parish church, and has a trade in cattle. P. 1500.

FONTE, a vil. Austrian Italy, gov. Venice, prov. of, aud 21 m. W.N.W. Treviso, near r. bank, Muson. It contains a farish ehureh and several oratories. Pop. 1630.

FONTECCHIO, $\boldsymbol{a}$ vil. Naples, prov. Abruzzo Ultra 11 , 15 m. S.E. Aquila, near l. bank, Aterno. It contaius a collegiate church, and several convents, and has manufactures of tapers, and an annual fair. Pop. 863.

FUNTENAY, several localities, France, tho chicf of which are :-1, (-le-Comte), A tn. dep. Vendée, near r. bank, Vendée, 33 m. S.E. Bourbou-V endée, cap. arrond., aud seat of a communal college. It is built on a lilly slope, and presents an imposing aspeet towards the surrounding rich country. In the centre of the older town rises the chureh of Nutre Dame, a fine pile of the purest gothie, with a spire 250 ft . high. The strects around this edifice are rather narrow and crooked, but the newer quarters are open and airy. In the publie
square is the antique fountain which gives name to the place, and hard by are the ruins of an old castle, once the citadel, which in early times was further defented by walls. Tha college is a spacious building; and there are four convents, and a handsome theatre. It has manufactures of linen and coarse cloths; some breweries and tanneries, and a local trade in timber and firewood, staves, cordage, and chareoal. It is an entrepot for the wines and produce of the south of France. Pop. 6426.-2, (-Sous-Bois), a vil., dep. Seine, 1 m . E. Vincennes, of which it is a dependency. The parish church is rather handsome, and there are several fine villas in the environs. Pop. 1696.

FONTENOY, a vil. and com. Belgium, prov. Mainant, 4 m. S.E. Tournai, remarkable for the battle fought in 1745 , between the French, commanded by Marshal Saxe, and the allied army of British, Austrians, and Duteh, commanded by the Duke of Cumberland, when the latter were defeated. Pop. 765.

FONTENOY-le-Chatead, a tn. France, dep. Vosges, 17 m . S.S.W. Epinal, on the Coney. It has manufactures of iron wares, some breweries, a cherry brandy distillery, and the remains of a strong old castle. Pop. 1372.

FON'TES', a tn. and par. Portugal, prov. Tras-os-Montes, com. and about 15 m . W. Villa Real. Pop. 1600.

FONTEVIVO, a vil. and com. Italy, duchy, Parma, in a plain 9 m . W.N.W. Parma. It is supposed to owe its name to the fine perennial springs which it possesses. It contains a beautiful parish chureh of gothic architecture, with a magniticent marble mausoleum of Ferdinand, Duke of Bourbon, who died here in 1802, and a college of Maria Louisa, the buildings of which are elegant. Pop. 2630.

FONTEVRAUL'T [Latin, Fons Ebraldi], a tn. France, dep. Maine-ct-Loire, 8 m . S.E. Samur, in a deep valley, and surrounded by a wood. It owes its origin to the abbey of same name, the finest and richest in France, and the only one of its kind in the world. The Abbey of Fontevranlt was the head of a singular order, in which the men were made subject to the women. It was founded in 1099 by Robert d'Arbrissel, a celebrated preacher in Brittany, charged by Pope Urban II. to preach in favour of the second erusade. Of five churches the abbey contained, only one and that the largest, now exists. In appearance it resembles a cathedral, but, along with all the other remaining buildings, it has been transformed into a central prison for eleven departments. At Fontevrault is to be secn the cemetery of the kings of England, counts of Anjou. Four tombs, though somewhat mutilated, still remain, those of Heury II., Richard Cœur de Lion, his son, and Eleonore of Guienne, his queen, \&e. It has some manufactures of cloth and cordage, and some calico printing. P. 1400.

FON'IH1LL, two pars. England, Wilts:-1, (Bishop's), 2040 ac Pop. 207.-2, (Gifford), 1550 ac. Pop. 416.

FONTIVEROS, a tn. Spain, Old Castile, prov. of, and 25 m. N.N.W. Avila. It stands in a plain; is regularly built; contains a public square, a parish chureh, court-house, prison, hospital, Latin and primary sehool, and has manufactures of cloth, a flour-mill, and a trade in corn and fruit. Pop. 694.

FON'MELL-Magna, par. Eng. Dorset; 2610 ac. P. 876.
FON'TSTOW N, a par. Irel. Kildare; 5279 ac. P. 1386.
FON'TVIEILLE, a tn. France, dep. Bouches-du-Rhône, arrond. of, and 5 m . N.E. Arles-sur-Rhône. Here are quarries of 'Arles building stones,' and some oil-works. Pop. 1786.

FONZ, a tn. Spain, Aragon, prov. of, and 32 m . E.S.E. Huesca, near l. bank, Cinca, on a hill slope. It is tolerably weil built, and composed of a good square, and several steep and poorly-paved streets, and has a parish chureh, several chapels, a townhouse, prison, hospital, two schools, a fountain, and extramural cemetery. Manufactures:-linen fabrics, leather and hempen shoes, soap, wine, and oil. Trade: -cattle, grain, flax, liemp, and silk. Pop. 2706.-(Madoz)

FONZASO, a vil. and par. Austrian Italy, gov. Venice, cap. dist. of same name, 22 m . W.S.W. Belluno. It is the seat of a court of law, and other publie offices, and contains a parish and two auxiliary churches. Pop. 3000.

FOO-Choo-Fou, or Foo-Choo [happy city], a eity, China, prov, and eap. Fukien, 1. bank, Min, $12 \bar{j} \mathrm{~m} . \mathrm{N} . \mathrm{E}$. Amoy; lat. $26^{\circ} 2^{\prime}$ N.; lon. $119^{\circ} 25^{\prime} \mathrm{E}$. It is one of the five ports of China which were by treaty of June 26,1843 , thrown open for the resort and residence of British merehants. The city stands in a plain surrounded by hills, forming a vast
amphitheatre, and is nearly 10 m . in circumference. The suburbs extend from the walls 3 m . to the banks of the river, and stretch along both sides of it. They are connected with each other, and a small islet in the Min, by a stone bridge 420 paces long, reposing on 40 solid stone piers on the N . side, and on nine similar ones on the S . The bridge is lined with shops. Foo-Choo-Foo is surrounded with walls 30 ft . high and 12 wide at top, and overgrown with grass. There are seven gates, overlooked by high towers; smaller guardhouses stand upon the walls at short intervals, in which a few soldiers lodge, and where two or three cannon indicate their object. Two pagodas within, and fantastic-looking watchtowers upon the walls, large, regular-built granaries, and a great number of flag staffs, in pairs, before temples and offices, contribute to relieve the otherwise dull monotony of low tiled roofs, which is still further diversified by many large trees. Several look-out houses are placed over the streets, or upon the roofs of buildings, for the accommodation of watchmen, one of which immediately attracts the attention of the visitor, from its height, and its clock-dial with Roman letters. Few vacant spaces occur within the walls of the city, which is everywhere equally well built. The streets, however, are exceedingly dirty, being full of all sorts of abominations, for which the people seem to care very little. The shops are well stored with goods, but, for the most part, of a poor quality. The streets are crowded with craftsmen and hucksters, and the shops thrown so widely open, display such a variety of articles, or expose the workmen so plainly, that the whole street seems to be rather the stalls of a market than the thoroughfare of a town. The official residences are numerous, the chief civil and military dignitaries of the province residing here. The Ching-hwang Miau is one of the largest religious edifices in the place, and the temples of the goddess of mercy and god of war the most frequented. Near the E. gate, called Tang Mun, or Bath Gate, there is a small suburb, where are numerous public hot baths. Beggars of the most loathsome aspect crowd the thoroughfares. There are no manufactures of any importance in the city, excepting those of combs, screens, \&c. The harbour is well frequented, although the approach to it from the sea is bad, and the navigation difficult. There is, however, a convenient anchorage at Pagoda 1sland, 9 m . below the city. The commerce of this place has not fulfilled expectation. The chief imports are salt, a particular kind of pea, produced in the N. provinces; salt fish, bones, cotton, sugar, sugar-candy, \&c. Principal ex-ports:-timber, bamboo, fruits, tobacco, potash, oil-cakes, orange-peel. The whole imports from Britain, a few years ago, were estimated at $£ 43,981$, and the exports at $£ 40,293$. One-half of the population of Foo-Choo-Foo is supposed to be addicted to the opium pipe, on which $£ 450,000$ are annually spent. The river, and a sheet of water on the W. side of the city, called Li•hu or West Lake, are covered with floating habitations, trading craft, ferry-boats, fishing-boats, and fishing nets, presenting a very animated scene. Pop. estimated at upwards of 600,000 .-(Williams' Chinese Empire; Martin's China; Parliamentary Papers.)

FÓO.Keu, a tn. China, prov. Honan, on an affluent of the Hoai-ho, 45 m . S. Khaifung.

FOO-Ming, a tn. China, prov. of, and 18 m . N.W. Iunnan, on an affluent of the Yang-tze-kiang.

FOOLADOO, a mountainous dist. of W. Africa, near the sources of the Senegal, between lon. $8^{\circ}$ and $10^{\circ} \mathrm{W}$., and intersected by the 13 th parallel of N. lat. Park represents the scencry of this country, and of the districts immediately adjoining on the E. and W., as singularly grand and sublime, and was much struck with the picturesque appearance of the villages, perched among precipices of many hundred ft. perpendicular height. Lions and wolves are numerous in the woods.

FOOTA, a territory of W. Africa, Senegambia, S. of the Senegal, extending from Dagana, on the N.W., to N. Guererr, on the S.E; between lat. $15^{\circ}$ and $16^{\circ} 26^{\prime}$ N.; lon. $12^{\circ} 36^{\prime}$ and $16^{\circ} 36^{\prime} \mathrm{W}$. It is divided into three parts, of which that on the W. is called Foota.Tora, that in the centre Foota (proper), and that on the E. Foota Damga. The soil is fertile, well watered, and well cultivated; but the climate is extremely hot. The principal productions are rice, and other eereals, cotton of excellent quality, and tobacco. The forests, which are extensive, are the haunts of lions, tigers, and nume-
rous troops of elephants, while the pasture-lands support large herds of cattle and sheep. There are also several iron mines in the district. The natives, who are mostly of the negro race, are active and industrions, and carry on a brisk trade with various places. The greater part of them are devoted to fishing and the cultivation of the soil; their only manufactures consisting of cotton cloth, and several articles of pottery. They profess the Mahometan religion, but are extremely superstitious, believing in the power of pretended sorcerers to protect them from the attacks of caymans. The government is theocratic and elective; but the almamy or chief must be chosen from certain privileged families, by a council of five persons. Under the almamy are three provincial chiefs, one for each of the three departments into which the country is divided. The power of the almamy is far from being absolute; he is controlled by the council of five, to whom he must constantly submit his acts, and who possess the right of reprimanding, deposing, and even, in certain cases, of putting him to death.

FOOTA-Bondoo, a name for Bondou (which see).
FOOTA-Jallon, a considerable dist. of $W$. Africa, Senegambia, intersected by lat. $13^{\circ} \mathrm{N}$. and lon. $13^{\circ} \mathrm{W}$. It is extremely mountainous, and remarkable for the romantic beauty of its scenery ; and is the source of the rivers Senegal, Gambia, and Grande. During the rainy season the valleys, being inundated, are converted into lakes. Large herds and flocks are pastured in the highlands; and the soil produces in abundance oranges and bananas, besides numerous palm trees, which furnish dates, wine, and oil. The inhabitants are fanatical Mahometans, and pride themselves in their hatred of all infidels, except the whites, from whom they profess to be descended. They are governed by an elective chief. The capital, Timbo; lat. $10^{\circ} 25^{\prime} \mathrm{N}$. ; lon. $10^{\circ} 40^{\prime \prime} \mathrm{W}$; coutains a population of abont 7000 .

FOOTDEE, or Futite, a fishing vil. Scotland, Aberdeenshire, forming a suburb of New Aberdeen, and immediately adjacent to the entrance of the harbour. The inhabitants, who are a peculiar race, are supposed to have come originally from the opposite coasts of Denmark and Sweden.

FORBACH, a tn. France, dep. Moselle, 35 m . E. by N. Metz, near the frontiers of Rhenish Prussia, and in one of the principal routes to Germany. It is built in the form of an amplitheatre, on the N . side of a hill crowned by the ruins of a stronghold, and surrounded by extensive forests and sandy hills. Its streets are narrow and tortuous; and it has manufactures of pipes, soap, and wire gauze, with tanneries and glass-works. Pop. 3082.

FORBES, a market tn . Bohemia, circle of, and 8 m . S.E. Budweis. It is situated on a height not far from the Strobonicz, contains a castle and two churches, one of them ancient, and originally belonging to an Augustine monastery, and has a potash factory. In the neighbouring village of Trotzenan or Trocnow, the celebrated Hussite, John Ziska, was born. A chapel, which bears his name, stands near the spot. Pop. 720

FORBES ISLANDS, S. Pacific Ocean, N.E. coast, Australia; lat. $12^{\circ} 16^{\prime} \mathrm{S}$. ; lon. $143^{\circ} 27^{\prime}$ E.

FORCADOS (Rio dos), a river, W. Africa, Upper Guinea, falling into the Bight of Benin ; lat. $5^{\circ} 22^{\prime}$ N.; lon. $5^{\circ} 19^{\prime} 15^{\prime \prime}$ E. (r.) The bar, at its mouth, is 1 m . broad, 3 m . long, and carries 13 ft . at low water. Forcados is considered the most accessible estuary on the coast, with a noble sound of smooth water, 5 fathoms deep, immediately within the bar. The course of the river is very winding, and its banks are covered with fine trees; they also produce a species of coloured stone, which the negroes use as beads. The coast, both to the N. and S. of the Forcados, is extremely monotonous, consisting of dense forests and tangled jungles, rising from a narrow sandy beach. The natives here are of so treacherous a disposition as to prevent all trading intercourse.

FORCALL, a tn . Spain, Valencia, prov. of, and 48 m . N. Castellon-de-la-Plana, in a mountainous district, at the conflucnce of the Caldes and Cantavieja. It contains a parish church, townhouse, primary school, and prison, and lias manufactures of cloth, and several flour-mills. Pop. 1527.

FORCALQUIER [Roman, Forum Calcarium], a tn. France, dep. Basses-Alpes, 25 m . W.S.W. Digne, near the Laye. It is a meanly-built place, with narrow streets; but is interesting to the antiquary for the ivy-covered ancient re-
mains in or near it, the capital of the Memini having been built on a conical hill which overlooks the present town. It has a communal college, manufactures of serges, hats, caps, and pottery, with silk and wool spinning mills, and a trade in almonds, seeds, honey, and wax. Pop. 1988.

FORCETT, par. Eng. York (N. Riding); 6250 ac. P. 656.
FORCIIEIM, a tn. Bavaria, circle, Upper Franconia, cap. dist. of same name, on the Ludwigs canal, and the railway between Nürnberg and Bamberg, and at the confluence of the Wiesent and Regnitz, both here crossed by bridges, $29 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Bairenth. It is fortified, but not stronely; is the seat of a court of justice and several public offices; contains a castle, three churches, two chapels, a synagogne, townhouse, Latin school, and hospital; and has a mineral spring, with a bathing establishment; manufactures of glass, soap, leather, paper, potash, and saltpetre; an iron, and numerous other mills; and a trade in fat cattle, corn, and fruit. Pop. of tn., 2824 ; dist., 14,747.

FORCHTENAU, or Frakno-Allya, a market tn. Ifungary, Thither Danube, co. of, and 11 m. W. Oedenburg, at the source of the Vulka. It contains a church and a Servite monastery, and has an annual fair. The surrounding hills are covered with fine ehestnut trees, and, in the neighbourhood, on a bleak height, are the ruins of a castle, supposed to have been originally built by the Ostrogoths, in the sixth centnry. Pop. 729.

FORCH'TENBERG, a tn. Würtemberg, circle, Jaxt, r. bank, Kocher, 40 m . N.N.E. Stuttgart. It contains a chureh, and is overlooked by a castle situated on a height. The vine is extensively cultivated in the vieinity. Pop. 1164.

FORD, three pars. Eng. :-1, Salop; 2140 ac. Pop. 309. -2, Sussex; 480 ac. Pop. 70.-3, Northumberland ; 12,220 ac. Pop. 2257.

FORDEN, par. Wales, Montgomery. Pop. 827.
FORDIIAM, three pars. Eng. :-1, Cambridge; 4050 ac. Pop. 1416.-2, Essex ; 2460 ac. Pop. 739.-3, Norfolk; 2270 ac. Pop. 219.

FORDINGBRIDGE, a market tn. and par. England, Hampshire, 26 in . W. by N. Southampton, agreeably situate near the borders of the New Forest, on the lesser Avon, here crossed by a handsome stone bridge of seven arches. It is neat and clean, but was once of more importance than now, having suffered repeatedly by fire. It has an interesting ancient church, an Independent chapel, a Friends' mectinghouse, and several sehools. The chief manufactures are bed ticking and sail-cloth. It lias also two tanneries, a yarn spinning, and two flour-mills, and some calico printing. Marketday, Friday. Area of par., 5720 ac. Pop. (1841), 3073.

FORDING'TON, par. Eng. Dorset; 1910 ac. Pop. 2937.
FORD()N, a tn. Prussia, prov. Posen, gov. of, and 8 m . E.N.E. Bromberg, I. bank, Vistula. It contains a Protestant, and a R. Catholic ehurch, and a synagogue; and has some shipping, a fishery, a trade in cattle, and four annual fairs. Pop. 2066.

FORI)OUN, par. Scot. Kincardine; 44 sq. m. P. 2342. FORDYCE, par. scot. Banff; 28 sq. m. Pop. 3442.
FORDWICll, par. Eng. Kent; 610 ac. Pop. 231.
FORE, a vil. Ireland, co. West Meath, beautifully and romantically situated, N. Lough Lene, 13 m . N. by E. Mullingar. It contains the ruins of an ancient abbey and monastery, founded in 630, and restored in 1209.

FORELANDS (North and Souti).-1, Two headlands, E. coast, England, co. Kent. The N. Foreland, which is in the Isle of Thanet, lat. $51^{\circ} 22^{\prime} 30^{\prime \prime} \mathrm{N}$. ; lon. $1^{\circ} 26^{\prime} 45^{\prime \prime} \mathrm{E}$. (r.), consists of a huge chalky eliff, 200 ft . in height, projecting into the sea, with a fixed light 184 ft . above sea level. Off this promentory, in hard gales of wind, the tide will often set almost round the compass. The S . Foreland, about $14 \mathrm{~m} . \mathrm{S}$. of the former, is also composed of chalky eliffs ; lat. $51^{\circ} 8^{\prime} 24^{\prime \prime}$ N. ; lon. $1^{\circ} 22^{\prime} 30^{\prime \prime}$ E. (r.) There are two lighthouses on it, one at an elevation of 372 ft ., and the other at 275 ft ., both fixed lights.-2, Two islets, E. coast, China, the N. in lat. $28^{\circ} 33^{\prime}$ N. ; lon. $128^{\circ} 39^{\prime}$ E. (R.) ; the S. in lat. $28^{\circ} 16^{\prime}$ N.; lon. $121^{\circ} 44^{\prime} \mathrm{E}$. (R.)

FOREMARK, par. Eng. Derby; 2870 ac. Pop. 212.
FORENAGH'Ts, par. lrel. Kildare ; 564 ac. Pop. 62.
FORENZA, a tn. Naples, prov. Basilicata, 14 m . S.E. Melf. It has two churches and a convent. Pop. 5000.

FORES'I'Hhl, par. Eng. Oxford; 650 ac. Pop. 149.
Yol. 1.

FORESTO, a vil. and com. Austrian Italy, prov. Bergamn, dist. of, and $3 \mathrm{~m} . W$. Sarnico, in the rich valley of Calepio. It is built with considerable regularity, contains a parish, and three auxiliary churches, and has a quarry, from which excellent whetstones are obtained. Pop. 1251.

FORET (La), a maritime hamlet, France, dep. Finistere, arrond. Quimper, on a bay of its own name. It has a small harbour, and some boat traffic. Pop. 1500.

FORE' [Flemish, Vorst], a vil. and com. Belgium, prov. of, and 7 m. S.E. Liége, on the Vesdre. It has manufactures of gun-barrels, needles, and worsted yarn; fulling-mills, a zinc foundry, brick fields, quarries of paving stones, and several lime-kilns. Pop. 2028.

FOREZ (Ise), an anc. prov. France, formerly dependent on the Lyonnais, and now included in deps. Loire, IIaute-Loire, and Puy-de-Dûme. Its capital was Montbrison.

FORFAR, or Angus, a maritime co., E. coast, Scotland, having N., cos. of Aberdeen and Kineardine, S. the Firth of Tay, E. the German Ocean, and W. co. Perth. It is about 36 m . in length, N.W. to S.E., and 30 m . in breadth; area, 570,880 ac. The N.W. part of the county is wholly occupied by that portion of the Grampians called the Beuchennin Hills, or 'Braes of Angus.' S. of these, and running parallel to them, is the inferior ridge of the Sidlaw hills. Between these two ranges lies that portion of the great valley of Strathmore by which Forfarshire is intersected S.W. to N.E., 33 m . in length, and from 6 to 8 in breadth. The Grampians do not here attain any great elevation, their lofticst summit not exceeding 2611 ft ., neither are they generally of a very bold or stern charaeter, though formidable precipices are of frequent oceurrence. The Sidlaw Hills, again, are of still lower altitude, the highest peaks being only from 1200 to 1400 ft . ; some of them are detached, with conical summits, one of which is Dunsinnane Hill, immortalized by Shakspeare. Between the Sidlaw Hills and the sea, the country, comprising about $142,000 \mathrm{ac}$. , is level, fertile, and highly cultivated. But by far the finest and most productive part of the county is the valley of Strathmore, which is beautifully diversified by gentle eminences, well cultivated fields, plantations, and country seats. Drainage is vigorously and judiciously prosecuted. Fallowing is general in the low grounds, which produce heavy crops of wheat. Oats, barley, potatoes, and turnips, are also largely cultivated. All the most improved agricultural im plements are in general use in the county, and the farmers equal in skill those of any other part of Scotland. Breed of cattle varions. Sheep, originally small white-faced moun-tain-breed; but the black-ficed and Clieviots are now com mon, although some of the original breed still remain in the Grampians. Sheep-rearing, however, has become a secondary object, since the improvements in tillage have been introdueed, although nearly every farmer has a flock more or less numerous. Limestone is abundant in various parts of the mountainous districts; slate also occurs along the declivities, but is not much wrought. There are no other minerals of any importance.

Forfarshire is the chief seat of the coarse linen manufactures of scotland. These are generally diffused through all the towns of the county, but the grand centre is Dundee. There are some valuable salmon fisheries along the coast and in the rivers. The principal towns are Forfar, the cap., Dundee, Montrose, Arbroath, and Brechin. The county contains 56 parishes, and five royal burghs. It returns three members to Parliament-one tor the county ; registered electors (1850), 2793; one for Dundee, and one for the Montrose district of burghs. Pop. (1841), 170,520; (1851), 191,264.

FORFAR, a parl. and royal bor. and par. Seotland. The Town, cap. of above co., situate in the valley of Strathmore, 13 m . N. by E. Dundee, and a station on the railway from Perth to Aberdeen, consists of two principal, and several smaller streete, most of them irregular; houses, in general well built and substantial, many of them of a superior descrip tion. It has an Established chureh and chapel, two Free churches, a U. Presbyterian, Episcopal, and Congregational ist churches; a handsome and commodious town and connty hall, sheriff courthouse, subscription newsroom and library, a mechanics' institute, a large infant school, and a number ot other well conducted schools. The linen manufacture is ex tensively carried on; the fabrics generally made being sheet
ings, osnaburgs, and dowlas; and a description of shoes called brogues, are made in large quantities for exportation. Forfar has been, from time immemorial, the head burgh of the county, and its castle, which stood on an eminence a little N. of the town, was, in remote times, a royal residence, and the scene of some interesting historical events. It was destroyed, in 1307, by Robert Bruce, by whom it was taken from the English. Forfar is one of the Montrose district of burghs, and is governed by a provost. two bailies, and 16 councillors. Pop. (1841), 8362 ; (1851), 0349 . Area of par., 6 m . by 4 m . Pop. (1841), 9620.

FORGAN, par. Scot. Fife; 6 m. by 2. P. (1851), 1119.
FORGANDENNY, par. Scot. Perth; 12,800 ac. Pop. (1851), 811.

FORGARIA, a vil. Austrian Italy, gov. Venice, prov. Friuli, near r. bank, Tagliamento, 16 m . N.W. Udine. It contains a parish, and two auxiliary churches, and has a mill. Pop. 1050.

FORGLEN, par. Scot. Banff; 12 sq. m. Pop. 771.
FORGNEY, par. Irel. Longford; 5455 ac. Pop. 2193.
FORGUE, par. Scot. Aberdeen ; 9 m . by 6 m . Pop. 2489.
FORIA, or Forio, a seaport tn. Naples, W. shore, isl. Ischia ; lat. $40^{\circ} 46^{\prime} \mathrm{N} . ;$ lon. $13^{\circ} 54^{\prime} \mathrm{E}$. Streets narrow, has three churches, a good liarbour, and a considerable trade. In the vicinity are hot mineral springs and baths. Pop. 5000.

FORKED Deer River, a river, U. States, Tennessee, rising in the N.W. part of the State, and falling into the Mississippi, 43 m . N. by E. Memphis, after a S.W. course of about 100 m ., for the greater part of which it is navigable.

FORKED Head, a headland, N. America, Cape Breton, on the S.E. coast, between Fourchon harbour and Portland cove.

FORKILL, a small tn. and par. Ircland, co. Armagh. The rown, 5 m. N.N.W. Dundalk, contains a church, and a Wesleyan meeting-house, and has limited manufactures of linen and cotton, and four arnual fairs. Area of par. 12,590 ac. Pop. 8128.

FORLI, a delegation, Papal States, bounded N. by deleg. Ravenna; W., Tuscany; S., deleg. Urbino é Pesaro, and the small republic San Marino; and E., the Adriatic; greatest length, E. to W., 45 m .; greatest breadth, 36 m .; area about 900 sq. m. The surface in the W. is rather elevated, being partially covered by low branches of the Apennines, but elsewhere becomes flat, particularly in the N. towards the coast, where extensive swamps prevail, and make the air very unhealthy. The interior often suffers from excessive draught, and earthquakes are not unfrequent. Much of the soil is well adapted for the growth of corn, hemp, and flax. Madder, saffron, and anise, are also cultivated, and much attention is paid to the rearing of bees and silk worms. The vine, olive, and various fruits are extensively cultivated. There is not much land in pasture, and cattle are comparatively few. The fisheries on the coast are productive. The only mineral substance of any consequence is sulphur, of which considerable quantities are obtained. Manufactures have made more progress than in other parts of the Papal States. Pop. 194,399.

FORLI [anc. Forum Livii], a tn. Papal States, cap. above deleg., 38 m . S.E. Bologna, at the foot of the Apennines, in a pleasant and fertile plain, watered by the Ronco and Montone. It is handsome and well built, with a spacious square, and contains many beautiful buildings, including several palaces, one of which, the Palazzo Guerini, is after the designs of Michael Angelo. It also has a cathedral, and several other churches, most of which are adorned with fine paintings, by Cignani, Guido, and other masters. There are likewise numerous convents in the town. Forli is a bishop's see, and the residence of the legate. It has a college, a public library, and some literary societies; manufactures of silk ribbons, silk twist, oil cloth, woollen stuffs, wax, nitre, and refined sulphur; and a considerable trade in corn, wines, oil, hemp, and aniseed. Pop. (1832), 16,000.

FORLINPOPOLI, or Forlimporoli [anc. Forum Popilii], a tn. Papal States, legat. of, and 5 m . S.E. Forli. It is small, but neat, and contains an ancient castle, a cathedral, two parish churches, and several convents. April 21, 1815, Murat here defeated the Allies. Pop. 4191.

FORMEN'TERA, an isl. Mediterranean, the most S. of the Baleares; lat. (S. point) $38^{\circ} 38^{\prime} \mathrm{N}$.; lon. $1^{\circ} 36^{\prime} \mathrm{E}$. (k.) It is of a somewhat triangular form, but very irregular; length,

12 m. E. to W.; breadth, $8 \mathrm{~m} . \mathrm{N}$. to S . It produces wheat, wine, oil, and fruits abundantly, and the coast is frequente: by innumerable aquatic birds. Fishing is carried on, building stone quarried, and salt, grain, oil, and fruits exported. Pop. 1500.

FORMENTON, a cape forming the most N. point of the island of Majorca; lat. $39^{\circ} 57^{\prime} 15^{\prime \prime} \mathrm{N}$. ; and lon. $3^{\circ} 16^{\prime} \mathrm{E}$. It projects a considerable way into the sea at the N. entrance of the Bay of Pollenza, and being lofty, is seen about 30 m . off at sea, when it presents the appearance of several islands. There are no shoals near it.

FORMICHE.-1, Two low barren islets, off W. coast, Sicily, E. of Levanso. The larger island, almost a perfect square, is covered with large stone buildings, consisting of storehouses, a strong tower with bastions, a chapel, and a fishing village. The small harbour on the S.E. of this island is perfectly sheltered. The same name is given to a ledge of rocks off the N. coast of Sicily, between the Bottaro and Corvo rock, S.E. of Panaria.--2, Some islets near the coast of Tuscany, prov. Sienna, a few miles W. the mouth of the Ombrone. They are mere rocks, scrving at times as a refuge for fishers.

FORMICOLA, a vil. and com. Naples, prov. Terra di Lavoro, 11 m. N.N.W. Caserta. Pop. 2060.

FORMIGA, a tn. Brazil, prov. Minas-Geracs, 140 m. E. Villa Rica, near the source of a small river of same name, comarca, Rio Grande. It contains a parish, and two auxiliary churches. Its inhabitants are chiefly engaged in cultivating the soil or dealing in cattle. Pop. 2000.

FORMIGARA, a vil. and com. Austrian Italy, prov. Cremona, dist. of, and 6 m. S.S.W. Soresina. It stands near Mount Piacenza, in a district of great fertility, but exposed to the inundations of the Adda, from which it has often suffered severely, and contains a parish church. Pop. 1186.

FORMIGAS, a tn. Brazil, prov. Minas-Geraes, agreeably situate about 100 m . W.N.W. Minas-Novas. It consists of about 200 houses covered with tiles, but mostly built of earth, and of a spacious square, at the top of which stands the parish church. The inhabitants deal in cattle, hides, and furs, which they sell in Bahia, and saltpetre, which they carry to Ouro, Preto, and sometimes as far as Rio-de-Janeiro.

FORMIGINE, a tn. Italy, duchy, Modena, on a canal, 6 m . S.S.W. Modena. It has an annual fair, which lasts eight days. Pop. 1800.

FORMIGNY, a tn. France, dep. Calvados, 12 m . from Bayeux, famous for a battle between the French and English, in 1450 , in which the latter were defeated, and in consequence of which they were compelled to abandon Normandy. A monument, to commemorate the event, was set up in 1834, near the highway between Paris and Cherbourg, at the spot where the closing struggle is recorded to have taken place. Pop. 537.

FORMOSA, a tn. Brazil, prov. of, and about 60 m . S.S.W. Pernambuco, cap. comarca, Rio Formoso, l. bank, Serenhen, near the sea. It contains a parish church, situate on the top, of a hill, and in 1840 was the residence both of a prefect and a justice of peace. The inhabitants are almost all labourers.

FORMOSA [Chinese, Tae wan, or Tai-ouan; French, Formose ; Portuguese, Hormosa], an isl. China Sea, between $22^{\circ}$ and $25^{\circ} 30^{\circ} \mathrm{N} . ;$ and lon. $120^{\circ} 30^{\prime}$ and $122^{\circ}$ E.; length, N. to S .245 m. ; breadth, at the broadest part, which is at the centre, about 100 m . Distance from the Chinese coast, province of Fokien, 90 m .; area, $15,000 \mathrm{sq} . \mathrm{m}$. The whole coast of the island facing the mainland, and for a considerable distance inland, belongs to China, and is included in the government of the province of Fokien. The remainder, or E. side of the island, is occupied by aborigines. Formosa is intersected throughout its whole length by a ridge of mountains called the Muh Kan Shan, some of whose summits are supposed to reach an elevation of $12,000 \mathrm{ft}$., and are covered with snow during the whole year. Their declivities are clothed with fine trees and pasture-grounds, giving the island a very attractive appearance from the sea. These mountains present many evidences of former volcanic action. Rivers are numerous on the W. side, but most of them, descending from elevated regions, have all the violence of mountain torrents. Some of these streams, however, are navigable for short distances inland. The others serve to irrigate the land, though their sudden inundations are sometimes destructive to the crops. The soil of the lower tracts and the more gentle
slopes of the mountains is extremely fertile, well cultivated, and the climate salubrions. The rice trade alone, between the island and the maritime provinces of the mainland, employs about 300 vessels. There is, besides, an extensive trade in camphor, salt, sulphur, maize, fruits, timber, and other products. The rice grown in the island is of superior quality. Wheat, millet, maize, several kinds of vegetables, sugar-cane, oranges, pine-apples, guavas, cocoa nuts, areca nuts, peaches, apricots, figs, grapes, pomegranates, chestnuts, and melons, are also raised in large quantities. The commerce of Formosa is confined chiefly to Fokien, and to a few of the other E. provinces of Clina, from which it imports teagreen tea only, and that of a peculiar kind, being cultivated in the island-raw silk, woollen, and cotton stuffs, and other manufactures. The domestic animals are cattle, buffaloes, horses, asses, goats, sheep, and hogs. The E. part of the island is said to be infested with tigers, leopards, and wolves, but none are met with in the cultivated districts on the $\mathbf{W}$. side. In 1848, coal of excellent quality, and extending over a large area, was discovered at the N.E. part of the island, in the vicinity of the village of Kelung tow or Killon. The aborigines are of a slender shape, olive complexion, wear long hair, and blacken their teeth. They are supposed by some to be of Malayan or Polynesian origin, by others to be allied to the inhabitants of the Loo ehoo islands. Many of them have been driven or have removed to the E . side of the island, but many also have become partly incorporated with the Chinese settlers, or live in villages of their own, under the general supervision of Chinese officers. The greater portion, bowever, still live in a state of independence. They are divided into mumerous clans or tribes, have no written language, are honest, and just in their dealings, but revengeful when provoked. The Chinese portion of the island is divided iuto four districts, the capital of which is Tai-wan-fu. The Chinese had no knowledge of Formosa till the year 1403, and their sway was not established over it till 1683. Since then it has greatly flourished through their industry, perseveranee, and agricultural skill. An extensive emigration is still going on from the main, and lands are taken up by capitalists, who not only encourage the people to go over, but purchase large numbers of poor personis to ocenpy them. In 1624 , the Datch obtained a footing in the island, by consent of the Governor of Fokien, but were expelled by the Chinese, after retaining possession of it for 28 years, laving endcavoured, but with little success, to extend their influence over it. The colonists are wealthy and unruly, and are a source of great annoyance, from the frequency of their revolts, to the Chinese government. In no part of China are excentions so frequent or so unavailing as here. Literature is in sueh a flourishing state in Formosa, that the people of Fokien sometimes send their sons there to obtain literary degrees. A miserable tragedy was cnacted in this island by the Chinese authorities in 1840. One hundred and ninety-seven men, chiefly Ilindoos, forming parts of the crews of two British slips, the Nerbulda, and Ann, from India, who were wrecked on the coast, and had been made prisoners, were marehed out to a plain near the city of Tai-wan-fu, and beheaded. Formosa has few available harbours, owing to the shallowness of their entrances. The channel, S. from the island, is remarkable for the violence of its N . winds and for its heavy seas. Pop. estimated at $2.500,000$.

FORMOSA.-1, A river, W. Africa, Bight of Benin; lat. $5^{\circ} 40^{\circ} \mathrm{N}$.; lon. $5^{\circ} 2^{\prime} \mathrm{E}$. It is $13 \frac{3}{4} \mathrm{~m}$. broad, and is crossed by a bar, on which there is but 12 ft . at low water. This is quite exposed, and therefore, during bad weather, it is very dangerous, on account of the heavy surf that rolls in upon it. The country for zome distance up is entirely intersected with its branehes, rendering it difficult for a vessel to find its way without a pilot. Navigation is also sometimes impeded by the floating islands, covered with reeds which come down the stream. The banks are fertile and beantiful, and thickly clothed with fine trees, but the air extremely unwholesome. During the time of the slave trade, this river was much resorted to, but has now little commerce.- 2, A cape, W. Africa; lat. $4^{\circ} 15^{\prime}$ N.; lon. $6^{\circ} 10^{\circ}$ E., separating the Bights of Benin and Biafra. It is very low, and is no distinct eape, being merely the most prominent part of that projecting land which is intersceted by the numerons streams forming the delta of the Quorra or Niger.- 3, An isl., W. Africa, the most
N. of the Bissagos group; lat. $11^{\circ} 30^{\prime}$ N.; lon. $16^{\circ} 10^{\circ} \mathrm{W}$. It is about 30 m . long, and 18 m . broad, is fertile and covered with trees, but is destitute of water.-4, A bay, on the E. coast, Africa, S. point, Ras Gomany, in lat. $3^{\circ} 0^{\circ}$ S.; lon. $40^{\circ} 19^{\prime}$ E. It is 27 m . in breadth, and 9 to 12 m . in length inland.

FORMOSA (Mount and River), near S.E. extremity of Malay Peninsula, Malacca Strait. The mount is in lat. $1^{\circ} 49^{\prime} \mathrm{N}$. ; lon. $102^{\circ} 55^{\prime}$ E., 40 m . E. Malacca. It is the lighest summit of a group of undulating monutains near the sea. The W. end forms the bluff point of land called Point Sizan, on the E. side of the entrance of Formosa River, which extends a considerable way into the country, and falls into the Strait of Malacea at lat. $2^{\circ} \mathrm{N}$. ; lon. $102^{\circ} 50^{\circ} \mathrm{E}$.

FORNCE'T'T, two pars. Eng. Norfolk:-1, (St. Mary), 760 ac. Pop. $305 .-2$, (St. Peter), 1710 ac. Pop. 301.

FORNELLS, a small seaport tn., N. coast, isl. Minorca, on a bay of same name, 16 m . N.N.W. Mahon. It is merely a fishing village, but contains a parish church, and has a deep and capacious roadstead, completely sheltered from every wind, but not free from danger, in consequence of the narrowness of the entrance, and some hidden shoals. It is defended by a castle, a tower, and two batteries, one of them on a small island in the middle of the haven, but the works are greatly dilapidated.

FORNHAM, three pars. Eng. Suffolk:-1, (All Saints), 2200 ac . Pop. 336.-2, (St. Geneveve), 790 ac . P'op. 70.3, (St. Martin), 1230 ac. Pop. 294.

FORNO di Rivara [Latin, Furnus ad Ripariam], a vil., com. Sardinian States, Piedmont, div. of, and 26 m . N.N.W. Turin, on the Viana, liere crossed by a stone bridge. It contains a parish church and a communal school, and has some trade in cattle. Pop. 2612.

FORNOS d'Algodhes, a tn. and par. Portugal, prov. Beira-Alta, 16 m. S.E. Viseu. Pop. 1123 .

FORNOVO, or Fornuovo, a vil. and com., duchy of, and 14 m. S.W. Parma, at the foot of the Apennines, near r. bank, Taro, from whose inundations it is imperfectly protected. It contains a public school, and has a weekly market, and three annual fairs, chiefly for cattle. Many of the inhabitants emigrate in search of employment. Pop. 2940.

FORRABURY, par. Eng. Cornwall; 430 ac. Pop. 354.
FORRES, a royal and parl. bor., th. and par. Scotland, Morayshire. The тown, 25 m . N.E. Inverness, and about 2 m . from the sea, is beautifully situated on a dry sandy knoll; consists of one principal street, about $\frac{1}{2} \mathrm{~m}$. long E. to W., and several minor streets and lanes, all kept clean; well paved and lighted with gas. It has an elegant gotlic townhouse, with a square tower, and containing a spacious cousthouse and other public offices; and likewise possesses a large plain Established chureh, a Free, and a U. Presbyterian church, a small Episcopal, and an Independent chapel; and Anderson's aeademical institution, and St. Lawrence mason lodge, both handsome edifices. There are also a mechanics' iustitution, library, dispensary, and several charitable societies. In the immediate vicinity are grain-mills, a distillery, a saw-mill, a brewery, and a woollen manufactory. W. and N. of the town are extensive nurseries, celebrated for the raising of forest plants, particularly of the native Scotch pine. Grain market on Tuesday; and several fairs amnually. Forres figures prominently in the tragedy of Macbeth; and the heath with which it is surrounded is as dreary and desolate as it is represented by the poet. On an eminence, at the $W$. extremity of the town, stood the ancient castle of Forres. Hard by, likewise, is a remarkable obelisk, 23 ft . high, by 3 ft .10 inches broad, and 1 ft .3 inches thick, called sweno's stone, rudely seulptured, and supposed to commemorate a victory obtained over the Danes. Forres unites with Inverness, Fortrose, and Nairn, in sending a member to the House of Commons. Area of par. 5200 ac . Pop. (1851), 4076. Pop. of bor. 3475.(Local Correspondent.)

FORRO, two places, Austria:-1, (or Forron), A market tn. Hungary, Hither Theiss, co. Abaujvar, dist. of, and 10 m . N.E. Szickso, on the IIernad. It contains a parish church, and has some trade.-2, (or Brenndorf), $\Lambda$ vil. Transylvania, co. Nieder Weissenburg, about 15 m . from Nagy-Engad. It contains a Greek united, and a non-united church. All the inbabitants are Wallachians. Pop. 1016.

FORRU, a vil., isl. Sardinia, div. Cagliari, prov. of, and 23 m . S.E. Oristano. It stands in a basin surrounded by hills,
which makes the summer heat almost intolerable, and the climate unhealthy; consists of about 300 houses, built in the form of a triangle, with the apex facing the N.; contains two churches, and a primary school, and has an annual fair. Pop. 960.

FORSCOTE, par. Eng. Somerset; 580 ac. Pop. 84.
FORSTA, a tn. Prussia, prov. Brandenburg, gov. of, and 44 m . S.S.E. Frankfort-on-the-Oder, on an isl. formed by the Neisse. It consists of the town proper and two suburbs, is both substantially and regularly built, contains a castle and two Protestant churches, and has a trade in flax, horses, and cattle, and six annual fairs. Tobacco is extensively cultivated in the district. Pop. 2900.

FORT-Ann, a vil. and township, U. States, New York. The village, on the Champlain Canal, 55 m . N. by E. Albany, contains three churches, leather manufactures, and stoves. Fort-Ann, erected here in 1756, was celebrated in the French and revolutionary wars. Pop. of township, 3559.

FOR'T-Augustus, a fortress, Scotland, co. of, and 30 m . S.W. Inverness, at the S.W. extremity of Loch Ness. It stands on the edge of the lake, and was built, in 1730 , for the purpose of overawing some of the Highland clans. It is of a square form, with four bastions at the corners, defended by a ditch, covert way, and glacis. The barracks are constructed for one field officer, four captains, 12 subalterns, and 280 rank and file. It was taken by the Highlanders in 1745 . It is now occupied by a few old soldiers only, the guns having been removed to Fort-George.-The village of same name, close upon the banks of the Caledonian Canal, outside the fortress, is straggling and insignificant, but has a respectable church and two fairs.

FORT-George, a fortress, Scotland, co. of, and 10 m . N.E. Inverness, at the extremity of a low point of land projecting into the Moray Firth. It is an irregular polygon, with six bastions, and has accommodation for 2090 men, besides officers. It was built, after the rebellion of 1745 , for the purpose of keeping the Highlanders in subjection. It occupies $15 \mathrm{ac} .$, but, though skilfully constructed, is secure from attacks by sea only, being commanded by some adjoining heights.

FORT-Liberte, a maritime tn . W. Indies, N. coast, Hayti, 27 m . E.S.E. Cape Frances. It is well built; has wide streets, a fine square, an elegant fountain, and a good harbour, at the head of a bay, and extending, in the form of a crescent, from one extremity of the town to the other. It communicates with the sea by a narrow channel, and is defended by two forts.

FOR'T-Royal, a tn. and seaport, French W. Indies, isl. Martinique, of which it is cap.; lat. $14^{\circ} 36^{\prime}$ N.; lon. $61^{\circ} 4^{\prime} 15^{\prime \prime}$ W. (r.) ; situated on the N. side of a deep and well sheltered bay, protected by a fort, which covers the whole surface of a peninsula, and commands the town and harbour. The streets are straight and spacious; houses, in general, well built. The principal buildings are the parish church, government offices, the barracks, arsenal, prison, and hospital. At its E. extremity, near the careening place, is a fine parade, called the Savannah, forming the glacis of Fort St. Louis. From its situation on the W. side of the island, the bay is protected from the prevalent winds, and, in one part or another, will be found suitable for all circumstances. In 1839, Fort-Royal was almost wholly destroyed by an earthquake. Upwards of 500 persons were killed by the falling of the buildings, including nearly all the inmates of the principal hospital. Fort-Royal is the residence of the French governor. Pop. 11,300.

FURT St. David, a fortress, Hindoostan, Coromandel coast, 12 m. S.S.W. Pondicherry. A factory was established here in 1691, and, after the capture of Madras by the French, in 1746, it became the head of the British settlements in this quarter till 1758 , when, after a short siege, it was taken by M. Lally, and the fortifications demolished.

FORT-William.-1, A fortress, Scotland, co. of, and 58 m. S.W. Inverness, at a bend of Loch Eil, W. end of the Caledonian Canal. The fortress is an irregular work, defended by a ditch, glacis, and ravelin; contains a bomb proof magazine, and the barracks are calculated for about 100 men. Like the other forts above spoken of, it was built to keep the Highland clans in check. It was unsuccessfully assailed by the IIighlanders in 1715, and again in 1746.-2, A tn., for-
merly called Maryburgh, $1 \frac{1}{2} \mathrm{~m}$. S.W. the fort. It consists of a long straight street, close to the edge of the water, with several short intersecting lanes. It contains four places of worship-Established, Free, an Episcopal, and a R. Catholic chapel. One of the sheriff substitutes of the county resides and holds his courts here. The lofty mountain Ben Nevis, 4370 ft . high, is within a short distance of the town. The inhabitants are chiefly engaged in agriculture and in fishing. Pop. (1841), 1026; (1851), 1382.

FOR'TALEZA, Villa-do-Forte, or Ceara, a tn. Brazil, cap. prov. Ceara, and near the mouth of the Ceara, in lat. $3^{\circ} 42^{\prime} \mathrm{S}$. ; lon. $38^{\circ} 30^{\circ} \mathrm{W}$. It consists of an old and a new town. The former stands close to the mouth of the river, which discharges itself into a creek formed by cape Mocoripe; the latter is situated along the W. side of the same promontory. Both of them are very indifferently built; the houses are of earth, and the streets are irregular. The public buildings are not much superior to those of private individuals. Those only deserving of notice are the governor's palace, two churches, an hospital, a military prison, a Latin, and a primary school. There is deep water, and a good bottom in the bay, but no shelter. The depth of water in the harbour varies, at ligh water, from 1 to 2 fathoms. The access to it is by two openings in the rock which overhangs it. It is used by coasting vessels only. The trade is chiefly in cotton, hides, and excellent dates. Pop. 3000.

FORTANETE, a tn. Spain, Aragon, prov. of, and 33 m . E.N.E. Teruel, on the side of a hill. It is tolerably well built, though some of the houses are in a dilapidated state, in consequence of the damage they received in the last Spanish war. It contains a parish church, courthouse, a boys' and a girls' school, and a prison; and has some manufactures of cloth, several mills, and an annual fair. Pop. 1253.

FORTEAU BAY, an inlet, S.E. coast, Labrador, near the S.E. extremity of the strait of Belleisle. It receives a considerable river, and possesses valuable fisheries.

FORTESQUE BAY, a beautiful bay, Van Diemen's Land, E. coast, Tasman's Peninsula, about 56 m . N. Cape Pillar. It is about 4 m . in length, inland, and about $1 \frac{1}{2} \mathrm{~m}$. wide at the entrance.

FORTEV1OT, par. Scot. Perth; 8 m . by 2. P. (1851), 639.
FOR'IH, a large river, Scotland, reckoned the third in point of magnitude, is formed by the junction of two head streams, called, respectively, the Duchray and the Dhu-the one rising in Stirlingshire, the other in Perthshire, at the distance of a few miles from each other, and both on the N.E. side of the mountain Ben Lomond. The junction ot these streams takes place at Aberfoyle, from which the river flows S.E., and discharges itself into the German Ocean, having previously expanded into a broad estuary, called the Firth of Forth, and forms, for a considerable part of its course, the boundary between the counties of Stirling and Perth. Its length, in a straight line, to Kincardine, where it begins to widen into an estuary, is upwards of. 30 m ., but, following its numerous windings, may be probably double that length. Its depth is from 3 to 37 fathoms, or more; the bottom, in most places, is covered with mud; the tide flows a mile above Stirling Bridge, or about 70 m . from the sea. It drains $645 \mathrm{sq} . \mathrm{m}$. For the greater part of its course, it flows through a rich, flat country, and is navigable for vessels of 300 tons as far as Aloa, and for those of 70 tons to Stirling. Its most remarkable windings, called the 'Links of Forth,' occur between the latter places, the distance between Stirling bridge and Alloa being but 6 m . by land, while by water it is 12. These windings form a great number of bcautiful peninsulas. For several miles above and below Clackmannan, the tides of the Forth exhibit a singular phenomenon, called by seamen 'leaky tides.' When the water has flowed for three hours, it runs back for about an hour and a half, nearly as far as when it began to flow. It returns immediately, and flows during another hour and a half to the same height it was before; and this change takes place both in the flood and ebb tides. There are thus actually double the number of tides in this river that are to be found anywhere else. Large tracts of land on both sides of the river above Stirling, but especially in the parish of Kincardine, Perthshire, have been cleared of moss, and brought into a state of cultivation, the soil being generally a rich blue clay, of great depth, and exceedingly productive. The Firth of Forth contains great
variety and considerable abundance of tish, particularly herrings, which frequent it in immense ahoals. Oysters also abound in the estuary. The principal tributary rivers of the Forth are the Teith, and Allan, above Stirling Bridge, and, below it, the Devon, Carron, Avon, Almond, Leith, Esk, and Leven; these chicfly flow into it on the S. shore. There are several islands in the river, the largest of which are Inchgarvie, Inchcolm, Inclukeith, the Bass, and the isle of May. Lighthouses are erected on the latter and on Inchkeith; and the ruins of castles or religious houses appear on all the different islands. There are a number of harbours along both its coasts, some of which have been formed at a great expense; amongst these is the recently erected pier and harbour of Granton, belonging to the Duke of Buccleuch. The other principal ports, besides those of Stirling and Alloa, already mentioned, are on the N. shore, Torryburn, Inverkeithing, Burntisland, Kinghorn, Kirkcaldy, Dysart, Ely, and Anstruther. On the S. ahore, Borrowstowness, Queensferry, Leith, and Prestonpans.

FOR'TH MOUNTAINS, a range of quartz hills, Ireland, co. of, and 4 m . W. Wexford. In 1798, a large body of insurgents encanned here previous to the capture of Wexford.

FOR'THAMP'TON, par. Eng. Gloucester; 2390 ac. Pop. 460.

FORTIFIED ISLAND, or Baswarage, Indian Ocean, coast of Canara, India; lat. $14^{\circ} 18^{\prime} 30^{\prime \prime} \mathrm{N}$. ; lon. $74^{\circ} 23^{\prime} 15^{\prime \prime}$ E. (k.) It is level, and has fortifications on it; hence its name.

FORTINGALL, par Scot. Perth; 40 m . by 35 m . Pop. 2740.

FORTON, par. Eng. Stafford; 3760 ac. Pop. 764.
FORTORE [Latin, Frento], a river, Naples, which rises in the E. alope of the A pennines, in the S.E. corner of prov. Sannio, and, during the greater part of its course, forms the boundary between that prov. and that of Capitanata. It flows first N.N.W., then N.E., and falls into the Adriatic by two mouths. Its whole course is about 70 m .

FORTROSE, a scaport, royal and parl. bor. Scotland, co. Ross, occupying a romantic situation, N. shore, Moray Firth, 8 m . N.E. Inverness, nearly opposite Fort-George, with which there is communication by a ferry. It was formerly called Chanoriry, from being the chanonry of Ross, where the bishop had his residence. It was united to the burgh of Rosemarkie, which is about 1 m . N.E. from it, by a charter granted by King James II., anno 1444, under the common name of Fortross, now Fortrose. The town is spoken of as having been then a seat of the arts and sciences. Of its ancient cathedral, which stood in a spacious square, only a few colonnades and arches now remain. These, however, from their tasteful excention, afford cvidence of its having been a splendid edifice. It has a Free church, an Established, and an Episcopal chapel, the last a handsome gothie structure ; a grammar-sehool, a female sehool, and an academy; a friendly, and a farming society. Though possessed of a good harbour, and other advantages, the town has no trade. It unites with Inverness, Nairn, and Forres, in returning a member to the IIouse of Commons. Pop. (1841), 1082.

FORTUNA, a tn. Spain, prov. of, and 11 m . N. by E. Murcia. Most of the streets are regular, the houses tolerably well constructed, and of its three squares, the principal contains a large and substantial parish church; and there are, besides, a chapel of ease, townhouse, prison, cemetery, and three publie schools. At the foot of a hill, about $1 \mathrm{~m} . \mathrm{N}$. of the town, are the thermal and feruginous baths, for which the place was much noted. Esparto, linen, aud saltpetre, are manufactured and exported. Pop. 6556.

FORTUNE ISLAND.-1, (Little), Indian Ocean, W. coast, Sumatra; lat. $5^{\circ} 54^{\prime}$ S.; Ion. $104^{\circ} 30^{\prime}$ E. (r.) ; 4 m . from the main; it is low and woody, and about 1 m . in dia-meter.-2, Indian Archipelago, Niolucea Passage; lat. $0^{\circ} 55^{\prime}$ S.; lon. $124^{\circ} 8^{\prime}$ E. (r.)-3, Indian Archipelago, Banda Sea; lat. $5^{\circ} 3^{\prime}$ S.; Ion. $132^{\circ} 11^{\prime}$ E. (r.)-4, Sooloo Sea; lat. $14^{\circ} 4^{\prime}$ N.; lon. $120^{\circ} 32^{\prime} \mathrm{E}$.

FOSCALDO, a tn. Naples, prov. Calabria Citra, cap. circondario of same name, at the foot of the Apennines, near he Tyrrhenean Sea, 4 m . N.N.W. Paola. It contains two parish churches, a convent, and an almshouse. The inhabitants rear great numbers of silk worms. Pop. circondario, 7513.

FOSDINOVO [Latin, Fosdenorum], a vil. Italy, duchy Modena, 7. m. N.W. Carrara, 1814 ft . above the sea. It has a court of first resort, and is the seat of a military commandant. Pop. 1448.

FOSDYKE, par. Eng. Lincoln; 1260 ac. Pop. 601.
FOSSANO [anc. Fossanum], a city, Sardinian States, Piedmont, prov. of, and 13 m . N.E. Coni, I. bank. Stura, in an agreeable and elevated plain, and the seat of a bishop. It is surrounded by old walls; and has a castle. The streets are wide and regular; and the houses are built upon arches, under which are the footpaths. These arches are in many parts so low, that passengers can scarcely walk upright; giving to the city rather a gloomy appearance. There are several squares, none of them very remarkable; a fine cathedral, containing a few good paintings; and some other churches and conventual buildings, several palaces, a theatre, hospital, mont-de-piété, orphan asylum, cemetery, a royal scientific academy, several educational establishments, and some mineral baths. Its manufactures are silk, leather, iron, woollen goods, and paper. Trade:-agricultural produce. Two well-attended annual fairs. Pop. 16,041.-(Casalis.)

FOSSASECA, several places, Naples:-1, A vil. and com., prov. Sannio, dist. and 9 m . N.W. Campobasso. It contains six churches. Pop. 2616.-2, A tn., prov. Abruzzo Citra, dist. and 5 m . E. Lanciano, not far from the Adriatic. It contains three churches. Pop. 2472.-3, A vil. and com., prov. Terra di Lavoro, dist. and 13 m . N.W. Piedimonte. Pop. 849.

FOSSE, a small tu. Belgitm, prov. of, and 8 m . S.W. Namur, situated in a ravine. In the commune are marble quarries, coal mines, bleacheries, brewcries, mills, \&c. There is a busy trade in merceries and planks. Fosse was in early times of some importance, and its possession was keenly contested. Its defences were razed by the French in 1675. Pop. 2944.

FOSSNÄES, a vil. and par. Norway, bail. of, and 98 m . N.N.E. Trondhjem, an isl. Gioen, in the Namsenfiord. It has a harbour, and carries on a considerable trade in timber. Pop. 2592.

FOSSOMBRONE [anc. Forum Sempronix], a tn. Papal States, leg. Urbino, 38 m . W.N.W. Ancona. The modern town is intersected by the river Metauro, over which is a remarkable bridge, of a single arch, equalling in boldness of design any similar erection of recent times. The cathedral, dedicated to San Aldebrando Vescovo, is a fine structure, and contains some inscribed stones, from the ruins of the ancient city, whose site is about 2 m . distant, and where are the remains of a theatre, and of several other edifices. There are three churches, besides the cathedral, and several convents. Fossombrone is celebrated thronghout Italy for its silk and woollen manufactories. Near this town was fought, 194 b.c., the battle between the Carthaginians and Romans, which decided the supremacy of the latter, the Carthaginians having been totally defeated, and their general, Asdrubal, killed. Pop. 6421.

FOSSOWAY, and Tulliebole, par. Scot. Perth; 11 in. by 10 m . Pop. 1724.

FOSSUM, a vil. Norway, prov. Aggerhuns, 66 m. S.W. Christiania. In the vicinity are mines of cobalt and iron, and extensive iron-works, at which both cast and malleable iron are made.

FOSSY, or Timanoe, par. Irel. Quecn's co. ; 10,653 ac. Pop. 2142.

FOSTER, a township, U. States, Rhode Island, 19 m. W. by S. Providence. It has cotton, leather, and other manufactures. Pop. 2181.

FOSTON, four pars. Eng.:-1, Lcicester; 840 ac . Pop. 41.-2, Lincoln; 2180 ac. Pop. 497.-3, York (N. Riding); 2090 ac. Pop. 370.-4, (-upon-the-Wolds), York (E. Riding); 4560 ac. Pop. 792.

FOTHERBY, par. Eng. Lincoln; 1400 ac. Pop. 227.
FOTHERINGAY, a par. and vil. England, co. Northampton. The village, pleasantly situate on the Neve, $27 \frac{1}{2}$ m. N.E. Northampton, contains a handsome chureh, in which several illustrious members of the Plantaganet family are interred, and a free grammar school, endowed by Queen Elizabeth. Fotheringay castle, the birthplace of Richard III., and the scene of the imprisonment, trial, and execution of Mary, Queen of Scots, was demolished by order of James I., on his
accession to the English throne. Area of par. 2110 ac. Pop. 230.

FOU, a tn. and dist. China, prov. Shen-see, the former situate r. bank, Lo-ho, 45 m . S. Yen-ngan.

FOU-Choc, China. See Foo-Choo-Foo.
FOU-Pin, a tn . China, prov. Shense, on an affluent of the IIoang-ho, 37 m . N. by E. Si-Ngan.

FOU Schan, a large city, China, prov. Quang-tong, 21 m . E.N.E. Canton, on the island Si-Kiang. It is 8 m . in circumference, has manufactures of silk stuffs, cottons, porcelain, and ironmongery, with sugar refineries, and an active commerce. A portion of its population, as is common in many other towns in China, live in boats. Pop. cstimated at 200,000 .

FOUAH, a tn. Lower Egypt, r. bank of W. or Rosetta branch of the Nile, prov. of, and 20 m . S.E. Rosetta. It is large, and being beautifully situated, has a picturesque appearance from a distance. It has manufactures of linen, morocco leather, and culinary utensils. In the 16 th century, it was a place of considerable importance, having an extensive trade, which has since been transferred to Rosetta.

FOUG [anc. Fagus Leucorum], a vil. and com. France, dep. Meurthe, about 5 m . from Toul. It is agreeably situated on a vine slope, and lias a weekly market, and two annual fairs. A hill in the vicinity is crowned with the remains of a castle and palace, which belonged to the early kings of France. Pop. 1484.

FOUGERES [Latin, Filicarioe Rhedonum], a tn. France, dep. Ille-ct-Vilaine, 28 m . N.E. Rennes. It is agreeably situated on a height, and has broad, well-made streets, wellbuilt houses, and a parish church, behind which, on a terrace, is an agreeable promenade. It has important manufactures of sail-cloth, sacking, tape, coarse flannels, lace, and hats; with dye-works, famed for their scarlet flannels; tanneries, paper-mills, starch-works, and, in the environs, glass-works; and a trade in agricultural produce, hides, and manufactures. It was formerly a fortress, and one of the keys of Brittany; and in its vicinity, November 13, 1793, a memorable engagement took place between the Veudeans and the republicans. Pop. 9106.

FOUGEROLLES, a tn. France, dep. Haute-Saône, 20 m . N.E. Vesoul. It is an old place, long dependent on a fcudal castle; and has numerous distilleries of cherry brandy, with some straw hat factories; and a trade in brandy, planks, linen, \&c. Pop. 1139.

## FOUGEs, a tn. Asiatic Turkey. See Phocas.

FOUILLOUSE (LA), a vil. France, dep. Loire, 6 m . N.W. St. Etienne, on the Furend, with a ribbon and paper manufactory. Pop. 873.

FOUL, or Foula, an isl. N. Sea, the most W. of the Shetlands, about 20 m . distant from the nearest land; lat. $60^{\circ} 9^{\prime} \mathrm{N}$. ; lon. $2^{\circ} 6^{\prime} \mathrm{W}$. (r.). It is about 3 m . long, by $1 \frac{1}{2}$ liroad, affords excellent sheep pasture, and is resorted to as a fishing station. Pop. 215.

FOUL ISLAND, bay of Bengal, off W. coast, Burmali; lat. $18^{\circ} 4^{\prime} \mathrm{N}$. ; lon. $93^{\circ} 57^{\prime} \mathrm{E}$.; it is of a conical form, with a gradual declivity from the centre towards the sea, the N. end terminating in a low point. It is covered with trees.

FOULAHS. Sce Fellatahs.
FOULDEN, par. Eng. Norfolk; 3500 ac. Pop. 500.
FOULDEN, par. Scot. Berwick; 2 m. by 2 m . Pop. 393.
FOULE POINT, a seaport tn. Madagascar, N.E. coast, lat. $17^{\circ} 40^{\circ} \mathrm{S}$; lon. $49^{\circ} 37^{\prime} \mathrm{E}$.; it is advantageously situated for trade, of which it has a considerable share. There is a fort here of considerable strengtl, but inefficient in position, as troops can land out of its range. Bullocks and refreshments are to be obtained, and anchorage is formed by a large reef, which begins on the shore about $1 \frac{1}{2} \mathrm{~m}$. S. from the town, and extends nearly a mile N.E. by E.

FOULIS-Wester, par. Scot. Pertl; 10 m. by 7 m . Pop. 1609.

FOULMIRE, par. Eng. Cambridge; 2302 ac. Pop. 610.
FOULNESS, isl. and par. Eng. Essex; 8060 ac ; forming part of the delta of Crouch river. Pop. 674.

FOULSHAM, par. Eng. Norfolk; 3100 ac. Pop. 1048.
FOULTA, or Fulta, a large vil. Hindoostan, prov. Bengal, 22 m . S.S.W. Calcutta, 1. bank, Hooghly. It possesses a safe anchorage.

FOULWEATHER (CAPE), a promontory on the W. coast of N. America, U. States, Oregon ; lat. $44^{\circ} 48^{\prime} \mathrm{N}$. ; lon. $124^{\circ} 18^{\prime} \mathrm{W}$. (r.)

FOUNAI, a manufacturing and trading tn. Japan, isl. Kiu-siu, 125 m. E.N.E. Nagasaki.

FOUNING, a city, China, prov. Chihle, 12 m . from the Gulf of Pechelce, and 150 m . E. Peking.

FOURCHAMBAULT, a vil. France, dep. Nièvre, 5 m . from Nevers, r. bank, Loire, here crossed by a suspension bridge. There are extensive iron-smelting furnaces and forges, employing about 3000 workmen; and a church and school have also been erected.

FOURMIES, a vil. France, dep. Nord, 9 m . S.S.E. Avesnes, on the Petite-Helpe. It has manufactures of lace thread, lace, cotton, and woollen-spinnerics, carding-mills, a bleachfield, glass-house, and iron-forge. Pop. 1883.

FOURNI ISLANDS, a group of isls. Grecian Archipelago, E. coast, Asiatic Turkey, pash. Anadolia, between the islands Nicaria and Samos; lat. (S. extremity of the larger) $37^{\circ} 28^{\prime} 24^{\prime \prime}$ N.; lon. $26^{\circ} 31^{\prime} 15^{\prime \prime}$ E. (r.) St. Minas, or the grand Fourni, the principal one, is about 5 m . in circomference. The group comprises besides, the little Fourni or Fimena, and about 18 or 20 others, most of them long and narrow, and traversed by a ridge of mountains. The Fournis have obtained their namo from their presenting at a distance the appearance of ovens.

FOUSIYAMA, a mountain, Japari, isl. Niphon, prov. Sourouga, 66 m. S.W. Yedo, ncar the bay of Totomina. It is reckoned the lighest mountain in Japan, and its summit is covered with perpetual snow, which is sometines pierced by a thick smoke, of disgusting odour.

FOUTSITZ, a tn. Japan, isl. Niphon, prov. of Bingo, 105 m. N.E. Mouko.

FOUVENT-Le-Bas, a vil. France, dep. Haute-Saône, 16 m . from Gray. In its vicinity are three large grottoes, in one of which, M. Cuvier discovered, in 1800, the fossil bones of a great number of quadrupeds; and in 1827, on a second search, M. Thirria found relics of the rhinoceros, elephant, hyena, bear, horse, ox, and lion.

FOVANT, par. Eng. Wilts; 1990 ac. Pop. 620.
FOVEAUX, a strait, New Zealand, between the islands New Leinster and New Munster. Its S.E. entrance is about 25 m . wide; its N.W. about 18 m . Both entrances are crowded with small islands.

FOVERAN, par. Scot. Aberdeen; 4 m. by 2 m . P. 1620.
FOW, or FAUX, an isl. Indian Archipelago, Gillolo passage, about lat. $0^{\circ} 6^{\prime}$ S.; lon. $129^{\circ} 30^{\prime}$ E., separated from the W. shore of Geby by a narrow channel about $\frac{1}{4} \mathrm{~m}$. wide, which forms a safe harbour, with depths from 10 to 15 fathoms. It abounds with turtle and fish of various kinds. The natives have been found hospitable; they speak the Malay and Tidore languages.

FOWEY, an anc. seaport, bor., market tn., and par. England, co. Cornwall. The town, 22 m . E. by S. Plymouth; lat. (castle), $50^{\circ} 19^{\prime} 42^{\prime \prime} \mathrm{N}$. ; lon. $4^{\circ} 38^{\prime} 45^{\prime \prime} \mathrm{W}$. (R.), on r. bank, and at the mouth of the Fowey; has exceedingly narrow and irregular streets-the principal one extending nearly 1 m . along the banks of the river. It has a lofty, spacious church, with an ornamental tower, Wesleyan and Independent chapels, several schools, and an almshouse. The markethouse, over which is the townhall, is a spacions building. The harbour is commodious, and well secured by the high land on each side, though extremely narrow, being not more than a cable's length across. On the W. side stands St. Catherine's castle, and on the E. side are the ruins of St. Saviour, an old church. The former, which stands on a magnificent pile of rocks, was built in the reign of Henry VIII. In the channel, and opposite the town, there are three fathoms at low water. The principal exports are copper ore, of which many thousand tons are shipped annually, pilchards, china clay, and stone. The pilclard fishery and mining business are the principal supports of the population. Fowey was a place of great importance in the 13th and 14th centuries, having numerous ships, and a formidable name in the naval annals of the time. During the siege of Calais, under Edward III., it sent 47 vessels to that monarch's aid, being a greater number than was contributed by any other town in England. Market day, Saturday ; three annual fairs for cattle. Area of par. $1900 \mathrm{ac} . \mathrm{P} .(1851), 1452$.

FOWEY, a river, England, co. Cornwall, rising about 4 m . S.E. Camelford, and, after a course of about 30 m. S., then W., and lastly S., falling into the Euglish Channel, near Fowey. It is navigable to near Lostwithiel, 5 m . above Fowey.

## FOWLIS (EAster)

1015
FRANC.

FOWLIS (Easter), par. Scot. See Ifindy.
FOWNHOP'E, par. Eng. Hereford; 3870 ac . Pop. 1004.
FOX, a river, U. States, Wisconsin and Illinois, rising in the former, passing through a number of small lakes near the confines of the latter, and entering the Illinois at Ottawa.

FOX (Great and Litrle), two rivers, Lower Canada, within 2 m . of each other, and both falling into the Gulf of St. Lawrence, between Griffith's Cove and Little Vallée, on the N.E. side of the dist. of Gaspé.

FOXCOT'T, two pars. Eng.:-1, Bucks ; 740 ac. Pop. 119.-2, Hants; 620 ac. Pop. 44.

FOX'S CHANNEL, a strait, British N. America, stretching N., from the N.W. extremity of Hudson's Strait, having W. Melville Peninsula and Southampton Island, and E. an unexplored country.

FOXEARTII, par. Eng. Essex ; 1960 ac. Pop. 474.
FOXFORD, a market tn . Ireland, co. Mayo, on the Moy, 12 m. N.N.E. Castlebar. It contains the parish church, a R. Catholic ehapel, and two public schools; and has some trade in corn. Market day, Thursday; and several annual fairs, chicfly for cattle. It is noted for the longevity of its inhabitants. Pop. 680.

FOXHALL, par. Eng. Suffork; 1060 ac. Pop. 200.
FOXHOLES, par. Eng. York (E. Riding); 415 (ac. P. 349.
FOXLEY, two pars. Eng. :-1, Norfolk; 1840 ac . Pop. 293.-2, Wilts ; 850 ac. Pop. 70.

FOXTON, two pars. Eng. :-1, Cambridge; 1682 ac. Pop. 452.-2, Leieester; 2020 ac. Pop. 385.

FoY, par. Eng. Hereford; 2500 ac. Pop. 278.
FOY, scveral places, France, of which the principal are: -1, (-la-Grande, St.), [Latin, Fanum Sanctae Fidei], a tn., dep. Gironde, 40 m. E. Bordcaux, l. bank, Dordogne; with manufactures of woollen and cotton hosiery, and hempen eloth; tanneries and dye-works, and a trade in excellent white wines, brandy, and agricultural produce. Pop. 2883.?, (lcs-Lyon, St.), a large vil. and com. dcp. Rhone, 2 m . N.E. Lyons, near l. bank, Sâone. It is composed of several hamlets, has an elevated situation, and two annual fairs. Pop. 2905.-3, (Largentière, St.), a vil., dep. Rhone, about 18 m . W. Lyons. It gives its name to a small coal-field which is wrought in the vicinity; and has several annual fairs. Pop. 688.

FOYERS, a small river, Seotland, co. Inverness, which, after a course chiefly N., falls into Loch Ness, on the E. side, about half way between Fort Augustus and its N.E. extremity. It forms two romantic falls, the upper about 30 ft ., and the lower about 60 ft . high.

FOYLE, a river, Ireland, formed by various streams, which unite near Strabane, in co. Tyrone. Hence it flows N., past St. Jolnstown and Londonderry, below which, at the distance of about 4 m. , it falls into the inlet or arm of the sea, called Lough Foyle. It ia navigable for vessels of 800 tons, up to the city of Londonderry; but smaller vessels can now ascend to Strabane, 12 m . further up.

FOYRAN, par. Irel. Westmeath; 6256 ac. Pop. 2034.
FRAGA [anc. Gallia Flavia], a city, spain, Aragon, prov. of, and 48 m . S.E. by S. Hucsca, 14 m . W.S.W. Lerida, 1. bank, Cinca, crossed here by a wooden bridge of 20 arches. The prineipal streets are paved, but gencrally steep and narrow. Of its many squares, those of San Pedro and Obradores only are worthy of remark either for size or appearance. It has two parish churches - San Pedro and San sliguel; the former, a spacious, substantial, and ancient edifice, was formerly a mosque; three convents, two chapels, and a cemetery; a handsome modern townhouse, a prison, storehouse, Latin, and several primary schools. On an adjaeent hill stand the remains of a Roman fortress. Linen and woollen fabrics, hempen shoes, cutlery, wine, and oil are manufactured, and a small trade is done in cattle, grain, hemp, silk, fruits, \&c. It was an important place under the Moors and the kings of Aragon. P'op. 3648.

FRAGNITO, two places, Naples:-1, (L'Abbate), A vil. and com., prov. Prineipato Uitra, 19 m . W.N.W. Ariano. It contains three ehurehes, and two ammal fairs. Pop. 2075. -2, (Monforte, or Fragnitcllo), A little N.E. of the former, near r. bank. Tamaro. Pop. 2400.

FRAGUA, a river, New Granada, dep. Curdinanarca, prov. Neiva, which rises on the S.E. slope of the sierra de Pardaos, Hows S.E. to the confines of Eenador, and after a
course of abont 150 m . joins the Japura at Sotano, lat. $0^{\circ} 50^{\circ}$ N.; lon. $74^{\circ} 10^{\prime} \mathrm{W}$.

FRAlLES, a vil. Spain, Andalusia, prov. of, and 25 m . S.W. Jaen, 1. bank, Linarejos. It has a churel, townhouse, prison, two schools, a storehouse, and cemetery, with chapel attached. Manufaetures :-soap, linen, and hempen fabrics, brandy, \&c. Trade:-grain, cattle, brandy, wine, oil, fruits, and hardware. In the vicinity are some mineral springs. Pop. 2174.

FRAIN, or Frayn [Moravain, Wranow], a market tn. Austria, Moravia, circle of, and 10 m . W.N.W. Znaim, in the valley of the Thaya, picturesquely situated on a kind of peninsula formed by that river. It contains two churches, and a chapel, and has manufactures of wedgewood and other stoneware, two mills, a trade in cattle, and five annual fairs. On the right or opposite side of the river, on a lofty height, stands; a magnificent castle, with three towers, and a good library. Pop. 840.

FRAIPOINT, a vil. and com. Belgium, prov. of, and 9 m . S.E. Liége. It has manufactures of gun-barrels; numerons forges, and some rolling-mills, and establishments for preparing timned iron, a fulling mill, and two tanneries, some quarries, and kilns for preparing lime for agricultural purposes. Pop. 1058.

FRAISTHORPE, par. Eng. York (E. Riding); 2040 ac. Pop. 104.

FRAMFIELD, par. Eng. Sussex ; 6830 ac. Pop. 1434.
FRAMIERES, a vil. and com. Belgium, prov. Hainaut, abont 3 m. S.S.W. Mons; with manufatures of cordage; breweries, distilleries, corn and oil mills, lime-burning, and coal-mining. 「op. 9073.

FRAMINGHAM, two pars. Eng. Norfolk:-1, (Earl); 560 ae. Pop. 100.-2, (Pigut); 350 ac . Pop. 289.

FRAMLINGHAM, a tn. and par. England, co. Suffolk. The town, 14 m . N.N.E. Ipswieh, agreeably situated on an eminence, near the source of the Ore, contains many respectable and well built houses, with a spacious market-place in the centre. It has a stately parish church, built entirely of black flint, with a square tower 90 ft . high, a Presbyterian chureh, a Wesleyan Methodist, and places of worship for Independents and Unitarians, a free, and other sehools, with sets of almshouses. Here are the ruins of a magnificent old castle, supposed to have been erected by Redwald, King of the E. Angles. The walls are 44 ft . high, and 8 ft . thick, flanked with 13 square towers, 14 ft . higher than the ramparts. Area of par. 4470 ac. l'op. (1841), 2523.

FRAMINGHAM, a vil. and township U. States, Massachusetts. The vil. pleasantly situated 21 m . W.S.W. Boston; has several mills, and manufactorics of woollen stuffs and leather. Pop. (township), 3039.

FRAMMERSBACH, a tn. Bavaria, Lower Franconia, at the eonfluence of the Lohr, here crossed by a bridge, and the Labasbach. It contains a church, and ehapel, and iron, and several other mills, and a trade in paper and wood. Many of the inhabitants are carricrs. Pop. 2188.

FRAM1'TON, four pars. Eng.:-1, Dorset; 2080 ac. Pop. 391.-2, Lineoln ; 6200 ac. 1'op. 784.-Two in Cloueester, (1), (Cotterel); 1190 ac. Pop. 1991.-2, (-uponSevern); 2360 ae. Pop. 1051.

FRAMURA, a vil. and com. Sardinian States, division Genoa, prov. of, and 5 m . N.N.W. Levanto, on a hill near the sea. It contains a very ancient ehureh, of the composite order, three minor ehurches, and an old tower used as a belfry. The district is tertile in corn, wine, olives, chestnuts, and figs. Pop. 1113.

FRANC-Alev, a country of France, in the ancient prov. of Auvergne. Its capital was Scrmur.

FRANÇAISE (La), a th. and eom. France, dep. Tarn et Garonne, arrond. of, and 10 m . from Montauban. It has manufactories of earthenware; and five annual fairs, one of which lasts three days. Pop. 3912.

FRANCAS'TEL, a vil. France, dep. Oise, arrond. of, and 25 m . from Clermont. It stands on a commanding height, and was formerly surrounded by walls and ditches, of which only some vestiges remain. It has a well of extraordinary depth. Pop. 828.

FriNCA, or Villa Franca-do-Imperador, a tn. Brazil, prov. of, and 270 m . N.N.E. Saó F'aulo, r. bank, Mugi. It contains a parish clureh, and has manufaetures of woollen
hats, and woollen, and cotton cloth. It is the residence of a justice of peace.

FRANCAVILLA, six places, Naples:-1, A tn. prov. Otranto, 14 m . W.S.W. Brindisi, on a hill. It is well built, with straight and spacious streets; has a parish church, elaborately ornamented; a college, having handsome halls and galleries; three hospitals, a charitable asylum, a mont-de-piété, and several convents. It manufactures woollen stuffs, cotton stockings, earthenware, and snuff, with a considerable trade in wine, oil, and cotton. A great part of the town was destroyed by an eartlquake in 1734. Pop. 11,108.-2, A tn. prov. Abruzzo Citra, dist. and 8 m . N.E. Chieti, near the Adriatic. It contains a collegiate, and three other churches, two convents, and an almshouse, and has two annual fairs. Pop. 3373.-3, A vil. and com., prov. Basilicato, dist. and 26 m . E. Lagonegro. It contains two parish churches. Pop. 2403.-4, A vil. and com., prov. Calabria Citra, dist. and 10 m . E. Castrovillari. Pop. 1400.-5, A vil., prov. Calabria Ultra II., dist. and 13 m . S.S.W. Nicastro. Pop. 1601.-6, A tn. Sicily, dist. Castrorcale, near I. bank, Alcantara, 34 m . S.W. Messina. It has manufactories of silk and linen, and an establishment for bleaching wax. In the vicinity are mines of silver, copper, lead, and antimony. Pop. 4000.

FRANCE [Latin, Gallia or Francia; Italian and Spanish, Francia; Portuguese, França; German, Frankreich; Dutch, Frankryk; Danish, Frankrige; Swedish, Frankrike], a maritime country in the W. of Europe, forming one of its most extensive, most populous, and most influential States, inclnding under its sovereignty, in addition to France, properly so called and a few islands along its coast, the island of Corsica, in the Mediterranean, the colony of Algeria in the N., and several small settlements and factories on the W. coast of Africa; the islands of Bourbon, St. Paul, Amsterdam, St. Marie de Madagascar, Nosse-Bé, \&e., in the Indian Ocean; Pondicherry, and a few other settlements on the coast of Hindoostan; and in the W. hemisphere the West Indian islands of Martinique, Guadalonpe, St. Marie Galante, Petite Terre, Descada, and the N. part of St. Martin; the small islands of St. Pierre and Miquelon, off the coast of Newfoundland; and the large, but not well defined territory of French Guiana, in the N. of S. America. In addition to the above, some French geographers, founding on recent attempted scizures, include among the colonial possessions of France the groups of the Marquesas, and of Tahiti, in the Pacific Ocean. The following table presents an approximative estimate of the area, in sq. m., and of the population of the whole French possessions:-

|  | Area. | Population. |
| :---: | :---: | :---: |
| France, with Corsica. | 205,671 | 35,400,486 |
| Algeria.... | 142,825 | 2,078,037 |
| W. Africa. |  | 18,864 |
| Islands, Iudian Ocean, and E. Settlemerts....., | 1,357 | 309.789 |
| W. Indies............................................ | 1,114 | 249,014 |
| St. Pierre, \&c., N. America | 91 | 1,677 |
| S. America... | 30,897 | 380,622 |
| Total | 381,955 | 38,438,519 |

As the colonies and dependencies are separatcly described, under their own beads, only France proper, including Corsica, which has been completely incorporated with it, is here considered.

France is situated between lat $42^{\circ} 20^{\prime}$ and $51^{\circ} 5^{\prime} \mathrm{N}$; and lon. $4^{\circ} 50^{\prime} \mathrm{W}$. and $8^{\circ} 25^{\prime}$ E., and is bounded, N. by the German Ocean, and the Straits of Dover, N.W. the English Channel [French, La Manche], W. the Atlantic, more especially that part of it called the Bay of Biscay [French, Golf de Gascogne], S. Spain and the Mediterranean Sea, E. the Sardinian States, Switzerland, and Baden, and N.E. Rhenish Bavaria, Rhenish Prussia, Luxemburg, and Belgium. In tracing the contour of the space thus bounded, the projections and indentations which occur are so numerous, that it necessarily assumes the shape of a polygon composed of many unequal sides. The more marked and salient points, lowe ver, are only five, namely, the N., the W., the E., the S.W., and the S.E. extremities. By connecting these five points by straight lines, a pentagon is formed, which includes the whole of the French territory, and gives a good general idea of its shape, except on the E. side, where the line, joining the E. and S.E. extremitics, includes the whole of Savoy belonging to the Sar
dinian States, and also a considerable portion of Switzerland. The W. side also, to avoid including a large expanse of sea, must be made to assume much more the form of a curve than of a straight line. The longest lines which can be drawn across France are two diagonals, which intersect each other-the one, from the S.E. to the N.W. extremities, 670 m ., and the other, from the S.W. to the N.E. extremitics, 625 m . Measured on the meridian of Dunkirk, the greatest length is 600 m ., and measured on the parallel of $48^{\circ} 20^{\circ}$, the greatest breadth is 582 m . The breadth near the centre is 400 m ., and between the mouth of the Gironde and the frontiers of Savoy, where it is narrowest, does not exceed 330 m . The length of the coast line, withont allowing for minor indentations, is, along the German Ocean and English Channel, 559 m. ; along the Atlantic, 500 m .; and along the Mediterranean, $261 \mathrm{~m} .$, giving an aggregate of 1320 m . It is difficult to say what addition would be made by minutely tracing the bays and headlands; but the whole length may be safely estimated at not less than 1500 m . The continental boundary is formed on the S.W. by the Pyrenees, 250 m. ; on the E. by the Alps, 155 m. ; the Jura, $167 \mathrm{~m} . ;$ and the Rhine, 100 m. ; and on the N.E. by an arbitrary line of about 290 m. ; in all, 962 m. ; thus giving, in coast and mainland, a gencral perimeter of about 2462 m . The area is $205,671 \mathrm{sq}$. m. On taking a survey of this great country, it is impossible not to be struck with the advantages which it derives from its position. It not only forms a continuous and compact whole, but though united to the continent by a line of above 900 m ., is so much isolated from it by great natural boundaries, that the only direction in which it can be considered open to hostile attack is on the N.E., where a line of strong fortresses has made a barrier almost as impenetrable as those which, in other directions, have been provided by nature. Again, on the N. and W., a long line of coast gives it immediate access to the great ocean thoroughfares, while on the S. its harbours in the Mediterranean give it a commanding influence both in Africa and the East, and sccure to it a large share in the traffic of that most important of all inland seas.

Geographical Divisions.-France was originally possessed by a number of independent tribes, whose mutual enmities and jealousies precluding the possibility of a general union for the common safety, made them a comparatively easy couquest to the disciplined armies of Rome. Long before the arrival of Julius Cæsar, a considerable portion of the S.E. of France formed a Roman province, under the name of Gallia Transalpina. The remainder of the country is described by Cæsar under three principal divisions-one in the N., occupied by the Belgre a second in the S.W., occupied by the Aquitani; and the remainder ocenpied by Galli proper, or Celtæ. After the completion of the Roman conquest, these names in a great measure disappeared, and a division into four provinces took place. At a still later period, the names of the provinces were again changed, and their number was increased to 12. Without particularizing the whole, we may mention as of most frequent occurrence in history - Narbonensis Prima, and Secunda, in the S.; Lugdunensis Prima, Sceunda, Tertia, and Quarta, in the E. and the centre; and Aquitania Prima, and Secunda, in the S. and S.W. During the decline of the Roman empire, a number of German tribes had gained a footing in the country, and appeared to have formed a confederation under the designation of Franks or freemen; but when the empire fell, the victorious barbarians who had achieved it, Vandals, Huns, Suevians, Burgundians, \&c., appeared on the frontiers of Gaul, dcfeated the Franks, who attempted to oppose them, and finally formed permanent settlements. The Franks, though weakened, had not been subdued. Not contented with retaining their ground, they made new conquests, and at last succeeded both in giving their name to the country and founding the French monarchy in the person of their king, Clovis, towards the end of the fifth century. Were it practicable, it would scarcely be worth while to attempt to trace the various snbdivisions which the monarchy subsequently underwent. Suffice it to say, that not without numerous changes and interruptions of prosperity, it continued to advance, till, under Louis XIV., its extent became nearly the same as at present. The subdivision of the conntry into provinces had long been adopted, and was now completed-the number of provinces amounting to 33 . In 1789, when the love of change becaine paramount, the provinces were not permitted to escape;

## FRANCE

and the whole of France，including the island of Corsica，was parcelled out into 86 departments，and each department sub－ divided successively into arrondissements，cantons，and com－ munes．This division has since maintained its ground，and perhaps deserves it，because，instead of being merely an arti－ ficial nomenclature，it has the merit of being a kind of natural classification－each department being named after the most important physical feature which it contains；and thus fur－ nishing，in the name，some knowledge of the space which it designates．The provinces，however，though no longer re－ cognized in legal and other formal documents，continue so familiar to the French themselves，and are so frequently men－ tioned，not only by earlier writers，but in the geographical， historical，and statistical details even of the present day，that a knowledge of their locality is still of great importance．The first of the following Tables exhibits the old provinces in alphabetical order，and in parallel columns the departments corresponding to them，and their capital town；the second table，in like manner，shows the departments in alphabetical order，their area，population，\＆c．

Physical Features，Mountains．－The Alps in the E．，and the P＇yrences in the S．W．，connect the mountains of France with the most magnificent ranges of Europe；but only a few very lofty summits aro situated within the Freuch territory．

Of these，Mount Olan，on the borders of Savoy，is the cul－ minating point．Its height is $13,819 \mathrm{ft}$ ．At least two other summits in the same locality excced $13,000 \mathrm{ft}$ ．The chain of the I＇yrenees culminates near its centre，in Maladetta，which
has its highest peak in Spain; but the adjoining peak, Nethou, which nearly equals it, having a height of $11,165 \mathrm{ft}$., is in France. Several other summits on the French side of the Pyrenees exceed $10,000 \mathrm{ft}$. Both of these ranges throw out numerous branches; but they all subside rapidly as they recede from their central axis, and fall far short of the heights which have been already mentioned. The range next in importance is the Cevennes, the S. commencement of which has been placed somewhat arbitrarily in a depression where a lateral branch of the Pyrenees seems to terminate, and the Canal du Midi, connecting the Atlantic with the Mediterranean, has its summit level. From this point, called the Col de Narouze, the Cevennes proceed first in a N.E. direction as far as Mont Pilat, in the S.E. of dep. Lozere, and then N. to the Canal du Centre. Their whole length is about 360 m . The average height of the central ridge does not exceed 3000 ft ; but the loftiest summits are found not in it, but in its W. branches, where the culminating points occur in the Plomb de Cantal, 6200 ft ., and the Puy de Sancy, 6224 ft . Though the Cevennes are considered as terminating at the Canal du Centre, they only change their name at this point, and are continued N.E. under the name of Cote d'Or, to an elevated plain stretching longitudinally E. and W., and known by the name of the Plateau de Langres. At its E. extremity the chain of the Vosges commences in a ramification, called Monts Faucilles. The principal chain lies considerably E., commencing in the Ballon d'Alsace, in the N.E. of dep. Haute Saône, and stretching almost due N. along the W. of deps. Haut-Rhin and Bas-Rhin, into Germany. The whole length of this principal chain with France is about 95 m. ; but if to this we add the Faucilles, the Plateau de Langres, and the Cote d'Or, by which it is brought into connection with the Cevennes, we shall have a total length of about 270 m . The average height does not exceed 3000 ft .; and the most remarkable summits-the Ballon de Guebuiler, Haut de Honec, and the Ballon d'Alsace-are, respectively, 4695 ft ., 4391 ft ., and 4124 ft. A chain of heights stretching S., connects the chain of the Vosges with that of the Jura, which has an average height of about 3000 ft ., but subsiding rapidly as it recedes from the Alps, has none of its culminating points in France. Another low chain, continued from the Plateau de Langres, proceeds N.N.W., and forms two other ranges or plateaux, known by the names of Argonne and Ardennes. Their average elevation, under 1200 ft ., scarcely entitles them to a place among mountain ranges.
Hydrography.-The great watershed by which the whole of Europe is divided into two vast basins, the one of which sends its waters S. to the Mediterranean, the Black Sea, and the Caspian, and the other W. and N. to the Atlantic, North Sca, and the Baltic, passes in a waving line across France from S.W. to N.E., and divides it into two very nnequal portions. In France, this watershed commences at the W. extremity of the Pyrenees, and proceeds E. in the line of its central axis till it reaches the S.E. extremity of Ariege. Here it meets a branch thrown off at right angles from the principal chain, and proceeds with it N. to the Col de Narouze, already referred to as the summit level of the Canal du Midi. Its course is now determined by the Cevennes, with which it proceeds first, almost tortuously N.E., and then almost due N., crossing the Canal du Nord, and thereafter continuing with the Cote d'Or to the Plateau de Langres. Having crossed this plateau, the Monts Faucilles give it an E. direction as far as the Ballon d'Alsace, where, as if retracing its steps, it proceeds S.S.W. along the great wall of the Jura, and quits the French territory on reaching the slopes of the Jorat. The portion of France to the S. and E. of this great watershed is not equal to a fourth of its whole surface, and is almost wholly drained by the Rhone and its tributaries. The only secondary basins deserving of notice are those of the Tech, Tet, Gly, and Aude, which have their sources in the Pyrenees; and the Herault, which descends from the Cevennes. The far larger part of France, situated N. and W. of the great European watershed, contains, in addition to a number of secondary, four principal river basins-the Rhine, belonging to the N. Sea or German Ocean; the Seine, belonging to the English Channel, and the Loire and Garonne, both belonging to the Bay of Biscay. The first of these basins, though the largest of all, is developed to a very limited extent within the French territory. All the others are wholly French.

The more important secondary basins on this side of the great watershed, are those of the Somme and the Orne, belonging to the English Channel; and the Vilaine, Sévre Niortaise, Charente, and Adour, belonging to the Bay of Biscay. The lengths of the principal rivers, and the area of their basins, are exhibited in the following Tables :-

The lakes are so few in number, and individually so limited in extent, as to be undeserving of separate notice. The largest, Grand-Lieu, in dep. Loire-Inferieure, covers an area of only $29 \mathrm{sq} . \mathrm{m}$., and is altogether devoid of interest. The next largest, St. Point, in the Jura, does not cover $3 \mathrm{sq} . \mathrm{m}$. Others, of atill less dimensions, become more interesting from their localities in the lofty regions of the Pyrenees, or in the deep hollows of ancient craters in Auvergne.

Geology.-As might be anticipated, from the extent of space which it occupies, France possesses all the geological formations, in a greater or less degree of development. The mountains generally have a nucleus of granite, which accordingly forms a prevailing rock in the Alps, on the E. frontier, and their branches S . to the shores of the Mediterranean, in the Pyrenees, the Cevennes, and the elevated plateau of Langres. In the Vosges, it is more sparingly developed, its place being often occupied by porphyry; and in the Jura, where limestone occurs in such enormous masses as to have given its name to a peculiar formation, it does not appear at all in situ; but, on the other hand, almost the whole of the extensive peninsula, including the old province of Brittany, and part of those of Normandy and Poitou, is covered by it. The other crystalline rocks, consisting chiefly of trachytes and basalts, have received a magnificent development in Auvergne, where whole mountains are composed of them, and where the effects of remote volcanic agency are still presented to the eye in extinct craters and lava streams. The granite is overlain by primitive stratified rocks of gneiss, and of micaceous and argillaceous slates, succeeded, particularly in the Pyrenees, by mountain limestone, which there assumes a form worthy of the name, and is found on Mont Perdu, full of its characteristic fossil shells, at the height of $10,230 \mathrm{ft}$. above the level of the sea. The secondary formation, commencing with this limestone, and continued in ascending series up to the chalk, always possesses peculiar interest, because, within it valuable mines of lead and iron, and all the workable seams of coal, are included. It is largely developed in many parts of France, and furnishes a considerable number of coal and mineral fields, to which more particular reference will afterwards be made. The tertiary formation, including all the limestones, sands, and clays, above the chalk, occurs continuously in two great divisions, and partially, in a number of isolated spots, and covers a vast extent of surface. The larger continuous division is in the S.W., where it commences at the foot of the Pyrences, and
occnpies a very large portion of the basins of the Garcune and of the Adour. The lesser, but better known division, takes the name of the Paris basin, and has been made familiar to the scientific world by the labours of Cuvier and other distinguished naturalists. It occupies a large extent of space around Paris, and stretches S . into the valley of the Loire. A considerable stretch of the same formation is found in the basin of the Rhone, particularly along the E. bank both of that river and its tributary, Saone. Of more recent alluvial formations, the only one particularly deserving of notice is the delta of the Rhone.

Climate.-France extends over more than $8^{\circ}$ of latitude, presents a coast of many hundred miles, partly to the ocean, and partly to an inland sea ; and is composed, in its interior, of lofty mountain ranges, elevated plateaux, undulating slopes, and low, level plains. All these circumstances make it obvious, that its climate must be greatly diversified, and cannot be described accurately, without dividing it into different regions. But, before mentioning these, it may be proper to observe, in general, that no country in Europe can boast of a climate superior to that of France. With a very limited exception, it lies wholly within the more moderate portion of the temperate zone, between the isothermal lines of $50^{\circ}$ and $60^{\circ}$; and, consequently, with a mean annual temperature, the difference of whieh, at its N. and S. extremities, does not exceed $10^{\circ}$. The elimatorial regions to which reference has been made, could not be determined with accuracy, without a long series of observations, continued simultancously, for years, over the whole country, for the purpose of ascertaining the extremes and fluctuations of temperature ; the direction, force, and prevalence of winds, and the quantity and frequency of rain; but a method of far more easy attainment, and sufficiently accurate for ordinary purposes, is furnished by the peculiar vegetable products which different districts are able to mature. Four distinet regions are thus obtained. Within the first, and warmest, the olive is successfully eultivated. It forms the S.E. part of France, and is chiefly confined to the departments whieh border on the Mediterranean. The second region is characterized by the general eultivation of maize or Indian corn. Its N . limit is determined by a line drawn diagonally in a E.N.E. direction, from dep. Gironde, to dep. BasRhin. The third region reaches $N$. to the extreme limit of the profitable culture of the vine, and may be considered as deterinined by a line stretching between the mouth of the Loire and the town of Mezieres in dep. Ardennes. All the country beyond this line is included in the fourth region. All of these regions, notwithstanding their diversities of temperature, are generally liealthy. In the N.W., the prevalence of winds from that direction often produces a superfluity of moisture, which manifests itself in mists, or in frequent and havy showers of rain. At the opposite extremity, the S.E., a contrary effect is produced, and a sultry, stiflling wind wrinkles up the skin, and not unfrequently spreads fever in its most malignant form. But it is only to a few exceptional districts that these remarks apply. After allowing for them, more than four-fifths of the surface reinains, under an atmosphere remarkable, more especially in its central districta, for salubrity, serenity, and brightness.

Vegetation and Agriculture.- In the variety of its vegetable products, France surpasses all the other countrics of Europe. The number of its plants, either indigenous or completely naturalized, has been estimated at rather more than 7000 . One-half of these belong to the cryptogamous class, composed chiefly of ferns, lichens, and funguses, and for the most part devoid of economical value; but the phenogamous class, including all flowering plants, and among them all which furnish products essential to the existence and comfort of man, contains 3540 species; while Germany has only 2280; England, 1370; and Prussia, 1079. Of course, the far greater part of these are interesting only to the botanist; and many others, though possessed of a value which makes the preservation and propagation of them an object of national importance, are by their very nature excluded from a course of regular culture. Existing in natural forests, they perpetnate themselves by throwing off shoots from the parent stems or by shedding their sced, and, when formed into regular plantations, they grow up with little care, and continue in vigour for centuries. In these natural and artifieial forests, Franee is well supplied, and finds an important source of wealth. They extend over
about one-seventh of the whole surface, and are the more valuable from usually occupying ground which could not in any other way have been trirned to good account. Their principal localities are the Ardennes, Vosges, and Plateau de Langres, in the N.E.; the Jura in the E., and the Cevennes, particularly the mountains of Auvergne, in the centre. The two loftiest of the Freneh mountain-ranges, the Alps and the Pyrenees, are comparatively poor in wood. Isolated forests exist in various other quarters, as at Compiegne, VillersCoterêts, Hallate, Chantilly, Fontainebleau, the mouth of the Seine, and in the Landes, along the Bay of Biscay. In the last locality, a forest of sea pine, about 100 m . long by 7 m . broad, has been formed, and not only furnishes good timber and large quantities of rosin and other vegetable products, but serves the important purpose of protecting a large tract of territory from clouds and whirlwinds of sand, which must soon have converted it into a desert. The other localities in which the pine prevails are the Vosges and the Jura, where the principal species is the common fir (Pinus Abies), and the loftier Alps, where it is the larch (Pinus Larix). In the other forests the prevailing trees are the oak and the elm. Where artifieial plantations have been formed, one tree to which a just precedence has been given is the ehestnut, equally valuable for the food and the timber whieh it furnishes. Another tree, perhaps of more importance than any other, but ehiefly confined by the degree of warmth which it requires to the S. of France, is the mulberry, on which the most celebrated branch of national industry is founded. From the constant attention given to it, its management might be considered as forming part of the general agriculture of the country. It is cultivated on the most extensive scale in departments Gard, Vaucluse, and Basses-Alpes, and more partially in departments Var, Bouches-du-Rhône, Drome, Ardèche, and Lozère. The number of mulberry trees in France has been estimated at $5,760,000$. Another tree of great economical importance, and once so extensively cultivated as to define one of the climatorial regions into which the country has been divided, is the olive. A severe winter, in 1789, having destroyed or seriously damaged a vast number of the trees, the cultivation has lost much of the favour with which it was previously regarded. In some distriets, particularly along the shores of the Mediterranean, it maintains its ground, but in general both the quantity and quality of the produce are defective. The best oil comes from the plain of Salon, in the neighbourhood of Aix, department Bouches-tu-Rhône. Among the other trees and shrubs which form ohjects of culture in the olive region, may be mentioned the orange, lemon, pistachio, and caper. To the $N$. of it, the more important orchard fruit is the plum, which, in the midland distriets, produces fruit of the finest quality, and when dried, forms an important artiele of export. Still further N. where the vine begins to fail, its place is supplied, on an extensive seale, by the apple and pear, particularly in Normandy, where their fermented juice furnishes the general beverage. Besides the large portion of France occupied by forest timber, and trees valuable for their leaves and fruits, another portion, nearly of equal extent, since estimated also at about one-seventh, is either absolutely waste or so rugged, moorish, sandy, and marshy, as to be properly claszed with waste. The remainder, subject to some minor deductions, of which the most important is the space occupied by buildings and roads, is the cultivable land. Of this, a quantity equal to one-half of the whole French territory is nnder the plough, $1_{1}^{1}$ in permanent meadow, and $\frac{1}{2} 5$ in vineyards. To secure the produetiveness of the land thus occupied, it has been seen that nothing is wanting to the climate. The soil presents all imaginable varieties-rich alluvium, vegetable loam, calcareous earth, tenacious elay, hungry gravel, and sand. Taken as a whole, however, it is of at least medium fertility, and in many districts possesses a fertility which camnot easily be surpassed. In regard to the management of arable land, the French cannot claim much praise. While everything else has been undergoing rapid change, the system of agriculture has remained almost stationary. Owing to many causes, the quantity of land taken into cultivation has been enlarged, and the annual produce has inereased, but it is very donbtful if this increase has been obtained by improved modes of agriculture. On the contrary, the most antiquated routine continuea to be followed, the implements used are generally of an inferior description, and the large farming

## FRANCE

establishments for which our own country is distinguished, and in which all the improvements which science and art can furnish to maintain the fertility of the soil, increase the quantity, and improve the quality of its produce, are here even of much rarer occurrence than on many other parts of the continent. One great cause of this state of matters is the almost endless subdivision of property, which necessarily results from the French law of succession, by which all children inherit equally. In consequence of this, the death of every father operates like a new subdivision of whatever land he may have died possessed of, and the whole country is in course of being broken down into innumerable patches, too small to deserve the name of farms, or to require either the exercise of skill or the expenditure of capital in the management of them. According to Balbi, France is possessed by nearly 11 millions of proprietors, liable to direct taxation. This gives to each an average holding of only 5 acres of arable land. But to show that the limit of subdivision is not yet attained, Balbi adds, that 'as a very great proportion of these proprietors are fathers, whose children are not yet in possession of the shares which must fall to them, and as they all have heirs more immediate or more remote, we must necessarily expect to see property partitioned still more and more.' Be the merits of this arrangement, morally and politically, what they may, it is evidently incompatible not only with an enlightened, but with anything that can properly be called a general system of agriculture. Still the aggregate amount of produce raised in such circumstances must be very great. The millions who depend entirely on the land for their subsistence, are in a manner necessitated to tax its powers to the utmost; and, accordingly, the result of their labours, when drawn up in a tabular form, presents, at least to the eye, a most imposing appearance. As in all countries situated within the milder portion of the temperate zone, the ordinary cereals form the great bulk of the cultivated crops. In France these, in the order of their importance, are wheat, oats, rye, and barley; the average annual value of each of which is estimated respectively at $£ 44,030,722, £ 12,000,458, £ 11,851,709$, and $\mathfrak{£ 5}, 104,896$, giving an annual aggregate of gross produce, amounting in value to $£ 72,987,785$. The crops next in importance to these are meslin or mixed corn (meteil), potatoes, hemp, rape, maize, buckwheat, flax, and beet. The most valuable crops of which the cultivation on a great scale is not general, but confined to particular districts, are madder, tobacco, saffron, and hops. In France, the grass is on a much more limited scale than the arable husbandry, the land in permanent meadow being in extent only one-sixth of that under the plough. This contrasts strikingly with England, where the grass land exceeds the arable. The obvious inference from this is that the consumption of animal food and dairy produce, owing partly, it may be, to a want of inclination for them, but much more probably to a want of ability to purchase them, is very much restricted. Of course, it is not to be expected that where the demand is deficient, the means of supplying it are very perfect. Hence the breeding of stock, notwithstanding the stimulus afforded by the establishment of numerons societies, general and local, for its encouragement, is, if not imperfectly understood, very indifferently practised. The races of oxen, instead of being confined to a few of the more perfect types, are almost as various as the different districts into which the country is divided, and include a few good breeds, particularly in the rich plains of Lower Normandy, with many more of the most inferior description. The rearing of sheep is more successful, and though the improvement of the carcase, by imparting to it the best feeding properties, continues to be too much overlooked, the flecce has in many districts been carefully and skilfully improved, and much wool, scarcely inferior to that of the merino, is raised. The general employment of cattle for agricultural purposes, gives little encouragement to the rearing of draught horses; but the warlike propensities of the nation has always created an extensive demand for horses of a description adapted both for heavy and light cavalry. Considerable pains have been taken to improve such breeds, by the establishment of government studs, and the rearing of them is extensively and successfully carried on. Asses and mules, generally of a superior description, are much used in France, and also reared in considerable numbers for exportation. One of the most important branches of French agriculture still remains to be noticed. As already
mentioned, the quantity of land in vineyarils is about $\frac{\pi}{2}^{1} \mathrm{~g}$ of the whole surface; but, as there are extensive and continuous districts where there are no vineyards, the proportion which vine land, on the districts properly adapted to it, bears to the whole land under cultivation, attains a much higher ratio. In everything relating to this branch of culture the French are unsurpassed. The various first class wines which they produce, under the names of Champagne, Burgundy, Bordeaux, \&c., are in high repute, and general demand all over Europe. The vineyards produce annually about $7,706,961$ pipes wine, valued at $£ 10,761,165$, and 228,129 pipes brandy, valued at $£ 2,362,366$, giving an aggregate value of $£ 13,123,531$. The comparative value of land under the vine, and of land under the ordinary cereals, is thus placed in a clear light. It has been seen above, that the annual produce of the four most important cereals, occupying at least one-fourth of the whole surface, is 72 millions sterling; that of the vine, occupying only $\frac{1}{25}$ of the surface, is 13 millions. According to the proportion of land occupied, the vine produce should only be about $11 \frac{1}{2}$ millions. In other words, the produce of land under the vine is nearly one-eighth more than its produce in grain. It ouglit to be added, that much of the land from which this superior produce is obtained, consists of rocky steeps and terraces, on which corn could not be grown.

Mines.-The coal fields of France are so numerous that coal pits exist in no fewer than 33 departments; but most of these are so limited in extent, that, while the proportion of the whole surface occupied by workable seams is in Great Britain $\frac{1}{10}$, and in Belgium $\frac{1}{2} \frac{1}{2}$, in France it does not exceed T10. Several of the smaller fields occur in the N.W., and also in the S ., where, besides common coal, both anthracite and lignite are also found; but the fields whose importance entitle them to particular notice are only two-that of Valenciennes, in the N.E., forming the W. extremity of the great Belgian coal field, and that of St. Etienne, to which the manufactures of that town, Lyons, and the surrounding districts, are indebted for much of their prosperity. The annual output is about $4,150,000$ tons, but falls so far short of the annual consumption, that a large import takes place from England and Belgium, particularly the latter, and wood continues to be the common fuel throughout France, at least for domestic purposes. The coal fields contain seams of iron, which are extensively worked, and furnish ore to a great number of blast furnaces; but the chief supply to these works appears to be derived, not from them, but partly from allivial beds, in which the ore occurs in the form of balls, especially in deps. Ardennes, Moselle, Haute - Marne, Haute - Saône, Nièvre, Cher, \&c., partly from seams occurring in profusion among the strata of the Jura limestone, particularly on the W. slope of that mountain chain, and partly from veins of iron diffused among the crystalline and primitive rocks, chiefly of the Alps, Pyrenees, and Vosges. The number of mines actually worked is about 2000 , and the quantity of foundry pig annually produced exceeds a million of tons. Few countries are understood to be so rich in lead as France. It occurs in greater or less quantity in a great number of districts, and is generally argentlferous. It would seem, however, that the richness of the seams is not in proportion to their number, as the working of it is confined to three particular spots-Poullaouen and Huelgoat, dep. Finistère; Vialas, dep. Lozère; and Pontgibaud, dep. Puy de Dôme. The prodnce in silver is about 3000 lbs., in lead 26,280 tons, and in litharge 33,970 tons. Manganese is very widely diffused, but is worked only by 12 mines, of which the most important is that of Romaneche, dep. Saône-et-Loire. The average annual produce is about 2800 tons. Gold exists both in the sands of rivers and in situ in thin streaks embedded in quartz. Attempts have been made to work it, but not with success. A vein of quicksilver was opened about the middle of the last century, and was worked successfully for twelve years, and then abandoned. Zinc, copper, arsenic, nickel, and cobalt exist, but not in such quantities as to be workable to profit. The principal saline substances are alum and common salt. The former occurs extensively in bituminous schists abounding with iron pyrites, and is worked in seven departments; the latter occurs in the form of rock salt, both in the N.E. departments and in the Pyrenees, and is worked to the average extent annually of about 43,000 tons. But the great sources from which salt is derived are the lagoons and salt marshes, which

## FRANCE

line many parts of the coast; of these the produce is about 300,000 tons. A large revenue is also derived from quarries. They are classified under the heads of polished or worked stones, including the granites of Finistere, the marbles of the Pyrenées, Mayenne, and the Ardennes; the lithographie stones of Chateauroux, the millstones of Ferte-sous-Jouarre and Bergerac, and the once valnable, but now almost forgotten gun-flints of Loire-et-Cher; building stones, including the granites of the N.W. peninsula, the lavas of Puy de Dôme, the calcareous rocks of the Jura formation, and the sandstones of the Paris basin; plaster or gypsum, also abounding in the same basin; limestone, diffused over many districts; and roofing slates, extensively quarried at many points, and more especially in the Ardennes and at Angers. To quarrics may be added valuable beds of cominon clay, fine potters' earth, and kaolin. The number of quarries and beds from which all these materials are extracted exceeds 20,000 , and the value of their gross annual produce has been estimated at £1,600,000.

Manufactures.-Owing to the remarkable sub-division of property, to which reference has already been made, the agricultural outnumbers the manufacturing population of France, in the proportion of 5 to 1, and hence the value of the produce of manufactures, on which only one-fifth of the population are employed, cannot be expected to be comparatively as great as that of such a country as England, where the relative proportions of the two great classes of population are nearly reversed. In these circumstances, the important position which France holds in regard to all the great branches of manufacturing industry, and the decided lead which it takes, at least, in one of them, is extremely creditable, and bears strong testimony both to the industry and ingenuity of its inhabitants. The most important tissue is silk, which, in a great variety of forms, plain and figured, has its principal
loeality at Lyons, and the towns of the surrounding districts, partieularly St. Etienne, and is also successfully manufactured, though to an inferior extent, at Paris, Nimes, Avignon, Annonay, and Tours. After it, though at a considerable distance, follow cotton stuffs, pure and mixed, at Rouen, St. Quentin, Troyes, Lille, \&c.; woollens, including broad-cloths, at Louviers, Elbeuf, Sedan, Carcassone, Abbeville, \&e.; lighter woollen stuffs at Rheims, Amiens, and leauvais; carpets at Paris, Aubusson, Felletin, and $\Lambda$ bbeville; and tapestry at Paris and Beauvais; linens, including fine muslin, gauze, and lace, at Valenciennes, Courtray, St. Quentin, Alençon, Caen, \&c.; porcelain at Sèvres, Paris, Limoges, and Bayeux; stoneware at Nevers, Monterau, \&c.; and common pottery at Sarreguemines and Meillonas; beet-root sugar, chiefly in dep. Nord; leather, and the various articles made of it, including gloves; paper, plain and stained; hats, hosiery, steel, iron, brass and zinc ware, plate and flint glass, \&c. Besides these, a great number of articles, in which skill, taste, and ingenuity are more especially required, have their common seat in the capital. Among others may be mentioned all articles of vertù, jewellery, clocks and watches, surgical and mathematical instruments, carriages, works in ivory, types, books, and engravings.

Trade and Commerce.-This is usually divided into internal and external. The former is unquestionably the larger of the two, but its amount cannot be ascertained with any degree of exactness. The principal towns of the interior, constituting the centres from which it emanates, are Paris, Lyons, Rouen, Lille, Strasburg, Toulouse, Nimes, Nancy, and Perpignan. The external trade, in so far at least as it is legitimate, is exactly ascertained, as it stood prior to the recent revolution, by the customhouse entries, and is exhibited at single view in the following table of imports and exports it 1846. The amounts given are official values:-

The following table of the gross exports and imports, the year of the abdication of Louis Philippe, and the two ycars thereafter, forms an excellent practical commentary on the commercial value of a revolution. The column of official values, which will compare with the preceding table, is stated in round numbers:-

Total Imports and Exports, 1848-1850.

|  | Infonte |  | Fxponts. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Real value. | Ofirial value. | Real valu | Official |
| 1848 | £18,9\%(1),390 | £34,440,000. | £ $29,599,788$ | £46,120,000 |
|  | 28,964,759 | 45.f80,000.. | 37,5i7,9×3 | 56,880,000 |
| 1850. | 31,626,665 | 46,960,000 | 42,724, 567 | 61,240,000 |

The mercantile ports at whiel this important trade is carried on line the Channel and Atlantic sea-bords, and the Mediterranean shore. On the Channel, the principal ports are Dunkirk, Calais, Boulogne, Dieppe, Le Ilavre, St. Malo, and Cherbourg; on the Atlantic, or on the rivers flowing into it, Brest, Nantes, La Rochelle, and Bordcaux ; and on the Mediterranean, Cette, Marseilles, and Toulon. Nearly double the number of vessels enter at, and clear from Marseilles, that do from any of the other ports; still the balance of trade is greatly in favour of the Atlantic and Channel ports, the former having rather over one-third, the latter rather under two-thirds of the whole trade. The total amount of mereantile tomnage and shipping arriving
at, and departing from, the ports of France is given below, showing how this department of commerce stood prior to the revolution, and for nearly two years after it:-
The Number and Tonnage of Sailingand Steam Vesseles, French and Foreign, which Entrred and Cleared at Ports in France, rith Cargoes and in Ballast, in the years 1843-1849.

|  | Entered. |  | Cleared. |  |

| 1849. | 15,323 | 1,890,660 | 13,857 | 1,483.919 |

As intimately connected with all the industrial interests of the country, it will here be proper to advert to its

Means of Internal Communication.-These include rivers, canals, roads, and railways. The names of the principal rivers, and the length of their course, having been already mentioned, it seems necessary only to add, that though they are well situated as to the interior, traversing it in opposite directions, and furnishing direct means of transit N., S., and W., they are not in general easily navigated. Their currents are often so rapid, that artificial means must be employed to make head against the stream; their channels in many places so shallow, that vessels of large burden cannot float upon them; and their mouths frequently encumbered with shifting sandbanks, which make their entrance narrow and unsafe. Much has been done to lessen these evils, but they have not by any means been completely overcome. The canals are numerous, and, both in the directions which have been given to them, and in their general construction, furnish signal displays of engineering skill. The object has heen to connect all the great river basins, and give a continuous communication throughout the interior, and from sea to sea. Thus the canal Du Midi, or, as it is sometimes called, the canal of Languedoc, starting from a point in the Garonne a little below Toulouse, is continued, in an E.S.E. direction, into the lagoon of Thau, and thereby gives a continued navigable communication between the Atlantic and the Mediterranean, in the line of the important towns of Bordeaux, Agen, Toulouse, Carcassone, and Narbonne. In like manner, three separate canals cut across the basin of the Rhone; the canal Du Centre, or of Charollais, which commences at Chalons-sur-Saône, and proceeds to Digoin, on the Loire; the Rhone and Rhine canal, so called from uniting these two rivers, partly by the intervention of the Doubs; and the canal of Burgogne, which, proceeding also from the Saône, conmunicates with the Yonne, and through it with the Seine. The effect of these three canals is to break down the barriers which isolate the basins of the Rhone, Loire, Seine, and Rhine, and give navigable access from any one of them into the other three. The longest of all the carals, but only partially executed, is that which is to unite Nantes with Brest. Its commercial importance is not very apparent, as the natural mode of proceeding from one port to another must be to sail over the ocean which flows continuously between them. The chief use contemplated is probably to keep open an important channel of communication in time of war, when it might otherwise be effectually closed by British cruisers. It is unnecessary to particularize the other canals. The whole which France possesses, either completed or in course of completion, are 86 in number, and have a united length of 2350 m . The roads of France are usually classified under the heads of Great Roads (routes royales) and Department Roads. The former, 26 in number, have a length of $24,900 \mathrm{~m}$. ; the latter, 97 in number, a length of $22,500 \mathrm{~m}$. Besides these, there are a great number of country or bye-roads (chemins vicinaux), the length of which is unknown. But the roads which now constitute the only true thoroughfares, and to which, in describing a country, it is of particular importance to attend, because they furnish one of the best tests for determining its comparative wealth and prosperity, are railways. In regard to these, France las hitherto been much greater in promise than in fulfilment, if the comparison be made with England, or with Belgium and the N. German states. Taking Paris as the centre, a main trunk proceeds N. to Amiens, where it forks off into two branches, one of which proceeds
N. to the coast, at Boulogne, and the other N.E., past Lille, into Belgium. A branch from Lille, turning W., ultimately throws off two branches, one of which proceeds to Calais, and another to Dunkirk. Starting again from Paris, a line proceeds W.N.W, kecping close to the banks of the Seine, till it reaches Rouen, when it forks, sending one branch $N$. to Dieppe, and the other W. to Havre. Thus the traveller from England to France has the choice of five different termini on the coast-Dunkirk, Calais, Boulogne, Dieppe, and Havre. The next great trunk from Paris proceeds, with very little deviation, E. to Strasburg, and then, almost due S., through the left valley of the Rhine, to Basel. Another great trunk, proceeding S., forks soon after quitting Paris; one branch takes a S.E. course, first to Dijon, and thence to Chalons, where, for the present, it terminates; the other branch continues S. to Orleans. Here it again forks, and sends off two important lines, one, S.S.E., to Bourges and Nevers, and the other, S.W., to Tours. From Tours a branch goes W.S.W. to Nantes, and another S. for Bordeaux, though, as yet, not completed beyond Poitiers. From Bordeaux, it is intended to carry it along the Garonne, and, nearly in the line of the camal Dn Midi, to the Mediterranean. The only line not comnected with Paris is at the S.E. extremity of the country. It commences at Marseilles, and proceeds circuitously N.E. to Avignon, from which it is to be carried almost due N., to meet the Paris trunk line, which has been completed to Chalons, and is proceeding S. A branch of the Marseilles line leaves it at Beaucaire, and is carried W. to Nimes, where it forks, sending a small branch N. to Alais, while the main line proceeds S.W. past Montpellier, to the port of Cette. These lines include all the railways yet completed in France, with exception of a few very secondary branches. The aggregate length of the completed lines is (1851) 2067 m ., besides which, numerous additional lines are in progress and projected.

Weights, Measures, and Monies.-These are arranged by the French in a strictly decimal system, which, as at present in use, was established in 1795. It is founded on the measurement of the quadrant of the meridian; the metre, or the tenmillionth part of which, was assumed as the unit of length, all other lineal measurcs being multiples or sub-multiples of it, in decimal proportion. In order to express the decimal proportion, the following prefixes to the units of weights and measures have been adopted, in which the terms for multiplying are Greek, and those for dividing are Latin.

For multipliers, the word deca, prefixed to the unit, means 10 times, as decametre $=10$ metres; hecto, prefixed, means 100 times, as hectolitre $=100$ litres; kilo means 1000 times, as kilometre $=1000$ metres; and myria, 10,000 times, as myriametre $=10,000$ metres. On the contrary, for divisors, the word deci, prefixed, means a 10th part; as decimetre $=$ the 10 th of a metre; decilitre $=10$ th of a litre; centi means 100 th, as centimetre $=$ the 100 th of a metre; centime $=$ the 100th of a franc ; milli means 1000th part, as millimetre $=$ the 1000 th of a metre.

The units of the various weights, measures, \&c., are here subjoined, with their equivalents in the weights and measures of this country; a few others of those most commonly met with in general literature have been added :-

Unit. English.
Lineal.......Metre $=39 \cdot 371$ inches. Kilometre $=1093 \cdot 6389$ yards.
Square.....Are $=119.604 \mathrm{sq}$. yards, being a square decanietre. Hectare $=2 \cdot 471 \mathrm{ac}$.
Capacity...Litre $=61 \cdot 028$ cullic inches. Hectolitre $=22 \cdot 009$ gallons. Solid........Stere $=35 \cdot 3174$ cubic feet, heing a cubic metre.
Weight... Gramme $=15 \cdot 432$ Troy grains. Kilogramme $=2 \cdot 204$ lbs. avoir. Money .....Franc $=9 \frac{12}{d} d$ sterling, and a fraction. 5 francs $=4 s ; 25$ francs $=20 s$. , in ordinary calculations; but of course the actual value rises and falls with the exchange. The divisor of the franc is the centime or 100th part. Accounts are kept exclusively in francs and centimes.
Other measures, frequently met with, are the Paris foot ( pied du roi),$=12.7893 \mathrm{in}$. ; the toise, $=6.395$ English ft.; and the toise usuelle,$=$ two metres $=78.74 \mathrm{in}$. The metrical quintal $=100$ kilogrammes,$=220.4$ lbs. avoir.

Government.-The sudden and extraordinary changes which have recently startled Europe, make it impossible at present to class France under any of the heads to which it has hitherto been supposed that all governments might be reduced. It still

## FRANCE

1023
FRANCE
(Jan. 1852) purports to be a Republic, with a President as its head, though little of the real freedom of a Republic remains. On Jan. 14, 1852, a draught of a Constitution was promulgated, in which it is stated,-'the Constitution readmits, confirms, and guarantees the great principles proclaimed in 1789, and which are the bases of the public right of the French. The Government of the French Republic is confided for ten years to Prince Louis Napoleon Bonaparte, the present President of the Republic. The President of the Republic governs by means of Ministers, the Council of State, the Senate, and the Legislative Body. The legislative power is exercised collectively by the President of the Republic, the Senate, and the Legislative Body.' The Senate is appointed by the President, and for life ; its total number is not to exceed 150 , of which number it is proposed to appoint 80 at the outset, leaving the others to be added as occasion may demand. Their services are gratuitous; but the President may grant any of them 30,000 francs ( $£ 1200$ ) a year. The legislative body is elected by the people, by universal suffrage, in the proportion of a representative to every 35,000 electors. The legislative body discusses and votes proposed laws and imposts which have been previously sanctioned by the Senate, but has no power to make amendments. Though professedly a representative form of government, based on universal suffrage, it is perfectly evident that the President virtually retains the whole power in his own hands. What may be the success of the practical working of the new constitution, time alone can determine; but as only the minutes of the House of Representatives, and not its discussions, are to be made public, and as the liberty of the press has been completely suppressed, the people generally will only be able to judge of it by its effects on themselves. Meanwhilo we may notice those great departments of government which are not immediately affected by changes in its form. These may be included under the heads of the Administration of Justice, General and Religions Instruction, the Army, the Navy, and Finance.

Administration of Justice.-In accordance with the general arrangement, which divides the whole country into departments, each department iuto arrondissements, and each arrondissement into cantons, and each canton into communes-a series of eourts and judges, commencing with the lowest of these divisions, rise above each other in regular order. First, each commune has a justice of peace (juge de paix), who judges in petty causes; but whose more appropriate function is understood to be to act as a kind of umpire between parties at variance, and induce them to settle their differences without proceeding to formal litigation. If the attempt at conciliation fails, the complainant brings his action before a court which, from being that in which the action must originate, receives the name of court of primary or first jurisdiction, or resort (tribunal dc premiere instance). Every arrondissement has such a court, and has, moreover, if any more important trading town is situated within it, a tribunal de commerce, to which mercantile and commercial causes are appropriated. It has also, occasionally, a court, called conseil de prud'hommes, in which persons of skill and character, not vested with ordinary legal functions, settle disputes on principles of equity, and apparently in the character of arbitrators. From these courts of primary resort, an appeal lies to a nuniber of courts, which used to be called cours royalcs. They are in all 27, have each jurisdiction over several departinents, and are ranged into three classes; namely, two courts, composed of five; nine courts, composed of four, and 16 courts composed of three chambers. These courts generally hold their sittings in the most important town situated within their jurisdiction. Above all these courts, and properly the only supreme court of the state, is the cour de cassation, so called from its power of reviewing and annulling the decrees of inferior courts. It sits in the capital. A general idea of the quantity of business which comes before these courts, and of the extent of litigation throughout the country, may be obtained from the following summary, upon an average of five years, ending with 1843 . The annual average of cases which came before justices of peace, was 714,953 , and of these $5: 1,487$ were settled amicably out of court ; before courts of first resort, 198,031, of which 151,819 were decided; before the royal courts, 18,192 , of which 11,387 were decided; and before the cour de cassation, 729, of which the decisions in 379 cases dismissed, and 351 sustained the appeal.

Instruction.-In France, education in all its branches has long been taken under the special cognizance of the state, and the superintendence of it is expressly committed to a high functionary, who takes the name of minister of public instruction and religions worship (des Cultes). The principal educational establishments are classed under three heads:-academical or superior, secondary, and primary. At the head, and as centre of the whole, stands the university. The minister of public instruction is considered its grand master; and, with a council, composed of 30 members, exercises a universal educational jurisdiction over all France. For this purpose, the jurisdiction of the university is divided into 27 circonscriptions, each of which has the name of académie universitaire, of the chief place within its district. Thus, for instance, the one which includes the three departments of Charente, Dordogne, and Gironde, is called the académie universitaire of Bordeaux. At these establishments, the education given is of the highest professional description, and need not be particularized. Secondary instruction comprehends moral and religious instruction, ancient and modern languages, philosophy, history, geography, mathematical and physical science. This education is given chiefly in colleges. The number of students receiving it, in 1841-42, was 89,771. Primary instruction is intended for the whole population, with a few unimportant exceptions. It comprehends moral and religious instruction, reading, writing, the elements of the French language, and of arithmetic. Were this education actually received by all for whom it is intended, the proportion of pupils at school ought to be about 1 in 5 of the whole population. By carcful inquiry made in 1843 , it was ascertained that the proportion was only 1 in $10 \cdot 90$. Religion, in like manner, is taken under the cognizance of the state, and falls within the province of the high functionary already mentioned, who adds to his designation of minister of public instruction, that of minister des Cultes. Ilere, however, his power of interference is much circumscribed. For, while the charter, which was granted by Louis XVIII., and till formally abrogated, must still be considered the fundamental law of the state, declares that the R. Catholic is the religion of the majority, it does not establish it, but, on the contrary, places all forms of religion on an equal footing, and professes to deal impartially with all, by paying salaries to their ministers. With the quality of the particular religion, therefore, the state concerns itself no further than simply to know that it is not obviously subversive of social order or good morals. Satisfied as to this, it is seen dealing out its payments with equal indifference to $\mathbf{R}$. Catholics, Lutherans, Calvinists, Socinians, and Jews. The possibility of acting on such a system, goes far to justify the assertion, that under whatever religions names different sections of the nation may be classed, the most formidable, if not the most numerous, section, consists of those by whom religion itself and all its sanctities are held in scorn. By assuming, on very insufficient grounds, that all persons who do not openly avow themselves to be Protestants or Jews, are R. Catholics, these are represented as constituting $\frac{14}{1} \frac{4}{5}$ of the whole population. They have 80 dioceses, of which 15 are archiepiscopal. The archbishop of I'aris has an annual stipend from the state of $£ 1600$ the other archbishops, $£ 600$, and the bishops, $£ 400$. There is, besides, an aggregate annual allowance of about $£ 6000$ for diocesan visits, and other similar purposes. The Protestants are considered as cither ('alvinists, belonging to the Reformed church, or Lutherans, adhering to the confession of Augsburg Their number is estimated at $1,000,000$. The Calvinists, diffused over 56 departments, but most numerous in the W., S., S.E., and N.E., constitute about two-thirds of the whole. The Lutherans, constituting the remaining third, are most numerous in the N . and E .

Army, Navy, and Finance. - The army of France is one of those overgrown establishments, the maintenance of which has lately been shown to be as incompatiblo with the freedom of France itself, as it has always been with the tranquillity of Europe Its active force, as estimated by the Minister of War in 1850 , is $365,463 \mathrm{men}$. This force is kept up partly by voluntary enlistment, but to a much greater extent by what is called Conscription; in virtue of which, all Frenclumen between the ages of 20 and 26 , are liable to be forced into military service; and even in time of peace, the annual contingent is fixed at 80,000 men. The budget of 1852 estimates the expenditure on the army (guerre), at $£ 12,59 \overline{5}, 182$. The navy is a much less
formidable establishment. During the last war with England it was almost annihilated, but it has since made considerable progress. It consists of 226 sailing vessels, and 102 steamers. The sailing vessels include 40 ships of the line, and 50 frigates; but only 23 of the former and 31 of the latter are ready for sea. Among the steamers there are not one ship of the line, and not more than 10 frigates, varying from 450 to 600 horse power. The fleet aetually afloat amounts to 96 sailing vessels, of which 10 are ships of the line, and 8 frigates, and 61 steamers. The naval force, including officers and sailors, amounts to 28,872 . The annual expenditure on this branch of the service is estimated at about four millions sterling. The state debt of France amounts to $£ 253,439,205$. The financial arrangements, according to the budget of 1852, are exhibited in the following table:-

## Budget for 1852, as brought forward July 1851.

Population.-This, as exhibited in a previous table, amounts to $35,401,761$, giving an average of $172 \cdot 12$ persons per sq. m . The leading stock from which this population springs is Celtic, but Celtic extremely modified, by long and extensive intercourse with the Romans, and the incursion of numerous hordes from the N., who must ultimately have formed no small proportion of the inhabitants. The different races have become completely amalgamated over the greater part of the country, and form the French, properly so called; but a distinction of race is still marked in several districts, as in the Germans of the N.E., the Basques of the S.W., and the Bretons of the N.W. The basis of the language is Latin, of which French may even be considered as a dialect. The original words of different origin are chicfly Celtic and German. Of the latter, about 1000 roots have been counted, exclusive of derivatives and compounds. According to the French themsel ves, their language is superior to all modern, and scarcely if at all inferior to the most celebrated of ancient tongues. More impartial judges form a different estimate, and, while admitting its possession of a flexibility and nicety of distinction, which admirably adapts it not only for conver sation and all the branches of lighter literature, but also for the severe sciences, find it deficient both in force and dignity. The people, intellectually considered, take a first place. In ingenuity they are unsurpassed, and in the higher walks of literature, with the exception of the highest kind of poetry, they have writers of distinguished name. Their moral qualities are less respectable. They are courteous in the extreme, and not naturally avaricious or cruel; but they are deficient both in solidity of character and strength of principle, and hence are alike incapable of bearing prosperity and adversity. In private life, more especially in large cities, dissoluteness prevails. In Paris, of 30,141 children born in 1849, 9941 were illegitimate ; in other words, in Paris, every third mother is unmarried, and every third child has a stain on its birth. This, however, exhibits French society in its worst aspect; and it therefore ought to be added, that over the whole country the proportion of illegitimate to legitimate births does not exceed 1 in 14•4, the illegitimate having been, in 1848, 67,791, and the legitimate, 980,957 ; and that while
erimes against the person are more, those against property are less, numerous than in England.
History.-Of this, our limits will scarcely allow us to attempt even a brief summary. In tracing the early geographical divisions of the country, we were brought down to Clovis, the true founder of the monarchy. With him, the Merovingian race of kings eommenced. It ceased with Childeric III., in 752, when Pepin le Bref obtained the erown. The Carlovingian dynasty commenced with him, or more properly with his distinguished son Charlemagne, surnamed the Great, who established his sovereignty not only over France, but also Italy, except its S. part, and the far larger part of Germany. This empire fell to pieces shortly after his death in 771. His successors kept the throne of France till the death of Louis V., when the Capetian dynasty, which had virtually commenced in the person of Hugh Capet the Great, was formally established by the coronation of his son at Rheims, in 987. This dynasty was continued in a direct line till the death of Charles IV. The most distinguished name in the direct line of Capetian kings is that of St. Louis, whose reign of 44 years, from 1226 to 1270, is among the most illustrious in French annals. Charles IV. was succeeded, in 1328, by Philip VI., grandson of Philip the Bold, by lis third son Charles of Valois. He was thus out of the direct line of the Capetian kings, and hence the dynasty which he established is known as that of the collateral branch of Valois. It was continued directly till 1498, and then successively in the collateral branches Valois Orleans, Valois Angoulême, and Valois Bourbon. The last commenced, in 1589, with Henri IV., surnamed the Great. During the three previous reigns, Protestantism had made wonderful progress in France, and bade fair for the ascendant, when two dreadful blows were struck at it-the one by an atrocity among the foulest on record, the Massacre of St. Bartholomew, in honour of which the pope ordered a medal to be struck, and Te Deum to be sung; and the other by the act of Henri himself, who rewarded the fidelity with which the Protestants had clung to him, and fought his battles, by publicly abjuring their religion. To his honour, however, he not only refused to persecute it, but gave it complete tolcration, by issuing the Edict of Nantes. This was more than Rome could endure; and she therefore sent him his reward in the dagger of a Jesuit assassin. He was succeeded, first, by his son Louis XIII., surnamed the Just, though it is difficult to know why; and then by his grandson, Louis XIV., with still less reason surnamed the Great. During his reign, it is true, many great literary names occur, but the monarch himself, when stript of the trappings of royalty, which he certainly knew well how to set off to the best advantage, stands forth in no more honourable light than that of a sensualist and a bigot. In the former character, he made his court a harem; and in the latter, recalled the Edict of Nantes, and, by the revocation, cruelly drove multitudes of his best subjects from their homes, and gave the national prosperity a shock from which it has not recovered. The lieentiousness of his reign was continued in a more disgusting form during that of his successor Louis XV.; and when, in the person of Louis XVI., the crown passed into the lands of a sovereign, who, though not distinguished for talents, was of unblemished morals, and loved his country, the day of retribution had arrived, and all remedies were too late. The whole framework of society was broken up, and the most fearful atrocities were openly perpetrated, and on a scale of magnitude, to which the previous history of the world has no parallel. Atheism and the wildest democracy then walked hand in hand, and left no doubt as to what must at all times be expectel when they gain the ascendant. The reign of terror was followed, according to what may now be considered an invariable zequence, by a military despotism, headed by a man whose wonderful talents might have made him a hero, but whose overvaulting ambition doomed him to spend the last years of his life and die a prisoner on a rugged and solitary isle of the ocean. The Bourbons regained their throne, but soon showed that the lessons of adversity had been lost upon them. They were again expelled (1830), and Louis Philippe, the head of the collateral blanch of Orleans, gained the crown, and kept it for 18 years, without a stain of blood upon his hands. During his reign, the material interests of France were greatly advanced, and its resources successfully developed, and the people enjoyed a larger measure of real freedom than they
had done at any former period. Still, on February 24, 1848 in consequence of a rising in Pari3. originating in causes too munerous to be here specified, Louis Philippe saw fit to abdicate the throne. A Republic succeeded, which, after dragging out a perfunctory existence of two years and little more than eight months, was brought to an end by its own President, Louis Napoleon Bonaparte. On December 2, 1851, supported by the army, he dissolved the house of representatives, imprisoned a large number of its members, including some of the most eminent men in the country, many of whom he subsequently banished to Cayemne, and otherwise expelled from France. He subjected the citizens of Paris to the fire of his troops, destroying indiseriminately the few who attempted to resist his usurped authority and those who were peaceably sitting in their own homes. The number then slain can never be aceurately ascertained, but it has been estimated as high as 3000 , and a like number are alleged to have since been deported to Cayenne without having undergone a public trial. Europe now anxiously waits what the next turn of affairs may present.-(1'atria; Orographie de l'Europe; Ency. des Gens du Monde; Ency. Moderne; Lavalette's Militarg Geography; Berghaus' Länder und Vilkerkunde; Balbi; Illustrated Catalogue of London Exhibition; Parliamentary Returns; French Census; Almanach de Gotha, 1852.)

FranCe (lsle or). See Mauritius.
FRANCES.-1, A bay, isl. Santiago, the principal of the Cape de Verde Islands, abont 3 or 4 m . W. of the S.E. point of the isl. It has a brown sandy beach, with several date trees and honses at the head of it. This bay has been frequently mistaken for Porto Praya, which is 4 or 5 m . further S.W.-2, A bay, S. Africa, S.W. point, Cape St. Francis ; lat. $34^{\circ} 10^{\prime} \mathrm{S}$; lon. $24^{\circ} 53^{\prime}$ E. Bulloeks and other refreshments may be procured here. Fish, also, abound in the bay, but it is much exposed to S. and E. winds, and should be resorted to in case of nceessity only.

FRANCEZAA, a small isl. Brazil, prov. Riode-Janeiro, a little S.W. Cape Frio. In early times, after the discovery of Brazil, the French had an establishment here for trading with the Indians, and found good shelter in its haven, which is both commodious and secure.

FRANCHE-Comte, an anc. prov. France, now comprised in deps. Jura, Doubs, and Haute-Saône. Its capital was Besançon. In Roman times it formed part of Sequania, in Celtic Gaul. Afterwards it changed masters several times, and passed under the Burgundian domination; on the extinction of which it bore the sway of Anstria, till Louis XIV., having twice overrun the province, in 1668, and 1674, it was secured to France by the treaty of Nijmegen, in 1678.

FRANCHIMONT, a hamlet, Belgium, prov. of, and about 10 m . S.E. Liege. It was once of some consideration, givirg title to a marquisate, the capital of which was Theux, and was noted for the enterprise of its inhabitants. The castle, now in ruins, and crowning a neighbouring height, is alluded to in Scott's poem of Marmion. It was a noted stronghold as early as the 12 th century. When liege was besieged, in 1467, by Charles the Bold and Louis XI., 600 of the people of Franchimont cut their way into the camp of the besiegers, and nearly succeeded in killing or carrying off the king and the duke, but they were intcreepted, and all killed. Pop. 294.

FRANCIS (St.), a river, U. States, Missouri and Arkansas, rising 30 m . S.W. St. Genevieve, flowing tortuously S ., and entering the Mississippi, 46 m . S.W. Memplis. It is navigable, in high water, for about 200 m ., and its waters, which are remarkably clear, abound with fish.-Also the name of various places in the U . States.

FRANCIS (St).-1, A headland, S. Africa, Cape Colony, W. St. Francis lay ; lat. $34^{\circ} 10^{\prime}$ S.; lon. $24^{\circ} 52^{\prime} 45^{\prime \prime}$ E. (r.) -2, A cape, Newfomndland, forming the N. extremity, on the E. side of Conception Bay; lat. $47^{\circ} 48^{\prime} \mathrm{N}$.; lon. $52^{\circ} 51^{\prime}$ W. (r.)-3, (Islands), a group of isls. off the S. coast of Australia, Noyt's Archipelago ; lat. (N. extremity) $32^{\circ} 32^{\prime} \mathrm{S}$. ; lon. $133^{\circ} 17^{\prime}$ E. (r.)-4, A lake, Upper and Lower Canada, formed by the St . Lawrence, 35 m. S.W. Montreal ; length, 28 m . ; breadth, 2 m . It encloses several small islands.

FRANCISCO, a tn. Mexico, state, Valladolid, 1. bank, Rio Grande de Lerma, 85 m . S. by E. Morelia. It was formerly a considerable place, but suffered severely during the revolutionary wars.

YoL. I.

FRANCISCO (San), a tn., port, and bay, W. coast, U. States, Upper California. The rown stands near the N. extremity of the narrow strip of land which forms the S.W. side of the bay; lat. (Fort, S. side entrance) $37^{\circ} 48^{\prime} 30^{\prime \prime} \mathrm{N}$. lon. $122^{\circ} 28^{\prime} 30^{\prime \prime} \mathrm{W}$. (R.) It consists of several streets paral lel with the bay, and a number of cross streets; the former

straight and wide, the latter extremely steep, and comprises two spacious squares. There are now some handsome and substantial brick buildings in the town, but the greater number are of wood or framework, of peeuliar and frail construction, covered with cotton cloth, and having the appearance of house and tent combined. These structures are used for all sorts of purposes. Some are large wholesale establishments, more retailing stores, but the greatest number are spirit and gambling-houses. Many of the latter are fitted up inside in the most splendid manner, and comprise large and elegant saloons and refreshment rooms. The streets were formerly nearly impassable in winter with mud, but the principal ones are now overlaid with plank, and have commodions side-walks. Spacious and convenient wharfs, resting on piles, and at which the largest ships can lie, have also been constructed. The harbour is crowded with sailing vessels from various parts of the world, that have bronght cargoes of passengers and gools; also numerous steamers, of which there are 10 plying to Stockton, on the San Joaquim, in connection with the S. mines, and as many more to Saeramento eity, on Sacramento river, in connection with the N. mines, besides those larger steamers which ply to Oregon, to sundry coast towns in the S., and to the isthmns of Panama. The water here is extremely bad, and the elimate wretehed. The town has been at varions times devastated by fire. The last and severest calamity of this kind with which it was visited, occurred on May 3, 1851, when a portion of the city, about 1 m . in length, and $\frac{1}{4} \mathrm{~m}$. in breadth, was wholly consumed, and a loss of property sustained, estimated at $£ 2,254,000$. Pop. fluctuating, but estimated at 60,000 - -The bay of San Francisco is one of the fillest in the world. It is emmpletely land-locked, and its entrance is striking: bold and rocky shores confine the rush of the tide through the narrow passage which leads to it. Within the bay are several islands and rocks. Some of the former are clothed with vegetation to their very tops; others are barren and covered with gnano, having an immense number of sea fowls hovering over, around, and alighting upon them. The distant shores of the bay extend, N. and S., far beyond the visible horizon. To the E.
rises a lofty inland range, known by the name of La Sierra, brilliant with the most beautiful tints. At the N. end of the bay are two indentations, called, respectively, the bay of San Pablo. and the bay of Suisoon; the latter, the recipient of the united streams of the Sacramento and Joaquim, is nearly of a circular form, and 10 m . in diameter; the former is of less dimensions. The whole length of the bay, from the N. extremity of San Pablo, is about 55 m. ; average breadth, about 7 m . From the W. side of the bay of San Pablo, to the extreme E. point of Suisoon Bay, is about 30 m .

FRANCISCO (São), an isl. Brazil, off the coast of prov. Santa Catharina, from which it is separated by a channel, improperly called the river of Sao Francisco, and containing the town of that name. It is of an irregular shape, narrowing towards the N., and is not much elevated above the sea; greatest length, 24 m. ; greatest breadth, 12 m . It is encircled by various islets, and watered by numerous streams, which add to its fertility. The inhabitants raise a large quantity of mandioca, rice, millet, tobacco, and coffee, whicb, besides sufficing for their consumption, leaves a considerable surplus, which is exported sometimes to Rio Janeiro, but more frequently to Santos.-The тown is about 9 m . from the sea, and $90 \mathrm{~m} . \mathrm{N}$. Desterro. The two principal streets are paved, the houses are of earth, but the church, which rises conspicuously above them, is of stone. Besides the church, there is an hospital, with a small chapel, and an endowment of some amount. The harbour, at a short distance from the town, has a depth of water never less than 2, and sometimes from 12 to 13 fathoms. The trade carried on by coasting vessels is considerable. The inhabitants build some small vessels, and make cordage of what is called imbé; but their chief employment is the culture of mandioca, rice, millet, French beans, tobacco, and coffee. Pop. of dist., 6000.

FRANCISCO (SÃo), a tn. Brazil, prov. of, and 45 m . N.W. Bahia, at the N.W. extremity of the bay at the mouth of the Serigi. Its houses are, for the most part, of stone, and it contains a parish chureh, a Franciscan convent, and a primary school. There are a great number of sugar factories in the district, and large quantities of spirits are made, and exported to Bahia. Pup., including slaves, 2000.

FRANCISCO (São), a river, Brazil, which rises in the serra da Canastra, in the S.W. of prov. Minaes-Geraes; flows N.N.E., through that prov. and prov. Bahia, then turning E., forms the boundary between provs. Pernambuco and Alagoas, on the N., and Bahia and Sergipe-del-Rey, on the S., and falls into the Atlantic, 50 m . N.N.E. the town of Sergipe-delRey, by two mouths; one to the N., called Aricari, so shallow as to be scarcely navigable even by canoes; and the other to the S., hence called Francisco-do-Sul, much larger and deeper, but unfortunately encumbered at its mouth by a large bar, about 6 m . broad, covered with a heavy surf, and with seldom more than 4 ft . of water on it. It is a large and majestic river, with a course which has been estimated at 1600 m. ., but, in addition to the bar at its mouth, has numerous rapids and cataracts, which make its continuous navigation impossible; those at Paulo Affonço, about 190 m . inland, are about 60 m . in length. Its principal affluents are, on the right, the Paraupeba, Guacuhi or Velhas, Jequitahi, and Verde; and on the lett, the Andaia, Borrachudo, Abaité, Paracatu, Urucaia, Carinenha, Correntes, and Grande.-(Diccio do Imp. Braz. ; Gardner's T'vavels in Brazil.)

FRANCISVILLE (St.), a vil., U. States, Lonisiana, 1. bank, Mississippi, on a bluff, 102 m . N.W. New Orleans. It is about 1 m . from the river, but communicates with it by the Bayou Sarah, and is a favourite stopping-place for boats descending the river. Great quantities of corn are shipped from this village. It has a courthouse, and a number of stores. Pop. 814.

FRANÇOIS (St.), a tn. French W. Indies, isl. Guadaloupe, on the S.E. coast of Grande-Terre, $7 \frac{1}{2}$ m. E. St. Ann. It has extensive sugar and cotton works. Pop. about 5000 .

FRA NCOLI, a small river, Spain, Catalonia. It rises about 3 m . N. Prades, prov. Lerida, enters prov. Tarragona, flows circnitously S.S.E., and after a course of about 30 m . falls into the Mediterranean, about $1 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Tarragona.

FRANCONIA [German, Franken], an ancient circle of Germany, which had Nürnberg for its capital, and, in 1806, was partitioned among Würtemberg, Baden, Hesse Cassel, the Saxon duchies, and Bavaria. The last received the largest
share, and still retains the name in the three circles of Upper, Middle, and Lower Franconia. The first, nearly correspond ing to the former circle of Upper Main, has area 2226 sq. m., and pop. 498,943 ; the second, including the greater part of the former circle of Rezat, has area $2798 \mathrm{sq} . \mathrm{m}$., and pop. 527,430 ; and the third, including, with the addition of Aschaffenburg, the whole of the former circle of Lower Main, has area $3604 \mathrm{sq} . \mathrm{m}$., and pop. 587,402 . The name of Franconia has been rendered familiar to the traveller and the geologist by its picturesque scenery, which has procured for part of it the name of Franconian Switzerland, and by its caverns, filled with fossil bones, among the most remarkable of which is Konig Ludwig's Hohle [King Louis cave], between Baireuth and Muggendorf.

FRANEKER, a tn. Holland, prov. Friesland, 10 m. W.S.W. Leeuwarden, on the canal thence to the coast at Harlingen. It is of an oval shape, lies in a fertile district, and has some remains of out-works, possesses an athenæum of considerable local repute as a superior academy, having a library of 12,000 vols., and a small museum attached; an old townhouse, a weighhouse, and a district courthouse. It has also a Calvinistic, a Baptist, and a R. Catholic church, and numerous benevolent and charitable institutions; and an excellent Latin, and several common schools. It is an old place, having obtained town rights in 1191 . Pop. 3968.

FRANKENAU, a tn. Hesse Cassel, prov. Oberhessen, cap. bail. of same name, on a bleak and elevated plain, 20 m . N.N.E. Marburg. It is a poor place, consisting of a number of thatched houses. Pop. 1042.

FRANKENBERG, a tn. Hesse Cassel, prov. Oberhessen, cap. circle, of same name, r. bank, Edde, 37 m . W.N.W. Cassel. It is entered by four gates, consists of an old and a new town, is the seat of several courts and public offices, contains two churches, one of them a gothic structure, and an old monastery, now converted into a courthouse, and public offices; and has manufactures of woollen cloth and woollen hosiery, red and white leather, paper, and tobacco, an oil, a spinning, and several other mills, numerous distilleries; a trade in swine, and 12 annual fairs. Pop. 3253. The circle, area 128 geo. sq. m., is lilly throughout, and ill adapted for the growth of corn. Pop. 21,410.

FRANKENBERG, a tn. Saxony, circle, and 40 m . S.E. Leipzig, on the Muhlbach, and near r. bank, Zschopau. It is regularly built, contains a church, nine schools, a townhouse, and hospital, and is one of the most industrial places of the kingdom, having manufactures of woollen, calico, and silk goods, cordovan, morocco, and ordinary leather, dyeworks, printfields, bleachfields, and spinning-mills; a trade in cattle, and three annual fairs. Some coal is worked in the neigh bourhood. Pop. (1849), 6988.

FRANKENBURG, a market tn. Austria, above the Ens, circle Hausruck, 25 m . W.S.W. Wels, contains a church with good paintings, and several monuments; a handsome chatean, and two schools; and has manufactories of linen and cotton cloth, and glass-works. Pop. 1017.

FRANKENHAUSEN, a tn. Germany, principality, Schwarzburg-Rudolstadt, cap. bail. of same name, on the Schlachtberg, above the little Wipper, 31 m . N. N.E. Gotha. It is entered by eight gates, and consists of an old and a new town. A great part of it having been burned down in 1833, it has been rebuilt in an improved form, with tolerably spacious streets, contains two principal and three other churches, an elegant castle with gardens, a townhouse and lyceum, and has a saline spring, with a bathing establishment; manufactories of musical instruments, tile-works, several mills, a trade in cattle, and five annual fairs. In the vicinity lignite and alabaster are worked. Pop. of town, 4873 ; of bail. (area 40 geo. sq. m.), 12,000.

FRANKENHEIM, or Frankenad, a tn. Bavaria, circle, Middle Franconia, near the source of the Wernitz, 15 m . W. Anspach. It contains a church, and on a height overhanging the town stands the castle of Schillingsfurst, the residence of the prince of that name. Pop. 1410.

FRANKENMARKT, a market tn. Austria, circle, Hausruck, on a height above the Vökla, 31 m . W.S.W. Wels. It stands on a considerable height, consists of picturesque look ing houscs, with lofty gables, and wooden balconies; has a school, handsome hospital, and church; an iron, a saw, and a flour mill. Pop. 937.

FRANKENSTEIN, a tn. Prussia, prov. Silesia, gov. of, and 36 m. S.S.W. Breslau, cap. circle of same name, on a height about 840 ft . above the sea. It consists of the town proper, surrounded by walls, with four gates, and of four suburbs; is the seat of several courts and public offices; contains a castle, a Protestant, and two R. Catholic churehes; a courthouse, bridewell, and savings'-bank, and has manufactories of cloth, tile-works, spinning, powder, and other mills Pop. 6292.-The circle, area 138 geo. sq. m., is partly covered by the Eulengebirge, but is for the most part flat and very fertile. Pop. 47,336.

FRANKEN'HAL, a th. Bavaria, Palatinate, cap. dist. of same name, on a canal near the Rhine, 33 m . S.S.E. Mainz. It is well built, is the seat of a court of law and several public offices, contains five churches, a townhouse, museun, Latin school, infirmary, hospital, poorhouse, and house of correction; and has manufactorics of sailcloth, silks, gold and silver wire, needles, files, musical instruments, and beet-root sugar, a bell toundry, and a trade in wood. Pop. town, 4656; dist. 41,367.

FRANKFORD, a small market tn. Ireland, King's co., on the Silver river, 59 m . W. by S. Dublin. It contains a R. Catholic chapel, a dispensary, and an asylum for aged widows, a distillery, a flour, and two corn mills. Marketday, Saturday; seve;al fairs annually. Pop. 1345.

FRANKFORT, a tu., U. States, cap. Kcntucky, on the Kentucky river, $68 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Cincinnati; lat. $38^{\circ} 11^{\prime}$ N.; lon. $84^{\circ} 50^{\prime}$ W. It is divided by the river, which is here crossed by a bridge, into N . and S. Frankfort. The houses are in general remarkably neat, many of them, as well as some of the public edifices, being built of the beautiful marble obtained in the vicinity, the others are mostly of stone. The publie buildings are the state-house, a handsome structure of marble; the penitentiary, three churches, an acadeny, and county courthouse. It contains three manufactories of cotton-baging, a cotton factory, and a rope-walk. Pop. 3500.

FRANKFURT [English, Frankfort; French, Francfort], a free tn. Germany, seat of the Germanic Diet, and cap. territory of same name, on the Main, in a beautiful but narrow valley, bounded, on the N. by the gentle heights of the Rödenburg, terminated at some distance by the lofty summits of the Taunus; and on the S. by the Mühlberg, Sachsenhausenberg, and Lerchesberg, 20 m . N.E. Mainz. It consists of the town proper, situated on the r. bank, and the suburb of Sachseuhausen on the 1. bank of the river; here crossed by a stone bridge of 14 arches, and from whatever side it is approached, bnt more espeeially when viewed from the Mühlberg or Sachsenhausenberg, has a beautiful appearance. The environs are covered with handsome villas, and the old walls, ramparts, and stagnant ditches, having been removed, the space occupied by them and the glacis has been planted, and forms fine promenades. It is still, however, entered by large gates, nine in number-seven belonging to the town, and two to Sachsenhausen. Two of these gates retain their original form-the Gallus Thor, and the Eschenheimer Thor. The latter, situated on the N., consists of a lofty tower, crowned by five turrets, and affords a good specimen of the architecture of the 14 th century. The other old gates have been removed, and their places supplied by handsomo modern structures, formed on ancient models. Among these the Ober Main, or S.E. gate, in imitation of the porches of the Campus Militum at Pompcii, and the Bockerheim or Mainz gate, with a guard and tollhouse, all modelled after the temple of Wingless Victory, on the Acropolis of Athens, are particularly deserving of notice. The $N$. or r. bank of the river here curves gently towards the land, and is lined by a spacious quay, along which the town stretches E. to W., from the Ober Main to the Unter Main gates, for about 2000 yards. The breadth, measured nearly due N. from the river, is about 1400 yards. The circuit is 7225 yards, or rather more than 4 m . The suburb of Sachsenhausen has a length along the river of 980 yards, and a breadth
of 280 yards. Fronting the quay already mentioned is a range of magnificent houses, well deserving the name of palaces, and occupied chiefly by diplomatista, bankers, and rich mer chants; but immediately behind it is the Old Town, consisting generally of indifferent houses, huddled together without any regularity, in narrow streets and lanes, and often built of wood, with overhanging gables, which exclude both air and light, though they derive considerable interest from the antiquity and the quaintness of their structure. But to this general description of tho Old Town, there is a remarkable exception in the Zeil, a fine spacious street, wbich stretches in a long curve from E. to S.W., and forms the principal thorouglifare. It contains a great number of splendid mansions, having originally been the chosen residence of the Frankfurt aristocracy, but the necessity of providing for the increasing demands of trade and commerce has gradually dislodged them, and filled the whole street with shops, extending along it like a continuous and magnificent bazaar. Within the town no fewer than 29 squares are counted; but the far greater part of them are very paltry. The most deserving of notice are the Rossmarket, the largest of all, with a fine fountain in its centre; the Paradeplatz, the Liebfrauenberg, the Paulsplatz, and the Römerberg. The last is perhaps the richest in historical recollections, and possesses, in the Römer or townhouse, a venerable structure with which a description of the public edifices may properly eommence. It is of very early

the townhall (hömeg), and churcit of st. nicolas, frankfort. From a local Print by e. Beer.
date, and is supposed to have derived its name from the Italian, eommonly called Römer (Romans), who, at the great fairs of the town, lodged their goods in it. It was first purchased by the magistrates in 1405 , and, eontinuing to undergo successive alterations and additions, was not completed in its present form till $\mathbf{1 7 4 0}$. In the course of the changes made upon it, all uniformity of design has been lost, and it has hence become a large irregular pile of not much architectural merit. Its chief interest lies in its interior. In one of its halls, the Wahlzimmer, the electors of the empire met and made their arrangements for the elcetion of the emperor, and the Senate of Frankfurt now holds its sittings. In another, the Kaisersaal, the emperor was banqueted after his election, and waited on at table by kings and princes. The ceiling of this hall has been richly decorated by modern artists, with strict adherence to the original style, and its walls contain niches filled with 52 portraits, being those of the whole German Emperors, in regular succession, from Conrad I. to Francis II. The number of churches is 12 . Of these six are Lutheran, two Calvinistic, and four R. Catholic. The Jews have a synagogue. The most remarkable of the churches are the Don or Cathedral, belonging to the R. Catholics, an ancient structure, not distinguished for beauty or symmetry, but snrmounted by a fine tower, begun in 1415 , and carried on for a century, though still unfinished, and interesting both as the scene of
the emperor's coronation, and containing the chapel in which ho was formerly elected; St. Paul's, the principal Protestant church, a modern edifice of an oval form, with a paltry spire, and an excellent organ; St. Catherine's church, also Lutheran, surmounted by a spire 200 ft . high, possessed of a fine altar of black marble, and numerous paintings and monuments, and of some interest as the church in which Protestantism was first preached in Frankfurt; the German Reformed church, having very much the appearance of a large private mansion; the French Reformed church, a very handsome edifice; St. Leonard's church, close upon the river, on the spot once occnpied by the palace of Charlemagne, of which not a vestige now remains; and a church in Sachsenhausen, originally belonging to the Teutonic knights, adjoining their old castle, of which the Emperor of Austria is now proprietor. Other buildings deserving of notice are the courts of justice, of modern construction ; the Saalhof, a gloomy-looking building, on the site of a palace of Louis the Pious, Charlemagne's son, and all modern, except the chapel, which is of ancient gothic ; the Braunfels, the court-yard of which was formerly used for the exchange, built in a kind of modern Byzantine, of a brown stone, and inserted stripes of red stone; the new exchange; the large palace of the Prince of Thurn and Taxis; the mint, post-office, theatre, the house in which Luther lived, and that in which Goethe was born.

Frankfurt is rich in collections connected with literature and art, and in establishments intended to promote them. The chief of these are the Städel Institute, so named after its founder, a Frankfurt banker, who bequeathed about $£ 80,000$ to establish a public gallery and school of art, and whose views have already been carried out to a considerable extent, by the formation of a good picture gallery and other collections; the Senkenberg Museum of Natural IIistory, containing many rare specimens brought from Egypt, Nubia, and Abyssinia, by the traveller Rüppel ; the town library, possessed of 60,000 volumes, and several valuable MSS., and other curiosities, besides a picture gallery. In the garden of the banker Bethmann is to be secn the beautiful and well-known statue of Ariadne, by Dannecker. The literary and other scientific associations include a medical institute, physical, geographical, and polytechnic, and several musical societies. The chief educational establishments are the gymnasium, the Muster, the Middle, several other public, and numerous private schools. Among the benevolent institutions are the Senkenberg hospital, the hospital of the Holy Ghost, the orphan hospital, the house of refuge, the lunatic, and the deaf and dumb asylums, and a number of almshouses. A bout a mile outside the walls is the New Cemetery, at the gate of which is a house where bodies are deposited for a time previous to interment, and watched till decomposition commences. Ifere every convenience of warm baths and other appliances needful in cases of suspended animation are kept in readiness.

The manufactures of Frankfurt are not impertant. These of woollens and linens, which were once carried on to a great extent, have almost ccased to exist. Those which still maintain their ground, are chiefly articles of vertù in bronze and metal gilt, chemical products, chocolate, ironmongery, colours, gold and silver thread, japan and brass ware, machines, types, playing cards, snuff and tobacco, straw hats, tapestry, carpets, wax cloth, and black for copperplate and lithographic printers. The central situation of the town has long secured to it an extensive trade, both transit and general. The former, however, threatens to be seriously affected by the railway system, which has raised up a number of formidable com-
petitors in towns which, formerly excluded, have now been brought within reach of the great thoroughfares, and hence classes of goods for which Frankfurt had to be the entrepot, either take different directions, or pass on without being de-

THE FISHER GATE, FRANKFORT, looking up the Main.-Frum Harding's Sketches at Home and Abroad
posited. Still, however, even for railways, Frankfurt forms a central station, and continucs to share largely in transit. The general trade is chiefly in wine, silk, raw and manufactured; wool, and timber. The trade in English wares, formerly extensive, has greatly fallen off since Frankfurt joined the Zollverein. But by far the most important trade of Frankfurt is in money and banking. Its capitalists, among whom Rothschild and Bethmann take the lead, are so powerful, as to exert no inconsiderable influence in the money markets of Europe. In connection with the trade, should be mentioned the two fairs of Frankfurt, not nearly so important as they once were, when 400,000 strangers were known to frequent them; but still large enough to fill the town during their continuance with gaiety and animation, and add considerably to the gains of its citizens.

As capital of a territory, which, though small, is a member of the Germanic confederation, Frankfurt is the seat of its own governing body, the senate; of civil and criminal courts, and other public offices. Its history too is possessed of considerable interest. It appears to have been originally a Roman station, but did not attract much attention till the time of Charlemagne, who had a palace, and held a couucil in it. Subsequent emperors nade it the scat of their court, and conferred on it important privileges. In particular, a charter, known by the name of the Golden Bull, granted in 1356, by Charles IV., and still preserved among the arehives of the town, made it the place where the emperor should in future be elected; and in 1555, Charles V. conferred upon it the privilege of coining money. The pcace of Westphalia confirmed it in the possession of all its rights. It had long enjoyed an almost uninterrupted course of prosperity, when the French revolution brought upon it a series of disasters. Its treasures were carried off by extortion, and on one occasion it was actually taken by storm. Under Napoleon it became the capital, first of a principality, and then of a grand duchy, with an area of nearly $2000 \mathrm{sq} . \mathrm{m}$. His downfall restored its independence; and the congress of Vienna finally determined its position, by making it a member of the Germanic confederation, and giving it precedence among the four free towns of the empire. The beauty of the environs of Frankfurt has already been referred to. Immediately beyond the walls, many places are deserving of a visit. In the N.E., outside the Friedburg gate, a group of colossal granite rocks marks the spot where the prince of Hesse Phillipsthal, and many of his gallant followers, fell, in 1792, in the successful storming of
the town; and in the gardens around are many beautiful statues and other works of distinguished artists. At still greater distances are many syots to which pleasant excursions may be inade, and with little expenditure, either of time or

sheep, which are generally either pure merinos, or breeds improved from them, by crossing, and produce large quantities of fine wool. The minerals include iron, which is fonnd in several localities, and worked to a considerable extent; copperas, gypsum, almn, and lignite. Manufactures have made considerable progress, and consist chiefly of ironmongery, woollen and linen tissues, hosiery, leather, yarn, and worsted. About fivesixths of the inhabitants are Protestants. For alministrative purposes the government is divided into 17 circles, of which Frankfurt-on-the-Oder is the capital. Pop. (1846), 840,127.

FRANKPORT on-the-Oder, a tn. Prussia, prov. Brandenburg, cap. gov. of same name, on the Oder, 50 m . E.S.E. Berlin, on the railway thence to Breslan. It consists of the town proper, surrounded by walls and ditches, and entered by five gates; and of three suburbs on the 1 . bank, and of another suburb on the $r$. bank of the river, which is here crossed by a wooden bridge about 290 yards long. It is built with considerable regularity, four spacious streets traversing it nearly in parallel lines N . to S .; is the seat of a superior appeal court, and other courts and public offices; and contains six churches, of which the Marien, or Oberkirche, of the 13 th century, with good painted glass windows, and a very large organ, is most deserving of notice; a R. Catholic chapel, synagogue, townhouse, built in 1617, gymnasium, burgher, and numerous other schools, a theatre, a house of correction, an orphan, and two other hospitals. The manufactures consist of woollen and linen cloth, silks, hosiery, gloves, leather, delft, and common earthenware, wax, sugar, and brandy;
moncy, in consequence of the namerous easy and cheap means of conveyance which are here enjoyed. Steamers on the Main sail daily to Wurzburg, and railroads branch off in all directions-to Mainz and Wiesbaden, to Darmstadt and IIeidel burg, to Cassel, Hanau, and Offenbach. Pop. exclusive of military, 54,893; of whom 6713 are in Sachsenhausen.
The тermitory of Frankfurt has an area of about $90 \mathrm{sq} . \mathrm{m}$., and lies immediately aronnd the walls on both sides of the Main, forming for the most part a productive flat, the soil of which is composed of a mixture of sand and dceomposed volcanic roeks. The government is vested in a senate, composed of 42 members, chosen in the first instance by all Christian citizens, not under legal ineapacity. As a member of the confederation, Frankfurt unites with the other three free towns in holding the 17th place in the Dict, and has only one vote in common with them in the lesser comeil; but has a full vote to itself in the plenum. Its contingent of men to the confederation is 1024, among whom are ineluded 132 riflemen. Its revenue (1851) is $£ 124,919$, experditure $£ 134,437$, and debt $£ 576,921$, of which $£ 500,000$ are lent mon railways. Pop. 70,244.

FRANKFURT, a gov. Prussia, forming the S.E. portion of prov. Brandenburg; bounded, N. by gov. Stettin; E. Marienwerder, Bromberg, and Posen; S. Liegnitz, and kingdom of Saxony; W. Merseburg; and N.W. Potvdam; area, 5614 geo. sq. m. The surface forms an extensive plain, occasionally broken by low hills, particularly in the neighbourhood of the larger streams, and consists of some tracts of fertile, and more numerous tracts of light and sandy soil, generally well wooded, and diversified by numerons small lakes. The principal stream is the Oder, which enters the government in the S., separates it partially from that of Liegnitz, and then traverses it circuitously, in a W.N.W. direetion. The other streams of importance are the Neisse, Warthe, Netze, and Bober. The water communication is greatly improved, and extended by the Frederick-Wilhelmsgruben, or Mïllerose canal, which conncets the Spree with the Oder; and the new Oder canal, by which a communication has been established between the Oder and Vistula. Numerous saline springs occur throughout the government. The principal crops are wheat, generally confined to the more fertile distriets; barley and oats, tobacco, hops, and flax. Fruit is abundant, and some tolerable wine is grown. The pastures rear great numbers of eattle, and are particularly adapted for
h. Parade Platz. aาd the trade, general and transit, is extensive both by land and water, particularly the latter; about 2000 vessels annually passing the town. There are also three important annual fairs, much frequented by dealers from Poland. The university which Frankfurt possessed from an early period was transferred to Breslan in 1816. At the extremity of the bridge on the r. bank, a monument has been creeted to Prince Leopold of Brunswick, who perished in endeavouring to rescue a family during an inundation of the Oder; and in the neighbourhood, near Kunersdorf, a great, thongh not decisive battle, was fought between the Prussians, under Frederiek the Great, and the united army of Austrians and Russians, somewhat to the advantage of the latter. The poet Kleist, a native of the town, lost his life in this battle. A monument has been erected to him. Frankfurt possesses a bathing establishment, with chalybeate springs, and vapour and sulphur baths. Pop. (1846), 30,432.

FRANKLAND ISLANDS, a group of four isls. S. Pacific Ocean, on the N.E. coast, Australia, S. Cape Grafton; lat. $17^{\circ} 13^{\prime} \mathrm{S} . ;$ lon. $146^{\circ} 8^{\prime} \mathrm{E}$. (R.) Two of these islands are very small, the other two are each about 1 m . long, one of the latter is formed of two wooded rocky eminences at its extremes, connected by level ground, consisting of dead coral and sand, thickly covered with trees at one part, and scattered bushes at another. The low woody portion of this island is strewed with flat blocks of the same kind of recent coral conglomerate that occnrs in situ on the beach, also with quantities of pumice, 12 ft . above high water mark of spring tide. There is little underwood, the trees overhead forming a sliady grove. Herbaccous plants are few in number, but wild nutmegs, Myristica cimicifera, are met with, though not of any commercial importance. The Torres Strait rat abonnds in the island, as do also some small lizards. The prineipal bird is the megapodius. The southernmost island of the group is higher and more rocky than that just described. Many of its trees are very large, straight, and branching near the top only. -(Voyage of M.M.S. Mattlesnake. Lond. 1852).

FRANKLEY, par. Eng. Worcester; 2000 ac. Pop. 170.
FRANKLIN.-1, A bay, N. coast of Aretic America, between Port Fitton and Cape Parry, and intersected by the meridian of $125^{\circ} \mathrm{W} .-2$, An island S . Pacific, off S . coast, Australia; lat. $32^{\circ} 32^{\prime} \mathrm{S}$; lon. $133^{\circ} 35^{\prime} \mathrm{E}$. (n.)

FRANKLIN, numerous places, U. States, particularly, a tn. Pennsylvania, 210 m . W.N.W. Harrisburg, S. side of

French Creek, at its junction with the Alleghany. It has a courthouse, a jail, three churches, two academies, two schools, a printing-office, a grist-mill, a pottery, and two tanneries. Pop. 595.

FRANKLIN ISLAND, an isl. Antarctic ocean, discovered by Sir J. C. Ross; lat. $76^{\circ} 8^{\prime}$ S.; lon. $168^{\circ} 12^{\prime}$ E. It is about 12 m . long by 6 broad; wholly composed of igneous rocks, completely destitute of vegetation, and the resort of sea-fowl and seals.

FRANK'S ISLAND, an isl. at the entrance of the N.E. pass of the Mississippi, with a lighthouse 78 ft . high ; lat. $29^{\circ} 8^{\prime} 30^{\prime \prime}$ N.; lon. $89^{\circ} 1^{\prime} 30^{\prime \prime} \mathrm{W}$. (r.)

FRANKSTADT', or Frenstadt, two places, Moravia :1, A tn., circle of, and 35 m . E.N.E. Prerau, in a hilly district, 1. bank, Lubina, near its confluence with the Bistritza. It contains two churches, and an hospital ; and has extensive manufactures of linen, several brandy and rosoglio distilleries, several mills, a trade in cattle, and four annual fairs. Pop. 4483.- 2, A tn., circle of, and 22 m . N.N.W. Olmütz. It contains a church, a school, and four mills. The inhabitants are Germans. Pop. 1580.

FRANKTON, par. Eng. Warwick; 1660 ac. Pop. 282.
FRANSHAM, two pars. Eng. Norfolk:-1, (Great), 1500 ac. Pop. 329.-2, (Little), 1490 ac. Pop. 263.

FRANT, or Fant, par. Eng. Sussex ; 9430 ac. P. 2280.
FRANZBURG, a tn. Prussia, gov. of, and 14 m. S.W. Stralsund, cap. circle of same name, on a lake at the source of the Little Trebel. It is the seat of a law court and several public offices, contains an old castle, built on the site of a ruined monastery, and has manufactures of linen and cotton, a trade in cattle, and three annual fairs. Pop. 1144.-TThe c.ircle, area 372 geo. sq. m., is flat and sandy; but, notwithstanding, tolerably fertile. It lies partly along the Baltic, where some herrings are taken. Pop. 58,006 .

FRANZENSBRUNN, or Franzensbad, a celebrated watering-place, Bohemia, circle of, and 18 m . W.S.W. Elnbogen, and about 3 m . N. Eger, with which it is connected by a fine avenue. It stands in a hollow, among low and rather bare-looking hills, and consists of four streets, which cross each other at right angles, and one of which, the Kaiserstrasse, is both well-built, and lined with a row of trees. The bathing establishment consists of an irregular temple, erected over the springs, with a long colonnade, extending to the Kurhaus, where the visitors assemble, and balls and concerts are given. The springs, five in number, are alkaline, saline, chalybeate, one of them differing from the others in respect of the enormous quantity of carbonic acid gas which it throws out, and are very efficacious, particularly in scrofulous and cutaneous affections. Abont 200,000 bottles are annually exported.

FRANZENTHAL, a vil. Bohemia, circle, Leitmeritz, on the Pulsuitz. It contains the ruins of an old castle, picturesquely and strongly situated. Pop. 1484.

FRASCAROLO [Latin, Friscariolum], a vil. and com. Sardinian States, Piedmont, div. of, and 30 m . S. Novara, 1. bank, Po, nearly opposite Valenza. It contains a parish church, three castles, and an alms-house. The principal products of the district are corn, millet, rice, and grapes. Pop. 1673.

FRASCATI [anc. Tusculum], a tn. Papal States, Campagna di Roma, 11 m . S.E. Rome, beautifully situated on one of the lower eminences of the Alban Hills. In the town itself there is nothing remarkable, the great attraction of the place being its numerous and magnificent villas, built mostly in the 16th century, and the ancient remains in its vicinity. The principal of these is the Villa Aldobrandini, belonging to the Borghese family, famed for its complicated water works, and for the picturesque beauty of its grounds. The next in importance are the villas Mondragone, Taverna, and Ruffinella. On the summit of the hill on which Frascati is built, and at the distance of 2 m . from it, stood the ancient city of Tusculum, a town of Latium, built long before Rome existed, and of which numerous interesting remains are to be scen, including an amphitheatre, some ancient pavement, formed of polygonal masses of lava, a theatre, and numerous remains of baths and fountains. Tusculum was destroyed by the Romans, anno 1191. Pop. 4975.

FRASER, or Tacoutche-Tesse, a river, Britisl N. America, rising in the Rocky Mountains, in lat. $53^{\circ} 42^{\prime} \mathrm{N}$. ; lon. $119^{\circ} \mathrm{W}$. It flows N.W. for about 270 m ., then turns
S., and, after a total course of about 500 m ., falls into the Gulf of Georgia, in lat. $49^{\circ} \mathrm{N}$. Its principal affluents are the Salmon and the Kashmin. Its upper banks are inhabited ky the Carrier Indians, who subsist chiefly on salmon, which they catch in immense numbers.

FRASERBURGH, a seaport, bor. of regality, and par. Scotland, co. Aberdeen. The town, S. side of Kinnaird's Head, on an acclivity sloping towards the sea, 19 m . E. Banff, is of a square form, streets crossing each other at right angles; houses substantially built of stone; lighted with gas, and generally, of late, greatly improved. The parish church, which stands about the centre of the town, is a plain substantial structure, with a spire. There are also a Free church, and chapels for Episcopalians, Independents, and Morrisonians. The market cross, which stands in the public square in the centre of the town, is a remarkable structure of a hexagonal form; arca of the base, 500 ft ., contracted at the top to 23 ft ; and the harbour commissioner's hall is an elegant and commodious edifice. There are two week-day schools, and eight Sunday schools; a mechanics' institution, a savings'bank, and two societies for the diffusion of religious knowledge. The harbour of Fraserburgh, area about 8 ac ., is of easy access, and depth about 6 ft . at the pier's head, at low water, and 20 ft . at high water of spring tides. Shipbuilding to a limited extent, and herring fishing to a great extent, are carried on; the latter employing between 2000 and 3000 people. In 1845, 46,169현 barrels of herrings were cured, and 56,289 cod, ling, \&c., taken. The principal articles of export are wheat, barley, oats, pease, beans, potatoes, fish, dried and pickled, cod, and herrings. The chief imports are timber, coals, lime, tiles, brick, salt, groceries, and gencral merchandise. Area of par., 8 m . by $3 \frac{1}{2} \mathrm{~m}$. Pop. (1841), 36I5.-(Local Correspondent.)

FRASNES-les-Buissenal, a small tn. Belgium, prov. Hainaut, 12 m . N.E. Tournai. It has manufactures of woollens and linen, three breweries, two salt-works, and a trade in agricultural produce, horses, and cattle. Pop. 4801.

FRASSINE, a river, Austrian Italy, which rises in the W. of prov. Vicenza, about 2 m . W. Recoaro, and first under the name of Nuovo, flows S.S.E. to Codogna. It here takes the name of Frassine, and makes a long curve in a S.E. direction, till near Este, when its waters are employed to feed two canals-the one S. Catharina, which proceeds S., and the other Monselia, which is continued N. to Padua, and joins the Buechiglione. The whole course of the Nuovo and Frassine to Este is about 75 m . From below Codogna, it is navigalle by barges. Its only affluent deserving of notice is the Bisato, which it receives on the l. bank, a little above Este.

FRASSINE'TO, two places, Sardinian States.- $1,(-d a \cdot P o)$ [Latin, Fraxinetum-ad-Padum], A tn., div. of, and 16 m. N.N.W. Alessandria, r. bank, Po. It has a modern palace, with some good paintings and reliefs; a botanical garden, a parochial, and two other churches; some trade in corn, millet, hemp, flax, and timber, and an annual fair. Pop. 2087.-2, ( d'Ivrea) [Latin, Fraxinetam Eporediensium], a vil. and com., div. Turin, in a plain, about 15 m . W.S.W. Ivrea. It has a modern parish church, and a monastery of the Brothers of Charity; and some trade in agricultural and dairy produce. Pop. 2143.

FRASSINO, a vil. and com. Sardinian States, Piedmont, div. Coni, prov. of, and 13 m . W.S.W. Saluzzo, at the extremity of the valley of Vraita, on a stream of that name, here crossed by a wooden bridge. It has an old parish church, limekilns, and a trade in corn and butter. Pop. 1698.

FRASSO, a vil. and com. Naples, prov. Terra-di-Lavoro, 12 m. E.N.E. Caserta. It contains two churches. Pop. 4279.

FRASTANK, a vil. Austria, Tyrol, Vorarlberg, on the III, about 4 m . from Feldkirchen. It contains a parish church, chapel, and school; and has manufactures of linen, a dye-work, printfield, iron foundry, and spinning-mill. Pop. 1521.

FRATING, par. Eng. Essex; 1350 ac. Pop. 271.
FRATTA, a vil. Austrian Italy, gov. Venice, prov. Polesine, on the canal of Scortico, and not far from the Adigetto. It is an old place, supposed to have been founded by the ancient Tuscans; contains a parish church, is surrounded by numerous villas, and has an annual fair. Pop. 2760.

FRATTA [anc. Pitulum], a tn. Papal States, deleg. of, and 14 m . N.N.W. Perugia, 1. Lank, Tiber. It is an ancient. place, and being considered, during the Middle Ages, as a stronghold of some importance, was repeatedly the theatre or
the subject of severe contests. It generally sided with the Popes, and received from them the titles of Nobilis Insignis, and Fidelissima. Its iron-works and earthenware were at one time celebrated. Pop. 4600.

FRAT'I'A Maggione, a vil. and com. Naples, prov. of, and 6 m . N. Naples. It contains a handsome parish, and five other churches; and has extensive ropeworks. The inhabitants rear great numbers of silk worms. Pop. 9280.

FRATTE, a vil. and com. Naples, prov. 'Terra-di-Lavoro, 13 m . N.E. Gaeta. Pop. 3310.

FRAUBRUNNEN, a vil. Switzerland, can. of, and 10 m . N.N.E. Bern. It contains an old Cistertian nunnery, now converted into a handsome and spacious courthouse, and is famous as the seene of a battle, in 1375, when the peasantry defeated the English mercenary called Ingelram de Courcy, and put an end to what is known in Swiss history as the English war.

FRAUEiNBURG, a tn. Prussia, gov. of, and 40 m . W.S.W. Königsberg, on the Frische Haff, at the foot of the Domberg. It consists of the town proper and two suburbs; is the see of the bishop of Erneland, contains a cathedral, a handsome gothie structure, finely situated on a height, and interesting as containing the tomb of Copernicus, who died here in 1553 ; a tower, in which were water works to supply the town with water by machinery of his contrivance; a parish church, and an infirmary; and has manufactures of woollen eloth, leather, and carthenware ; a fishery, a port in the Haff, and some shipping and general trade. Pop. 2369.

FRAUENFLLD, a th. Switzerland, cap. can. Thurgovia or Thurgau, $14 \mathrm{~m} . S . W$. Constance, in the middle of a rich and diversified country, watered by the Murg, here crossed by a covered bridge. It is well built, with clean and straight streets; and has three small suburbs, abeve one of which, on a lofty rock, stands an old castle, built in the 11 th century. The townhouse; two churehes, R. Catholic and Protestant; and the arsenal, are respectable buildings; and near the town is a Capuchin convent, founded in 1595. Frauenfeld is an industrious place; has several mills, a manufactory of cetton and thread, with ealice-printing, weellen-weaving, \&c. Pop. 2858.

FRAUENKIRCHEN, or Boldog-Asszony, a market tn. Llungary, co. Wieselburg, 9 m. S.S.E. Neusicdel. It contains a church, to which numerous pilgrimages are made; a synagegue, and an old Franciscan convent. About a fourth of the inhalitants are Jews. Pop. 2100.

FRAUENMARK'T, a market tn. Hungary, co. Henth, 56 m. N.N.W. Pesth. 1'op. 2358.

FRAUENS'TEIN, a tu. Saxony, circle, and 18 m. S.W. Dresden, cap. bail. of same name, on a rugged height between the Gemlitz and Bobritzsch. It contains a handsome old parish ehurch, with a fine organ; two castles, one of them an old fortress, with three towers; a large turretted townhouse, an orphan hospital, and house of refuge; and has a saw and other mills; a trade in eattle, and thrce annual fairs. Pop. 1107 ; of bail. (area, 65 geo. sq. m.), 11,707.

FRAUREUTH, or Fheyreuth, a vil. Germany, principality of Reuss-Greitz, 9 m . E.N.E. Greitz. It contains a parish church, and has an endowment for orphans and widows, and other benevolent institutions, and five annual fairs. Pop. 1200.

FRAUSTADT, or Wschowa, a tn. Prussia, gov. of, and $50 \mathrm{~m} . \mathrm{S} . \mathrm{S} . \mathrm{W}$. Posen, cap. circle of same name. It stands in a sandy plain, is the seat of a law court, and several public offices ; cousists of the old and new town, and a suburb; contains a Protestant, and three R. Catholic churches, a Bernardite monastery, superior burgher school, an orphan hespital, and house of refuge for abandoned children; and has manufactures of woollen and linen cleth, chicory factories, breweries, distilleries; a trade in corn, wool, and cattle, and four annual fairs. In the neighbourhood are no fewer than 90 windmills. Pop. 6257 .—The cincle, area, 287 gee. sq. m., consists of a plain well wooded, but containing considerable tracts of morass, and not much very fertile ground. Pop. 55,085.

FRECHEN, a vil. Prussia, gov. of, and 9 m . W. Cologne. It contains a R. Catholle parish church; and has manutactures of porcelain, delft, stone, and ordinary earthenware, which furnish the matcrials of a considerable trade. There are mines of lignite in the vicinity. Pop. 2379.

FRECHENFELD, a vil. Bavaria, Palatinate, S. of Landau. It contains a Protestant parish church. Pop. 1420.

FRECHILLA, a tn. Spain, Leon, prov. of, and 21 m . W.N W. Valencia, in a plain, 1. bank, Valdejinate. Most of the streets are wide, straight, and have paved footpaths; and in the publie square are the townhouse, prison, and a public school. It also possesses a paris! chureh, two chapels, and an extramural cemetery. Coarse eloth, baize, and wine are manufactured and exported. Pop. 1706.

FRECKENHAM, par. Eng. Suffolk; 2520 ac. Pop. 495.
FRECKENHORS'T, a tn. Prussia, prov. Westphalia, gev. of, and 15 m. E.S.E. Münster, on two small streams. It contains a parish chureh; and has manufactures of linen eloth and yarn, two stone quarries, a trade in cattle, and two annual fairs. Pop. 1510.

FREDEBURG, a tn. Prussia, Westphalia, gov. of, and 18 m . S.S.E. Arnsberg, at the sourec of the Wenne. It is the seat of a court of justice; contains a R. Catholic parish church and chapel ; and has manufactures of potash and matches, and two annual fairs. Pop. 739.

FREDERICIA, a seaport tn. Denmark, N Jutland, bail. and $13 \mathrm{~m} . \mathrm{S} . \mathrm{E}$. Weile, on a tongue at the N . entrance of the Little Belt. It is a regular fortress, with nine bastions, and three ravelins on the land side, and two bastions towards the sea. It is entered by four gates; contains a Danish Lutheran, a German Lutheran, a Calvinistic, and a R. Catholie ehureh, a synagogue, an hospital, and a customhouse, at which all ships passing through the Little Belt pay toll; and has a harbour of the fourth elass, with 12 ft . of water, some shipping, and considerable manufactures of tobaceo, which is grown in the vicinity. Pop. 4600.

FREDERICK, a tn.,U.States, Maryland, 75 m. N.W. Annapolis. It has wide streets, a handsome courthouse, a jail, and connty offices, 12 churches, two acalemies, and 10 schools, two lumber yards, a woollen factory, two roperics, several mills, a brewery, pettery, several tamneries, and four printing offices. It is intersected by the great road from Baltimore to Wheeling, and is connected with the Baltimore and Ohio railway, by a branch 3 m . long. It is surrounded by a fertile country, and has an extensive trade, being, next to lialtimore, the most important towa in the state. Pop. 5182.

FREDERICK IIENRY, an isl., S. Pacific Ocean, off S.W. coast, Papua; lat. $8^{\circ} 22^{\prime} \mathrm{S}$. ; lon. $137^{\circ} 40^{\prime}$ E. (r.); about 100 m . long, E. to W., and 58 m . broad. This island, which terminates W. in Cape Valsche or False Cape, was supposed to bo part of the mainland of lapua till 1835, when Lient. Kaal, of the Duteh navy, passed through the strait which separates it. The land is everywhere low, apparently marshy, and covered with a dense forest.-(Horsburgh; Raper.)

FREDERICKSBORG, or IIhleröd, a tn. Denmark, isl. Seeland, cap. bail. of same name, in a beautiful district, 22 m. N.N.W. Copcuhagen. The great attraction of the place is the royal palace, a fine gothic structure, built upon an island in a lake, and containing the splendid and riehly decorated chapel, in which the Danish kings are crowned. The buildings, of red brick, so completely cover the island, that they seem to rise ont of the lake, whose sloping banks are laid out in gardens and pleasant walks. The whole, including the village, which covers three sides of the lake, forms a beautiful and romantic picture.

FREDERICKSBURG, a tn., U. States, Virginia, r. bank, Rappahannoek, $60 \mathrm{~m} . \mathrm{N}$. by L. Richmond. It is regnlarly laid ont, and has a courthouse, jail, county offices, market, five churches, five acarlemies, and seven schools, two tanneries, two printing offices, and a flourishing trade in exporting grain, flour, tobacco, Indian corn, and other articles. Pop. 3974.

FREDERIKSIIAED, or Frederikshati, a seaport tn. Norway, prov. Aggershuus, cap. bail. Smaalehnen, 58 m . S.S.E. Christiania, at the influx of the Tistedals-elv inte the Ide-fiord; lat. $59^{\circ} 7^{\prime} 30^{\prime \prime} \mathrm{N}$. ; lon. $11^{\circ} 26^{\prime} \mathrm{E}$. (n.) It is beantifully situate, well built, and possesses a chureh, a Latin, a burgher, and two common schoels; a peorhouse, workhouse, bank, and local judicial courts. Its manufactures comprise a brandy distillery, an extensive pottery, a tobacco spinnery, and an iron forge. It has a good and safe haven, and its chief exports are deals and planks, in which it carries on an active trade with Sweden. Close to the S. side of the town, on a rock about 400 ft . bigh, stands the fortress of Frederik-
steen, in the besieging of which, November 30,1718 , Charles XII. of Sweden was killed. An obelisk marks the spot where he fell. Pop. (1845), 5503.-(Kraft's Haandbog over Kongeriget Norge.)

FREDERIKSHALL, tn. Norway. See FrederiksHALD.

FREDERICKSHAVN, or Fladstrand, a seaport tn. Denmark, Jutland, bail. of, and 21 m . E. Hjörring, on the N.E. coast, with a harbour of the third class, having 14 ft . water, well sheltered, and most convenient for vessels waiting for a favourable wind to carry them round the N. point of Jutland. In the immediate vicinity is the citadel of Fladstrand, commanding the harbour. It is an irregular work, surrounded by ill-kept ditches, and consisting partly of a tower built upon a steep rock. Pop. 1400 .

FREDEREIKSSTAD [Latin, Fridericostadium; German, Friederichsstadt], a fortified maritime tn. Norway, prov. Aggershuus, bail. Smaalelnen, 49 m. S. by E. Christiania, at the mouth of the Glommen ; lat. $59^{\circ} 11^{\prime}$ N.; lon. $11^{\circ}$ E. (r.) It is a thriving place, and is composed of the town proper and two suburbs. It bas a pretty church, built since 1764, and a chapel; a commercial, a suburban, a free, and a garrison school, and two schools of industry for poor female children; an hospital, and a bank. The manufactures consist of hardware, including nails, buckles, fishing-hooks, \&c.; pottery, brandy, and tiles. The trade is chiefly in hardware, wood, and the first necessaries. There is a good and roomy haven. Pop. (1845), 2673.-(Kraft's Haandbog over Kongeriget Norge.)

FREDERIKSSUND, a seaport tn. Denmark, isl. Seeland, E. side of the Röeskilde-fiord, 24 m . N. W. Copenhagen. It is a very insignificant place, but $S$. of the town are a haven, and good anchorage for small vessels. In the immediate neighbourhood are some of the most interesting tumuli, from which the museums of the capital have derived many of their treasures. Pop. 400.

FREDERIKSV ERN, a maritime and strongly fortified tn. Norway, bail. Jarlsberg and Laurvig, 68 m. S.S.W. Christiania; lat. $59^{\circ} \mathrm{N} . ;$ lon. $10^{\circ} 1^{\prime} \mathrm{E}$. It has a church and chapel, naval, and three other scliools, a naval hospital, and a poorhouse. Its harbour is good and roomy, and has two entrances. Since I814, Frederiksværn has been the chief station of the Norwegian fleet. It has a royal building-yard, but no trade of any kind. Stcamers touch here from Christiania, Arendal, Christiansand, \&c. Pop. 938.-(Kraft's Haandbog over Kongeriget Norge.)

FREDERIKSVÄRK, or Friedrichswerk, a seaport tn. Denmark, isl. Seeland, on a canal between the Arresee and the Röeskilde-fiord, 30 m . N.W. Copenhagen. It contains the largest royal manufactories in Denmark. The chief articles manufactured are gunpowder projectiles, muskets, cutlery, and all kinds of agricultural implements. The harbour a dmits only small vessels. Pop. 500.

FREDERICTON, formerly St. Ann, a th. British N. America, the cap. of New Brunswick, on the St. John's river, 54 m . N.N.W. St. John's. The streets are regularly laid out, some of them being 1 m . long, and, for the most part, continuonsly built with wooden houses. The public buildings comprise the province hall, where the provincial assembly and the courts of justice assemble; the Government house, the Episcopal and the Presbyterian chureh and chapels. The river is here $\frac{3}{4} \mathrm{~m}$. wide, and navigable for ships of 50 tons for 3 m . above the town. Frederickton has become the chief entrepôt of commerce with the interior, receiving large quantities of British merchandise for distribution in the province; whilst the timber and lumber from the upper districts are collected here before they are floated down for exportation to St. John's, with which place there is regular communication by steamers. Pop. (1847), about 6000 .

FREDONIA, a vil., U. States, New York, 290 m . W. by S. Albany, and 2 m . E. Lake Erie. It has five churches, an academy, and several mills. Here is an inflammable spring, the gas of which is used for lighting the streets and liouses. Pop. about 1000 .

FREEFOLK Manor, par. Eng. Hants; 800 ac . Pop. 70.
FREEMANTLE, a tn., W. Anstralia, co. Perth, at the mouth of the Swan river, and about $8 \mathrm{~m} . \mathrm{S}$.W. from the town of that name; lat. $32^{\circ} 5^{\prime}$ S.; lon. $115^{\circ} 40^{\prime}$ E.

FREEPORT, a tn., U. States, Pennsylvania, 155 m . W.N.W. Harrisburg, at the confluence of Buffalo Creek with
the Alleghany. It has five churches, two schools, a variety of mills, and other manufacturing establishments. The Pennsylvania canal passes through the place. Pop. 727.

FREETHORPE, par. Eng. Norfolk; 1050 ac. Pop. 383.
FREETOWN, a maritime tn., W. Africa, Sierra Leone, of which colony it is the capital or principal settlement, at the extremity of the cape of the same name, which forms the $S$. side of the estuary of the river Sierra Leone; lat. $8^{\circ} 29^{\prime} 54^{\prime \prime} \mathrm{N}$.; lon. $13^{\circ} 14^{\prime} 30^{\prime \prime}$ W. (r.) It is sufficiently elevated above the sea to secure it in some degree from the evils of swamps and stagnant water in its immediate neighbourhood; but the long, low, flat land of the opposite Bullam shore, frequently sends over its noxious exhalations, while a no less dangerous miasma is wafted from some stagnant pools on the S.W. of the town. The town is clean and well laid out, the principal streets being very broad and straight, especially that part inhabited by Europeans and the more important of the native traders, whose houses are generally detached, and surrounded by trees. The cottages of the liberated Africans, and numerous Kroomen, are closer, and with less pretensions to regularity, although their location has been carefully selected with a view to secure a free circulation of air. A beautiful green sward overspreads the streets, giving them an air of delightful freshness. The public buildings comprise a church, seven chapels, a church missionary, grammar, and several other schools, Governor's house, and barracks, the latter two occupying an airy and commanding situation. The market is held in a square, in a central position, and is well supplied with tropical fruits, including pine apples, which are abundant. Fish of various kinds are also plentiful. Nearly all the different articles exposed for sale are proffered by Negro women, all liberated Africans or their descendants, whose volubility of tongue, and noisy mirth, add not a little to the liveliness of the scene. There is good anchorage off the town, about a quarter of a mile from the shore, in 12 or 14 fathoms, muddy bottom. Pop. (1847), 18,000.-(Allen's Niger; Colonial Report, \&c.)

FREEWILL ISLANDS. See David (St.), Islands.
FREGENAL-de-ta-sierra [anc. Nertobriga], a tn. Spain, Estremadura, prov. of, and 52 m . S. by E. Badajos, in a valley, on the confines of Andalnsia, r. bank, Martiga. The houses, in general, are well built, and, in many cases, decorated with balconies; the streets are wide, regular, and paved, and the town comprises four squares. It has three churches, several convents, three chapels, and a Jesuits' college; a large and convenient townhouse, containing the municipal offices, prison, and the residence of the Alcade; a commodious hospital, storehouse, and an ancient but well preserved castle, erected by the Templars, wherein is the bull-ring, capable of accommodating 4000 persons. In the environs are three fine cemeteries, and an agreeable promenade. Manufactures:linen and woollen fabrics, leather, hats, soap, earthenware, bricks, tiles, wine, and oil. Trade:-grain, cattle, flax, wool, \&c. An annual fair is held in September. Pop. 5975.

FREHEL, a cape, France, dep. Côtes-du Nord, 13 m . W. by N. St. Malo, with a revolving light on it, 246 ft . above the sea; lat. $48^{\circ} 41^{\prime} 6^{\prime \prime}$ N.; lon. $2^{\circ} 19^{\prime}$ W. (n.)

FREIAMT, a tn. Baden, circle, Upper Rhine, bail. Emmendingen. It contains a parish church. Pop. 2179.

FREIBERG [Latin, Friberga], a tn. Saxony, circle, and 20 m .W.S.W. Dresden, on the Miinzebach, near the Mulde. It consists of an inner town, entered by five gates, and still partly surrounded by old walls flanked with numerous towers; and of four suburbs, and is generally well built of gneiss, with spacious streets, regularly formed, and paved with gneiss. The ditches and ramparts have, for the most part, been filled up and levelled, and are now covered with planted alleys, ponds, and gardens. The principal buildings and establishments are the cathedral [Dom] or Marienkirche, originally founded in 1480, and renewed in 1826, a large and handsome gothic structure, devoid of towers, but containing a number of interesting objects; among others, the tomb of Maurice of Saxony, a lofty and richly sculptured sarcophagus, with a kneeling statue of the prince, and the tomb of the celebrated geologist Werner, two gothic pulpits, curiously carved in stone, a lady chapel enriched with Saxon marble and serpentine, and a pavement inlaid with brass; the Peterskirche, with three towers, one of them very lofty; the Nicolaikirche, with two towers, and three other churches of little architectural
merit; the townhouse, an old building, which gives a good specimen of N. German gothic; the mining academy, once, under Werner, the head of the Neptunian school, the most renowned in Europe, with a museum attached, particularly rich in the mincrals of Saxony, and mining models; the royal silver refinery, the gymnasium, normal, burgher, and several elementary schools; the orphan and military hospitals, blind asylum, workhonse, theatre, \&c. The manufactures consist of ropes, articles in gold, silver, and pinchbeck ; woollen cloth, articles in wood, lace, soda, white lead, and gunshot; and there are two weekly markets, and two annual fairs. Freiberg is the centre of a most important mining district. The minerals consist of silver, copper, lead, and cobalt; and the number of mines is said to be about 130 . They are situated in rocks of primary formation, in which gneiss is the most prevalent, and have been wrought from a very early period. When in their most prodnctive state, they diffused great wealth throughout the district; and the town contained at least 40,000 inhabitants, but the depths to which the workings have been carried, has both increased the expense and diminished the produce, and the town, in consequence, was long undergoing a gradual decline; from which, however, it would appear, in more recent times, to be partially recovering. To clear many rich lodes from the water with which they are covered, a gigantic high-water level has been commenced. It will be about 24 m . long, and lead the water through the mountains to the Elbc at Meissen. Pop. (1843), 11,054; (1846), 13,194; (1849), 14,151 .

FREIBURG, or Fretburg, or Freiburg im Breisqau [Latin, Friburgum-Brisgovium; French, Fribourg-en-Brisgau], a tu. Baden, circle, Upper Rhine, on the Treisam, and on the railway trom Carlsruhe, in one of the most beautiful and fertile districts of S. Germany, at the W. foot of the Black Forest, 42 m. S.S.E. Strasburg. It consists of the town proper, still possessing some remains of fortification, and entered by four gates, and of two suburbs, and is the seat of a superior civil and criminal court, and of several public offices. The houses in general are substantially built; and fountains yielding copious streams of the purest water are found in every quarter. There are also two large and tolerably handsome squares, but

the cathedral and meachants houne, faeibukg. From Allemagne Monumentale et Pittoresque.
the streets, with one or two exceptions, are narrow, dark, and winding. The buildings most deserving of notice are the minnster or cathedral, a large and beautiful gothic structure, Vol. I.
buiit of red sandstone, in the form of a cross, and equally admired for its delicate symmetry and tasteful decorations, with a magnificent portal richly sculptured, and surmounted by a beautiful tower, partly of exquisite open work, 380 ft . high; the Ludwigskirche, a handsome modern structure in the Byzantine style, finely sitnated on an elevation in the N. part of the town, adorned with a statue of the grand Duke Ludwig, and surmounted by a square tower ; the church of St. Martin, built in the 13 th century, and originally belonging to a Frauciscan monastery; the university, founded in 1456 , a complete establishment, but not prospering, the number of students having declined from 608 , in 1825, to 228 , in 1844 ; the $R$. Catholic seminary, a very conspicuous and elegant edifice; the merchant house, now the chief tax office, a quaint gothic structure, resting on pointed arches, and decorated externally with fresco portraits of the Emperor Maximilian, his son Philip I.. Charles V., and Ferdinand I.; the grand ducal palace and government buildings; the museum, lyceum, gymnasium, theatre, cornhall, new barracks, several monasteries and hospitals. The manufactures are numerous, but not individually of great extent. The most important are beer, oil, chicory, cutlery, surgical instruments, musical instruments, and red leather. The trade is cliefly in wine and timber; and there are both a weekly market numerously attended by the inhabitants of tho Black Forest, and two largs annual fairs, at which the principal articles sold are corn, cattle, hemp, and wood. Freiburg is the see of an archbishop, and the seat of the courts and offices for the circle of the Upper Rhine, and possesses several societies, agricultural, literary, and scientific, good anatomical and physical collections, and a botanical garden. It is a place of considerable antiquity, but its history has no particular interest. Pop. 11,488.

FREibURG, Switzerland. Sie Fribourg.
FREIBURG, a vil. Hanover, prov. of, and 18 m . N.W. Stade, on a pool of the Lower Elbe, opposite to Brockdorf. It contains a parish church, and has a small harbour much encumbered by sandbanks, and some shipping. Pop. 913.

FREIBU IRG, two places, Prussia- -1, A tn., prov. Saxony, gov. of, and 13 m. S.W. Merseburg, in a fertile district, 1. bank, Unstrnt. It is the seat of a court of law, and several public offices; contains an old church with three towers, a castle, and hospital; and has manufactures of woollen and linen cloth, a trade in corn, wine, and cattle, and two annual fairs. Pop. 2608.-2, A tn., prov. Silesia, gov. of, and 35 m . W.S. W. Breslan, on the Polsnitz, and on the railway from Breslau. It consists of the town proper, surrounded by walls with three gates, and of three suburbs; is the seat of a law court, contains a Protestant, and a R. Catholic parish church, an hospital with a church, and a townhouse; and has manufactures of woollen and cotton goods, and tobacco; a large flax-mill moved by steam, and several other mills, distilleries, tile works, linekilns, a considerable trade in linen, a weekly market, and two annual fairs. There is a marble quarry in the vicinity. Pop. 3289.

FREIENOHL, a vil. Rhenish Prussia, gov. of, and 5 m . E.S.E. Arnsberg, on the Rulir. It contains a 1R. Catholic parish chureh. Many articles in wood are made here and in the surrounding district, and largely exported, particularly to America. Pop. 970.

FREIENSERN, a market tn. Hesse Darmstadt, prov. Oberhessen, circle of, and 9 m . N.E. Hungen, on the Seebach. It has a parish church, and manufactures of cotton and linen goods, a dye-work, and several mills. Pop. 1132.

FLEIENWALDE, two tns. Prussia:-1, Prov. Brandenburg, gov. Potsdam, in a fertile and beautiful dist., near the old Oder, 31 m . N.E. Berlin. It is entercd by three gates, is the seat of a court of law and several public offices; contains two churches, a burgher school, and hospital ; and has extensive alum works, mineral springs, a ferry over the Oder, a fishery, trade in cattle, and three annual fairs. Pop. 3591.-2, Prov. Pomerania, gov. of, and 31 m . E. Stettin. It has a chureh, and four annual markets. Pop. 1747.

FREIIIAN, a tn. and par. Prussia, prov. Silesia, gov. of, and 38 m . N.N.E. Breslau. It has a Protestant, and a R. Catholic parish clurch, a castle with fine gardens, an hospital, tar-works, and four annual fairs. Pop. 1211.

130

## FREIHEIT

FREIHEIT, a tn. Bohemia, circle, Bidschow, on the Aupe, at the foot of the Rehhorngebirge, 25 m . E.N.E. Gitschin. It is built chiefly of wood, but has some good stone houses; contains a parish church, townhouse, school, and hospital; and has manufactures of linen, a bleachfield, and four annual fairs. Gold and silver mines were at one time extensively worked in the district, but are supposed to be now completely exhausted. In the neighbourhood, in a narrow and gloomy valley, is the watering-place of Johannesbad, with a bathing establishment supplied by thermal springs. Pop. 609.

FREINSHEIM, a market tn. Bavaria, Palatinate, 15 m . N.E. Spires. It contains three churches and a castle, and has a mill, and a mineral spring. Pop. 2191.

FREISING, a tn. Upper Bavaria, cap. dist. of same name, 1. bank, Isar, here crossed by a long bridge, at the confluence of the Moosach, 21 m . N.N.E. Munich. It is the seat of an appeal court for Upper Bavaria, and of other courts and public offices; is well built, contains six churches, one of them, originally a cathedral, with a very ancient and curious crypt; a royal palace, once the residence of a bishop; a townhouse, ecelesiastical and normal seminary, lyceum, gymnasium, Latin, agricultural, and industrial schools; a blind asylum, hospital, and poorhouse; and has numerous breweries, three distilleries, two tobacco factories, saltpetre and vinegar works, a wax refinery, bleachfield, gypsum, oil, and other mills. Freising had a church in the fitth, and became the see of a bishop in the eighth, century. This see was long held by prince bishops, who had seats in the imperial diet. The bishopric was secularized in 1802, and the sce transferred to Munich. Pop. of tn .5350 ; of dist. (area, 112 geo. sq. m.), 16,780.

FREISTADT, a tn. Bavaria, Upper Palatinate, 37 m . W.N.W. Ratisbon, l. bank, Schwarzach. It is surreunded with walls and ditches, contains three churches, a Franciscan hospitium and hospital, and has wire-works. Pop. 798.

FREISTADT, two places, Prussia:-1, A tn., prov. Silesia, gov. of, and 45 m. N.N.W. Liegnitz, cap. circle of same name, on the Sieger. It is the seat of a court of law, and offices for the circle; contains a Protestant, and a R. Catholic parish church, a courthouse, old Carmelite monastery, now converted into an arsenal; an orphan, and an ordinary hospital ; a savings'bank, and Bible society; and has manufactures of woollen and linen cloth, numerous worsted and other mills, a wax refinery, tile works, two weekly markets, and three annual fairs. Pop. 3446.-The criscle, area, 260 geo. sq. m., is, for the most part, flat, though occasionally broken by a few low hills, is watered by the Oder, here navigable, well wooded, and tolerably fertile. Pop. 50,341. 2, A tn., prov. W. Prussia, gov. of, and 16 m. S.E. Marienwerder, on a height, in a fertile district. It contains a parish church, is garrisoned by a company of invalids, and has six annual fairs. Pop. 1875.

FREISTETT', a vil. Baden, circle, Middle Rhine, r. bank, Rline, 14 m . N.N.W. Offenburg. It contains a parish church and a chapel, and has a small harbour, at which a considerable trade is carried on. Pop. 1717.

FREIWALDAU, a market tn. Prussia, prov. Silesia, gov. Liegnitz, circle of, and 16 m . S.S.W. Sagan. It has a chnreh, manufactures of linen and woollen cloth, a calico printfield, pottery, several mills, and two annual fairs. Pop. 985.

FREIXO, with affixes, two places, Portugal:-1, ( $d^{\prime}$ Espada à Cinta), a tu. and par., prov. Tras-os-Montes, r. bank, Douro, 26 m . N.E. Oporto. It contains a fine castle with three towers, raises excellent almonds, and is famous for its cheese. Pop. 1220.-2, (de Numão), a tn. and par. BeiraAlta, l. bank, Douro, about 21 m. E. Lamego. Pop. 717.

FREJUS [anc. Forum Julii], a tn. France, dep. Var, 15 m. S.E. Draguignan, near the Argeus, and about $\frac{3}{4}$ m. from the Meditcrranean. It is beautifully situated on an easy height, overlooking the sea, and is the seat of a bishop. It has a diocesan seminary, a tribunal of commerce, but very little trade, and less manufactures. Almost the only edifices
worth noticing are the constructions left by the Romans worth noticing are the constructions left by the Romans; comprising the remains of the ancierit port, including a pharos or lighthouse, and ancient quays; an amphitheatre, nearly choked up; a triumphal arch, called by the inhabitants la porte Dorée; and the ruins of a noble aqueduct, which was nearly 19 m . long, and led the waters of the Siague into the Roman city of Forum Julii. Mark Antony sent into this port 200 galleys, the spolia opima of Actium. In 940 , the Saracens
took, pillaged, and burned the most of it. In 1475, a band of corsairs captured and ruined it. Napoleon Bonaparte disembarked here on his return from Egypt, Oct. 9, 1799; and embarked here for Elba, in 1814. Pop. 2965.

FREMINGTON, par. Eng. Devon; 6600 ac. Pop. (1851), 1350.

FRENCH BROAD, a river, U. States, which rises on the N. side of the Blue Mountains, in N. Carolina, flows N. for about 90 m ., turns W., enters Tennessee, and joins the Holston, 5 m . above Knoxville. It is navigable to Dundridge for boats of 15 tons. Its principal affluents are the Nolachucky on the N., and the Great and Little Pigeon on the S.

FRENCH ISLAND, an isl. Australia Felix, in the harbour of Western Port; about 6 m . long, and 5 broad.

FRENCH PARK, a small market tn. Ireland, co. Roscommon, $16 \frac{1}{2} \mathrm{~m}$. S.W. Jeitrim. It has a market on Thursday for yarn and agricultural produce, and six fairs annually. Near it are the remains of an old Dominican abbey. Pop. 515.

FRENCH RIVER, a river Upper Canada, issuing from lake Nipissing, and after a course W. by S. of 52 m ., direct distance, falling into Georgian bay, Lake Huron.

FRENCHMAN'S CAP, a lofty mountain, Van Diemen's Land, 5000 ft . high, 6 m . N.E. the N.E. corner of Macquarie harbour; lat. $42^{\circ} 18^{\prime} \mathrm{S}$.; lon. $145^{\circ} 42^{\prime} \mathrm{E}$.

FRENEUSE, or Grand Lake, a lake, New Brunswick, 9 m . E. Fredericton, 9 m . long by 2 wide, and in some places 40 fathoms deep. It receives several rivers, and abounds in fish.

FRENSIIAM, par. Eng. Surrey; 8780 ac. Pop. 1583.
FRENZE, par. Eng. Norfolk; 500 ac. Pop. 46.
FRESHFOLRD, a tn. and par. Ireland, co. Kilkenny. The rown, situated at the foot of a wooded hill, $7 \frac{1}{2} \mathrm{~m}$. N.W. Kilkenny, consists of a square, with several streets diverging from it, all nearly straight, and kept tolerably clean. It has a church, built in 1730, with a beautiful porch of great antiquity, a R. Catholic chapel, two day schools, dispensary, fcver hospital, and other charitable institutions. The weaving of tweed and flannel is carricd on to a small extent; but the great body of the inhabitants are labourers. Four annual fairs, two of them for pigs. Area of par. 2171 ac . Pop. (1841), 2650, of which town 2075. - (Local Correspondent.)

FRESHFORD, par. Eng. Somersct; 440 ac. Pop. 645. FRESHWATER, par. Eng. Hants; 4760 ac. Pop. 1299. FRESNAY-sur-Sarthe, or Fresna y-le-Vicomte, a tn. France, dep. Sarthe, 20 m . N.N.W. Le Mans. It is built on a slope, 1 . bank, Sarthe, across which is a bridge leading to a suburb. It is old, but has been much modernized and improved. Near it are the ruins of a strong castle; and the parish church is an interesting gothic pile, of early architecture. It has a spacious linen-market, and a neat townhouse. The chicf manufactures are fine linen and damasks. There is also a trade in grain, linen, and cattle. Pop. 3217.

FRESNEDA [anc. Fraxneda], a tn. Spain, Aragon, prov. of, and 70 m . N.E. by E. Teruel, 15 m . S.E. Alcañiz. It is tolerably well built ; has two parish churches, three chapels, a townhouse, prison, hospital, storehouse, and an ancient castle. Manufactures:--silken and hempen fabrics, winc, and oil. Trade:-grain and wool. Pop. 1635.-(Madoz.)

FRESNES, a tn. France, dep. Nord, 6 m . N. Valenciennes, in a coal and iron district, and the first place where a French-made steam engine was set up. It has manufactures of nails, and common glass, bleacheries, breweries, distilleries, and boat-building yards. In the vicinity are four coal pits, employing 500 to 600 people. Pop. 4072.

FRLSNILLLO, a city, Mexico, state of, and 30 m . N.N.W. Zacatecas. It has a spacious square, with a costly fountain in the centre, and contains several large and showy churches. In its vicinity are the celebrated mines of Fresnillo, reckoned among the most productive in Mexico. Pop. about 18,000 .

FRESNO, several tns. and vils. Spain, of which the most important are-1, (de-la-Vega), A tn. prov. of, and $16 \mathrm{~m} . \mathrm{S}$. Leon, near r. bank, Elsa. The houses are ill built, and form one square, and several streets. It has a parish church, townhouse, school, two fountains, and two cemeteries. Manufactures :-linen fabrics, and leather. Pop. 2061.-2, (-el-Viego), A tn. Leon, prov. of, and 34 m. S.W. Valladolid, between the rivulets Lanzon and Menines; containing a parish church, townhall, prison, school, and cemetery. Manufactures :-tiles and bricks. Pop. 1016.

FRESNOY-lb Graub, a vil. France, dep. Aisne, 8 m . N.N.E. St. Quentin; with manufactures of shawls, gauze, veils, bareges, \&c. Pop. 3952.

FRESSINGFIELD, par. Eng. Suffolk; 3780 ac. P. 1456.
FRES'TON, par. Eng. Suffolk; 1630 ac. Pop. 224.
FRETHERNE, par. Eng. Gloucester ; 380 ac. P. 242.
FRETIN, a vil. France, dep. Nord, about 6 m . S.S.E. Lille. It contains a remarkable monument of Jehan, Sicur de Maisnil, and has numerous oil-mills. Pop. 1499.

FRETTENHAM, par. Eng. Norfolk; 1420 ac. P. 285.
FREUCHIE, a vil. Scotland, co. Fife, par. of, and $1 \frac{1}{2} \mathrm{~m}$. E.S.E. Falkland. It has a U. Presbyterian chureh, and a subscription schonl. Iuhabitants chiefly employed in handloom weaving. Yop. 713.

FREUDENBERG, several places, Germany, particularly -1, A.th. Baden, circle Lower Rhine, bail. of, and 8 m . W.S.W. Wertheim, 1. bank, Main. It has a considerable trale in stones and fruit; and three annual fairs. Pop. 1718. -2, A tn. Rhenish Prussia, gov. of, and 39 m. S.S.W. Arnsberg. It contains a castle, and a Protestant church, and has extensive steel works. Pop. 675.-3, A vil. Rhenish Prussia, gov. Treves, circle of, and 6 m . S.S.W. Saarburg, not far from the Saar. It contains a R. Catholic parish church, and a synagogue; and has a trade in cattle, and four amnual fairs. Pop. 745.

FREUDENSTADT, a tn. Würtemberg, eircle Schwarzwald, cap. bail. of same name, r. bank, Murg, 40 m. S.W. Stutgart. It was once fortified, and has still some remains of fortification; is tolerably well built, contains a large square, adorned with arcades, a tine old chureh, and townhouse; and has manufactures of linen, nails, ehemical products, vinegar, rosin, and turpentine; and a trade in wood and cattle, sent chiefly to Strasburg. Pop. town, 4130 ; bail. (area 162 geo. sq. m . in the bleakest part of the Black Forest), 26,595.

FREUDENTHAL, a vil. Würtemberg, circle, Neckar, r. bank, Stein, about 10 m . S.W. Heilbromn. It contains a castle, and a Protestant parish chureh, with two alabaster monuments, and a synagogue. Pop. 833.

FREUDENTHAL, a tn. Austria, Silesia, circle, Troppau, cap. lordship of same name, in a narrow valley on the Schwarzwasser, 26 m . N.N.E. Olmütz. It consists of the town proper, surrounded by walls, and of three suburbs; contains a castle, with a chapel, library, and fine gardens, a parish chureh, liarist college, high school, and hospital ; and bas manufactures of woollen cloth, hosiery, and leather, a rosoglio factory, a weckly market, and an annual fair. In the neighbourhood are extensive ironworks. Pop. town, 3608 ; lordship, 13,338.

FREVEN'T, a tn. France, dep. Pas-de-Calais, 6 m . from St. Paul-sur-Ternoise, on the Cauche. It has manufactures of linen, with some flax and woollen spinneries. Pop. 3097.

FREYBERG [Moravian, Przibon], a tn. Moravia, circle, Prerau, l. bank, Lubina, 23 m . S.S.E. Troppau. It consists of the town proper, and a suburb, has four churches and chapels, a townhousc, Piarist college and hospital, important manufactures of woollen and linen cloth, a trade in wool and cattle, several mills, and four annual fairs. I'op. 4760.

FRE Y BU RG and Fretuerg. See Fieiburg, Freiberg, and Fubourg.

FREYCINET, an isl. group, Indian Ocean, N.W. coast Australia, W. island, in lat. $15^{\circ} 0^{\circ} \mathrm{S}$.; lon. $124^{\circ} 36^{\prime} \mathrm{E}$. (r.)

FREYCINET'S PENINSULA, Van Diemen's Land, W. coast, forming, with Schouten's island, the E. side of tyster Bay; lat. $42^{\circ} 18^{\prime}$ S.; lon. $148^{\circ} 20^{\prime}$ E.

FREYNESTOWN, par. Irel. Wieklow; 1569ac. P. 294.
FREYR, a hamlet, Belgium, prov. Namur, 4 m. S.W. Dinant, where, in 1819, a magnificent grotto was discovered, cut in the upper part of a ealcareous rock. It consists of eight chambers, connected by galleries; in all are beantiful stalaetites. At Freyr is a fine chateau, built on a cliff overhanging the Maas, in which was signed, Oct. 25, 1675, the earliest commercial treaty between the French and Spaniards.

FREYSTADT, several places, Austria, particularly-1, (or Freinstalt), A tn. Upper Austria, circle, Miihl, in a beautiful valley on the little Feldaist, 89 m . W.N.W. Vienna. It contains a number of handsome houses, two churches, an ancient and a modern castle, and a Piarist college, is the seat of a court of justice, and has manufactures of linen and yarn, and some trade in these articles. Pop. 3000.-2, A tn. Austrian Silesia, circle, and 7 m. N.W. Teschen, r. bank, Olsa,
with a parish church, and a castle. Pop. 900.-3, A market tn. Moravia, circle, and 18 m . N.E. Mradisch. It contains a handsome church and townhouse, and has extensive manufactures of wine casks, and other articles of cooperage, a trade in these and in linen, three large weekly markets, and four annual fairs. Pop. 941.

FREYS'TÄDTEL, Gaioocz, or Freysztak, a tn. IIungary, co. of, and 15 m . W.N.W. Neutra, in a fertile district, on a height above l. bank, Waag, here crossed by a long bridge. It coutaius an elegant castle of Count Erdody, a square massive structure, situated on a stecp limestone cliff, with good colleetions, and fine gardens; an old parish and a Franciscan gothic church, and a curious round tower, supposed to have belonged to a Turkish minaret; and has extensive manufactures of various articles of wood, a considerable traffic in these, and important cattle markets. Pop. 4660.

FREYSTROP, par. Wales, Brecon. Pop. 162.
FREYWALDAU, or Fueiwalde, a tn. Austrian Silesia, circle of, and 41 m . W.N.W. Troppau, cap. dist. of same name, about 1300 ft . above the sea, in an extensive valley, at the foot of the Goldkoppe. It contains a church, castle, townhouse, hospital, and poorhouse, and has manufactures of woollen and linen cloth, potash works, a wax refinery, bleachfield, a paper and other mills. Pop. tn. 2100; dist. 18,332.

FRIAUL, Italy. See Friuli.
FRIBOURG, or Fueiburg, a can. Switzerland, consisting of three small detached portions, wholly euclosed by can. Vaud, and of Fribourg proper, bounded N. and E. by Bern, S. and W. by Yaud, and N.W. by the lake of Neufchatel; greatest length from N. to S .38 m ., greatest breadth 28 m .; area, 450 geo. sq. in. The surface is finely diversified, and presents almost all varieties of scenery, consisting of grassy or woody hills, lofty mountains, and beautiful Alpine valleys. It attains its greatest height in the S. and S.E., where the mountains belong partly to the Jorat, and partly to the Bernese Alps. The culininating points are the Molesson, 6000 ft ., and the Dent de Branleire, 7000 ft . The whole canton, excepting a very small portion of the S.W., the waters of which are carried into the Lake of Geneva, belongs to the basin of the Aar, being drained partly by the Broye, but to a much larger extent by the Saane, which flows through it centrally from S. to N. The principal lake is Morat. The elinate varies with the surface. In the N. and flatter districts, spring is some weeks earlier than the more mountainous regions; but, even in them, the loftiest summits are far below the line of perpetual snow, and there are no glaciers. The prevailing winds are the N. and N.E. Both bring cold, but fair weather; the W. wind is generally accompanied with rain and snow ; mists and hoar-frosts are frequent in spring, and often do great damage. In regard to vegetable produce, the canton may be divided into three parts. From the S. frontiers northwards, as far as the district of Gruyére, all the surface not absolutely barren or covered by wood, is oceupied by meadows and pastures. A second portion, ineluded between the distriets of Gruyére and Broye, and compre hending that in which the town of Fribourg stands, has no barren summits, and, in addition to woods and meadows, has a proportion of arable land. The third and most N . tract, including the space between the Broye and the Lake of Neufchatel, is both fertile and well cultivated, yielding heavy crops of grain, and grapes producing tolerable wine. Here, too, tobaceo is cultivated, and much excellent fruit is grown. The minerals are of little importance. The great mass of the loftier mountains is composed of limestone, in the strata of which beds of gypsum, of a reddish colour, and containing sulphur, occasionally occur. Almost all the lower hills are composed of sandstone, often abounding with fossil platits. The most important produce of the canton is that of the dairy. The Gruyére cheese has long been famous, and is exported to a large amount. A considerable revenue is also obtained from timber. Manufactures, in the ordinary sense of the term, are insignificant. Fribourg ranks ninth in the Swiss confederation, to which it was admitted in 1481. A bout seven-eighths of the inhabitants are R. Catholics. The language of the mountainous districts is generally Romansh; of the towns and villages German and French, with a considerable admixture of patois. The government was strongly aristocratic up to 1830, when the democratic principle prevailed, and the suffrage, by which the legislative council and
all the principal offices are virtually appointed, was extended, with a few unimportant exceptions, to all males of 25 years of age. The administrative division is into 13 districts, of which Fribourg is the eapital. Pop. 91,145.

FRIBOURG, or Freiburg im Uechtland [Latin, Friburgi Nuithonum], a tn. Switzerland, cap. can. of same name, most picturesquely situated on both sides of the Saane, here crossed by a magnificent suspension bridge, 180 ft . high, 941 ft . long, and 22 ft .11 in . broad. The town stands on ground which is very much broken, and so steep that the roofs of a lower tier of houses sometimes form the pavement of a higher, and is surrounded by lofty walls, flanked with antique towers. It is on the whole well built. All the honses are of stone, several of the squares are handsome, and though from the nature of the ground almost all the streets are uneven, some of them are both long and spacious. The most remarkable

24 broad, fertile and well cultivated, producing much corn and wine. It comprehends 25 parishes. Pop. 20,000.

FRICKENHAUSEN, a tn. Bavaria, Lower Franconia, r. bank, Main, S.E. Würzburg. It contains a church, chapel, and hospital; and has dye-works; a trade in wine and fruit, sandstone quarries, and two annual fairs. Pop. 1052.

FRIDA YTHORPE, par. Eng. York (E. Riding); 2070 ac. Pop. 320.

FRIEDAU, or Fridau, a vil. and lordship, Lower Aus tria, r. bank, Bielach, $6 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. St. Polten. It contains a castle, and has an extensive calico factory, which annually produces 30,000 pieces; an iron-smelting furnace, a coppermill, and manufactures of ironware. Pop. 700.

FRIEDBERG, several places, Austria, particularly :1, A tn. Bohemia, circle of, and 27 m . W.S.W. Budweis, l. bank. Moldau. It contains a parish church, townhouse, and hospital ; and has manufactures of linen, a bleachfield, two distilleries, and three mills. Pop. 789.-2, A tn. Styria, circle of, and 39 m . N.E. Grätz, on the Pinzau, with a parish church, townhouse, hospital, and poorhouse; manufactures of cloth, and four annual fairs. Its walls are said to have been built out of the ransom extorted for the liberation of Richard Cœur de Lion. Pop. 550.-3, A tn. Austrian Silesia, circle of, and 47 m . N.W. Troppau, cap. bail. of same name, at the confluence of the Schlippe and Setzdorf. It has a church, an old castle, distillery, and four annual fairs. Much flax is grown and handspun in the district. Pop. tn., 931; bail., 8750.

FRIEDBERG.-1, A tn. Hesse Darmstadt, prov. Oberhessen, on a height near r. bank, Use, 33 m . N. Darmstadt. It is surrounded by old walls, with one lofty round tower and two gates ; consists of the Ufervorstadt and the Burg; contains two churches, a synagogue, townhouse, barracks, savings'bank, normal, Latin, and several elementary schools; and has manufactures of woollen and linen cloth, tobaceo, and liqueurs, and
edifices are the Niklaus church, a handsome gothic structure, of the 15 th century, with a spire 240 ft . high, a portal, with curious bas reliefs, and an organ, regarded as one of the finest in Europe; the Church of the Barefoot Monks, a large and handsome building, with a single nave; the Byzantine church, in the form of a rotunda, with a dome; the Jesuit chureh, not remarkable in its exterior, but internally the most richly decorated in the town; the Capuchin church, with a descent from the cross by Annibale Caracci ; the chureh of St. John; the courthouse, a modern building, on the site of the old castle of the dukes of Zaihringen; the townhouse, with a remarkable lime tree beside it, said to have been planted in 1476, the day of the battle of Morat; the Jesuit college, on the loftiest height of the town, and towering like a fortress above its other buildings; the Lyceum, and the town schools. Fribourg is the seat of an appeal court for the canton, and the residence of a R. Catholic bishop, who takes the title of bishop of Lausanne and Geneva. Its manufactures consist of cotton goods, carthenware, straw hats, playing cards, and tobacco, and there are several extensive dye-works and tanneries. The inliabitants are curiously divided in respect of language, those of the upper town speaking French, and those of the lower town German. They are remarkable for their almost unanimous adherence to the Romish church, and the favour shown to the Jesuits. Pop. 9120.

FRIBUSS, Frübis, or Früras, a tn. Bohemia, circle, Elbogen, in the Erzgebirge, 84 m. N.N.W. Prague. It las a parish church, manufactures of woollen and linen hosiery, lace, and caps. Tin is worked and smelted here, and many fine agates and other pebbles are found in the vicinity.

FRICK, a vil. and par. Switzerland, can. Argau, cap. circle, and in a valley of same name, at the junction of the ligh road from Ziirich and Aarau to Basel, 8 m . N. Aarau. It is both finely situated and well built; contains a parish chureh, parsonage and school-house, and a burgher hospital; and lias several much-frequented annual fairs. Pop. 1093.

The valley of the Frick [Frickithal], forming an anc. dist., now included in can. Aargau, is about 30 m . long by
four annual fairs. Friedberg is an ancient place, and occupies the site of a Roman station. Pop. 2700.-2, A tn. Bavaria, prov. Upper Bavaria, cap. dist. of same name, on the Acha, 4 m . E. Augsburg. It is the seat of a court of justice, contains three churches, one of them a fine structure, with beautiful painted glass; an old castle, built by Ludwig the Strong, and often the ducal residence; and an hospital; and has manufactures of clocks and instruments, tile-works, several breweries, a worsted, and other mills, a trade in fruit and hops, and four annual fairs. Pop. of $t n$., 2000 ; dist. (area, 104 geo. sq. m.), 17,055.-3, Several places, Prussia:-1, A tn., prov. Brandenburg, gov. of, and 47 m . N.E. Frankfurt, cap. circle of same name. It lies between several lakes, is surrounded with walls, is the seat of several courts and offices, has a church and a courthouse, manufactures of linen and leather, a walk-mill, a trade in cattle, and four annual fairs. Pop. 4706.-The cIrcle, area, 320 geo. sq. m., is watered by the Netze, contains several lakes, and is densely wooded, but not fertile. Pop. 45,856. 2, (-am-Queis), A tn., prov. Silesia, gov. of, and 19 m. S. Liegnitz, on a slope, above r. bank, Queis. It contains a Protestant and a R. Catholic church, and an hospital ; and has manufactures of calico, linen and muslin, lace, and porcelain; oil, saw, and other mills; a weckly market, and four annual fairs. In the vicinity is a mineral spring, with a bathing establishnent. Pop. 2130.

FRIEDECK, a tn. Austrian Silesia, circle of, and 14 m . W.S.W. Teschen, r. bank, Ostrawitza. It contains a castle, two churehes, to one of which numerous pilgrimages are made; and two hospitals. Pop. 3700.

FRIEDERSDORF, several places, Prussia, particularly -1 , (-am-Queis), A vil., prov. Silesia, gov. of, and 38 m . W.N.W. Liegnitz, l. bank, Queis. It contains a parish chureh, and has manufactures of linen, and several mills. Pop. 1266. -2 , (-an-der-Landskrone), A vil., prov. Silesia, gov., and W. from Liegnitz, with a parish church, and two mills. Pop. 977.

FRIEDEW ALD, a tn. Hesse Cassel, prov. of, and 22 m . N.N.E. Fulda, cap. bail. of same name, at the foot of the

Drcienberg. It is indifferently built, but contains an old castle, now used as a hunting seat. Most of the inhabitants are hewers of wood. Pop. 1545.

FRIEDLAND, several places, Prussia:-1, A tn., E. Prussia, gov. of, and 28 m. S.E. Königsberg, cap. circle of same name, r. bank, Alle. It is the seat of a law court, has a church and a courthouse, manufactures of woollen cloth and leather, nud a trade in cattle. The Russians, under Bensingen, were here defeated by Napoleon in 1807. Pop. 2478.-The circie, area, 261 geo. sq. m., is, throughout, a monotonous flat, watered by the Alle, Pissa, and Guber. Pop. 34,375.2, A tn., prov. Silesia, gov. of and 46 m . S. W. Breslau, on the Steinan, on the frontiers of Bohemia, and nearly 1400 ft . above the sea. It contains a Protestant parish church, townhouse, and hospital ; and lias manufactures of linen and cotton goods, leather, and starch; a weekly market, and five annual fairs. Pop. 1343.-3, (Markisch Friedland), A tn., prov. E. Prussia, gov. of, and 119 m . W.S.W. Marienwerder. It is the seat of a court of law, has a Protestant, and a R. Catholic parish church, and a synagogue; manufactures of cloth, several distilleries, a trade in cattle, and seven annual fairs. Pop. 2280.-4, (Preussisch Friedland), A tu., prov. E. Prussia, gov. of, and 72 m . W.S.W. Marienwerder, r. bank, Dobrinka. It has a Protestant, and a R. Catholic chureh, and a courthouse; manufactures of woollen and linen eloth, and a trade in corn and malt. Pop. 1930.

FRIEDLAND, a tn. Mceklenberg-Strelitz, in a plain, on the Muihlenteich, 30 m. N.E. Strelitz. It is surrounded by walls and ditches, and entered by three gates; contains two churches, one of them a large and handsome gothic structure, and a gymnasium; and has manufactures of woollen and linen cloth, and copper ware; tile-works, limekilns, several mills, a trade in cattle, and three annual fairs. Tobaceo is cultivated to some extent in the vicinity. Pop. 4656.

FRIEDLAND, a tn. Bohemia, circle, Bunzlau, cap. lordship of same name, r. bank, Wittich, at the confluence of the Rasnitz, 68 m. N.N.E. Prague. It consists of the town proper, surrounded by walls, and of three suburbs; contains two churches, a normal school, and hospital ; and has manufactures of woollen, linen, and cotton cloth, a paper and walk mill, dye-works, a eonsiderable trade, and thrce much frequented annual fairs. At the S. end of the town, beautifully situated on a conical hill of basalt, stands the castle of Friedland, surrounded with a thick and lofty wall, and surmounted by a high tower, built in 1014. It belonged to the fanous General Wallenstein, who posseased the lordship, and took from it his title of Duke of Friedland. Pop. of th. 3497; of lordship (area, 96 geo. sq. m.), 33,203

FRIEILLAND, two places, Moravia:-1, A market tn., circle, Prerau, 1. bank, Ostrawitza, 44 m . E. Olmuitz. lt contains a church and school; and has iron-works, with smelting furnaces, manufactures of locks, and other artieles of iron, and three annual fairs. Pop. 1905.-2, A market tn., cirele of, and 22 m. N.N.E. Olmiitz, in a valley on a mountain slope. It eontains a church and school; and has a saw and a flour mill, a weekly market, and an annual fair. Pop. 754.

FRIEDRICHRODA, a ta. Saxe-Coburg, 10 in . S.W. Gotha. It is situated on a hill, contains a church and a towrhouse, and has manufactures of linen and dolls, a bleachfield, brewery, several mills, and two annual fairs. Some mines are worked in the neighbourhood. Pop. 2130.

FRIEDRICHSFELDE, a vil. Prussia, prov. Brandenburg, gov. of, and 21 m. N.E. Potsdam. It is a handsome, wellbuilt place, and contains a pleasure palace, with fine gardens; a parish church, and orphan school. Pop. 1000.

FRIEDRICHSHAFEN, or BUCHnorn, a tn. Wiartemberg, circle, Danube, on the N. shore of the lake, and 14 m . E. the town of Constanec. It is fively situated, contains a castle, church, and Latin school; and has a harbour on the lake, which is visited by steam-boats, and enables it to carry on a considerable trade. Pop. 1072.

FRIEDRICHSHAMN, a tn. Russia, Finland, cap. circle saine name, on a peninsula of the Gulf of Finland, 110 m. W.N.W. St. Petersburg. It consists of the town proper, surrounded by fortifications, which were once strong, bnt have become dilapidated, and of three suburbs, and is built with considerable regularity, being chiefly composed of eight strects, converging to the market-place, which is of a circular form, and is situated near the centre. It contains a

Swedish Lutheran, a Finnish Lutheran, and two Greek churches, a public school, townhouse, barracks, and arsenal ; and has two annual fairs. At its harbour, which is annually visited by about 30 vessels, the exports are deals, pitch, tar, and hemp; the imports-salt, tobacco, and various articles of manufacture. Pop. 2251.-The Circle, area, 585 geo. sq. m., is, for the most part, flat, though occasionally broken by low hills, and has a soil somewhat sandy, but, nuder good culture, not unproductive. Pop. 25,029.

FRIEDRICHSTADT, a tn. Denmark, duehy of, and 22 m. W.S. W. Schleswig, at the confluenee of the Treene with the Eider, here only 300 yards broad, and crossed by a ferry. It is a handsome town, regularly built in the Dutch style, with a market place in the centre, surrounded by a planted walk, but lies so low as to require a high dyke for protection from the inundations of the Eider. It contains a Lutheran, and a Remonstrant-reformed church, in the latter of which the service is performed in Dutch; Menonite and R. Catholic chapels, a meeting of Friends, and a synagogue; and has manufactures of woollen stuffs, starch, and varnish, dye-works, oil-mills, building-docks, and a summer haven of the fourth class, at which the trade carried on is unimportant. Great numbers of cattle cross the ferry for Hamburg. Pop. 2500.

FRIEDRICHSTIIAL, a tn. Prussia, prov. Silesia, gov. of, and 15 m . N. Oppeln. It contains a Protestant church, and has blast furnaces, and steel and iron works. Pop. 1058.

FRIENDLY, or Tonga Islands, S. lacific Ocean, between lat. $18^{\circ}$ and $23^{\circ} \mathrm{S}$. ; and lon. $173^{\circ}$ and $176^{\circ} \mathrm{W}$. They consist of the island of Tonga, the cluster called the Hapai, the largest of which is named Lefooga, and the island of Vavao. The climate is remarkable for its mildness, and the soil for fertility, hence the great variety and luxuriance of their vegetable productions, which include cocoa nuts, bread fruit, bananas, yams, sugar cane, sago, \&c. The pcople are of the Malayan race, and industrious cultivators of the soil; they love and respect their parents; are eleanly; but revengeful and treacherous. These islands were called the Friendly Islands by Cook. They are of small size, and for their extent tolerably well peopled; but cocoa-nut oil is almost the only article of export of consideration to Europeans. There is some traffic, however, between them and the Fejees in smaller articles, and numbers of Tonguese go there to build their large double canoes, as they have themselves no timber fit for the purpose. The population of these islands is estimated at 18,500 , of which abont 4500 are Christians.

FRIEsACH, or Frisches Wasser [anc. Virunum], a to. Austria, Illyria, circle of, and 23 m. N.N.E. Klagenfurt, r. bank, Metnitz, in a fertile district. It is surrounded by old walls and a wet diteh, has a number of good houses, and a square, with a curious octagon fountain; two churehes, a Dominican monastery, a commandery of the 'Teutonic order; and manufactures of iron, and several blast furnaces, supplied from mines in the vicinity. Pop. 1273.

FRIESACK, a tn. Prussia, prov. Brandenburg, gov. of, and 30 m. N.W. Potsdam, at the confluence of the Horstgraben and Little Rhine. It is the seat of a law court, contains a chureh, and has four annual fairs. Pop. 2371.

FRIESENHEIM, several places, Germany, particularly :-1, A vil. Baden, circle, Middle Rhine, 8 m . S.S.W. Offenburg. It has a parish church, and some trade in eattle, and also in tobacco and wine, which are extensively grown in the district. Pop. 2034.-2, A vil. Bavaria, Palatinate, 1. bank, Rhine, about $3 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Mannhcim, with three churches. The allied armies crossed the Rhine here in 1814. Pop. 1200.

FRIESLAND, or Vmesland [Latin, Frisio; French, Frise], a N.W. prov. Holland, bountled, N. and W. by the N. Sca; S. by the Zuider Zee, and prov. Overijssei ; and E., by provs. Groningen and Drenthe; extreme length, N. to S. $45 \mathrm{~m} .$, E. to W. 40 m . ; area, 948 geo. sq. m. It is generally flat, and parts of it are below the level of the sea, from the inroads of which it is protected by dykes. Even the few rising grounds met with are alleged to be artificial heights, formed as places of refuge during floods, to which the province was often subjected before the dykes were built, as well as since; from the year 333 to 1825 , it is calculated that 83 inundations have taken place. It is well watered, has numerous small lakes, and is intersected by numerous streams and canals; the latter affording a very complete system of water
communication. The W. part of the province yields excellent hay and pasture, and the N.W., N., and N.E. is the richest agricultural land, while the E. and S.E. is alternately black earth, sand, turf, heath, meadow land, and coppice. Fourfifths of the province are under cultivation; and the remaining fifth is composed of roads, rivers, lakes, turf-land, heath, \&c. The usual cereals are cultivated on the suitable soil, and excellent horses, the best in Holland, cattle, and sheep, are reared on the meadows towards the W. coast; and both cattle and other agricultural produce are sent to England through Harlingen. The manufactures are not important, still tanning, fulling, weaving, spinning, boat-building, soap-making, salt-refining, brewing, distilling, and sundry other branches are carried on to a limited extent, chiefly in the towns. The people are mostly Protestants. There are 365 Reformed, 38 Baptist, and 32 R. Catholic churches; 333 common, and 11 Latin schools. The Frisians are well made, active, brave, and houest; and in their manners, features, and language, greatly resemble the English. Their dress is peculiar, of antique origin, and quite distinct from that used in other parts of Holland. For administrative purposes, Friesland is divided into three arrondissements, Leeuwarden, the capital; Sneek, and Heerenveen, and 14 cantons. Pop. (1850), 246,967.

FRIESLAND (Ost) [English, East Friesland], an anc. dist. forming the N. W. extremity of the kingdom of Hanover, and nearly equivalent to the present landrostci or government of Aurich. It was originally governed by its own counts. On the extinction of the family, in 1744 , it was claimed by George II. of England, as Elector of Hanover, and by Frederick of Prussia. The latter prevailed. In 1806, Napoleon included it in his new kingdom of Holland. In 1814, Prussia obtained the restoration of it, but the following year ceded it to Hanover.

FRIESOYTHE, a tn. grand duchy, Oldenburg, cap. bail. of same name, on the Soeste, 18 m . W.S.W. Oldenburg. It contains a R. Catholic church, and a townhonse; and has a trade in cattle, and four annual fairs. Pop. 1036.

FRIESTHORPE, par. Eng. Lincoln; 610 ac. Pop. 53.
FRIESTON, par. Eng. Lincoln; 3980 ac. Pop. 1240.
FRIGA'TE INLE, an inhabited isl. Indian Occan, the most E. of the Seychelle group; lat. $4^{\circ} 32^{\prime}$ S.; lon. $56^{\circ}$ E. It is $2 \frac{1}{2} \mathrm{~m}$. long, and 550 ft . above the level of the sea.

FRIGEN'TO, or Fricento, a tn. Naples, prov. Principato Ultra, 35 m . N.E. Naples, on an eminence. It is miserably built, but has a beautiful cathedral, adorned with fine paintings. In the vicinity is a valley or dell, in which is a small pool that throws ont strong mephitic exhalations, by which animals approaching it are said to be destroyed. This valley is supposed to be the Amsancti Valles of Virgil. Pop. 3000.

FRIGILIANA, a tn. Spain, Andalusia, prov. of, and 30 m . E. by N. Malaga, on the S. slope of a hill, surmounted by the ruins of a castle. It has irregular and steep strects; a parish church, chapel, school, and storehouse. Manufac-tnres:-sugar, soap, starch, paper, linen fabrics, wine, and oil, which, with grain, \&c., are exported. Pop. 2596.

FRIGNANO (Maggiore and Piccolo), two nearly adjacent vils. and com., Naples, prov. Terra di Lavoro, 10 m . S. W. Caserta. Pop. of former, 2188 ; of latter, 2347.

FRILSHAM, par. Eng. Berks; 920 ac. Pop. 182.
FR1NCO, a vil. and com. Sardinian States, div. Alessandria, prov. of, and 7 m. N. Asti, in a beautiful and fertile district, r. bank, Versa, here crossed by a wooden bridge. It contains a parish church, and an old castle, and has some trade in corn and millet. The Versa, from the shallowness of its bed, and the tortuosity of its course, often overflows its banks, and causes serious damage. Pop. 1080.

FRINDSBURY, par. Eng. Kent; 3010 ac. Pop. 2142.
FRING, par. Eng. Norfolk; 1690 ac. Pop. 162.
FRINGFORD, par. Eng. Oxford; 1580 ac. Pop. 390.
FRINSTED, par. Eng. Kent; 1130 ac. Pop. 202.
FRINTON, par. Eng. Essex; 710 ac. Pop. 44.
FRIO (Cape), Brazil. See Cabo Frio.
FRIOCKHEIM, a vil. Scotland, co. Forfar, a station on the Arbroath and Forfar Railway, $6 \frac{1}{4}$ m. N.W. by N. Arbroath. It is neatly built, and has a Free church, an Established chapel, a school, and a flax spinning-mill, in which last, and in weaving sailcloth, osnaburgs, sheeting, and dowlas, the inhabitants are principally employed. Pop. 1104.

FRISANCO, a tn. Austrian Italy, gov. Venice, prov. of, and near Friuli. It contains two parish churches. Pop. 2200.

FRISBY-on-the-Wreak, par. Eng. Leicester; 1080 ac. Pop. 429.

FRISCHAU, two places, Austrian Moravia:-1, A vil., circle of, and 20 m . E. Znaim. It has a parish church, and a castle, with a picture gallery; and a walk-mill. Pop. 705. -2, (or Frissawa), A vil., circle, Iglau, and 30 m . from GrossMeseritsch. It stands on a hill, and has a church, grammarschool, iron-works with smelting furnaces, a saw, and other inills. Pop. 767.

FRISCHE-IIAFf, an extensive lagoon, Prussia, on the Baltic. It is separated from the Gulf of Danzig by a long and narrow line of low gravel and sandbanks, and communicates with it by a narrow strait named Gatt, on the N. side of which is the town of Pillau. Its length, N. to E., is 55 m ., average breadth not over 8 m . It receives numerous streams, of which the most important are the Pregel, in the N.; the Passarge, on the E.; and two arms of the Vistula, on the S.W.

FRISKNEY, par. Eng. Lincoln ; 6270ac. P. (1851), 1694.
FRISTON, two pars. Eng.:-1, Suffolk; 1790 ac. Pop. 455.-2, Sussex ; 2080 ac. Pop. 91.

FRI'THELSTOCK, par. Eng. Devon; 2380 ac. P. 705.
FRITTENDEN, par. Eng. Kent; 3640 ac. Pop. 804.
FRITTON, two pars. Eng.:-1, Norfolk; 710 ac. Pop. 301.-2, Suffolk; 2100 ac. Pop. 223.

FRI'TWELL, par. Eng. Oxford; 1230 ac. Pop. 524.
FRITZLAR, a tn. Hesse-Cassel, prov. Niederhessen, cap. circle of same name, 1. bank, Edder, 16 m. S.S.W. Cassel. It is partly surrounded by walls and ditches, and entered by three gates, but has narrow and winding streets; contains two churches, one of them a very ancient edifice, partly byzantine and partly gothic; the other, formerly belonging to a Franciscan monastery, and now used by the Protestants; an Ursuline monastery, with an educational establishment; and has a trade in corn and wine, and eight annual fairs. Around the town is a chain of watch-towers, seven in number. Pop. 3049.-TThe circle, partly level and partly hilly, is poorly wooded, but well watered, and contains much excellent arable land. Pop. 29,545.

FRIULI [German, Friaut], a deleg. Austrian Italy, bounded N. by the Tyrol, N.E. and E. by Illyria, S. by the Adriatic, and deleg. Venice, S.W. Treviso, and W. Belluno; area 1928 geo. sq. m. It is mountainous to wards the N., but gradually slopes down into an extensive plain, which, as it approaches the sea, becomes so flat as to form extensive marshes. The soil of the plain is in some parts remarkably fertile; but in others so light and sandy, as to be almost sterile. Considerable quantities of corn are raised, but the chief wealth of the deleg. is in cattle, which are here reared in greater numbers than in any other part of Lombardy. The minerals include iron and copper, which are worked to some extent, fine marble, of which there are six quarries, and fine potter's clay, which is extensively manufactured. The capital is Udine. Pop. 34,000.

FROBISHER'S STRAIT, a channel, British N. America, leading from the ocean W., between Hudson's Strait and Northumberland inlet, and separating the districts of Metaincog and Nita. Length, 240 in . medium breadth, 30 m . Its shores, on both sides, are rugged and mountainous. It was discovered, in 1576, by Sir Martin Frobisher.

FROCESTER, par. Eng. Gloucester; 1830 ac. Pop. 344.
FRODESLY, par. Eng. Salop; 2120 ac. Pop. 214.
FRODINGHAM, two pars. Eng.:-1, Lincoln; 5770 ac. Pop. 701.-2, (North), York (E. Riding); 2880 ac. Pop. 831.

FRODSHAM, a market tn. and par. England, co. Chester, with a station on the Birkenhead, Lancashire, and Cheshire Junction Railway. The town, 11 m . N.E. Chester, on the Weaver, near its confluence with the Mersey, has a fine old church, and an endowed school. The inhabitants are principally employed in saltworks and in cotton manufactories. Market on Saturday, and two fairs annually. Area of par., 14,100 ac. Pop. 5821.

FROHBURG, a tn . Saxony, circle of, and 22 m . S.S.E. Leipzig, l. bank, Wiehra, here crossed by two bridges. It contains a church with a lofty tower, and, in the vicinity, a little $S$. of the town, a large castle, with an extensive and well-wooded park; and has manufactures of woollen cloth and
carthenware, a spinning, and other mills, a general trade, and trade in cattle, and four annual fairs. Pop. (1849), 2644.

FROHSE, a vil. Prussia, Saxony, gov. and 6 m . S.S.E. Magdeburg, on the Elbe; with an old parish church : tileworks, some shipping and trade, and three annual fairs. P.932.

FROME, several rivers, England :-1, Co. Dorset, rising near Beaminster, flowing S.E. to Dorehester, whence it flows E. into Poole Bay, after a course of about $35 \mathrm{~m} .-2$, Co. Somerset, rising near Bruton, flowing past the town of Frome, and after a course, chiefly N., of about 20 m ., joining the A von between Bradford and Bath.-3, Co. Gloucester, flowing S., and falling into the harbour of Bristol.-4, Co. Hereford, an affluent of the Lugg.

FROME, or Frome-SElwood, a parl. bor., th. and par. England, co. Somerset. The town, 19 m . S.E. Bristol, is pleasantly sitnated on the E. and N.E. deelivity of a lill, at the base of which flows the river Frome. It consists of a number of streets, the modern of a convenient breadtl, but the older narrow and irregular. Formerly the town consisted of a series of mere lanes, so narrow that two earriages could not pass each other without eneroaching on the footways. Of late years, however, great improvements have taken place both as regards the widening of the streets and the censtruetion of the houses. The town is now lightel with gas, and there is no seareity of water, but great inefficiency in the means of conveying it to the inhabitants.

There are three churehes in Frome, the old parish chureh and two new struetures. The former is a handsome ancient gothic buitding, with a tower surmounted by a spire, together about 150 ft . high. The latter two are destitute of arehitectural pretension, although one of them, Christ Church, in the later English style, is suffieiently eommodious. There are places of wors!ip, besides, for Baptists, Independents, Wesleyans, Primitive Methodists, Presbyterians, and the Society of Friends. The sehools and charities are one British, one National, four Dissenters' sehools, and one attached to each of the threc churches, besides a number of respeetable private schools. There are also a blue coat school, in which 25 boys are clothed and educated, and a elarity sehool for 20 girls, who are maintained and educated. The eharitics amount to $£ 1300$ annually, chiefly expented in the maintenance of old men and women, and young persons of both sexes. There are neither hospitals nor dispensaries in the parish, but there is a flourishing savings'-bank in the town, in whieh the balance in favour of depositors, in 1851, amounted to $£ 33,975$. A literary association was formed in 1844, which met with immediate suceess, and continues to prosper. Frome has been long eelebratell for the manufacture of woollen eloths, particularly broad-cloths and kerseymeres. Silk, livery eloths, carriage linings, and hats are also manufaetured to a considerable extent. The river Frome is erossed at the town by a neat stone bridge of five arehes. The environs are beautiful, and are adorued by numerous handsome mansions and villas. Frome returns a member to the House of Commons; registered electors (1851), 401. Area of par. $7092 \frac{1}{2}$ ae. Pop. (1851), bor. 10,148; par.11,937.-(Local Correspondent.)

FliomisTA, a tn. Spain, prov. and 16 m . N. Palencia, in a beautiful plain, on the canal of Castile. It is tolerably well built, but is ill paved, has three parish churches, two hospitals, a Latin and a primary sehool, and manufactures of cloth, soap, and oil, and several oil mills. Pop. 1483.

FRONT [Latin, Frons], a vil. and eom. Sardinian States, division of, and about $10 \mathrm{~m} . \mathrm{S}$. Turin, on the Amalone, here crossed by a wooden bridge. It has a parish church, two chapels, an old palace in ruins, and some trade in fat eattle. There is a seam of lignite in the vicinity. Pop. 1304.

FRONTEIRA, a th. Portugal, prov. Alemtejo, 35 m. N.E. Evora, on a hill, l. bank, Zatas. It has two churehes, and an annual fair. In the vicinity there is a convent. In 1663, the Portnguese here defeated the Spaniards. Pop. 2016.

FHON'TENAY, a vil. Franee, dep. Deux-Sèvres, arrond. Niort. It was once a fortified town, but was taken and dismantled by Louis VIII. in the 13th eentury. It has a trade in wool and cattle. Pop. 1482.

FRONTENIIAUSEN, a market tn. Lower Bavaria, r. bank, Vils, 52 m . N.E. Munich. It is surrounded by a wall. contains two churches and a chapel, and has manufactures of woollens, and a trade in cattle. Pop. 1007.

FRONTIGNAN [anc. Forum Domiti], an ane. but small
and decayed tr. and com. France, dep. Hérault, 12 m . S.S. W. Montpelier, and station of the railway from Montpelier to Cette. It is known best by its white wines grown here, esteemed among the best in France. During the Middlo Ages it was a fortified town of some consideration. In 1629, Louis XIII. established an admiralty here, it being at that time the ehief place for the maritime trade of Languedoe. Pop. 1966

FROOME, three pars. Eng.:-1, (Bishop's), Hereford ; 4550 ac. Pop. 1079.-2, (St. Quintin), Dorset; 960 ae. Pop. 140.-3, (Vauchurch), Dorset; 1080 ac. Pop. 180.

FROSINONE, a deleg. Papal States, composed of a small isolated portion called Ponte Corvo, enclosed within the Nea politan prov. Terra di Lavore, and of Frosinone Proper, bounded N. and N.W. by comarca Rome, S. W. and S. by the Mediterranean, and S.E. and E. by Naples; greatest length, N. to. S. 50 m .; greatest breadth, 42 m. ; area, 1600 geo. sq. m. The surface in the N.E. is covered by the Roman sub-Apen nines or some of their ramifications, has an agreeable and salubrious elimate, is watered by the Saeco and several affluents, and though very indifferently cultivated, yields abundant crops, and matures almost all the fruits of S. Italy. The S.W. portion of the delegation is oceupied by the Pontine Marshes an extensive tract, whose numerous swamps and pestilential exhalations almost unfit it for the habitation of human beings. Mueh had been done for its improvement in Roman times, but under the Papal Government the benefit of former im provements has been lost, through negleet. Pop. 164,000.

FROSlNONE [anc. Frusino], a tn. Papal States, cap. above deleg. 50 m . E.S.E. Rome, at the foot of a hill, near 1. bank, Cosa. It is ill built, but has several churehes and convents; is the seat of a bishopric, and the residence of a cardinal delegate; and has two annual fairs, one of 20 days continuance, and another of six days. Good wine is produced in the vicinity. Pop. 6500.

FROSOLONE, a vil. and com. Naples, prov. Sannio, 12 m. E. Isernia. It contains three churehes, two convents, a seminary, and hospital, and has manufactures of cutlery. A much esteemed wine is produced in the district. Pop. 4443.

FROSSASCO [Latin, Ferusascum], a vil. and com. Sar dinian States, prov. of, and 4 m . N. P'inerolo, on the Noso. It was aneiently surrounded by walls and ditehes, and is still entered by four gates. It las two ehurehes, an ancient strong eastle in ruins, and a trade in wine. Pop. 1398.

FROS'TENDEN, par. Eng. Suffolk; 1280 ac. Pop. 428.
FROWARD (CAPE), S. extremity of S. America, Strait of Magalhaens; lat. $53^{\circ} 53^{\prime} 42^{\prime \prime} \mathrm{S}$. ; lon. $71^{\circ} 18^{\prime} 30^{\prime \prime} \mathrm{W}$. (n.) ; a bold promontory, composed of dark-coloured slaty roek; its outer face is nearly perpendieular.

FROWLESWORTH, par. Eng. Lcicester; 1960 ac. Pop. 318

FROXFIELD, two pars. Eng.:-1, IIants ; 6480 ac. Pop. 656.-2, Wilts ; 1150 ac. Pop. 625.

FROYEN, an isl., W. coast, Norway, bail. of, and 52 m W.N.W. Trondhjem. It is nearly of a triangular shape; greatest length, 20 m ., eentral breadth, 12 m ; and is separated from the larger island IIittern by the Froy-fiord, which, at its mouth, between the two islands, is 15 m . wide, but at the shortest distance between them only 5 m .

FROYLE, par. Eng. Hants; 3920 ac. Pop. 849.
FRUGEs, a tn. France, dep. Pas-de-Calais, 17 m . E.N.E. Montreuil. It is built on a steep site, and has several streets, all ending in an open area. Mannfactures:-hosiery, coarso cloths, and tobaceo pipes; and has some salt-works and tauneries; and a mineral spring. Pop. 2924.

FRUTIGEN, a vil. and par. Switzerland, can. of, and 25 m. S.S.E Bern, near the confluence of the Kander and Engstligen, rap. bail. of same name. The houses are mostly new, having been rebuilt aîter a great fire in 1827. Its antique chureh was fonnded in 933 . It has eloth-works, kirsehwasser distilleries, \&e.; anl in the environs much cattle are reared; a mile S. are the baths of Frutigen. Pop. vil. about 1000 ; par. 4500.

FRYERNING, par. Eng. Essex; 3830 ac. Pop. 807.
FRYKEN, a lake, or rather chain of lakes, Sweden, län of, and 12 m. N. by W. Carlstad. It stretehes N. to S. about 40 m ., and seldom cxceeding a mile in width, has the appear ance of a broad river. It is divided into three distinet parts, connected by two narrow channels, and is very deep. It
discharges itself into Lake Wener by the Nors. Fryksdal, the name of the valley in which it lies, contains some of the finest scenery of Sweden, and is sometimes called Swedish Switzerland.

FRYSTONE, two pars. Eng. York (W. Riding).-1, (Ferry), 2850 ac. Pop. 951.-2, (Monk), 3770 ac. Pop. 937. FUBINE, a vil. and com. Sardinian States, div. and 10 m . W.N.W. Alessandria, finely situated on a height above the Grana. It consists chiefly of one principal street, terminating in a square; contains five churches, one of them an ancient gothic structure, surmounted by a tower; and has a considerable trade in corn, wine, and wood. Pop. 2234.

FUCA (Straits of San Juan de), a channel, N. America, Oregon territory, leading from the Pacific into the Gulf of Georgia, S. and W. Vancouver Island, which it separates from the mainland, and forming part of the boundary between Great Britain and the U. States; lat. (entrance), $48^{\circ} 25^{\prime} \mathrm{N}$. ; lon. $124^{\circ} 12^{\prime}$ W. It extends S.E. about 80 m ., is 11 m . broad at its W., and 25 at its E. end, and is free from shoals.

FUCECCHIO, a tu. Tuscany, prov. of, and 23 m . E. by N. Pisa, near r. bank, Arno, and the S. extremity of the Lake Fucecchio. It is well built, surrounded by a wall flanked with towers, commanded by a strong old castle, and possessing wide and well kept streets, a handsome collegiate church adorned with paintings and statuary, an almshouse, and seminary; and manufactures of silken fabrics, vinegar, and vermicelli. Pop. 5233 . -The LaKe is abont 7 m . long, by about 3 m . average breadth. It sends its waters S. W. to the Arno.

FUCINO, or Celano [Latin, Fucinus Lacus], a lake, Naples, prov. Abrruzzo Ultra II., about 11 m . long, from S.E. to N.W., 5 m . broad, and 35 m . in circuit. It lies 2181 ft. above sca level, enclosed, N.E., E., and S.E., by the Apennines, S. by Mount Salviano, and W. by the Roman subApennines, aud is open only on the S.W., leaving the country in that direction exposed to its inundations. A remedy was attempted by the Emperor Claudius, who caused an aqueduct to be constructed across Salviano, for the purpose of discharg. ing the surplus waters of the lake into the Garigliano. Of this vast work, on which 30,000 slaves are said to have laboured 11 years, there are only a few remains. Fucino is generally believed to be the crater of an extinct volcano. Its banks are densely peopled, and well cultivated.

FUEGO (Tierra Del). See Tierra Del fuego.
FUEGO, or Foao.-1, One of the Cape Verd Islands, N. point; lat. $15^{\circ} 1^{\prime} 30^{\prime \prime}$ N.; lon. $24^{\circ} 21^{\prime} 30^{\prime \prime}$ W. (r.); about 15 m . in lengtl, and nearly circular, very high, forming a volcanic peak, and geuerally clouded. Though deficient in water, it is fertile, and produces a great quantity of Indian corn, beans, \&c. Excellent cloths are made here for the trade of Guinea, and for the other islands. The climate, although warm, is healthy. There are several beaches for boats; but the only anchorage for vessels of burthen is on the W. side of the island, in the bay called Luz, and off the town of that name. Water scarce, and indifferent.-2, A small isl. E. coast Africa, Mozambique Channel, one of the Premeira group; lat. $17^{\circ} 1^{\prime}$ S.; lon. $38^{\circ} 55^{\prime}$ E.-3, An isl. N. America, off N.E. coast, Newfoundland; lat. $49^{\circ} 30^{\prime} \mathrm{N}$.; lon. $54^{\circ} 6^{\prime} \mathrm{W}$.

FUEGO (Volcan de), [fire volcano], a volcano, Central America, Guatemala, 25 to 30 m . W. by S. the new city of that name; lat. $14^{\circ} 29^{\prime} \mathrm{N}$.; lon. $90^{\circ} 48^{\prime} \mathrm{W}$. It is one of three volcanoes which stand close together, the other two being the Volcan de Agua, or Water Volcano, a perfect cone; and the other the Volcan de Pacaya. These volcanoes rise from 7000 to $10,000 \mathrm{ft}$. above the plain; that of Fuego gener ally emits smoke from one of its peaks.

FUEN, with affixes, numerous tns. and vils., Spain, of which the following are the principal:-1, (-Caliente), a tn. New Castile, prov. of. and 40 m. S.S.W. Ciudad-real, at the foot of a ragged rock, on the borders of Andalusia. It has a large square, a parish church, townhouse, storehouse, and cemetery. In the vicinity are much frequented medicinal baths, esteemed efficacious in rhuematism and gout, \&c. Pop. 2105.-2, (-Muyor), a tn. Old Castile, prov. of, and 6 m . W.S.W. Logroño, r. bank, Ebro, with a parish church, chapel, hospital, and two schools. Manufactures:leather and brandy. Pop. 2029.-3, (-Salida), a tu. New Castile, prov. of, and 12 m . N. W. Toledo, containing a church, chapel, townhall, prison, hospital, Latin, and two other schools, a handsome palace, convent, and several foun-
tains. Manufactures:-linen and woollen fabrics, earthenware, and soap. Pop. 2739.-4, (-Santa), a tn. New Castile, prov. of, and 54 m. S. Cuenca, 24 m. N.N.W. Albacete, r. bank, Jucar, having a church, townhouse, prison, two schools, and a fountain. Manufactures :-esparto fabrics. The wine made here is much esteemed. Pop. 1831.-5, (-Labrada-de-los-Montes), a tn. Estremadura, prov. of, and 100 m. E. Badajos, near r. bank, Guadiana, well built, with a square, and clean, wide, and paved streets; a church, town and session-house, prison, hospital, store-house, and public fountain. Manufactures:-linen fabrics. Pop. 1029.-6, (-Labrada), a vil. New Castile, prov. of, and 9 m . S. Madrid, having a square, parish church, townhouse, prison, two schools, and a cemetery. Manufactures:-cloth and blankets. Pop. 2027.

FUEN-Choo, or Fuen-Croo-Foo, a considerable tn. China, prov. Shansee, r. bank, Fuen-Ho, 50 m . S.W. Tai-guen.

FUEN-Ho, a large river, China, prov. Shansee, an affluent of the Hoang-Ho, rises in the N. part of the province, about lat. $39^{\circ}$ N., whence it flows S., with one considerable deflection E., till it reaches Kiang, lat. $35^{\circ} 40^{\prime}$ N., when it suddenly bends W., and falls into the Hoang-Ho at lat. $35^{\circ} 35^{\prime} \mathrm{N}$. ; lon. $111^{\circ} 25^{\prime}$ E. Its whole course is about 300 m .

FUENGIROLA, a tn . Spain, Andalusia, prov. of, and $20 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Malaga, on the Mediterranean. It has a parish church, two primary schools, an active and a productive fishery. Pop. 1182.

FUENTE-Abejuna, or Fuente-Obejuna, a tn. Andalusia, prov. of, and 44 m. N.W. by W. Cordova, on the slope of a hill, near l. bank, Guadiato. It is well built; has a square; steep, wide, and clean streets; a large parish church, five chapels, two convents, a townhouse, prison, storeliouse, hospital, three fountains, and a spacious cemetery. Manu-factures:-linen and woollen fabrics, and leather. Trade:wine, oil, brandy, honey, and pigs. Pop. 4660.

FUENTE-ALbilda, a vil. and par. Spain, Valencia, prov. of, and 24 m . from Albacete, in a valley. It has a parish church, a courthouse, prison, two prinary schools, and a beautiful fountain; manufactures of woollen and hempen cloth, and a trade in corn, cheese, and saffron. Pop. 1117.

FUENTE-de-Cantos, a tn. Estremadura, prov. of, and 52 m . S.S.E. Badajos. It is tolerably well built, has wide streets, and six small squares; and a parish church, two convents, several chapels, a townhouse, prison, hospital, storehouse, three schools, and some public fountains. Manufactures :-cloth, linen, soap, wine, and oil. Many of the people are engaged as muleteers. Pop. 4500.

FUENTE-de-Pedro-Narro, a tn. Spain, New Castile, prov. of, and 50 m . W.S.W. Cuenca, in a plain between the Bedija and Rianzares. It contains a parish church, courthouse, prison, a boys' and girls' school; and has a trade in corn, cattle, and wine. Pop. 1260.

FUENTE-del-Arco, a tn. Spain, Estremadura, prov. of, and about 80 m . from Badajos, on the N . slope of the sierra Morena. It contains a handsome parish church, courthouse, prison, primary school, and a fine old fountain, in the form of an arch, which gives its name to the town; and has numcrous corn and oil mills; and a trade in corn, wool, and cattle. Pop. 1100.

FUEN'TE-del-Fresno, a tn. Spain, La Mancha, prov. of, and 20 m . N.N.E. Ciudad-Kodrigo. It is well built, and paved; contains a parish church, townhouse, prison, and primary school; and has a corn and oil mill; and a considerable trade in charcoal. Pop. 2315.

FUENTE-del-Maestre, a tu. Estremadura, prov. of, and 32 m. S.E. by S. Badajos, in a valley, near r. bank, Guadajira. It is, for the most part, well built, and has three large, and several smaller squares, and wide, level, paved, though irregular streets, a Corinthian parish church, four chapels, two convents, a Jesuits' college, Latin and primary schools, a townhouse, prison, hospital, two public fountains, a cemetery, and some vestiges of the ancient walls and fosse by which it was formerly surrounded. Manufactures:linen, cloth, brandy, hardware, earthenware, \&c. Trade in grain, oil, brandy, wool, wine, fruits, vegetables, \&c. Some goats, sheep, and pigs are reared. Pop. 6580.

FUEN'TE-EL-SAUCO, a tn . Leon, prov. of, and 23 m . S.S.E. Zamora. It is tolerably well built, has clean streets, several squares, two parish churches, a chapel, townhouse,

1041

## FUHNEN

prison, hospital, and storehouse. Manufactures:-linen, cloth, wine, and brandy, which are exported. Pop. 2557.

FUENTE-LA-IIGUERA, a tn., prov. of, and 50 m . S.W. by S. Valencia. It has three squares, steep streets, a parish church, two chapels, a townhouse, and prison. Manufac-tures:--linens and woollens, wine and brandy Pop. 2659.

FUENTE-ha-Peña, a tn. Leon, prov. of, and 27 m . S.E. by S. Zamora, 6 m. E. Fuente el-Sauco, near l. bank, Guarena. It is well built, has a handsome church, two chapels, three schools, a townhouse, prison, and convent. Pop. 1676.

FUEN'TE-Encarros, a tn. Spain, Valencia, prov. of, and 55 m . from Alicante, at the foot of some lofty hills. It is poorly built, but clean; contains a gothic parish church, a courthouse, prison, and primary school; and has manufactures of woollens, thread, and earthenware, several mills, and a trade in corn, wine, oil, and silk. Pop. 1475.

FUENTE-Guinaldo, a th. Spain, Old Castile, prov. Salamanca, 17 m. S.S.W. Ciudad-Rodrigo. It has a large and handsome parish church, in the public square; a courthouse, prison, primary school ; manufactures of linen, limekilns, and annual fair. Several undecisive contests took place here during the peninsular war. Pop. 1283.

FUENTE-Heridos, a tn. Spain, Andalusia, prov. of, and 64 m . N.W. Seville, in a mountainous district. It is well built, paved, and clean; has two public squares, a parish ehureh, townhouse, prison, two primary sehools; several saw and flour mills; and a trade in potatoes and chestnuts. P. 1229.

FUENTE-PALMERA, a tn. Spain, Andalusia, prov. of, and 25 m. S.W. Cordova, in a plain. It is indifferently built; contains a parish church, prison, and two primary schools; and has manufactures of white soap, an oil-mill, and a trade in oil, corn, and cattle. Pop. 1556.

FUENTERRABIA, or Fontarabia, a city and port, Spain, prov. Guipuzcoa, 10 m . E. by N. San Sebastian, at the mouth of the Bidassoa, on the French frontier. It was formerly a place of considerable strength and importance, sur-

THE PRINCIPAL STHEET OF FUENTERRABIA.
From Baron Taylor'a Vogage Pitoresque en Espagne.
rounded by walls, and a wide moat, some ruins of which only remain, most of its fortifications having been destroyed by the French. It has a square, a parish church, several chapels, a handsome townhouse, governor's palace, prison, hospital,
VoL. I.
three schools, three fountains, and a convent. Its harbour is shallow, and admits only small vessels. Manufactures:hempen shoes, linen, cloth, earthenware, and marine stores. The people are chiefly occupied in tillage and fishing. The salmon of the Bidassoa are much esteemed. The town itself has been frequently besieged, and its vicinity has been the scene of numerous military operations. In 1837, some severe fighting took place here between General Evans and the Carlists, the former eventually taking the town. The Fontarabians exhibited a singular degree of ingratitude, and want of feeling, in their treatment of the sick and disabled of the English army in 1813, refusing or but grudgingly giving them quarters, and the accommodation of hard boards to repose upon. Pop. 2035.

FUENTES, several places, Spain, particularly:-1, (-deAndalusia), a th. Andalusia, prov. of, and 32 m . E.N.E. Seville. It is well built, has two squares, a parish church, three chapels, a townhouse, prison, hospital, convents, several schools, and a cemetery. Manufactures :-linen and coarse cloth. Pop. 5915.-2, (-de-Leon), a tu. Estremadura, prov. of, and $50 \mathrm{~m} . \mathrm{S}$. Badajos, on the borders of Seville. It has a square, wide and clean streets, a church, two chapcls, a townhouse, prison, hospital, school, three fountains, and a cemetery. Manufactures:-linen fabrics, wine, and oil. Pop. 2920.-3, (-de-Don-Bermudo), a tn. Old Castile, prov. of, and 12 m . W.N.W. Palencia, on a slightly elevated plain, on the N.W. bank of Lake Nava; with a manufactory of black bombazines. Pop. 3065.

FUEN'TEN-de-Ebro, a tn. Spain, Aragon, prov. of, and 20 m. S.S.E. Saragossa, on the slope of a hill above r. bank, Ebro, near the confluence of the Ginel. It contains a gothic parish church, a magnificent palace, much injured, both during the peninsular and the civil wars; a courthouse, prison, hospital, convent, and two primary schools; and has manufactures of serge, a flour, and an oil mill. Pop. 1446.

FUERTAVENTURA, one of the Canary isls., the nearest to the coast of Africa, from which it is about 60 m . distant ; lat. (N.W. point) $28^{\circ} 42^{\prime} \mathrm{N}$. ; lon. $14^{\circ} 1^{\prime} \mathrm{W} .(\mathrm{n})$ It is about 55 m . in length, and about 15 in breadth, excepting at its S. W. extremity, where, for an extent of about 15 m ., it is not more than 4 or 5 m . broad, being altogether shaped like a bottle. It is less mountainous than the other islands, though its $N$. and $S$. ends rise to 2500 ft . It possesses two portsCabras, on the E., and Trajalejo, on the S.E. The anehorage is bad, and the landing difficult. The island has a barren appearance generally, with some fertile tracts here and there; the most extensive of which is the valley of Oliva, towards the $\mathrm{N} ., 15 \mathrm{~m}$. long, by $2 \frac{1}{2}$ wide. There are only two streams of pure water in the island. On the N. and N.E. are some extinet volcanoes, one of which attains an clevation of 2160 ft The only trees are the date, palm, and fig. The principal exports are barilla, orchilla, corn, honey, goat-skins, aud camels. Sce map in article Canaries. Pop. about 17,000 .

FUERTE, an isl. Caribbean Sca, Gulf of Darien, E. side; lat. $9^{\circ} 23^{\prime} \mathrm{N} . ;$ lon. $76^{\circ} 12^{\prime} \mathrm{W}$. (R.) It is about $1 \frac{1}{4} \mathrm{~m}$. long N. to S., and ${ }_{4}^{3} \mathrm{~m}$. E. to W.; it is high in the middle, and covered with trees. It can be secn from a distance of 20 m .

FUER'TE (El), a city, Mexico, cap. of the State of Oceidente, or of Cinaloa and Sonora unitet, on the Rio del Fuerte; lat. $27^{\circ}$ N.; lon. $108^{\circ} \mathrm{W} . ; 290 \mathrm{~m}$. N.W. Durango, and 60 m . from the Gulf of California. It is the scat of the supreme tribunal of justice; and the depot for goods passing to and fro from the port of Guaymas, distant 155 m . N. W. 1'op. 5000 .

FUERTY, par. and tı. Irel. Roscomnion ; 13,476 ac. Pop. 5810.

FUF, tn. Arabia. See Fif.
FUGA, one of the Babuyan isls., N. Pacific Occan, off tho N. end of Lazon; lat. $19^{\circ} 1^{\prime}$ N.; lon. $121^{\circ} 20^{\prime}$ E. (m.) It is about 6 m . long E. to $W_{\text {, , and }} 3 \mathrm{~m}$. broad. There are irregular soundings along its S .W. side, where a ship may anchor occasionally.

FÜGEN, a vil. Austria, Tyrol, in a beantiful and fertile plain, on the Zillerbach, at the foot of the IIartberg, 25 m . E. Innsbruck. It contains an ancient chureh with fine carvings, a castle, school, and poorhouse; and has mannfactures of needles and ironware; and a powder-mill. Jop. 814.

FUGGLESTONE (St. Peter), par. Eng. Wilts; 2480 ac . Pop. 521.

FÜHNEN, isl. Denmark. Sce Funen.

## FUNCHAL

FUKIEN, prov. China. See Fokien.
FUKOK, or Fokwak Isle. See Koh-Dud.
FULADU, a native state of W. Africa; lat. $13^{\circ}$ to $14^{\circ} \mathrm{N}$.; lon. $9^{\circ}$ to $10^{\circ} 40^{\prime}$ E.; between the Ba-fing or Black river, and the Ba-woolima, the former one of the head streams, and the latter a tributary of the Senegal. It is bounded, N. by Kaarta, E. Manding, S. Gadu, and W. Bruko and Kokondu; is mountainous, and traversed by several streams, most of which unite with the Kokoro, an affluent of the Ba-woolima.

FULAILEE, or Goonee, a river, Scinde, the most E. outlet of the Indus, which it leaves 10 m . above Hyderabad, past which it flows, and, after a S. course of 110 m ., falls into a lake at the W. extremity of the Runn of Cutch, formed by the earthquake of 1819 .

FULBECK, par. Eng. Lincoln; 3900 ac. Pop. 690.
FULBOURN, par. Eng. Cambridge; 5221 ac. P. 1405.
FULBROOK, two pars. Eng.:-1, Oxford; 1670 ac. Pop. 368.-2, Warwick ; 650 ac. Pop. 70.

FULDA, a tn. Hesse-Cassel, cap. prov., and r. bank river of same name, here crossed by three bridges, 54 m . S.S.E. Cassel. It consists of the town proper, surrounded by walls, and of several suburbs, and is, throughout, irregularly built. It is the see of a bishop, and the seat of several courts of law and public offices; contains a cathedral, a handsome modern edifice, with a sarcophagus of St. Boniface, who is said to have been buried here; 10 other churches, of which the round church of St. Michael's, founded in 1822, the parish church, and that of St. Severus, are the most deserving of notice; a castle, once occupied by the prince bishops, and now belonging to the elector, with fine gardens; a gymnasium, Benedictine nunnery, ecclesiastical seminary, normal, industrial, and other schools; a library of 50,000 volumes, a savings'-bank, infirmary, military barracks, orphan, and other hospitals, and benevolent endowments. It has important manufactures of cotton, woollen, and linen goods, wax, candles, sealing-wax, white and ordinary leather, papier maché articles, straw chairs, musical instruments, \&c.; and an important trade both in the above articles and in corn and cattle. Pop. 9570.—The province, called also the grand duchy of Fulda, consists chiefly of the old bishopric of that name, and is divided into the four circles of Fulda, Hersfeld, Hünfeld, and Schmalkald; area, 500 geo. sq. m. Pop. 140,855.

FULDA, a river, Germany, which rises in the N. slope of the Hohe Rhön-gebirge, in the N.W. of Bavaria, about 3 m . N.E. Gersfeld, flows generally N.N.W. through HesseCassel and Hesse-Darmstadt, enters Hanover, and unites with the Werra in forming the Weser, after passing Fulda, Hersfeld-where it becomes navigable-and Cassel. Its chief affluents are, on the r., the Haune and Losse, and, on the 1., the Flieder, Lider, and Eder; whole course, about 100 m . It is well supplied with fish, chiefly salmon, pike, and carp.

FÜLE-NAGY, a vil. Hungary, Thither Danube, co. Stuhlweissenburg, near Veszprim; on an elevated site, and containing a Protestant and a R. Catholic church. Pop. 1300.

FULEK, or Feliakowo, a market tn. Hungary, Hither Danube, co. Neograd, in a beautiful dist., 61 m . N.E. Pesth. It was once surrounded with walls, contains a R. Catholic chnreh and a Franciscan monastery, and has an acidulated spring, a stone quarry, and an annual fair. The old castle, strongly situated on a steep height, is now in ruins, but figures much in the carly history of Hungary. Pop. 1760.

FULFORD Ambo, a vil. and par. England, co. York (E. Riding). The village, 2 m . S. York, of which it is a suburb, is of considerable extent, well kept, and contains many respectable houses. Within its limits are, also, the York public cemetery, opened in 1837; the York military barracks, and the 'Retreat,' an admirably conducted lunatic asylum, belonging to the society of Friends. There are also a church, and Methodist chapel, a free school, for the education of 20 poor children, and two other day-schools. The inhabitants are chiefly employed in agriculture. Area of par., 1940 ac. Pop. 1305.-(Local Correspondent.)

FULHAM, a par. and vil. England, co. Middlesex, $5 \frac{3}{4} \mathrm{~m}$. S.W. St. Paul's, 1. bank, Thames, and connected with Putney, in Surrey, by a wooden bridge. It is irregularly built, but contains many elegant houses, and is well lighted with gas. The palace of Fulham has been the summer residence of the Bishop of London since the time of Henry VII. It occupies a low site on the banks of the river, a little W. of the village,
and is built of brick, of a quadrangular form, but is neither elegant nor convenient. The grounds comprise about 37 ac ., the whole surrounded by a moat, over which are two bridges. The parish church of All Saints stands near the river side; it is an ancient stone building, with a handsome gothic tower at the $W$. end, 95 ft . high. There are, besides, places of worship for various religions classes. A school has been erected here, in which the children are educated on the system of Dr. Bell, 80 of them being also clothed. There are also an infants' school; 12 almshouses for poor widows, and a union poorhouse. Most of the ground in the neighbourhood is laid out, and cultivated as market gardens, nurseries, \&c., for the supply of the London markets; area of par., 1820 ac. Pop. 9319.

FULIGNO, tn. Papal States. See Foligno.
FULL-Sutton, par.Eng.York (E. Riding); 950 ac. P. 146.
FULLETBY, par. Eng. Lincoln; 1940 ac. Pop. 243.
FULLSTEIN, a vil. Anstrian Silesia, circle, Troppau, in a valley, on a stream of same name, about 15 m . from Jägerndorf. It contains a church, school, and old feudal castle, and has four mills. Pop. 766.

FULMER, par. Eng. Bucks; 1780 ac. Pop. 355.
FULMODESTON, par. Eng. Norfolk; 2330 ac. P. 358.
FULNEK, a tn. Moravia, circle, Prerau, cap. dist. of same name, near the Gänzbach, 17 m . S. Troppau. It is a finelysituated, cheerful-looking, and well-built place, with flat-roofed houses; contains a parish church, chapel, two castles, Capuchin monastery and hospital, and has extensive manufactures of woollen cloth, dye-works, and five annual fairs. The inhabitants early distinguished themselves in the cause of the Reformation. The Moravian brethren once held their principal meetings here, and their followers in England have an establishment between Leeds and Bradford, to which they have given the name of Fulnck. Pop. tn., 3518; dist. 8807.

FULSTOW, par. Eng. Lincoln; 2840 ac. Pop. 501.
FULTA, a vil.Hindoostan, prov. Bengal, 1. bank, Hooghly, 20 m . S.S.W. Calcutta; lat. $22^{\circ} 19^{\prime} \mathrm{N}$. ; lon. $88^{\circ} .20^{\prime}$ E. It is populous aud clean, and is surrounded by a grove of cocoa-nut trees that almost conceal it from view. It is much frequented by the captains of the numerous ships passing up and down the river, that take advantage of its safe anchorage, which is protected from the swell of the sea.

FULTON, several places, U. States, including-1, A vil. New York, 190 m . W.N. W. Albany, containing four churches, and several mills. Pop. 1600.-2, A vil. and township Ohio. The village, on the Ohio, above and adjacent to Cincinnati, 100 m. S. W. by W. Columbus, has four ship-yards, where numerous steamers are built. Pop. 1506.

FUMAY, a tn. France, dep. Ardennes, 17 m. N. Mezieres, on the Meuse. It is beautifully situated, the rocks near it rising steeply from the river, which runs through a narrow valley. The heights around are crowned with woods. It has a manufactory of glass and white paint; and a trade in excellent slates, which are quarried in the vicinity. P. 3300.

FUMEL, a tn. France, dep. Lot-et-Garonne, 27 m . N.E. Agen, on the Lot. It is an aucient place, and was the scene of several contests during the Middle Ages. It has some papermills. Pop. 1349.

FUMONE, a tn. Papal States, deleg., and 7 m. N.N.W. Frosinone. It contains a castle, situated on a height, and famous as the place in which Pope Celestinus was imprisoned, after having been forced to resign the popelom to Boniface VIII. Pop. 1000.

FUNCIALL, the cap. of isl. Madeira, on a bay S. coast ; lat. (British consulate) $32^{\circ} 37^{\prime} 42^{\prime \prime} \mathrm{N}$. ; lon. $16^{\circ} 54^{\prime} 42^{\prime \prime}$ W. (r.) It stretches for nearly a mile along the shore, a number of the smaller streets or lanes extending up the steep slope of the hill behind. The streets are narrow and crooked, and were formerly very dirty, having foul gutters running down the centre, into which all sorts of filth and garbage were thrown. These, however, have now been nearly all carried underground, and the streets thus rendered very clean. They are also well paved. The houses of the poorer classes are in general low, seldom exceeding one story in height. They are well kept as regards the exterior, being neatly whitewashed, but are very uncomfortable within. The floors are paved with round stones, and the walls are rough; the furniture scanty, and of the coarsest kind. The residences of the wealthy, again, are large, handsome buildings, and the style of living amongst
their occupants luxurions. There are several churches and convents, and in the centre of the town is an open square, planted with exotic trecs. Wheel carriages are unknown, the only kind of vehiele in use being a sort of sledge for trans-
streets, which proceed in the direction of the cardinal points, from its four gates, and terminate in a spacious central square. It is the sce of a bishop, whose palace, situated on a height above the town, is one of the most conspicuous edifices, and has a good library, with a cabinet of coins. The other principal buildings are seven churches, of which the cathedral, a handsome gothic structure, on the site of a Roman castle, and one of the oldest ecclesiastical edifices in IIungary ; the Jesuit church, in the form of a beautiful rotunda; and the Greek non-united church, are the most descrving of notice; the bishop's palace, with a library of 20,000 volumes; an Ursuline and a Franciscan convent, an ecclesiastical seminary, gymnasinm, townhouse, and two hospitals. The chief manufactures are leather and tobacco, the two great staples of the town; woollen cloth, flannel, paper, starch, and vinegar; and the trade includes,
porting pipes of wine from one place to another. Travelling is performed in sedan-chairs. The town is defended by four forts. It is much resorted to by invalids from Britain afflicted with pulmonary complaints. For climate, see Madeira. Pop. 20,000.

FUNDIO, a tı. and par. Portugal, prov. Beira-Baixa, $25 \mathrm{~m} . \mathrm{S}$. Guarda, pleasantly situated, near l. bank, Moncul, an affluent of the Zezere. It has an hospital and a convent, with some woollen manufactures. Wine and fruit are produced in abundance in the vicinity. Pop. 2110.

FUNDENIIALL, par. Eng. Norfolk; 1270 ac. Pop. 367.
FUNDY (Bay of), a large inlet of the Atlantic, E. coast, N. America, separating the S. part of the peninsula of Nova Scotia from New Brunswick, extending 100 m . S.W. to N.E., and about 30 m . average breadth. At its upper extremity it is separated by a peninsula into two arms-Chignecto bay on the N., and Menes channel on the S., leading into Menes basin. The bay is deep, but its navigation is dangerons. At its entrance are Graud Manan, and numerous other islands, and along its N. shore are Passamaquoddy, and several other bays. It receives the river St. John's, at the mouth of which is the city of same name.

FUNEN [Janish, Fyen; German, Fuihnen; Latin, Fionia; French, Fionie], an isl. Denmark, the largest of the Danish islands, except Seeland, from which it is 16 m . W. Its shores are washed, N. by the Kattegat, W. by the Little Belt, and S. and L. by the Great Belt, and the Binnenmeer of the Funen group ; greatest length, 50 m. ; greatest breadth, 40 m .; cir-
cuit, about 185 m. ; area, 852 geo. sq. m . The coast, though in general not very elevated, is in many parts rugged and steep, and is much indented by bays and arms of the sea, of which that of the Odense-fiord is the most extensive. The interior, towards the W., is covered by a range of low hills, stretching from N.W. to S.E., but, with this exception, is composed of large and fertile plains, which, being generally under good cultivation, produce large quantities of corn, much of which is exported. The largest stream is the Odense-A ue, which has a course of about 36 m . It rises in the S . part of the island, traverses it centrally in a N. direction, and divides it into two nearly equal parts. The largest lake is the Arreskov, which is about 3 n . long, by 3 m . broad; is tolerably deep, and teems with fish. A canal, navigable by vessels drawing 8 ft .. extends from the N . part of the town of Odense to the Odense-fiord. Fünen is divided into two bailiwicksOdense, the capital; and Svendborg, and has annexed to it a nnmber of small islands, of which the most important are Färöe, Brandsïe, Waagöe, ljjornüe, Avernaküe, Thoröe, Skaar̈̈e, \&c. Pop. (1851), 170,450.

FÜNFIIAUS, FÜnfhaïsel, or Hangendenliseen, a vil. Lower Austria, about 2 m . from Vienna. It has manufactures of cotton goods and red leather. Pop. 2400.

FÜNFK1RCHEN, Pecs, or Pets [Latin, Quinque Ecclesicx], a tn. Hungary, cap. co. Baranga, on the slope of a hill in a wide and beantiful valley, 105 m . S.S.W. Pesth. It is well built and well paved, and consists chiefly of four principal
in addition to these articles, gall nuts, wine, silk, and oilseeds; the last two in particular being extensively raised in the district. Some cetton also is grown. Fiinfkirchen once had a flourishing university, attended by 2000 students. It has thermal springs; and in the neighbourhood, near Mount Meseck, which commands a magnificent view, coal is worked, and there are quarrics of black marble. Pop. 14,500.

FUNTINGTON, par. Eng. Sussex; 3810 ac. Pop. 983.
FUREAU, a vil. France, dep. Bouches-du-Rhone, 7 m . S.E. Aix. It has manufactures of potash and soda; ceal is worked in the neighbourhood. Pop. 1897.

FÜRED, several places, Inngary, particularly a watering place called the Hungarian Pyrmont, co. Szalad, on the N. shore of Lake Balaton, 20 m . E. Tapolcza. It stands in a beautiful district, has a Protestant chureh, and a bathing establishment; waters of an alkaline and sulphurous nature, only recently come into notice, but much frequented by the Inngarian nobility. Pop. 1046.

FUREEDABAD, a small tn. Hindoostan, prov. of, and 15 m. S. Delhi ; with a large tank, having a ruined banqueting house on its margin.

FURISHI'OOR, a tn. Itindoostan, prov. Malwa, 17 m . from Ashtah. Pop. 1820, estimated at 7000.

FURLOG, Furlaif, or Ferly eg, a vil. IIungary, Thither Theiss, in a mountainous district ncar the Poganis, and about 8 m . from Lugos. It contains a parish church. Pop. 2625.

FURNEAUX ISLANDS, S. Pacific Ocean, S.E. pait Bass Strait; they form a great chain extending about N.N.W. and S.S.E. The principal islands are Great Island, Cape larren Island, Clark and Preservation Islands. Great Island, the largest and most N . of the chain, is 40 m . long, and about 10 m . broad. It is high on the W. side, and is formed of barren peaked lills of various shapes. Clarke's Island is the most S., forming the N. Loundary of Bank's Strait; its S. extremity is in lat. $40^{\circ} 35^{\prime} \mathbf{S .}$; lon. $148^{\circ} 10^{\prime} \mathbf{E}$. (r.) The W. sides of these islands generally present a stecp rocky shore to the prevailing winds and sea, but their E. sides usually slope down gradually into a sandy beach, and contain mumerous swamps and pools. All are overrun with brushwood and a few stunted trees, which latter never exceed 12 ft . in height. Vegetation is scanty. Two species of seals are found here; as also the kangaroo, wombat, and duck-billed ant-eater. Venomons snakes occur on the confines of the brushwood.

FURNES [Flemish, Veurne], a tn. Belgium, prov. W. Flanders, $15 \mathrm{~m} . \mathrm{S} . W$. Ostend, and 4 m . from the French frontier, at the junction of the Dunkirk, Nieuport, Bergues, and Loo Canals. It is small, but neat, is the scat of a court of first resort, and has two churches, a chapel, a college, a superior, primary, and several other schools, a theatre, an hospital, two numeries, a prison, \&c. The townhouse is a remarkable gothic pile; and the church of St. Walburge, built in 870 , is interesting. The inhabitants are partly supplied with water from a large cistern, constructed for the use of a former garrison. There is a good trade in horses, cattle, grain, colza, flax, hops, cheese, \&c. In the environs are
numerous brick and tile fields. In early times, Furnes was an important stronghold. The sea then washed its walls, though now it is 3 m . distant. Pop. 4742.

FURNESS, a dist. England, co. Lancaster, forming a large promontory in the Irish Sea, between Morecambe Bay and the mouth of the Duddon. The greater part of it is rugged, and covered with underwood. Iron ore also abounds; and the inhahitants are extensively employed in iron works, and in charcoal burning. The ruins of the celebrated abbey of Furness stand in a sequestered valley, $7 \frac{1}{2} \mathrm{~m}$. S.W. Ulverstone, and in the neighbourhood is a station on the Broughton and Fleetwood Railway.

FURRAGENE, an isl. Red Sea, W. side, about lat. $18^{\circ} 16^{\prime} \mathrm{N}$.; lon. $38^{\circ} 20^{\prime} \mathrm{E}$. It is nearly 3 m . long, and is situated, with several others, on a reef connected with a coast reef, off Ras [cape] Furragene on the coast of Abyssinia.

FURRAH, a tn. Afghanistan, on the Furrah-Rood, 117 m . S. by W. Herat. In 1810 it was a large, populous, and thriving place, but by 1839, when visited by Conolly, it had been so much reduced in the course of hostilities between the chieftains of Herat and Kandahar, that no part was inhabited but the fort.

FURRAH-Roon, a river of W. Afghanistan, rising in the mountains, N.E. Tooki-Gusseerman, flowing S.W. and falling into Lake Zurrah; lat. $32^{\circ} 4^{\prime} \mathrm{N}$. ; lon. $60^{\circ} 45^{\prime}$ E.

FURRUCKABAD [Farakhabad, happy residence], an inland city, Hindoostan, presid. Bengal, prov. Agra, cap. dist. of same name, and one of the principal towns of Upper India, at a short distance from the W. bank of the Ganges, 90 m . E.N.E. Agra; lat. $27^{\circ} 23^{\prime} \mathrm{N}$.; lon. $79^{\circ} 33^{\prime}$ E. It is surronnded by a wall. Some of the streets are wide, and in the best parts of the town there are many good houses. These, as well as some of the open spaces, are pleasantly shaded with trees. The greater number of the houses, however, are miserable mud hovels. This city is considered the chicf commercial emporium in the conquered and ceded provinces. Lord Lake surprised and defeated Holcar's army here, in 1805. Pop. about 66,000._The District, area, 1562 geo. sq. m. or $1,323,206 \mathrm{ac}$., of which $652,075 \mathrm{ac}$ are cultivated, and $305,095 \mathrm{ac}$. more are cultivable; lies wholly in the doab between the Jumna and the Ganges, and partakes of the general characteristics of the province of Agra, in which it is included. Pop. 777,089, being 497.5 on each sq. m.

FÜRSTENAU, a tn. Hanover, prov. of, and 22 m . N.W. Osnabrück, cap. bail. of same name. It contains a castle, and a Protestant, and a R. Catholic church, and has manufactures of linen, and a trade in cattle. Pop. of tn. 1285; of bail. (area, 117 geo. sq. m.), 14,488 .

FÜRSTENBERG, several places, Germany.-1, A tn. Mecklenburg-Strelitz, in a wild wooded district, between two lakes, on the Havel, 13 m . S. New Strelitz. It is entered by three gates; contains a castle, a handsome structure; a church, and a synagogue ; and has manufactures of cloth and tobacco, several mills, a small building dock, some shipping, and a considerable trade, particularly in butter, corn, wood, glass, and fish. Pop. 2425.-2, A tn. Prussia, prov. Brandenburg, gov. of, and 14 m . S.S.E. Frankfurt, l. bank, Oder, over which there is here a ferry. It contains a custom-house, at which a considerable revenue is drawn. Pop. 1560.-3, A vil. Prussia, prov. Westphalia, gov. Minden, on the $\mathrm{Aa}, 9 \mathrm{~m}$. E.S.E. Büren. It contains a R. Catholic parish church; and has glass-works, tile-works, and an oil-mill. Pop. 1555.

FÜRSTENFELD, a tn. Austria, Styria, 29 m. E. Grätz, on a height above the Feistritz, near the frontiers of Hungary. It is the seat of a law court and several public offices; is surrounded with old walls, has a parish church, ancient castle, Augustine monastery, hospital, and poorhouse; and an extensive imperial tobacco factory, at which about 800 tons of Hungarian tohacco are annually manufactured. Pop. 2000.

FÜRSTENFELDE, a tn. Prussia, prov. Brandenburg, gov, of, and 26 m . N. Frankfurt; with a charch, a trade in horses and cattle, and three annual fairs. Pop. 1506.

FÜRS'TENWAILDE, a tn. Prussia, prov. Brandenburg, gov. of, and 21 m. W. Frankfurt, r. bank, Spree. It consists of the town proper, surrounded by walls, with two gates, and of a suburb; is defended by a fort; is the seat of a civil and criminal court; has a church, hospital, and several other good public buildings; manufactures of woollen and linen el tht, hosiery, and leather ; and five annual fairs. Pop. 4994.

FÜRSTENWERDER, a tn. Prussia, prov. Brandenburg, gov. Potsdam, circle of, and 13 m . W.N. W. Prenzlow, at the foot of a height, between two lakes. It is surrounded by a wall, and contains a parish church. Pop. 1600.

FUR'TA, a vil. Hungary, Thither Theiss, co. Bihar, about 15 m . from Grosswardein. It contains a Protestant and a R. Catholic church. Pop. 1371.

FURTEI, or Forter, a vil., isl. Sardinia, prov. of, and about 20 m . N.W. Cagliari, in a beautiful valley, at the confluence of the Mannu and Caralita. It consists of about 210 honses, built of stone, embosomed among trees; has a parish church, a normal school, and an annual fair. Pop 950.

FURTH, a tn. Bavaria, circle Upper Palatinate, r. bank, Cbam, $57 \mathrm{~m} . \mathrm{N} . \mathrm{N} . W$. Pissau. It contains two churches, a castle, townhouse, and infirmary; and has glass-works, oil, paper, saw, and other mills. Pop. 2224.

FÜRTH, two places, Germany.-1, A tn. Bavaria, cap. circle, Middle Franconia, at the confluence of the Pegnitz with the Rezat, here crossed by a bridge, and on the railway to Nürnberg, from which it is 6 m . W.N.W. It stands in a beautiful and fertile district, and has recently made rapid progress, chiefly owing, it is said, to an influx of Jews, who, pro hibited from living, or even sleeping in Nürnberg, have chosen it as their residence, and brought it into formidable competition with the town which so harshly expels them. It is the seat of courts and offices for the circle; contains three churches, a large synagogue, townhouse, Latin, agricultural, industrial, Jewish, and other schools; a theatre, workhouse, a Jews' orphan, and other hospitals; and has two Hebrew printing presses, and important manufactures of Nürnberg wares, articles in gold and silver wire, bronze, and papier maché, clocks, watches, hosiery, mirrors, picture-frames, jewellery, false brilliants, metal buttons, gold leaf, pipes, \&c. The trade in these articles is extensive, and there is an important annual fair, which lasts 11 days. Fürth is famous for the battle fought in its neighbourhood in 1632, when Gustavus Adolphus attempted in vain to storm the entrenched camp of Wallenstein. Pop. 14,987.-2, A market tn. Hesse-Darmstadt, on the Weschnitz, in a fertile valley, in the midst of the Odenwald, 16 m. S.S.E. Darmstadt. It contains a church and a district prison ; and has saw, oil, and other mills; and three annual fairs. Pop. 1357.

FURTHO, par. Eng. Northampton; 480 ac. Pop. 16.
FURTWANGEN, a vil. Baden, circle, Upper Rhine, 31 m. S.S.E. Offenburg. It contains a parish church; and has manufactures of wooden clocks, a bell foundry, two breweries; and a trade in corn and cattle. Pop. 965.

FURUDPOOR, another name for DAcca (which see).
FURY-and-Hecla-Strait, a narrow channel, British N. America, between Cockburn Island and Melville Peninsula, communicating with the Gulf of Boothia, on the W., and Fox's Channel on the E. Its length between these two seas is about 100 m .; average breadth, about 15 to 20 m . E. entrance about lat. $69^{\circ} \mathrm{N}$. ; lon. $80^{\circ} 30^{\prime} \mathrm{W}$. It contains a number of islands.

FURY POINT, British N. America, Prince Regent's Inlet, W. side N. Somerset; lat. $72^{\circ} 40^{\prime} 30^{\prime \prime}$ N.; lon. $91^{\circ} 53^{\prime}$ W. (n.) Here H.M.S. Fury was abandoned in August, 1825 ; and here Sir J. Ross wintered in 1822-23.

FUSAGASUGA, a river, New Granada, flowing W., and falling into the Magdalena, 52 m . W.N.W. Santa-Fe-de-Bogota. It abounds with alligators of great size.

FUSARO [anc. Acheron], a lake, Naples, prov. of, and 9 m . W.S.W. Naples; about 1 m . in circuit, separated from the sea by an artificial embankment; and famous for its oysters. In ancient times it was the subject of numerous fables. Its banks are now covered with vines, but, from the number of ancient tombs, are supposed to have been used as places of sepulture by the neighbouring towns.

FUSE, a river, Germany, which rises in Hanover, about 4 m. N.N.E. Liebenburg, prov. Hildesheim; flows N.N.W., passes Peina, and at Celle joins l. bank, Aller, after a course of 60 m . Its affluents are the Erse and Aue.

FUSH'T, an isl. Red Sea, E. side ; lat. $16^{\circ} 11^{\prime}$ N.; lon. $42^{\circ} 25^{\prime}$ E.; it is 2 m . long, and 1 m . broad at the S. end, and is of considerable hight. There is a small fishing village, with a mosque in the centre of it, and near the village are some wells of brackish water; but on the $S$. part of the island good water may be obtained, though difficult of access, the landing-place being rocky.

FUSIGNANO, a tn . Papal States, deleg. of, and 30 m . S.E. Ferrara, 1. bank, Senio. It is a amall place, but possesses some interest from having given birth to the celebrated composer Corelli, and the poet Vincenzo Monti. Pop. 2450.

FUSINA, a vil. Austrian Italy, gov. of, and 4 m . W.S.W. Venice, at the entrance of the lagoons, 1. bank, Brenta, whicls here receives the canal of Brentella, and continues to Venice under the name of the Canal of Fusina. There are a great number of fine villas in the vicinity. Pop. 1200.

FUSSEN, a tn. Bavaria, circle, Swabia. cap. dist. of same name, $57 \mathrm{~m} . \mathrm{S}$. by W. Augsburg, near the fronticrs of Tyrol, r. bank, Leeb, which here forins a fine cascade, and is crossed by a bridge. It is an old place, of Roman origin; contains two churches, a castle, Franciscan monastery, and hospital; and has manufactures of linen, woollen articles, and musical instruments, several mills, marble and other quarries; and a transit trade. P. tn. 1315; dist. 15,006.

FUTI-Panjal, a mountain, Cashmere, upwards of $12,000 \mathrm{ft}$. light lat. $33^{\circ} 20^{\prime}$ N.; lon. $74^{\circ} 30^{\prime} \mathrm{E}$.

FUTTAK, two contiguous places, IIngary, Hither Danube, co. Sacs, I. bank, Danube, 8 m. E. Peterwardein.-1, ( $O$, or Old Fut$t a k$ ), a market tn. and lordship; contains a Greek clurch, and has an important annual fair, frequented by Armenians, Grecks, and Turks. 1'op 4700.-2, (Uj, or New Futtuk),
$\qquad$
$=-1+0$

PAKT OF THE YALACE OF AKBAK, FUTTIPOOR-SIKRA. From an original Drawing by Capt. R. Smilh, 414b Regt. a tn., which contains a R. Catholic parish church; and has a ferryover the Danuie towards Cserevics. It is imhabited almost solely by Germans. Pop. 4800.

FU'TTEHEBAD [the abode of victory].-1, A tin. Hindoostan, prov. Ajmeer, $25 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Hissar.-2, A tn . Hindoostan, prov. Malwa, $28 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Oojeen. It was so named, by Aurungzebe, after a great battle gained here.- 3, A tn. Afghanistan, in the plain of Jelalabad, 3098 ft . above sea level ; lat. $34^{\circ} 21^{\prime} \mathrm{N}$. ; lon. $70^{\circ} 13^{\prime} \mathrm{E}$. It was occupied by the British troops, under Sir Robert Sale, during the advance on Cabool in 1842.

FU'TTEHGHUR [Fataghar, the fort of vietory], an inland tn . Hindoostan, prov. Agra, r. bank, Ganges, 90 m . N.W. Lueknow, and 3 m . from Furruckabad; lat. $27^{\circ} 21^{\prime}$ N.; lon. $79^{\circ} 30^{\prime} \mathbf{E}$. The houses are mostly built of mud, and a mud fort protects the arsenal. The appearance of the town is extremely desolate, many of the military buildings having fallen into decay in consequence of the withdrawal of nearly all the troops, who were removed on the extension of the British frontier to the N.W. A few European merchants reside and carry on business here. During the dry season, the Ganges is here reduced to two or three narrow channels, and the town is rendered nearly uninhabitable by dust. The manufacture of tents is carried on to a considerable extent. The workmanship is superior, and the material of which they are made excellent.

FU'T'TEHGUNGE, or Fatahganj, a walled tn. Hindoostan, prov. Oude, 8 m . W.S.W. Lucknow. It was formerly the residence of Raja Tickait Roy; and contains a fine tank, surrounded with ruined buildings.

FU'TTEHPOOR.-1, A large inland tn . Mindoostan, prov. Allahabad, 65 m . S. Lucknow; lat. $25^{\circ} 56^{\prime} \mathrm{N}$. ; lon. $80^{\circ} 45^{\prime}$ E. It is surrounded with tombs, and contains several good honses, and an clegant mosque. There is here a large ruinous caravanscrai.-2, A vil. Beloochistan, prov. Cutch Gundava, 5 m . S. Gundava; lat. $28^{\circ} 25^{\prime} \mathrm{N}$. ; lon. $67^{\circ} 35^{\prime} \mathrm{E}$. -3, A tn. Scinde, at the N. extremity of an extensive plain, 40 m . S.W. Bukkur; lat. $26^{\circ} 20^{\prime} \mathrm{N}$. ; lon. $68^{\circ} 10^{\prime} \mathrm{E}$. It is considered one of the healthiest places in Scinde. - 4, A vil. Pinjab, I. bank, Indus, 38 m . above the confluence of the Punjnul; lat. $29^{\circ} 24^{\prime} \mathrm{N}$. ; lon. $70^{\circ} 49^{\prime} \mathrm{E}$.

FU'TTIIIPOOR, a tn. Punjab, in a fertile and well-cultivated country, l. bank, Ravee, 82 m. S.W. Lahore, on the route thence to Mooltan. - 2, A large vil. Scinde, on an offset of the Indus, 70 m . N. Sewan; lat. $27^{\circ} 16^{\prime} \mathrm{N} . ;$ lon. $68^{\circ} 15^{\prime} \mathrm{E}$.

FUTTIPOOR SIKRA, an inland tn. Hindoostan, prov. of, and 19 m . W.S.W. Agra; lat. $26^{\circ} 6^{\prime}$ N.; lon. $77^{\circ} 34^{\prime}$ E. It was enclosed and fortified by the Einperor Akbar. whose favourite place of residence it was, but the space within does not seem to have ever been filled up with buildings. The remains of a palace, formerly inhabited by the emperor, are still in existence. The portion of this deserted palace, containing the apartments of Abu-Fazel, the celebrated prime minister of Akbar, is in a better state of preservation than most of the
other buildings; in some measure to be accounted for from no timber having been used in its construction. The walls are of great strength and solidity, all the apartments being arched, and it appears, from what remains, were once richly decorated with stucco. The exterior is all of a sombre red freestone, in a fine style of oriental gothic; the most remarkable features of which are very projecting eaves over the lower and upper stories, supported by massive and elaborately-sculptured brackets, springing from pilasters. The frieze is also ornamented with rich tracery, besides many other parts of the front, which gives the whole a very beautiful appearance. As Mahometan privacy did not permit the architect to make many windows, the spaces between the pilasters are only recesses; but the tympanums and spandrels are so ornamented with mouldings and carving as greatly to add to the richness of the whole. There is also a tomb of elaborate workmanship, in which several members of the royal family were buried; it stands in the centre of an areaded square, and is approached through a gate of noble proportions.

Fu'poollail-Kila, or Puttoola-Kilha, a vil. and fort, Afghanistan, 50 m . S.E. Kandahar, 3918 ft . above sea level. Its supply of water, brought by a canal from hills about 50 m . N., can be easily intercepted; the british army suffered severely from this cause when encamped here in April, 1839.

FU'TWA, a tn. IIndoostan, presid. Bengal, prov. Bahar, at the confluence of the Pompon with the Ganges, 12 m . S. by E. Patna. The Pompon is here passed by a substantial bridge.

FUUR, or Fuurlani, an isl. Denmark, in the Liimfiord, in the N. of Jutland; area, about 8 geo. sq. m. It is separated from the mainland by a narrow but deep channel of same name. The S . and smaller portion of the island only is cultivated. The N. part consists of precipitous heights, separated by narrow rocky valleys. There are some mmeral springs, and also traces of ancient volcanic activity. Fuur forms a parish, and has a church, of red sandstone, quarried in its weighbourhood. Pop. 1000.

FÜZER, a vil. Hungary, co. Abaujvar, 15 m . S.E. Kaschan. It stands at the foot of a lofty hill, crowned by an old castle; contains a Protestant and a R. Catholic chureh; and has glass-works, and a trade in cattle. Pop. 665.

FÜZES, several places, Hungary, particularly:-1, (or Fizesch), [Latin, Salicium], a vil. co. Kraszna, on the slopes of two hills, surrounded by woods, 15 m . from Somlyo. It is

## FYEN

inhabited by Wallachians; and contains a Greek parish church Pop. 2414.-2, (-Gyarmath), a market tn. Thither Theiss, co. Bekes, on the Berettyo, equally distant from Gyula and Csaba. It contains a handsome Protestant church; and has a considerable trade in cattle, but suffers much from a deficiency of good drinking water. Pop. 4950.

FYEN, an isl. Denmark. See Funen
FYFIELD, three pars. England:-1, Eerks; 1620 ac. Pop. 382.-2, (or Fifehead), Essex; 2030 ac. Pop. 563.-3, 1lants, 2210 ac. Pop. 236.

FYLINGDALES, par. Eng. York (N. Riding); 13,010 ac. Pop. 1611.

FYNE, or Fine (Loch), an arm of the sea, Scotland, W. coast, co. Argyle, opening into the Firth of Clyde, N.by W. of the Island of Arran. The entrance is marked by the Point of Ardlamont, in Cowall, on the E., and the point of Skipness, in Kintyre, on the W., where it is 4 m . wide. From these points it stretches N.N.W., maintaining nearly the same breadth, namely, 4 m ., for about 16 m ., when it runs N.N.E. to its termination, 24 m . further, making its whole length 40 m. , and having a breadth, during the latter part of its length, of not more than a mile, and at and near its termination of considerably less. Its depth, so far as known, varies from 12 to 50 fathoms. The currents of flood and ebb set
strongly up and down this loch, on the W. shore. Loch Fyne abounds in fish-haddocks, whitings, and codlings, but its fishery of herrings, celebrated for their superior quality, is by far the most valuable. In the fishing seasons many hundreds of boats stud the surface of the loch at various points, particularly opposite the town of Inverary, which is situated near its head, on the W. shore of a fine bay. The considerable country town, Lochgilphead, stands at the head of another inlet, called Loch Gilp; and near it is Ardrishaig, at the entrance to the Crinan Canal. Along the upper part of the loch, the hills rise steeply from the water, and around Inverary the scenery is very beautiful, but at no other point do its shores present any features of particular interest.

FYVIE, par. Scot. Aberdeen, 13 m. by 3 m. Pop. 3597.
FYZABAD [beautiful residence]:-1, An inland tn. Hindoostan, prov. Oude, 65 m. E. Lucknow; lat. $26^{\circ} 50^{\prime} \mathrm{N}$.; lon. $82^{\circ} 30^{\prime} \mathbf{E}$. It was formerly the capital of Oude, but was abandoned in 1775 for Lucknow. It is still of considerable extent, and contains a numerous population, chiefly of the lower classes.-2, A vil. Hindoostan, prov. Delhi, near the E. bank of the Jumna, where that river is sues from the hills. In the vicinity are the remains of a liunting seat, erected by the Mogul emperor Shab Jehan.-3, A tn. Independent Tartary. See Buduksian.

## G.

[ $G$ soft is often used interchangeably for $J .-G$ hard is often written $G h$.]

GAAD, a vil. Hungary, Thither Theiss, co. Torontal, on the Temes, about 12 m . from Detta. It is inhabited by Wallachians; and contains a Greek non-united church. Pop. 1108.

GABARDAN, or Gavardan, an ancient vicomté, France, belonging to Condomois, and partly in Guienne, partly in Gascogny. It is now included in the E. of the dep. Landes, and the S.W. of Lot-et-Garonne. Gabaret was its capital.

GABBIANO, a vil. and com. Austrian Italy, prov. of, and $18 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Brescia, in a beautiful and fertile plain. It has a parish and three auxiliary churches; and an annual fair. Pop. 2022.

GABEL, two places, Bohemia:-1. Gabel, Gablon, or Gablony, a tn., circle, Chrudim, 1. bank, Adler, 37 m. E.S.E. Königgrätz. It has a parish church, townlouse, school, a weekly market, and an annual fair. Pop. 605.-2, Gabel, Gabdau, or Jablona, a tn., circle Bunzlau, in a mountainous but beautiful district, in a steep valley, on the Jungfermbach, nearly 800 ft . above the sea, 50 m . N.N.E. Prague. It is surrounded with walls, has a handsome church, townhouse, and hospital, and manufactures of woollen and linen cloth; a saw, three cotton, and several other mills; a trade in corn and cattle, and several much-frequented annual fairs. In the neighbourhood is the castle of Falkenberg. Pop. 2135.

GA BELLA, a small tn. Europcan Turkey, prov. Bosnia, W. part, on the Narenta, 29 m . S. by W. Mostar.

GABIAN [anc. Gabianum], a tu. and com. France, dep. Herault, in an agreeable and fertile district, on the Tongue, 33 m. S.S.W. Montpelier. It possesses both a mineral and a petroleum spring, and the remains of a Roman basin and aqueduct, by which water was conveyed to Beziers; and has distilleries, lime-kilns, and two annual fairs. Fine rock crystals and some coal are found in the vicinity. Pop. 1023.

GABIANO [Latin, Gabianum], a tn. Sardinian States, Piedmont, div. of, and 28 m . N.W. Alessandria, r. bank, Po. It has a parish church, three schools, a court of justice, and a trade in wine. Pop. 2353.

GABLONZ, or Gablunka, a market tn. Bohemia, circle Bunzlau, on a small stream of same name, at its confluence with the Neisse, 56 m. N.E. Prague. The houses are mostly of wood; but it has a regular market-place, with well-built houses, of modern construction; contains a church and large handsome school, and has manufactures of woollen cloth, and particularly of glass beads, and similar articles, which, in
town and district, employ about 6000 persons, and form an important trade. It has also three worsted mills and two annual fairs. Pop. 3209.

GABOON, a river, W. Africa, which enters the Atlantio by a broad estuary, near the Equator.

GABRIEL (San) :-1, A small isl. S. America, estuary of the Plata, nearly opposite to Buenos Ayres; lat. $34^{\circ} 30^{\prime}$ S.; lon. $57^{\circ} 58^{\prime} \mathrm{W} .-2$, One of the Admiralty islands, S . lacific Ocean; lat. $2^{\circ} 11^{\prime}$ S. ; lon. $147^{\circ} 28^{\prime}$ E. (n.)- 3, A cape, Gulf of California; lat. $28^{\circ} 35^{\prime} \mathrm{N}$. ; lon. $112^{\circ} 46^{\prime} \mathrm{W}$.

GABRIEL CHANNEL, a remarkable channel, Tierra del Fucgo islands; lat. $54^{\circ} 20^{\prime}$ S.; lon. $70^{\circ} 40^{\prime}$ W.; between Dawson island and a range of hills on the E. side of Madalen Channel, having Cape Froward directly opposite its N.W. extremity. 'The apparently artificial formation of this channel is very striking,' says Captain Fitzroy. 'It seems to have been formerly a valley between two ridges of the range, in the direction of the strata, and that, at some remote period, the sea had forced its way through, effecting a communication between the strait and the waters behind Dawson island.' The width of the channel, at both extremities, is from 2 to 3 m . ; but the shores gradually approach each other midway, and the coast on each side rises abruptly to the hcight of 1500 ft . The hills on either side are thickly wooded, and present a very picturesque appearance. The whirlwinds or hurricane squalls, called by sealing vessels 'williwaws,' so frequent in Tierra del Fuego, operate here with great violence. Bursting over the mountainous ridge which forms the S . side of the channel, they descend, and, striking against the bass of the opposite shore, rush up the steep, and carry all before them.-(Voy. Adventure and Beagle.)

GACE [anc. Waccium], a tn. and com. France, dep. Orne, r. bank, Tongue, 27 m . N.N.E. Alençon. It was once a place of some importance, and possessed a strong castle, of which the ruins still remain. It has manufactures of muslin, bleachficlds, and tanneries, a trade in thread, horses, and cattle, and five annual fairs. Pop. 1588.

Gacs, Gats-Varallya, or Halics, a market tn. Hungary, Hither Danube, co. Neograd, 27 m. S. Brezno-Banya. It is commanded by a castle, on a height immediately above it; has a R. Catholic church, manufactures of woollen and linen cloth, paper, and tinware; extensive potteries, liqueur works, and a trade in salt. Pop. 4300.

Gadamis, a tn. Africa. See Ghadames.

GADÄ'TCII, or Gaditcr, a tn. Russia, gov. of, and 60 m. N.N.W. Poltowa, cap. circle of same name, at the conGluence of the Khoral with the Psiol. It contains seven churches and a monastery; and has a trade in eorn, tobaeco, wax, and wool ; weekly markets, and four annual fairs. P. of tn. (1851), 4909.---The circle is fertile and well enltivated. GADDESBY, par. Eng. Leicester; 1580 ac. Pop. 331. GADDESDEN, two pars. England, Hertford: -1, (Great), 4000 ac. Pop. 1109.-2, (Little), 910 ac. Pop. 454. GADE, a river, England, eo. IIerts, which falls into the Colne, near Rickmansworth.

GADEBUSCH, a tn. Mecklenburg-Schwerin, cap. bail. of same name, on the Radegart and a small lake, 11 m . W.N.W. Schwerin. It is walled, and is, for the most part, poorly built; has an old gothic church, with a chapel, where King Albrecht of Sweden is buried; a townhouse, and castle, used as a courthouse; manufactures of woollen and linen cloth, tobacco, leather, and hats; numerous breweries and distilleries, several mills, and three annual fairs. Körner the poet fell here, in the war of liberation; a monument marks the spot. Pop. tn., 2284. Area of bail. 46 geo. sq. m.; pop. 4200 .

GADMEN, a vil. and par. Switzerland, ean. Bern, dist. Ober-Ilasli, in a narrow valley of same name, hemmed in by lofty mountains, some of them 9000 ft . high, 12 m . S.S.E. Sarnen. It contains a parish chureh and two schools. Pop. 697.-The Valley of Gadmen, about 16 m . long, opens on the E., into the green and lovely valley of Upper IIasli, and is traversed by a mountain torrent.

GADONI, a vil., isl. Sardinia, div. of, and $49 \mathrm{~m} . \mathrm{N}$. Cagliari. It stands on a hill slope, is an insignificant place, with steep and narrow strects, and very indifferent houses; and contains four churches and a school. Pop. 690.

GADOO, a native state, Senegambia, S. of Fooladoo and Brooko. It is mountainous, and well watered by affluents of the Senegal, and contains mines of gold, iron, and saltpetre.

GADOR, a tn . Spain, Andalusia, prov. of, and 10 m . N.N.W. Almeria, in a kind of basin formed by three hills, $r$. bank, Almeria. It is urregularly built, has all its streets narrow excepting one, which stretches aeross the town. It has a parish chureh, townhouse, prison, and primary sehool; several oil and flour mills, and a trade in corn. Two old Moorish castles crown heights in the vicinity. Pop. 1702.

GADOR (Sierra de), a chain of mountains, Spain, Andalnsia, forming part of a range which is nearly parallel to the Sicrra Nevada, and takes the name of Alpujarras. Its culminating point has a height of 6755 ft . It is principally composed of micaceous schist, succeeded by argillaceons schist, above which are black calcareous rocks, rich in the sulphuret of lead. The mines have been extensively worked since $18: 0$, and yield annually abont 6696 tons.

GADSIILLI, an eminence, England, co. Kent, on the London road, $2 \frac{1}{2} \mathrm{~m}$. N.W. Rochester, celebrated by Shakspeare as the scene of Falstaff's valorous exploits.

GAE, a large vil. W. Africa, Foota-Toro, l. bank, Senegal; lat. $16^{\circ} 28^{\prime} \mathrm{N}$. ; lon. $15^{\circ} 28^{\prime} \mathrm{W}$. The inlabitants are skilful fishermen, and the women prepare and sell the products of the fishery. Millet is cultivated in the environs of the village.

GAES'TRIKLAND, an anc. dist. Sweden, situated in the S.E. of lian Gefleborg, and now included in it.

GAETA [Cajeta of the Romans; French, Gaëte], a strongly fortified seaport tn . Naples, prov. Terra di Lavoro, $76 \mathrm{~m} . \mathrm{S} . \mathrm{E}$. Rome ; lat. (Orlando Tower), $41^{\circ} 12^{\prime} 24^{\prime \prime} \mathrm{N}$. ; lon. $13^{\circ} 34^{\prime} 45^{\prime \prime} \mathrm{E}$. (r.) The fortress is situated on a lofty promontory, which projects into the Mediterranean, and forms one side of the Gulf of Gaëta. Between the fortress and the mainland stands the tomb of Munatius Plancus, a friend of Augustns. It is called Torre d'Orlando, and is of a circular form. The town, which stretehes along the shore, is rather irregularly, but neatly built; the streets are narrow and steep, but are well paved, the whole place presenting a lively and picturesque appearance. The cathedral is a handsome building, well proportioned and well lighted, with a fine tower. Popular tradition asserts that, in a grove hard by, Cicero was put to death, by order of Antony. The bay of Gaëta, with its surrounding scenery, is exceedingly beantiful, rivalling that of Naples. Gaëta is a place of great antiquity, having been a favourite resort of the wealthy families of Rome. It is the head town of a distriet, and is
the seat of a bishopric. Pope Pio IX. eseaped in disguise from Rome to Gaëta, November 24, 1848, when the Eternal City had passed under the sway of Mazzini and his coadjutors. Pop. about 14,000.

GAFSA, or Cafsa [ane. Capsa], a tn. N. Africa, regeney of, and $170 \mathrm{~m} . \mathrm{S}$. by W. Tunis. It is surrounded by a dilapidated earthen wall, and consists chiefly of earthen houses, of one story. The public buildings are, in a great measure, constructed of tho materials of the ancient town, which was a place of considerable importance under the Romans. It has a eitadel, bazaar, mosques, abundant springs of warm water, gardens, and plantations of date, fig, and olive trees. P. 2000 .

GAGGENAU, a vil. Baden, circle, Middle Rhine, 1. bank, Murg, 14 m. S.S. W. Carlsrulie. It has a chureh, manufactures of glass, two breweries, and an iron, oil, and other mills. Pop. 1150.

GAGLIANO, three places, Naples:-1, A tn. prov. Terra d'Otranto, 28 m . E.S.E. Gallipoli, in a beautiful plain, not far from the Ionian Sea. Pop. 1394.-2, A vil., prov. Calabria Citra II., dist. of, and 3 m . N. W. Catanzara, in a mountainous district. Pop. 1461.-3, A vil. and com. Sicily, prov. of, and 36 m . W.N.W. Catania. Asphalte is found in the vicinity. Pop. 2886.

GAGLIAYOLA [Latin, Haliavola], a vil. and com. Sardinian States, Piedmont, div. of, and 28 m . S.S.E. Novara, r. bank, Agogna. It contains two churehes and a chapel, produces much silk, honey, and wax, and has a trade in horses, wine, and fruit. Pop. 735.

GAGY, Gag, or Gaga, an isl. Indian Archipelago, Gillolo Passage; lat. (N. point) $0^{\circ} 20^{\prime} \mathrm{S}$. ; lon. $129^{\circ} 53^{\prime}$ E. (R.) It is of small extent, and moderately elevated; has a good haven on its S . side, and yields plentifully sago and timber.

GAIA (Villa Nova de), a th. and par. Portugal, prov. Douro, l. bank, Douro, immediately opposite Oporto. It is an important entrepott for the wine of the surrounding districts. Pop. 5390.

GA1DRONISI [anc. Patroclea], a small isl. Enropean Turkey, in the Mediterranean, S. side of Candia; lat. $34^{\circ} 38^{\prime}$ N.; lon. $25^{\circ} 45^{\prime}$ E. It is quite barren, the cliffs being tenanted by wild pigeons, and nothing growing on it but a small quantity of thyme.

GAIL, a river, Austria, which rises on the frontiers of the Tyrol, on the N. side of the Carnic Alps, flows E.S.E. across the N. of Illyria, and, after a course of about 80 m ., joins r. bank, Drave, a. little below Villach. Its principal affluent, which it receives on the right, is the Gailitz.

GAILDORF, a tr. Würtemberg, circle, Jaxt, cap. bail. of same name, r. bank, Koeher, 17 m . W.N.W. Elwangen. It has two eastles, an old tower, ehureh, a cold water bathing establishment, and vitriol, alum, and piteh works. Pop, tn., 1510. Area of bail. 136 geo. sq. m. ; pop. 24,599 .

GAILE, par. Ireland, Tipperary; 2430 ac. Pop. 646.
GAILLAC, a tn . France, dep. Tarn, 13 m . W. by S . Alby, in a fertile plain, r. bank, Tarn. It is irregularly built, has several suburbs, and a communal college, with nearly 200 students ; some cooperages, hat factorics, tanneries, dyeworks, boatbuilding yards, \&c. Good red table wine is exported, the district abounding in vineyards. Pop. 5507.

GAILLAN, a vil. France, dep. Gironde, 40 m. N.N.W. Bordcaux; with a trade in cattle, wax, and wine, and an annual fair. Pop. 1793.

GAILLON, a th. France, tlep. Eure, 13 m . N.E. Evreux, near the railway from Paris to Ronen. It contains a large prison for the conviets of Eure, and several adjoining departments, built on the site of an antique chatean, first erected by the Dukes of Normandy, but rebuilt by Cardinal Georges d'Amboise. A portion of this second edifice, begun in 1515, still remains. In the town is a manufactory of silk and plush. Pop. 1232.

GAlNFAHRN, Guinvarn, or Confarn, a vil. Lower Austria, about 4 m . from Baden. It is the seat of a rural court, has three mills, and produces good wine. Pop. 1300.

GAINFORD, a vil. and par. England, co. Durham. The village, pleasantly situated in the valley of the Tees, 7 m . W.N.W. Darlitgton, is in the form of an irregular square, with a green in the centre. It contains a handsome church and a Wesleyan chapel.-The parisin (area, 23,570 ae.) is divided into several chapelries, and contains a number of townships. Pop. 7083.

GAINSBOROUGH, a market tn., river-port, and par. England, co. Lincoln. The town, 15 m. N.W. Lincoln, r. bank, Trent, here crossed by a handsome stone bridge, of three elliptical arches, and at the junction of the Great Northern with the Manchester, Sheffield, and Lincolnshire Railway, extends along the river about $1 \frac{1}{4} \mathrm{~m}$., and is about $\frac{1}{4} \mathrm{~m}$. in breadth at the broadest part. It is closely built, the streets are well paved and lighted, and supplied with water from the Trent, raised by a powerful engine. Occupying a low situation, it is liable to sudden, and, as they frequently prove, destructive inundations. The parish church, rebuilt on the site of the old one, which, with the exception of the tower, a fine specimen of the architecture of the 14 th century, was taken down, in 1736, is a neat structure. There are, besides, a landsome new district church, and places of worship for Methodists, Unitarians, R. Catholics, and Friends. Other public buildings are the townhall, in the market-place; the custom-house, and the old hall or manor-house, a large quaint building, part of which is supposed to have been built by John of Gaunt, and having a brick tower 80 ft . high at its N.E. end; it contains the theatre, extensive assembly-rooms, and the mechanics' institute. There are a grammar, a national, and several other schools; several almshouses, a number of minor charities, and a workhouse. The Trent is navigable to Gainsborough by vessels of from 150 to 200 tons, enabling the port to carry on a considerable import and export trade, and to participate with IIull in the Baltic trade. Its consequence as a river-port is further increased by its connection with the extensive canal navigation established through the interior to Manchester, Liverpool, Gloncester, Bristol, London, \&c. There are shipbuilding yards here, several ropewalks, numerous oil-mills ; tanneries, breweries, and brass and iron foundries, naileries, cooperages, sail-lofts, \&c. The malting business is also carried on to a considerable extent. Steamers run between Gainsborough and Hull. Markets on Tuesday. Pop. (1841), 6948. Area of par., 7210 ac. Pop. 7860.

GAIRLOCII, a picturesque arm of the Firth of Clyde, Scotland, co. Dumbarton, opposite Greenock, and between the parishes of Row and Roseneath. It is 7 m . long by about 1 m . broad; at its upper end is the watering village of Gairlochhead, and along its shores are many beautiful villas.

GAIRLOCH, par. Scot. Ross, 40 m . by 30 m . Pop. 4880.
GAIRO, a vil. Sardinia, div. Cagliari, prov. of, and 3 m . from Lanusei. It stands on a slope facing the $S$., has a larger, and three minor churches, a priniary school, manufactures of coarse woollens, a trade in wine, and an annual fair. Pop. 1100.

GAIRSA, or Gairsay, a small isl. Scotland, Orkneys, about 1 m . off N.E. coast of Pomona or mainland. Pop. 71.

GAlS, a vil. and par. Switzerland, can. of, and 4 m. N.E. Appenzell, in a bare bleak country, without a tree or shrub, watered by the Rothe, about 2900 ft . above sea level. The houses are almost all of wood, but it is tolerably well built, contains a large parish church, and annually attracts hundreds of invalids from all parts of Europe, for its pure and bracing air, and its goats' whey. Immediately N. is Mount Gabris; it is easily ascended, and presents a magnificent view. P. 2609.

GAJAl?, or Gairing, a market tn. Hungary, Hither Danube, co. of, and 24 m . N.N.W. Pressburg on the Rudana. It contains a parish chureh, and has large cattle markets, and a considerable general trade. Pop. 3000 .

GAJDEL, a vil. Hungary, Hither Danube, co. Neutra, dist. of, and 10 m . from, Bajmocz, in a mountainous district. It has a parish church, manufactures of various articles in wood, and a trade in dried fruit. Pop. 1800.

GAJDOBRA, a vil. Hungary, Hither Danube, co. Bacs, in a plain about 7 m . from Palanka. It is inhabited by Germans, and contains a parish church. Pop. 3000.

GAKOVA, a vil. Hungary, I Ither Danube, co. Bacs, on the high road between Gara and Zombor. It contains a parish church. Pop. 3000.

GAL-Szegh, or Szecsowoze, a market tn. Hungary, co. Zemplin, about 4 m . from Vecsc. It contains a Protestant, and a R. Catholic church, and a fine castle with four towers, and has five annual fairs. Pop. 1805.

GALA WATER, a river, Scotland, which rises in the Muirfoot Hills, co. Edinburgh, flows mostly S.S.W. through a beautiful and romantic country, forms for some distance the boundary between counties Roxburgh and Selkirk, and falls into the Tweed near Abbotsford.

GALACZ, tn. Moldavia. See Galatz.
GALAM, or Kajaiga, a country, W. Africa, Senegambia, intersected by the parallel of $14^{\circ} 45^{\prime} \mathrm{N}$., and by the meridian of $13^{\circ} 10^{\prime} \mathrm{W}$. It occupies a narrow space along the Senegal, being N. of Bondou and Bambouk; and W. of Foota-Damga. It is divided by the Falemé into two parts, of which the W. is called Goye or Lower Galam, and the E. Kamera or Upper Galam. It is fertile and rich in vegetable products; the rivers abound with fish, their banks with crocodiles and hippopotami ; and the forests with lions, elephants, wild boars, and apes. The inhabitants are an industrious, agricultural, and commercial people, almost exclusively employed as carriers. They are peaceful, gentle, and respected by the inhabitants of the different countries traversed by their caravans, or with whom they carry on commercial relations. The supreme power is conferred according to the principle of collateral succession; but the authority of the tunka or chief, is restricted by a national or representative council.-(Raffenel Voy. duns l'Afrique Occid.)

GALANTHA, a market tn. Hungary, Hither Danube, co. of, and 30 m . E.N.E. Pressburg. It contains a R. Catholic, and a Greek united church, and has a handsome castle belonging to Prince Esterhazy. Pop. 2870.

GALAPAGOS ISLANDS [German, Schillhröteninseln; French, Iles des Tortues], a group of isls. in the N. Pacific Ocean ; lat. (Albemarle isl., W. part) $0^{\circ} 0^{\prime}$; lon. $91^{\circ} 25^{\prime} \mathrm{W} .$, about 600 m. W. the coast of Ecuador, to which state they belong. There are 13 islands altogether, seven small, and six of considerable size, lying between lat. $1^{\circ} 30^{\prime} \mathrm{S}$. , and $1^{\circ} 4^{\prime} \mathrm{N}$., and lon. $89^{\circ} 20^{\prime}$ and $92^{\circ} 10^{\prime} \mathrm{W}$. The largest, Albemarle Island, is 60 m . in length, and about 15 m . broad, its highest summit 4700 ft . above the sea. These islands are all of volcanic orign, and of comparatively recent formation. Their appearance is exceedingly uninviting; but on penetrating into the interior of Charles Island, the sixth of the group, in point of size, an extensive plain, fertile and highly cnltivated, is met with, bearing lnxuriant crops of bananas, sugar-canes, Indian corn, and sweet potatoes. Plantains, pumpkins, Yuca, Quito oranges, melons, and the castor-oil plant, are also cultivated. Crabs, iguanas, a large kind of lizard, and great elephant tortoises abound, the two latter being peculiar to the Galapagos, the Spanish name for land tortoises. These animals grow here to an immense size, weighing frequently several hundred pounds' weight, and are altogether extremely ugly; when large, their feet are like those of a small elephant, whence their name. There are goats and hogs on Charles Island, but they are scarce and wild. Sinall birds are numerous, and so remarkably tame, that they may be knocked down with a stick. Lizards also abound, and there are a few sinall snakes. In 1832, the republic of the 'Ecuador' decided to use these islands as a place of banishment, and sent a small colony to Charles Island. At the time of Capt. Fitzroy's visit, in 1835 , there were 80 small houses, and nearly 200 souls upon the island, most of them convicts. Besides the two already named, the other larger islands are Narborough, on which is an active volcano, 3720 ft . high ; James Island, Indefatigable Island, and Chatham Island.-(Voy. of the Beagle ; London Geo. Journal.)

GALAROZA, a tn. Spain, Andalusia, prov. of, and 58 m . N. by E. Iuelva, l. bank, Martiga, tolerably well built, with wide and clean streets; a handsome modern church, townhall, prison, school, storehouse, and cemetery. Pop. 1936.

GALASHIELS, a manufacturing tn. burgh, and par. Scotland, partly in the co. of Roxburgh, and partly in that of Selkirk, in a valley on both banks of the Gala, which is here crossed by two stone and two wooden bridges, and about a mile from its confluence with the Tweed, 27 m . S.S.E. Edinburgh. It consists of six principal streets, and several smaller, most of them tolerably straight, and now well kept ; houses well built of a beautiful blue granite, obtained in the vicinity; town well lighted with gas, but indifferently supplied with water. There are in all 10 churches and chapels here-one Established church, one cliapel of ease, two U. Presbyterian, two Free churches, one Baptist, one Glassite, one Independent, and one Episcopal. All these are substantial structures, but none of them remarkable for architectural beauty. There are but few schools; the most important is the parish school ; there are also one or two boarding schools, a mechanics' institute, with library attached; a public library,
and a reading room. Galashiels is celebrated for the manufacture of woollen goorls, having taken four prize medals at the Great Exhibition for the excellence of its manufactures in this department. The chief articles made here are shawls, plaids, ladies' dresses, and 'tweeds,' to the extent, probably, of about $£ 250,000$ annually. The other works in the town are a large yarn work, a skinnery, an iron foundry, a steam-mill, and two cugineers' shops. Area of par. 9500 ac. Pop. (1841), 2140, of which the tn. contained 1695 ; of tn . and par. (1851), 5925.

GALATA. an anc. city, Turkey in Europe, now a suburb of Constantinople, on the opposite or N. side of the Golden Horn, occupying the extreme point or lower part of the peninsula of l'era. It is surrounded with an old wall 4 m . in circuit, with ramparts and towers, the gates of which are carefully closed at night. A long, narrow, dark, and dirty street, nearly a mile in length, crosses it from one extremity to the other. The other streets are equally narrow, dark, and dirty. The dwelling-houses are of wood, and the warehouses, of which the number is great, Galata being the commercial quarter of the city, are solidly constructed of stone, arched and provided with iron doors and shutters, as a precaution against fire, which has been here frequent and destrnctive. It contains but one mosque, situate in the S.E. part of the town, but has several churches and convents. It is crowded with merchants of all countrics. Here also are the Government wet and dry docks, and workshops of various kinds. The wet docks are inclosed within high stone walls, whence a pair of noble gates opens upon the water; one of them being nearly 315 ft . in length. The admiralty stands upon a point of land projecting into the harbour, and commands from its different cascments a view of the whole extent of the Golden Horn. IIere, likewise, is the custom-house.

GALATONE, a th. and com. Naples, prov. Terra d'Otranto, 9 m. N.N.E. Gallipoli. It contains a castle, and has several convents. Pop. 4701.

GALA'TRO, a tn. and com. Naples, prov. C'alabria Ultra I., 18 m . N.E. l'almi. Pop. 1730.

GALAT'Z, or Galacz [anc. Axiopolis], a tn. Moldavia, cap. dist. Kovourloni, 1. bank, Danube, between the confluences of the Sereth and Pruth with that river; lat. (church of Uspenski) $45^{\circ} 26^{\prime} 12^{\prime \prime} \mathrm{N}$. ; lon. $28^{\circ} 2^{\prime} 58^{\prime \prime} \mathrm{E}$. (5.) The older parts of the town consist of miserable wooden houses or rather huts, confusedly huddled together, and forming a series of narrow, filthy, and irregular streets. In the newer quarters there are numerous houses of stone, and better built than in most other towns in Moldavia. There are here several Greek churehes, a convent, an hospital, and a large bazaar, always well filled with merchandise. The lower part of Galatz consists almost entirely of warehouses, and has from time immemorial possessed the right of a free port, a privilege which was extended to the whole city in 1834. Galatz is the principal port in the principality, and the chief medium of the commerce carried on between Germany and Constantinople, vessels of 300 tons being able to ascend the Danube thus far. Its trade was formerly entirely in the hands of the Greeks, but now many English and other foreign houses have established themselves there. The principal exports are grain, wine, planks, and deals, wool, tallow, and preserved meat, the amount of which, with some other trifling articles, exported in 1845 , was $£ 379,797$. The imports are chiefly British manufactures, sugar, tin plates, iron, tar, pitch, coal, oil, olives, dried fruits, lemons, and oranges, carobs, tobacco, caviar, salted fish, glass-ware, lamb skins, leather, and alba or coarse cloth. The whole imports, in 1845, amounted to $£ 223,978$. At present ( 1851 ), about 400 vessels, of which 100 are Austrian, arrive at and depart from Galatz annually, the whole trade and commerce of the port amounting to $£ 1,800,000$. Pop. 36,000 .

GALBALLY, par. and. tn. Irel. Limcrick; 15,457 ac. Pop. 6651.

GALBOOLY, par. Ircl. Tipperary; 1268 ac. Pop. 410. GALBY, par. Eng. Lcicester; 1170 ac . Pop. 108.
GALDAL, a tn. Gran Canaria, the largest of the Canary isls., finely situated in a plain, in the N. of the island, W. of the wooded mountain of Doramus. It consists of a great number of houses, scattered over a considerable extent of surface; contains a parish church, old convent, the remains of an ancient palace, and a primary school; and has some manufactures of woollen, linen, and cotton stuffs. The principal

Vol. I.
productions of the district are maize, corn, flax, wine, oil, and numerous varieties of fruit. Pop. 4052 .

GALEA'TA, a tn. and com. Tuscany, in the valley of the Bidente. l. bank, river of that name, about 2 m . from Civitello, in the Papal States. It is an ancient place, surrounded by walls; is the seat of a court of justice, and several public offices; has a handsome parish church, a trade in maize, wine, silk, chestnuts, and other fruit, and a weekly market, ehiefly for cattle. Pop. tn. 1026 ; com. 3006.

GALENA, a tn., U. States, Illinois, agreeably situated on Feve or Bean river, 190 m . N. by W. Springfield. It contains five churches, an academy, and various inechanic establishments; and is the depôt of a lead region, which exports annually about 18,700 tons of leal. It also has three furnaces for smetting copper. Galena has communication by steamers with New Orleans, St. Louis, Louisville, Cincinnati, and other places on the Mississippi and Ohio. Pop. 1500.

GALENSTOCK, a mountain, Switzerland, on the confines of cantons Valais and Uri, between the Steinberg, on the N., and the Furka, on the S., and forming, by its N.E. side, one of the barriers of the magnificent glacier in which the Rhone has its source. Its loftiest summit exceeds $11,000 \mathrm{ft}$.

GALEO'TA (Ponst), the S.E. point of the isl. Trinidad, W. Indies ; lat. $10^{\circ} 9^{\prime} \mathrm{N}$. ; lon. $60^{\circ} 59^{\prime} \mathrm{W}$. (r.)

GALERA, two places, Spain :-1, A vil. and par. Catalonia, prov. Tarragona, in a plain, near the Sierra de Godall, $6 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Tortosa. It contains a parish church, courthouse, primary school, and ancient tower, apparently Roman; and has several distilleries and oil-mills. Pop. 1574.-2, A vil. and par. Andalusia, prov. of, and about 70 m . N.E. Granada, near the ILuescar. It is pleasantly situated among gardens, is regularly built, though of houses having only one story; contains a parish church, townhouse, and primary school; and has manufactures of saltpetre, a trade in hemp and potatoes, and several sulphureous springs. On a height above it stood the former town of Galera, which was completely razed, every inhabitant being destroyed, by the Infant Don Juan de Austria, during the wars against the Moors. Pop. 1781.

GALEY, par. Ireland, Kerry; 12,605 ac. Pop. 3041.
GALGA, a river, Hungary, which rises in Mount Cszanda, co. Neograd, near the town of Gula, flows first S., and then S.E., and joins, r. bank, Zagyra, near Fenzarn, 30 m . E.N.E. Pesth, after a course of ncarly 40 m .

GALIClA (Kıvgdom of) [Polish, Halicz; German, Galizien], a prov. Austria, composed of the kingdom of Lodomeria, the duchies of Auschwitz and Zator, and the grand duchy of Cracow, and formerly including the duchy of Bukowina. It lies between lat. $47^{\circ} 40^{\prime}$ and $50^{\circ} 35^{\prime} \mathrm{N}$., and lon. $18^{\circ} 55^{\prime}$ and $26^{\circ} 25^{\prime}$ E.; bounded, N. by Poland, N.E. and E. Russia, S.E. Bukowina, S. Hungary, and W. Moravia, and a small portion of Prussian Silesia; greatest length, E. to W. 325 m. ; breadth, towards the E., where widest, a little W. of meridian $25^{\circ}, 190 \mathrm{~m}$, and thence gradually diminishing westwards, till, near meridian $19^{\circ} 30^{\prime}$, it is reduced to its minimum of 27 m . Area and population as follows:-

| Kingdom of Lodomeria | $\begin{gathered} \text { Area geo. } 89 \\ -21,0>6 . \end{gathered}$ | Population. $.4,386,168$ |
| :---: | :---: | :---: |
| Duchies of Auschwitz and Lato | 588. | 170,428 |
| Grand Duehy of Cracow. | 336 | 145,787 |
| Total | .2, 210 | 4,702,383 |

Its contour is generally well defined by natural boundaries; on the S., in particular, by the Carpathians, which form a long and irregular curve, stretching W. to E. along its frontiers; N.W. by the Vistula; S.E. by the Bialy Czeramos, a tributary of the Pruth, and for a short distance by the Dniester; and E. by the Podhorce, a tributary of the Dniester. Part of the N., bordering on Poland, and all the N.E., are without natural boundaries. The great physical features of the country are, in a manner, determined by the Carpathians, and their ramifications. The principal chain, compriving the far greater part of the W. Carpathians, commencing in the S.E. of Galicia, near the sources of the Thiciss and Pruth, forms a curve, as already mentioned, and never quits the frontiers till it reaches its W. extremity, having its culminating point in the mountains of Tatra. Their lottiest summit, the Eisthalerspitz, is within the IIungarian frontier; but on that of Galicia the Great Kriwan has a height of 8150 ft . The N. side of the chain is more abrupt than the S., and the branches 132
which proceed from it stretch for a considerable distance into Galicia. In the principal chain, granite, gneiss, mica schist, volcanic trachytes and basalts predominate; but the N. branches are generally composed of sandstone, much of it belonging to a soft green rock of the tertiary formation, known by the name of molasse; conglomerates of the same formation, and commonly called nagelfue, are also abundant. Farther to the N. the hills subside rapidly, and finally merge into vast plains. Galicia is partly traversed by the great watershed which divides the whole continent of Europe into two great basins. The chief river, on the N. and W. of this watershed, is the Vistnla, which, before quitting the frontier, receives the Sola, Raba, united Poprad and Donajecz, Wyslocka and San, and also drains a large portion of the E., by its tributary, Bug. The chief rivers on the other side of the watershed are the Dniester, which rises near the centre of the kingdom, and flows across it in an E.S.E. direction, receiving, on both banks, numerous tributaries, none of them of much importance. The only part of the surface belonging to the basin of the Danube is in the S.E. It is drained by the Pruth, and is of very limited extent. A still smaller basin, the N.E., drained by the Styr, belongs to the basin of the Dnieper. The climate is severe, particularly in the S., where more than one of the Carpathian summits are beyond the limit of perpetual snow. The Great Kriwan, mentioned above as 8150 ft ., exceeds this limit, which in Galicia is about 250 ft . lower than in the Swiss Alps. The effect of these heights in increasing the rigour of the climate is very marked. The isothermal line of Lemberg, nearly in the same lat. as Paris, is only $50^{\circ}$, the very same as that which passes nearly through the centre of England. The extremes of temperature are great. The winters are long and severe, and the summers very warm, but comparatively short. Deep snow is not uncommon in the middle of April, and the grape never ripens.

The soil is much diversified. In the more mountainous districts it often forms a thin covering on bleak and almost barren rocks, where scanty pasture only is obtained. In other parts of the same district, both quality and depth of the soil improves, the pastures become excellent, and many magnificent forests occur. In parts of the N. and W., the soil is of a sandy texture, and the crops are very indifferent; but in general, where the elevation is small, the ground, more especially where resting on a substratum of limestone, is of great fertility, and yields abundant crops of corn and maize. Hemp, flax, and tobacco are also extensively grown; and, in the district around Lemberg, rlubarb is cultivated on a large scale. The domestic animals include great numbers of horned cattle, generally of a superior description, and a fine hardy breed of horses, well adapted for cavalry. Sheep are in general very much neglected; but goats, swine, and poultry abound. The rearing of bees is much attended to, and produces great quantities of wax and honey. Bears and wolves are frequently found in the forests; and all the lesser kinds of game are in abundance. The beaver is said to have been occasionally met with on the banks of the Bug. The minerals include marble, alabaster, copper, calamine, coal, iron, and rock-salt. Only the last two are of much importance. Iron occurs in numerous parts of the central Carpathian chain, and bog-iron ore is frequently met with in extensive seams on the plains. They are both worked to a considerable extent. The rock-salt is particularly abundant, stretching in continuous beds for nearly 250 m . along the base of the Carpathians, and, of course, beyond the limits of Galicia, into Bukowina and Transylvania. The most important mines have their central locality at Wiel iczka. Manufactures have not made much progress. The spinning and weaving of flax and hemp prevail, to a considerable extent, on the coufines of Silesia. Distilleries exist in every quarter. The principal exports are salt, wood, coal, aniseed, linen, and brandy. The population is generally of Sclavonian origin, and consists of two principal branchesPolish in the W., and Russniak in the E. The number of Jews is considerable. The R. Catholic is the established religion, but a majority of the inhabitants belong to the Greek church. Protestants live chiefly in the vicinity of Lemberg. Educational establishments, both for superior and ordinary instruction, are numerous. At the head of the former stands the university of Lemberg, and the lyceum, at Przemysl. The latter are spread over the whole country, and appear to be tolerably well attended, as the number of persons at school
has been estimated at one in eight of the whole population. For administrative purposes it is divided into the three governments of Lemberg, Cracow, and Stanislau. The principal towns are Lemberg, the capital, Brody, Cracow, Stanislau, Taranpol, Przemysl, Sambor, \&c. Galicia was originally called, and is only a corruption of Halics, a name derived from an old castle, on the banks of the Dniester, but now includes, in addition to the old duchy of Halics, an independent duchy, called first Wolodmir or Vladimir, and thereafter Lodomeria. From the 12th to the 14 th centuries these duchies belonged to Hungary, but passed by marriage to Poland. In 1772, on the first partition of that unhappy kingdom, the Empress Maria Theresa obtained restitution of these duchies, and formed them into the kingdom of Galicia and Lodomeria, a name still sometimes used, though that of Lodomeria is more frequently dropped, and the name Galicia applied to both.

GALICIA, a territory in the N.W. of Spain, forming one of the ancient kingdoms into which the Peninsula was divided, bounded, N. and W. by the Atlantic, S. by Portugal, and E. by the ancient kingdoms of the Asturias and Leon. It is now divided into the provinces of Coruña, Lugo, Orense, and Pontevedra; and is of a compact and nearly pentagonal form. Greatest length, N. to $\mathrm{S} ., 125 \mathrm{~m}$. ; greatest breadth, 115 m. ; area, about $17,000 \mathrm{sq} . \mathrm{m}$. Its coast, which has a length of about 240 m ., lies open to the Atlantic, and is much more broken and indented than that of any other part of Spain, almost every stream, however small, emptying itself into a considerable estuary. In this way a number of fine natural harbours have been formed; one of them, Ferrol, in which nature has been greatly aided by art, forms one of the finest naval ports in Europe. The surface is very mountainous. The Cantabrian chain, forming a continuation of the Pyrenees, stretches, almost due W., across the N. of Spain, till it reaches the E. frontier of Galicia, when it divides into a number of branches, and spreads itself over the far greater part of that kingdom. None of these monntains are higher than the snow limit, but on many of them snow remains for the greater part of the year. The great number of ridges traversing the kingdom in all directions, divide it into no fewer than thirteen distinct river basins; but the only one large enough to deserve special mention is that of the Minho, which is situated near the centre, receives the greater part of its water directly, and most of the remainder by the Sil. A very small portion of the S. belongs to the basin of the Douro. The climate, owing both to the elevation of the surface and the extent of sea coast, differs considerably from the general average of Spain, and is marked by greater cold and more frequent rain. The proportion of good arable land is very limited. In the more elevated districts the soil is generally thin, and of little natural fertility. In the lower grounds it is often of a calcareous texture, and yields good crops. The grain raised, however, falls considerably short of the consumption. Besides corn, considerable quantities of maize, hemp, flax, and potatoes are grown. Fruit, particularly apples and pears, nuts, walnuts, and chestnuts are very abundant. Oranges and citrons grow well only in the $S$. and more sheltered spots. There, too, the best wine is produced, though the culture of the vine is common in all the lower districts of the kingdom. The higher mountain slopes are generally covered with forests, which grow excellent timber, feed large herds of swine, of which excellent hams and bacon are made, and afford haunts to bcars and wolves, as well as shelter to many varieties of smaller game. The minerals include silver, lead, copper, iron, marble, and jasper; but they are almost entirely neglected. Both manufactures and trade are insignificant. The inhabitants, though tall, robust, and well made, and not very deficient either in honesty or sobriety, are in general very ignorant, and fail to turn the natural advantages which have been bestowed upon them to good account. Disregarding the many sources of comfort, and even wealth, which lie within their reach at home, great numbers of the male inhabitants emigrate for employment, and are found in all the principal towns of the Peninsula engaged as porters, or in other menial offices, in which bodily strength is the most important requisite. Meanwhile, all the drudgery of house and ficld is left to be performed by the women, who toil on, cheered by the belief, in which they are seldom disappointed, that the absentees, on gaining a kind of competency, will not lose a day in returning to their homes. The

Galicians take the name of Gallegos, and speak an uncouth patois, which other Spaniards scarcely understand. Pop. 1,730,929.

GALINARA [anc. Gallinaria], a small isl. Sardinia, in the Gulf, and 40 m. S.W. town of Genoa; with a fort on it.

GALION, an isl. N.E. coast of isl. Java, and E. coast of isl. Madura; lat. $7^{\circ}$ S.; lon. $114^{\circ} 13^{\prime}$ E. (R.) It is well cultivated, and has an agreeable appearance.

GALISTES, a tu. Spain, Estremadura, prov. of, and 42 m. N.N.W. Caceres, on a height above l. bank, Jerte, here crossed by a fine stone bridge. It is surrounded by a strong wall, in good preservation, and entered by three gates; consists of houses which are gencrally low, but substantial and commodious; contains a parish churcl, a ruinous palace, a townhouse, prison, and primary school; oil and flour mills, a trade in corn and cattle, and has a large annual fair. P. 1205.

GALITA, a small isl. Mediterranean, between Sardinia and the N. coast of Tunis; lat. $37^{\circ} 31^{\prime} 12^{\prime \prime}$ N. ; lon. $8^{\circ} 55^{\prime} 30^{\prime \prime}$ E. (n.) It is 3 m . long, with a bold and rocky shore.

GALITSCH, a tn . Russia, gov. of, and 90 m . N.E. Kostroma; lat. $58^{\circ} 20^{\prime} \mathrm{N} . ;$ lon. $42^{\circ} 28^{\prime} \mathrm{E}$.; in a marshy plain, on the banks of a lake of the same name. It is defended by two old forts, and cortains thirteen churches, one convent, and some linen manufactories. Several large fairs are held here yearly. Pop. (1851), 5965.

GALKOT, a small tn. and territory, Nepaul. The tows, which stands on a hill, consists of abont 500 huts, surrounding the house of the chicf. Lat. $28^{\circ} 17^{\prime} \mathrm{N} . ;$ lon. $83^{\circ} 14^{\prime} \mathrm{E}$.; 76 m. W.N.W. Gorkha.-_The territory is very small, but is well cultivated, and has copper and iron mines.

GALL [German, St. Gallen], a canton in the N.E. of Switzerland, bounded, N. by can. Thurgau and the lake of Constance, E. by the Rhine, separating it from the Tyrol and the principality of Liechtenstein; S. by cans. Grisons and Glarus; and W. by Schwyz and Ziirich; between lat. $46^{\circ} 53^{\prime}$ ond $47^{\circ} 30^{\prime}$ N., and lon. $8^{\circ} 47^{\prime}$ and $9^{\circ} 37^{\prime}$ E. It completely incloses can. Appenzell. Greatest length, N. to S., 45 m. ; greatest breadth, 36 m. ; area, 669 geo. sq. m. In the S . it forms part of one of the loftiest Alpine districts of Switzerland; the Scheibe, whose summits are covered with perpetual snow, being conmon to it and cans. Glarus and Grisons, and whose ramifications cover the S. part of the canton. Several other ridges are scattered over the canton; and the loftiest summits are the Graue Horn and Speerberg. The whole surface belongs to the basin of the Rhine, but is divided into three distinct minor basins ; one on the E., drained by the Rline, directly; another in the N. and N.W., drained by the Thur, and its tributary, Sitter; and a third on the S.W., drained by the Seez. A considerable part of the N. basin sends its waters to the lake of Constance; and of the S.W. basin to the Wallenstädersee. The greater part of the latter lake is included in the canton; but only a small portion of the former bounds it, on the N.E. The only other lake of importance is the lake of Zürich, the E . extremity of which penetrates into the canton for some distance; but there are many small lakes, remarkable for their clevation, and the magnificent seencry around them. Among these are the three little Terzerseen, at the foot of the Gusslen; the three Murgseen, at the foot of the Fässis; and, on the Laufboden, N. of the Graue Horn, the Wangersee and the Vittersee, the last of which is often frozen over in July. The climate is generally of Alpine severity, particularly in the S. and S.E. In the W., along the Wallenstïdersee and the lake of Zürich, it becomes less severc. On the lake of Constance, and in the valley of the Rline, at least its lower portion, it is comparatively mild. In the bottom of the valley, around Sargans, almost an Italian climate is enjoyed. In geological structure the canton is partly of a tertiary soft green sandstone, provincially called molasse; partly of conglomerate, and partly of linestone formation. Under the conglomerate are thick beds of sandstone; and both formations occupy a large extent of surface, extending along the Rhine and its valley, N. from Säntis, and S.W. as far as the Speerberg, the lofticst summit of conglomerate in Switzerland. Among the strata of sandstone, beds of lignite are often found; but there are no minerals of any consequence, though thin seams of coal are seen, and also thin veins of silver and copper. The more mountainons districts, within the limits of vegetation, are generally covered with wood or good pasture; on the
lower slopes vineyards and orchards are secn in every quarter; and when the ground becomes fit for the plough, it is generally of great fertility, and so carefully cultivated, as to entitle this canton to rank among the most productive and best managed in switzerland. The principal products are wine, fruit, corn, maize, hemp, and flax. Manufactures have made considerable progress; and cotton and linen goods, particularly fine muslinz, are extensively made in several districts. This canton was admitted to the Confederation in 1803, and is the fourteenth in rank. The constitution is democratical; but though every citizen of twenty-one years, not under legal incapacity, has a vote for the menbers of the Great Council, composed of 150 members, none can sit in it without paying about $£ 3$ amnally of direct taxes. For administrative purposes, the canton is divided into fifteen districts, of which St. Gall is the capital. Pop. (1849), 169,508.

GALL (St.) [German, St. Gallen], a tn. Switzerland, cap. above can., in an elevated valley, l. bank, Steinach, 18 m . S.E. Constance; 2152 ft . above sea level. It is still surrounded by antique walls, flanked with towers, but the ditches have been filled up, and converted into gardens. It is tolerably well built and well paved, though many of the streets are by no means spacious; is well supplied with fountains; contains a cathedral, once an old abley church, but completely modernized; an old monastery, now partly converted into public offices, and partly into a school; thrce town churches, a large townhouse, a library, casino, house of correction, and orphan hospital; and has extensive manufactures of woollen, linen, and cotton goods, fine muslins, and prints; numerous cotton mills, bleachfields, and tanncries; an inportant trade, partly furnished by the canton itself, and by cantons Appenzell and Thurgau, of which it is the entrepôt; a wcekly market, and two annual fairs. The environs are very beautiful, and contain many fine walks, commanding fine vicws. St. Gall is said to owe its existence to a Scoteh monk, who, in the early part of the 7th century, left his convent, in Iona, and, after travelling over great part of Europe, finally settled on the banks of the Steinach, then covered with forests, in which bears and wolves had their launts, founded an abbey, and made it the nucleus of civilization to the surrounding districts. Pop. (1850), 11,234.

GALLA, two small places, Hungary :-1, (Also-), A vil. Hither Damube, co. Komorn, on the road from Komorn to Buda, at the foot of Mount Steinberg, near the Szala, and about 6 m . from Tata. It contains a R. Catholic parish church. Pop. 800.-2, ( $F_{e}$ lso-), A vil. near the former, on a height, containing a R. Catholic parish church. Pop. 900 . Both inhabited by Gcrmans, and belong to Prince Esterhazy.

GALLANT (Port), Strait of Magalhaens, S.W. coast Brunswick Peninsula ; lat. $53^{\circ} 41^{\prime} 42^{\prime \prime} \mathrm{S}$.; lon. $72^{\circ} 1^{\prime} 0^{\prime \prime}$ W. (r.) : the best haven in the Strait, resembling, from the stilluess of its waters, a wet dock; bottom even, and depth moderate.

GALLAR, a tn. Spain, Aragon, prov. of, and 28 m . N.W. Saragossa, in a hollow, between the Ebro and the imperial canal. It is indifferently built, and has narrow, filthy streets; a parish church, a townhouse, in a ruinous state; a primary school, a small hospital, oil and flour mills, and a trade in wheat. I'op. 1015.

GALLARATE, a m . Austrian 1taly, prov. of, and 24 m . N.W. by W. Milan. It is handsomely built, surrounded by ancient walls, and a fosse filled from the Arno. It has a spacious square, and an old church; manufactures of cotton, and pottery ; and an active trade in grain, cattle, fruits, wine, \&c. Pop. 4649.

GALLAS, a numerous and powerful race, chiefly inhabiting a territory in E. Africa, S. of shoa, but disjersed in great numbers over the countries adjoining, especially N . and E . They are divided into many tribes, but are all distinguished by the same general characteristics, moral and ${ }_{p}$ hysical. Their colour varies from a deep black to a brownish yellow; stature tall; bodies spare, wiry, and muscular; frontal profile vaulted; nose often straight or even arched; lips, moderate; hair often langing over the neek in long twistel plaits. They have agreeable countenances, and are brave, but ferocious and cruel, massacring in war alike the resisting and unresisting, young and old, male and female, ripping up the latter who are pregnant. With their ferocity they unite subtlety and want of faith. Their professions of to day, if it snits their purpose, are set aside to-morrow, and offered to be renewed withont
any apparent sense of shame. The Gallas leave the plains to their horses, sheep, and cows; while they themselves seek their maintenance by cultivating the mountains. In doing so, they are able to bring up a better cavalry than perlaps any other nation. Their arms are a corslet and crooked sabre, a lance, \&c., in the forms resembling the representations of those which are found in the ancient monuments of Egypt and Nubia. Their language is spoken throughout a great part of Africa, S. of the equator. They are in a low state of heathenism, have no priests, like other heathens, and are opposed to the introduction of a new religion. They know only about a Being, whom they call Wake, to whom, on particular occasions, they sacrifice a cow or sheep, but have no system of religion. They adorn their graves with much taste, and surround them with aloe plants, but it would appear that this proceeding is not the result of good feeling, but of a peculiar superstition.-(Isenberg and Krapf; Boteler; Latham's Varieties of Man.)

GALLE (Point DE), a seaport tn., S.W. coast isl. Ceylon, cap. dist. of same name, and the third in importance in the island, situated on a low rocky point of land, projecting into the sea 70 m . S.E. Colombo ; lat. $6^{\circ} 3^{\prime}$ N.; lon. $80^{\circ} 13^{\prime}$ E. The fort is more than a mile in circumference, and contains, besides the usual buildings, a number of houses, occupied by Moorish families; a Dutch church, a Wesleyan chapel, a mosque, and several shops. The harbour is spacious, particularly the outer road. In the inner harbour, vessels may lie in perfect security during a great part of the year. Galle is a place of considerable traffic, and is much frequented by merchants and traders from distant parts of the island. Ships from China visit the port during the N.E. monsoon; and for the mail steamers to and from Bengal and China, it is a regular calling station. The manufactures are tortoise-shell boxes and combs, and coir cordage. Great quantities of arrack are made in the neighbourhood, and fish is abundant.

GALLEGO, a river, Spain, which rises on the S. slope of the Pyrenees, Aragon, prov. Huesca, flows first S., then W., then S. again, and joins 1. bank, Ebro, a little below Saragossa, after a course of about 90 m . It receives, on the right, the Subien and Asabon, and, on the left, the Bassa, Guarga, and Scton, besides other small streams.

GALLEGOS, a river, Patagonia, E. coast; lat. $51^{\circ} 38^{\prime}$ S. The entrance to this river is formed on the N. side by the cliffy land of Cape Fairweather, and on the S. by a low shore, that is not visible at sea for more than 12 or 15 m . It is fronted by extensive sandbanks, most of which may be crossed at ligh water, but at half ebb they are almost all dry. The river runs $W$. for 30 m ., and then wiuds more $S$., between two ranges of hills. Its banks are formed of downs, abounding with guanacos and ostriches. The water is fresh at 21 m . from the mouth.

Gallegos (San Felices de los), a tn. Spain, prov. of, and 56 m. S.W. Salamanca, near the frontiers of Portugal. It is tolerably well, though not very regularly built, and has paved, but not well cleaned streets; an ancient castle, surrounded by a wall and fosse; a parish church, townhouse, with prison, primary school, numery, and old monastery; manufactures of thread and woollens, several oil and flour mills; a trade in corn, wine, and cattle; and a weekly market. Pop. 1863.

GALLEN, par. Irel. King's co.; 19,227 ac. Pop. 5309.
Gallen (St.), Switzerland. See Gall (St.)
GALLENKIRCH, a vil. and par. Austria, Tyrol, Vorarlberg, about 35 m . from Feldkirch. It contains a parish church. Pop. 1560.

GALLIATE [Latin, Guleatum], a tn. Sardinian States, div. of, and 4 m . N.E. Novara. It is an indifferently built and dirty place, contains a very ancient parish church, a convent, and an old castle; and has manufactures of cotton stuffs, several silk-mills; a weekly market, and an annual fair, which lasts three days. Pop. 5858.

GALLICANO, a tn. Tuscany, prov. of, and 16 m . N. by W. Lucca, near r. bank, Serchio. It has a parish church and ancient castle; manufactures of silk to some extent, and an annual cattle fair. Pop. 1317.

Gallignana, or Galliniana, a tn. Austria, Illyria, finely seated on a height, and commanding a magnificent view, 45 m. S.E. Trieste. It contains four churches, and was once a place of some importance, but is greatly decayed. Pop. 1411.

GALLINA, an isl. off W. coast, Africa, belonging to the Bijuga, or Bissagos group.

GALLINAS, a river, W. Africa, falling into the At lantic, in lat. $7^{\circ} \mathrm{N}$. ; lon. $11^{\circ} 38^{\prime \prime} \mathrm{W}$. ; and formerly noted for the number of slaves shipped from it.

GALLIPOLI [anc. Callipolis], a fortified seaport tn. Naples, prov. Otranto, on a rocky peninsula, E. coast gulf of, and 44 m . S.E. Taranto; lat. (isl. St. Andrea), $40^{\circ} 3^{\prime} \mathrm{N}$.; lon. $17^{\circ} 56^{\prime}$ E. (r.) It stands on a peninsula, and is well built, and contains a cathedral, several churches, convents, and public schools. It is well frequented, and has a considerable trade. Its principal exports are olive oil, and cotton. With the former, for which it has long been famous, it supplies England, Holland, the N. of Europe, and, in short, all those countries that require the most perfectly purified oil. The Gallipoli oil, well known in commerce by that name, is clarified to the highest degree, by merely keeping it in cisterns hollowed out of the rock on which the town is built. The olives of which it is made are never gathered, but allowed to drop in their maturity from the tree on the ground, where they are picked up, chiefly by women and children, and carried to the mill, the machinery of which is of the rudest kind There are also manufactures of muslin, cotton stockings, and woollen goods. In the port there are several islands, on the most W. of which, named St. Andrea, there is a tower. Between these islands there are 5 and 6 fathoms water, and between them and Gallipoli 9,10 , and 12 fathoms. There is an extensive tunny fishery, which affords employment to a great many persons. Pop. 8500.

GALLIPOLI [anc. Callipolis], a market tn. European Turkey, at the N.E. end of the Dardanelles, 128 m . W.S.W. Constantinople, on a peninsula; lat. $40^{\circ} 24^{\prime}$ N.; lon. $26^{\circ} 39^{\prime} 45^{\prime \prime}$ E. (r.) It was once fortified, and some of its old defences still remain. It is meanly built, with narrow, ill-kept streets, and contains no edifice of any mark, except the bazaars, which are large, and tolerably well stocked, and some remains of the ancient city, to be seen at several points in and around the town. It is the seat of a Greek bishopric; and has manufactures of cotton, silk, and fine morocco leather; a double harbour, one of which serves as a station for the Turkish fleet; a good port; and some trade in corn, wine, and oil. Pop. about 17,000.

GALLNEUKIRCHEN, a market tn. Upper Austria, 4 m . N.N.E. Steyereck. It contains an old church, with several paintings, and a burgher hospital ; and has manufactures of calico and leather. Pop. 913.

GALLOON, par. Irel. Fermanagh; 25,286ac. P. 11,135.
GALLOW, par. Irel. Meath; 2584 ac. Pop. 641.
GALLOWAY, a dist. in the S. of Scotland, comprising cos. Kirkcudbright and Wigton, but anciently including the entire peninsula between the Solway and the Clyde. It was formerly famous for a particular brced of small horses, called Galloways. They are now mixed with the English and Irish breeds, but still retain the name. The black cattle and sheep are also much esteemed. Galloway gives the title of Earl to a branch of the house of Stuarts.

GALLOWAY (Mull of), the head of a peninsula, forming the most S. point of Scotland, co. Wigton; lat. $54^{\circ} 38^{\prime} 6^{\prime \prime}$ N.; lon. $4^{\circ} 51^{\prime} 15^{\prime \prime} \mathrm{W}$. (R.) The hill forming the extremity of the promontory is above 250 ft . high, bleak and rugged; while on the S.W. side it presents a perpendicular surface of rock from base to summit. There is here an intermittent light, 325 ft . above sea level.

GALLOWAY (New), a royal and parl. bor. Scotland, co. of, and 17 m . N.N.W. Kirkeudbright, r. bank, Ken. The houses are generally low, ill-built, and thatched, giving to the whole place a mean and uncomfortable appearance. It has no trade or manufactures of any kind, the inhabitants consisting chiefly of mechanics and agricultural labourers. It has in the centre a courthouse and jail; was erected into a royal burgh by Charles I., in 1629, and unites with Wigton, Stranraer, and Whithorn, in returning a member to the House of Commons. Constituency, 17. In the vicinity is Kenmure Castle. Pop. (1841), 403.

GALLUCIO, a vil. and com. Naples, prov. Terra di Lavoro, 25 m . E.N.E. Gäeta. It contains a handsome parish church; but is rendered unhealthy by the extensive cultivation of rice in its vicinity. Pop. 1972.

GALLLURA, one of the four quarters into which isl. Sardinia was divided in the Middle Ages. It formed the most N.
part of the island, and extended from the mouth of the Coguines on the N., to Cape Comino on the E. coast. It comprehended, in addition to Upper and Lower Gallura, the islands off the coast, of which Magdalena and Caprera are the most important. It is now included in division Sassari.

GALLUZZO, a tn . Tuscany, prov. of, and 3 m . S.S.W. Florence. It is well built; and contains a church and hospital. Pop. 638.

GALMIER (St.), a small, but anc. tn., France, dep. Loire, 12 m . E. Montbrison, near r. bank, Coise, on the railway from St. Etienne to Roanne. It occupies the site of the Aque Segesta of the Romans; the mineral springs from which it had this name being still used medicinally, and for household purposes. Pop. 2113.

GALOENGONG, or Galongong, a volcano, Java, prov. Praenger, div. Tjanjor, after which the surrounding beautiful and fertile district is named. No eruption of this mountain was on record, or in the recollection of the inhabitants around, till October 8, 1822, when a fearful outburst took place. Ashes, stones, and lava, were thrown out, and a large surrounding district of country laid waste, and 114 villages, upwards of 4000 people, many cattle, rice-fields, and three-fourths of a million of coffee trees were destroyed. The mountain, formerly thickly covered with wood, is now quite bare.

GALSA, a vil. Hungary, Thither Theiss, co. of, and about 12 m . from Arad. It contains a church; and is inhabited by Wallachians. Pop. 1800.

GALSTON, a tin. and par. Scotland, co. Ayr. The rown, agreeably situated 19 m . S. by W. Glasgow, l. bank, Irvine, here crossed by a fine stone bridge of three arches, has straight streets; is well supplied with water, and lighted with gas, and is improving in appearance. It has an elegant Established church, a Free, and a U. Presbyterian church; parish school, and Blair's charity school, the latter clothing and educating 100 children for four years. Bonnets are extensively made, principally for the army and navy, and the manufacture of plaidings and druggets is carried on to a limited extent; but cotton weaving is the staple trade of the place. It is a station on the Scottish S.W. railway. The PARISH is about 13 m . by $4 \frac{1}{2} \mathrm{~m}$. Pop. (1841), 4334.

GALT, a flourishing small tn. Upper Canada, l. bank, Ouse or Grand River, in a valley, surrounded by high hills, 55 m . W. by S. Toronto. The streets are neatly laid out, and the employment of stone in building gives the houses and other structures a substantial appearance. It contains five churches and chapels, namely, one Episcopal, three Preslyterian, and one Methodist; also a mechanies' institute, and a circulating library. The inhabitants are nearly all Scoteh. Pop. (1852), 2:43.

GAl'YEE, or Galty Mountains, a mountain range, Ireland, extending W. to E. for about 20 m ., from Caliir, in co. Tipperary, to Charleville, in co. Limerick. They possess an excellent soil, and are, to a great extent, either cultivated, or laid out in thriving plantations. Some of the summits rise to an elcvation of above 3000 ft .

GAL'TELLE, a vil., isl. Sardinia, div. of, and 67 m . S.E. Sassari, on a mountain slope, above r. bank, Cedrino. In the Middle Ages, it was cap. of a dep. of same name in the old prov. of Gallura, and was a place of considerable importance. It is said to have then had 14,000 inhabitants; but it has since dwindled down into a village. It still possesses the remains of its old cathedral, and contains a parish church, with a crucifix, which attracts numerous visitors by its supposed miraculous powers. Pop. 950.

GAL'TRIM, par. Irel. Meath; 4129 ac. Pop. 735.
GALVEAS, a tn. and par. Portugal, prov. Alemtejo, 37 m . W.S. W. l'ortalegre ; with an annual fair. Pop. 1107.

GALVESTON, a seaport $\mathrm{tn}_{\text {., U }}$ U. States, 'Texas, on N.E. cnd of isl. of same name; lat. $29^{\circ} 19^{\prime} \mathrm{N}$.; lon. $94^{\circ} 48^{\prime} \mathrm{W}$. (к.) It is the seat of a considerable and increasing trade. Pop. 2500 .-The island, which is 30 m . long, by 3 to 5 m . broad, lies parallel to the coast. Within it is the bay of same name, the principal entrance to which, at the E. extremity of the island, is $\frac{1}{2} \mathrm{~m}$. wide, and has from 12 to 16 ft . of water on the bar. It is divided into E. and W. bay, and extends inland 50 m . The water deepens from 18 to 30 ft ., within the bay; but near the middle it is crossed by shoals. The entrance at the W. extremity of the island has only from 3 to 5 ft . of water.

GALVEZ, a tn. Spain, New Castile, prov. of, and 21 m . S.W. Toledo, in a beautiful plain. It contains a public square, with a copious fountain; a parish chureh, a handsome townhouse, a palace, in ruins; and a primary school ; and has a trade in wool, corn, and fruit. Pop. 1490.

GALWAY, a maritime co. Ireland, prov. Connaught, having N. Mayo, and Roscommon; E. Roscommon, King's county, and Tipperary; S. Tipperary, Clare, and Galway Bay; W. the Atlantic Ocean. Greatest length, E. to W. 92 m. ; greatest breadth, N. to S .57 m . It centains $1,564,553 \mathrm{ac}$., of which $742,805 \mathrm{ac}$. are arable; the remainder consists of unimproved mountain, and bog, and water. The whole of the N.W. portion of the county or district of Connemara is extremely rugged and mountainous, and almost entirely in a state of nature. In this district is Lough Corrib, the third largest lake in Ireland, and part of Lough Mask, the remainder being in the county Mayo. The E. portion of the county is level, and mostly arable, with much bog. The S. part of this tract is fertile, and tolerably well cultivated, producing excellent wheat. Oats and barley form the principal crops elsewhere. In general, however, the agricultural capabilities of the county are miserably mismanaged. The habitations of the lower classes are amongst the worst in Ireland, and those of the farmers even are miserable, and generally ill situated. Being, on the whole, better adapted for grazing than for tillage, both the cattle and sheep of this county are of a superior description. The former are mostly of the long-horned breed. Limestone and marble are the chief minerals, and beautiful serpentine is obtained near Oughterard, in the vicinity of which also there is a lead mine. Iron was also formerly wrought. The fisheries of the coast are valuable, but much neglected. The fishery districts are Galway and Clifden, together comprehending 217 m . of maritime boundaries, which had, in 1845,3194 registered fishing vessels, employing 13,250 men and boys; but, in 1850 , the number of boats had fallen to 833 , and the hands to 3596 . Several new piers are in progress for the convenience and encouragement of the fisheries. The principal manufactures are coarse woollen hosiery, and coarse linens, and friezes for home consumption. Cromlechs and Druidical circles are of frequent occurrence. Square towers, of the early Anglo-Norman proprietors, are also numerous in some districts. The inhabitants are mostly descendants of the original Irish. In 1841, the total number attending school was 15,331 ; and, in 1850 , there were 17,270 children, in 134 national schools. The county is intersected from its E. boundary to Galway town, by the railway from Dublin; it is divided into 16 baronies, and 116 parishes; and returns four members to the House of Commons, two for the county, and two for the borongh of Galway. Its chief towns are Galway the capital; Tuan, Loughrea, and Gort. Pop. (1841), 422,923; (1851), 298,564.

GALWAY, a tn. and seaport, Ireland, W. coast, cap. above co. N. side Galway Bay, 117 m . W. Dublin, the W. terminus of the Midland Great-western Railway; lat. (light) $53^{\circ} 15^{\prime} 12^{\prime \prime}$ N. ; lon. $9^{\circ} 3^{\prime} 30^{\prime \prime} \mathrm{W} .($ R. ), at the mouth of the Corrib, issuing from Lough Corrib, and across which there are two stone bridges. In the more ancient parts of the town the streets are narrow and irregular, and many of the houses, once of the most respectable classes, are now crowded with a pauper population, and hastening to ruin. Numbers of these old houses are built after the Spanish fashion, quadrangular, with an open court, and arched gateway towards the street; there having been in former times an extensive commercial intercourse between this town and Spain. In the more modern parts of the town, the streets are spacious and the houses in general handsome and substantial. The town is now well lighted with gas, and is abundantly supplicd with water. Of late years a number of new strects have been built, tending greatly to improve the appearance of the town; but the suburbs are crowded with wretched cabins. The principal buildings of the town are the Qucen's College, a beautitul structure, in the Elizabethan style; the Rstablished collegiate church of $\mathbf{S t}$. Nicholas, a large old edifice, in the decorated English style; several R. Catholic chapels, three monasterics, five nunneries, Presbyterian and Methodist meeting-houses ; the county and town courthouses, both handsome Grecian structures ; and prisons, the county infirmary, a fever hospital, an endowed and a charter school, the customhouse, the union workhouse, and two barracks. Some of the monasteries and

## GALWAY

1054
GAMBIA
nunneries are large and wealthy establishments. The buildings of the Franciscan nunnery, or convent of St. Clare, and of the presentation convent, are extensive and imposing. The inmates of the latter are numerous, and nearly all connected

River. The borough returns two members to the House of Commons; registered electors (1851), 1038. Pop. (1841), 17,275 ; ( 1851 ), 24,697.-The bay of Galway is a large expanse of water, about 18 m . broad at its seaward extremity, diminishing to about 8 m . inland, and being about 20 m . long E. to W. It is protected from the swell of the Atlantic by the Arran Isles, of which there are three (see Arran Isles).-(Local Correspondent.)

GAMALERO, a vil. and com. Sardinian States, div. of, and 9 m . S.S.W. Alessandria, crowning a height above l. bank, Bormida. It has an ancient parish church, mont-de-piété, and a trade in cattle and dairy produce. Pop. 1379.

GAMALEY (CAPE), a headland, W. coast of Japan, isl. Niphon, near its N. extremity ; lat. $40^{\circ} 38^{\prime} \mathrm{N}$.; lon. $139^{\circ} 49^{\prime}$ E. (r.)

GAMBALARUM, a river, Nigritia, rising in the Kata-koo territory, and falling into the S. extremity of Lake Tchad, after a course first N.N.E. and then N.N.W. of about 85 m . direct distance.

GAMBARA, a vil. and com. Austrian Italy, prov. and 21 m. S. Brescia, in a fertile district near the Redone. It bas a parish, and two auxiliary churches, the remains of an old castle, a weckly market, and an annual fair. Pop. 2308.

GAMBARARE, a vil. and par. Austrian Italy, gov. and 9 m. W. Venice, on the Brenta; witli a parish, and two auxiliary churches, a weekly market, and an annual fair. Pop. 2300.

GAMBAROO, a ruined tn. Bornou, r. bank, Yeou, 5 m . N. by W. Old Birnie. It contains some extensive ruins, and was formerly the residence of the sultans of Bornou.

GAMBETESA, a vil. and com. Naples, prov. Sannio, 15 m . E. Campobasso. It contains a parish ehurel, and an hospital, and has an annual fair which lasts two days. Pop. 2849.
with wealthy families, cach requiring to pay $£ 500$ towards the general fund on admission. The grammar-school or college, in the endowment of Erasmus Smith, is a spacious and neat structure. There are three news-rooms, called, respectively, the connty club house, the Galway institution, and the commercial reading-room ; and a trades mechanics' institute. The benevolent and charitable institutions are the town infirmary and dispensary, and the fever hospital. Galway is not a manufaeturing place, but there are two breweries, two distilleries, a paper-mill, a foundry, a tanyard, and several flourmills, in the town and its vieinity. Its retail trade is considerable, there being no other town of any importance within 20 m . of it. The commerce of the port was at one time extensive, but has now much declined; wine is no longer imported in such large quantities as formerly, and the trade in provisions is much diminished. Great improvement is antieipated from the line of steamers which it is (1852) proposed to lay on between Galway and New York. The principal exports are corn, flour, kelp, marble, wool, and provisions; imports-timber, wine, salt, coal, hemp, tallow, and Swedish and British iron. The vessels registered at the port, in 1848 , were 21 ; tomn. 4033. The coasters, January 1, 1847, to January 1, 1848, were, inwards, 173 ; tonn. 20,$066 ;$-outwards, 41 ; tonn. 4354 . In the colonial and foreign trade the number of vessels was, inwards, 139 ; tonn. 26,161 ;outwards, 145 ; tonn. 25,676 . The harbour, which has an extensive line of quays, is in process of being connected with Lough Corrib by a canal. Its floating doek, area, 5 ae., admits vessels of 14 ft . draught. On Mutton Island, in front of the harbour, is a lighthouse, 33 ft . above ligh water.

On the r . bank of the Corrib, and forming a suburb, is a large fishing village, called Claddagh, inlabited by a peculiar and primitive race of people. Abont 1500 fishermen, with their wives and families, reside here, and, beyond the sale of their fish, hold little intercourse with the townspeople; they intermarry amongst themselves, and as regards fishing, and pecuniary matters, are governed by their own laws. About 10 tons of salmon are taken yearly ont of the Corrib

GAMBIA, a British colony, and river, W. Africa. Tho former occupies both banks of the latter, including some of its islands. The principal settlements are Bathurst (which see), Fort James, and Fort George. The first is situated on an island at the mouth of the river ; the second, 16 m . further up; and the third, 180 m . following the windings of the stream from its entrance. Both of the last are also situated on islands, the one on St. Mary's, and the other on M•Carthy's. Besides the settlements above mentioned, there are numerous factories and stations at intervals along both banks of the stream. M'Carthy's island has an area of 3 sq. m., covered with rich alluvial soil, but it is particularly unhealthy, and extremely hot, the thermometer frequently rising to $106^{\circ}$ or even $108^{\circ}$ in the shade. There is here an establishment for liberated slaves, and a Wesleyan missionary school, which, in 1850, was attended by 121 male and female scholars. 'This establishment,' says Governor Macdonnell, 'has always appeared to me one of the most interesting on the W. coast of Africa, and which deserves the most special attention from her Majesty's Government, and all true friends of the natives.' The colony, so far as yet settled, extends about 160 m . in a straight line up the river. But there is little or no fertile land on it belonging to the British Government, although large sums have been expended in abortive attempts to establish agricultural settlements, chiefly for the benefit of liberated Africans. The climate is represented by staff-surgcon Kehoe as so bad, that few Europeans can reside for any length of time there, without their constitution being impaired for life, and that it is particularly fatal to infant life among Enropeans, comparatively few escaping. But Governor Macdonnell, in his report, dated 1850, considerably qualifies this account by stating, that out of a population of 50 resident Europeans, only five deaths occurred in five years from elimatorial influence. The Wesleyans have done mueh for religion and education in this colony, having expended large sums of money for these and other laudable purposes, besides baving sent out 64 missionaries in the course of the 10 years preceding 1850. The R. Catholics are now making strenuous efforts in
the colony, and have established an institution of the sisters of charity. The revenue of the colony amounted, in 1849 , to £5648 17s. 7 d . The principal exports are bees'-wax, teak, cam-wood, ivory, hides, gold, ginger, gum arabic, palm oil, \&c. The river Gambia rises in a mountainons district in Sagalia, about lat. $11^{\circ} 30^{\prime} \mathrm{N}$. ; lon. $11^{\circ} \mathrm{W}$., whence it flows N. W. and W. towards the Atlantic, into which it falls in lat. $13^{\circ} 30^{\prime} \mathrm{N}$. ; lon. $16^{\circ} 40^{\prime} \mathrm{W}$.; after a conrse of about 450 m . In its carlier course it flows through a rich and pieturesque country. The soil adjoining the river is, in some parts extremely fertile, yielding rice and tobaceo in great abundance, while the immerliate banks are clothed with the most beautiful trees.-(M•Queen's Africa; Admiralty Sailing Directions; Governor Ingram's Expclition up the Cumbia; Parliamentary Reports.)

GAMBIER ISLANDS, a group of eleven small isls. S. Pacific Ocean, near the S.E. extremity of the Low archipelago, about lat. $23^{\circ} 8^{\prime}$ S.; lon. $134^{\circ} 55^{\prime}$ W. (r.) They extend over a space about 16 to 18 m . long, N. to $\mathrm{S} . ;$ and 15 to 16 m . broad, E. to $\mathbf{W}$. The largest is called Mangareva, a name which the French apply to the whole scries. All are surrounded with coral reefs, and have the $E$. or windward side more elevated than the opposite one. The vegetation is luxuriant, but the productions are the same as those of the other Polynesian islands, as is also their fanna; and there is not, so far as known, a single indigenous quadruped. There are, in all, 18 speeies of native birds, including the curlew, swallow, white heron, thrush, magpie, duek, and wood pigeon. Fish are abundant in the still waters of the lagoons. The inhabitants are a well-formed race, and are said to be of good disposition; their only covering formerly was the maro, but they are now tolerably clothed in Enropean fashion; their habitations, however, are still very miserable. The Gambier Islands were discovered in 1797, and visited by Capt. Beechy in 1826 ; and in 1834 some Freuch missionaries settled in Mangareva. The population of the whole group is estimated at 2300 , of which 1500 belong to Mangareva.

GAMBOLO [Latin, Gambolades], a tn. Sardinian States, div. of, and 18 m . S.S.E. Novara, r. bank, Terdoppio, here crossed by two wooden bridges. It is the seat of a court of justice, contains two parish churches, a remarkable old eastle, several schools, and has an annual fair. Pop. 5075.

GAMEREN, a vil. Holland, prov. Gelderland, 11 m . S.W. Tiel, on the Waal, with a neat chureh, a sehool, and the remains of an old eastle. Pop. 1042.

GAMKA, or Great Lion, a river, S. Afriea, Cape Colony, rising near Beaufort; lat. $32^{\circ} 24^{\prime}$ S.; lon. $22^{\circ} 48^{\prime}$ E.; and flowing S.W. through the Great Karroo, till its junetion with the Dwyka or Rhinoceros river, when the united stream forms the Gauritz.

GAMLINGAY, par. Eng. Cambridge; 4143 ac. P. 1434.
GAMMER'IINGEN, a tn. of W. Germany, principality, IIohenzollern-Sigmaringen, in a valley, l. bank, Lauchart, 11 m . N. Sigmaringen. It is of Roman origin ; has a castle, a poorhouse; manufactures of linen, a paper and a worsted mill; a trade in horses and cattle; and four annual fairs. Pop. 973.

GAMRIE, par. Scot. Banff; 10 m . by 4 m . Fop. 4741.
GAMSHURST, a vil. Baden, circle, Middle Rhine, in a marshy and unhealthy distriet $N$. of Offenburg. It contains a parish church. Pop. 1377.

GAMSTON, par. Eng. Notts.; 2000 ac. Pop. 331.
GAN, a vil. France, dep. Basses-Pyrénées, 4 m. S.S.W. Pau. In the environs are two mineral springs. The district is famed for its wines, both red and white. Pop. 1139.

GANAREW, par. Eng. Hereford; 950 ac. Pop. 123.
GANAT, or Janat, a tn., W. Africa, Fezzan, 120 m . S.S.W. Mourzouk, in a sandy and barren region; but, owing to its position on the caravan routes, rich and popnlous.

GANCI, a tn. and com. Sicily, prov. Palermo, dist. and 24 m. S.S.E. Cefulu, cap. circondario of same name. P. 9352.

GANDELLINO, a vil. and com. Austrian Italy, prov. Bergamo, 8 m . from Clusone, on the Serio, here crossed by a bridge. It contains a parish chureh; and has ironworks, supplied by extensive mines in the distriet; a saw-mill, and a mineral spring. Pop. 1127.

GANDERSHEIM, a tn. Brunswick, eap, circle of same name, on the (iande, 35 m . S.W. Brunswick. It is walled, has two suburbs, two publie squares, a castle, monastery, hospital, Latin and burgher schools, manufactures of steel and
ironware, and three annual fairs. Pop. town, 1925 ; circle, 37,000.

GANDESA, a city, Spain, Catalonia, prov. of, and 42 m . W. by S. 'Tarragona, in a plain, overlooked by a ruinous eastle. It is irregularly built, has three squares, two churches, several chapels, a townhouse, prison, hospital, storehouse, and cemetery. In the vicinity are mineral springs, with baths. Manufactures :-linen and woollen, and silken fabrics, brieks, earthenware, wine, oil, and brandy. Trade :-oil, almonds, brandy, silk, riee, sugar, salt-fish, hardware, \&c. Pop. 2316.

GANDIA, a city and port, Spain, prov. of, and 34 m . S. by E. Valencia. 1. bank, Aleoy; strongly fortified, and entered by five gates. It is well built, has straight, spacious, and paved strcets, eight squares, a handsome gothic collegiate chareh, three convents, several chapels, large and convenient town and courthouses, a prison, hospital, college, several primary sehools, a poorhouse, barrack, two cemeteries, and a spacious and magnificent palace of the dukes of Gandia, and in the vicinity, by the river side, public promenades. Manu-factures:-linen, woollen, and silken fabrics, earthenware, marine stores, wine, and oil. Trade:-rice, hemp, silk, timber, paper, and salt-fish. Pop. 5723.

GANDICO'TTA, a tn. and fort, S. IIindoostan, Carnatic, r. bank, Pennar, 70 m . S. Kurnool ; lat. $14^{\circ} 51^{\prime}$ N.; lon. $78^{\circ} 22^{\prime}$ E.; now unimportant, but formerly noted for its strength, and for a diamond mine in its vicinity.

GANDINO, a til. Austrian Italy, gov. Milan, prov. of, and 13 m . N.E. Bergamo, on the slope of a hill, crowned by an ancient castle. It has well built houses, wide and clean streets, a fine parish elurch, an hospital, college, several elementary schools, an orphan asylum, gymnasium, theatre, municipal buildings, and three suppressed convents, two of which are now used as factorie3, and one as an hospital. Manufactures :-linen, eloth, serge, flannel, and silken fabries, leather, brandy, and soap. Considerable trade is earried on in timber, grain, fruits, wine, and eattle. Pop. 3424.

GANDIOLLE, a vil., W. Africa, Cayor, near the Senegal, opposite its mouth, 12 m . S.E. St. Louis. When Mollien visited this place in 1817, it was ocenpied by the king and his troops, and the houses for the most part were abandoned or destroyed, the inhabitants having taken refuge elsewhere, from the violence and rapacity of their sovereign. In the neighbourhood are extensive salt marshes. Pop. 5000.

GANDJA, a tn. Russia, gov. of, and 30 m . S.E. Tiflis. It is inhabited chiefly by Tartars and Armenians. The vicinity produces wine, fruits, nuts, and excellent raisins. Good horses are reared here; and it has an active trade.

GANGALA, an isl., W. Africa, Lower Galam, in the Falemé; lat. $14^{\circ} 44^{\prime} \mathrm{N} . ;$ lon. $12^{\circ} 12^{\prime} \mathrm{W}$. It is extremely fertile, and produces excellent crops of millet.

GANGES, a celebrated river, Hindoostan, and one of the largest in Asia, has its sources in the Himalayas, prov. Gurwal. It is formed by the junction of two head streams, ealled, respectively, the Bhagirathi and the Alaknanda, which unite at Deopryag or Deoprag, 10 m . below Sireenuggur; lat. $30^{\circ} 10^{\prime} \mathrm{N} . ;$ lon. $78^{\circ} 35^{\prime}$ E.; 1500 ft above sea-level. The former has been usually considered as the true source of the Ganges, probably because of its being the saered stream of Hindoo mythology; but if volume of water and distance of origin are to decide the point, this honour must be assigned to the Alaknanda, which has greatly the advautage of the Bhagirathi in both these respects, being twice the size of the latter, and its souree being more remote. The Bhagirathi rises in a deep and savage glen or ravine above Gangootri, about lat. $31^{\circ} \mathrm{N} . ;$ lon. $79^{\circ} \mathrm{E}$.; where it issues from an aperture called 'The Cow's Mouth,' a low arch at the bottom of a glacier, about 300 ft . in perpendicular height. The breadth of the river here does not, in summer, exceel 9 ft ., its depth being larely as many inches. At Gangootri, which is from 12 to 20 m . from its source, it has become a considerable stream, having been rapidly enlarged by the numerous torrents that flow from the melted snow. The Alaknanda has its source $N$. of the village of Niti or Nctee, 40 m . E. by N. Gangootri, on the S. slope of the Malchak peak, lat. $30^{\circ} 50^{\prime} \mathrm{N} . ;$ lon. $79^{\circ} 50^{\prime}$ E.; $18,660 \mathrm{ft}$. above sea-level. During the earlier part of its course it is known as the Dhauli. At Hurdwar, province Delhi, about 30 m . below the junction of the two head streams above noticed, the river is only 1000 ft . above sea-level. Here it fairly enters the great plain or
valley of Hindoostan, and flows in a S. E. direction, till it discharges itself by its numerous mouths into the Bay of Bengal, a distance, exclusive of windings, of fully 1100 m . In this space it is joined by 11 large rivers, the principal of which are the Jumna and Sone, joining the r. bank; and the Ramgunga, Goompty, Goggra or Kala. Gunduck, Cosi, Mahanada, and Atri, on the l. bank. After being joined by the Jumna, and two or three of the other tributaries just named, the Ganges attains its utmost breadth, which is in some places about 3 m ., with a depth of about 30 ft . in the dry season, increased to 60 in the wet. When at the lowest, the principal channel varies from 400 yds . to $1 \frac{1}{4} \mathrm{~m}$. in width, but is generally about $\frac{3}{4}$ of a m . across.

About 200 m . from the sea, the Dclta of the Ganges, which is considerably more than double that of the Nile, commences; a flat alluvial tract of from 80 to 200 m . in breadth, the S . extremity of which, or that part which borders on the sea. is known as the Sunderbunds, or more properly Soonderbuns, a dreary unhealtlyy region, covered with wood (mostly the Soondry tree), and broken up by numerous creeks and rivers, all of which are salt except those that communicate immediately with the principal arm of the Ganges. It abounds with tigers, crocodiles, \&c., to which it is almost wholly abandoned, being uninhabited and uncultivated. Of the last-named animals, there are three or four species in the Ganges and its tributary waters, one of which is the Gangetic crocodile, Gavial or Garial. These animals swarm in the brackish water along the line of sandbanks, where the advance of the delta is most rapid. Hundreds of them are seen together in the creeks of the dclta, or basking in the sun on the shoals without. They will attack men and cattle, destroying the natives when bathing, and tame and wild animals which come to drink. 'I have not unfrequently,' says Mr. Colebrooke, 'been witness to the horrid spectacle of a floating corpse seized by a crocodile with such avidity that he balf emerged above the water with his prey in his mouth.' In tracing the sea coast of this delta eight openings are found, each of which appears to be a principal mouth of the Ganges. The navigation through the Sunderbunds is chiefly effected by means of the tides, there being two distinct passages, the one named the S . or Sunderbund passage, and the other the Balliaghaut passage. The first is the furthest about, and leads through the widest and deepest rivers, and opens into the Hooghly about 65 m . below Calcutta. The Balliaghaut passage opens into a shallow lake on the E. side of Calcutta. The navigation by these passages extends more than 200 m . through a thick forest, divided into numberless islands by channels of exceedingly varions width. The whole coast of the delta is one mass of mud banks, which are continually shifting, and among which there is seldom a channel that a vessel can trust, with exception of the Hooghly, the only mouth of the Ganges which ships of burden can enter. But these must not draw more than 15 ft . of water, otherwise the navigation becomes dangerous.

The periodical inundation of the Ganges, which commences about the latter end of April or beginning of May, proceeds from the tropical rains which begin to fall about that period. The rise of the river is at first slow and gradual, not exceeding an inch a-day for the first fortnight. Afterwards it increases to 3 or 4 in ., and, latterly, when the rains have become general in all the countries through which it passes, it rises about 5 in . a day, until it has attained a height of 32 ft . above its ordinary level. This height, however, it attains at one point only, near the commencement of the delta. Below this, the increase of the waters of the river is much less, declining from 14 to 6 ft ., and, latterly, as the sea is approached, becoming almost imperceptible. By the end of July, all the flat country of Bengal, contiguous to the Ganges and Brahmapootra, is overflowed to an extent in breadth of 100 m ., nothing being visible but villages and the tops of trecs, the former being built on artificial mounds above the height of the flood. After the middle of August, the waters begin to subside, running off at the rate of from 3 to 4 in . a day till November, from which period to the month of April they decrease at the rate of $\frac{1}{2} \mathrm{in}$. a day. The quantity of water discharged into the ocean by the Ganges is computed to be 500,000
cubic ft. per second in the four months of the flood season, and 100,000 cubic ft. per second on an average during the remaiuder of the year. The quantity of mud brought down annually by the stream is computed at $235,521,387$ cubic yds., and it discolours the sea to a distance of 60 m . from the coast. Owing to the looseness of the soil on the banks, large portions of them are being constantly swept away by the force of the current, and with such rapidity, in some cases, that an acre of ground has been known to disappear in less than half an hour.

The phenomenon called the Bore, a sudden and rapid influx of the tide, in the form of an enormous wave, rising as perpendicular as a wall, assumes a more formidable appearance in the Ganges than in any other river in which it is known, with the exception of the Brahmapootra. In the Hooghly, the Bore rushes onwards with an appalling noise, at the rate of between 17 and 18 m . an hour, and at Calcutta it sometimes causes an instantaneous rise of 5 ft ., having been probably more than double that height at the mouth of the river. The waters of the Ganges are held sacred by the Hindoos, from Gangootri, about 15 m . from its source, to the island of Sagor, at the mouth of the Hooghly. There are, however, particular places more eminently sacred than the rest, and to these pilgrims resort from great distances to perform their ablutions, and carry off water to be used in future ceremonies. The first of these stations is at Gangootri ; one of the other most celebrated ones is at Hurdwar, where the Ganges enters the plain of Hindoostan. The Ganges water is also esteemed for its medicinal properties, and in the British courts of justice witnesses of the Brahminical faith are sworn upon it.

The valley of the Ganges is one of the richest on the globe, and contains a greater extent of vegetable mould, and of land under cultivation, than any other country in this continent, with exception, perhaps, of the Chinese empire. For hundreds of miles along its course, down to the Gulf of Bengal, not a stone is to be seen. Wheat and other European grains are produced in the upper part of this magnificent valley, while in the S. every variety of Indian fruit, rice, cotton, indigo, opium, and sugar, are the staple commodities. In the rainy season, the Ganges overflows the country on either side for hundreds of miles, leaving it, when it retires, covered with fertility. Notwithstanding the sources of the Ganges are at an elevation of upwards of 13,000 and $18,000 \mathrm{ft}$., respectively, above sea level, the fall of the river from Hurdwar, nearly at the foot of the Himalaya to the Delta, a distance of about 1200 m ., is only 1000 ft ., showing how stupendous must be the falls of its head branches, and of the river itself, while descending the declivities of those lofty mountains in which its sources lie, a descent of many thousand feet occurring within little more than 100 m . Although the vast tract of country through which the Ganges flows is generally level, its banks, in many places, exhibit scenes of great beauty, while in the stream itself clusters of picturesque

THE FAKEFR'S ROCK ON THE GANGES.
From an original Drawing by Capt. R. Smith, 4ith Regt
rocks occasionally ocenr, interesting not only from their own appearance, but from the associations connected with them. Two of these occur in the province of Bahar, or about 200 m . above the Delta. The first is Janghera, or the Fakeer's Rock, near Sultangunge; the second, the rock of Colgong,
near the point where the river bends towards the Bay of Bengal, or 110 m. W. Bahar. The Fakeer's rock is a picturesque pile, consisting of several masses of gray granite, heaped one upon the other, and forming ledges and terraces, which are the sites of several small temples, a principal one rising from the summit and overtopping all. This place has been held sacred for ages, and has been the abode of Fakeers from time immemorial, who levy tribute on all passers-by. This rock is also interesting to the antiquarian, being covered with sculptured figures of great antiquity, and numerous inscriptions in an unknown character. The rocks at Colgong, which have also a singularly picturesque appearance, are likewise esteemed holy by Hindoo devotecs, and are covered, like the Fakeer's rock, with sculptured figures.

The Ganges is navigable for boats of a large size nearly 1500 m . from its source, and the busy scene which it daily exhibits, together with the number and variety of boats with which it is crowded, is not, perhaps, equalled on any other river in the world. Amongst the latter, are a number of government iron stcamers, commodiously and tastefully fitted np. It forms, with its tributaries, the great route of communication and traffic throughout interior India, there being few roads adapted for the conveyance of goods; and its value as a highway for commerce is all the more increased, from the numerous important towns and cities that lie cither immediately on its banks, or at no great distance from them. Ascending the stream, may be named Calcutta, Moorshedahad, Bahar, Patna, Benares, Allahabad, at the junction of the Jumua; Cawnpoor, and Furruckabad. It forms, also, the great military highway by which India was conquered, and by which that conquest is maintained, the main artery by which British power is diffused throughout the vast territory of Hindoostan. The length of the Ganges, direct distance, is about $1300 \mathrm{~m} . ;$ its development, 1960 m .(Johnston's Physical Atlas; Lyell's Geology; Sommerville's Physical Geography; Strachey, in the Journal of the Rowal Geographical Society; Forest's Tour along the Ganges, dec.; The Himalaya Tourist.)

GANGES, a tn. and com. France, dep. Herault, 25 m . N.N.W. Montpelier, beautifully sitnated in a fertile plain, surrounded by mountains, near l. bank, Herault. Its environs, covered with country seats, and an old castle, seated above it

the ghotro of ganges.
From Voyages dans l'ancieane France.
on a commanding height, give it a very picturesque appearance. It has extensive manufactures of silk goods, especially gloves and stockings, several tanneries, and cotton and silk mills. The rearing of silk worms is carried on to a great ex-
tent in the surrounding district. The great attraction of the Ganges is a grotto in its vicinity, which bears the somewhat uncouth name of Baouma de las Doumaisclas, but which is said to rival, if not to eclipse, the famous grotto of Antiparos. Pop. 4590.

GANGLIANO, a river, Italy, which is formed in the Papal States, deleg. Frosinone, by the junction of the Sacco and Leri. The united stream proceeds S.E., enters Naples, passes Pontecorvo, and shortly after turns, first due E., then due S., and finally winding round to the S.W., falls into the Gulf, about 9 m . E. Gäeta, after a course of about 40 m .

GANGOOTRI, a celebrated place of IIindoo pilgrimage, N. Hindoostan, prov. Gurwal ; lat. $30^{\circ} 59^{\prime}$ N. ; lon. $78^{\circ} 56^{\prime}$ E.; near one of the sources of the Ganges, in the Himalayas, $13,000 \mathrm{ft}$. above sea level. The pilgrimage to Gangootri is considered as a great exertion of Hindoo picty, and the performance of it is supposed to redeem the devotee from all his former sins, and to insure him eternal happiness in the next world. The water taken from this sacred spot is carried by the pilgrims to all parts of India, and sold at a high price.

GANJAM, a tw. IIindoostan, N. Circars, cap. dist. of same name, near IV. coast, Bay of Bengal ; lat. $19^{\circ} 21^{\prime}$ N.; lon. $85^{\circ} 10^{\prime} \mathrm{E}$. It stands on an elevated portion of the plain. It was at one time a flourishing place, the public buildings, houses, and gardens, being amongst the handsomest of those of any station under the Madras presidency; but, the town having been descrted in consequence of a destructive visitation of fever, the former have been long going to decay. The principal arm of the Ganjam river, which enters the sea to the $S$. of the town, is about one-third of a mile broad. - The District, one of the five Circars, is bounded N. by Kuttack, S. by Vizagapatam, E. by the bay of Bengal, and W. by the prov. of Orissa. The W. portion is hilly, but adjoining the shore are some large and fertile plains. It is one of the most productive districts under the Madras presidency, yielding rice, cotton, sugar, rum, and pulses of all kinds. Amongst the exports are gums, drugs, wax, ghee, salt, \&c.

GANNA'l, a tn. France, dep. Allier, on the Andelot, 34 m. S. by W. Moulins, and finely situated at the foot of smiling slopes, covered with woods and vineyards. It is poorly built, and uninteresting. Near it are the remains of a feudal castle, now serving as a prison. Gannat is the seat of a sub-prefect, and a court of first resort; has tanneries and breweries; and a trade in corn and wine. Pop. 4769.

GANNET ISLAND:-1, S. Pacific Ocean, W. coast, New Zealand, N. island, N.W. Kawia Harbour ; lat. $37^{\circ} 57^{\prime}$ S. ; lon. $174^{\circ} 32^{\prime}$ E. (H.)-2, British N. America, coast of Labrador; lat. $54^{\circ} 0^{\prime} \mathrm{N}$.; lon. $56^{\circ} 34^{\prime} \mathrm{W}$. (R.)

GANOS, a small tn. European Turkey, on the sea of Marmara, 42 m . N.E. Gallipoli ; lat. $40^{\circ} 48^{\prime}$ N.; lon. $27^{\circ} 13^{\prime}$ E.

GAN'THEAUME BAY, Australia, W. coast, Edel Land; lat. $27^{\circ} 46^{\prime} \mathrm{S}$. ; lon. $114^{\circ} 7^{\prime} \mathrm{E}$. (R.) Two rivers fall into this bay, both of which have their rise in a short range of hills, stretching N. and S., at a distance of about 12 m . inland.-Gantheaume Cape-1, the most S. point of Kangaroo island, S. Australia, forming the S.E. extremity of Vivonne Bay, Cape Kersaint forming the W.; lat. $36^{\circ} 5^{\prime} \mathrm{S} . ;$ Inn. $137^{\circ} 30^{\prime}$ E.-2, a point, N. W. coast of Australia, Dampier Land ; lat. $17^{\circ} 30^{\prime}$ S.; lonf. $122^{\circ} 10^{\prime}$ E.

GANTON, par. Eng. York, (E. Riding); 3650 ac. P. 428.
GANYA, or Ganitsa, a vil. Iungary, Thither Theiss, co. Marmaros, on the Taracz, about 18 m . from Szigeth. It contains a Greek church. Pop. 1500.

GAP [anc. Vapincum], a tn. France, cap. dep. Hantes-Alpes, 345 m . S E. Paris ; lat. $44^{\circ} 33^{\prime} 37^{\prime \prime}$ N.; lon. $6^{\circ} 5^{\prime} 10^{\prime \prime}$ E. (L.); finely seated on the brooks Bonne and Laye, in a beautiful, wooded valley. It has a fine old gothic cathedral, a courthouse, townhouse, prefecture, bishop's palace, barracks, a small theatre, and a large reservoir of water for extingnishing fires. It likewise possesses a public library of 5000 volumes, attached to which is a small museum; is the seat of a prefect and a bishop; and has manufactures of hats, farming tools, and linen; some tanneries, skinneries, \&c.; and a trade in grain, fruit, cattle, leather, and wool. Gap, formerly capital of the French Gapençis, was taken, retaken, burned, and restored several times. Early in the 17 th century it had 16,000 inhabitants ; but the plague in 1630, the sacking of it in 1692 , by the Iuke of Savoy, and the revocation of the edict of Nantes, nearly completed its ruin. Pop. 5324.

GARA, a vil. Hungary, Hither Danube, co. and 42 m. N.N.W. Bacs. It contains a R. Catholic parish chureh, and is inhabited by Dalmatians and Germans. Pop. 3600.

GARA LOUGH, a beautifnl and romantic lake, Ireland, on the confines of the cos. Mayo, Roscommon, and Sligo, 13 in. W. Carrick. It is 5 m . long, and in some parts 3 m . wide; is chiefly supplied from the Breedoge and the Lung, and on the $\mathbf{E}$. side is indented by many decp and narrow bays.

GARACHICO, a tn. and seaport, Canaries, isl. Tenerife, 28 m . W.S. W. Orotava ; lat. $28^{\circ} 26^{\prime}$ N. ; lon. $16^{\circ} 54^{\prime}$ W.; defended by the castle of San Miguel. It has a handsome parish church, several chapels, two convents, municipal buildings, a prison, hospital, and two schools. Manufactures :linen, cloth, and wine. The port was once one of the most important in the island, but since the eruption of the Peak, in 1705 , by which the town was partially destroyed, its only trade consists in wine and linen fabrics, sent to Orotava. P. 2500.

GARAH, or Am-el-Saginer, a small tn. or vil. Egypt, on the oasis of the same name, in the Libyan Desert, about $250 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Cairo. It 'rises above the palm-trees, and bears a striking resemblance, at first sight, to an old ruined castle of feudal times. The strects are all covered over, and are thus rendered so dark, that it is necessary to use a lantern in traversing them even at mid-day. The oasis consists of a level plain, enclosed by abrupt precipices, and covered, in part, with beautiful palm woods, either clustered together in dense masses, or dispersed in picturesque groups. Salt pools occur here and there, surrounded with an effloresence of dazzling whiteness.' The inhabitants whom Mr. St. John met with were civil and hospitable, and exhibited a degree of natural politeness eminently calculated to make a favourable impression on strangers. They are a mixed race, some being almost perfectly black, others of a pale sallow complexion, with marked indications of negro origin. Nearly all are destitute of any sign of beard. Their language is a dialect of the Berber. Their costume consists of a white or brown shirt, with long loose sleeves, and a thin linen skull-cap.(Adventures in the Libyan Desert, by Bayle St. John.)

GARBAGNATE, a vil. and com. Austrian Italy, prov. Milan, dist. and 5 m . N. W. Bollate, near the Guisa, in a large plain. It has some trade in corn and silk. Pop. 1362.

GARBANA [Latin, Garbanea Derthonensium], a tn. Sar dinian States, div. and 22 m. S.S.E. Alessandria; with a parish chureh, the remains of an old castle; some trade in wool and silk, a weekly market, and five annual fairs. Pop. 1293.

GARBICH, a maritime prov. Lower Egypt, delta of the Nile, of which it forms the greater part; bonnded N. by the Mediterranean, and inland by the provs. Damietta, Rosetta, Menouf, Kelioub, and Mausurah. It is a vast plain, 90 m . long, by about 45 broad, intersected by numerous canals, and for the most part having a fertile and well cultivated soil. It is subdivided into three deps. and seven arronds. Chief place, Mchallet-el-Kebir.

GARBOLDISHAM, par. Eng. Norfolk; 3130ac. P. 777.
GARCIIFZY, a vil. France, dep. Nièvre, 14 m . N.W. Nevers. Here is an important foundry, with large workshops for making machines, tools, and implements. Pop. 2504.

GARD, or Gandon [Latin, Vardo], a river, France, which rives its name to a dep., and is formed by the union of two minor streams, the Gardon d'Anduze, and the Gardon d'Alais. These streams, rising not far from each other, in the Cevennes, dep. Lozère, flow S.E. into dep. Gard, and join about 9 m . S.S.E. Alais. The united strcam, taking the name of Gard, flows circuitously E.S.E. across the dep., and joins r. bank Rhone, about 4 m . above Tarascon, after a course of 50 m . It is subject to sudden floods, and often causes great devastation. Some gold is found in its sands.

GARD, a dep. France, bounded, N. by Ardèche, N.W. Lozère, W. A veyron, S. Herault and the Gulf of Lyons, and W. Bouches-du-Rhone and Vaucluse ; and between lat. $43^{\circ} 26^{\prime}$ and $44^{\circ} 26^{\prime} \mathrm{N}$. ; and lon. $3^{\circ} 17^{\prime}$ and $4^{\circ} 50^{\prime}$ E.; greatest length, E. to W., 80 m . ; greatest breadth, 75 m .; area, $2256 \mathrm{sq} . \mathrm{m}$. In the N., the surface is mountainous, being covered by part of the chain of the Cevennes, which also throws out some ramifications to the W., and isolates a small part of the department, causing it to send its waters $W$. to the basin of the Garonne, while all the rest of the department belongs to the basin of the Rhone. In the S., the surface flattens down into a vast and fertile plain, which, in the vicinity of the coast, becomes so low,
as to form extensive marshes and salines, very injurious to health, but productive of a considerable revenue from the numerous saltworks established upon them. The principal river is the Rhone, which, however, only forms the E. boundary. Within the department, the most important streams are the Gard and the Ceze. The quantities of arable and of waste land are very nearly equal, each occupying about one-third of the whole. The far greater part of the remainder is covered with wood; but a considerable portion is devoted to the culture of the vine and olive. The grain raised falls far short of the consumption, in ordinary years furnishing not more than one-third of what would be requisite. The deficiency, however, is often met, not by importation, but by the substitu tion of other food, particularly by the poorer classes, whose main dependence is on the potato, which grows abundantly, and the chestnut, of which the lower slopes of the Cevennes furnish almost inexhaustible supplies. Many of the wines bear a high name, and are well known in commerce. Nearly one-half of the whole produce is exported. About one-sixth of it, of inferior quality, is also exported, after being converted into brandy. The olive succecds well on the best $S$. exposures, and yields an oil which is much esteemed. Other vegetable products deserving of notice are the mulberry, on which great numbers of silkworms are reared; madder, often culti vated on a large scale; and various other dye and medicinal plants. The minerals include silver, copper, and calamine, which once were, but are no longer worked; lead worked in several districts, iron in seams, both numerous and rich; and coal, worked near the town of Alais, and in other localities. The quarries furnish abundance of gypsum and building stone, and there are valuable beds of fuller's earth, potter's clay, and kaolin. The principal manufactures are silk goods, pure and mixed, woollen and cotton stuffs, hosiery, carpets, leather, and leather gloves. The most important branches of trade are wine, brandy, and salt. For administrative purposes, the department is divided into four arrondissements-Nismes, the capital, Alais, Uzès, and LeVigan-subdivided into 38 cantons, and 347 communes. Pop. 400,381.

GARDA (Lago Di), or Benaco [Benacus sinus of the Romans], an extensive and beautiful lake, Austrian Italy, be tween lat. $45^{\circ} 26^{\prime}$ and $45^{\circ} 54^{\prime}$ N.; and lon. $10^{\circ} 33^{\prime}$ and $10^{\circ} 54^{\prime}$ E.; 33 m . long, N. to S., by 3 to 11 m . broad, 213 ft . above sea-level ; bounded, E. by prov. Verona, S. by Mantua, W. by Brescia, and its N. extremity enters the territory of Trent, in the Tyrol. It receives the Sarca, almost its only affluent, at its N. end, and is drained by the Mincio, which issues from its S.E. end, near the fortress of Peschiera. It is well stocked with excellent fish; the carp, in particular, are gigantic, and have been taken 80 lbs. weight. Garda is the largest lake in Italy; its greatest depth is 902 ft . Steamboats ply on it regularly, between the ports of Riva and Desenanzo ; and its shores are covered with villas.

GARDA, a vil. and par. Austrian Italy, prov. Verona, on the Lake of Garda, where it has a small harbour. It consists of the town proper and a suburb, and contains several fine villas, two churches, and several mills. On a height, in the vicinity, called the Rocca di Garda, stand the ruins of an old castle. The olive is extensively cultivated here. P. 3000 .

GARDAIA, or Gharneia, a tn. Algeria, in the Sahara, oasis of Wady Mzab; lat. $31^{\circ} 57^{\prime}$ N.; lon. $2^{\circ} 50^{\prime}$ E. It is surrounded by a wall with battlements, and defended by nine towers, capable of containing 300 to 400 combatants; and has 10 gates. The houses are well built, and white-washed. The town contains six mosques, oue of which is of extraordinary size. The native manufactures are of little importance. The women weave woollen stuffs; the Jews exercise the callings of goldsmiths, locksmiths, and gunsmiths and repairers of fire-arms. Powder is also manufactured in small quantities. A considerable trade is carried on with Tunis, Algiers, \&c., in oil, corn, butter, negroes, groceries, pottery, and numerous other articles. The government of the town is administercd by a national assembly, presided over by a chief; who, however, can decide nothing, without first taking the advice of the religious chief, whose word has the authority of law, not only at Gardaia, but in all the other towns of the district. The Jews have a synagogue here, and live in a quarter by themselves. Gardaia is surrounded by immense orchards, watered by wells, which sometimes have a depth of 900 ft . In these orehards are cultivated the vine, and all other kinds
of fruit common to that part of Africa, execpt oranges and citrons. The rare occurrence of rain discourages the cultivation of cereals; but ahould it rain one year, at the proper season, and in sufficient quantity, the land will produce for two or three eonsecutive years enough for all necessary purposes. On a mountain, in the neighbourhood, are the ruins of a large tower, supposed to lave belonged to the Romans. Pop. uneertain; but stated to be little inferior to that of Algiers.-(Daumas' Sahara Algerien.)

GARDANNE, a vil. and com. France, dep. Bouehes-duRhone, on a alope, above the stream of St. Pierre, 13 m . N.N.E. Marseilles. It is surrounded with ramparts, and has n number of good houses in its suburbs; but is, in general, ill built, and has narrow and irregular streets. It is well supplied with copious fountains, near one of which stood the old castle of King René ; and has distilleries, tileworks, and two annual fairs. Beet-root and melons are extensively grown, and some coal is worked in the vicinity. Pop. 2020.

GARDE FREINE'I' (La), a vil. France, dep. Var, 15 m. S. Draguignan. It stands on a lofty eminence of difficult access, near the site of a celebrated Saracen castle, the ruins of which still exist; and though originally consisting of mean houses, and narrow, winding, and gloomy streets, has been so much improved within the last 50 years, that it has squares planted with trees, fine fountains, and all the appearance of a handsome modern town. The ehief source of its prosperity is the manufacture of corks, of excellent quality, made from the bark of trees of home growth, and largely exported to Marseilles and elsewhere. Pop. 1641.

GARDELEGEN, onee Garbeleben, a th. Prussia, prov. Saxony, gov. of, and 30 m . N.N.W. Magdeburg, eap. cirele of same name, r. bank, Milde. It is surrounded by an old wall with three gates; is the seat of a law court, and several offices for the circle; contains two ehmrehes, two elapels, two hospitals, a normal, burgher, and other sehools; and has mannfactures of white and ordinary leather, numerous breweries and distilleries, several mills, a trade in cattle, and five anuual fairs. Pop. 5251.--The circles, area, 368 geo. sq. m., is, for the most part, flat, well watered, well wooded, and contains mueh excellent arable land, adapted for corn, hops, and tobaceo. 1'op. 42,824.

GARDEMPE, or Gartempe [Latin, Vartempa], a river, France, which rises in the W. of dep. Creuse, flows W., then N.W. across dep. IIaute-Vienne, and part of dep. Vienne, and joins l. bank, Creuse, on the borders of dep. lndre-etLoire, a little above La-Roche-Posay, after a course of about 130 m . Its prineipal affluents are, on the l., the Ardour, Couze, and Vincou; and on the r., the Seine, Bram, and Langlin. It is not navigable; but when the water is high, becomes an important channel of communication by floating.

GARDIA, a vil., W. Africa, Bondou, in a plain, sur rounded by tamarind and other trees; lat. $14^{\circ} 5^{\prime} \mathrm{N}$.; lon. $12^{\circ} 28^{\prime} \mathrm{W} . ;$ with dirty and wretehedly constructed cottages.

GARDINER, a vil. and township, U. States, Maine. The village, at the confluence of the Kennebee and Cobbeseconte, contains two churehes, a bank, and a lyceum. In the township are two paper and various other mills, a woollen factory, a pottery, and several tanneries. Pop. 5042.

GMRDNER's bay and Island, U. States, New York, E. end of Long lsland; lat. $4 I^{\circ} 8^{\prime} \mathrm{N}$. ; lon. $72^{\circ} 5^{\prime} \mathrm{W}$. The bay is a considerable expanse of water, of a somewhat circular torm, and 8 m in diameter. The island is 4 m . long, and 2 m . broad, and is highly cultivated.

GARDONE, two places, Austrian Italy:-I, A tn. prov. of, and 10 m . N. Brescia, r. bank, Mella. It possesses a considerable manufactory of fire-arms, a cannon foundry, and several silk-mills. An annual and well-attended fair is hehd in April, for grain, cattle, and general merchandize. l'op. $1507 .-2$, (Rivieru), A vil., prov. Brescia, 2 m . N.E. Salo, near the W. shore of Lake Garda. Pop. 1442.

GAREEP, or Gariep, S. Africa. See Orange Rivep.
GARESSIO, or Garesso [Latin, Garexium], a tn. Sal dinian States, Pielmont, div. and 25 m . S.E. Coni, in a beauti ful plain, l. bank, Tanaro, here crossed by a wooden bridge. It contains a handsome parish, and several auxiliary churches, two monasteries and a nunnery, a Latin, and several elementary sehools, and an hospital; and has a trade in chestnuts, potatoes, game, tish, hemp, and wood, three weekly markets, and two annual fairs. In the vicinity there is a mine of
argentiferons lead, and fine quarries of red, black, and white marble. Pop. 5436 .

GARE'T', a dist. Maroceo, prov. Fez, bumnded, N. by the Mediterranean. Melilla is its princijal town.

GARFAGNANA [Latin G̛̛arfiniana], an anc. country, Italy, now partitioned between the duchies of Modena and Lueca, and the grand duchy of Tuscany.

GARFINNY, par. Irel. Kerry; 3916 ac. Pop. 914.
GARFOR'TH, jar. Eng. York (W. Liding); 1700 ac. Pop. 1220 .

GARGALIANO, a decayed tn . Greece, near W. coast, Morea, $1 l_{\frac{1}{2}} \mathrm{~m}$. N. by W. Navarino, on a height. It has two churches, and a bazaar, containing several shops belonging to merchants from Trieste. Pop. about 350 .

GARGANO [ane. Garganus], : group of mountains, Naples, prov. Capitanata. It is a distant ramification of the N.E. slope of the Apennines, and oceupies the spur of the boot to whieh the Italian peninsula bears so remarkable a resemblance. It consists of a lofty mass of a circular form, from which, as from a centre, several branches radiate. Its loftiest summits are Calvo, near its centre, 5450 ft . ; Sagro on the E., Spigro on the N., Gargarano on the W., and Rignano on the S. They are composed ahnost throughout of limestone, and the accompanying rocks of the Jura formation, and contain some metallie veins and beds of ironstone, none of which are worked. They continue elothed, as IIorace deseribes them, with lofty forests of pine.

GARGAN'TA-la-OLli, a tn. Spain, Estremadura, prov. of, and 65 m . N.N.E. Caceres. It is tolerably well built, has wide, straight, and well-kept streets ; a large square, containing a handsome townhouse; hospital, prison, and storehonse; a spacious and substantially built parish ehureh, : chapel, and two عchools, and manufactures of linen, silkens goods, paper, wine, and oil. Pop. 1972.

GARGNANO, a tn. Austrian Italy, prov. of, and 23 m . N.E. Brescia, on the W. shore of the Lake of Garda. It is finely sitnated between hills, is the seat of a court of law, and several public offices, contains a parish and two auxiliary churches, and two chapels, and has silk-mills, and three annual fairs. Pop. 4000.

GA RGRAVE, par. Eng. York (W. Riding); 10,420 ae. lop. 1761.

GARGUNNOCK, par. Scot. Stirling; 6 m . by 4 m. P. 803 .
GAR1JP, a vil. Holland, prov. Friesland, 8 m. S.E. Leeuwarden. It is an old place, and has a church and school. The inbabitants chiefly engaged in cattle-rearing. Pop. 620.

GARIOCH, a dist. Seotland, in the eentre of Aberdeenshire, ineluding 15 parishes, comprising 150 sq . m., and surrounded on all sides by bills.

GARLASCO, a th. Sardinian States, Picdmont, div. and 24 m. S.S.E. Novara, near the Terdoppio. It stands in a very fertile district, contains a magnificent parish chureh, with a large dome; two monasteries, with churches; two schools, an hospital, and an ancient tower, now used as a prison; is the seat of a court of justice, and several publie offices, and has a trade in corn, eattle, dairy produce, and silk, and a weekly market. Pop. 5436 .

GARLIES'FOWN, a vil. and seaport, Scotland, eo. of. and $6 \mathrm{~m} . \mathrm{S} . \mathrm{E}$. Wigton, at the head of bay of same name, W. side Wigton Bay. It is in the form of a crescent, is built entirely of whinstone; and has a rope and sail manufactory, and some boat-building; a harbour capable of affording shelter for 30 vessels, with a depth, at hightides, of from 18 to 20 ft . ; and some trade in fish and agricultural produce. Pop. $65 t$.

GARMISCH, a market tn. Upper Bavaria, 1. bank, Loisach, near its confluence with the Isar, $50 \mathrm{~m} . \mathrm{S}$. W. Munich. It is the seat of a court of justice, bas two churches, saltuetre works, and lead, zine, and sulphur furnaces. Pop. 1560.

GARMOU'TH, a seaport t . Scotland, co. of, and 7 m . E.N.E. Elgin, near the mouth of the Spey. It is regularly laid out, but some of the honses are of a very poor description; and its harbonr, which only admits small vessels, has, sinec the great flood of 1829 , been much deteriorated by the immense quantities of sand and gravel then brought down by the river. Grain, timber floated down, and salmon, eaught in the Spey, are exported. Pop. 604.

GARNSEE, or Slemno, a th. Prussia, prov. W. Prussia gov. of, and 9 m . S. Marienwerder, between two small lakes. whieh abound with fish. It contains a church, and burgher
school, and has manufactures of cloth, a brewery, distillery, fishery, and a trade in fruit. Pop. 959.

GARONNE [Latin, Garumna], a river which rises in the Central Pyrenees, in Mount Plaine Beret, in the valley of Aran, belonging to Spain, flows N.W. for about 30 m . through that valley, and then enters France, still flowing N.W. till it reaches the E. frontiers of dep. Hautes-Pyrénées, where it turns E.N.E., passing the town of St. Gaudens, and then N.N.E. till it reaches the town of Toulouse. Here it is joined by the Canal du Midi or of Languedoc, communicating with the Mediterranean, and assuming a N.W. direction, traverses deps. Garonne-et-Tarn, Lot-et-Garonne, and Gironde, in which last, about 12 m . below Bordeaux, it unites with the Dordogne in forming the river, or rather estuary, of Gironde. Its principal affluents, all navigable, are, on the right, the Ariege, Tarn, Lot, and Dropt; and on the left, the Save, Gimone, Rats or Lavax, Gers, and Baise ; besides these, but not navigable, it receives on the right the Salat, Arize, Lers, and Aveyron, and on the left the Pique, Neste, Louge, Touch, and Ciron. The whole course of the Garonne is about 300 m . Of these, 45 m ., commencing at the point where it enters France, are floatable, and are much used for sending down timber from the Pyrences, and 180 m ., commencing at the town of Cazères, are navigable. At Bordeaux its channel has a width of about 800 yards, and a depth varying from 10 to 15 fathoms. Its basin, bounded on the S . by the Pyrenees, W. by one of their ramifications, E. by the Cevennes, and N. by the basin of the Dordogne, extends in whole or in part over 10 departments, and has nearly the same length and breadth of ahout 185 m . During the upper part of its course the river flows through a narrow and very deep defile, and is very much encumbered by rocks and trunks of trees, which greatly impede its navigation. After the junction of the Canal du Midi, it flows through a wide and almost continuous plain, but its channel continues shallow, is subject to frequent inundations, and brings down so much debris, both directly and by its affluents, that it cannot be considered perfectly clear for navigation higher up than the town of Marmande, dep. Lot-ct-Garonne. About 25 m . below this town, near Langon, the influence of the tide is felt.

GARONNE (HaUte), a dep. France, bounded, N. by dep. Tarn-et-Garonne; N.E. Tarn; E. Aude and Ariège; S. Ariège and Spain; and W.deps. Hautes-Pyrénécs and Gers; between lat. $42^{\circ} 42^{\prime}$ and $44^{\circ} 54^{\prime} \mathrm{N}$.; lon. $0^{\circ} 27^{\prime}$ and $2^{\circ} 3^{\prime} \mathrm{E}$. It is of a very irregular shape, and narrows much towards the S. ; greatest length, N.N.E. to S.S.W., $97 \mathrm{~m} . ;$ average breadth, about $45 \mathrm{~m} . ;$ area, $2529 \mathrm{sq} . \mathrm{m}$. In the $\mathrm{S} . \mathrm{it}$ is covered by some of the loftiest summits of the Pyrenees, and almost throughout is traversed by their ramifications. These, however, rapidly subside as they recede from the central axis, and a considerable part of the N. and N.E. is comparatively level. It wholly belongs to the basin of the Garonne, which gives it its name, and traverses it circuitously, S. to N., receiving numerous tributaries, of which the most important are the Ariège, Save, and Lers; and furnishing, by means of the Canal du Midi, which joins it within the department, a continuous navigation from the Atlantic to the Mediterranean. The proportion of waste land amounts only to about $T^{\frac{1}{3}}$ of the surface. More than $\frac{1}{2}$ of the whole is arable, about $\frac{1}{7}$ is under wood, and $\frac{T}{2}$ in vineyards. The soil consists chiefly of vegetable loam, strong clay, and light unproductive loam, largely mixed with sand and gravel. The larger part is of the better kind, and, being cultivated with considerable skill and industry, produces heavy crops of grain, maize, flax, and potatoes. Tobacco, also, is extensively cultivated; and melons grow well in the open air. All the ordinary orchard fruits, including apples, pears, plums, peaches, and apricots, are in abundance. The orange tree grows vigorously, and is extensively cultivated, though only for its flowers. as it does not properly ripen its fruit. Among the larger trees, an important place is occupied by the chestnut. The proper forests are chiefly confined to the mountainous regions of the S., where they are of great extent and magnificence, furnish ample supplies of timber and fuel, and shelter numerous varieties of game, large and small. After the arable land, the first place is due to that under the culture of the vine. The annual produce of wine exceeds $14,000,000$ gallons, of which about one-third is consumed on the spot, and the rest exported. Several of the wines bear a high namc. The
best are the red wines of Villaudrie and Fronton. In the more mountainous districts are fed large numbers of cattle, mules, horses, sheep, and swine, generally of tolerable breeds. Poultry, particularly geese and ducks, are reared on an extensive scale. Great numbers of them are salted, and their livers are used in making the celebrated duck and geese pies, which form a considerable article of export. The rivers and lakes are well supplied with fish. Minerals are numerous, but not much worked. They include iron, copper, lead, antimony, bismuth, zinc, marble, white and variegated; limestone, gypsum, rock-salt, and slate. The manufactures are chiefly woollen and cotton stuffs; and after them sailcloth, iron, steel, and copper ware, mathematical instruments, and chemical products. The trade is chiefly carried on with Spain, particularly in the transit of goods from the N. of Europe, many of thein contraband. The principal exports, in addition to the above articles of manufacture, are corn, wine, mules, wool, cattle, timber, salted geese, duck pies, orange flowers, \&c. For administrative purposes, Haute-Garonne is divided into four arrondissements-Toulonse, the capital ; Maret, St. Gaudens, and Villefranche; sub-divided into 39 cantons, and 590 communes. Pop. 481,938.

GAROO, Gardokir, or Gortope, a vil. or station, Tibet, 60 m . N.N.E. the Niti Pass; lat. $31^{\circ} 40^{\prime}$ N.; lon. $80^{\circ} 21^{\prime}$ E. It is a place of great bustle and activity in summer, traders coming to it from a great distance, for the exchange of wool and other products of China and Tibet, for those of India and Cashmere.

GARRA, a river, Punjab. See Ghara.
GARRANAMANAGH, par. Irel. Kilkenny; 529 ac. Pop. 164.-Garranekinnefeake, par. Irel. Cork; 1571 ac. Pop. 1158.-Garrangibbon, par. Irel. Tipperary; 4713 ac. Pop. 1162.

GARREGUEL, a large vil. Senegambia, Foota-Damga, 1. bank, Senegal; lat. $15^{\circ} 27^{\prime} \mathrm{N}$. ; lon. $12^{\circ} 46^{\prime} \mathrm{W}$. It is inhabited chiefly by husbandmen and fishermen, and has a considerable trade in millet and ox hides.

GARRIGA (LA), a vil. and par. Spain, Catalonia, prov. of, and about 18 m . N.E. Barcelona, in a fertile plain, watered by the Congost. It contains two parish churches, a courthouse, prison, and school; and has several oil and flour mills, and a trade in corn, wine, oil, and hemp. Pop. 1180.

GARRIGUELIA (LA), a vil. and com. Spain, Catalonia, prov. of, and about 21 m. N. N.E. Gerona, consisting of Garriguella proper, with remains of Moorish walls and towers; and a suburb, both larger and much better built than itself. It contains two churches, one small and antiquated, and another large and elegant; a courthouse, prison, and primary school; and has several oil-mills, and a considerable trade in wine and fruit. Pop. 1720.

GARRISTOW N, a vil. and par. Ireland, co. Dublin ; 5345 ac . The village, 16 m . N.N.W. Dublin, is principally inhabited by cotton weavers. Pop. 2420.

GARROVILLAS-de-Alconetar, a tn. Spain, Estremadura, prov. of, and 19 m . N. by W. Caceres, 20 m . E. Alcantara, near l. bank, Tagus. The houses are indifferently built, the streets are regular and paved, and there is a spacious square, surrounded with substantial edifices, adorned with porticoes, among which are the municipal offices and prison. It possesses two parish churches, of which that of San Pedro is a large and highly-ornamented structure, with three naves, and a lofty tower; three chapels, two hospitals, several schools, a storehouse, and cemetery. Manufactures:-linen, cloth, leather, shoes, hats, vinegar, wine, oil, \&c. Trade:grain, cattle, fruit, and manufactured goods. Two fairs are held for cattle in July and September. Pop. 6573.

GARROWS, a mountainous district, India beyond the Ganges, between lat. $25^{\circ}$ and $26^{\circ}$ N., in a bight of the Brahmapootra, which nearly encircles it. The country is in general fertile, the surface of the bills, though steep, consisting of rich deep soil, which, aided by the humidity of the climate, produces a most exuberant vegetation, the mountains, where undisturbed by agricultural operations, being covered with fine forests and a great variety of beautiful and curious plants. The inhabitants are a distinct and peculiar race; of a deep brown colour, but less dark than their neighbours, the Bengalese, and are still half_savages. They are stout and wellformed, but have an unpleasant expression of countenance; their temper, however, is mild, and their disposition gay.

GARRY.-1, A river, Scotland, co. Perth, issuing from a small lake of same name, in the forest of Athole, and, after an impetuous E.S.E. course of about 20 m ., joining the Tummel, 5 m . S.E. Blair Athole. It receives the Bruar, the Tilt, and several other tributaries.-2, A lake, co. Inverness. -3, A headland, Arctic America, W. coast of Boothia Gulf, forming the S. point of Cresswell Bay; lat. $72^{\circ} 23^{\prime} \mathrm{N}$. ; lon. $93^{\circ} 17^{\prime}$ W. (r.)

GARLYCLOYNE, par. Irel. Cork; 5866ac. P. 1814.
GARRYVOE, par. Irel. Cork; 1698 ac. Pop. 966.
GARSDON, par. Eng. Wilts; 1140 ac. Pop. 215.
GARSING'ON, par. Eng. Oxford; 2230 ac. Pop. 591.
GARSTANG, a market tn., townslip, and par. England, co. Lancaster, a station on the Lancaster and Preston Railway. In the market-place is a townhall, the lower part of which serves for the corn exchange. It has a church, about $1 \frac{1}{2} \mathrm{~m}$. from the town; a chapel of ease, and Independent, Wesleyan, and R. Catholic ehapels; a free grammar school, four academies, and a R. Catholic school. At a short distance S. of the principal street, the Lancaster Canal is carried across the Wyre by a handsome aqueduct. Calico-printing and cot-ton-spinning are earried on in the vicinity. There are also several worsted mills. Garstang is a place of considerable antiquity, having been first incorporated in the 7th year of Edward 1I. Market day, Thursday; four fairs in the year. Area of par. $26,580 \mathrm{ac}$. Pop. 7659.

GARSTON (East), par. Eng. Berks; 4520 ac. Pop. 662.
GARTACH (Gross and Klein), two nearly contiguous vils. Würtemberg, circle, Neekar, bail. of, and 11 m . W. Heilbronn, r. bank. Leinbach. The former contains a parish church. Pop. Gross Gartach, 1615 ; Klein Gartach, 780.

GARTAN, par. Irel. Donegal; 44,124 ac. Pop. 2080.
GARTH, a hamlet, S. Wales, co. Glamorgan, par. Llanvabon, 9 m . S.S.E. Merthyr Tydvil. Pop. 1209.

GARTHBEIBIO, par. Wales, Montgomery. Pop. 383.
GARTHBRENGY, par. Wales, Brecon. Pop. 162.
GARTHORPE, par. Eng. Leicester; 1090 ac. Pop. 135.
GARTLY, par. Scot. Banff; 12 m . by $4 \frac{1}{2} \mathrm{~m}$. Pop. 1037.
GARTON, two pars. Eng., York (E. Riding) :- 1, 3030 ae. Pop. 226.-2, (-upon the Wolds), 4380 ac. Pop. 563.

GARTON, a vil. IIanover, gov. of, and 47 m . E.S.E. Liuneburg, on the Scge or Garte, near its confluence with the Elbe. It contains a church, and has manufactures of linen. Pop. 719.

GARVAGH, a small market tn . Ireland, co. Londonderry, $10 \frac{1}{2} \mathrm{~m}$. S. Coleraine, containing many respectable houses. Pop. 851.

GARVAGIIY, par. Irel. Down; $10,254 \mathrm{ac}$. Pop. 5063.
GARVALD and Bara, par. Scot. Haddington; 9 m . by 5 m . Pop. 862.

GARVESTONE, par. Eng. Norfolk; 1100 ac. Pop. 386.
GARVOCK, par. Scot. Kincardine; 7 m. by $4 . \mathrm{m}$. P. 446. GARWAY, par. Eng. Hereford; 3340 ac. Pop. 574.
GARZ, numerous places, Prussia, particularly :-1, A tn., prov. Pomerania, gov. of, and 16 m . S.W. Stettin, I. bank, Oder, at the confluence of the Salvei. It is entered by four gates, and defended by two forts; contains two churches, and an hospital; and has manufactures of woollen eloths, hosiery, gloves, and caps; tile-works, a trade in cattle, a fishery, and three annual fairs. Pop. 4314, of whom 493 are military.2, A tn., prov. Pomerania, isl. of Rügen, 11 m. E. Stralsund; with a chureh, a distillery, a trade in cattle, and two annual fars. Pop. 1645.

GAR'ZENO, a vil. and com. Austrian Italy, prov. Como, 6 m . from Dongo, on a hill, in a mountainous district. It has a parish chureh, and a trade in cattle. Many of the inhabitants emigrate into England, to traffic there. Pop. 1404.

GARZWEILER, a vil. Rhenish Prussia, gov. of, and 18 m . S.W. Düsseldorf. It contains a R. Catholic parish chureh, and has an annual fair. Pop. 1096.

GASCOGNE [Latin, Gascogna, Vasconia; Euglish, Gascony], a country, France, in the former prov. of Guyenne, between the Garoune, the sea, and the Pyrenees; now meluded in deps. Ariege, Maute-Garonne, Gers, HautesPyrénées, Lot-et-Garonne, Tarn-et-Garonne, Landes, and Basses-Pyrénées. The people of Gascogne are noted for their vivacity; and their proneness to exaggeration has given rise to the common epithet of gasconnale.

GASK (Trinity), par. Scot. Perth; 2 sq. m. Pop. 436.

GASPAR.-1, A strait, Indian Archipelago, between the islands Banka and Billiton, communicating with the Java Sea on the S.; N. entrance in about lat. $1^{\circ} 10^{\circ} \mathrm{S}$.; lon. $107^{\circ} \mathrm{E}$.2, An isl. Indian Archipelago, Gaspar Strait; lat. $2^{\circ} 25^{\prime}$ S.; lon. $107^{\circ} 4^{\prime}$ E. (r.) It is the principal mark in sailing to or from the N. part of the strait, having a peaked hill on it that may be seen about 30 m . off.- 3 , (-Rico), A group of five isls., with extensive reefs, in lat. $14^{\circ} 30^{\prime} 30^{\prime \prime}$ N.; lon. $169^{\circ} 31^{\prime}$ E.

GASPARILLA, a sound, U. States, W. coast, Florida. It extends from Clini Inlet to Charlote Bay, 6 m ., and is about 2 m . wide. It has 6 ft . water on the bar.

GASPARINA, a tn. and com. Naples, prov. Calabria Ultra II., dist. of, and 12 m. S.S.W. Catanzaro, on a rugged hill, at a short distance from the Ionian Sea. Pop. 2688.

GASPÉ-1, A district, Lower Canada, forming the N.E. angle of that territory, between the St. Lawrence and Chaleur Bay. The district commences at Cape Chat, and the coastline extends thence to the head of Ristigouche Bay, about 350 m . The surface of the country is uneven, but it is generally well wooded, excepting on some of the highest hills, and is said to be adapted for agriculture. There is a tract of rich land, about 50 m . in length, on Chaleur Bay, and the land on the Ristigouche is still more fertile. The principal productions are wheat, barley, pease, oats, potatoes, turnips, and carrots; there are also many rieh meadows. There are numerous lakes and rivers, all of which abound in fish. Roads few and bad. The population is principally on Gaspé Bay; the other parts of the coast being unsettled. The chief exports are fish and oil, with some timber and furs. Many of the inhabitants are employed in the cod and herring fishing. There are also salmon fisheries. Some ship-building is carried on, and an extensive timber trade.-2, A bay, at the N.E. extremity of above district. It has a good outer roadstead, and a fine safe barbour at its head, capable of holding a large flect in safety; also a basin where slips might be refitted or hove down. The S. shore of the bay presents a succession of steep cliffs, about 200 ft . high; but inland a few miles the mountains rise to $1500 \mathrm{ft} .-3$, A cape or remarkable headland, forming the extreme S.E. point of the peninsula which terminates with the district of Gaspé; lat. $48^{\circ} 45^{\prime} 12^{\prime \prime}$ N.; lon. $64^{\circ} 10^{\prime} \mathrm{W}$. Its N.E. side is formed of high cliffs, nearly 700 ft . in height. Off this cape the currents set strongly to the S. - $4, \mathrm{~A}$ tn., situated on the S. side of the entrance to the harbour, and along its shores; here is the customhouse. Several schooners are employed in the whale fishery from this place; and an extensive cod fishery is carried on in the bay, ehiefly by Jersey merchants.

GASSEN, a tn. Prussia, prov. Brandenburg, gov. of, and 47 m . S.E. Frankfort-on-the Oder. It has a castle and a ehurch; a trade in horses and cattle, and six annual fairs. Much wine and tobaeco are grown in the vicinity. Pop. 828.

GASSINO, a tn. Sardinian States, div. and 8 m. N.E. Turin, near 1. bank, Po ; once surrounded by walls, with four gates, and defended by a strong castle; but of these there are now only a few remains. It has two churehes, one of them aneient, and the other modern, and very handsome; a trade in cattle and agricultural produce, a weekly market, and two annual fairs. In the vicinity are good quarries of marble. P.2597.

GASTDORF, or Gastorf, a tn. Bohemia, circle, Leit meritz, on the Obdurka, $29 \mathrm{~m} . \mathrm{N}$. Prague. It contains a parish church, chapel, townhouse, and hospital; and has a paper and a flour mill, a trade in wool, hops, and corn, a weekly market, and five annual fairs. Pop. 1073.

GASTEIN, or Hof-Gastein, a market tn. Anstria, duchy of, and 44 m . S. Salzburg, in a plain, r. bank, Achen. It is built chiefly of wood, but contains some antique houses, substantially built of stone; a parish chureh, parsonage, school, and a bathing establishment, supplied by wooden pipes from the springs of Wildbad Gastein, about 6 m . distant. The gold mines, on which its prosperity depended, are now all but exhausted. There is a series of fine cascades in the vicinity, formed by the Achen, which descends, by successive leaps, nearly 300 ft . Pop. 4000.

GASTEin, or Wildbad Gastein, a watering place, Austria, duchy of, and 48 m. S. Salzburg, about 3000 ft . above the sea. It consists of a long, narrow strect, terminating in a square, containing the bath-house and a hot well. The waters, temperature varying from $64^{\circ}$ to $100^{\circ}$, are impregnated with a little salt, carbonate of magnesia, and lime;
and have a very mollifying effect on the skin. There are several romantic walks in the vicinity, and at a short distance is the old castle of Klamstein, on the Rathausberg, where there is a gold mine, producing annually 70 to 90 marks of gold.

GASTEL (Oud-en-Nieuw), a par. Holland, prov. N. Brabant, including the village of Oud Gastel, 14 m. W. by N. Breda, and the hamlets of Nieuw Gastel, Dorps-kwartier, Over-Esselijk, and Stampersgat. There are two schools, and the inhabitants, mostly all R. Catholics, raise wheat, flax, and madder. Excellent hay is grown on the banks of the Dintel, which forms the N. limit of the parish. Pop. 3062.

GASTEREN, a valley, Switzerland, on the S. frontiers of can. Bern, and W. of the Blumlis Alp. It is almost unsurpassed in savage grandeur, having for its background the great Tschingel glacier, between the Schilthorn and Sackhorn, whose summits exceed 9000 ft . in height. A footpath leads out of this valley over the Hochweyden Alps and the Lëtschen glacier, to Keppel, in the valley of the Lötschen, can. Valais.

GASTHORPE, par. Eng. Norfolk; 1110 ac. Pop. 111.
GASTOR, a tn. Spain, Andalusia, prov. of, and about 75 m. N.E. Cadiz, on a height above l. bank, Guadalete. It contains a parish church and primary school, and has chalybeate and sulphurous springs; several flour mills, and a trade in corn and cattle. Pop. 1200.

GAs'TOUNI, a tn. Greece, N.W. part of Morca, l. bank, Iliaco, and 4 m . from its embouchure, built of sun-dried bricks; and rendered unhealthy in summer by the stagnant pools in its vicinity.

GATA, a ridge of mountains, Spain, between Leon and Estremadura, commencing E. at the termination of the Pena Francia, and stretching S.S.W. into Portugal, where it joins the serra de Estrella. It sends off two branches, nearly perpendicular to its axis, the one of which proceeds N., forming the watershed between the Aqueda and Coa; and the other S., between the Alagon and Erjas. The principal chain forms part of the watershed between the Douro and Tagus. It is almost entirely composed of granite.

GA'TA.-1, A tn. Spain, Estremadura, prov. of, and 50 m . N. by W. Caceres, r. bank river of same namc. It is indifferently built, has narrow and crooked strects, three small squares, a fine parish chureh, with a lofty tower; a chapel, a large townhouse, built in 1843, with the prison in its lower story; an hospital, and several sehools. Linen and woollen fabrics, hats, white wax, wine, oil, and soap are manufactured; and some trade is done in them, and in grain and cattle. Pop. $3122 .-2$, A cape, bay of Almeria.- 3 , A vil. Valencia, 55 m . N.E. Alicante, r. bank, Jalon. Pop. 1645.

GATCHINA, a tn. Russia in Europe, gov. of, and 35 m . S.S.W. St. Petersburg, on a small lake. It is regularly built, and contains one of the finest of the imperial palaces of Russia, surrounded with extensive and well laid out gardens. There are here a Greek and Lutheran church, a R. Catholic chapel, and two hospitals, a school for the blind, and another for horticulture. In the town are a pottery and manufactories of woollen cloths and hats. Pop. (1849), 4591.

GATCOMBE, par. Eng. Hants; 1310 ac. Pop. 306.
GA'TEHOUSE, a bor. of regality. river port, and market tn. Scotland, co. of, and 7 m . N. W. Kirkcudbright, on the Fleet, here crossed by a bridge, near its outlet in Fleet Bay, beautifully situated in a valley, embosomed in woodcovered hills, with an opening to the $S$. It consists principally of three streets, running nearly at right angles with the river, and parallel to each other. It has an Established, Free, and U. Presbyterian church, and an Independent meetinghouse; a library, and several friendly societies; several cot-ton-mills, tanneries, a brewery, and a soapwork. The Flect is navigable to Gatehouse by vessels of 180 tons. The chief export is grain; imports, lime and coals. Pop. 1832.

GATELY, par. Eng. Norfolk; 1580 ac. Pop. 129.
GA'TESHEAD, a municipal and parl. bor. and par. England, co. Durham; area of par. 3320 ac. The town is situated 13 m. N. Durham, r. bank, Tyne, opposite Newcastle, of which it may be considered a suburb, and with which it is connected by a splendid railway bridge, and by a handsome stone bridge of nine arches. It consists of one wide irregular street, with several narrow streets and lanes diverging from it on either side; has a mean and unprepossessing appearance, and is densely inhabited by the working
classes. Some of the principal or more frequented streets are paved and flagged; but many of the others are not, and are consequently in a very bad state, often nearly impassable. The houses are built partly of stone, but chiefly of brick, with not a few of common ruble. The town is lighted tolerably well with gas, and is now well supplied with water. The parish church is an ancient eruciform structure, with a finely illuminated window ; and there are, besides, four chapels of ease, of which St. John's, opened in 1825, and St. Cuthbert's, in 1848, are handsome buildings; and places of worship for Presbyterians and Methodists. There are several charitable and benevolent institutions, the principal of which are St. James' hospital, some charity schools, and almshonses; a dis pensary, and mechanics' institute. The manufactures of Gateshead are so intimately connected with Newcastle, as to be almost inseparable from it. They include the manufacture of anchors, chain cables, and nails; shipbuilding, hemp and wire rope-making, iron-founding; paper, glue, vinegar, hats, brass and copper works, \& c. There are also several glass and chemical works, and a large soap-work. In the neighbourhood are extensive collieries, and also quarries of the well-known Newcastle grindstones. The borough is governed by a mayor, six aldermen, and 18 councillors; and returns a member to the House of Commons. Registered electors (1851), 672. The boundaries of the parliamentary and muni cipal borough are coincident. Daniel de Foe is said to have written the Adventures of Robinson Crusoe while residing in this town. Gateshead is a station on the York, Newcastle, and Berwick Railway. Pop. (1841), 19,505; (1851), upwards of 24,000 .

GATESIDE, a vil. Scotland, co. Renfrew, 4 m S. Paisley. It is neatly built; and its inhabitants are principally employed in the cotton manufacture. Pop. 673.

GATHA, Gatta, or Gattendorf, a vil. Hungary, Thither Danabe, co. Wieselburg, on the Leitha, 12 m . S.W. Pressburg. It contains a R. Catholic parish church, a synagogne, and castle, with fine parks belonging to Prince Esterhazy. Pop. 1731.

GA'TINAIS-Frangais.- 1, A dist. France, in the former prov. Ile-de-France, cap. Melun. It is now included in deps. Scine-et-Marne and Loiret.-2, (Orléanais), Another old French prov., cap. Montargis, now included in deps. Loiret, Nièvre, and Yonne.

GATINE, a dist. France, which belonged to the former prov. Poitou, and is now included in dep. Leux-sèvres. Its capital was Parthenay.

GATINEAU, a river, Lower Canada, rises in some large lakes, in lat. $48^{\circ} 0^{\prime} \mathrm{N}$. ; lon. $75^{\circ} 30^{\prime} \mathrm{W}$., from which it flows S., and falls into the Ottawa, near Hull. Steamboats have ascended this river for 4 m ., and it is navigable for the heavicst batteaux, and other small vessels, for 5 m ., from the Ottawa, and for canoes upwards, it is said, of 300 m . It is a large, wild, and rapid stream, abounding in the most romantic scenery. It is well stocked with fish, chiefly bass, pike, pickerel, cat-fish, sturgeon, eels, \&c. The Gatineau, thongh the largest of the Ottawa's tributaries, is little known.

GATO, Agatho, or Agaton, a tn. Upper Guinea, on a creek of the Benin river, 15 m. S.S.W. Benin, of which it is the port. It is a place of considerable size; but extremely unhealthy. Belzoni, the celebrated traveller, died here of dysentery, December 3, 1823.

GA'TRONE, a tn., N. Africa, Fezzan, 77 m . S.S.E. Murzouk, on the S. extremity of a sandy plain. In the centre, is a castle, occupied by Marabouts; and round about it are nnmerous large date trees. The inhabitants speak a dialect which has a closer affinity to the language of Bornou than to the Arabic.

GAT'TICO, a vil. and com. Sardinian States, Piedmont, div. of, and 20 m. N.N.W. Novara, on the crest of a hill. It has an ancient church, recently enlarged and repaired, in the Doric style; and a trade in wine and fire-wood. Pop. 1876.

GATTINARA, a th. Sardinian States, Piedmont, div. of, and 17 m . N.W. Novara, r. bank, Sesia. It is surrounded by walls with four gates, is built with great regularity, in the form of a rectangle; two principal streets, intersecting cach other at right angles, and forming, near the centre of the town, a public square. It contains a parish church, partly ancient, and partly modern, on a magnificent scale, but still unfinished; four other churches, scveral public schools, an
almshouse, and the remains of some feudal castles; and has a trade in horses, cattle, and agricultural produce; a weekly market, and three annual fairs. Pop. 4701.

GATTON, a hor. and par. England, co. Surrey. The TOWn, $17 \mathrm{~m} . S$. by W. London, was disfranehised by the Reform Act ; having previously enjoyed, for nearly 400 years, the privilege of sending two members to the House of Commons. Area of par., 1140 ae. Pop. 219.

GATUN, a tn. and river, New Granada, Panama isthmus. The rown is situated near the jnnction of the Gatun with the Chagres, about 8 m . from the sea, and is a station on the railway from Chagres to Panama.--The river rises in the monntains E. from Porto Bello, and, flowing W., falls into the Chagres, at the point above-mentioned. Its depth does not exceed 7 to 10 ft ., even at the mouth, shallowing down to 4 ft ., and even to 1 ft . a few miles up; its navigation is further impeled by numbers of trees, whieh, undermined by its waters, fall aeross the strean.

GAU-Alarsheim, a tn. Messe-Darmstadt, prov. Rheinhessen, l. bank, Selz, about 8 m . S.W. Mainz. It contains a castle, townhouse, R. Catholie parish chureh, a synagogue, and two schools; and has several mills, a trade in wine, and two annual fairs. Pop. 1862.

GAU-Odernheim, or Odernheim, a th. Hesse-Darmstadt, prov. Rheinhessen, r. bank, Selz, 12 m . N.N.W. Worms, surrounded by strong walls; with a large chureh, an ancient tower, a Protestant and a R. Catholie parsonage, three sehools, and an annual fair. Pop. 1514.

GAUCHON, the cattle-rearing inhabitants of the l'ampas of La Plata. See Plata (ha).

GAUCIN, a tn. Spain, Andalusia, prov. of, and 47 m . W.S. W. Malaga, on the slope of the sierra del Hacho. It is well built; has generally elean, wide, and paved, though steep, streets, three squares, a parish chureh, chapel, handsome town and sessiou house, prison, storehouse, three schools, and an ancient and strong Arab castle, oceupying the summit of an adjacent rock, in an almost inaceessible position, and garrisoned by a detachment of infantry and artillery. Manufac tures:-linen, woollen, and cotton fabries, hats, leather, soap, wine, oil, and brandy. Trade:-wine, fruits, branly, cattle, eloth, baize, silk, and lace. Pop. 3998.

GAUDENS' (St.), a tn. Franee, dep. Haute Garonne, near I. bank, Garonne, 50 m . S.W. Toulouse. It is finely seated on a hill, commanding a view of the E. Pyrenees, of which it may be called the key. It is ehiefly formed of one spacions street, of handsome houses; with an antique ehurel, and some other interesting edifices; and has a communal college, customhouse, and a tribunal of commeree; and mannfactures of china and delft-ware, wire, coarse eloths, weaving and spinning, saw, flour, oil, and fulling mills, tile-works, tameries, glass-honses, \&c.; and a trade in local produce. Pop. 3037.

GAUDENZDORF, a vil. Lower Austria, r. bank, Wien, here crossed by a wire bridge, and so elose to Vienna as to be properly its suburb. It consists generally of new and well brilt houses. Fop. 2000.

GAUKARNA, a maritime tn. S. IIindoostan, prov. Canara, $21 \mathrm{~m} . \mathrm{N}$. by W. Onore ; lat. $14^{\circ} 32^{\prime} \mathrm{N}$. ; lon. $75^{\circ} 25^{\prime} \mathrm{E}$. It is much scattered among cocoa nut palms, and comprises about 500 houses, of which one half are oceupied by Bralimins.

GAUINA, a tn. and fort, IIindoostan, prov. Candeish, 110 m . S.E. Surat ; lat. $20^{\circ} 44^{\prime} \mathrm{N}$. ; lon. $76^{\circ} 33^{\prime}$ E. The town is surrounded by a mud wall and towers. The fort stands on a high roeky mountain, the top of whieh is surrounded by a stone and brick wall, about 1 m . in circumference, and 20 ft . high. It is abundantly supplied with water, preserved in tanks, and is reckoned a healthy station.

GAULSKILL, par. Irel. Kilkenuy; 1303 ac. Pop. 350.
GAUNERSDORF, a market tn. Lower Austria, on the Werdenbach, 25 m . N.E. Korneuburg. It eonsists of three distinct parts, called Markt, Wieden, and Aigen Gaunersdorf; has a handsome parish ehureh and parsonage, manufaetures of linen, and some transit and general traile. Pop. 1337.

GAURE, an ane. country of France, cap. Fleurance, in the former prov. of Guyenne.

GAURITZ, a river, S. Africa, Cape Colony, formed by the union of the Gamka and Dwyka, in lat. $33^{\circ} 17^{\prime} \mathrm{S}$. ; lon. $21^{\circ} 45^{\prime} \mathrm{E}$. It flows tortuously S., and falls into the Indian Ocean, in lat. $34^{\circ} 22^{\prime} \mathrm{S} . ;$ lon. $21^{\circ} 50^{\prime} \mathrm{E}$., after a course of about 150 m ., during which it separates the distriet of George
from that of Zwellendam. Its prineipal affluents are 1 . the Olifant, and r. the Tau and Buffels. In the rainy season it is rapid, and liable to sudden inundations.

GAUT'BY, par. Eng. Lineoln; 2010 ae. Pop. 99.
GAVARD(), a vil. Austrian Italy, prov. of, and 12 m . E.N.E. Brescia, 1. bank, Chiesa, here erossed by a haulsome stone bridge. It has a eliureh, a handsome market square, mannfactures of silk, and agricultural implements, and an annual fair. Pop. 1801.

GAVE, a name in the ancient language of Bearn, synonymons with 'river,' and used as a prefix to several of the rivers of France, as the Gave de Pan, Gave d'Oleron, Gave de Manleon, \&e. For these see Pay, (1,Eron, dic.

GAVELLO, a vil. and par. Austrian Italy, gov. Venice, prov. Polesine, 8 m . E.S.E. Rovigo, not far from the canal of Bianco. It oecupies the site of an ancient town of the same name, whieh was destroyed partially by the Hungariaus, and afterwards totally by the inuudations of the Adige and the Po, but whose splendour is still attested by its ruins. It contains a parish ehureh, and an oratory. Pop. 2000.

GAVI [Latin, Gavium], a tn. Sardinian States, div. of, and 19 m. N.N.W. Genoa, at the confluence of the Neirone and Lemme. It is surrounded by walls, and defended by a fort situated on a height, is the seat of several eivil and military authorities, has two squares, four palaces, a parish and several other ehurches, infirmary, almshonse, mont-de-piété, some trade in wine, a weekly market, and two annual fairs. Pop. 5702.

GAV1ÃO, a tn. and par. Portugal, prov. Beira-Baixa, com. Castello Branco, 21 m . N.W. Crato, on a height near 1. bank, Tagus. It has an annual fair of three days. Pop. 1234.

GAVILAN (Sierra de), a mountain-range, Cuba, near the centre of the island, forming a part of the great chain by whieh the island is intersected in its whole length.

GAVIRATE, a tn . Austrian Italy, prov. of, and 19 m . W. by N. Como, N. shore of Lake Varese. It has a landsome chureh, and commodious municipal offices. Pop. 1479.

GAVOI, a vil., isl. Sardinia, div. of, and 64 m. N.N.E. Cagliari, near r. bank, Gusana. It is beautifully situated, but miserably built, eonsisting of a number of huts scareely fit for the habitation of human beings. It contains an ancient parish and two other churehes, and a primary sehool; and has manufactures of coarse woollens, some trade in cattle, wool, and dairy produce, and an annual fair. Pop. 1476.

GAVORRANO, a tn. and com. Tuscany, in the Maremma Grossetana, $36 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Siema. It was once surrounded by walls, and defended by a strong eastle, of which only vestiges now remain. It is the seat of a court of justice, and contains a parish ehureh.-The District, in consequence of the water which stagnates upon it, is allowed to remain almost in a state of nature. Pop. tr. 540; com. 2567

GAVRAY [anc. Guabreium], a tn. France, dep. Manche, 12 m . S.S.W. Coutances, on the sieme. It has manufactures of hair-cloth and elogs; bleachfields, and numerous fairs. In the neighbourhood are slate quarries. Pop. 1057.

GAIVELGHUR, or Gawulgur, a fortress, Hindoostan, beccan, prov. Berar; lat. $21^{\circ} 22^{\prime} \mathrm{N}$.; lon. $77^{\circ} 24^{\prime}$ E., 15 m . N. W. Elliehpoor, on a high and rocky hill, amidst a range of mountains. Though deemed impregnable, it was taken by storm, in 1803, by the Duke of Wellington, then General Wellesley, and Colonel Stevenson, after a siege of two days.

GAWLER RANGE, a range of mountains, S. Australia, about 23 m . N.E. Adelaide, consisting of porphyrite granite, remarkable for their sterile and arid character; being without timber or vegetation of any kind, and without a single strean or water course. The country around is equally barren and repulsive. Their utmost elevation is abont 2000 ft .

GAWSWOR'TH, par. Eng. Chester; 5480 ae. Pop. 806.
GAYA, a city, Lindoostan, presid. Bengal, prov. Bahar, eap. dist. of same name, 260 m . N.W. Calentta; lat. $24^{\circ} 49^{\prime} \mathrm{N}$. ; lon. $85^{\circ} \mathrm{E}$. It consists of an old and a new town ; the latter, ealled Sahebgunge, in which the European settlers reside, is situated on a plain on the Fulgo or Phalgu, a tributary of the Ganges. The streets of this quarter are wide, straight, and lined with trees. They are kept in good order, and have an excellent carriage-way in the middle. The old town, oceupied

## GEDDINGTON

chiefly by Brahmins, stands on a rocky eminence close by and presents a singular appearance, from the fantastic and irregular outline of its buildings, most of which are of brick and stone, and many of them two or three stories in height. The streets are narrow, dirty, and crooked. The channel of the river, which, when swollen by the rain, rushes past the city with tremendous noise and velocity, is here about 500 yards broad. Gaya is considered a place of great sanctity by the natives; almost every remarkable eminence in the neighbourhood is the theme of mythological legend, while numerous objects of Hindoo worship are dispersed around The place is on this account frequented by immense numbers of pilgrims, amounting with their attendants, in ordinary years, to 100,000 per annum ; and, on particular occasions, to double that number. The old and new towns contain together, between 6000 and 7000 houses.

GAYA [Moravian, Kygow; Latin, Kigovium], atn Austria, Moravia, circle of, and 19 m . W.S.W. Hradisch, in a deep and fertile valley on the Stupawka. It is walled, has a parish church, a townhouse, courthouse, piarist house, and hospital, and a trade in fruit, cattle, and horses, two weekly markets, and five annual fairs. Pop. 1922.

GAYA ISLANDS, two isls. Indian Archipelago, one on the N.E. coast of Borneo, the other on the N.W. coast, the first in lat. $4^{\circ} 56^{\prime}$ N.; lon. $118^{\circ} 52^{\prime}$ E. (r.); the second in lat $6^{3} 2^{\prime}$ N.; lon. $116^{\circ}$ E. (r.) The N.E. island is situated at the entrance to Darvel Bay.

GAYBIEL, a tn. Spain, Valencia, prov. of, and 25 m W. by N. Castellon-de-la-Plana, partly on a slope of Mount Pedrera, and partly in the plain. It is well built, consisting of houses generally of three stories, and of streets, some of which are straight and level, and others uneven. It contains a parish church, townhouse, prison, and primary school; and has oil, flour, and silk mills, and a distillery. Pop. 1224.

GAYDON, par. Eng. Warwick; 1140 ac. Pop. 276.
GAYHURS'T, par. Eng. Bucks; 840 ac. Pop. 116.
GAYSTEAD, or Geystead, par. Eng. Northuinberland; 25,980 ac. Pop. 219.

GAYTON, several pars. Eng.:-1, Norfolk; 2990 ac. Pop. 789.-2, Northampton; 1580 ac. Pop. 428.-3, Stafford; 1270 ac. Pop. 291.-4, (Le-Marsh), Lincoln; 2250 ac. Pop. 312.-5, (Le-Wold), Lincoln ; 1730 ac. Pop. 125.-6, (Thorpe), Norfolk; 2110 ac. Pop. 179.

GAYWOOD, par. Eng. Norfolk; 2380 ac. Pop. 1064.
GAZA, an anc. tn. Syria, cap. dist. of the same name, pash. Damascus, r. bank, and atout 3 m . from the mouth of the river Gaza, 50 m . S.S.W. Jerusalem; lat. $31^{\circ} 25^{\prime} \mathrm{N}$.; lon. $34^{\circ} 11^{\prime}$ E., on the high road between Egypt and Damascus. It stands upon a tabular hill, and is surrounded by fruit gardens, hedged with prickly pears, amidst which, on the lower
give it a pleasing and picturesque appearance. It has some manufactures of soap and of cotton fabrics, with well supplied bazaars, and is the principal entrepôt for the caravans passing between Egypt and Syria. Gaza is celebrated in Scripture for the exploit recorded of Samson, who carricd away the gate of the city, and its two posts.-The District of Gaza occupies the S.W. corner of Syria, having the Mediterranean on the W., the valley of the Jordan and of the Dead Sea on the E., and Arabia Petræa on the S. Pop. of tn. 10,000.

GAZELEY, par. Eng. Suffolk; 5470 ac. Pop. 860.
GAZIPUR, a tn. Hindoostan. See Ghazipoor.
GAZZANIGA, a vil. Austrian Italy, prov. of, and 9 m . N.E. by N. Bergamo, r. bank, Serio, here crossed by a bridge It has clean and well kept streets, a parish church, an hospital, and almshouses. Manufactures:-woollen and silken fabrics, paper, and glass. In the vicinity, which is finely wooded, is a quarry of black marble. Pop. 1494.

GAZZO, a vil. and par. Austrian italy, prov. of, and 9 m . N.N.E. Vicenza, near the Brenta. It contains a parish church, and has a weekly market, and two annual fairs, at which a good deal of woollen and linen cloth, iron-ware, horses, and cattle are sold. There is a coal mine in the vicinity. Pop. 1660.

GAZZOLDO, a vil. and com. Austrian Italy, prov. and 10 m. W. by N. Mantua, near the Osone. It contains a parish church, and three chapels, and has a mill. It was once the seat of the family of Gonzaga, and was the birthplace of several of its most distinguished members. Pop. 1309.

GAZZUOLO, a vil. and com. Austrian Italy, prov. of, and 12 m . W.S.W. Mantua, r. bank, Oglio. It stands in a district remarkable for its fertility, and has a much-frequented weekly market. Pop. 3584.

GDVOV, a tu. Russia, cap. circle same name, gov. and 120 m. S.W. St. Petersburg, on lake Peipus. Its inhabitants are engaged in agriculture and fishing. Pop. (1849), 1534.

GEANT (Mont and Col du), a monntain and pass, Switzerland, Pennine Alps, belonging to the chain, and immediately to the N . of Mont Blanc. The mountain has a height of $13,800 \mathrm{ft}$., and the pass of $11,172 \mathrm{ft}$. The latter leads from Courmayeur in Piedmont, to Chamouni in Savoy, by the Mer de Glace. The celebrated Saussure and his son spent 16 days here in making observations, and during the prohibition of English goods by Bonaparte it was much used by smugglers laden with British goods.

GEASHILL, a vil. and par. Ireland, King's co._At the village, 17 m . W.N.W. Kildare, several fairs are held annually, and in the immediate vicinity are the ruins of a castle. Geashill gives the title of baron to the Earls of Digby. Area of par. $30,163 \mathrm{ac}$. Pop. (1841), 10,077.

GEBA, a vil., W. Africa, Senegambia, on the river of same name; lat. $12^{\circ} 15^{\prime} \mathrm{N}$. ; lon. $14^{\circ} 35^{\prime} \mathrm{W}$. It consists entirely of earthen houses, and is remarkably unhealthy. It formerly carried on a considerable trade in leather, wax, ivory, and slaves. Pop. 750.

GEBESEE, a tn. Prussia, prov. Saxony. gov. and 11 m. N.N.W. Erfurt, on the Gera. It contains a castle, and two churches, and has two annual fairs. Pop. 1781.

GEBHARDSDORF (Alat, Nev, and Ober), or Gelpersdorf, a vil. Prussia, prov. Silesia, gov. Liegnitz, 10 m. S.S.E. Lauban. It contains a castle and a Protestant church, and has several mills, and four annual fairs. Pop. 1741.

GEBSEH, or Kıvyza [anc. Sybissa], a tn. Asiatic Turkey, Gulf of Izmid, 26 m . S.E. Constantinople. It contains a fine mosque of white marble, and some good baths, built by the grand vizier to Selim 1., at the time of the conquest of Egypt.

GEBY, an isl. Indian Archipelago, Gillolo Passage, the N. end directly under the equator; lon. $129^{\circ} 19^{\prime}$ E., about 20 m . long, N.W. and S.E., narrow and hilly, resembling
ground, E. and S.E., are two villages or suburbs. The eminence on which the town stands is about 2 m . in circumference at the base, and seems to have been once wholly inclosed by walls. Its elevated position, with its numerous domes and minarots, interspersed with olive and date trees,
several islands, when viewed from the W. The N. part is
low, but the S . end is high, and terminates in a bluff.
GEDDING, par. Eng. Suffolk ; 580 ac. Pop. 173.
GEDDINGTON, par. Eng. Northampton ; 2140 ac. Pop. 833.

GEDEH, a mountain, Java, prov. Preanger, about 46 m S. by E. Batavia. It is one of the loftiest mountains in the island, its highest peak, named l'angerango, being 9868 ft . high. The peak called Gedeh is 26 or 30 ft . lower, and seuds forth at times thick volumes of smoke, and also flames and ashes, but neither lava nor stones, as far as yet known. It is covered to its very top with a thick rank vegetation.

GEDERN, a th. IIesse-Darmstadt, prov. Oberhessen, 32 m. N.E. Frankfurt, in a valley at the foot of the Vogelberg; with some linen weaving and pin-making. Pop. 2200.

GEDLING, par. Eng. Notts; 4490 ac. Pop. 2642.
GEDNEY, par. Eug. Lincoln; 1210 ac. Pop. 2277.
GEDUMA, a state, W. Africa, on the N. frontier of Senegambia, having N. the Sahara; E. Jafnoo, and Kasson ; S. the Senegal, which separates it from Galam or Kajaaga, and Bondou; and W. Footatoro.

GEEL, a ti. Belgium. See Gherl.
GEELONG, a seaport tn., S.E. Australia, colony Victoria, near the head of Corio Bay, Geclong harbour, the W. arm of the bay of Port-Phillip, 48 m . S.W. Melbourne ; lat. $38^{\circ} 8^{\prime}$ S.; lou. $144^{\circ} 25^{\prime}$ E. It is situated on a fiue upland, and extends for upwards of 1 m . from the shores of Corio Bay to the 1 . bank of the river Barwon, and contains (1856) 5949 houses, chiefly brick and stone, and has wide, airy, paved, and drained streets. It is the second town in the colony; sends two members to the legislative council; was incorporated in 1849 ; has a handsome stone townhall, of Grecian architec ture, and several churches of no mean pretensions, belonging to Presbyterians, Episcopalians, R. Catholics, Wesleyans, and Independents. As a shipping port, Geelong surpasses Mel bourne; and has a trade in wool, tallow, gold-dust, \&c. It foundation is coeval with the arrival of the first settlers in
Port-Phillip in 1835 ; but it was not a place of much import-Port-Phillip in 1835 ; but it was not a place of much importance nutil the discovery of gold, in 1851, at Ballarat, near Mount Buningong, $48 \mathrm{~m} . \mathrm{N} . W$. Geelong, and 65 m . W. by N. Melbourne; lat. $37^{\circ} 40^{\prime} \mathrm{S}$.; lon. $143^{\circ} 55^{\prime} \mathrm{E}$. The deposits met with here have exceeded in value any that have yet been found in any other part of the world. It yields one-third of all the gold produced in Victoria; and in 1855, its quota exceeded $£ 3,500,000$ sterling. Besides the produce of the western gold fields adding to the importance of Geelong, it is also the outport of the wool and tallow produce of these districts, which are not only the richest in Victoria, but in all Anstralia, for their extent. A line of railway is (1856) nearly completed from Geelong to Melbourue. The trade of (icelong is facilitated by a regular customs establishment, and brauches of several Australian banks. Pop. (1841), 454; (1816), 1911; (1851), 8291; (1854), 20,115; (1856), 34,000. -(Geclong Corporation Statistics and Private Correspondent.)

GEELVINK, a bay, N.W. coast, Papua, between Great Bay and Dampier Strait; lat. $1^{\circ} 54^{\prime}$ S.; lon. $137^{\circ} 5^{\prime}$ E. (r.) It las rocks on each side the entrance, with a small islet on the $W$. side, surrounded by a reef. There are 20 and 25 fathoms water in the bay; it stretches a considerable way inland, where it Lecomes very narrow, and terminates at a freshwater river; the land on the $\mathbf{E}$. side of this bay is low contiguous to the sea. Wood and water may be obtained here.

GEFR, or JAAR, a small river, Belgium, which rises in the N.W. of prov. Liege, flows E.N.E. near the S. frontiers of Limburg, enters that province, passes Tongres, turns E., and then N.N.E., and entering Dutch Limburg, joins l. bank, Meuse, at Maestrieht after a course of about 40 m .

GEER'TRUIDENBERG [Latin, Aons sancte Gertrudis $\}$, locally contracted to 'den Berg,' a tn . Holland, prov. N . Brabant, 9 m . N. by E. Breda, in a flat low position at the influx of the Donge into the Biesbosch or Hollands Diep, and possessing a large haven. Its fortifications, dismantled in 1820, were restored in 1833 . It has a townhouse, barrack, arsenal, a Reformed and a R. Catholic church, an hospital, several benevolent institutions, and several flourishing sehools.
Brewing, and the fishing of salmon and sturgeon, were forBrewing, and the fishing of salmon and sturgeon, were formerly the chief employments; but the fishing, except of ordinary river fish, of which there are plenty, has been given up, and only three breweries out of 17 now remain. Wool-dressing is at present the chief occupation. Pop. 1652.

GEERVLITEE, a tn. Holland, prov. S. Holland, 5 m . E S.E. Brielle, where the Spuy unites with the old Maas. Formerly of some importance, it is now a scattered place, with a good townhouse, a chureh, and a school. Pop. 589. Vol. $\mathbf{I}$.

GEFELL, a tn. Prussia, prov. Saxony, gov. and 55 m . S.E. Erfurt. It contains a Protestant parish clurelh, and has manufactures of iron, and clocks and watches; a trade in cattle, porcelain earth, and potter's clay, and seven annual fairs. Iron is worked in the vicinity. Pop. 1574.

GEFLE or Geflebong, a län or co. Swellen, bounded N. by Hernosand, N.W. Ostersund, W. and S.W. Falun, S. Westeras, S.E. Upsala, and E. Gulf of Bothnia, between lat. $60^{\circ} 13^{\prime}$ and $62^{\circ} 20^{\prime} \mathrm{N}$.; area about 8000 sq . m. The coast is very much broken and indented into bays, several of which form good natural harbours. The interior is partly covered by mountains generally clothed with pine forests, but its characteristic feature is the number of lakes, which occupy a considerable portion of its surface, and, with the streams which connect them, form a kind of continuous network. The climate is severe, and owing both to this and the nature of the surface, cultivation is very limited, and fails to meet the consumption of a very scanty population. The rearing of cattle is the chief employment, and considerable returns are obtained from dairy produce. The forests are the haunts of wolves, bears, and other wild animals. Sturgeon and salmon abound in the rivers. The principal mineral is iron, which is worked to some extent. The chief exports are iron, timber, cattle, butter, and cheese, tar, and pitch. It is divided into three bailiwicks, and 51 parishes. Gefle is the capital. Pop. 98,144 .

GEFLE, a seaport tn . Sweden. cap. above län, at the mouth of a river of the same name, on the Gulf of Bothmia; lat. $60^{\circ} 40^{\prime} 18^{\prime \prime}$ N.; lon. $17^{\circ} 9^{\prime}$ E. (r.) It stands on two islands, and on the banks on either side of the river; communication being maintained between the several quarters by wooden bridges. The houses are built partly of wood and partly of stone; streets spacious and well paved. It has a church, an old castle, elegant townhouse, prison, gymnasium, elementary, town, and navigation schools; manufactures of tobacco, linen, sail-cloth, cards, and leather, two shipbuilding yards, and an excellent harbour. In point of commerce it is the third, and in shipping, the second place in the kingdom. Its exports are considerable, and consist of deals, tar, pitch, bar-iron, and chiefly salmon and river fish, of which there is an active fishery. Pop. 8137.

GEFREES, a market tn. Bavaria, circle, Upper Franconia, 13 m . N.E. Baireuth, near the white Main, here crossed by three bridges. It contains two churehes, and has manufactures of linen and cotton cloth, and ginger-bread, a distillery, brewery, and serpentine quarry, and a trade chiefly in swine. Pop. 1212.

GEHO, or Jeiro, a tn. Chinese empire, Mongolia. 118 m . N.E. Pekin, containing a magnificent inperial huting palace.

GEHREN, or Amt Genrex, a vil. principality, Schwarz-burg-Sondershusen, cap. bail. of same name, in a beautiful district at the confluence of the Schobser and Wohlrose, 24 m . S.E. Gotha. It is the seat of a court of justice, has two parish churches, a castle, iron works, vitriol works, a trade in cattle, and several mills.--The Bail., area, 68 geo. sq. m., is bleak and monntainous, but well wooded. Pop. 1370.

GEIERSBERG, Supimora, or Kyssifrk, a tn. Bohemia, circle, and 32 m . S. Kïniggraitz. r. bank, of the Still Adler. It stands partly on a leight and partly on a plain, has a parish church, a castle, with a garden; and an hospital, a weekly market, and an annual fair. Pop. 1360.

GEILENKIRCIIEN, a tn. Rhenish Prussia, gov. of, and 13 m. N. Aix-la-Chapelle, cap. cirele, of same name, on both sides of the Worm, here crossed by a bridge. It is the seat of a law court, and of several public offices, has a R. Catholic parish church, manufactures of woollen and linen cloth, eassimir, tobacco, chicory, leather, and soap, several breweries, a trade in cattle, and six amual fairs. Pop. 1507.-The circle, area, 58 geo. sq. m., consists for the most part of a low plain, is watered by the Worm, and has a light but not unfertile soil. Pop. 25,589.

GEILNAU, a celebrated watering-place, Nassau, r. bank, Lahn, 9 m . E. Coblenz. The water, which is similar to that of Selzer, is annually exported to the extent of 200,000 bottles.

GEISA, a th. Saxe-Weimar, circle, and $21 \mathrm{~m} . \mathrm{S} . W$. Eisenaeh, cap. bail. of same name, on the Unstrut. It is the seat of a court of justice, and several public oflices, contains a church, hospital, and infirmary, and has a paper and several other mills, a trade in horses, and cattle, and 12 anuual fairs. Pop. tn. 1787 ; bail. (area, 32 geo. sq. m.), 7800 .

GEISELHÖRING, a market tn. Lower Bavaria, r. bank, Little Laber, 19 m. S.E. Ratisbon, with a court of justice, two churches, a chapel, townhouse, and infirmary, and four mills. Pop. 1179.

GEISENFELD, a market tn. Upper Bavaria, 1. bank, $\mathrm{Ilm}, 26 \mathrm{~m}$. E.N.E. Landshut, with a parish church, townhouse, tile-works, and a trade in cattle. Hemp, hops, and fruit are extensively grown in the vicinity. Pop. 1400.

GEISENHEIM, a vil. Nassau, r. bank, Rhine, 11 m . S.W. Wiesbaden. It is beautifully situated on the Rothenbarg, and surrounded by fine country seats. It contains an old gothic church, with a fine façade, two beautiful towers, and a monument of the Elector John Philip of Schönborn; and has a considerable trade in wine. Pop. 2373.

GEISH, a lofty mountain, Abyssinia, kingdom, Amhara, prov. Gojam, at the sources of the Blue Nile; lat. $11^{\circ}$ N.; lon. $36^{\circ} 55^{\prime}$ E.; height, 9700 ft . above sea-level. It is connceted by a lower ridge with Mount Lichema, which is still higher.

GEISLINGEN, a tn . Wiirtemberg, circle, Danube, cap. bail. of same name, at the foot of a rugged alp, in a narrow valley on the Rolrrbach, $16 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Ulm. It is an ancient place, contains a church, an hospital, and a Latin school; and has a paper, copper, iron, and several other mills, manufactures of articles of turnery, and important corn markets. Pop. tn. 2231 ; bail. (area, 114 geo. sq. m.), 25,190.

GEISPOLSHEIM, or Geispitzen, a tn. France, dep. Bas-Rhin, 7 m. S.W. Strasburg. It has manufactures of starch, tobacco, and ribbons; roperies, and brick and tile works; and carries on a considerable trade. Pop. 2160.

GEITHAIN, or Geiten, a tm . Saxony, circle of, and 27 m . S.E. Leipzig, in a hilly district, at the source of the Eyla, and on a lake. It is an ancient place, and was once fortified, but is poorly built. It contains a handsome ehurch, with two towers; and has extensive manufactures of woollen cloth, numerous limekilns, tile-works, a trade in cattle and fruit, and three anuual fairs. Pop. 3303.

GEJOCZ (K1s, and NAGY), two contiguous vils. Hungary, Hither Theiss, co. of, and 3 m . from Unghvar, on the Latorcza. They contain a Protestant church. Pop. Kis-Gejocz, 1000; Nagy-Gejocz, 900.

GELDERLAND, a central prov. Holland; bounded, N.W. by the Zuider Zee, N.E. by prov. Overijssel, E. by Prussia, S. by prove. Limburg and N. Brabant, from the latter of which it is separated by the Maas; and W. by provs. S. Holland and Utrecht; greatest length, E. to W., 88 m. ; greatest breadth, N. to S., 54 m .; area, 1516 geo. sq. m. It is generally flat, and well watered, being traversed by the Rhine, the Waal, Old ljsscl, and other smaller streams ; well supplied with fish; and along whose banks are good clay lauds, well suited both for tillage and meadows. Towards the Zuider Zee on the N.W., are numerous dry sand-downs, and pieces of underwood; and in the N.E. is a good deal of heath and turf land. The usual cercals and cole, clover, flax, hemp, tobacco, and a considerable quantity of fruit are grown; and excellent horses and cattle, also sheep, pigs, asses, and poultry are reared; and there are numerous wild, especially water, fowl, and some game. There are corn, oil, copper, and many paper mills; and woollen, cotton, and linen manufactures; soap and salt boiling, glass-blowing, and other manufactures are carried on in various localities, more especially in and around Arnhem and Zatphen, which, with Nijmegen and Tiel, are the principal towns. Gelderland is divided into four arrondissements, and 22 cantons, and has 392 common, and 11 Latin schools. Pop. (1850), 370,560.

GELDERMALSEN, a vil. Holland, prov. Gelderland, 7 m . W. by N. Tiel, on the Linge, and formerly a receipt of toll for that stream. It has a large church, a school, and an annual horse, cattle, and sheep fair. Close by are the ruins of the old castle, Huis-te-Geldermalsen. Pop. 1140.

GELDERN [French, Gueldres; Latin, Gueldria], a tn. Rhenish Prussia, gov. of, and 27 m . N.W. Disseldorf, cap. circle of same name, at the confluence of the Niers and Blente, near the Eugenian Canal. It is the seat of a court of justice, and several public offices, and contains a Protestant and a R. Catholic parish church, and two hospitals; and has manufactures of cotton and linen goods, ribbons, hosiery, hats, leather, and soap, several breweries, dye-works, and spinning mills; a trade in corn, and four annual fairs. Founded in 1097, it was the residence of the sovercigns of Gueldres till
1343. Its fortifications, erected by Philip II., were razed in 1764 by Frederick II. Pop. 3648.--The circle, arca, 312 geo. sq. m., is watered by the Rhine and several small streams, and is, for the most part, flat and somewhat sandy, though tolerably fertile. Pop. 91,771.

GELDERSHEIM, a vil. Bavaria, circle, Lower Franconia, 4 m . N.N.E. Werneck; with a parish chureh, an hospital, a gypsum and flour mill, and a trade in corn. Pop. 1082.

GELDESTON, par. Eng. Norfolk; 940 ac. Pop. 386.
GELDORP, a vil. Holland, prov. N. Brabant, 3 m. E. by S. Eindhoven; with a R. Catholic church, and cattle, cloth, woollen, and linen markets; and in the vicinity the old castle the Huis-te-Geldorp. Pop. 1329.

GELEEN, a vil. Holland, prov. Limburg, 12 m. N.N.E. Maastricht, on the small river of its own name, an affluent of the Mass. It has a R. Catholic church, an elegant school, and a communal house. Pop., chiefly agricultural, 627.

GELENAU, a tn. Saxony, circle, Zwickau. It contains a handsome church, and an old turretted castle; and has manufactures of lace and bobinet, bleachfields, and several saw and other mills. Flax is extensively grown in the vicinity. Pop. 4221.

GELLAH, two towns, N. Africa:-1, A fortrcss, Algeria, prov. of, and 110 m . E.S.E. Constantine, on a high conical mountain, near l. bank, Mejerda. It was formerly a place of refuge for criminals, till their crimes were compounded for. -2, A tn., regency of, and 18 m . N. Tunis, r. bank, Mejerda, supposed to be the ancient Castra Corneliana.

GELLLEJ, a vil. Hungary, co. Borsod; with a Protestant, a R. Catholic church, and a synagogue. Gellej Katona, a Hungarian writer of some eminence, was born here. Pop. 1077.

GELLLI-GEER, par. Wales, Glamorgan; 30,000 ac. P. 3215.
GELLIVARE, a vil. Sweden, län Piteå, in Lulea Lappmark, about 100 m . N.N.W. Piteà. It contains a parish church, and has extensive ironworks; the ore of which, yielding nearly 67 per cent. of pure iron, is obtained in solid masses from two mountain ridges in the neighbourhood.

GELNHAUSEN, a tn. Hesse-Cassel, prov. of, and 16 m . E.N.E. Hanau, cap. circle of same name, r. bank, Kinzig. It rises in terraces on a hill side, is surrounded by old walls, with six gates; contains two churches, the one a large gothic structure of the 13 th century, with a twisted spire, cupola, fine carvings, and painted glass; and the other exhibiting an early specimen of the round arched style; a townhouse, hospital, synagogue, and an old castle on an island of the Kinzig, with interesting remains of the palace in which the Emperor Frederick Barbarossa used to reside; and has manufactures of paper, tobacco, ordinary and white leather, chocolate, liqueurs, spirits, brandy, and vinegar; several brewcries and oil mills, and four annual fairs. Gelnhausen is a very ancient place, and was indebted to Barbarossa for extensive privileges, which soon raised it to considerable importance. It suffered much in the 30 years' war, and also in 1813. Pop. tn. 4334; circle, 33,929 .

GELVES, a tn . Spain, Andalusia, prov. of, and 4 m . W.S.W. Seville, on a hill slope above r. bank, Guadalquivir. The site is beautiful, but the town itself is a wretched place, ill built, and so badly paved, that the streets are almost impassable. It has a parish church, a palace belonging to the Duke of Berwick and Alba, a primary school, and a prison; several oil mills, and a trade in wine and fruit. Pop. 699.

GElVink, or Geelvink Channel, S.W. Australia, between. Houtman's Abrolhos and the mainland. It is about 30 m. in width, and about 60 m . in length. The soundings found by Captain Stokes in crossing this channel, were 22 and 26 fathoms, fine white sand, current running N.N.W. a mile an hour.

GEMARKE, a tn . Rhenish Prussia, gov. of, and 18 m . E. Düsseldorf, r. bank, Wupper. It properly forms the central part of Barmen, and, along with it and Elberfeld, forms a nearly continuous succession of villages for about 6 m . It contains a Protestant and a R. Catholic parish chureh, a deaf and dumb institution, and a superior school. Pop. 2430.

GEMBLOUX, a vil. and com. Belgium, prov. of, and 10 m. N.W. Namur ; with a manufacture of cutlery, several tanneries, breweries, distilleries, and oil mills. In 1794, the French defeated the Austrians in its environs; and in 1815, it formed part of the Prussian and French positions previous to the battle of Waterloo. Pop. 2424.

GEMERT, a vil. Holland, prov. N. Brabant, 18 m. S.E. Hertogenbosch; with a R. Catholic church, a common and a Latin school, an elegant castle, formerly belonging to the order of the German knights; and two well-frequented annual fairs. Pop. 2205.

GEMISHKHANA, or Gumishrana, atn. Asiatic Turkey, pash. Erzeroom, 1. bank, and near the source of the Kharshoot, 45 m. S. Trebizond; well built; has several thousand inhabitints; and silver and copper mines in the vieinity.

GEMMI, a pass. Switzerland, leading aeross the Bernese Alps, whieh form the boundary between the cans. Bern and Valais. 1ts summit is 7160 ft . above the sea, and has the dreariest aspeet imaginable, consisting of naked limestone rocks, on which the hardiest lichens seem almost unable to vegetate. The view, embraeing Mount Rosa, the chain of alps beyond the Rhone, the Weisshorn or Mont Cervin, and the Are de Zan, is one of the most striking in Switzerland.

GEMONA, a tn. Austrian Italy, gov. Venice, prov. Friuli, on a mountain slope, 14 m . N.N. W. Udine, near 1. bank, Tagliamento. It stands in a deep basin formed by mountains, is surrounded by walls, is well built, contains a parish and two auxiliary churches, is the seat of a court of justice, and several public offices; and has an important transit trade, and two much-frequented amual fairs. Pop. 4500.

GEMÜND, a tn. Rhenish Prussia, gov. of. and 19 m . S.E. Aix-la Chapelle, in a valley surrounded by lofty hills, at the confluence of the Oleff and Urft. It is the seat of a law court, and has manufactures of paper, leather, tin, and ironware; a trade in cattle, and two annual fairs. In the vicinity are iron and lead smelting furnaees. Pop. 900.

GEMUNDEN, several places, Germany, particularly:1, A tu. Bavaria, circle, Lower Franconia, at the confluence of the Saale with the Main, 22 m . N.W. Wirzburg. It coutains a parish church and townhouse, and has manufactures of glass and leather, several mills, a fishery, some shipping ; and trade particularly in wine and fruit ; and six annual fairs. In the vicinity are the ruins of the old castle of Scherenberg. Pop. 1543.-2, A tn. Hesse-Cassel, r. bank, W ohra, 10 m . S.E. Frankenberg. It has a chureh, with a handsome tower; a townhouse, and school; a trade in corn and cattle, and six annual fairs. Pop. 1430.-3, A vil. Rhenish Prussia, gov. of, and 30 m . S.S.W. Coblenz, on the Simmerbach; with a Protestant and a R. Catholic chureh; manufactures of linen, a trade in cattle, and two anmul fairs. Pop. 918.

GENALGUACLL, a tn. Spain, Andalusia, prov. of, and about 55 m. W.S.W. Malaga, on a height above the Almachar, a tributary of the Genal. It has a cheerful and picturesque site, but is not very well built, the houses being generally small, and the streets uneven, ill paved, and dirts. It contains a handsome modern parish chureh, with three naves; a townhouse, primary school, and very indifferent prison; and has mineral springs, briek and tile-works, numerous distilleries, several oil and flour mills, and a trade in wine. Pop. 1139.

GENAPI'E, a vil. and com. Belgium, prov. Brabant, 6 m . E. Nivelles, on the Dyle; with manufactures of iron wares, paper, \&e. Various military operations took place here in 1815 . Pop. 1676.

GENARGENTU [anc. Janua Argenti], a mountain, isl. Sardinia, near the source of the Flumendoso, div. Sassari, prov. Isili, and about 30 m . E. Oristano. Its summit, called Punta Schinschiu, has a height of 6137 ft ., and is the culminating point of the island. Snow sometimes remains upon it till the middle of July.

GENAZENO, a tn. Papal States, in the Campagna di Roma, 24 m . E.S.E. Rome, beautifully situated on the slopes of a steep hill, above the Rivotana torrent, and surmounted by a castle, cut off from the hill, and protected by a drawbridge. The town has a dilapidated but picturesque appearance. It contains the rich chapel of Madonna di Buon Consiglio, one of the most famous shrines in this part of Italy. Pop. 2396.

GENDRINGEN, a large beautiful vil. Holland, prov. Gelderland, 18 m. S.S.E. Zutphen; with a Reformed, a R. Catholic church, and a school. Pop. (chiefly agricultural), 925.

GENEMUIDEN, a tn . Iolland, prov. Overijssel, close upon the Zuider Zee, 8 m . N.N.W. Zwolle. It has a convenient townhouse, a Reformed church, a town and an infant school, and one under the care of the Society for general good; and a workhouse or retreat for old people. Close by the town is the common, on which every citizen who maries a citizen's
daughter has the right to feed a certain number of cattle. The inhabitants trade in hay and bulrush mats. Pop. 1530.

GENNEP, a tn. Holland, prov. Limburg, on the Prussian frontier, near the junction of the Niers with the Maas, 12 m . S.E Nijmegen. It has a convenient townhouse, a small but very beautiful Reformed church, a selool, and a poorhouse, and the remains of an old castle. P'op. (agrienltural), 950.

GENEVA, a can. Switzerland, bounded W. and N.W. by France, N. by can. Vaud, and the Lake of Geneva, E. and S. by Sardinian States. In addition to the territory thus bounded, the communes of Celigny, Le Coudre, and l'ctit Bois, enclosed by Vaud, belonging to this canton, which is the smallest in the Swiss Confederation; area 198 geo. sq.m. The surface is nowhere mountainous, but is broken by several hills, none of which are more than 400 ft . above the Lake. The whole canton belongs to the basin of the Rlione, and the only streans of importance are that river and the Arve, which joins it a little below the town of Geneva. In the vicinity of these rivers the supply of water is ample; but in the upper districts it is deficient, and in summer considerable scarcity is felt. The climate is generally healthy, and rain is by no means frequent, the average annual quantity being only the half of that which falls on the Great St. Bernard. Winds are very common, both from the lake and the land. The most frequent and most violent are the N., here called the Bise and the Vent. Harvest is about a fortnight earlier than in can. Vaud. In geological structure, the whole can. belongs to what is called the Molasse formation, consisting chiefly of a soft greeu sandstone. A great many boulders, of a different formation, are seattered over the surface, and garnets, jaspers, and other fine pebbles, are often found. In the hills of Cologny and Dardagny, some coal is worked. The soil of the canton is naturally less fertile than that of most of the adjoining districts, but has been so much improved by skilful and persevering culture, that alundant crops of all kinds suitable to the climate are raised, and the whole territory wears the appearance of a large and beautiful garden. Even the natural flora is remarkably rich, and makes the surrounding country a favourite resort of the botanist. Within a circle of 25 m ., round the town of Geneva, 1470 species of plants have been found. Part of the surface is under the culture of the vine, but the wine obtained is not remarkable either for quantity or quality. Wood is rather deficient. Manufactures are extensively earried on, and with a success which places the great body of the inhabitants in comfortable circumstances. They consist chiefly of clocks and watches, gold, silver, and other metal wares, woollen cloths, and silk goods of various descriptions, hats, leather, and artieles in leather; and there are numerous cotton-mills, printfields, and dye-works. The territory of Geneva having, by the arrangements of the congress of Vienna, obtained an accession of 15 communes, detached from France and Savoy, was admitted a member of the Swiss confederation in 1814, and ranks as the 22d canton. A constitution, some what aristocratical in its nature, was framed, and continued in force till 1830, when a considerable modification of it took place. In 1841, in consequence of a popular tumnlt, the original constitution was abandoned for one in which the democratic principle is completely predominant. The legislative power is excreised by a great couneil, composed of deputies of 25 years of age, clected by all male citizens of 21 years of age not under legal incapacity. The number of deputies is at the rate of one for every 333 inhabitants, and amounts at present to 186 . They are elected for four years, but one-half retires every second year. Those who retire may be immediately re-elected. Every new law, or alteration of law, must be sanetioned by the great council. The executive is confided to a council of state, consisting of 13 members, belonging to the great couneil and appointed by it. The president and vice-president, also named by the great council, have the title of Syudies, and receive each a salary of $£ 120$. Each member of the council of state las a salary of about $£ 96$. All religious denominations are declared to have perfect freedom, but two of them are paid by the State-the R. Catholies amounting to rather more than a third of the population, and the Protestant national church, many of whose members are understood to have departed widely from the system of theology which Calvin tanght them, and to have adopted a modified species of Socinianism. Pop. (1849), 63,932.

GENEVA [German, Genf; French, Genève; Italian, Ginevra; Spanish, Ginebra], a tn. Switzerland, cap. above can., on the deelivities of two hills, in the centre of a basin, the sides of which are formed partly by the lower slopes of the Jura,
hotels; the lower town, the seat of trade and residence of the poorer classes, is very indifferently built, consisting chiefly of houses remarkable only for their disproportioned height, and lining narrow, irregular, dark, and ill eleaned streets. The chief exception is along the banks of the Rhone, where a quay about 400 yards long is bordered by a row of handsome modern houses. The publie buildings are neither numerous nor individually possessed of much interest. The more important are the cathedral or ehurch of St. Pierre, a gothic strueture of the $10 \mathrm{th}, 11 \mathrm{th}$, and 12 th centuries, occupying the highest site in the lown, and by its three towers forming the most conspieuous object within it, somewhat defaced externally by a very ineongruous, though magnificent, Greek peristyle, but interesting within, from the purity of its style and the number of its monuments ; the townhouse, in the Florentine style; the Musée Rath, a neat building named after its founder, and containing a collection of pietures and other works of art, few of them of much merit ; the arsenal, with a collection of ancient armour; the public library, founded by Bonnivard, the prisoner of Chillon, eontaining 50,000 volumes, 500 MSS., and a collection of autograph letters by Calvin and other distinguished reformers; the museum of natural history, enriched with the geological collections of Saussure, and the fossil plants of Brogniart and Decandolle; the botanieal garden, astronomical observatory, theatre, the old prison, originally the bishop's palaee; the casino, penitentiary, hospital, and house of correction. The house in which Calvin lived and died is rather conjectured
and partly by secondary chains of the Alps, at the W. extremity of the Lake of Geneva, where it narrows almost to a point, and pours out the blue Rhone, here erossed by s?veral bridges, and dividing the town into two portions; the larger and more important of which is on the 1. or S. bank. The environs are covered with handsome villas, and the town itself, when approached either by land or water, has a very imposing appearance. It is surrounded by walls, flanked with bastions, which, though altogether unfit to sustain a regular siege, have repeatedly proved effectual against a sudden than known, and the very site of his grave is lost. The ouly important manufactures of Geneva is that of watches, musical boxes, and jewellery, which employ about 3000 persons, who annually make above 100,000 watches, and work up 75,000 ounces of gold, 5000 merks of silver, and precious stones to the value of $£ 40,000$. The trade is very much restricted by the narrow limits of the Genevese territory, and the jealous watch whieh the Sardinian and French governments keep along its frontiers. There is also a want of a proper navigable outlet, the navigation of the Rhone below Geneva being very much obstrueted. It lias been proposed to remove these obstructions. Were this accomplished, Geneva would become a kind of port, and doubtless receive a great increase to its prosperity. Meanwhile, its chief trade, in addition to that furnished by its staple manufacture, consists in supplying the surrounding distriets with colonial products, and numerous minor articles. In literature and science, Geneva has long occupied a distinguished plaee; and, though it does not now possess any of the highest names, it has a considerable number which are honourably known. Education, too, is very generally diffused, and the population generally are distinguished for intelligence. This is partly accounted for by the number of superior educationai establishments which the town contains. Among these are the college, which was founded by Calvin, and has never ceased to prosper, avcrage attendanee 413 ; the academy, composed of the four faculties of theology, law, science, and literature, with 26 professors, and about 250 students; the primary schools, a number of other schools supported by the state or special endowments, and a great many private boarding-schools, some of these of considerable celcbrity. $\mathrm{Be}-$
assault; and is entered on the land side by three gates. The town is divided into two parts, an upper and a lower. The upper town, oceupied chicfly by the burgher aristoeracy, contains a considerable number of well-built houses and handsome
sides these, there is the Evangelical School, in conneetion with the Societé Evangelique, a theological seminary, in which young men are prepared cither for the ministry or for the missionary field. Among its teachers at present (1852) are

Ganssen and Merle d'Aubigné. The benevolent institutions include the general hospital, the Bureau de Bienfaisance, the Fondation Tronchin, orphan, old meu's, and other asylums. Law is administered in aecordance with the code Napoleon, by four justiees of the peace, a tribunal civil et correctionel, a tribunal de commeree, a conseil de discipline, for military offences, and a tribunal de recours, which is eomposed of four councillors of state, and 24 members of the great council, and reviews the decrees of all the other eourts.

The origin of Geneva is mannown, but its antiquity is proved by the reference which Casar makes to it. On the invasion of the N., it was successively occupied by the Bourguignons, who made it their capital, the Ostrogoths and Franes. It next formed part of the second kingdom of Burgundy, and beeame incorporated with the (iermanic empire. By a grant of the emperors, the temporal was added to the spiritual power of the bishops, and the counts of Savoy having succeeded in eontrolling the nomination of the bishop, became in a manner masters of Geneva. This state of matters was suddenly interrupted by the Reformation, to which the Genevese are indebted both for their civil and religious freedom. The celebrity which they afterwards aequired, ehiefly under the guidance of Calvin and his distinguished associates, is matter of European history. Pop. (1850) 30,984.

GENEVA (Lake of), or Leman [Latin, Lacus Lemanus], the largest of the Nwiss lakes, surrounded N. and W. by ean. Vaud, S.W. can. Geneva, S.E. ean. Valais, and S. Savoy; length, measured on its N. shore, 55 m ., and on its S. shore, 40 m .; central breadth alout 6 m .; greatest depth 900 ft . It is in the form of a crescent, with its horns turned S., and is 1150 ft . above the sea. Its scenery, though grand, is surpassed by that of several of the Swiss lakes. On the N. the shore is low, and the ground behind ascends gralually in beautiful slopes, eovered with vines. On the S., and partieularly on the E. side, the shore is rocky and abrupt, and lofty precipiees often rise sheer from the water's edge. The mmmerous small boats on the lake, with their lateen sails, add much to the picturesqueness of the seene. The steamers have rather a different effect, but afford excellent facilities for visiting all that is interesting on the shores of the lake, or its immediate vicinity. A remarkable phenomenon in the lake is a sudden rise and fall, sometimes of 5 ft ., but usually only of 2 ft ., and never lasting more than 25 minutes. It is not proluced by the wind, for it takes place when the air is perfectly still. Many conjeetures have been formed as to the eause. The most probable is that which attributes it to the unequal pressure of the atmosphere on different parts of the surface. Owing to the depth of the lake, it never freezes entirely, thongh in severe winters its lower extremity becomes covered with ice. It contains various epecies of fish, and its water is remarkably pure, and of a beautiful blue colour; a phenomenon, however, which is not observable in small quantitics. The Rhone, whieh enters its E. extremity a muddy, turbid stream, issues from its W. extremity perfectly pellucid, and likewise of the finest blue.

GENEVA, a vil. U. States, New York, beautifnlly situated at the N.W. extremity of Seneca lake. It has nine churches and two eolleges; one for general, and the other for medical, instruction. Pop. 3600.

GENEVIEVE (S'r.), a vil. U. States, Missouri, r. bank, Mississippi, 125 m . E.S.E. from Jefferson. It contains a R. Catholic chureh, an academy, and some neat dwellings; and carries on an extensive trade in lead. Pop., mostly French, 1607.

GENEVOIS [Italian, Genevese; Latin, Gebonensium], a prov. Sardinian States, div. Savoy, bounded N. by Carouge, N.E. Fancigny, S.E. Upper Savoy, S. and W. Savoy Proper; length, E. to W., about 32 m .; breadth, N. to $S ., 20 \mathrm{~m}$. Lofty ridges lelonging to the Pemine Al ps bound the prov. on the N.E. and S.E., and cover a large part of the surfaee by their ramifications. The streams are limited to a nmber of mountain torrents, of which the Fier and Cheran are the ehief. The lake of Amecy is nearly in the centre of the province. Notwithstanding the monntainous nature of the surface, it is so industriously eultivated, that four-fifths of the whole are turned to account. The principal commodities which the inhabitants have for sale are corn, game, poultry, cattle, swine, nut-oil, butter, and cheese. The province is divided into seven mandamento. Cap. Anneey. l'op. 80,031.

GENEVRE, a mountain of the Cottian Alps, between France and the Sardinian States, 4 m . E.N.E. Briançon. Its summit, which terminates in a mass of abrupt precipices, has a height of $12,092 \mathrm{ft}$. Both the Durance and the Dora Riparia have their sourees in this mountain. An admirably constructed road zig-zags over the pass between the opposite valleys. On the plain, at the base of Mont Genèvre, 6000 ft . above the sea, good erops of barley are grown.

GENF, Switzerland. See Geneva.
GENGENBACH, a tn. Baden, cirele, Middle Rhane, cap. bail. of same name, r. bank, Kinzig, 19 m. S.E. Strasburg. It consists of the town proper, surrounded by walls, with two gates, and of four suburbs; has two churches, an hospital, manufactories of paper and red leather, and two annual fairs. Pop., tn. 2400. Area of bail., 68 geo. sq. m. Pop. 16,711.

GENIEZ (St.), or St. Geviez ne Rive d'Oit, a vil. France, dep. Aveyron, 23 m . N.E. Rodez, in the bottom of a beautiful valley, on both sides of the Lot, here crossed by a handsome bridge. It is well built, consists of houses generally handsome and cheerful looking, and of spacions, straight, and well-paved streets; is the seat of a court of eommerce, a chamber of manufactures, and a communal college; contains a handsome town-house, and is the most active and industrial place in the whole department; laving manufactures of woollen stuffs, table-covers, and hats ; numerous worsted mills, dyeworks, and tanneries; a considerable trade in timber, and six annual fairs. Pop. 3019.

GENIL, a river, Spain, whieh rises in a ehasm called Corral de Veleta, on the N.W. slope of the Sierra Nevada, Andalusia, prov. Granada; flows N.W. through the town of Granada, then W.S.W. till it reaches Loga, when it turns W.N.W., passes the town of Ecija, and joins l. bank Guadalquivir, at Palma del Rio, 30 m . below Cordova, after a course of about 150 m . It receives numerous affluents, is nowhere navigable, but furnishes much valuable water-power, and is extensively used in irrigation.

GENIS (St.), several places, France, partienlarly:-1, (-Laval), a tn. dep. Rhone, 4 m . S.S.W. Lyon, on the side of a bill covered with fine villas. It has manufactures of stained paper, buttons, ink, rugs, and tapestry; a trade in excellent wine, grown within the district, and three cattle fairs, one of which lasts two days. Coal is worked exten sively in the vicinity. Pop. 1950.-2, (-Terre Noire), a vil. dep. Loire, 5 m . N.E. St. Eticune. It has manufactures of nails, a foundry, and extensive coal works. Pop. 1452.

GENIX (St.), a tn., Sardinian States, Savoy, 11 m . W. Chambery. Pop. 2000.

GENNARO, a mountain, Papal States, about 9 m . N. Tivoli. It belongs to the E. branch of the central Apemines; height, 4289 ft . With exception of Guadagnolo, it is the lighest point in the chain, which bounds the Campagna on the E., and is supposed by some to be the Mons Lucretilis eelebrated by IIorace. The ascent to it forms an interesting excursion, and the summit commands one of the finest views in Italy.

GENNYS (St.), par. Eng. Cornwall; 5580 ae. Pop. 689.
GENOA, or Genova, an anc. duchy, and afterwards a republic, which, by the congress of Vienma, in 1814, was annexed to the kingdom of Sardinia. It is now ineluded chicfly in the division of Genoa, but partly also in that of Nice.

GENOA, or Genova, a maritime division, Sardinian States; bounded N. by div. Alessandria, and duchy of Parma; E. by the duchy of Modena, and grand duchy of 'Tuscany; S. by the gulf of Genoa; and W. by the divs. Nice and Coni; greatest length about 130 m .; breadth varying from a few miles in the E. and W., where it is narrowest, to 46 m .; area about 3000 sq. m . The Apemines traverse this div. S.W. to N.E. in directions nearly parallel to the shore, from which their central ridge is seldom more than 16 m . distant, and divided into two basins; the one, the gnalf of Genoa, which receives its waters by the Vara, Magra, Bisagno, Poleevera, and numerous mountain torrents; and the other, the Po, which receives from it the Bormida, Orba, Serivia, Taro, and Trebbia. The coast is generally precipitons, but is indented by several bays, and contains some good harbours. The climate is on the whole temperate and salubrious, but the influenee of the siroeco is often severely felt. The soil is not generally fertile, and the rugged nature of the surface unfits a great part of it for agricultural operations. Some of the loftier mountain

GENOA
summits are bare, but those of less elevation are either covered with wood, or afford exeellent pastures. In the low grounds all the finer productions of Italy grow to maturity, but still the corn produced falls so very far short of the consumption, that it is scarcely adequate to a month's supply. The most important vegetable products are the vine, olive, and chestnut. The most valuable mineral is marble. Manufactures have made great progress in large towns, particularly Genoa, where, in some particular tissues, it still leads the world; but the great passion of the Genoese is for the sea; and though their nautical celebrity has been far surpassed by some other nations, they still carry on a very important trade, both coasting and foreign. For administrative purpose: the division forms nine provinces:-Genoa, the capital; Albenga, Bobbio, Chiavari, Levante, Novi, and Savona. Pop. 560,000.

GENOA [Italian, Genova, or Genua; French, Gènes], a celebrated eity, Sardinian States, cap. div. of same name, on the coast of the Mediterranean, between two rivers, the Bisagno and the Polcevera, at the head of the gulf of the same name, 75 m . S.E. Turin; lat. $44^{\circ} 24^{\prime} 54^{\prime \prime}$ N.; lon. $8^{\circ} 53^{\prime}$ E. (R.) The appearance of the city from the sea is beautiful and striking: it is in the form of a erescent, and rises gradually from the shore-the whiteness of the houses, the imposing outlines of the intermingling palaces, and the distant villas and gardens. heightening the effect of its pieturesque position. Immediately behind the city rises an abrupt hill, covered with villas and country houses. The city is enclosed by a double line of fortifications, forming a vast semicircle, supported by numerous detached forts, redoubts, and outworks, crowning hill after hill, and constituting one of the most extensive town fortifi. cations in Europe; the outer wall being about 7 m . in extent. In the older parts of the town the streets are extremely narrow, being seldom more than 10 ft . wide, with lofty buildings on either side. They are also dark, steep, and crooked, and almost wholly inaccessible to carriages. In the newer quarters, again, many of them are spacious, and are lined with noble edifices. The finest of these strects are the Strada Nuova and the Strada Balbi, in both of which are a number

THE STRADA BALBI, GENOA, - From Italie Monumentale et literesque
of palaces of the most superb architecture, though often deformed by tawdry paintings on their fronts. Most of the streets, which are kept remarkably clean, are paved with smooth slabs of lava. having a pathway of bricks in the centre to afford
footing to mules, and to persons carrying burdens. Many of the palaees are crowded with works of art, and splendidly fitted up inside, though in a showy rather than a substantial manner. The principal palaces are, the Ducal palace, and the palaces of Doria, Serra, Giustiniani, Cambasio, Balbi, Durazzo, and the palaee of the Queen-Mother. The ehurches and hospitals rival the palaces in splendour. The most remarkable of the former is the Duomo, or Cathedral of St. Lorenzo, founded in the 11th century, but not completed till the beginning of the 12 th. The most conspicuous clurch in the general view of the city is that of Carignano, finely situated on a hill, and having a resemblance to St. Peter's in its general plan. The other churches of note are, St. Stefano della Porta, a handsome structure, but chiefly remarkable for containing a painting of the martyrdom of the titular saint, the joint production of Rafaele and Giulio Romano; San Siro (St. Cyr), the most ancient Christian foundation in Genoa; Saint Ambrosia, containing several fine paintings, and splendidly decorated within; L'Annunciata, also magnificently fitted up interiorly. There is a number of other interesting ecclesiastical edifices, although more than half the churches in the city were demolished by the French. The principal charitable institution is the Albergo de' Poveri, in which 1600 individuals, orphans and old people, find shelter; the children are brought up to different trades; and the girls, who marry out of the hospital, receive a decent dowry. The house itself unites the beauties of architecture on the most splendid scale, with the most perfect convenience. The Ospedale del Pammatone is another splendid institution for benevolent purposes, founded in 1430. The deaf and dumb institution (Sordi Mutti) is also much celebrated. There are in and about Genoa fifteen different religious establishments for females, all regulated according to the monastic system, though none of the inmates take vows. The largest of these institutions is that of the Fieschine, which contains 250 persons, all employed in such light work as lace-making, embroidery, and the manufacture of artificial flowers. There are two theatres in the city, one of which, the Teatro Carlo Felice, is an elegant structure, and a university, also a handsome building. Besides the university, the other chief educational institutions are the theological seminary, the school of fine arts, the royal marine school, and tbe navigation school. Genoa is the seat of royal appeal courts, of a chamber of commerce, and an admiralty court. It is supplied with water by aqueducts 18 m . in length.

The manufactures of Genoa are considerable. Its velvets and silk are world-famed; and it likewise possesses factories of cloth, stoekings, blonde, oilcloth, hats, paper, essences, and soap. Besides these, its works in gold, silver, and marble, have a high reputation; indeed, for silver-filagree, delicately and artistically wrought into bracelets, brooches, bunches of flowers, and other kinds of ornaments innumerable, the Genoese workmen stand unrivalled, and their productions are sent to all parts of the world.

The port of Genoa, which is of a semicircular form, and about $\frac{3}{4}$ of a mile in diameter, is formed by two moles projecting into the sea from opposite sides, but not opposite each other; the Molo Nuovo, or New Mole, on the E. side, being about 790 yards S. of the Molo Vecchio, or Old mole, on the W. Both rise from 16 to 18 ft . above the sea. Near the abutment of the new mole is the light-house, a beautiful structure, 300 ft . in height. The light is revolving, and is seen in clear weather from a distance of 24 m . There is, besides, a fixed harbour light on each of the moles. Genoa is a free port, in which goods may be warehoused, and from which they may be re-cxported free of duty. It is the ehief outlet, by the Mediterranean, for the manufactures of Switzerland, Lombardy, and Piedmont. There is an immense number of bonding warehouses situated in one locality, called Porto Franco; these are surrounded by walls, and form a small separate town. The principal articles of export are rice, oils, fruit, cheese, rags, the products of its manufactures, \&c. Imports-cottons, raw cotton, woollens, cochineal, indigo, colonial produce, tobacco, salt fish, hides, grain, lead, nutgalls, \&c. In ancient times the Genoese merehants were remarkable for their enterprise, and for the extent of their dealings. They brought the productions of Hindoostan from Ispahan to Trebizond, and from thence conveyed them through Kaffa, in the Crimea, and afterwards through Constantinople to Europe. Their commerce subsequently de-
clined greatly, but is now, and has been for some years past, reviving.

Vesseis Entfingo and Cleared, 1842-1846.

|  | Vessels Entered. | Tonnage. | Vemels Cleared. | Tonnage. |

The exports amount to about $£ 3,000,000$ amnally, and the imports to $£ 2,000,000$.

Genoa is in many respects a very desirable, though not particularly cheap, place of residence. Rents are high in the city, but provisions of all sorts are abundant, of good quality, particularly beef and poultry, and reasonable. The climate is healthy and pure, though somewhat cold in winter. The Genoese are shrewd, industrious, and parsimonious, but are accused of a want of integrity and sincerity. Their moral and domestic habits, formerly very indifferent, are said to be now much improved.

The origin of Genoa is said to be more remote than that of Rome. As early as the 11th century the Genoese had become formidable at sea; and, notwithstanding an almost continuous succession of wars through several ages, gradually increased in power and importance. About the middle of the 13th century the rivalry between Genoa and Venice, so famous in Italian history, began to manifest itself; terminating in 1382, in the ascendancy of the latter. After a long period of in-
any very marked projections-the Gulf of Spezzia being tho most remarkable of the former, and Capes de la Mele, Chiapa, and Venere, the most noted of the latter.

GENOIS (St.), a vil. and com., Belgium, prov. W. Flanders, 9 m . S.E. Courtrai; with manufactures of linen and sabots ; a tannery, brewery. rope-walk. two tobacco factorics, and several mills. Pop. 3912.

GENOLA [Latin, Gavenola], a vil. and com. Sardinian States, Piedmont, div. Coni, prov. and 10 m. E.S.E. Saluzzo, between the Grana and the Stura. It contains two churches and an alms-loouse, and has two annual fairs. Pop. 1956.

GENONI, a vil. isl. Sardinia, prov. Isili, 4 m . from Laconi. It is well situated on the S. slope of a lofty hill, but has ill built houses, and irregular dirty streets. It contains a parish and three minor churches, and a primary school; and has some trade in corn, wool, and chalk. Pop. 1078.

GENSANO, or Genzano, a tn. Papal States, Campagna di Roma, 19 m. S.E. Rome. It is picturesquely situated, and has several broad and straight streets, which terminate in a landsome square, ornamented with a beautiful fountain. On one of the hills above the town is the feudal mansion of the Dukes of Caesarini, and at a greater height the Convent of the Cappuceini. Gensano is celebrated for an annual festival, called the Infiorato di Genzano, when the streets are strewn with flowers, and the town is crowded with visitors from Rome and the neighbouring country. In the immediate vicinity is the beautiful little lake of Nemi, the Lacus Nemorensis of the poets. Pop. 4622.

GENSINGEN, a vil. Hesse-Darmstadt, prov. Rheinhessen, eircle, and 7 m . S.E. Bingen. It contains a Protestant and a R. Catholic parish church, and a townhouse; and has several mills, and a trade in wine. Pop. 943.

GENT, a tn. Holland, Gelderland, 7 m. E.N.E. Nijmegen, near the Waal, with a Reformed church and a school. It is supposed to have been the site of a Roman camp. Pop. agrieultural, 368.

GENTHIN, a tn. Prussia, prov. Saxony, gov. of, and 27 m . N.E. Magdeburg. It is the seat of several courts and public offices for the circle; contains a Protestant parish chureh, burgher school, and hospital ; and has manufactures of woollen and linen cloth, tile-works, mills, a trade in cattle, and four amual fairs. Pop. 2333.

GENTILLY, a vil. and com. France, dep. Seine, a little S. of Paris, on the Bièvre. The only remarkable institution is the bicêtre, now a departmental lunatic hospital, of the most useful and humane kind; also serving as an asylum for aged men.--The commune, a portion of whieh may be considered as a suburb of Paris, called Petit Gentilly, las a large manufactory of mirrors, several bleacheries, \&c. At Gentilly was a summer residence of the early Freneh kings, at which Pepin held a council, in 766. Pop. vil., 7759; com. 11,693.

GENTS, three vils. Inungary:-1, Thither Theiss, co. Szathmar, not far from Szent Miklos. It contains a I'rotestant and a Greck united church. Pop. 1080.-2, (-Magyar), co. Eisenberg, on the
Marezall, 8 m . from Papa. It contains a Protestant and a R. Catholic church; produces some wine, and rears large numbers of cattle. Pop. 1092.-3, (-Neméth), co. Eisenberg, on the Gyïngyös, about 3 m . from Steinamanger. Pop. 675.

GENZANO, a tn. Naples, prov. Basilicata, 18 m. N.E. Potenza, on a height near the source of an affluent of the Bradano. It contains a parish chureh, and several convents. Pop. about 3000 .

GEOGRAPHE.-1, A strait, Van Diemen's Land, separating Schouten's Island from Freycinet's l'eninsula. It is searcely a mile in width at the narrowest part.-2, A bay, W. Australia, co. Sussex, of which it occnpies the whole N. extremity, being about 35 m . in width.

GEORGE, a maritime dist. and tn., S. Africa, Cape colony. The distmict bounded, N. by the Black Mountains, which separate it from leaufort; E. by Uitenhage; S. by the Indian Ocean; and W. by the Gauritz, which separates it from Zwellendam, area, $4032 \mathrm{sq} . \mathrm{m}$., is traversed by the Outeniqua Mountains, and by the Kouga and Olifant's river.

Its coast-line is indented with numerous bays, and intersected by several rivers, the Gauritz being the only one of importance. It produces cattle, grain, vines, and tobacco; but, generally speaking, though possessed of plenty of water, it is not productive. The grain is of an inferior quality, and the sheep and cattle are lean. Pop. (1838), 9193.-TThe town, cap. above dist., on the Breede River; lat. $34^{\circ} \mathrm{S} . ; \operatorname{lon} .22^{\circ} 19^{\prime}$ E.; is a poor place, and not at all thriving; the houses chiefly built of turf, plastered over with a mixture of clay and cowdung, and whitewashed. The chief trade is in timber, and supplies for the wealthy farmers in the adjoining valley of the Lange Kloof.

GEORGE LAKE.-1, New S. Wales, between the cos. of Argyle and Murray, 2000 ft . above the sea, 16 to 18 m . in length, and about 7 m . at its greatest breadth. -2 , U. States, New York, 36 m . long, and 2 to 3 m . broad, studded with numerous islands. Its waters are of singular purity, and the scenery of its shores is extremely picturesque, and on them are the remains of several old forts. A steam-boat plies regularly on the lake.

GEORGE (St.), two pars. Wales :-1, (-Kegidock), Denbigh. Pop. 399.-2, Glamorgan; 980 ac. Pop. 218.

GEORGE.(St.), several pars. England:-1, Gloucester ; 1280 ac. Pop. 8318. - 2, (Hanover Square), Middlesex; 1090 ac. Pop. 66,543.-3, (-in-the-East), Middlesex; 230 ac. Pop. 41,350.

GEORGE (St.) Channel, the S. portion of that arm of the Atlantic which separates Ireland from Great Britain, the S. limit of which may be defined by a line drawn diagonally from Cape Clear, in Ireland, to the Land's End in Cornwall; a distance of about 200 m . Northerly, it blends with the Irish Sea, but may be said to terminate in this direction with the parallel of $53^{\circ} 30^{\prime} \mathrm{N}$; ; or with a line drawn from Dublin to Holyhead, a distance of about 55 m . Its whole length, S.W. to N.E., will thus be about 210 m . The great tidal wave from the Atlantic enters this channel nearly simultaneously with its entrance into the English Channel, and thas brings high water about the same time to Brest, in France; Falmouth, in England; and Cape Clear, in Ireland.

GEORGE (St.), Islands, Cilannels, Capes, \&c.-Islands.-1, One of the Azores, a long narrow island, about 23 m . in length, between Terceira and Pico, separated from the latter by a safe channel, from 10 to 12 m . broad. It lies W.N.W. and E.S.E., and has a small road or harbour on the S. side. The extreme S.E. point, called Point del Topa, is in lat. $38^{\circ} 30^{\prime} \mathrm{N} . ;$ lon. $27^{\circ} 50^{\prime} \mathrm{W} .-2$, An isl. Mozambique Channel, 2 m . N. St. Jago; lat. $15^{\circ} 2^{\prime} 12^{\prime \prime}$ S.; lon. $40^{\circ} 48^{\prime} 30^{\prime \prime}$ E. (r.)-3, Small isls. India, coast of Malabar, lat. $15^{\circ} 21^{\prime}$ N.; lon. $73^{\circ} 45^{\prime}$ E. (r.)-4, An isl., S. Pacific Ocean, Solomon group; lat. $8^{\circ} 32^{\prime}$ S.; lon. $159^{\circ} 40^{\circ}$ E.-5, An isl. and harbour of N. Florida, W. Appalachicola Bay; lat. $29^{\circ} 37^{\prime} 24^{\prime \prime}$ N. ; lon. $85^{\circ} 5^{\prime} 15^{\prime \prime}$ W. (R.)-6, An isl. N. America, N.W. coast; lat. (E. point) $56^{\circ} 38^{\prime}$ N.; lon. $169^{\circ} 11^{\prime}$ W. (R.) -7, A small isl. Bay of Honduras, between the islands Turneffe and Ambergris, an agrecable and healthful spot; lat. $17^{\circ} 35^{\prime} \mathrm{N} . ;$ lon. $88^{\circ} 43^{\prime}$ W.-8, One of the largest of the Bermudas, abont 15 m . long, and 3 m . broad. It is surrounded by rocks, and is approachable by vessels at two places only, and even there not without hazard. Lat. $32^{\circ} 45^{\prime}$ N.; lon. $63^{\circ} 30^{\prime} \mathrm{W} .-\quad$ Channels. -9, A channel between the Great and Little Nicobar islands, Bay of Bengal, about 15 m . to 18 m . long, and from 3 m . to 6 m . wide, extending E.N.E. and W.S.W. The bottom in general is foul, with strong tides or currents running in eddies through the channel; few vessels, therefore, pass through it, unless carried by an unexpected current.-10, The strait or cliannel which separates New Ireland from New Britain.Capes and Bays.-11, A cape, the $S$. promontory of New Ireland; lat. $4^{\circ} 45^{\prime} \mathrm{S}$. ; lon. $152^{\circ} 40^{\prime} \mathrm{E} .-12$, A cape, Australia, S.E. coast : lat. $35^{\circ} 10^{\prime} \mathrm{S} . ;$ lon. $150^{\circ} 59^{\prime}$ E. (r.) -13 , A cape, S. extremity, Kerguelen's Land, S. Indian Ocean; lat. $49^{\circ} 54^{\prime} \mathrm{S} . ;$ lon. $70^{\circ} 10^{\prime} \mathrm{E}$. (r.) -14, A bay, cape, and harbour, Newfoundland, W. coast. The bay extends inwards, E.N.E., 54 m ., and receives the river St. George, which falls into the head of the harbour of same name, in which the bay terminates E. The river is navigable for boats only, but is fast filling up with sand. The cape, which forms the N. entrance to the bay, is in lat. $48^{\circ} 29^{\prime} \mathrm{N}$.; lon. $59^{\circ} 16^{\prime} \mathrm{W}$. (к.) 15, A bay and cape, Nova Scotia, N.E. coast, opposite Cape Breton. The bay is about 20 m . wide at the entrance, and,
where it penetrates furthest into the land, about 18 m. in length from Cape St. George. The latter forms the W. entrance to the bay, and is in lat. $45^{\circ} 52^{\prime} \mathrm{N}$.; lon. $61^{\circ} 52^{\prime} \mathrm{W}$. (к.)

GEORGE (St.), Towns Forts, \&c.-1, A tn. on the E. side of St. George island, one of the Bermudas, on a gentle declivity which fronts the harbour, containing about 500 houses, built of freestone. Pop. 2800.-2, A tn. and fort, E. coast, Brazil; lat. $14^{\circ} 49^{\prime} 24^{\prime \prime}$ S.; lon. $39^{\circ} 1^{\prime}$ W. (r.)-3, A tu. W. Indies, isl. Grenada, S. W. coast. It stands on uneven ground, and some of its streets are very steep; but it is handsomely built, and divided into two parts, one being called Bay Town, and the other the Carenage. At the back of the town the mountains rise to a great height. The harbour is one of the best in the W. Indies. The fort is in lat. $12^{\circ} 2^{\prime} 54^{\prime \prime} \mathrm{N}$. ; lon. $61^{\circ} 48^{\prime}$ W. (r.) - 4, A vil. and com. Belgium, prov. Liége, 10 m. N.E. Huy, with enal and alum mines, four breweries, and three flour mills. Pop. 3831.

GEORGE D'ELMINA (St). See Elmina.
GEORGE (Fort). See Gambia.
GEORGEHAM, par. Eng. Devon; 4950 ac. Pop. 923.
GEORGEN (St.), several places, Austria, particularly: -1, A vil. Upper Austria, near lake Aller, 29 m. S. W. Wels, with a parish church. Pop. 1100.-2, A market tn. Styria, circle, and 15 m. S.E. Grätz, on the Stifing, with a parish clurch, eastle, and poorhouse, and two annual fairs. P. 924.

GEORGENBERG, or Szombathely [Latin, Mons Sancti Georgii], a tn. Hungary, co. Zips, 1. bank, Popper, 7 m. S.W. Kesmarck. It is built of stone, in a triangular form, on the side of a hill; has a Protestant and a R. Catholic parish church, and a normal school; a distillery, a brewery, a weekly market, and four annual fairs. Much very fine yarn is handspun. Pop. 1000.

GEORGENTHAL, a tn. Bohemia, circle, Leitmeritz, at the foot of the Kreutzberg, 55 m . N. Prague. It is the seat of a court of justice, contains a parish church and townhouse, and has manufactures of chintz and calico, some general trade, and four annual fairs. Pop. 1703.

GEORGETOWN [under the Dutch, Stabroek], the capital city of British Guiana, and of co. Demerara, r. bank, and at the mouth of the Demerara river; lat. $6^{\circ} 49^{\prime} 24^{\prime \prime}$ N. ; lon. $58^{\circ} 11^{\prime} 30^{\prime \prime}$ W. (R.) It is built with Dutch regularity, the streets broad and intersecting at right angles, mostly with canals in the middle, communicating with each other and with the river, and crossed by a multitude of bridges. The houses, of wood, and mostly two or three stories high, are built in straight lines, and, as a security against damp, are raised three or four feet from the ground on hardwood posts ; many of them have gardens attached, and the luxuriant foliage embowering the houses adds greatly to the pleasing aspect of the city. Water Strect, which faces the river, is wholly occupied by merchants, whose warehouses and wharfs jut out into the stream. This is the only street exclusively inhabited by Europeans. The streets are kept remarkably clean, and pigs found wandering in them are seized by, and become the property of, the strcet clcancrs; between whom, and the original proprietors, frequent and sometimes most amusing squabbles take place. Hundreds of negroes often congregate and take part in such contentions; and what between their jabbering and struggling, and the equally melodious sounds emitted by the unlucky cause of the hubbub, who is generally hamstrung and killed in the strife, scenes take place that would defy the pencil of a Wilkie or a Breughel. The principal buildings in the city are the townhall, with the government offices, an imposing stone edifice, in a pure style; the episcopal cathedral, also of stone, and the colonial hospital. Besides these, there are also a second Episcopal church, built of wood; a neat Scotch church, a R. catholic, and eight other chapels, belonging to Wesleyans, Baptists, the London Missionary Society, \&c.; numerous schools, under the guidance of the various religious communities; a mariners' hospital, a lunatic asylum, two theatres, and horse-races twice a-year. The market-place, adjoining the townhall, is open, airy, and surrounded by elegant shops, well supplied with all kinds of provisions, fish, flesh, and fowl. Adjoining, and built over the river, is the slaughterhouse, where all cattle must be killed and cleaned. All offal and useless remnants are thrown into the stream, where they are immediately snapped up by sharks and other voracious fish, who watch the slaughterliouse in countless numbers. Woc to any one who

## GEORGIA

here falls into the water; he is irrecoverably lost, being instantaneously devoured. At the mouth of the river is Fort Fre-derick-William; connected with it are excellent barracks and military hospital, and near it is a fine lighthouse. Georgetown, from its low, swampy position, is unhealthy; the principal diseases are yellow and intermittent fever, dyscntery, diarrhea, and dropsy. Anchorage good in 17 ft . water; but at the river mouth is a bar, on which there is only 15 ft . water; exports sugar, rum, and coffee. Pop. (1848), 23,000, of whom 19,000 were negroes and people of colour; (1851), 25,508 .

GEORGETOWN, several places, U. States, includ-ing:-1, A eity and port of entry, Columbia district, 1. bank, Potomae, 2 m .W.Washington, with which it communicates by two bridges, across Rock ereek. It is pleasantly situated, and contains many handsome buildings, comprising a market house, four banks, seven ehurehes, a R. Catholic college, and a numnery, with female seminary attached. Here are several commercial and commission houses, lumber yards, tanneries, and mills. The Chesapeake and Ohio canal commences here. Pop. (1850), 8366.-2, A vil. and port of entry, S. Carolina, on W. side of Winyaw Bay, 107 m . E.S.E. Columbia. It contains a courthouse, jail, bank, four churches, and an academy. The harbour admits vessels of 11 ft . draught, and is the seat of a considerable trade ; tonn. 4415. Pop. 2500.-3, A vil. Kentucky, 17 m . E. Frankfort, on a tributary of the Kentucky. It contains a courthouse, jail, two churches, an academy, and a laptist college. Pop. 1511.-4, A vil. Ohio, 84 m. S.s.W. Columbus. It has a conrthouse, jail, four churches, two tanneries. a brewery, and several stores. Pop. 600.

GEORGETOWN.-1, A tn. Van Diemen's Land, N. eoast, E. shore, estuary of the Tamar, about 3 m . from its junetion with Bass' Strait; lat. $41^{\circ} 6^{\prime} 18^{\prime \prime} \mathrm{S}$.; lon. $146^{\circ} 50^{\prime} 15^{\prime \prime}$ E. (r.)- 2, A tn., isl. Pulo Penang, or Prinee of Wales, 1sland, Malaeca Strait; lat. $5^{\circ} 25^{\prime} 6^{\prime \prime}$ N.; lon. $100^{\circ} 19^{\prime} 45^{\prime \prime}$ E.(R.)

GEORGIA [Russian, Grusia; Persian, Gurdschistan; native, Iberia], a country, Asia, situated near the centre of the Russian possessions, on the $S$. side of the Caucasian range, and now included in the Russian gov. Tiflis (which see). It is bounded, N. by the Caucasus; E. by the Persian prov. Sehirwan, now ceded to Russia; S. by an Armenian range, which separates the basin of the Kur from that of the Aras; and W. by a branch of the Caucasus, forming part of the watershed between the Caspian and the Black Seas. The name is sometimes employed to designate the whole territory possessed or elaimed by the Russians S. of the Caucasus. In this large sense it may have an area of 28,800 geo. sq. m.; but when more correctly confined to Georgia proper, the area does not exceed $12,800 \mathrm{geo} . \mathrm{sq} . \mathrm{m}$. The surface is generally mountainous ; monntain-ranges, as already described, surrounding it on the N.W. and E., and scending out numerous ramifieations; but the central part of it is occupied by a large and fertile valley, in which the Kur flows from W. to E., and receives almost all its drainage. The soil, generally in the lower gromnds, and more especially in this valley, is of great fertility; and having the advantage of a delightful climate, grows in abundance, not only all the ordinary cereals, and maize, hemp, and flax, but great quantities of wine and cotton, and unlimited supplies of the most exquisite fruit. The culture, however, is very imperfeet; and though important improvements have taken place since the Russians acquired possession of the country from Persia, in 1800, it has not yet reeovered from the disasters brought upon it by ages of misrule and almost incessant warfare. The natives, forming about three-fourths of the whole population, belong to the Caucasian race, and have been as nuch celebrated as the Circassians for the athletic frames of the men, and the beauty of the women. These properties have created a large demand for both sexes-the males to serve in the armies, and the females to become inmates of the harcms of the Turks. The nobles long derived their chief revenue from this inhuman traffie, valuing their serfs only for the money which they could obtain for them in the Turkish markets. It is said that great numbers of the celebrated Mamelakes were Georgians. Under the Russian severeignty this traffic has ceased; and the distinction which dividet the whole population into the classes of nobles and serfs, nearly equivalent to those of masters and slaves, though still subsisting, has been greatly modified. The power of life and death, which the nobles claimed,

Vol.. 1 .
and made no scruple of exercising, has been expressly abolished. The Georgians belong nominally to the Greek chureh; but both elergy and people are generally ignorant. The Bible, however, was translated into their native language, a

georgians of the heights of tiflis.
From Belanger, Voyage aux Indes Orientales.
peculiar dialect, greatly resembling the Armenian, as early as the beginning of the 5th century; and the benefits, though hitherto not very apparent, promise to be greatly extended, by means of a printing-press which the Russians have established. Capital, Tiflis. Pop. Georgia proper, about 300,000 .

GEORGIA, one of the Southern U. States, N. America, bonnded, N. by Tennessee and N. Carolina, E. by N. Carolina and the Atlantic, S. by Florida, and W. by Alabama; between lat. $30^{\circ} 30^{\prime}$ and $35^{\circ} \mathrm{N}$., and lon. $80^{\circ} 50^{\prime}$ and $85^{\circ} 50^{\prime} \mathrm{W}$. Length, N. to $\mathrm{S} ., 300 \mathrm{~m} . ;$ breadth, 240 m. ; area, $58,000 \mathrm{sq} . \mathrm{m}$. The coast is bordered by a chain of islands, the principal of which are Tybee, Ossabaw, St.Callerine's, Sapelo, St. Simon's, and Cumberland; consisting of salt marsh and of a rieh gray soil, on which the famous sea-island cotton is raised; and separated from each other by rivers, creeks, and inlets, forming a navigable communication capable of admitting vessels of 100 tons. The surface of the mainland is low and level for 50 or 60 m . inland, the first 4 or 5 m . from the coast being oceupied by a salt marsh, suceeeded by a belt of land similar to that of the islands. Beyond that commence the pine barrens, extending from 60 to about 90 m . from the coast, and interspersed with numerous inland swamps on the margin of the creeks and rivers, which are partially or totally overflowed by the return of the tide, and constitute the rice plantations. Beyond this region commences the country of sand-hills, 30 or 40 m . wide, interspersed with fertile tracts, and extending to the lower falls of the rivers; beyond which is the traet called the Upper Country, having generally a strong' and fertile soil. In the $N$. and $\mathbf{W}$. the surface rises into the Appalaehian mountain chain, which rises here, in some places, 1500 ft . high. With the exception of some streams in the N. part of the state, which flow W. into Alabama, all tho rivers of (leorgia flow in a S . or S.E. direction, but chiefly the latter. The principal rivers are the Chattahooehee, whieh also forms the greater part of the W. boundary, and flows, under the name of the Apalachicola, into the Gult of Mexico, and is navigable for steamers for 300 m .; the Savannah, navigable for steamers, part of the year, for 250 m .; and the Alatamaha and its afluents, navigable for vessels of 30 tons 300 m . up from the Atlantic, into which both it and the Savannah fall. The chmate is generally mild, and snow is of extremely rare oceurrence; but in the low country it is unhealthy in July, August, and September. Cotton and rice are the staple productions; but tobacco, Indian corn, wheat, and other cereals, are cultivated with suceess; as are also oranges, melons, figs, grapes, and a variety of tropical and

## GERASA

other fruits. Copper and iron are found, and in the N. part of the state gold in considerable quantities. There are numbers of tanneries, flour-mills, distilleries, and other works in the state; but the manufactures are not yet of great importance. Cotton and rice are the principal articles of export, and the imports consist chiefly of manufactured goods. Value of exports (1850), £1,573,321; do. of imports, $£ 132,700$. In this state are two canals-the Savannah and Ogeeche Canal, and the Brunswick Canal, 16 and 12 m . respectively; and there are also 565 m . of railway. The means of education are provided by the university of Georgia, with its different branches, and by a great number of academies and prinary schools. There are different religious denominations; but the Baptists, Methodists, and Presbyterians are the most numerous.

The state is divided into 93 counties. According to the present constitution, which was adopted in 1798 , the governor is elected by the people, and remains in office two years. One senator is elected for each county, and the representatives are proportioned to the population; but each county is entitled to at least one. The right of suffrage is enjoyed by every free white male, who has resided within any particular county six months preceding the election, and has paid taxes in the state for the year previous. Milledgeville is the seat of the legislature; and the other principal towns are Augusta and Savannah. Public revenue (1851), $£ 62,500$; expenditure, $£ 60,416$; debt, $£ 380,931$.

Georgia was so named in 1753 , in honour of George II. It suffered much, in the early periods of its settlement, from wars with the Spaniards in Florida. It was taken by the British in the revolutionary war of 1778 , and evacuated in 1782. In convention, it adopted the constitution of the U . States, by a unanimons vote, in 1788 . Pop. (1840), 691,392, of which number 280,944 were slaves; (1850), 888,726 , of which number 349,208 were slaves.

GEORGIA.-1, An isl., S . Pacific Ocean, one of the Solomon group; lat. (S. point) $8^{\circ} 53^{\prime}$ S.; lon. $158^{\circ} 14^{\prime}$ E.$2,($ New $)$, a name formerly given to the N.W. coast of America, between the mouth of the Colombia and lat. $49^{\circ} 20^{\prime} \mathrm{N}$.3, (West), a name given to the N.W. coast, part of the Russian possessions in N. America, facing the Icy Sea N. of the Arctic circle.-4, (New South), a part of the Antartic regions S. of S. America, now called New S. Shetland.

GEORGIA (Gulf of), an inlet on the N.W. coast of America, which separates Vancouver Island from the mainland of British Oregon. It has about 20 m . average breadth, and communicates with the Pacific, in the N., by Queen Charlutte Sound; and in the S.W by the strait of Juan de Fuca.

GEORGIA (Soutr), an isl., S. Atlantic; lat. (N. point), $53^{\circ} 57^{\prime}$ S.; lon. $38^{\circ} 13^{\prime}$ W. (в.) It is 90 m . long, and has considerable breadth ; possesses a number of bays and harbours, which are encumbered with ice during a great part of the year, and when they can be approached are rendered dangerous by icebergs. The coasts are high and rocky, and the interior of the island consists of high mountains, covered with snow ; and valleys, which in summer, when the snow melts, present a vigorous vegetation. The coasts abound with seals, and seafowl of various kinds are numerous.

GEORGIEVSK, a small tn. Russia, prov. Caucasus; lat. $44^{\circ} 0^{\prime}$ N.; lon. $42^{\circ} 55^{\prime} \mathrm{E}$; on a steep height near l. bank, Podkoumka. It is regularly built, and contains a government house, one Greek and one Armenian chureh, six hospitals, a lazaretto, and several granaries. The inhabitants are composed principally of Cossacks of the Volga, who are engaged in agricultural pursuits; and Russians and Armenians. The environs are picturesque, and the air pure. Pop. (1849). 3551.

GEORGSW ALDE, two nearly contiguons places, Bohemia :-1, (Alt-), A th. and lordship, circle, Leitmeritz, on the frontiers of Saxony, 55 m . N. Prague. It contains a Landsome parish church, with a painting by Kindermann; a

the little theatre gerasa.-From Laborie, Voyage en Orient.
poorhouse, and a bathing establishment; and has mannfactures of linen, three mills, a weekly market, and two annual fairs. Pop. $4550-2$, (New-), A vil. near the former. P. 690.

GEPPERSDORF, two places, Austria:-1, A vil. Moravia, circle Olmïtz; with a parish chureh, school, distillery, brewery, an oil and a flour-mill. Pop. 736.-2, A vil. and lordship, Austrian Silesia, circle Troppau, near the fronticr of Prussia. Pop. 1340.

GERA, a tn. Germany, principality, Renss-I.obensteinEbersdorf, cap. lordship of same name, in a beautiful valley, r. bank, Elster, here crossed by two wooden bridges, 35 m . S.S.W. Leipzig. It consists of the town proper, surrounded by walls, and of two suburbs; and is well and regularly built, most of the houses being of modern construction, in consequence of a fire in 1780 , by which the greater part of the town was consumed. It is the seat of several courts of law and public offices; contains two churches, a townhouse, gymnasium, observatory, government buildings, theatre, workhouse, lunatic asylum, orphan hospital, and old castle, now used as a prison; and has manufactures of woollen, cotton, and linen, mixed silk, and other goods, camlet, musical instruments, fire-engines, carriages, pipes, porcelain, and stone ware, hats, tobacco, and leather, several mills, a considerable general and transit trade, and a bathing establishment. Pop. town, 11,255 ; lordship, area 72 geo. sq. m., 24,000 .

GERA, a river, Germany, which rises at the foot of the Schneekopf, on the E. slope of the Thüringer-Wald, duchy of Saxe-Coburg, flows S. past the towns of Plaue, Arnstadt, and Ichterhausen, to the town of Erfurt, where it forms two branches-the Wilde-Gera and the Sehmale-Gera, which shortly after joins r. bank, Unstrut. Total course, about 45 m .

GERACE [Latin, Hieraca], a tn. Naples, prov. Calabria Ultra, 36 m. E.N.E. Reggio, on a hill. The streets are narrow and dirty, and though there are some good houses, the town has altogether a mean and miserable appearance. It contains a cathedral, once a handsome structure, now in ruins; nine parish churches, several convents, a seminary, and an hospital. It has some trade in wine, and has two yearly fairs. The town was almost wholly destroyed by an earthquake in 1783. It stands on or near the site of the ancient Locri Epizephyrii, of which some interesting ruins still remain, including those of an aqueduct. Pop. between 3000 and 4000 .

GERACI, a vil. and com. Sicily, prov. Palermo, dist. and 17 m. S.S.E. Cefalu. Pop. 3364.

GÉRARDMER, or GErome, a tn. France, dep. Vosges, 15 m. S. St. Dié. It has a parish chureh ; manufactures Burgundy pitch, linens, cottons, delft and wooden ware. P. 1597.

GERASA, Jerash, or Djerash, a ruined city, Syria, in ancient Decapolis, pash. and 80 m . S.S.W. Damascus, on the opposite slopes of two hills, which rise from either side of the

Keruan, 2000 ft . above the level of the sea; lat. $37^{\circ} 16^{\prime} 30^{\prime \prime} \mathrm{N}$.; lon. $36^{\circ} 3^{\prime} \mathbf{E}$. The ruins of this city, which have been compared to those of Baalbec and Palmyra, attest its ancient magnificence. The most interesting of these remains extend
along the r. bank of the stream, N.E. to S.W. At the latter extremity are a magnificent triumphal areli of the Corinthian order, a naumachia, a theatre, and a small temple, with a spacious semicircular colonnade of the Ionic order, from which a street, with a range of columns on eael side, traverses the whole length of the city. This street is erossed at right angles by three parallel streets, on either of which are the remains of interesting and magnifieent buildings, including a fine Corinthian temple, with a double row of columns in front, and a single row along the other three sides. Beyond the $N$. wall, which is a mile from the $S$. entranee, is an extensive neeropolis, with numerous finely-executed sarcophagi. Gerasa was built by the Romans after their conquests in the E.; takell by storm by Alexander Jannaeus; burned by the Jews in their vengeance on the Syrians, for the massaere of their brethren at Cæsarea; taken by Annius, a general under Vespasian, who burned down what remained of it; and in 1122, its eastle was destroyed by Baldwin II. of Jerusalem.

GERBEVILLER, a tn. France, dep. Meurthe, 20 m. S.E. Nancy; with manufactures of woollen hosiery; tanneries, and extensive quarries of building stone. Pop. 2236.

GERBI, Gherba, or Jerba, an isl. Mediterranean, N. Africa, Karkinah group, gulf of Cabes, regeney of Tunis, from the mainland of whieh it is distant, easterly, about 18 m .; lat. $34^{\circ} 39^{\prime} \mathrm{N}$.; lon. $11^{\circ} 0^{\prime} \mathrm{E}$. It is abont 10 m . in length, and about 4 or $\overline{5} \mathrm{~m}$. in breadth; low, covered with date trees, and the shores abound with the lotus. Off the S. coast is a productive tumy fishery. The inhabitants are numerous and industrious; and manufacture linen and woollen fabrics, and shawls, which are exported chiefly to the coast of Barbary.

GERBIER-des-Joncs, a hill, France, dep. Ardeche, in an E. branelı of the N. Cevennes; lieight, 5264 ft .; and, with exception of Mount Mezene, the loftiest summit in this branch of the watershed, between the basins of the Rhone and Loire.

GERDAUEN, a tn. Prussia, prov. E. Prussia, gov. and 40 m. S.E. Königsberg, eap. eircle of same name, on the Omet. It is the seat of local courts and offices; has two churehes, two eastles, manufactures of woollen cloth and leather, tileworks, a trade in cattle, and four annual fairs. Pop. 2359. The circle, area 247 geo. sq. m., is well-wooded, well-watered, and of considerable fertility. ['op. 32,058.

GEREMOABO, a tı. Brazil, interior of prov. Bahia, com. Jacobina. It eontains a parish church, and a primary sehool. The greater part of the inhabitants are employed in agriculture and the rearing of eattle. Pop. of dist. 3000.

GERENZANO, a vil. and com. Austrian Italy, prov. and 15 m . N. W. Milan, in a fertile plain, where the mulberry is extensively cultivated. It contains a handsome parish and an auxiliary ehurel. Pop. 1430.

GERES, several places, IIungary:-1, (Kis-), A vil. co. Zemplin, about 15 m . from Ujhely. It contains a Protestant church. I'op. 1131.-2, ( $\operatorname{Nag} y-$ ), A vil. near the former. Pop. 799.-3, (or Greschen), A vil., co. Szolnok, in a wellwooded district 40 m . from Zilah. It contains a Protestant parish ehureh. Pop. 600.-4, A vil., eo. Szathmar, about 15 m . from Bagos; with a Protestant ehureh. Pop. 580.

GEREZ (Serra de), a mountain ehain, Portugal, forming a ramification of the mountains of Asturias, and situated between the basins of the Douro and the Minho, to the W. of Montalegre. It stretehes about 18 m . N. to S ., and is generally composed of a succession of lofty granite peaks. Its culminating point, the Murro de Burageiro, has a height of 4296 ft . Marshal Soult, in 1809, when retreating, led his army through a terrific gorge forming one of the passes in this chain.

GEREZE, two nearly contiguous vils. Inangary:-1, ( Kis - $)$, Thither Theiss, co. Ugocs, on the Turz, 8 m . from Halmi. It contains a R. Catholic and a Greek united chureh. There is a valuable coal mine in the vicinity. Pop. 1700.-2, (Nagy-), Near the former. It contains the parish church. Pop. 700 .

GERGAL, a tn. Spain, Andalusia, prov. of, and 23 m . N.N.W. Almeria, at the W. foot of the Sierra de Baza. It is indifferently built, has a large parish ehurch, a chapel, townhouse, prison, storehouse, and publie fonntain. Manu-tactures:-earthenware, glass, white wax, counterpanes, oil, \&e. Trade:-oil, wine, hardware, \&c. Pop. 4209.

GERGEI, a vil. isl. Sardinia, div. and 34 m . N. Cagliari, in a marsliy and unhealtliy hollow on the side of the hill of Giara. It contains a parish ehureh, built in the beginning of the 14 th century, and surmounted by a modern dome; five
minor elhurches, and a primary sehool ; has a trade in corn, and wine; and an annual fair. Pop. 2161.

GERINDOTE, a tn. Spain, New Castile, prov. and 16 m . N.W. Tolede. It consists of a few good houses, and a considerable number of earthen huts; contains a parish chureh, townhouse, and primary sehool ; and has manufactures of soap, several oil mills, and a trade in oil and corn. Pop. 1253.

GERINGSWALDE, a tn. Saxony, circle and 30 m . S.E. Leipzig, in a hilly, but well-wooded district on the Aubach, and a beautiful lake. It is an old place, has considerable manufaetures of woollen and linen cloth, and calico; several mills, a trade in eattle, and three annual fairs. In the neighbourhood are the ruins of two old eastles. Pop. 2318.

GERK, a vil. Austria, Selavonia, regimental dist. Peterwardein, on the Bossut, near its eonfluenec with the Save, about 6 m . from Bacsincze. It contains a Greek non-united parish ehurch. Pop. 2810.

GERLACHSHEIM.-1, A market tn. Baden, cirele Lower Rhine, eap. bail. of same name, on the Tauber, 17 m . S.W. Würzburg. Pop. tn. 1120 ; bail., area 44 geo. sq. m., $12,852 .-2$, Mittcl, Nieder, and Ober-Gerlaehsheim, three contiguous vils. Prussia, prov. Silesia, gov, and W.S.W. from Liegnitz. They contain a parish eliureh, two castles, and several mills. Pop. 2233.

GERMA, or Garama, a tn. N. Africa, Fezzan, 50 m . N.N.W. Murzouk. It is surrounded by a wall and a diteh; houses for the most part of nudd, and in a ruinous eondition; inhabitants very poor. The vicinity abounds with date trees. The ruins of aneient Garama are distant about $1 \frac{1}{2} \mathrm{in}$.

GERMAIN (St.), numerons places, France, the most important are-1, (-Lembron), A tn., dep. Puy-de-Dôme, 6 m . S. Issoire, on the Couze; with mineral springs, four anninal fairs, and manufactures of animal chareoal. Pop. 2113.2, (-L'Herm), A tn., dep. Puy-de-Dôme, 12 m. S.W. Ambert, on the Doulon, in an arid district; with manufactures of lace, worsted mills ; and six annual fairs. Pop. 1009.

GERMAiN-en-Laye (St.), [Latin, Ledia Germani], a tn. France, dep. Seine-et-Oise, 6 m . N. Versailles, on a height above the Seine, and on the railway to Paris. It is well built, and eonsists of three public squares, and of several wide and well paved, but irregular streets. The only publie building deserving of notice is the eastle, built in the form of an irregular pentagon, erowned with a balustrade, flanked at its angles by five large pavilions, surrounded by a wide ditch, and bordered by a magnificent terrace, which commands an extensive view, and slopes down to the Seine. This eastle is of eonsiderable historical interest. Within it, or the alljoining edifices, which time and revolutionary violence have destroyed, were born the French kings Henry II., Charles IX., and Louis XIV., and the two celebrated danghters of Francis 1.Madelaine, better known as a short-lived Scottish queen, the wife of James V.; and Margaret of Valois, distinguished throughout Europe by her own talents, and the generous proteetion she afforded to literary men. Within this eastle, too, James II., after his bigotry had driven him from England, long kept up the mimiery of a court, and was used as a paltry tool for the ambitious or vindietive purposes of Lonis XIV. The forest of Germain, one of the finest in France, ineludes, within the walls whieh surround it, an area of above 10,00 ; aeres, and is made perfectly aceessible throughout by the fine roads which traverse it in all direetions, and have an aggregate length of nearly 1000 m . The manufactures of the town consist of cotton, hosiery, and hair-cloth. There are also numerous tanneries; a fair is held in the vieinity within the forest, which lasts three days, and attraets vast erowds from Paris and the surrounding listricts; and a large weekly market, at which from 90,000 to 100,000 swine are annually sold. Pop. 11,321.

GERMAN, par. Isle of Man. Pop. 4029.
GERMAN OCEAN. Sce North Sea.
GERMAN (SAN), a tn., isl. Porto Lieo, Spanish W. Indies, near the west coast. In the vicinity, coffee and cotton are produced, and cattle are reared in considerable numbers. Pop. 9125.

GERMANO (SAx).-1, A tn. Naples, prov. Terra-diLavoro, r. bank, Rapido, at the foot of Mont Cassin, 33 m . N.W. Capua; defended by a fort. It was taken by the Spaniards in 1730, and here Murat was ilefeated by the Austrians, on the 16th Mareh, 1815. Pop. 4000.-2, A tn.

Sardinian States, 33 m . N.E. Turin ; with a church and a convent. Pop. 2600.

GERMAN'S (Sr.), a bor. market tn. and par. England, co. Cornwall, $8 \mathrm{~m} . \mathrm{W}$. by N. Plymouth, on the St. German's creek, formed by the rivers Tidi and Lynher; once the episcopal see of the bishopric of Cornwall. It has a charch, the remains of an old cathedral, with a very handsome entrance doorway, a Methodist chapel, a free, and 13 daily schools, several almshouses, and a farmers' club. Inhabitants chiefly engaged in agriculture, and also in taking coals and timber to the mines at Menheniot, and fetching back the ore, great quantities of which are shipped herc. Area of par. 1050 ac. Pop. 2843.

GERMANSWEEK, or Week-St.-Germans, par. Eng. Devon; 1570 ac. Pop. 414.

GERMANTOWN, several places, U. States, comprising -1, A tn. Pennsylvania, 6 m. N.W. Philadelphia. It contains 10 churches, four academies, and 21 schools; and has a considerable trade. It was founded by German Quakers, Oct. 1777; the British here defeated the American provincials. Pop. 5482.-2, A vil. Ohio, situated in a beautiful valley, 82 m. W. Columbus. It contains four churches, two tan neries, a brewery, and a printing-office. Pop. 1200.

GERMANY [Latin, Germania; German, Deutschland; French, Allemagne; Spanish Allemania], the name given to a very large portion of Central Europe, not forming a single sovereignty, but composed of a great number of independent states, and parts of states, united together by a common league, called the Germanic Confederation [German-Deutsches Bund.] It lies between lat. $45^{\circ}$ and $55^{\circ} \mathrm{N}$.; lon. $5^{\circ} 50^{\prime}$ and $19^{\circ} 20^{\prime}$ E.; and is bounded N. by the North Sea, Denmark, and the Baltic ; E. by W. Prussia, with the duchy of Posen, Poland, Galicia, and Hungary; S. by the Adriatic Sea and Austrian Italy; S.W. by Switzerland ; and W. by France, Belgium, and Holland; greatest length, N. to S., 695 m ; greatest breadth, E. to W., 638 m . ; area, 185,440 geo. sq. m. It is obvious that the contour of Germany is not defined either by political or natural boundaries-not by political boundaries, because several of its more important states have large possessions which are not included in it; and not by natural boundaries, because, though partially washed by three seas, the North Sea, Baltic, and Adriatic, and barred in on different directions by lofty mountains, its frontiers generally are only marked by imaginary lines. The following table gives the name, area, and population of the different States which compose the Confederation.

States of the German Confederation, their Area, Population, Contivgent to the Federal Army, and the Number of their Votes in the Diet.
** The States marked with a * belong eitlier in whole, or in part, to the Zollvebein or Cuatoms' League.

* The vote belonging to the exfinct line of Saxe-Gotha is given by the three existing Gotha lines, making a total of 69 votes.

As each State is described under its own name, the description here given is necessarily confined to a few leading features, which belong to Germany considered as a whole.

Physical Features. - These are greatly diversified, and present such an irregular succession of mountains and valleys, table-land and plains, as makes it extremely difficult to arrange them for the purpose of a distinct general description. The whole country seems, however, to admit of being divided into four distinct parts - a S. mountain region, a central plateau, a central mountain region, and a N. plain. The S. mountain region is covered by the Alps, which, entering Germany on the S.E. of Switzerland, proceed E. through the Tyrol, throw off one large branch, which descends S. through Illyria to the Adriatie, and continues E. with the other main branch till it becomes linked with the chain of the W. Carpathians. The central mountain region, of much less elevation than the former, since it nowhere attains the limit of perpetual snow, and does not in average height exceed 5000 ft ., is much more complicated, consisting of a great number of separate ranges, which ramify in all directions, and become so interlaced with each other, that the limits assigned to them are in many instances arbitrary. The only range which has any title to be consilered as a common centre, is the Fichtelgebirge, continued E. by the Erzgebirge and the Riesengebirge, S.E. by the Bölımerwald, W. by the Thüringerwald, Rhöngebirge, and Spessart, and earried to its N. limit in the IIarz. The W. boundary of the central mountain region is formed ehiefly by the Schwarzwald and Odenwald. Between, or rather enclosed by, the ranges of the two great mountain regions now referred to, lies the central plateau of Germany, covering a space of about 60,000 geo. sq. m. Neither in extent nor in elevation can it be compared to the great plateaux of the African and Asiatic continents, though in miniature it bears a considerable resemblance to them. Its average height above the sea-level is from 1400 to 1500 ft .; and its surface, by no means uniform, is both broken by hills and intersected by valleys, within which important rivers pursue their course. To the N . of the central mountain region is the great plain, which extends without interruption to the German Ocean and the Baltic, and flattens down so much when it approaches them, as in many places to require artificial protection from their waves. Its length, W. to E., may be about 550 m . ; and its average breadth 200 m . To all appearance it has once been eovered by the sea, alluvial deposits of great depth being spread over almost every part of its surface, and generally with so large a proportion of sand as to make it for the most part naturally unfertile.

Minerals.-Germany possesses numerous and varied mineral riches. Gold is found in Austria and Baden; silver in Saxony and Hanover ; copper, iron, tin, rock-salt, and alum, in Prussia and Austria; lead and litharge in Hanover and Austria; manganese in Saxony and Austria; cobalt in Saxony and Prussia; antimony and bismuth in Austria; arsenic in Prussia and Saxony; mercury in Austria and Bavaria; and sulphur in Saxony and Austria. Coal, marble, alabaster, kaolin, calamine, molybdenum, cinnabar, lime, asbestos, slates, millstones, freestone, trass, and sundry precious stones-as amethysts, garnets, \&c.-are also found in various localities. Germany is likewise extremely rich in mineral waters, including chalybeate, sulphureous, alkaline, saline, and warm, of all kinds; but most in the S . portion of the country.

Rivers.-Germany is remarkably well watered. Its central mountain region and plateau forms part of the great water-shed of Europe, and either gives rise to more than one of its most important rivers, or sends them their principal affluents. Thus the Danube, rising near its W. extremity, proceeds across it in an E. direction, and does not quit it till it reaches the confines of Hungary, and has itself not only become a large navigable river, but been augmented by important navigable tributaries. The Rhine, in like manner, though it neither rises nor terminates within Germany, flows within it for more than a half of its course, and forms its boundary for more than a half of the remainder. After these come the Elbe, strictly speaking, the greatest river of Germany, inasmuch as its whole basin lies within it; the Oder, Weser, Main, Neckar, Mosel, Ems, and Eider-all of which are navigable.

Climate, Vegetation, and Zoology.-Though Germany extends over $10^{\circ}$ of latitude, its mean annual temperature is
remarkably uniform, excepting the limited district $S$. of the Alps; the mean annual temperature at Tricste being $58^{\circ}$. Exeluding this district, the mean annual difference does not exceed $5^{\circ}$, the range being between $45^{\circ}$ and $50^{\circ}$. This uniformity is evidently owing mainly to the different elevations of the surface, the low plains of the N . having a ligher, while the hills and plateaux of the $S$. have a lower temperature, than their latitudes might seem to indicate. The climate, however, is more continental than insular, and hence the range of the thermometer is very considerable; and delicate plants, which grow vigorously, and receive their full supply of heat in summer, often perish by the keen frosts of winter. Both the Rhine at Mannheim, and the Danube at Vienna, usually receive a coating of ice. The mildest climate is enjoyed by the valleys of the Rhine and the Main, where both the almond and chestnut are matured. The cultivation of the vine is general S. of $51^{\circ}$ of latitude, but N . of that latitude it ceases to be profitable. With exception of the loftier mountain districts, where the surface is fit only for pasture, (and often where even that fails, richer treasures are found beneath it,) the growth of all the ordinary cereals is universal, and in some parts to such an extent as to leave a large surplus for export. Potatoes, hemp, and flax, also form most important crops, and in many parts tobacco and hops are cultivated on an extensive scale. The forests are of great extent, particularly in the mountain districts, as indicated by their names of Sehwarzwald [Black forest], Böhmerwald [Bohemian forest], Thitringerwald [Thuringian forest], \&c. They abound in all the finest trees of the temperate zone, and furnish timber which cannot be surpassed. The central plateau is more sparingly wooded, but the E. part of the N. plain has extensive tracts of oaks and beeches along the shores of the Baltic, and of pine, with a considerable intermixture of birch in the interior. Among domestic animals, the horned cattle of the districts along the North Sea and the Baltic, the sheep of Saxony, Silesia, Bohemia, and Moravia, and the swine of Westphalia, have long been famous. The horse, the noblest of all, appears to be much neglected. Game is very abundant, and includes, in addition to the smaller kinds, the boar and the wolf. Fish are very numerous, both in the rivers and lakes, but do not include many of the finer varieties.
Manufactures.-The long European peace greatly favoured the manufactures of Germany, as well as of other countrics. Linens are made in every part of Germany, but more especially in Westphalia, Silesia, Bohemia, and Saxony; woollens in the Prussian provinces of the Rhine, Saxony, Brandenburg, and Silesia, in the kingdom of Saxony, in Moravia, and Bohemia; cottons, which have increased in a remarkable degree, in the Prussian provinces noted above, in Saxony, and Upper and Lower Anstria; silk, in Lower Austria and the Rhine provinces, where even the Lyons fabries are equalled. The manufactures of leather, of metals, porcelain, glass, wax, tobacce, fancy flowers, straw hats, musical instruments, watches, clocks, wooden wares, including toys, \&c., are likewise important; and breweries and distilleries are to be met with everywhere.

Railways. -The railway system has made considerable progress in Germany ; and now extends in a connected series (forming in the N . part of the country a close net-work) from the Baltic to the Alps, and from the North Sea to Vienna, and close upon the Adriatic at Trieste. From Hamburg Vienna may be reached by lines passing either through Berlin and Breslau, or through Dresden and Prague; and Switzerland may be reached either by lines passing through Hanover and Frankfurt, or through Leipzig and Nürnberg. To the W. the German lines connect with the Belgian and French, to the N. with the Danish, and to the E. with the Russian and IHungarian; so that a traveller starting from Paris, or from the coast terminus of any of the French or Belgian lines at Havre, Boulogne, Calais, Ostend, Antwerp, \&c., may pursue his journey by railway to any of the more important towns of N. and central Germany, or even to Cracow and Warsaw, to Vienna and Pesth; and in a short time he will also be able to reaeh the Adriatic at Triestc.
People.- The inhabitants of Germany belong to two principal stocks-Teutonic or Germans proper, and Slaves. The latter, who originally entered Germany from the E., are found chiefly in Moravia, Bohemia, some of the alpine valleys of Styria and Illyria, on the N. slopes of Upper Silesia, and along the shores
of Pomerania; though of one stock, they are known in different districts by different names; as Czechs, Wends, Slowak3, \&c. The former stock, to which the great body of the population belong, are spread over the whole of the N., W., and S. The proportion between the two stocks is about 1 to $6 \frac{1}{2}$. In addition to them, Italians prevail on the S. side of the Alps, in Tyrol, Friuli, and Istria; and Erench in the Rhenish provinces on the W. bank of the Rhine. The Greeks, Armenians, and Jews, scarcely require to be particularized. In respect of the religion, the Germans are chiefly divided between the R. Catholic and Protestant churches. The following table will give a general idea of the proportion in numbers the various races bear to each other; and also of their distribution according to their religious belief :-

| Nationalities. |  | Religion. |  |
| :---: | :---: | :---: | :---: |
| Gcrman. <br> Slaves... | 5,586,000 | R. Catholic.... Protestant.... | 15,000 |
| French and Walloons | 300,000 | Jews. | 346,000 |
| Jews. | 318,000 | Greeks............ ........ | ¢,000 |
| Italians. | 210,000 | Armenian..... ........... | 500 |
| Greeks and Armenians | 5,500 | Gypsies............. ...... | 00 |
| Gypsies. | 500 |  |  |

Language.-The language of the Slaves includes several dialects; of which the most marked are those of Bohemia and Moravia, and that which is spoken in Silesia, and is identical with Polish. The German language, an offset of the Gothic, in like manner includes a great number of dialects ; which, however, admit of being reduced to the two great classes of High German (Hoch-Deutsch), and Low German (Platt-Deutsch). The Low German is the vernacular of the lower orders, and presents itself under a great variety of modifications, as Alemannic in Switzerland, Swabian in the Schwarzwald and the greater part of Würtemberg, Bavarian on the Bavarian plateau, \&c. High German is the spoken language of the great majority of the educated classes, an 1 in fact the only proper German language, because the only one which is written and printed. This distinction it owes, not so much perhaps to its intrinsic superiority over Low German, as to the accidental circumstance of Lather having published his translation of the Bible in it-a fact equally honourable to the Reformer and to the Reformation; to the Reformer, as indicating the consummate ability with which he had performed his task; and to the Reformation, as proving the intellectual superiority of those who espoused it, and the close connection which it established between religious freedom and literary progress. This language, from its peculiar structure, is admirably fitted for a concise, scientific style; and yet, from its great flexibility and full open vowel sounds, its richness in words, its wondrous capacity for variations and combinations, and the power it possesses of expressing with clearness and precision the minutest shades of meaning, it is equally powerful in conveying to the mind the most exuberant imagery and fanciful creations of the poet, and the profoundest ideas of the mental philosopher. The German is rich in standard works in every branch of knowledge and art; and when its writers fail, it is not so much by lagging behind the spirit of the age, as by attempting to outstrip it, and thercby bewildering themselves and their readers in a vague and inysterious transcendentalism.

Constitution.-The characteristic feature in the political institutions of Germany, is the number and varicty of the sovereignties into which it is divided. No fewer than 38 states exercise sovercign rights, and the modes in which they exercise them are of the most heterogeneous description; some claiming powers which border on despotism, others presenting themselves under the form of constitutional monarchies, in which the popular principle is more or less largely developed; and others, both bearing the name, and occasionally, though not always, performing the part of free towns or republics. Notwithstanding community of language, bodies so constituted have no natural bond of union; and hence, against any formidable aggressor, who may be permitted to attack them in detail, they are almost powerless. The necessity of a common head, under which all the forces of these heierogeneous bodies might be concentrated, and made available for the common defence, was felt at a very early period; and Germany was no sooner restored to nominal independence, by the dissolution of the empire of Charlemagne, than recourse was had to an elective monarchy; according to which, what were called the Electoral States, while retaining their individual
independence, made choice for life of an emperor, to whom they swore allegiance, binding themselves to him and to each other in an indissoluble league, offensive and defensive. This elective monarchy, established in the 9th century, underwent many modifications, but was continued by a regular succession of emperors till the begining of the 19 th century, when it was brought to a termination in the person of Francis II., who renounced the name of Emperor of Germany for that of Emperor of Austria. This change was one of the results of the victories of Bonaparte. Dissolving the old German empire, he formed another under the specions name of the Confederation of the Rhine, and dcclared himself its protector. In this character he promised to maintain its integrity, but the kind of protection meant was soon explained, when, in 1810, he issued his fiat, simply declaring that all the countrics between the mouths of the Scheldt and the Elbe were annexed to France. The effect of this decree was to extinguish several of the sovercignties which he had guaranteed, and deprive the Confederation of 8512 geo. sq. m. of territory, and $1,133,057$ subjects. His downfall, in 1813 , made new arrangements necessary; and accordingly, the Con gress of Vienna, in 1815 , established the Germanic Confcderation in the form in which it is exhibited in the Table given above, page 1076 .

Referring generally to that Table, it will here be necessary to enter into a brief explanation of the leading features of the Confederation. These are contained in the Act of Confederation signed and ratified June 8, 1815, and a De claration published May 15, 1820 . Its object is declared to be the maintenance of the security of Germany, internally and externally, and of the independence and integrity of its respective states. Its affairs are managed by a representative assembly, called a Diet [Bundes-Versaminlung], which meets in Frankfurt-on-the-Main, Austria presiding, and sits permanently, but has the power of adjournment. It acts cither as a General Assembly or Plenum, in which every state has one or more votes, according to rank, the whole number being 69; or in a Minor Assembly or committee, in which, as the whole number of votes is only 17, the larger states have no more than a single vote, and the inferior states only parts of a vote; several of them being grouped together so as to give single votes by delegates: thus, while 11 states have a vote cach, 27 states have only six joint votes. The initiative is vested in the Minor Assembly or committee, which arranges the business generally, and decides what matters are to be submitted to the Plenum; but no organic change can be made till sanctioned by the Plenum, and carried by a majority of at least two-thirds of its votes. In regard to peace and war, all the states must act federatively ; in other words, no individual state can negotiate with the enemy separately; and the contingent of men and money which each must contribute is fixed generally according to the population.

Recent History.-After the French revolution of Febrnary 1848, an attempt was made to replace the German Diet by a representative parliament, to meet at Frankfurt-on-the-Main. Such a body, composed of 500 representatives, did meet in Frankfurt, March 30th, and drew up a plan of representation; in accordance with which the first German National Assembly was elected, and met likewise in Frankfurt, May 18, 1848. This Assembly elected Archduke John of Anstria to be Lord Lieutenant or Regent [Reichsverweser] of this newly-constituted German empire. The same prince was, in like manner, elected Regent by the Diet, then also sitting in Frankfurt, and with this transaction the existence of the Diet may bs said to have, for the time being at least, virtually terminated. The newly-constituted Assembly proceeded to form a constitntion for the German empire, which, however, after being passed, was not recognized by several important states; dissensions ensued, and, on May 30, 1849, the Assembly resolved to transfer its place of meeting to Stuttgart. But this resolution not being acquicsced in by the government, it resolvel to remain in Frankfurt; while a large body of the members withdrew to Stuttgart, where the so-called German Parliament was summoned for June 6. This was the final deathblow to that Assembly, which at one time seemed destined to play so important a part in German history. Subsequently to this period, Prussia endeavoured to form a confederation [Bund] with herself at the head of it. This plan was opposed by sundry states, including Austria; which last, proceeding
to act on the old law of the Confederation, by which, since 1815, the Diet of German states has been annually assembled at Frankfurt, convoked the Diet for May 10, notwithstanding the remonstrances of Prussia. With exception of Prussia and Oldenburg, all the states obeyed this summons. Subsequently to this period, the pretensions of Prussia to form and head a separate confederation, nearly involved Germany in a general war; which was, however, happily prevented. Meetings between the ministers of Prussia and Austria took place, and differences were so far arranged that these two leading powers, with the concurrence of the other states, united in attempting to re-constitute the Germanic Confederation. Varions propositions to effeet this object have been made, but no definite result has yet (February 1852) been attained.

Zollverein, or Customs' League.-This eelebrated commercial union was formed by Prussia, in order to unite the various lierman states for purposes of trade and commerce, by suppressing the rates and tariffs which each had established, and fixing both a uniform seale and mode of levying, by means of which merchandise, after one fixed payment on the frontiers, might be transmitted over the conntry without the impediment and annoyanee of new inspections and new payments on the frontiers of every separate state. Having no compulsory powers, Prussia could only adopt the form of a voluntary association, and endeavour to allure the different states into it, by convincing them of its aecordance with their true interests. The suceess has been very remarkable, and the Zollverein now embraees an area of 131,615 geo. sq. m. ; and a population of $28,534,399$, being 63.08 per cent. of the whole area, and $64 \cdot 35$ per cent. of the population; the several states ineluded in this union will be found marked with an asterisk (*) in the preceding Table, page 1076.-(Conversations Lexikon; Berghaus, Länder u. Völkerkunde; Weimar Almanach; Almanach de Gotha; Annual Register.)

GERMERSHEIM [ane. Vicus Julius], a tn. Bavaria, eap. can. of same name, near the confluence of the Queich with the Rhine, here crossed by a bridge of boats, 40 m . N. Carlsruhe. It is a place of considerable strength, being surrounded with strong walls on the land side, and otherwise fortified; is the seat of a court of justice and several publie offices; contains a Protestant and a R. Catholic parish ehurch, and a ruinous old castle, in whieh the Emperor Rudolf of Hapsburg died ; and has some shipping trade, ehiefly in corn, hemp, and flax, and a fishery. Pop. ean. 21,567.

GERMOE, par. Eng. Cornwall; 1360 ae. Pop. 1336.
GERNONSTOWN, two pars. Irel.:-1, Louth ; 1302 ac. Pop. 1220.-2, Meath; 2838 ac. Pop. 963.

GERNRODE, a tı. Germany, Anhalt-Bernburg, cap. bail. of same name, on the Ilarzgebirge, 28 m . W.S.W. Bernburg. It contains two churehes and an hospital; and has manufactures of fire-arms, a trade in cattle, several mills, and an annual cair. Pop. 2193.

GERNSBACII, a tn. Baden, cirele Middle Rhine, l. bank, Murg, $16 \mathrm{~m} . \mathrm{S}$. Carlsruhe. It consists of the town proper and two suburbs; is well built, has a market-place, and numerous saw-mills, employed in eutting up the trees of the Black Forest, preparatory to their exportation to Holland. P. 2265.

GERNSHE1M, a tn. Hesse-Darmstadt, prov. Starkenburg, in a marshy and unhealthy distriet, r. bank, Rhine, $10 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Darmstadt. It is walled ; has a handsome parish church, a townhouse, and a monument to Peter Schöffer, who was born here; some shipping trade, a much-frequented weekly market, a trade in cattle, and three anmual fairs. Pop. 2843.

GEROLSTEIN, a vil. Rhenish Prussia, gov. of, and 35 m . N. Treves, picturesquely situated 1. hank, Kyll, in a valley, hemmed in by eliffs, often precipitous, and curiously shaped. It contains a parish ehureh and the ruins of an old castle, and has a mineral spring, which was known to the Romans; a trade in eattle, and three annual fairs. In the vicinity, limestone is quarried and iron mined. Pop. 720.

GEROLZHOFEN, a tn. Bavaria, cirele Lower Franconia, 23 m. N.E. Wuirzburg. It is walled; has a chureh, ehapel, townhouse, hospital, and poorhouse; a trade in cattle, a gypsum quarry, numerous mills, a weekly market, and seven annual fairs. The hop and the vine are much cultivated in the vieinity. Pop. 2160.

GERUNA. a maritime prov. Spain, Catalonia, bounded, N. by France, E. and S.E. by the Mediterranean, S. and S.W.
by Barcelona, and W. by Lerida; between lat. $42^{\circ} 29^{\prime} 9^{\prime \prime}$ and $43^{\circ} 31^{\prime} 10^{\prime \prime}$ N. ; and between lon. $1^{\circ} 29^{\prime}$ and $3^{\circ} 20^{\prime}$ E. Area, $4400 \mathrm{sq} . \mathrm{m}$. The surface is mountainous, branches of the Pyrenees ramifying throughout its whole extent, for the most part rugged, bare, and precipitous, near their summits, but well wooded lower down; and forming numerous fertile valleys and verdant slopes, in many places clothed with vineyards and olive plantations, and yielding also wheat, rye, barley, oats, hemp, and all kinds of fruits and vegetables. Sheep, goats, horned cattle, horses, and mules, are also reared, and game is abundant. The mineral wealth consists chiefly in a few mines of iron, lead, and coal. The province is watered by the rivers 'Ter, Fluvia, Marnol, Muga, and several smaller streams; all of which fall into the Mediterranean. Its climate is cold, damp, and furious N.W. winds are frequent, though the valleys are well sheltered. Manufactures of limited extent:-linen, woollen, and cotton fabries, ropes, paper, soap, leather, eork bungs, carthenware, hardware, \&e. Trale:-in manufactured goods, agricultural prodnee, wine, oil, and cattle. The inhabitants are chiefly engaged in agriculture, rearing cattle; and, along the coast, in shipbuilding, fishing, and as mariners. Capital Gerona. Pop. (1844), 194,688.

GERONA [anc. Gerunda], a city, Spain, Catalonia, eap. of above prov., 52 m . N.E. Bareelona, on the sides and bases of two hills, at the confluence of the Ter and Oña, the latter crossed here by two bridges; lat. (cathedral), $41^{\circ} 59^{\prime} 11^{\prime \prime} \mathrm{N}$. ; lon. $2^{\circ} 49^{\prime} 43^{\prime \prime} \mathbf{E}$. (L.) In slape, the eity is nearly triangular, partly surrounded by walls protected by batteries, and commanded by a strong square fort, called Monjuich, oceupying the summit of the most $N$. hill, and, since the war of independence, its only available out-work. Most of the principal streets are spacious, clean, and well paved, and the houses substantially built. It has three considerable squares, in the largest of which, amongst other handsome edifices, are the town and session houses. The eathedral, ereeted in 1416 , is a majestic pile; and, for solidity and strength, combined with delicacy of detail, deservedly ranks anong the finest churehes in Spain. It is built on an eminence, and is approached by a superb flight of 86 steps. Comnected with the cloisters is a noble old Roman tower. The collegiata of San Felix, a fine erection of the 14th century, is remarkable for the height and elegance of its spire; within, it is composed of three naves, divided by pillars, and tastefully adorned in the Gothic style. Of the many other churches, the greater portion are conventual, and possess more or less arehitectural merit. Gerona once comprised 12 convents; since the suppression, however, four only remain as such; the remainder having been adapted to secular purposes, and converted into schools, barracks, mannfactories, \&c. The remaining publie buildings are two hospitals, a theatre, college, numerous sehools, and other philanthropie institutions. The piazzas whieh line the prineipal squares are used as promenades; besides which, there are, in the environs, along the banks of the Oña and Ter, various agreeable public walks, planted with trees. Manu-factures:-linen and woollen fabries, paper, soap, earthenware, hardware, \&e. Trade:-grain, truits, and manufactured goods. An annual fair is held in October. Gerona was made a bishopric in the latter end of the $3 d$ century. In the Middle Ages, it was frequently the scene of military operations, and sustained various sieges; but the most memorable defence of the city was that against the French, in 1809, when, animated by the heroie example of their governor, Mariano Alvarez, they successfully resisted their besiegers for seven month: and five days, and were only compelled to capitulate by the loss of their leader, who became deranged under the united pressure oif hunger, fatigue, and anxiety. The Freneh lost from 15,000 to 16,000 men. Pop. $817 \%$.-(Madoz.)

GERONIMO (San) de YÇa, tı. Peru. See Y̧̧a.
GERRANS, or Gerrance, par. Eng. Cornwall; 2470 ac. Pop. 816.

GERRESHEIM, a tn. Rhenish Prussia, gov. of, an 35 m . E. Düsseldorf, in a fertile valley. It has a handsome parish chureh, of the 12 th century; a convent, from whieh, in 1582 , Count Guebhard, of Truehsess-Waldburg, arehbishop of Cologne, carried off the beautiful Countess Agnes, of Mansfeld; a distillery, a trade in cattle, and six annual fairs. Pop. 1366.

GERRON, or Garon, a headland, N.E. eoast Ireland, co. Antrim, between Glenarm and Red Bays, 6 m. N. Glenarm.

GERS [anc. Afgericus], a small river, France, rising in dep. Hautes-Pyrénées, 20 m . E. by S. Tarbes, it flows N. across dep. Gers, to which it gives its name, and falls into the Garonne, about 4 m. S.E. Agen. Total course, 82 m .

GERS, a dep. France, bounded, N. by Lot-et-Garonne, N.E. Tarn-et-Garonne, E. and S.E. Haute-Garonne, S. HautesPyrenées, S.W. Basses-Pyrénées, and W. Landes; between lat. $43^{\circ} 16^{\prime}$ and $44^{\circ} 5^{\prime} \mathrm{N}$. ; and lon. $0^{\circ} 18^{\prime}$ W., and $1^{\circ} 10^{\prime}$ E.; greatest length, E. to $W ., 72 \mathrm{~m}$. ; greatest breadth, 55 m. ; area, 2420 geo. sq. m. The surface is mountainous, particularly in the S ., where it is almost covered by ramifications of the Pyrenees. These stretch nearly in parallel lines from S. to N., lowering fast in the latter direction, and leaving letween them a number of longitudinal valleys, each drained by its peculiar stream. The far greater part of the department belongs to the basin of the Garonne ; but in the W., a branch of the Pyrences forms a separate watershed, sending the waters on its E. side into the basin of the Garonne; and those on its W. side, into that of the Adour. The principal affluents of the former basin are the Save, Gimone, Rats, Gers, which gives the department its name, the Baise, alone navigable, and the Losse-of the latter basin, the Douze, Midou, and Arros. The climate is temperate, and the air pure and salubrious; but, owing to the proximity of the Pyrences, the cold is often greater than the latitude might seem to indicate. Still, as none of the heights within the department exceed 1300 ft ., the influence of the mountains is more perceptible, in a general modification of the temperature, than in more immediate results. Snow is rare, and frost scarcely ever lasts beyond 20 days; but the winds are very inconstant; and being frequently accompanied with heavy rains, and storms of hail, cause serious damage. Mists also often occur, when the year is advanced, and mildew the crops. Rather more than $\frac{1}{2}$ of the whole surface is arable ; $\frac{1}{4}$ is in vineyards; $\frac{1}{10}$ in permanent meadows; and nearly as much under wood. The waste land is less than $\frac{1}{20}$. The soil is only of medium fertility; but is tolerably well cultivated, producing grain, which, after satisfying the home consumption, leaves a surplus for export. The principal crops, besides the ordinary cereals, are maize and flax. Onions, also, are cultivated on a large scale : fruit is rather scarce. Owing to the large extent of surface under the culture of the vine, the produce is necessarily large; but the wines produced, of which those of Vertus and Mazère are the best, are only of ordinary quality. Of the $19,000,000$ of gallons produced, about $8,000,000$ are consumed on the spot ; and the far greater part of the remainder converted into brandy, known by the name of Armagnac. The surplus left for export is very small. The pastures are not good, and the cattle reared upon them are neither numerous nor of good breeds. The only stock to which much attention is paid is mules and swine; the former furnishing a considerable export to Spain. Among the forests are several from which excellent timber is obtained. Game and fish abound; and poultry, particularly ducks and geese, are reared on an extensive scale. The legs and thighs of the latter are salted, and form a considerable article of export. The minerals are of little consequence. Not one workable seam of metal is found; but there are good quarries of gypsum, and large masses of a fusible spar, much used in making glass. The only manufactures of any consequence is that of brandy, distilleries of which are found in every quarter. The trade is chiefly in brandy, wine, corn, flour, wool, poultry, mules, and swine. Gers is divided into five arrondissements-Auch, the capital, Condom, Lectoure, Lombez, Mirande ; subdivided into 29 cantonz, and 467 communes. Pop. 314,885.

GERSAU, a vil. and par. Switzerland, can. of, and 7 m . W.S.W. Schwyz, beautifully situated N. shore, Lake Lazern, embosomed among orchards, and in a manner isolated from the world by the precipices of the Rigi. It has a new parish church, a small but handsome townhouse, some manufactures of silk; and a trade in cattle and chestnuts, large plantations of which ascend far up the surrounding slopes. Gersau, with the small district around it, formed an independent state for four centuries, and was not incorporated with Schwyz till 1798. Pop. 1361.

GERSFELD, a market tn. Bavaria, circle Lower Franconia, beautifully situated above the Rhön, near the Fulda, here crossed by a bridge, $48 \mathrm{~m} . \mathrm{N}$. Würzburg. It contains a Protestant parish church, two castles, an endowment for
noble ladies, and an orphan hospital ; and has numerous mills, and beds of fine potter's clay. Pop. 1659.

GERSTUNGEN, a vil. Saxe-Weimar, circle of, and 11 m. W. Eisenach, on the Werra, bere crossed by a bridge. It is an ancient place; is the seat of a court of justice, and has four important annual fairs. An imperial diet was held here in 1085. Pop. 1465.

GERVAIS (Sr.), several places, France, particularly1, A small tn. France, dep. Herault, $25 \mathrm{~m} . \mathrm{N}$. by W. Beziers, in a narrow but well-watered valley; and remarkable only for six coal-mines in its environs. Pop. 1576.-2, A vil. and com. France, dep. Puy-du-Dôme, 18 m . N.W. Riom. It has a trade in cattle, and three annual fairs. Pop. 2670.-3, A vil. Sardinian States, Savoy, prov. Faucigny, 35 m . S.E. Geneva, with much-frcquented warm mineral springs; and situated amidst most picturesque scenery.

GERZAT, a vil. France, dep. Puy-du-Dôme, 5 m . N.E. Clermont-Ferrand, on the Beda. It once formed a seignory of the house of Bouillon. Pop. 2718.

GERZEN, or Gerzensee, a vil. and par. Switzerland, can. of, and 9 m . S.S.E. Bern, on a small lake of same name, in the vicinity of magnificent mountain scenery; among which, the most conspicuous objects are the cone of the Niesen, and the mural precipices of the Stockhorn. It is surrounded by fine villas; and contains a parish church, and an old and a new castle. At a short distance is the bathing establishment of Thalgut. Pop. 808.

GESECKE, a tn. Rhenish Prussia, gov. and 27 m . N.E. Arnsherg, a station on the Westphalian railway. It is the seat of a court of justice; has five R. Catholic churches and chapels, a synagogue, manufactures of linen and earthenware, a trade in cattle, and three annual fairs. Pop. 3314.

GESERICH, a lake, Prussia, partly in E. and partly in W. Prussia, gov. Marienwerder. It stretches N. to S. between Saalfeldt and Eylau 18 m ., has a mean breadth of less than 2 m , and discharges itself by a small strean into the Drewenz.

GESPUNSART, a vil. France, dep. Ardennes, 6 m. N.E. Mezieres, on the Nedimont. It has four amnual fairs. P. 1918.

GESSO-PALENA, a tn. and com. Naples, prov. Abruzzo Citra, 15 m. S.W. Lanciano. It contains three churches and two convents; and has two annual fairs, each of which lasts eight days. Pop. 3893.

GESTEL, commonly Gestel-bij-Eindhoven, a vil. Holland, prov. N. Brabant, 2 m . W.S.W. Eindhoven, with a R. Catholic church and a school. The inhabitants are chiefly agricultural, but among them are many artizans and weavers; and formerly the place was famed for its fine linens, which were sent to Italy and Spaiti ; but this branch of trade no longer exists here. Pop. 1019.

GESTINGTHORPE, par. Eng. Essex; 2630ac. P. 834.
GESTRIKLAND, or Gästrikland, a former prov. Sweden, forming now the S. part of Gefleborg's län.

GESTURI, a vil., isl. Sardinia, div. of, and about 28 m . N.N.W. Cagliari ; in a fertile district, with a richly decorated and several minor churches, a primary school, and almshouse. Pop. 1779.

GESUALDO, a tn. Naples, prov. Principato Ultra, 2$\}$ m. S.W. Frigento. Pop. 4000.

GETAFE, a vil. Spain, New Castile, prov. of, and 8 m . S. Madrid. It is ill built; has irregular streets, a square, a parish church, five chapels, a townhouse, prison, college, and some primary schools. Manufactures-linen and coarse cloth, wine, and oil. Trade-manufactured goods, agricultural produce, hardware, earthenware, \&c. Pop. 3494.

GETTYSBURGH, a tn. U. States, Pennsylvania, on an eminence, 35 m . E.N.E. Harrisburg. It has a court-house, a jail, county offices, an academy, a bank, six churches, a Lutheran theological seminary, established in 1826 ; and extensive manufactures of carriages, two tanneries, \&c. P. 1908.

GEULE, a stream, Holland, rising in Rhenish Prussia, about 5 m . S. Aix-la-Chapelle, and flowing generally N.W., traversing Dutch Limburg, and falling into the Maas, 5 m . N.N.E. Maastricht. Total course about 33 m .

GEVAUDAN [Latin, Gevaldanus], a territory, France, once part of the former prov. Langnedoc; cap. Mende. It is now comprehended in deps. Hante-Loire and Lozère.

GEW I'TSCH [Moravian, Gewiczko], a tn. Moravia, circle and 24 m . W. Olmütz. It has a parish church and a townhouse; and suffered much during the Hussite wars. Pop. 2009.

GEX [anc. Gesium], a small tn. France, dep. Ain, on the Jornant; 11 m. N.N.W. Geneva, at the foot of the French Jura, on the Swiss side, and composed chiefly of one long and steep street. Flocks of merino sheep are bred in the district, which is also rich in vines: much Gruyère and goats' cheese is made here. Gex was onee fortified, and was capital of a considerable territory, to which it gave name. Pop. 1395.

GEYER, a tn. Saxony, cirele Zwickau, in a mountainous bnt well-wooded district, $48 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Dresden. It contains a town-house, and an ancient church with fine carvings and lofty towers, one of which has a remarkably large bell; and has manufaetures of lace and embroidery, a large cotton-mill, smelting furnaces for tin, which is extensively worked in the vicinity; a trade in cattle, and two annual fairs. Pop. 3767.

GEYSERS, or Geisers. See Iceland.
GIIADAMES, or GadAmis, a tn. N. Africa, in Oasis of same name, Desert of Sahara, regeney of, and 310 m . S.S.W. 'Tripoli ; lat. $30^{\circ} 5^{\prime} \mathrm{N}$. ; lon. $8^{\circ} 24^{\prime} 23^{\prime \prime} \mathrm{E}$. It is surrounded with ruined walls, composed mostly of sun-dried bricks; houses generally three and four stories in height, built in the Moorish style; streets narrow and winding, covered in, and dark, having only small open spaces here and there to admit the light; they are thus constructed to exclude the summer heats, and the rigorous blasts of winter. The prineipal streets and squares are lined with stone benches, as seats, for the accommodation of the inlabitants. The population is mixed, but is chiefly eomposed of Arabs, Moors, and Negroes. The better class of women rarely go abroad, spending nearly all their time on the flat roofs of their houses; though not beautiful, their figures are handsome, and their manners gentle and pleasing. Their principal occupation is weaving woollens, partly for the use of their families, and partly for sale. The people are of peaceful and inoffensive dispositions, extremely devout, and entertain the greatest horror of violence and bloodshed. There are a few rich merchants in the town, but the greater portion of the inhabitants are exceedingly poor; still a good deal of traffie is carried on through Ghadames between the coast towns and the interior of Africa. There being no herbage for miles around, the camels must be driven to a distance of two or three days' journey. Pop. about 3000 . -(Rieliardson's Desert of Sahara).

GIIARA, or Garra.- 1 , A river, Punjab, being the name by which the united streams of the Beas and Sutlej is known, from their conflience near Sobraon to the junction with the Chenaub. The length of course between these two points is about 300 m . It is remarkably direct in.its general course, which is $\mathbf{S} . \mathrm{W}$. , but tortuous at short intervals. Its breadih at Iurekee, a little below the junction by which it is formed, is 275 yds. at the lowest season, and 12 ft . deep, running at the rate of $2 \frac{1}{4} \mathrm{~m}$. an hour. - 2 , A vil. Scinde, N.W. border of the Delta of the Indus, and 25 m . from its r . bank; lat. $24^{\circ} 44^{\prime}$ N.; lon. $67^{\circ} 36^{\prime}$ E.-3, A small stream in Seinde, flowing past the village of the same name, and falling into a long creek opening into the Indian Ocean, 10 m . E. Kurrachee; lat. $24^{\circ} 45^{\prime} \mathrm{N}$.; lon. $67^{\circ} 10^{\prime}$ E.

GHARMY, a vil. Eygpt, in the Libyan Desert, a few hours' ride from Siwah, on the summit of a lofty precipitous rock; the houses hanging over, and rising high above, each other. Close by this village stand the ruins of one of the celebrated temples of the Egyptian deity, Jupiter Ammon; the only other existing temple dedicated to that deity being at Karnak. Two or three gateways, several fragments of the shafts of columns, a chamber or two, and some walts, are nearly all that now remain of the temple. The gateways and chambers are covered with hieroglyphies. The temple stands on a slightly elevated platform of rock, in the centre of an open glade. From its ruinous condition no idea of the plan of the building can be formed; but, from the vast size of the stones employed, as well as from other indications, it would appear to have been a very imposing structure. Various other remains of antiquity are to be met with in the vicinity of Gharmy.-(B. St. John's Alleentures in the Libyan Desert.)

GHASSA, or Gaesa, a tn. Bootan, r. bank Tehiu-tchin river, cap. of a district ; lat. $27^{\circ} 56^{\prime} \mathrm{N}$.; lon. $89^{\circ} 18^{\prime} \mathrm{E}$. It is a little way S. W. of Mount Chamalari.

GHA'T, an oasis and tn. in the Sahara, or Great Desert of N. Africa, W. of the S. extremity of Fezzan; lat. $24^{\circ} 58^{\prime}$ N.; lon. $11^{\circ} 15^{\prime}$ E. The oasis is eomprehended within a cirele of not more than three or four miles. The palms it produces are

Vol. I.
dwarfish, and half of them do not bear fruit; and their dates are of the most ordinary kind. In the gardens, besides the palms, a little wheat, barley, and ghusub are cultivated. There are also some fruit-trees, but no vines. The town, which stands on a hill, is small, and the houses are wretehed, both within and without; they are nearly all built of sun-dried bricks and mul. In the eentre of the town is a large square, called Esh-Shelly, the general rendezvous of business and gossip. Two or three palms within the town cast a grateful shadow, and make an angle of the streets picturesque; but no other trees are seen. On the S., without the walls, is a suburb of some fifty mud and stone houses. There are also scattered over the sand, on the W., a hundred or more huts, made of straw and palm-branches. The town is surrounded with walls not more than 10 ft . high; but its gates, of which there are six, are miserably weak, and never so closed as to prevent their being opened at night. All the doors and beams of the honses are of the date-palin wood. Ghat is a great mart for slaves, which are chiefly exchanged for goods.

GHAUTS (The), two ranges of mountains in the peninsular India, called the Eastern and Western Gliants; the former bounding the table-land of the Deccan, on the E., the latter on the W. They are in general composed of granite, and also contain a quantity of iron-ore. The W. Ghauts extend from Cape Comorin, on the S., to the Tapty or Tuptee river on the N., or about lat. $21^{\circ} \mathrm{N} .$, a distance of about 1000 m. ; nearly parallel to the eoast, which they approach mueh more closely than the E. Ghants, the distance not often exceeding 50 m . This range varies considerably in elevation, the highest peaks being estimated at 6000 ft . Their width is inconsiderable, rarely exceeding 12 m . With exception of a few places where the rocky masses are too steep to permit any accumulation of earth, they are covered with stately forests of poon, teak, and other large timber. Bamboos, and the ground rattan, also abound here, and attain a size which they reach nowhere else. A great deal of beautiful and highly pieturesque scenery occurs in these mountains, enhanced by numerous magnificent waterfalls. One at Calliani, N. from Poonah, is abont 1400 ft . high. The E. Ghauts commence in the S., about lat. $11^{\circ} 20^{\prime}$ N., to the N. of the Cavery; and extend, with little interruption or eomparative deviation from a straight line, to the banks of the Kistnah, in lat. $16^{\circ} \mathrm{N}$., separating the low and level eountry along the Bay of Bengal from the table-land in the interior. They eonsist of a number of mountain-ridges running parallel to one another in their general direction. Their exaet height has not been ascertained; but they are known to be of considerably less elevation than the W. Ghauts, the highest summits not exeeeding, it is supposed, 3000 ft . Their average breadth is about 50 m . They have none of the picturesque beanty of the W. Ghauts; their surface being very stony, dry, and exceedingly broken, and nearly destitute of trees, with exeeption of a few traets covered with wild dates. The E. Ghauts are in some parts rich in metals; iron is very abundant, and copper and lead are worked in several places, and diamonds are occasionally found.

GHAZIPOOR, or Ginazefpoon, a tn. Hindoostan, dist. of same name, presid. Bengal, I. bank Ganges, prov. of, and 42 m . N.E. Benares; lat. $25^{\circ} 32^{\prime} \mathrm{N} . ;$ lom. $83^{\circ} 32^{\prime}$ N., and celebrated over all India for its salubrity. Its position is somewhat elevated above the surrounding country; but the town presents a mean appearance, being prineipally composed of ruined houses, and ghauts, and mud-cottages fringing the river for about 3 m ., with a breadth of not more than $\frac{1}{2} \mathrm{~m}$. The only edifice worthy of notice-and that also in ruins-is a building at the $\mathbf{E}$. end of the town, overhanging the Ganges, erected by the Nawanb Saadet Ali, and now used as a custom-house; it is called the Chaleestoon (palace of the 40 pillars), and is built on a basement story of great height, rising from the river. It is approached from the town by a handsome Gothic gateway, still in tolerable repair: the blue, red, and white mosaic parement is partly eutire, and many of the pillars are still remaining. The cantonment, about a mile $N$. of the town, stands on a large plain, and has a neat appearance, the bungalows being laid out in streets, with large compounds round each. On a plain near the cantonment is a monument creeted to the memory of Lord Cormwallis, who died here in 1805 , while on his way to the upper 136

## GHEDI

## GHENT

provinces. The jail is clean and airy ; the bazaars neat, and well supplied. The E. I. Company have a breeding stud here, where very superior horses are raised for the cavalry. ——The DISTRict, area, 1650 geo. sq. m., bounded N. and E.

GHENEII, city Egypt. See Kenerr.
GHENT [French, Gand; Flemish, Gend; Latin, Ganda], a tn . Belgium, cap. prov. E. Flanders, in a fertile plain at the confluence of the Lys with the Scheldt; on the Terneuzen canal, which communicates with the sea, and admits vessels drawing 15 ft ., and on

ThE CHALEESTOON PALACE, GHAZIPOOR.——rom an Original Drawing by Capt. R. Smith, 4ith Rekt the railway from Ostend to Brussels, $31 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Brussels. It occupies a triangular space, above 8 m . in circuit, is surrounded by walls, defended by a strong citadel, and entered by seven gates. In the interior, the most striking feature is the great number of canals which branch off from the Lys in all directions; and, forming a kind of net-work within the town, divide it into 26 islands, communicating with each other by 42 large, and 46 small bridges. Another striking feature is the number of fine promenades; of which the most remarkable is the Coupure, formed by rows of trees along the Bruges canal. The town is on the whole well built. In some of the older parts, where many of the houses have gable fronts, which rise tier above tier
by the Goggra, S. by the Ganges, and W. by the Juanpoor, is celebrated for its rose-water and attar; for the production of which large fields of roses, extending over many liundreds of acres, are cultivated. It is also noted for its snakes; the cobra da capella being exceedingly numerous and troublesome. Pop. $1,059,087$; or 641 to the geo. sq. m.

GHEDI, a vil. and com. Austrian Italy, prov. Brescia, 5 m . E. Bagnolo, in a plain near the Naviglio. It contains a parish and threc auxiliary churches, a castle, and a school; and has a weekly market. Pop. 3193.

GHEEL, or Geel, a tn. and com. Belgium, prov. of, and 26 m. E. by S. Antwerp, 14 m. S. Turnhout. on the GreaterNethe. It has four churches; manufactures of cloth, hats, wax and tallow candles, \&c.; tanneries, dyeworks, ropeworks. \&c.; and a considerable trade in butter. The commune is remarkable for being a colony of deranged persons, who are lodged and boarded in the houses of the country people, who make use of their services, when available, in field and other labour. Little or no restraint is employed, and the best effects thence ensue. Patients are sent hither from all parts of Belgium. In 1841, the number of luratics residing here were 360 males, and 370 females. Pop. 7079.

GHEESAN, a tı. Arabia, on the Red Sea, 84 m. N.N.W. Loheia ; lat. $16^{\circ} 45^{\prime}$ N. ; lon. $42^{\circ} 30^{\prime}$ E. It has a few square stone buildings, but the principal part of it consists of grass huts, which are mostly round, with pyramidal tops; a large fort, greatly decayed, and a sinall bazaar, scantily supplied. Water is very scarce. The inhabitants are chiefly employed in the pearl fishery, \&c., on the neighbouring banks.

GHELENDJIK, a bay and seaport, Circassia, N.E. coast of Black Sea; lat. (fort) $44^{\circ} 33^{\prime} 24^{\prime \prime} \mathrm{N}$. ; lon. $38^{\circ} 3^{\prime} 15^{\prime \prime} \mathrm{E}$. (R). The bay is about 1 m . wide at the entrance, with 7 and $7 \frac{1}{2}$ fathoms water in the middle. It affords good anchorage. The larbour is of an oval form, about 3 m . long N.W. to S.E., and $1 \frac{1}{2} \mathrm{~m}$. broad.

GHELUWE, a vil. and com. Belgium, prov. W. Flanders, 28 m . S. by W. Bruges; with brewcries and vinegar-works, oil-mills, and manufactures of thread and starch; and a trade in tobacco and flax. Pop. 3839.

GHEMME [Latin, Agamium], a vil. and com. Sardinian States, div. and 14 m . N.W. Novara, near the Sesia. It contains two churches, one of them a large and beautiful structure, adorned with paintings, frescoes, and granite sculptures, and surmounted by a tower; and has manufactures of cotton, cards, and musical strings; a trade in wine; a weekly market, and a much-frequented annual fair. Pop. 2935.
and present a very fantastic appearance, the streets are often dark, and so narrow, that two carriages can scarcely pass; but, in the other quarters, the streets are in general straight and spacious, with rows of handsome houses fronting canals enclosed by magnificent quays; and there are a great number of squares, among which the most deserving of notice are the Marché-du-Vendredi, where the weekly market is held, and where, in early times, the Counts of Flanders were inaugurated, and the trades unions used to rendezvous; the Cauter or parade, planted with lime trees, and surrounded by elegant edifices; the Plain de St. Pierre, a large space used especially for reviews and military exercises ; the corn-market, near the centre of the town; the Place St. Plarailde, where the gate of the castle

THE PLACE ST. PHARAILDE, AND GATEWAY OF THE OLD CASTLE OF THE COUNTS OF FLANDERs, GHENT.-From the Picturesque Annual.
of the Counts of Flanders still stands; and the Plaine desRecollets, remarkable for the number of its fine mansions and hotels. Before leaving the squares it may be proper to mention, that near the Marche-du-Vendredi, there is an enormous cannon 18 ft . long, 10 ft . in circnit, and nearly 3 ft . wide at its mouth, evidently a prototype or twin-sister of the famous Mons Meg, now in Edinburgh Castle; formed, like her, of circles and bars of iron, and surnamed Dulle Griete, equivalent in Flemish to Mad Margaret.

The principal buildings are the cathedral of St. Bavon, a vast structure, somewhat heavy in its exterior, but within finely proportioned and richly decorated, possessed of a large crypt, a beautifully carved pulpit, many interesting monuments and fine paintings, and surmounted by an elegant tower 272 ft . high; the church of St. Nicolas, the oldest in Ghent,
but somewhat defaced by a modern portico; the church of Sit. Michael, with a celebrated crucifixion by Vandyk, which has been almost destroyed by cleaning; the church of St. lierre, with a beautiful dome, and a façade adorned with corinthian columns; the University, a handsome modern structure, finished in 1826, with a noble Corinthian portico, modelled on the Pantheon at Rome, a museum of natural listory, a library of 60,000 volumes, and an attendance of about 350 students; the IFotel-de-Ville, composed of two buildings, the one of the 17 th century, combining three distinct orders of architecture, and the other of the 15th century, of florid gothic ; the Motel-de-l'Octroi (custom-house), decorated with doric and corinthan pilasters; the beffroi (belfry), a lofty square tower, surmounted by a gilded dragon, and containing a fine ehime, a clock, and several bells, one of which weighs nearly five tons; the new Palais-de-Justice, a handsome structure, intended both to accommodate the courts of law, and serve as an exchange; the Maison-de-Force (house of correction), an immense octagonal building; the Beguinage, a huge nunnery, surrounded by a wall and moat, and occupied by about 600 inmates, who are said not to be bound by any vow, and to employ themselves in works of charity within the town, to which they have free access; the new theatre, on which the municipality are said to have expended $£ 100,000$; the Jardin-des-Plantes (botanic garden), boasted of as the finest in Belgium; the general hospital; the post-office, \&c. Ghent is the see of a bishop, and the seat of courts of primary resort and commerce; of a superior appeal court for both $\mathbf{E}$. and W. Flanders, and of a court of assize ; and possesses, besides the university already mentioned, an athenæum, cpiscopal seminary, industrial school, academy of painting, sculpture, and architecture, a superior primary school, scientific, literary, and musical societies, a deaf and dumb institntion, a lunatic asylum, and a société matrimoniale, said to be one of the most useful associations of the town, and has for its object the legitimation of natural children.

The extent to which the cotton manufacture is carried on in Ghent, has procured it the surname of the Belgian Manchester. It absorbs about $£ 1,600,000$, of capital, gives employment to 30,000 workmen, and produces about a million of pieces of calico, plain and printed. The other manufactures of importance are refined sugar, common and table linen, woollen cloth, flannel, serge, silk, lace, thread, ribbons, hosiery, wax-cloth, oil, chemical products, armour, physical, mathematical, and surgical instruments, articles in steel, bronze, and crystal, carriages, paper, hats, delft-ware, tobacco, blue, starch, \&c. There are also extensive nachine works, roperies, tanneries, breweries, and distilleries. The trade in corn, oil, seeds, wine, and Flemish linen-particularly the last, which has here one of its chief entrepôts-is very important. Every Friday, about 18,000 pieces of linen are exposed for sale; and several of the annual fairs are very numerously frequented.

The origin of Ghent is uncertain. It is first mentioned as a town in the 7 th, but does not appear to have acquired much importance till the 12 th century, when its fortifications were completed. At this time it only occupied the space contained between the Lys and the Scheldt; but, by the end of the 13 th century, it was nearly as large as at present, and so much larger than l'aris then was, as to justify the bon-mot long afterwards used by Charles V.-Je mettrais Paris dans mon Gand (Gant). In the bloody feuds which agitated Flanders up to the middle of the 14 th century, Ghent took a lcading, but not always a successful part; and repeatedly, by the turbulence of its citizens, provoked a fearful retribution. In 1369, when the county of Flanders passed by marriage to the house of Burgundy, Ghent followed its fortunes, but shortly afterwards revolted; and, notwithstanding of seven reverses, in one of which it lost 20,000 , and in another 16,000 of its citizens, scarcely ceased to be prosperous. The spirit of revolt, however, was subdued; and Charles the Bold was peacefully crowned at Ghent in 1467 . In 1500 , Charles V. was born at Glient, and 18 years after succceded to the most extensive monarchy which had cxisted in Europe from the days of Charlemagne. The Gantois appear to have dreaded a collision with such a power; but at last, in 1557 , when an extraordinary subsidy was demanded, broke out in open resistance. Severe punishment soon followed, and the citizens, in addition to other enormous fines, were obliged to pay for the erection of a citadel, intended to keep them in bondage. Ghent afterwards
suffered much during the aggressions of Louis XIV., the campaigns of Marlborough, and the commotions of the French revolution; but the advantages of its position, and the industry of its citizens, seem to make it superior to all calamities, and its prosperity is again as great as ever. Pop. 96,890.

GHERZEH, a maritime tn. Asiatic Turkey, Anatolia, S. coast Black Sea, 16 m. S. by E. Sinope. It lias some little coasting trade. Pop. about 5000 .

GHIAMDA, a tn. Tibet, 110 m . E. by N. Lassa. It contains two Bhuddist temples of colossal proportions; is a station of a Chinese garrison ; carries on a considerable trade in lapis lazuli, deers' horns, and rhubarb, with Lassa, and with the Chinese provinces of Sechuen and Yunnan.

GHILAN, a prov. Persia, S.W. shore of the Caspian Sea, bounded N.E. by the latter, E. and S.E. by prov. Mazanderan, S. by Irak-Ajemi, N. by Russia, and W. by prov. Azerbijan; length, 170 m . ; breadth, about 50 m . The general aspect of this province presents a striking contrast to the high parched plains of Persia, being covered with lofty mountains and magnificent woods, although in many parts swampy and unhealthy; especially along the shores of the Caspian, where the people lose the fresh colour of the upper land, and look sallow and less athletic. The climate, also, is insalubrious, being extremely damp; a greater quantity of rain falling here than in any other of the Caspian provinces, while the mountains are rarely wholly free from snow. A singular, hot S . wind sometimes springs up, suddenly changing the temperature in a remarkable manner; it generally lasts 24 hours, and is followed by a tempest of snow and rain from the N.E. The only grain grown on the plains is rice; which, requiring tho fields to be constantly under water, renders these parts of the country still more unwholesome. Cotton will not grow, and the fruits have an acid and harsh taste. Sugar-canes and orange-trees, which abound in the neighbouring province, Mazanderan, are here cultivated as ornamental plants only. The cattle are small and humped. There exists in Ghilan, however, a wealthy class of landed proprietors; and the people are well lodged, clothed, and fed. There are few or no villages, the peasants residing cither in single dwellings or small communities, seldom exceeding eight houses. The coast presents a succession of fine bays. Capital, Reshd.

GHILJI, one of the most numerous and powerful of the Afghan tribes. See Afghanistan.

GHIO, a tn. Asiatic Turkey. See Kemiail.
GHIR, Geer, or Ras-Aferni, a cape, Marocco, on the Atlantic, 65 m . S.S.W. Mogador ; lat. $30^{\circ} 37^{\prime} 30^{\prime \prime} \mathrm{N}$. ; lon. $9^{\circ} 52^{\prime} 30^{\prime \prime} \mathrm{W}$. Its lighest part is 1235 ft . above the sea.

GHIRLARZA, a vil., isl. Sardinia, div. and 65 m. N. by W. Cagliari, on the clevated plain of Marghine. It has a parish and several minor churehes, a primary school, and an ancient tower; manufactures of coarse woollens, bed and table covers; a trade in winc, cattle, skins, and cheese; and an annual fair. Pop. 2200.

GHISALBA, a vil. and com. Austrian Italy, prov. Bergamo, dist. of, and 2 m . from Martinengo, in a plain on the Serio. It was once fortified; and the gates, and part of the fortifications, including the walls and towers of a castle which figured during the civil wars, still remain. It has a handsome parish church, in the form of a rotunda; two auxiliary churches, an almshouse, tile-works, and limekilns. Pop. 1374.

GHISLAIN (St.), a small tn. Belgium, prov. Hainaut, 6 m. W. by S. Mons, near the railway to Valenciennes; with a great trade in coals; soap-works, salt refineries, oil-mills, breweries, bleacheries, a boatbuilding yard, \&c. It originated in a monastery, founded by Dagobert, in 653. Pop. 1896.

GHISTELLES, a vil. and com. Belgium, prov. W. Flanders, 5 m . S. by E. Ostend. It has manufactures of candles, tanneries, breweries, oil, and flour mills, \&c. 1-.2664.

GHIUS'TENDIL, a tn. Turkey, in Europe, 288 m . W.N.W. Adrianople ; lat. $42^{\circ} 13^{\prime}$ N.; lon. $22^{\circ} 57^{\prime}$ E. ; cap. sanjak of same name. It is the seat of a Greek bishop; and has some square towers, and warm sulphureous springs. Pop. 10,000.

GHIZEH, Gizer, or Geezef, a tn. Middle Egypt, 1. bank Nile, about 4 m. S.S.W. Cairo. It was formerly an important place, much frcquented by merchants, and a city beautified by palaces; bnt now it is a heap of ruins; amidst which a mere village is built, having a few cafés and ruined
bazaars. Eggs have been hatched here by artificial means since the time of the Pharaohs. In its immediate vicinity are the pyramids, which have been naned from it, though they are continued southwards, at varying intervals of distance, for nearly 70 m . Those close to Ghizeh are principally four. As they are all formed nearly on the same plan, a short description of the largest, called the Great Pyramid, or Pyramid of Cheops, may suffice for all. It stands on a limestone plateau, connected with the Libyan chain, about 160 ft . above the level of the Nile. Its base forms a square, each side of which was originally 764 ft ., though now, by the removal of a coating, reduced to 746 ft . ; and contains nearly 13 acres. It is built in platforms, which successively diminish in ascending, till, at the summit, the platform contains only 1067 sq. ft. The whole height is 456 ft .; and the series of platforms present a succession of 203 steps, up which the ascent is made without difficulty. The interior, entered $47 \frac{1}{2} \mathrm{ft}$. above the base of the N. face, contains numerous chambers; one of which, called the King's Chamber, is $34 \frac{1}{2} \mathrm{ft}$. long, 17 wide, and $19 \frac{1}{4}$ high, and contains a sarcophagus of red granite. The whole pyramid, unquestionably the most stupendous mass of stone building ever put together by the hand of man, is said by Herodotus to have employed 100,000 men for 20 years, and its solid contents have been computed at $85,000,000$ cubic feet. Another very remarkable work in the same vicinity is the Sphinx, an immense colossal figure cut out of the solid rock.

GHIZNI, tn. Affghanistan. See Ghuznee.
GHLIN, a vil. and com. Belgium, prov. Hainaut, 3 m . W. Mons, with a large glasswork, and productive quarries of paving-stones, lime-works, \&c. Pop. 2697.

GHOLAM-Shair-Ka-Kote, a small, but thriving tn . Scinde, r. bank, W. branch of the Indus; lat. $24^{\circ} 39^{\prime} \mathrm{N}$. ; lon. $67^{\circ} 41^{\prime} \mathrm{E}$. The surrounding country is well cultivated and productive, especially of sugar-cane.

GHOOZKAN, a vil. Persia, prov. Khorassan, 14 m . E. Mushed; perpetually harassed in the forays of the Turcomans. Pop. 1000.

GHORAGHAUT, a tn. Hindoostan, prov. Bengal, r. bank, Teesta ; lat. $25^{\circ} 13^{\prime}$ N. ; lon. $89^{\circ} 10^{\prime}$ E. ; 195 m. N. N. E. Calcutta. 'The most remarkable monument existing among the extensive ruins here, is the tomb of Ismael Ghazi Khan, the first conqueror of the district.

GHORA TRUP, a vil. Afghanistan, r. bank, Indus, 11 m . S.W. Attock; lat. $33^{\circ} 46^{\prime}$ N.; lon. $72^{\circ} 9^{\prime} \mathrm{E}$. There is here a very dangerous rapid, resulting from the lateral contraction of the high and rocky sides of the river, which is here narrowed to a width of only 250 ft . Through this narrow channel the Indus rushes at the rate of 9 to 10 m . an hour, and with the noise of thunder.

GHORBUND, a vil. N. Afghanistan, 30 m . N. Cabool ; lat. $35^{\circ} 4^{\prime} \mathrm{N}$. ; lon. $68^{\circ} 47^{\prime} \mathrm{E}$. ; in a gorge on the S. slope of the Hindoo Koosh, surrounded with fine gardens and orchards. It gives name to the beautiful and fertile valley in which it is situated. The latter is covered with multitndes of fragrant shrubs and flowers, with a great variety of tulips. It also abounds in minerals, including lead ore, iron, lapis lazuli, and antimony. There are also veins of silver.

GHORE, tn. of W. Afghanistan, 80 m . N.N.E. Dooshak; lat. $32^{\circ} 58^{\prime} \mathrm{N}$.; lon. $63^{\circ} 21^{\prime} \mathrm{E}$. It is now an insignificant place, but was at one time the capital of sovereigns whose power extended over Khorassan, Afghanistan, Scinde, and Lahore. Ghore is supposed to have been one of the earliest seats of the Afghan race.

GHOY, a vil. and com. Belgium, prov. Hainaut, 27 m . N.E. Tournai ; with breweries, and manufactures of linens, and chicory. Pop. 2248.

GHUMOURDJINA, or Kemouldjina, a tn. European Turkey, 78 m . S.W. Adrianople, near the coast of the Archipelago, and defended by a castle. Pop. 8000.

GHUNPUOR, a tn. Hindoostan, Nizam's dominions, prov. of, and 60 m . S.S.W. Hyderabad ; lat. $16^{\circ} 33^{\prime}$ N. ; lon. $78^{\circ} 8^{\prime}$ E. It is a fortified hill, and contains one of the largest and finest mosques in the Nizam's possessions; now, however, mostly used by travellers as a choultry.

GHURUN, a tn. Asiatic Turkey, pash. Marash, 80 m. W. Malatiyah, in a deep, narrow valley. The town contains 1770 inhabitants, who are engaged in trade with the migratory tribes of Turcomans and Kurds.

GHURRY, a considerable vil. Scinde, on the route from Roree to Jessulmir ; lat. $27^{\circ} 31^{\prime}$ N. ; lon. $69^{\circ} 7^{\prime} \mathrm{E}$. It contains a considerable number of shops, and is capable of furnishing supplies in moderate quantity.

GHUZEL-HISSAR, a city, Anatolia. See Aidix.
GHUZNEE, or GHUZNI, an anc. and celebrated city and fortress Afghanistan, 60 m . S.S.W. Cabool ; lat. $33^{\circ} 10^{\prime} \mathrm{N}$.; lon. $66^{\circ} 57^{\prime}$ E.; r. bank, and near the source of the Logur, on an eminence forming the W. extremity of a range of hills, stretching E. and W., 7726 ft . above sea-level. The city contains about 1500 houses, usually two stories high; and is surrounded by walls, formed of mixed masonry and brickwork, carried along the scarp the entire length of the spur of the hill on which it stands. The walls are strengthened with numerous bastions, and a trench surrounds the whole. The citadel, which is towards the N., occupies an eminence overlooking the town, and presents a very imposing appearance; but, being in turn commanded by the neighbouring hills, is not so formidable as it looks. There are four bazaars in the city, but of a very inferior description, being covered merely

THE FORTRESS AND CITADEL OF GHUZNEE.-From Atkinsoo's Sketches in Afghamstan.
with mats and wood. In consequence of the elevated position of Ghuznee, the cold is intense in winter, causing the mercury to fall from $10^{\circ}$ to $20^{\circ}$ below zero, and freezing the streams and pools to the depth of several feet; while the snow storms are sometimes so severe, it is said, as to have destroyed the population several times. Notwithstanding this, the country around is productive in grain and fruits, the apples and prunes of Ghuznee being much celebrated. Three miles N.E. are the ruins of the ancient city, which, eight centuries since, was the capital of an empire reaching from the Tigris to the Ganges, and from the Jaxartes to the Persian Gulf. Two lofty minarets, the tomb of Sultan Mahmood, and some other buildings, still attest its ancient grandeur. Ghuznee was taken by storm by the British troops in 1839. Upon the insurrection in 1841, it again fell into the bands of the Afghans, from whom it was recovered in 1842.-(Chesney ; Masson; Oriental Interpreter ; Thornton's Gazetteer.)

GHYRCE, Kırchet, or Tutzis, a tn. Nubia, l. bank, Nile; lat. $23^{\circ} 17^{\prime} \mathrm{N}$. ; lon. $33^{\circ} 0^{\prime}$ E. Here is a remarkable temple hewn ont of the rock, and justly considered as one of the most singular monuments of Nubia.

GIACOMO di Lusiana, a vil. Austrian Italy, gov. Venice, prov. and N. of Vicenza; with a valuable quarry of variegated marble, which is in large demand. Pop. 2500.

GlAGLIONE, a vil. and com. Sardinian States, div. Turin, prov. of, and 3 m. W. Susa, on a hill, l. bank, Dora. It contains a parish church of very early date, and an ancient castle. Inhabitants engaged in agriculture and cattle rearing. Pop. 1496.

GIANJAR, a dist. or native state, Indian Archipelago, S.E. coast isl. Bali, and opposite Bandits' island. It is about 17 m . long, by 7 m . broad; is hilly, but generally fertile, and covered with rice fields. Its capital, of the same name, lies about 8 m . inland, and is the residence of the Rajah. Pop. of state, 200,000 .

GIANNUTRI [anc. Artemisia], an uninhabited isl. Mediterranean, off the coast of Tuscany, about 9 m . S. Mount Argentaro; formed like a crescent, and about 4 m . in circuit. The granite, of which it is principally composed, appears to have been quarried by the Romans, who lave left some untinished columns.

GIANT'S CAUSEWAY, an extensive and extraordinary assemblage of polygonal basaltic columns, N. coast of Ireland, co. Antrim, between Bengore Ifead and Port Rush; lat. $55^{\circ} 15^{\prime} \mathrm{N} . ;$ lon. $6^{\circ} 33^{\prime} \mathrm{W}$. It is divided into three unequal parts-the eastern, middle, and western causeway; the whole comprising a multitude of columns, consisting of prisms of equal dimensions throughout their whole height, which ranges from 15 to 36 ft ., with a diameter of 15 to 28 ins., and varying in their number of sides from three to ninc, although the greater number are pentagons and hexagons. Each of the pillars is perfectly distinct, and almost invariably differs in size, number of sides, and points of articulation from the adjacent columns; to which, however, it is so close, that water cannot pass between them. Almost every column is composed of several pieces; the joints of which are articulated with the greatest exactness, and in a strictly horizontal direction. Generally the upper part of the section is concave, and the lower convex: but this arrangement is sometimes reversed. The basalt of which they are composed is of a very dark colour, approaching to black.

GIARRATANA [anc. Ceratanum], a vil. and com. Sicily, prov. of, and 28 m. W. by N. Syracuse. It stands on a lofty height, and contains some ancient remains. Pop. 2400.

GIARRE, a vil. and com. Sicily, prov. of. and 18 m. N.N.E. Catania, at the foot of Mount Etna, and at a short distance from the Ionian Sca. It is a flourishing place, and contains a handsome church recently built.

GIARRETTA [anc. Simœthus], a river, Sicily, which rises on the W. slope of Mount Etna, and flowing S.S.E., falls into the Ionian Sea, 6 m. S. by E. Catania, after a course of about 40 m . It may be considered as defining the boundaries of the mountain on the W. and $S$. Fine specimens of yellow, red, and black amber are found floating at its mouth; but the precise place whence it come3 has not been discovered.

GIAVE, a vil., isl. Sardinia, div. of, and 28 m . S.S.E. Sassari, on a hill of same name, near the crater of an extinct volcano. It has a large parish and several minor churches, a primary school, and old castle; a trade in corn, wine, and other agricultural produce; and an annual fair. Pop. 1575.

GIAVENO [Latin, Javenum], a tn. Sardinian States, div. of, and 16 m . W. by S. Turin, in a mountainous district, l. bank, Sangone. It is a large and well-built place, with five public squares, one of them adorned with shady alleys; is the seat of a court of law and several public offices; contains three parish churches, one of them a handsome modern structure, with three naves; two monasteries with churches, a palace once the residence of an abbot, a college or gymnasium, the buildings of which, though partly unfinished, are very handsome; a communal school, and an hospital ; and has manufactures of iron and iron wire; four tanneries, two paper and two silk mills; and a considerable trade in wood and charcoal, cattle, dairy produce, apples, pears, and chestnuts. Pop. 8866.

GIBELLINA, a tn. and com. Sicily, prov. of, and 33 m . S.E. Trapani. Pop. 4966.

GIBRALEON [anc. Ossonoba], a tn. Spain, Andalusia, prov. of, and 7 m. N.N.E. Huelva, l. bank, Odiel, here navigable. It is tolerably well built, contains two churelies, one

of them a handsome structure, with three naves; a townhouse, a public school, the remains of two forts, the buildings of two monasteries, and a nunnery; and has some trade in corn, wine, wool, and fruit ; and an annual fair. Pop. 2804.

GIBRALTAR [Arabic, Jebel-tarik-the hill of Tarik, a Berber leader, who conquered the fort in 711 ; Italian, Gibilterra], a tn. and strongly fortified rock, Spain, Andalusia, belonging to Great Britain; lat. $36^{\circ} 9^{\prime}$ N.; lon. $5^{\circ} 21^{\prime}$ W. This remarkable fortress, which forms the key to the Mediterranean, stauding on a peninsula at its entrance, is connected with the continent of Spain by a low sandy isthmus, $1 \frac{1}{2} \mathrm{~m}$. long and $\frac{3}{4} \mathrm{~m}$. broad, having the Bay of Gibraltar on the W., and the open sea of the Mediterranean on the E . Near the point of junction of this isthmus with the mainland are the Spanish lines, between which and the rock is a space called the ' Neutral Ground.' The highest point of the rock is about 1400 ft . above sea-level; its N . face is almost perpendicular, while its $E$. side is full of tremendous precipices. On its S. side it is almost inaccessible, making approach from seaward impossible: the W. side, again, although nearly as rugged and precipitous as the others, slopes towards the
sea; and here the rock is secured by extensive and powerful batteries, rendering it apparently impregnable. The body of the rock consists of a kind of primary marble, running in strata of 30,40 , and 50 ft . in thickness. At the N. extremity of the rock are perpendicular fissures, on the ledges of whieh a number of hawks nestle and rear their young in the breeding season. They throw down from their nests the bones of small birds, mice, and other animals on which they feed; and these are gradually united, with a cement of red earth, into a breccia of angular fragments of the decomposing limestone. There is a number of remarkable caves in varions parts of the rock, some of them beautifully picturesque, but all difficult of access. The most singular of these natural excavations is St. Michael's, on the S.W. side; the entrance to which is 1000 ft . above sea-level. The natural animal productions of Gibraltar are wild rabbits, woodcocks, teal, partridges, snakes, and monkeys; the latter of a dark fawn colour, and without tails. When seen from a ship's deck, no

## GIDLEIGII

appearance of vegetation presents itself on the rock, the whole having an exceedingly barren and forbidding aspect; but it is not in reality so destitute in this respect as it seems; acacias, fig, and orange trees growing freely, together with a great variety of odoriferous plants. The climate is temperate during the greater part of the year; and, even in the summer months, the excessive heat is allayed by a refreshing seabreeze that sets in during the forenoon, and continues till sunset. The temperature in winter is considerably higher than in the neighbouring country; so that the snow, which falls but seldom, soon disappears.

Vast sums of money, and an immense amount of labour, have been spent in fortifying this celebrated stronghold. Numerous caverns and galleries, extending 2 to 3 m . in length, and of sufficient width for carriages, have been cut in the solid rock; forming safe and sheltered communications from one part of the garrison to another, without being exposed to the fire of an enemy, in cases of attack. Along these galleries, at intervals of every 12 yds., are port-holes bearing upon the neutral ground and bay; while trees, shrubs, and flowers of various kinds, have been planted at different points, both for ornament and utility. On the summit of the rock there are several barracks, towers, and fortresses. Of late years the fortifications have been carefully strengthened at every vulnerable point. The total number of guns now mounted on the rock is said to be not less than 1000. The principal defences are on the W. side, fronting the bay; but there is also a battery on the E. side, though the steepness and ruggedness of the rock render it almost unnecessary.

The rown of Gibraltar is situated on the W. side of the peninsula, terminating in Europa Point, and fronts the Bay. It consists chiefly of one spacious street, about $\frac{1}{2} \mathrm{~m}$. in length, lincd with shops, and paved and lighted. The principal

the town and rock of gibralitak,-trom Chapuy, Lespague, between 3000 and 4000 , of all arms. boats, with the most destructive effect.
the settlement is treated as a garrison-town, the power of enacting laws being vested in the governor alone. All criminal cases are determined according to the laws of England. Every precaution is taken to prevent the increase of new residents. Foreigners are permitted to remain during specified periods only, and on giving the required security. The population in 1850 amounted to 13,123 ; of which 3641 only were females. The strength of the garrison is generally

Gibraltar, under the name of Calpe, and Mount Abyla, now called Apes' Hill, opposite to it on the African coast, were called by the ancients the Pillars of Hercules; and in very early ages were regarded by the people dwelling E. of them as the western boundary of the world. Gibraltar came into possession of the English, by conquest, in 1704; it has been since repeatedly besieged, but always without success. The last, and most formidable attack made on it, occurred in September, 1782 ; when the Spaniards, aided by a powerful fleet and army from France, assailed the fortress with floating batteries; but were defeated with great loss by the garrison, commanded by General Elliot. On this occasion an incessant discharge of red-hot shot was maintained on the attacking

The Bay of Gibraltar; formed by Europa Point on the E., and Point St. Garcia on the W. It is of a semicircular form, about 6 m . in length, and $4 \frac{1}{2} \mathrm{~m}$. in breadth; depths varying from 4 to 260 ft . The greatest depths are at the entrance, lessening gradually towards the head of the bay. The tide rises 4 and 5 ft . The best anchorage is from off the middle of Algesiras, W. side of the bay, towards Palmones river; also on the W. side, and near its head. The shipping is protected on the British side by two formidahle moles, called the Old and New Mole, one on the N. and the other on the S. side of the town of Gibraltar. The former ruus 1100 ft . into the sea; the latter 700 ft . An elbow formed by the sliore affords shelter for large vessels in winter ; the furthest out lying in 6 and 5 fathoms. Opposite the town of Gibraltar, on the W. side of the bay, is the Spanish town Algesiras.

The Strait of Gibraltar. The narrow channel between the S. part of Spain and the N. of Africa, forming the entrance to the Mediterranean from the Atlantic; its width at the narrowest part is about 15 m .; greatest depth, 960 fathoms. Through this strait a powerful central current, running at the rate of from 3 to 6 m . an hour, sets constantly from the Atlantic into the Medi-
buildings are the governor's and lieutenant-governor's houses, the Admiralty, naval hospital, victualling office, and barracks, and a handsome theatre. There are Protestant and R. Catholic churclies, a Methodist chapel, and four Jewish synagogues; seven regimental, and two public schools, public libraries, \&c. There are also a lunatic asylum, almshouses, \&c. The water for the supply of the town and garrison is collected during the rainy season; the roofs of the houses being so constructed as to receive the falling rain, which subsequently finds its way to a tank beneath, with which every house is provided. Gibraltar is a free port, but its trade has greatly declined within the last half century. It still, however, continues to be a valuable entrepôt for the distribution of British manufac-
tures to the Barbary States, tures to the Barbary States, and to the different countries bordering on the Mediterranean. Cottons, woollens, \&c. are imported from England; sugars and rum from the West Indies; tobacco, rice, and flour, from America; and wines, silks, wax, \&c. from the East. The chief export is wine. The revenue of Gibraltar, for the year 1849, was $£ 29,770$; and the expenditure, $£ 31,117$; the difference being met by a
parliamentary vote in aid. No executive or legislative parliamentary vote in aid. No executive or legislative
council exists here. The administration is vested in the governor, who is also commander-in-chief of the troops; and
terranean. But there are also two lateral currents-one on the European, and one on the African side; each of them about $2 \frac{1}{2} \mathrm{~m}$. broad, and flowing at about the same rate as the central current; and ebbing and flowing with the tide, setting alternately into the Mediterranean and into the Atlantic. An excess of water is constantly flowing into the former from the latter, to supply the loss sustained by evaporation.

GIBRALTAR (San Antonio de), a tn. Venezuela, dep. Zulia, prov. of, and 103 m. S.E. Maracaybo, on a small river of same name, which falls into the lake of Maracaybo. It is situated in the midst of an extremely fertile region, where cacao and other tropical productions are raised in abundance. It was founded in 1552 ; but has suffered greatly from the incursions of Indians and pirates. Pop. 3500.

GIDDING, three pars. Eng. IIuntingdon :-1, (-Great); 2050 ac. Pop. 529.-2, (-Little); 640 ac. Pop. 45.-3, (-Stecple); 1080 ac. Pop. 110.

GIDE $\AA$ A, a river, Sweden, Hernozands län, rises about lat. $64^{\circ} 32^{\prime}$ N.; lon. $17^{\circ} 25^{\prime}$ E.; flows S.E., passing the small town of Gidea, forming some small lakes, and falls into the gulf of Bothnia, in lat. $63^{\circ} 20^{\prime} \mathrm{N}$., after a course of above 100 m .

GIDLEIGFI, par. Eng. Devon; 2060 ac. Pop. 182.

GIEBOLDEHAUSEN, or Giboldehausen, a vil. Hauover, prov. Hildesheim, cap. bail. of same name, l. bank, Ruhme, 14 m . E.N.E. Göttingen. It is an old place, contains a R. Catholic church, and has manufactures of linen. Pop. th. 2140 ; bail. 8099.

GIEN, a tn. France, dep. Loirct, 38 m. S.E. Orleans, r. bank, Loire, here crossed by a fine bridge of 12 arches. It has an imposing aspect, and is well built, partly on a height, crowned by the church of St. Louis and an old chateau in good preservation, now containing the law courts and government offices. It has several other antique edifices; manufactures of delftware and serges ; a brewery, a tannery, and some trade in wool. Pop. 5107.

GIENGEN, a to. Würtemberg, circle Jaxt, on the Brenz, 7 m . S.E. Ileidenheim. It has two churches, one of them a handsome edifice, with two towers; a townhouse, hospital, and Latin school. Manufactures of linen and cotton cloth, and a paper and other mills. There are mineral springs in the vicinity. Giengen suffered much from all parties during the Thirty Years' War. Pop. 2000.

GIERSDORF, several places, Prussia, particularly-1, (Ober-Wüste-), prov. Silesia, gev. of, and 33 m. S. W. Breslau, at the source of the Weistritz, with a Protestant and a R. Catholic church. I'op. I152.-2, A vil., prov. Silesia, gov. of, and S.W. from Liegnitz, with a Protestant and a R. Catholic church, and a paper, saw, and other mills. Pop. 1388.

GIESMANNSDORF, several places, Prussia, particu-larly-1, Ober, Mittcl, and Nieder, a vil., prov. Silesia, gov. Liegnitz, 10 m. S.W. Bunzlau, with a castle, a Protestant church, limekilns, tile-works, and numerous mills. Pop. 2028. -2 , A vil. prov. Silesia, gov. Liegnitz, circle, Sprottau. It consists of three separate portions, and contains a castle, a Protestant and a R. Catholic church. Pop. 1183.-3, A vil. same prov. Silesia, and gov. Liegnitz, circle, Bolkenhain, with a Protestant and a R. Catholic church, and a mill. Pop. 1245.

GIESSEN, a tn. Hesse-Darmstadt, cap. prov. Oberhessen, beautifully situated, r. bank, Lahn, and completely surrounded by water, 30 m . N. Frankfort. It was originally fortified, but the ramparts have been levelled, and converted into agreeable walks. It is still entered, however, by four gates; is substantially, theugh very irregularly built; and contains three public squares, with a number of private mansions deserving of notice. The principal public buildings are the castle, now cenverted into govermment offices; several churches, the townhouse, the burgher hospital, the arsenal, now used as a magazine ; the barracks, and, above all, the buildings of the university, which was founded in 1607, is provided with 58 teachers, attended (1845) by 512 students, and possesses a library of 36,000 volumes, obscrvatory, botanical garden, valuable philosophical apparatus, and other collections. Among the professors, the most distinguished name at present (1852), is that of the celebrated chemist, Liebig. Besides the university, Giessen possesses a gymnasium and several other superior schools. The manufactures consist of hats, hesiery, candles, soap, red and white leather, weapons, articles in gold and silver, liqueurs, vinegar, and tobacco ; and there are also breweries, oil and other mills; a trade in cattle, a weekly market, and several annual fairs. Pop. 8105.

GIETERVEEN, a vil. Holland, prov. Drenthe, 10 m . E. by N. Assen, with a Reformed church and school, a cornmill, some linen-weaving, and waggon-making. Pop. agricultural, 595.

GIETHOORN, a vil. IIolland, prov. Overijssel, 16 m . N. Zwolle, composed of two rows of houses, in the centre of which is a wind corn-mill, and the Reformed church, an elegant building. It also has a Baptist church, and two schools. The iulabitants are chiefly engaged in turf-cutting and cattle rearing. Pop. 1400.

G1FFORD, a vil. Scotland, co. of, and 4 m . S.S.E. IIaddington, on a rivulet of same name; houses are all of stone, and though not uniform, well built. It has a venerable parish church, a Free church, and three well-conducted schools. Inhabitants chiefly employed in agriculture; two annual fairs are beld in the village. Joln Knox, the Reformer, is gencrally supposed to have been a native of Gifford; and Witherspoon, an eminent divine, and moral and political writer of last century, was born in the manse. Pop. 525.-(Local Correspondent.)

GIFHORN, a tn. Ilanover, gov. of, and 53 m . S. Lüneburg, cap. bail. of same name, at the confluence of the Ise with the Aller. It was once fortified, but is now open; contains a castle now used as a courthouse, a clurch, and hospital, and raises a good deal of garden produce. Pop. tn. 2269; bail. 16,562.

GIGANTINU, a mountain, isl. Sardinia, div. Sassari, prov. Ozieri, a little S.E. of Tempio. It is the culminating point of the chain of Limbarra, and rises almost perpendicularly above the extensive plain of Ozieri; leight, 4101 ft .

GIGGLESWICK, a vil. and par. England, co. York (W. Riding). The village, $50 \frac{1}{2} \mathrm{~m}$. W. N.W. York, is neatly built; contains a handsome church and a somewhat celebrated free grammar school, founded by Edward VI., in which Archdeacon Paley received the rudiments of his education. In the vicinity is a remarkable ebbing and flowing well, the water of which rises and falls in 25 minutes-a phenomenon supposed to be caused by the filling and emptying of a natural syphon. Area of par. 17,090 ac. Pop. vil., 875; par. 4134.

GIGHA, a small isl. Scotland, about $1 \frac{1}{2} \mathrm{~m}$. off W. coast, co. Argyle, between Islay and Kintyre; lat. $55^{\circ} 43^{\prime} \mathrm{N}$.; lon. $5^{\circ} 45^{\prime}$ W., about 6 m . long, and about 2 m . broad at the broadest part. Its coast is rocky on the W. side, but at the two ends, and on the E. side, are beautiful sandy beaches; and there are three bays, all of them having good anchorage. The island is generally low, with exception of one elevation of about 400 ft ., and its soil fertile and tolerably well cultivated. At the S.W. end is a remarkable subterranean passage, into which the sea rushes with great violence, emitting a thundering noise on its return, occasioned by the rolling of large stones. Pop. (1841), including that of a small island, close by, called Cara, 550 .

GIGLIO (Isor.a di) [anc. Agilium], an isl. off the coast of Tuscany, about 8 m . S.W. of the peninsula of Mount Argentaro; area, about 8 sq. m., very rugged surface, covered in many parts with lofty granite hills. On the top of one of them stands the town of Giglio, defended by several towers. It contains a parish chureh; and immediately below is a small gulf, which forms a kind of natural harbour. The soil is generally fertile, and when not occupied by wood is chiefly appropriated to the culture of the vine. The granite quarries were worked by the Romans. Pop. 1886.

GIGNAC, a small tu. France, dep. Ilérault, 17 m . W.N.W. Montpellier, 1. bank Hérault; in a district rich in vines, mulberries, and olives. It has an antique church and bridge; with manufactures of verdigris, brandy, woollen yarn; and a trade in olives, confections, brandy, \&c. Pop. 2471.

GIGNOD [Latin, Ginodium], a tn. Sardinian States, div. of, and 3 m . N.N.W. Aosta, r. bank, Banteggio. It contains a communal school, and the remains of an ancient castle. I'. 1260.

GIGUELA, a river, Spain, New Castile. It rises on the W. Slope of the Sierra di Cucnca, prov. of, and 15 m . W. by S. the town of that name, flows circuitously S.S.W., and after a course of 90 m . joins r. bank, Guadiana, 35 m . N.E. CiudadReal. Its principal afluents are the Rianzares on the right, and the Zencara on the left.

GIJON, a scaport tn. Spain, Asturias, prov. of, and 19 m . N.N.E. Oviedo, on the Bay of Biscay. The old town occupies the upper part of the slope, and is partly surrounded by ancient walls; the more modern portion extends to the shore, both being commanded by a fortress and several batteries. In general the streets are wide, clean, and paved; the houses well built and conmodious. It has a small parish church and numerous chapels; a townhouse, prison, hospital, nautical and several primary schools, a custom-house, triumphal arch, economic society, and an Augustine convent, now converted into a cigar-manufactory, which employs 1400 persons; a glass and bottle work; and some coasting trade in coal, grain, cider, paving-stones, and colonial produce. Fishing, and salting fish, are carried on to some extent. The anchorage is good, and the harbour safe, theough rather difficult of access; and in 1844-1845 was visited by 883 vessels, of which 734 were coasters, tonn. 57,324 . Coal exists in the vicinity, but is not wrought. Pop. 6213.-(Madoz.)

GIL (San), or St. Giles, a tn. New Granada, dep. Boyaca, prov. Scorro, 64 m . S.W. Pamplona, on an affluent of the Suarez, here crossed by a stone-bridge. It was founded in 1690; has a college, manufactures of tobacco and cotton cloth; 1 and an extensive trade in agricultural producc. Pop. 6000.

GILA, a considerable river, N. America, in the latter part of its course forming the boundary between the U. States and the Mexican State of Sonoro. It is an affluent of the Colorado del Occidente, and has its sources in the mountains of Santa Mimbres, in the State of New Mexico; about lat. $32^{\circ} 45^{\prime}$ N.; and E. of lon. $108^{\circ} 30^{\prime}$ W.; from which it flows W., and joins the Colorado, at lat. $32^{\circ} 40^{\prime} \mathrm{N}$. ; and W. of lon. $114^{\circ} 0^{\circ} \mathrm{W} .$, just before it falls into the Gulf of California; its whole course being about 450 m . About lon. $108^{\circ} 40^{\prime}$ W., or probably about 60 m . from its source, it is 50 ft . wide, with an average depth of about 2 ft ., swift and clear ; the banks covered with trees and a luxuriant vegetation; the former consisting chiefly of cotton-wood, a new sycamore, mezquite, pala, a few cedars and larch. Here also a species of trout abounds. Further down, or about lon. $110^{\circ} \mathrm{W}$., the banks of the stream and the country around assume a wild, rugged, and inhospitable appearance; the mountains of trap, granite, and red sandstone, in irregular and confused strata, but generally dipping sharply to the S., cluster so closely together, that it becomes difficult to tell from what direction the river comes, or in what direction it is going. A few miles lower down, the valley of the Gila widens, and is covered with a dense growth of mezquite, (Acacia prosopis), cotton-wood, and willow, the pitahaya, and every other variety of cactus; the latter flourishing in great luxuriance. Little, or rather nothing, is known of the tributaries of the Gila. The Rio San Pedro, which joins it from the S., and the rivers San Francisco, Salines, and Bonita, from the N., are almost the only affluents of which anything has been ascertained. Most of the tributaries are insignificant at their junction with the Gila, and can be stepped across, the result of their traversing deserts of sand, and arid regions unwatered by rains, by which their waters are gradually absorbed. The Gila is navigable for small boats only, and that but to the village of Pijmo, about 100 m . above its junction with the Colorado.
The ruins of numberless houses are found along the whole course of the Gila, proving that these regions were much more populous at a former period than they are now. These ruins are uniformly of the same kind ; not one stone now remains on the top of another; and they are discoverable only by the broken pottery around them, and stones laid in regular order, showing the traces of the foundation of a house. Most of these outlines are irregular, and vary from 40 by 50 , to 200 and 400 ft . front. The stones are unhewn, and are mostly of an amygdaloid, rounded by attrition.-(Notes of a Military Reconnoissance in California, by Lieut. Col. Emory, Washington, 1848.)

GILAD, a vil. Hungary, Thither Theiss, co. Temesvar, on an arm of the Temes, about 4 m . from Zsebely. It contains a Greek non-united parish church. The inhabitants are Wallachians. Pop. 4000.

Gilbert islands, or Kingsmill Group, a group of 15 isls. Pacific Ocean, between lat. $1^{\circ} 0^{\prime}$ S., and $2^{\circ} 30^{\prime} \mathrm{N}$. ; and lon. $172^{\circ} 0^{\prime}$ and $174^{\circ} 30^{\prime} \mathrm{E}$. They are of coral formation, all low; the highest land in the group not exceeding 20 ft., and are fast wearing away by the action of the sea. Their soil, which is but a few inches in depth, is of coral, sand, and vegetable mould. Their cultivation consists, for the most part, in that of the cocoa-nut and pandanus, which are the chief articles of food. The natives also cultivate, with great care, a species of the taro (Arum cordifolium.) The bread-fruit tree is to be found on the N . islands, but it has not been seen on the S . The climate of these islands is equable; and, though of high temperature, is found to be less oppressive than in most tropical countries. For the most part constant breezes prevail, and frequent rain falls; which moderates the great heat, and at the same time imparts fertility to the soil. The islanders of this group differ in their personal traits from those of Polynesians, and more nearly resemble the Malays. Their colour is a dark copper; hair fine, black, and glossy; nose slightly aquiline, large mouth, full lips, and small teeth; average height about 5 ft .8 inches. The women are much smaller in proportion than the men, with delicate features, and slight figures. In character, they are deceitful and dishonest, and, like most savages, treacherous and cruel; but they are hospitable and generous, and kind and affectionate to their children. Another characteristic, and a sufficiently remarkable one, is a predisposition to despondency and sullenness, which often drives them to commit suicide. Having but little intercourse
with strangers, a small amount only of the manufactures of civilized nations have found their way into these islands. The pop. of the entire group has been estimated at 60,000 .(U. States Explor. Exped.)

GILBERTSTOWN, par. Irel. Carlow; 3169 ac. P. 398.
GILCRUX, par. Eng. Cumberland; 1750 ac. Pop. 464.
GILDONE, a tn. Naples, prov. Sannio, about 6 m. S.E. Campobasso, 1. bank, and near the source of a small affluent of the Tappino. It has several annual fairs. Pop. 2200.

GILENA, a vil. and com. Spain, Andalusia, prov. of, and 56 m. E. by S. Seville, in a plain terminated by the S. side of the Sierra d' Estepa. It consists of a number of tolerably regular, but ill-paved streets, generally lined by low ill-built houses; contains a parish church, courthouse, and two primary schools; and has a trade in corn and oil. Pop. 1688.

GILES (St.), several pars. Eng. :-1, Berks; 2640 ac. Pop. 6805.-2, (-in-the-Heath), Devon ; 3280 ac. Pop. 375. -3 , (in-the-Wood), Devon; 3330 ac . Pop. 915.

GILESTON, par. Wales, Glanorgan ; 343 ac. Pop. 43.
GILFORD, a market tn . Ireland, co. Down, $13 \frac{1}{2} \mathrm{~m} . \mathrm{N}$. Newry, on the Bann, here crossed by a handsome stone-bridge. It has R. Catholic, Presbyterian, and Wesleyan Methodist chapels; a national school, linen bleacheries, a large flax spinning-mill, and two fairs annually. In the ncighbourhood is a chalybeate spring; a mile off, the canal from Lough Neagh to Newry passes. Pop. (1841), 643.-(Local Correspondent.)

GILGE:-1, A river, Prussia, one of the mouths of the Memel. It falls into the Kurische-haff, 34 m . N.E. Königs-berg.- 2 , A vil. at the mouth of the above river. Pop. 990 .

GILGENBURG [Polish, Dombrowno], a tn. E. Prussia, gov. of, and 32 m. N.E. Königsberg, on the Wicker, which joins two small lakes well stocked with fish. Pop. 1262.

GILGHIT, a small independent country, Asia, on the S. declivity of the Hindoo Koosh, lying between Bultistan, or Little Tibet on the E., and Kafiristan on the W. It consistsprincipally of one large valley; the other parts are mountainous and barren. The inhabitants appear to be Mahometans, and resemble, in their social habits, their neighbours, the Kafiristans. Gilghit, its cap., is situated on 1. bank of a river of the same name, 150 m . N.N.E. Attock; lat. $35^{\circ} 35^{\prime} \mathrm{N}$. ; lon. $74^{\circ} 15^{\prime}$ E. The river rises in the Bolor Mountains, about lat. $36^{\circ} 10^{\prime} \mathrm{N}$. ; lon. $73^{\circ} 22^{\prime}$ E.; flows S.S. W., and falls into the Indus at Sygoor ; lat. $35^{\circ} 5^{\prime} \mathrm{N}$. ; lon. $74^{\circ} 40^{\prime} \mathrm{E}$.

GILI-Ang, or Gilion, an isl. Indian Archipelago, N. coast, Java, 5 m . E. Madura, on a reef. Circumference about 7 m .; well cultivated. Pop. 1800.

GILL, a beautiful and picturesque lake, Ireland, on the borders of cos. Sligo and Leitrim, $2 \frac{1}{2} \mathrm{~m}$. S.E. Sligo, about 5 m . long, 1 m . to $1 \frac{1}{2} \mathrm{~m}$. broad, 20 ft . above sea-level, and adorned with a number of small but well-wooded islands.

GILLES (St.), several places, Belgium :-1, A vil. and com., S. Brabant, about 1 m . S. Brusscls, of which it forms a suburb. Pop. chiefly agricultural, 2701.-2, (-lez-Termonde), A vil. and com., prov. E. Flanders, 1 m. E. Termonde; with a tannery and a brewery; but weaving and agriculture are the chief occupations. Pop. 2824.-3, (-Waes, St.), A vil. and com., prov. E. Flanders, 21 m. N.E. Glient. Linen-weaving and agriculture are the chief occupations; but there are also breweries, tanneries, flour mills, and a trade in cattle. P. 3984.

GILLES (St.), or St. Gilles-les-Boucheries, a trading tn. France, dep. Gard, 11 m. S. by E. Nismes, on the Vie and the carnal de Beaucaire. It is built on the slope of a hill, one side of which is very steep, in a country rich in vineyards; and has a church of the 9 th or 10th century, still in good repair, resting on a singularly-vaulted construction called the vis de St. Gilles. It has numerous distilleries, and a busy trade in wine and brandy. Pope Clement IV. was a native of St. Gilles. Pop. 5278.

GILLING, two pars. Eng. York (N. Riding) - $\mathbf{- 1 ; 4 3 3 0}$ ac. Pop. 386.-2; 8790 ac. Pop. 1618.

GILLINGHAM, two vils. and pars. Eng.:-1, A vil. and par. Dorsetshire. The village, $3 \frac{4}{4}$ m. N.W. Shaftesbury, contains a large parish clurch, a Wesleyan chapel, and a free school. Manufacturing is carried on to some extent, but the inhabitants derive their principal support from the valuable pastures and dairy lands in the vicinity. Two fairs for horses, cattle, and sheep, are held annually; area of par. 7220 ac. Pop. 3661.-2, A vil. and par. co. Kent. The village, 2 m . E.N.E. Chatham, was, previously to the rise of the latter, a
place of considerable importance; and its harbour was a principal naval station. A fort was erected here by Charles I., for the protection of the dockyard and navy. William Adams, who discovered Japan towards the end of the sixtcenth century, was a native of this parish; area 3660 ac. Pop. 6059.

GILLINGHAM, AldiSaints and Ginlinngilam (St. Mary), a par. Eng. Norfolk; 1990 ac. Pop. 404.

GILLMORTON, par. Eng. Leicester; 2830 ac. Pop. 866.
GILlolo, Halmahera, or Djillolo, an isl. Indian Archipelago, the largest of the Moluceas; lat. (S. or Cocoanut point), $0^{\circ} 51^{\prime} \mathrm{S}$. ; lon. $128^{\circ} 22^{\prime}$ E. (r.) ; separated on the W. from Celebes by the Molucca Passage, from Papua and Waygiou on the E. by the Gillolo Passage, and from Ceram and Booro on the S. by Pitt's Passage ; extreme length, N. to S., 197 m . ; extreme breadth about 90 m .; area estimated at 6500 sq. m. The island is of singular form ; the result, as in the case of the island of Celebes, to which it has a very remarkable resemblance, of violent volcanic action. It consists of four peninsulas, radiating N., N.E., E.S.E., and S., from a common centre, and having large bays between, named Chiawo, Bitjoli, and Weda; the first about 68 m . N. to S., and 41 m ., narrowing to 15 m . wide; the sccond 40 m . E. to W., and 25 m ., narrowing to $14 \mathrm{~m} . \mathrm{N}$. to S. ; and the third, $62 \mathrm{~m} . \mathrm{S} . \mathrm{E}$. to N.E., by 52 m. , narrowing to 17 m . wide. Gillolo, like several other islands in these seas, rises abruptly from an unfathomable sea; a circumstance unfavourable to its productiveness, since a large portion of the rich soil created by the decomposition of the volcanic rock is washed away into the ocean. It contains a voleano, Gammacanore, 6500 ft . high, now of doubtful activity, but of which an eruption is recorded as having occurred in 1673 . The principal prodnctions of the island are sago, cocoa-nuts, spices, fruits, edible birds' nests, a durable and beautiful wood, well adapted for shipbuilding; pearls and gold dust; horses, horned cattle, and sheep, also abound. Deer, wild boars, and other descriptions of game, are likewise plentiful. The original inhabitants of Gillolo, called Alfoories, are robust, temperate, and brave; but have been gradually pressed into the interior of the island by the Malays, who have established themselves along the coast. The latter are strongly disposed towards commerce, and have an irrepressible predilection for a seafaring life.
Gillolois divided, for administrative purposes, into two parts; the largest, comprising three of the four peninsulas, the S., N., and N.E., is under the anthority of the Sultan of Ternate, laving a pop. of 19,000 ; the other is nominally under the Sultan of Tidor, with a pop. of nearly 4000 , according to a census of 1840.-(Temminck ; Horsburgh ; Earle.)

GILLTOWN, par. Irel. Kildare; 4869 ac. Pop. 1350.
GILLY, a vil. and com. Belgium, prov. Hainaut, 3 m . N.E. Charleroi. The commune abounds in coal ; the mining of which, and nail-making, employ most of the inhabitants. Pop. 6690.

GILMANTON, a vil. and township, U. States, New llampshire. The village, 25 m . N. Concord, has a flourishing academy, and a theological seminary, founded in 1835 : In the township are several tanneries, a cotton factory, and numerous mills. Pop. 3485.

GILSLAND, a hamlet and watering-place, England, co. Cumberland, beautifully sitnated in the vale of the Irthing, between 7 and 8 m . N.E. Brampton; much resorted to for its mineral waters, which have long been famed. Many interesting remains of Roman architecture oceur in the neighbourhood, which also abounds with beautiful and romantie scenery. -(Local Correspondent.)

GILS'TON, par. Eng. IIertford; 920 ac. Pop. 246.
GIMBSHEIM, a vil. Hesse-Darmstadt, Rheinhessen, circle, and $9 \mathrm{~m} . \mathrm{N}$. W. Worms; with a Protestant and a R. Catholic church; a townhouse and two schools. P. 1594.

GIMIGNANO, a tn. Tuscany, 20 m . S.S.W. Florence, on a height. It has three parish churches, several convents, and two hospitals, one of which is for foundlings. Pop. 5818.

GIMINGIIAM, par. Eng. Norfolk; 1240 ac. Pop. 383.
GIMINO, a market tn. Austria, Illyria, about 60 m . from Fiume. It contains a parish and a handsome collegiate church, surmonnted by a lofty tower, and adornad with old altars of marble. Pop. 3558.

GIMONE, a river, France, which rises in the valley of Magnoac, in a branch of the Pyrenecs, dep. Mautes-Pyrénées, flows N.N.E. and joins l. bank, Garonne, about 3 m . S. Castel-
sarrasin, after a course of 65 m . It receives r . the Marcaon and 1. the Lanze, and passes the towns of Saramon, Gimont, and Beaumont de Lomagne. It is nowhere navigable.

GIMONT, a small tn. France, dep. Gers, 15 m. E. Auch, on the Gimone. It consists chiefly of one long street, passing through large markets; and has a parish ehurch, once collegiate, an old and curious edifice; and a trade in grain, wine, and brandy. Pop. 2071.

G1NGEE, or Jhinji, a celebrated fortress, Hindoostan, Carnatic, 40 m . N.N.W. Pondichery; lat. $12^{\circ} 12^{\prime} \mathrm{N} . ;$ lon. $79^{\circ} 28^{\prime} \mathrm{E}$. The fortifications cover the summits, and a great part of the declivities, of three detached rocky mountains, of very difficult ascent, from 400 to 600 ft . high. Gingee has, however, been long abandoned, and a great portion of it is now in ruins. It is noted for its insalubrity.

GINESIO (SAn), a tn. Papal States, deleg. of, and 15 m . S.S.W. Macerata, near the source of the Fiastrella. P. 4919

GINETA (LA), a tn. Spain, Murcia, prov. of, and 12 m . N.N.W. Albacete, in a plain. It contains a parish church, courthouse, prison, and two primary schools ; and has manufactures of woollen and hempen cloth; a trade in corn, oil, salt fish, and rice; and a weekly market. Pop. 2536.

GINGOLPH (St.), [pronounced Shengo], a vil. Switzerland, S. bank, lake of Geneva, 12 m. S.E. Lausanne, and divided by the Morge into two parts; the smaller of which is in Canton Wallis or Valais, and the larger in Savoy. It has a parish church, manufactures of iron-wire nails, and gypsum, and a small harbour. Pop. 598.

GINGST, a vil. Prussia, prov. Pomerania, gov. of, and 12 m. N.E. Stralsund, in a very fertile district of isl. Riigen. It has manufactures of ordinary linen and damask; and a trade in cattle. Pop. 778.

GINNEKEN, a vil. Holland, prov. N. Brabant, $1 \frac{1}{2}$ m. S.W. Breda, with which it communicates by a broad paved road. It has a Reformed and a R. Catholic church, an elegant communal house, and school, and two annual fairs. Inhabitants agricultural; but there are also three breweries, an oil, a bark, and a corn mill. Pop. 833.

GINZO de Limia (Santa Marina), a tn. Spain, Galicia, prov. of, and 18 m . S.E.Orense, on a small stream of same name. It contains a parish chureb, townhouse, and primary school and has manufactures of linen, and a trade in linen and wool. From the number of antiquities found in its vicinity, Ginzo is supposed to occupy the site of an ancient town. Pop. 1065.

GIOJ, a vil. Naples, prov. Principato Citra, 6 m. N.W. St. Vallo. Pop. 1600.

GIOJ̈A, several places, Naples, particularly:-1, A tn. prov. Bari, dist.of, and 21 m . E. Altamura, cap. circondario of same name, on a slope on the E . branch of S . Apennines. Pop. circond., $13,016 .-2$, A vil. prov. Calabria Ultra I., 27 m. N.E. Reggio, near the gulf of its own name. It was almost destroyed by the earthquake of 1783 . Its inhabitants are almost all fishermen. Pop. 429.-3, A tn., prov. Abruzzo Ultra II., dist. of, and 18 m . E.S.E. Avezzano, near the source of the Sangro. Pop. 2125.

GIOJOSA:-1, A tn. and com. Naples, prov. Abruzzo Ultra I., dist. of, and 7 m . N. E. Gerace, on a rugged hill. Pop. 7619.-2, (Vecchia and Nuova), two tns. Sicily, prov. Messina, dist. of, and 4 m. N.W. Patti, not far from the Mediterranean. The old town, once a place of some importance, stood on a lofty eminence, very difficult of access; and, having repeatedly suffered from earthquakes, has been deserted by its inhabitants, who have built a new town on the plain below. The site, thought free from the dangers and inconveniences of the old town, is very unhealthy. Pop. 3308.

GIORGIO (SAN), several places, Naples, particularly :1, A vil. and com. Calabria Ultra I. dist. of, and 15 m . E.N.E. Palmi, near r. bank, Vocalc. It contains four churches, one of them collegiate, and a convent. Pop. 4481.-2, A vil. and com.Calabria Citra, dist. of, and 12 m . W. Rossano. Pop. 1561 . $-3, A$ vil. and com. Principato Citra, dist. of, and 6 m . N.W. Salerno. It contains three parish churches. Pop. 4338.4, A vil. and com. Terra di Lavoro, dist. of, and 18 m . N.E. Gäeta, near r. bank, Garigliano. It has two annual fairs. Pop. $1150 .-5$, A vil. and com. prov. Terra d'Otranto, dist. of, and 9 m . E. Tarentum. Part of the original inhabitants were Albanese. Pop. 1706.-6, (-la Molala), a tn. and com., prov. Principato Ultra, dist. of, and 12 m. N.W. Ariano. Pop. 5213.

137
-7, (-la Montagna), a vil. and prov. Principato Ultra, dist. of, and 10 m. N. Avellino. Pop. 1213.

GIORNICO, or Irnis, a vil. and par. Switzerland, can. Tessin, dist. Leventina, picturesquely situated amid chestnut plantations and lofty water-falls, on the Tessin, here crossed by a bridge, 10 m . N.N.W. Bellinzona. It is well built of stone; contains two churches, both very ancient and interest ing, as furnishing specimens of the earliest form of Christian buildings; and the remains of a tower, supposed to have been built in the 10th century. In 1478 the Swiss confederates here defeated a very superior force, under the Duke of Milan. Pop. 743.

GIOVANNI (San), several places, Italy:-1, A tn. Tuscany, 20 m . S.E. Florence, l. bank, Arno. It has a cathedral, a parish church, and two female convents. It was the birthplace of the painters Masaccio and Giovanni Manozzi. Cutlery is manufactured here. Pop. 3806.-2, (-in-Perciceto), A t . Papal States, leg. of, and 10 m. N. Bologna, on the Cento canal. Pop. 6793.-3,(-Rotondo), A tn. Naples, prov.Capitanata, 18 m. E. Severo, near Mount Gargano. Pop. 4500.-4, (-diCamarata), A vil. and com. Sicily, prov. of, and $22 \mathrm{~m} . \mathrm{N}$. by E. Girgenti. Pop. 3011.

GIOVANNI-in-Fiore, a tn. Naples, prov. Calabria Citra, 27 m . E. by S. Cosenza, at the confluence of the Arvo and Neto. Pop. 5150.

GIOVANNI-in-Galdo, a vil. Naples, prov. Sannio, dist. of, and 6 m . N.E. Campobasso. Pop. 2500.

GIOVENAZZO [anc. Natiolum], a seaport tn. Naples. prov. of, and 10 m . N.W. Bari, on an elevated rock which projects into the Adriatic. It is surrounded by high walls, and is defended by an old castle; is the seat of an archbishop, and contains a cathedral, three other churches, four convents, and two hospitals, one of which is a foundling. Its streets are narrow, dark, and dirty, and have a peculiarly dismal and miserable appearance. Carpets are manufactured. P. 5500.

GIRAl'ETRA, a small ruinous tn., isl. Candia, S.E. coast, 16 m . S.W. Settia.

GIRDLENESS, a headland, E. coast, Scotland, co. Kincardine, forming the S . point of the entrance of the Dee, and the E. extremity of the Grampians, 2 m . S. Aberdeen. It has a lighthouse, with two fixed lights; lat. $57^{\circ} 8^{\prime} 54^{\prime \prime} \mathrm{N}$.; lon. $2^{\circ} 7^{\prime} 15^{\prime \prime}$ W. (г.)

Gingeif, or Jirgeh, a modern prov. and tn. Upper Egypt. The Prov. occupies both sides of the Nile, and contains some fertile and highly-cultivated plains. The town, on 1. bank river, 110 m . S.S.W. Cairo; lat. $26^{\circ} 20^{\prime}$ N.; lon. $31^{d} 5 \bar{o}^{\prime}$ E.; is built with irregularity, but has some mosques, lazaars, squares, and a Latin convent or monastery, the oldest R. Catholic establishment now in Egypt. Girgeh was formerly a quarter of a mile from the river, but it is now on the bank, and part of it has bcen already washed away by the stream; showing the great changes which have taken, and still are taking place, in the course of the Nile. P. 10,000.

GIRGENT1, a prov. Sicily, S.W. coast; greatest length, N.W. to S.E. $84 \mathrm{~m} . ;$ mean breadth, about 22 m ; arca, about 1200 sq. ml The greater part of the surface is covered by ramifications of the Neptunian Mountains, which have their highest points in the N., and descend rapidly S. to the shore. They are intersected by numerous valleys, which are remarkably fertile, and produce in abundance corn, oil, and wine. The pastures also are excellent, and much good cheese is made. The principal streams are-the Salso, which bounds the prov. on the S.E.; the Belice, which bounds it on the N.W.; and the Platani, which traverses it centrally, in a W.S.W. direction. The most important mineral products are-bitumen, naphtha, sulphur, and salt. Some fine agates also are found. The manufactures and trade are unimportant. For administrative purposes the province is divided into three districts-Girgenti, the capital; Bivona, and Sciacca; subdivided into 16 circondario. Pop. 212,390.

GIRGENTI, or Gergenti, a tn. S.W. coast, Sicily, cap. prov. of same name, 58 m . S.S.E. Palermo ; lat. (mole light), $37^{\circ} 15^{\prime} 36^{\prime \prime} \mathrm{N}$. ; lon. $13^{\circ} 31^{\prime} 45^{\prime \prime} \mathrm{E}$. (R.); on the slope of a hill, 1200 ft . in height. It presents rather an imposing appearance, but is irrcgularly built ; streets mean, dirty, and wretchedly paved, and so stcep and narrow as to be inaccessible to carriages. It contains a catledral, forty-five churches, fifteen convents, a seminary, an orplian hospital, and a lyceum. The inhalitants are not remarkable for
industry; but the place has a considerable export trade in corn, oil, fruit, and sulphur. Three or four miles N. from the town is a mud volcano, called Maccaluba. On a rocky platform, E. of Girgenti, stood the famous ancient city of Agrigentum, whose ruined temples, and other superb remains, bear evidence to its former grandeur. Among the more remarkable of the former are the temples of Juno, Coneord, Vulcan, and IIercules. That of Concord, which is 128 ft . long by 54 broad, is the most perfect specimen of a Grecian temple now in existence. Of the temple of Vulcan, two elegant columns are now all that remains. Near the latter is the bed of the Piscina, a fish-pond in which fish were kept for public festivals. It is now covered with orange-groves and gardens. The population of Agrigentum, which was founded 580 b.c., is said to have been 800,000 . The country around Girgenti is fertile and pleasant. Pop. 17,767.

GIRIFALCO, a vil. and com. Naples, prov. Calabria Ultra II., dist. of, and 10 m. S. W. Catanzaro. It has an annual fair, which lasts three days. Pop. 3475.

GIRISHK, a fort and vil. Afghanistan, r. bank, Helmund, 70 m . W. Kandahar ; lat. $31^{\circ} 46^{\prime} \mathrm{N}$. ; lon. $64^{\circ} 18^{\prime} \mathrm{E}$. The fort, which is not of great strength, is built upon a mound, about 2 m . from the r. bank of the river, which is here deep and rapid in the spring, and about 1000 yards wide; but in autumn, when lowest, easily fordable. The country immediately adjacent to the river is very fertile, but neglected.

GIRLEY, par. Irel. Meath; 5060 ac. Pop. 1556.
GIROMAGNY, a small tn. France, dep. Haut-Rhin, 35 m . S.W. Colmar on the Savoureuse, and in the slopes of the Vosges. It has manufactures of calico and cotton hosiery, some power-loom factories, cotton spinneries, brick and tile fields, \&c. In the environs are mines of copper, lead, cobalt, zinc, \&e.; but they are not worked. Pop. 2682.

GIRON, a small tn. New Granada, dep. Boyaca, prov. of, and 46 m . W. Pamplona. It is well built; had formerly a brisk trade, now greatly declined.-The istrict is fertile in tobacco, cacao, cotton, and sugar.

G1RONDE, a river, or rather estuary, France, forming the common month of the Garonne and Dordogne. It commences about 15 m . below Bordeaux, and, to its termination in the Bay of Biscay, has a length of 50 m . in a N.N.W. direction. Its breadth at its upper extremity is 2 m ., but gradually widens till it attains its maximum of nearly 7 m . On approaching point Graue, it again narrows to 3 m . It has great depth of water; and, when once within it, any number of vessels can find complete shelter from all winds in the roads of Verdon; but its entrance is much encumbered with saudbanks, and the tide-rushing in with immense rapidity, particularly at the time when the waters of the Dordogne are low-forms a bore, here called Mfascaret, of from 12 to 15 ft . in height, which, unless much precaution is used, is attended with considerable danger. This estuary gives its name to one of the departments of France.

GIRONDE, a dep. France, bounded N. by the estuary which gives it its name, and dep. Charente; E. Dordogne and Lot-et-Garonne, S. dep. Landes, and W. the Bay of Biscay; greatest length, S.E. to N.W., 107 m. ; greatest breadth, E. to $W ., 75 \mathrm{~m}$. ; area, $3610 \mathrm{sq} . \mathrm{m}$. The surface is generally flat, and consists of three parts, distinguished from each other not only by natural boundaries, but by other peculiar physical features. The first, situated on the r. bank of the Dordogne, consists of plains occasionally diversified by low calcarcous ridges, and presents a pleasing succession of corn-fields, pastures, plantations, and vineyards. In the N.E. rich rural scenes are formed by the valleys of the Isle and the Dronne. The second part comprehends the district Entre-Deux-Mers (so called from its position between the Dordogne and Garonne), and the ancient Benauge, abounding in picturesque beauties, and entitled, by its fertility, to rank with the fine valleys of the Loire and the Saône. The third part, situated on the 1 . bank of the Garonne, is of a very different description. It includes the whole sea-coast of the department; and consists, with few exceptions, of a parched, arid, and often almost desolate tract, belonging to the Landes; though its sandy gravel, along the Gironde, can boast of raising the vine, from which Medoc, one of the first-rate clarets, is obtained. The whole department, with exception of the W., which sends its waters either directly to the coast or the long series of lagoons by which it is lined, belongs to the basin of the Gironde, which
is formed in its interior by the junction of the Dordogne and Garonne. The only other streams deserving of notice are the Leyre, which discharges itself into the most $S$. lagoon; the Ciron, a left affluent of the Dordogne; and the Isle, with its tributary Dronne. The climate differs much in the aeparate divisions, but is generally characterised by great mildness, and a superabundance of moisture. The quantity of waste land is very great, amounting to more than one-third; while the arable land is rather less than one-fourth of the whole surface. Of the remainder about one-seventh is occupied by vineyards, and one-ninth under wood. The corn raised falls considerably short of the consumption, but much hemp and tobacco are grown; and the fruits, consisting chiefly of prunes, figs, and almonds, are excellent. The great staple product is wine, much of which is of the finest quality, and is well known in commerce under the general name of Medoc, or the particular names of Chateau Margaux, Lafitte, and Latour. The quantity grown amounts to about 20,800 pipes. The forests of the department are very extensive. In the interior they consist chiefly of oak, but in the neighbourhood of the coast form part of the vast forest of pines, which stretches withont interruption along the sandy deserts of the Landes. The minerals are unimportant, but large quantities of salt are obtained from the marshes and lagoons. The manufactures are very various; and include the building of vessels, chiefly large merchantmen; woollen and cotton tissues, delftware, liqueurs, and articles in iron, steel, copper, silver, and gold. The trade, which has its centre at Bordeaux, is very important. The principal exports are wine, brandy, corn, flour, fruit, rosin, liqueurs, \&c.; the principal imports are colonial produce, cork, \&c. For administrative purposes, Gironde is divided into six arrondissements - Bordeaux, the capital; Bazas, Blaye, Lesparre, Libourne, and La Réole; subdivided into 48 cantons, and 544 communes. The great body of the inhabitants are nominally R. Catholic, but the number of l'rotestants is not inconsiderable. Pop. 602,444.

GIRONS (St.), a tn. France, dep. Ariège, 23 m . W. Foix, on the Salat, over which are two inarble bridges. It is finely situated at the foot of the French Pyrenees, in a valley surrounded by fertile hills, at a point where five valleys and three streams meet (the Salat, Lez, and Baup). The town itself is old, and has few remarkable buildings, except the parish chureh, a quaint gothic pile, with a lofty spire. On the opposite side of the river, in the suburb of Villefranche, where are the newest and best houses, and an antique chatean, now used as a courthouse and prison. St. Girons has a communal college, manufactures of coarse linens and woollens, with quarrics of ironstone and marble in the environs. l'op. 3081.

GIR'TIION, par. Scot. Kirkeudbright; 15,480ac. P. 1874.
GIRTON, two pars. Eng.:-1, Cambridge; 1700 ac. Pop. 351.-2, Notts, 1210 ac. Pop. 206.

GILVAN, a seaport, market tn., and par. Scotland, co. Ayr.-The town, situated at the head of a fine bay, l. bank, Girvan, near its junction with the sea, 18 m . S.W. Ayr ; lat. $55^{\circ} 14^{\prime} \mathrm{N}$. ; lon. $4^{\circ} 50^{\prime} \mathrm{W}$.; is composed chiefly of cottages, of one story, and lias, on the whole, a mean appearance. It contains the parish church, situated in the centre of the town; a library, several benevolent societies, a U. Presbyterian church, and small congregations of R. Catholics and Methodists. The inhabitants are chiefly weavers, and of Irish extraction; extremely poor, ill-lodged, and generally of uncleanly habits. They are employed principally by the manufacturers of Glasgow and Paisley.-The marboun has been improved of late years, and a new quay built, which has had the effeet of bringing a considerable trade to the port. The principal exports are grain and coal.-The PARISH is 9 m . by 4 mm .; area, $19,000 \mathrm{ac} . ;$ soil, gencrally fertile, and in good cultivation. I'op. (1841), 7424.

GIRVAN, a river, Scotland, co. Ayr. It rises in a small lake, 20 m . S. by E. Ayr, flows first N.W. and then S.W., falling into the Irish Sea at the town of same name, opposite Ailsa Craig. Total course about 30 m .

GISBURN, par. Eng. York (W. Riding) ; 18,190 ac. Pop. 2191.

GISLEHAM, par. Eng. Suffolk; 1320 ac. Pop. 254.
GISLINGHAM, par.Eng. Suffolk; 2940 ac. Pop. 669.
GISORS, a tn. France, dep. Eure, 33 m. E.S.E. Rouen, on the Epte, begirt with antique walls, surrounded with fosses,
now turned into pleasant promenades. On a hill close to the Epte, at the extremity of the town, are the remains of an extensive castle, one of the chief strongholds of the country at the time it was built, in the 11 th century. Gisors has a communal college, a parish church, a large spinnery and bleachery, and manufactures of soldiers' belts and calicoes; tanneries and breweries, a trade in grain, and, in the environs, copper and zinc flatting mills. Pop. 3134.

GISSER, an isl. Indian Archipelago, one of the Banda group. It is low and sandy, surrounded by a coral reef. It was formerly, but is no longer inhabited; the people, in consequence of war, having all lled to Ceram-Laut and other islands.

GISSI, a tı. Naples, prov. Abruzzo Citra, 17 m . S.L. Lanciano, near r. bank, Asinello. Pop. 3090.

GISSIGHEIM, a vil. Baden, circle Lower Rhine, neer Bischofsheim on the Brehm. It contains a castle, and a parish church built in the Byzantine style, and has a distillery, brewery, and several mills. Pop. 968.

GISSING, par. Eng. Norfolk; 1950 ac. Pop. 498.
GISWEIL, or Gysw Unterwalden, on the Lauwibach, from the inundations of which the village has often severely suffered, 6 m . S.S.W. Sarnen. It contains a handsome church, situtaed on a height. A little above the village, the outlet of the Lungerusce forms two fine cascades. Pop. 1406.

GITS, a vil. and com. Belgium, prov. W. Flanders; 15 m . N.E. Ypres, with manufactures of hosiery, candles; brewerics, vinegar works, \&c. Pop. 3825.

GITSCHIN, or Gıczin [Latin, Gicziniumn], a tn. Bohemia, circle Bidschow, in a plain among mountains, on the Cydlina, 48 m . E.N.E. Prague. It consists of the town proper, surrounded by walls, with three gates, and of four suburbs; is the seat of a civil and criminal court, and of several public offices; contains two churches, and two chapels, a fine old castle, a Jesuit college, now used partly for government offices, and partly for barracks ; a townhouse, a gymnasium, a high school, a military school, and hospital; and bas some general trade, and a trade in corn and cattle, a weekly market, and four large annual fairs. Pop. 3828.

GITTELDE, a tn. Brunswick, on a slope of the Harz, above l. bank, Aue, $35 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Jrunswick. It contains three churches, and has smelting-furnaces, and other ironworks, a trade in cattle, and two annual fairs. Pop. 1213.

GITTISHAM, par. Eng. Devon; 2160 ac. Pop. 376.
GIUBIASCO, a vil. and par. Switzerland, can. Tessin. picturesquely situated in a valley, r. bank, Marobbia, hera crossed by a new bridge of three arches, 2 m . S.W. Bellinzona. It is cheerful louking and well built; contains a large square, surrounded by walnut and chestnut trees; and three churches, one of them the handsomest in the canton; and has a large annual fair, chiefly for horses and cattle. Pop. 613.

GIUGLIANO, a tn. and com. Naples, prov. of, and 10 m . N.N.W. Naples, cap. circondario of same name. It contains a fine castle, four elegant churches, two of them collegiate, and an hospital. Pop. 9091.

GIULIANO (SAN), a tn. Sicily, 5 m. E.N.E. Trapani, in an elevated situation. It contains a number of churches and convents, an hospital, and a mont-de-piété. In the vicinity, on the summit of a hill, called Mons Eryx, are the ruins of the celebrated ancient temple of Venus, whose splendours have been spoken of in the most enthusiastic terms by Polybius, Virgil, Diodorus Siculus, \&c. Jasper is found in the neighbouring mountains. Pop. 10,249.

GIULIANUUVA, a tn. Naples, prov. Abruzzo Ultra, 14 m. E.N.E. Teramo, on a height near the Adriatic. It has a church, three convents, an hospital, and a considerable fishery. Pop. 2200.

GIULIOIPOLI, a vil. Naples, prov. Abruzzo Citra, 24 m. S. Lanciano, near r. bank, Sangro. Pop. 1055.

GIUPANA, an isl. Dalmatia, in the Adriatic, within 2 m . of the shore, 12 m . N.W. Ragusa. It is 6 m . long, by $1 \frac{1}{2} \mathrm{~m}$. broad; has a rocky shore, but a fertile interior, and produces in abundance wine and oil. Pop. 801.

GIURGEWO, Gicrgevo, or Dschurdschowa, a tn. and river-port, Wallachia, l. bank, Danube, opposite Rutschuk, 43 m . S.S.W. Bucharest, of which it is the port. Its citadel, raised on an insulated height, called Slobotzin, surrounded by the Danube, is connected to the town by a bridge. Giur
gews has mean houses, narrow and dirty streets; a district school, and a court of first resort. It is the most important shipping-port on the Wallachian side of the Danube, and carries on a considerable trade, inporting from Anstria, Germany, Hungary, \&c., to the annual value of $£ 275,000$. In 1773, the Russians here defeated the Turks. It was taken by the Russians in 1811, and again in 1829, when its defences were dismantled. Pop. 7000.

GIUSSANO, a vil. Austrian Italy, prov. of, and 18 m . N. Milan, with a church and an old castle. Pop. 1983.

GIUSVALLA, a vil. and com. Sardinian States, div. of, and about 21 m. S.S.W. Alessandria, with two churches, a communal sehool, a trade in cattle, and a large annual fair. P. 1186.

GIVENDALE (Great), par. Eng. York (E. Riding); 1130 ac. Pop. 85.

GIVET, a fortified tn. France, dep. Ardennes, 26 m . N. by E. Mezieres, on both banks of the Meuse, across which is a handsome stone bridge. It has a public library; manufactures of white-lead, tobacco pipes, pencils, sealing-wax, glue, copper and zinc vessels, and nails; marble-yards and tanneries; some transit trade; and, in the environs, quarries of fine stone. The fortress, fortified by Vauban, consists of Charlemont, the citadel; and of Givet Nôtre-Dame and Givet St. Hilaire, both of which it commands. Pop. 4090.

GIVORS, a tn. France, dep. Rhône, 14 m. S. Lyons, on the Rhône, the canal of Riox-de-Gier, and near the railway between St. Etienne and Lyon. It is a centre of the coal trade, but not otherwise remarkable; has bottle and windowglass works, and numerous tile-fields. Pop. 7010.

GIVRY, a tn. France, dep. Saône-et-Loire, 7 m . W. from Châlons-sur-Saône, on the Orbize, at the foot of a vinecovered slope, which yields the best wines in the Châlonnais (Burgundy). It is regularly built, with straight streets, conjoining in a large square; and has a parish church, which is a remarkable round edifice; manufactures of coopers' wares, with tanneries, linen-weaving, and bleaching; and, in the environs, some fine stone quarries. Pop. 2126.

GIZEH, or Jizeh, Egypt. See Ghizef.
GJATSK, a tu. Russia in Europe, gov. of, and 132 m. E.N.E. Smolensk, on a river of the same name. It has three churches, some linen manufactures, and a considerable trade in corn, hemp, and iron. Pop. 2600.

GLADBACH, or Möochen-Gladbach, a tn. Rlienish Prussia, gov. of, and 16 m . W. Düsseldorf, cap. circle of same name, agreeably situated on a height above the Niers. It is the seat of a law court and several public offices; contains a Protestant and two R. Catholic churches, one of the latter an ancient edifice, surmounted by a tower; and has manufactures of cotton and mixed cotton goods, silks, common and white leather, copper-wire, tobacco, \&c., and numerous mills. Pop. 3150.-The crrcle is flat, watered by the Niers, and several other streams; and, though not particularly fertile, rears a great number of cattle. Area, 71 geo.sq. m. P. 56,003 .

GLADENBACH, a market tn. Hesse-Darmstadt, OberHessen, 10 m . W.S.W. Marburg. It has manufactures of tobacco, a slate quarry, and five annual fairs. Pop. 1050.

GLADESTRY, par. Wales, Radnor; 3220 ac. Pop. 366.
GLADOVA [Turkish, Fet-1slam], a tn. Turkey, prov. Servia, on the Danube, 100 m . E.S.E. Belgrade, below the passage called the Iron-Gate. It is a mean place; but goods and passengers are here shipped and unshipped, both having to be taken by land to and from Orsova ( 10 m. ), to avoid the intermediate rapids. About $2 \frac{1}{2} \mathrm{~m}$. below Gladova are the remains of Trajan's bridge over the Danube.

GLADSMU1R, par. Scot. Haddington; 10 sq. m. P. 1699.
GLAISDALE, a tn., par. of Danby, England, York (N. Riding) ; 8370 ac. Pop. 1021.

GLAMMISS, a vil. and par. Scotland, Forfarshire; the former embosomed among trees, in the fertile valley of Strathmore, $10 \frac{1}{2} \mathrm{~m} . \mathrm{N} . \mathrm{by}$ W. Dundee, and a station on the Scottish Midland Junction Railway. It consists of one principal street, running E. to W.; houses respectable, and of a fine-grained and hard sandstone, obtained from quarries in the neighbourhood. It has a handsome parish church and school; an infant school, two libraries, and two friendly societies. The castle of Glammiss, about 1 m . N. the village, is an ancient venerable structure, though some parts of it are comparatively modern. Contiguous to the village is a considerable flax spinning-mill, furnisling yarn which the inhabitants of the parish make into
brown linen, chiefly Osnaburgs and sheetings, for the Dundee market, the annual average produce being 6000 pieces. A good many of the inhabitants are also employed at the neighbouring quarries. Area of par., about $14,609 \mathrm{ac}$. Pop. (1851), 2164.-(Local Correspondent.)

GLAMORGAN, or Glamorganshire, a maritime co. S. Wales, having N. the cos. of Brecknock and Caermarthen, E. Monmouth and the river Severn, S. and S.W. the Bristol Channel ; length, E. to W., about 50 m. ; greatest breadth, 27 m . ; area, $660 \mathrm{sq} . \mathrm{m}$. , or $422,400 \mathrm{ac}$. The N. and N.E. parts of the county are extremely mountainous, though none of their suinmits reach a great elevation; the loftiest being only 1859 ft . high; the others vary from 300 to 1000 ft . The hills in general are barren, yielding little herbage, although here and there verdant declivities are met with, on which flocks of sheep are depastured. In many places the sides of the mountains are covered with wood, presenting, in combination with narrow valleys and deep glens, scenes of the most romantic beauty. The S. part of the county is level and very fertile, particularly the vale of Glamorgan, the soil of which consists principally of clay; and, when well cultivated, produces the finest crops of wheat. The climate, in this part of the county, is remarkably mild. Snow never lies long on the ground; and myrtles, arbutus, and other tender shrubs, thrive in the open air. This fine valley is in many places from 8 to 18 m . iu breadth. Glamorganshire belongs wholly to the basin of the Severn; and all its streams, of which the Taff or Taafe is the largest, flow in a S. direction. Other streams are the Tawe, Neath, and Elwy, \&c. The cattle reared in this county are reckoned the best in Wales, with the exception of those of Pembroke. The more recently built cottages are remarkable for their neat, clean, and comfortable appearance. They are constructed of stone and mortar, and white-washed inside and outside. The mineral wealth of Glamorganshire is of incalculable value. Its coal-fields are inexhaustible; and its stores of ironstone and limestone are nearly equally extensive. The smelting establishments of Merthyr-Tydvil, Neath, Swansea, Aberdare, and Abernant, are the largest in Britain. The woollen manufacture is also carried on to some extent. The county is intersected by numerous canals and railways, which afford ready means of communication throughout the interior, and with the towns and ports on the coast. Principal towns-Cardiff, the capital; Merthyr-Tydvil, Swansea, and Neath. This county returns five members to the House of Commonstwo for the county, one for Merthyr-Tydvil, and one each for Cardiff and Swansea and their contributory boroughs. Glamorgan is divided into 10 hundreds, and 118 parishes. Pop. (1851). 231,849.

GLAMORGAN, a co., Van Diemen's Land, bounded, N. by the St. Paul and S. Esk rivers, separating it from the county of Cornwall; on the W. by the county of Somerset, on the S. by the Little Swan Port river, on the E. by the ocean. Its towns are Swansea, Llandaff, and Eastbourne.

GLAN, a lake, Sweden, in the N.E. of län Linköping, about 9 m . long, by 6 m . wide. The Mottla, which discharges Lake Wetter, after passing through Lake Roxen, enters the S.W. extremity of Glan; and, issuing from its E. extremity, passes the town of Norrköping, and forms a long estuary, called Braviken, in the Baltic.

GLANDFORD, par. Eng. Norfolk; 1180 ac. Pop. 81.
GLANDFORD-Brigg, a tn. and chapelry, England, co. of, and 23 m . N.N.E. Lincoln. The town, intersected by a branch of the Aueholme, here crossed by a stone bridge, is a station on the Manchester, Shefficld, and Lincolnshire railway. It consists of three regular streets, well kept, and lighted with gas; and has a handsome church with a lofty tower; places of worship for Wesleyan and Primitive Methodists, Friends, Independents, and R. Catholics; and two sehools, one of which is a free grammar school, founded in 1669. The dressing of hare and rabbit skins has been extensively carried on here for a long period. A considerable trade is also done in coal, corn, and timber. Weekly market, Thursday. Pop. (1841), 1822.-(Local Correspondent.)

GLANDON, a harbour and small vil., S. coast, Ireland, co. Cork. The harbour, 3 m . W. Ross Bay, is about 1 m . wide at the entrance, and stretches inland about 3 m . The village about 2 m . above the mouth of the harbour, is much resorted to during the bathing season.

GLANDORE, a small tn. and harbour, Ireland, S. coast, co. of, and 34 m . S.S.W. Cork; lat. $51^{\circ} 35^{\prime} \mathrm{N}$. ; lon. $9^{\circ} 5^{\prime} \mathrm{W}$. The town is situated on the E. side of the harbour, and contains many handseme houses, erected for the accomodation of bathers, and others attracted to it by the beauty of its situation and the salubrity of its climate. Fish are abundant in the bay. The harbour affords safe anchorage to vessels of large size.

GLANDORF, a vil. Hanover, prev. Osnabrück, bail. Igburg. It is an old place, and has often suffered from war. Pop. 980.

GLANE, a stream, Switzerland, can. Fribeurg, an affluent of the Saane. It rises behind Romont, and joins the Saane below Attenryff. Below Remont are the baths of Glane.

GLANMIRE, a narrew sheltered valley or glen, in the vicinity of Cork, much resorted to by the inhabitants of that city. It is about 2 m . leng, with banks on either side of considerable elevation, which are covered with handsome villas, surrounded by trees. At the upper end of the glen, which is traversed by a small river of the same name, is the village of Glanmire, with flour mills, cloth factories, factories for spinning wool, bleaching, dyeing, and finishing calico. The scenery here is sufficiently pleasing.

GLANWORTH, a vil. and par. Ireland, co. Cork. The village, in the rich valley of the Funcheen, $32 \mathrm{~m} . \mathrm{N}$. by E. Cork, has near it the ruins of Glanworth Castle, the ancient seat of the Roches; and the ruins of a Dominican abbey, founded in 1227. Pop. 1012. Area of par. 9681 ac.; pop. 4332.

GLAPTIIORN, a par. England, co. of Northampton; situated on the 1 . bank of the river Vane; 1370 ac. Pop. 427.

GLÄRNISCH, a mountain, Switzerland, can. of, and about 5 m . S.W. Glarus. It has several peaks, and is cennected with the Tödi. It is 8925 ft . high, rises abruptly from the valley below, and is difficult of ascent. In 1593 four large recks were riven off by an earthquake, and thrown into the valley beneath; lat. (vorder Glärnisch) $47^{\circ} 1^{\prime} 22^{\prime \prime} N$.; lon. $9^{\circ} 2^{\prime} 30^{\prime \prime}$ E.

GLARUS, a canten, Switzerland, bounded, N. and E. by St. Gall, S. by the Grisons, and W. by Uri and Scliwyz; Letween lat. $46^{\circ} 47^{\prime}$ and $47^{\circ} 10^{\prime} \mathrm{N}$.; lon. $8^{\circ} 42^{\prime}$ and $9^{\circ} 14^{\prime}$ E.; greatest length, N. to S., 25 m. ; greatest breadth, 21 m. ; area, 192 geo. $\mathrm{sq} . \mathrm{m}$. The greater part of the surface is covered by monntains; many of which, as the Glärnisch, Karpfstoch, Hausstock, Ruchi, Kistenkamm, Selbsanft, Tödi, and Sandgrath, are cevered with perpetual snow. The principal chain, which stretches from the Hausstock to the Scheibe, has a height of more than 8000 ft ; and contains many glaciers. There is only one principal valley, opened into by three miner valleys. The principal valley stretches througheut the canton N. to S., and forms the basin of the Linth. The chief minor valleys are the Sernft and Klön. All of them have streams of the same name; and, through the Linth, ultimately send their waters to the Rhine. The lakes are numerous; but are less remarkable for their extent than the magnificence of the scenery in their neighbourhood. A considerable part of the Wallenstädtsee, however, belongs to the canton. The climate is very severe; and only the deeper valleys and milder districts are fit for human habitation during the whole year. Even in these, the snow gencrally remains the greater part of March, and occasionally to the middle of April. The prevailing rocks of the canton are conglomerate; generally overlain by meuntain limestone. In some districts, particularly in the valley of the Sernft, there are vast masses of a species of greywacke. The minerals are not of much consequence; though ancient mines, beth of silver and copper, are found in different spers. Some seams of coal are found; and marble, slate, and gypsum, are abundant. From the nature of the surface, and the climate, there is little room fer the plough; and the far greater part of the canton is necessarily occupied by alpine pastures. A good deal of fruit, particularly cherries, is raised; and chestnut trees are not unfrequent. The most fertile part of the canten stretches through the principal valley, and produces a good deal of corn. Wood is not very abundant; but many of the mountains are covered with pine. After it, the prevailing trees are beech, maple, and ash. There are very few oaks. The species of game are net numerous; and are chiefly confined to the chameis, fox, hare, badger, and marmot. The flora, extending over a range
of altitude commencing at 1500 ft ., and centinued to the utmost limits of vegetation, is very rich; and, considering the comparatively narrow limits of the canton, is remarkable for its variety. The manufactures include woollen, linen, cotten, and silk goods, muslin, prints, paper, writing slates, and numerous articles in wood; and an active trade is carried on both with Germany and Italy. The principal exports are wood, leather, chamois skins, butter, cheese, and cattle. Glarus occupies the seventh place in the Swiss Confederation; and has a very democratical constitution. For administrative purposes it is divided into seven districts. The Protestants form nine-tenths of the inhabitants. Pop. (1849), 30,197.

GLARUS [Italian, Glaris], a tn. Switzerland, cap. can. of same name, picturesquely situated in a secluded spet, at the foot of the Glärnisch and Schilt, net far from r. bank, Linth, which is here crossed by a covered bridge, 32 m . S.E. Zürich. It is well paved, but not very well built; and has, in many parts, a dull and gloomy look. It contains an ancient gothic church, used in common by Protestants and R. Catholics, with a good organ, and a pulpit occupied during 10 years by the celebrated reformer Zwingli; a townhouse, situated on a square, planted with lime trees, but itself an old and ungainly building; a new geverument house, of the Ionic order; a handsome casino, an hospital, and a free school for 700 children; and has manufactures of woollen, linen, and cotton goods, calico, muslin, and prints; and a considerable trade, particularly in a kind of green cheese, called schabziger, peculiar to the canton. The environs of Glarus contain many romantic walks, with commanding positiens, from which magnificent views are obtained. Pop. (1849), 4700.

GLASBURY, a par. Wales, co. of Brecon; 5390 ac. Pop. 1377

GLASCOMD, a par. Wales, co. of Radnor; 5000 ac. Pop. 56.1.

GLASEN, a vil. Prussia, gov. Oppeln, circle Leobschütz. It contains a castle, a R. Catholic parish church, and has a saw and a cern mill. Pep. 880.

GLASENBACH, a vil. Austria, duchy, and near Salzburg. It consists of scattered houses on a rivulet of same name, which here emerges from the Jägerthal. In its vicinity is an iron-forge.

GLASENDORF, a vil. Bohemia, circle Bidschow. It lies high on the Rehhorn mountains in a valley on a rivulet of its own name, and has a school and a mill. The climate here is severe, and avalanches are semetimes formed, which cause great destruction. Pep. 290.

GLASERSDORF, a vil. Behemia, circle Bunzlau, at the source of a small affluent of the Iscr. It has a schoel and two mills, and is named from some glass-works which formerly existed here. Pop. 1217.

GLÄSERSDOLF, several places, Germany, particularly two places, Prussia:-1, (Nieder and Mittel-), A vil. gov. Liegnitz, circle Liiben. It has a castle and three wind-mills. Pop. 977.-2, (Ober-), A vil. gov. Liegnitz, circle Lüben. It has a castle and a R. Catholic church. Pop. 665.

GLASFORD, a par. Scotland, co. of Lanark; 11 sq. m. Improvements have taken place in this parish of late years, that leave no deubt that the greater part of its waste land will be rendered arable in a comparatively short peried. It contains freestone, line, and coal. Pop. 1955.

GLASGOW, the principal commercial and manufacturing city of Scotland, and a river pert, co. Lanark, Lower ward, on both sides of the Clyde, 42 m . W. by S. Edinburgh ; lat. (Glasgow Bridge), $55^{\circ} 51^{\prime} 51^{\prime \prime} \mathrm{N}$. ; len. $4^{\circ} 16^{\prime} \mathrm{W}$. (r.) ; greatest length, E. to W., 3 m. ; breadth, N. to S., 2 m. ; circumfrence, about 8 m .

The city proper stands wholly on the r. bank of the river, having the suburbs of Calton and Bridgeton on the E., and those of Anderston and Finnieston on the W., the whele ferming one continuous town; besides these, the suburban villages of Camlachie, Westmuir, and Parkhead, on the E., and of Partick, on the W., are so closely connected with it as to be likewise almost continuations. On the opposite or l. bank of the Clyde is the ancient suburb of Gorbals; and, of mere modern growth, those of Hutchesentown on the E., and Laurieston, Tradeston, and Kingston on the W., the whele also so blended as to constitute one uninterrupted series of streets and houses, with which the village of Govan, on the W., is almost

## GLASGOW

anited. These two sections of the town are connectel by three substantial stone bridges; and an elegant suspension one is (1852) in progress of erection; in addition to these, another stone bridge crosses the river at the E. extremity of the town. One of these bridges, the Glasgow or Broomielaw Bridge, designed by Telford, is a splendid structure; faced with granite,

500 ft . long, and 60 ft . broad. The greater part of the city, and its suburban portions, stand on level ground, lying along the banks of the river; but on the N. and N.W., at once comprising the oldest and newest parts, it rises to considerable elevations, occupying, in the former quarter, the face and summit of a steep ridge; in the latter, ascending, and crown-

ing several gentle acclivities. Its plan is very regular, both on the N. and S. side of the river, the streets generally lying E. and W., nearly parallel to the river, or N. and S., at right angles to it.

The general appearance of Glasgow, on being approached in almost any direction, is not, perhaps, very prepossessing; owing at once to its generally low situation, and to the obtrusion of a vast number of tall smoking chimneys, and other manifestations of manufacturing industry; still, the great number of its handsome spires forms a striking feature in its general aspect, when viewed from a distance; and, when surveyed in detail, it is found to possess many pleasing and attractive features. All its buildings, with exception of factories, and a few suburban houses for the working-classes, are built in a superior style, of fine white and generally polished freestone, imparting a peculiar air of combined solidity and elegance to the whole city. Many of the streets are handsome and spacious, some of the public edifices magnificent, and the new crescents, squares, and isolated rows of dwe!lings, particularly in the W. end of the town, present as beautiful specimens of modern domestic architecture as are to be seen anywhere; having the additional advantage, in numerous instances, of fine commanding situations. Indeed, there are few cities where so much that is pleasing coexists with so many of the disagreeable adjuncts of the factory.

There are, altogether, 96 m . of formed and paved streets in the city, the principal of which are, in general, remarkably
straiglit, and most of them of considerable widtl. They are kept in good order, and are well paved; and lighted by between 7000 and 8000 gas lamps; the total annual quantity of gas used in the town being $441,000,000$ cubic ft. The still more essentially necessary article of water is supplied at the rate of 27 gallons a-day to each inhabitant, the total daily supply being $12,000,000$ gallons. The principal street is the Trongate, with its continuations-the Gallowgate on the E., and Argyle Street on the W.; it lies E. and W., is in all about 2 m . long, and 80 ft . wide, and is justly considered one of the handsomest streets in Europe. The finest N. and S. streets are Buchanan Street and Queen Strect; the former the faslionable street of the day, and the most remarkable for the elcgance of its shops. Many of the intersecting streets in this part of the town are also spacious and handsome. Some of the older streets have much character, if little else to recommend them. The principal of these are High Street and Saltmarket, both of which have a certain degree of the picturesque in their general aspect. The squares of Glasgow are few in number, and generally small. The principal are George Square, containing several handsome monuments, to be afterwards alluded to; and, occupying an elevated situation, Blythswood Square, which, though not the largest, is the finest square in the city; all the houses with which it is lined being elegant mansions. The crescents and terraces of Glasgow are of modern crcation; and are, therefore, all confined to the growing, or W. and N.W. end of the city.

## GLASGOW

1095
GLASGOW
Public Buildings, Bridges, Monuments, \&c.-Glasgow has engraver. The Royal Infirmary, situated near the Cathedral, many public buildings of great architectural merit. Excluding the churches, which will be afterwards noticed, the first place is due to the University, situated in the High and founded 1792 , is a large and handsome edifice. But by far the most magnificent of all the public buildings in the city is the Royal Exchange in Queen Street. It is in the Corinthian style, surmounted by a hand-
 come circular clock-tower, has X a lofty octostyle portico, three , columns in depth, and is adorned on the sides by engaged columns, giving the whole building a singularly noble appearance; the news-room is about 100 ft . long by 40 broad, with a rich cofiered roof, supported by Corinthian columns. The new County Buildings in connection with the adjoining Merchants' Hall, compose a magnificent pile, of a simple, but imposing character. 'The Tontine, containing the old exclange and townhall, situated at the cross, on the N . side of Trongate, is a noble range of building, with a superb palatiallooking front, supported on rusticated arcades. Adjoining to it, at the Cross and the foot of the High Street, is the quaint-looking steeple of the old Tolbooth, with a fine chime of bells; and W. from it is the steeple of the old Tron Church, a well-known landmark in the city. Many of the banks are

Street. It comprises five quadrangles or open conrts, bounded by the various rooms and offices belonging to the institution. Its strcet front is in the Elizabethan style, and dates about the middle of the 17 th century. Behind is the Hunterian Museum, so called from its founder, the celebrated Dr. Willian Hunter, who studied at the university. It is an elegant Roman Doric edifice, contains Dr. Hunter's valuable collection of anatomical preparations, a collection of objects

the trongate and old exchange, glasgow.-Drawn from Nature, by r. carrick.
of natural history, a cabinet of coins, a library of 12,000 volumes, and a small, but choice, collection of paintings, purchased for the founder by Sir R. Strange, and including several of the originals of the finest works of that eminent

Epi Free 30, U. Presbyterian 23, Episcopalian 5, R. Catholic 7, Independent 11, Baptist 7, other denominations, 35 ; affording, altogether, sitting-room for 114,278 persons. As specimens of ecclesiastical architecture, many of these churches are of a hinh order. First is the

## GLASGOW

1096
GLASGOW
ancient Cathedral or High Church, a majestic pile, situated on the $N$. and oldest part of the town, on the edge or W. bank of a ravine, traversed by the Molendinar Burn. This fine old edifice was founded in 1123, during the reign of David I., by John Achaius, bishop of Glasgow, and dedicated to St. Mungo or Kentigern. It received, however, subsequently, many additions and embellishments, by successive prelates, as far down as the Reformation. It is in the early pointed style, with a lofty tower and spire rising from the centre; length E. to W. 319 ft ., width 63 ft ., height of the nave 90 ft ., of the choir 85 ft ., of the tower and spire 225 ft . A low square tower, formerly existing at the W. end of the building, has been recently removed, and the whole edifice subjected to a complete repair. 'The crypt of the cathedral,' according to Mr. Rickman, 'is not equalled by any in the kingdom; the piers and groins are all of the most intricate character, the most beautiful design, and excellent execution.' Many of the other churches in the city are remarkable for the beauty of their architecture. Among the Established churches, St. Andrew's, a building of the composite order, one of the oldest, is also, in many respects, one of the finest; after it, St. David's, in the decorated Gothic style, St. George's, and St. Enoch's, in the Roman style, may be named as most worthy of notice. The finer specimens of ecclesiastical architecture, of more recent erection, are the Free churches of St. John, St. Matthew, St. Peter, and St. Stephen, all Gothic buildings, with elegant and lofty spires; and the Renfield Street U. Presbyterian church, and the new Independent chapel, tasteful Gothic structures.
The Green, Botanic Garden, and Cemeteries.-The Green, as it is emphatically called, is a large and beautiful park, comprising 140 ac. of smooth verdant lawn, and adorned at various points by rows of noble trees. It is situated at the S.E. part of the city, on the r. bank of the river; is the common property of the inhabitants, and is used principally for purposes of recreation. The Botanic Garden, about a mile N.W. from the city, or about two from the Cross, comprises 21 ac., occupying the gentle slope overlooking the wooded banks of the Kelvin, which forms part of its boundary. It is tastefully laid out, and has an extensive collection of native and exotic plants. The Necropolis occupies a steep rocky eminence rising from the Molendinar Burn, opposite the Cathedral; and is tastefully and profusely adorned with trees and shrubs. The numerous monuments, many of them exceedingly handsome, with which it is crowded, are finely displayed in terraces rising above each other on the face of the steep; imparting to the Necropolis a very striking appearance, and enabling it to compare favourably even with the famed Père-la-Chaise. There are other three cemeteries of a similar kind in the outskirts of the town, all of them extensive and weli laid out; and, altogether, the number of places of sepulture in and around the eity is twenty-one.
Markets and Consumption of Food.-Glasgow is well supplied with all kinds of provisions; but has only one general public market-place that need here be noticed-namely, the Bazaar, in Candleriggs Street, which is spacious and well-arranged. The cattle market, at the E. end of the city, occupies an area of $30,000 \mathrm{sq}$. yds., and is well laid out. It appears that the use of bread has doubled since 1846. To supply the demand, there are, besides numerous smaller bakeries, several very extensive establishments, at the largest of which as many as 40,000 quartern ( 4 lb .) loaves have been baked for some weeks in succession. The number of animals slanghtered in Glasgow, during the four years ending in 1851, is given in the following Table:-

Besides this, large quantities of salted and dried provisions, including herrings, both salted and fresh, are consumed.

Benevolent Institutions.-These are so numerous, that we can do little more than name the principal. They comprise the infirmary and fever hospital, eye infirmary, night asylum
for the houseless; the Town Hospital, or city poorhouse, and the Barony and Govan parish poorhouses; the asylum for the blind, institution for deaf and dumb, indigent old men's asylum, house of refuge for females, house of refuge for males, lock hospital, three lying-in hospitals, Hutchesons' hospital for the maintenance of decayed burgesses and their widows, and the education of boys, sons of burgesses; a lunatic asylum, humane socicty, the merchants' house, and the 14 trades incorporations, the last two dispensing a large sum annually; besides numerous free schools for the poor, benevolent societies, and minor charities.

Educational, Literary, and Scientific Institutions.-At the head of the educational institutions of Glasgow stands the University, founded, in 1450, by Bishop Turnbull. It comprises 22 professors, in the four faculties of arts, theology, law, and medicine; there is, besides, a lecturer on the structure and diseases of the eye. The professors derive their incomes partly from fees paid by the students, and partly from fuads belonging to the college, augmented by annual grants from Government. There is only one session in the year, commencing in the beginning of November, and terminating 1st May. There are 29 bursaries, the benefits of which are extended to 65 students; the highest is $£ 50$, the lowest £4, 10 s . The number of students varies from 1000 to 1200 . This university has had many men of the highest talent and literary eminence amongst its professors. Of these may be named Melville, Baillie, Leishman, Burnet, Simpson, Hutchieson, Joseph Black, Cullen, Adam Smith, Reid, Millar, Richardson, Young, and Sandford. The Andersonian University was founded, for the use of the unacademical classes, in 1795, by John Anderson, professor of natural philosophy in the university of Glasgow, and endowed by him with a valuable philosophical apparatus, museum, and library. Other public educational institutions are the Mechanics' Institution, the first of the kind established in Britain; the High school or grammar school, under the superintendence of the incorporation; the Normal seminaries of the Established and Free Churches, for the training of teachers-the former the first seminary of the kind in Scotland, the latter conducted on Stow's training system; and the Government School of Design. The number of minor elementary schools is also very great; but there seems to be still a very large amount of educational destitution in the city, especially as regards children between the ages of five and ten years; the number of whom, not attending school, Dr. Strang estimates at about 6000 or 7000 . The principal literary and scientific institutions are the Plilosophical Society, Literary and Commercial Society, Maitland Club, Athenæum, the Glasgow Medical Society, the Medico-Chirurgical Society. The public libraries are Stirling's library, about 12,000 volumes; the Glasgow library, 15,000 volumes ; the college library, 101,000 volumes; and the libraries of the Athenæum, the Andersonian University, and the Mechanics' Institution. There are three public reading-rooms; the Royal Exchange, the Tontine or Old Exchange, and the Athenæum, besides a number of miner rooms established by private individuals in different parts of the city. There are at present (1852), 14 newspapers published in Glasgow-9 weekly, 3 twice a-week, 1 thrice a-week, and 1 daily. Several of these are conducted with great ability.

Sanitary and Moral Condition.-The climate of Glasgow is marked by great humidity, and the prevalence of S. and S.W. winds. It seems particularly unfavourable to human life during childhood, ne fewer than one child out of every 20 , under 15 years of age, dying annually there; while in Edinburgh, Dundee, and Greenock, only one child dies annually out of every 30 living. But this high rate of mortality amongst children must lave special reference to the meaner and more crowded parts of the city; as, in the better ordered and more airy districts, inhabited by the wealthier classes, the mortality is certainly not greater than that of any other large town in Great Britain. To adults, however, and the aged, the climate is more favourable; Glasgow being ranked, as regards these, as the fourth healthiest town in the kingdom. The average mortality for 1850 has been estimated at 1 in $36 \cdot 6$, or 2.72 per cent. The most prevailing disease is consumption; next, bowcl complaints; and next, typhus fever. It is to be observed, however, that the above results are not, by any means, the effects of climate alone;
but proceed, in great part, also from a number of other inimical influences combined.

Of late years, much has been done by the public authorities towards the improvement of the sanitary condition of the city, but much still remains to be done. 'There are, at present, 42 m . of main sewers; 21 in . of which have been formed during the last six years. The evil condition of the working population of Glasgow has been greatly exaggerated, and their delinquencies, most especially as regards intemperance, extravagantly over stated. There is, undoubtedly, much to deplore in the conduct of the lower, or we should say the very lowest classes; for, happily, to these alone are habits of gross dissipation now chiefly confined. But a more careful scrutiny, and more rigid discrimination than has been hitherto exercised in inquiring into and fixing the limits and extent of intemperance in the city, is necessary before the sweeping charges brought against it can be admitted as a truth. While Glasgow is perhaps no better than any other large town similarly circumstanced, it will not readily be believed by those who know it best that it is any worse.

Manufactures:-The manufactures of Glasgow are extensive and exceedingly various. The great staples may be classed under the general heads of cotton and iron, with their endless varieties of name, form, and purpose; but, besides these, there are sundry other manufactures, particularly those of a chemical nature, which are carried on here more extensively than anywhere else.

Textile, \&c. The principal of these are the cotton manufactures, which include the spinning of yarn, and of sewing thread; and the weaving, both by hand and power loom, of shirtings, including an immense variety, from coarse unbleached, to the finest bleached imitations of linens; sheetings, tweeled and plain, counterpanes, bed-covers, ginghams, checks, and stripes; cords, in coloured fabrics for foreign markets; calicoes, cambrics, jaconets, lawns, muslins plain and fancy, \&c. Besides these, mixed fabrics of cotton and silk, cotton and wool, and cotton and linen are manufactured to a considerable extent. Of wool and silk the manufacture is comparatively limited; still, in the department of carpets, the former is somewhat noted. The calico print-works are numerous, and produce goods of every variety in quality. The following table, obligingly furnished by Her Majesty's Local Inspector of Factories, will give a good general idea of the extent to which the various manufactures already alluded to are carried on, including the additional branches of flaxspinning and rope-making:-
extensively carried on, falls to be noticed. The embroidering of muslins, commonly called the sewed muslin manufactures, is a branch of business almost peculiar to Glasgow; about nine-tenths of the whole of this kind of work being done for that city, the remaining tenth for Belfast. The number of persons employed, either exclusively or partially in these manufactures, in the counties of Lanark, Ayr, and Renfrew in Scotland, and in the N. of Ireland, is very great; they are chiefly females who work in their own homes, many of them, however, only at bye-hours. One Glasgow firm employs upwards of 26,000 ; and the total number employed by Glasgow houses is estimated at about 110,000 . The embroidering also with silk on woollen fabrics, such as ladies' dresses, vestings, \&e., gives work to many thousand hanls, located chiefly in the surrounding villages, and scattered over the three counties above named.

Iron.-The iron manufactures of Glasgow, in all their departments, are at least as important as those of cotton. In 1849, there were 79 smelting furnaces around the town, each producing an average of 6000 tons of pig-iron per annum, or 475,000 tons ycarly. The principal articles manufactured from this metal are-land and marine engines, locomotives, railway wheels and axles, carriages, waggons, trucks, rails, chairs, and power-looms, and machinery of all kinds, hydraulic presses, mills of various descriptions, anchors, chains, and ship mounting in general, bars, \&c.; and a vast quantity of iron is now consumed also in the building of both sailing vessels and steamers. The following table furnishes a view of one department of iron manufactures, that connected with marine engines and steamers, in which the number of hands employed is between 4000 and 5000 :-
Marine Eingines and Iron Steamers constructed at Glasgow in the years 1847-1851.

Besides what is done for private companies, a considerable amount of work is also done for government; the Clyde, on which steam navigation first commenced, still retaining pre-eminence for its steamers and marine engines. The Cunard mail packets, the most successful line of ocean steamers afloat, were all built on the Clyde, and their engines were constructed by Robert Napier of Glasgow.

Chemical Substances.The most extensive che mical works in existence are those of St. Rollox, in the N.E. part of Glasgow.
To complete this section of the manufactures, dyeworks must be added; in which there are employed, in dyeing Turkey red, for which Glasgow has long been noted, about 350 hands; and in other colours comnected with manufactures about 720. But a very inadequate idea of the extent of the Glasgow manufacturing interests, in the branches already mentioned, will be formed, unless it be recollected that, in addition to the factories enumerated in the preceding table, the hand-loom weavers in all the villages for many miles round are employed dircetly by Glasgow houses; and that the spinning and weaving factories of Blantyre, Lanark, Catrine, Deanston, Rothesay, \&c., and the print-works of Alcxandria, Bonhill, Barrhead, and Neilston, \&c., are quite as much the factories of Glasgow as those situated within the bounds of the eity.

In connection with the textile manufactures, the embroidering of muslins and of woollen fabrics, both of which are very Vol. I.

They cover about twelve acres of ground, employ about 1000 hands, have several lofty chimney-stalks, one of which is 450 ft . high, 50 ft . diameter at the base, and 14 ft . at the top; and consume annually from 70,000 to 80,000 tons of coal. About 50,000 tons of raw materials are used in these works; consisting chiefly of salt from Cheshire, limestone from Ireland, sulphur from Sicily, manganese from Nassan in Germany, and tallow and oils. The manufactured products amount to about 25,000 tons annually, principally of alkali, bleachingpowder, vitriol, and soap. Iodine is manufactured to a great extent by several houses in Glasgow; indeed, with exception of one establishment in the N. of Ireland, a sinall one at Greenock, and another at Borrowstouncss, all the British iodine is made in this city. Cudbear is almost exclusively a Glasgow manufacture. Bichromate of potash is largely produced. The other principal chemical productions are naphtlia, pitch-oil, pitch, sulphate of ammonia, carbonate of ammonia,

## GLASGOW

and liquid ammonia; animal charcoal, salt of ammonia, and bone tar; pyroligneous acid, acetic acid, and their combinations, such as sugar of lead, iron mordaunts, \&c., extensively used in dyeing and printing; a small quantity of tartaric acid and cream of tartar, with aquafortis, muriatic acid, and the various solutions and combinations of tin, iron, copper, \&c., used by calico-printers and dyers, are also manufactured. Alum and prussiate of potash are extensively made by Glasgow houses; but the works are at some distance from the city.

Potteries, Tobacco-pipes, Glass, \&c.-Till 1837 there was only one pottery-work in Glasgow, now (1852) there are 8, with the prospect of a rapid increase; the town being quite as favourably situated, in respect of clay, as the Staffordshire potteries; and much more so in respect of fuel, and the ready means of conveyance of goods to all parts of the world. All kinds of ware are manufactured, from the coarsest description to the finest porcelain, employing upwards of 1300 hands. The common ware is made of red clay obtained in the vicinity of the town; and for the finer kinds about 10,000 tons of clay are annually imported, chiefly from the counties of Dorset, Devon, and Cornwall. Besides the potteries above alluded to, there is an extensive manufactory of fire-bricks, and other articles from fire-clas, including chimney-tops, vases, and other ornamental objects. But probably the most remarkable advances made in the manufactures of clay have taken place in the making of tobacco-pipes, which is now carried on to a greater extent in Glasgow than in any other place in Great Britain. Twenty years ago there were but 50 persons employed in this branch of manufacture in the city; while now (1852) there are 450 , who produce 6000 to 7000 gross (about a million) of pipes weekly, which are exported to all parts of the world. The manufacture of green glass bottles commenced in 1730 , and of flint glass in 1777 . For many years there was only one manufactory of each; there are now (1852) 11 ; of which 6 are bottle, four flint, and 1 crown, employing altogether about 400 persons. Flint glass is exported to a considerable extent, chiefly to Canada and the East Indies. There are ten distilleries within the bounds of the Glasgow collection, producing annually, when in full work, which they usually are, about $2,500,000$ gallons spirits at 11 overproof; and in the city and suburbs there are five breweries, the most extensive of which exports 240,000 dozens of bottled malt liquor, and pays $£ 4000$ annually for corks. The number of manufactories of hard confections is six; the largest of these establishments works the pans by steam-power and uses a ton of sugar daily. The extent to which beef hams are made-a manufacture almost peculiar to Glasgow-may be guessed at from the fact, that during the six months ending December 31, 1851, upwards of 128 tons of fresh beef came from Edinburgh alone, to be converted into hams.

Harbour and Quays.-Before adverting to the trade and commerce of Glasgow, it is necessary to notice the improvements of the river and the accommodation provided for shipping, two of the most remarkable features connected with the city. The harbour at the Broomielaw, below Glasgow Bridge, is usually crowded with vessels from all parts of the world, from the stately ship to the humble scow or gabbard. The quays which line each side of the river were, in $1813,941 \mathrm{ft}$. in length; in 1835 they had extended to 4451 ft ; and now they are $10,873 \mathrm{ft}$. in extent, furnished with long ranges of sheds and strong cranes, and capable of accommodating vessels of 1000 tons burthen. There being no wet docks, all vessels must lie in the river. The average available depths at high water of neap-tides, is 16 ft . At spring-tides there is an additional depth of about 2 or 3 ft ., and hence the greatest depth attainable, irrespective of the increased depth created by land floods, or strong W. winds, 19 ft . Towards the $W$. extremity of the quays, and extending a quarter of a mile up and down the river, there was, as late as 1758, a shoal, called the Hirst, meaning a threshold or bar, on which there was only 15 inches at low, and 39 at high water. There are here now, as already mentioned, between 16 and 19 ft . Various other formidable obstructions, including some islands, one or more of which was situated near Govan, from 2 to 3 m . below the city, have been also removed, and a clear passage made to the sea. In 1816, the depth of water, at the top of spring-tides, was $9 \frac{1}{2} \mathrm{ft}$. ; which now (1852) is about the depth at the lowest state of neap-tides. The pro*
cess of deepening is still going on, and further improvement is also in progress by generally straightening the course of the river, and cutting away all points and projections which impede the flow of the tide. Altogether, there has been expended by the Clyde Trust, on construction and repairing of quays and sheds, general management, interest of debt, \&c., and in deepening and improving the river, from 1770 , to June 30, 1851, the sum of $£ 1,888,624$; of which sum $£ 1,062,846$ have been expended since 1842.

That this great expenditure has not been fruitless, is evidenced by the following tables, showing the number of vessels arriving at the port, and the rapid increase in their size, as indicated by their tonnage:-

Tonnage during the Fears eudiny, July 1828, 1840, and lojn.

| Tous. | 1828. | 1840. | 1850. | Tons. | 1828. | 1840. | 1850. |

Trade and Commerce.-Besides being the seat of a great amount of trade arising from what may be called its native manufactures, Glasgow is a general mart for all the manufactures of Scotland, and for much of those of the N. of Ireland. It has also an extensive foreign and coasting trade, for the accommodation of which there are numerous spacious bonded warehouses and granarics in convenient localities, most of the former being in the vicinity of the quays. One of the most remarkable branches of this trade is that in grain, the quantities of which imported from Ireland and direct from abroad to the Clyde, and by way of Grangemouth-the latter arriving at Port-Dundas, the extensive harbour of the Forth and Clyde Canal-for the years 1850 and 1851, were as follows:-

|  | Ibeland. | , |
| :---: | :---: | :---: |
|  | $\begin{array}{ll} 1050 . & 1251 . \\ 9,570 \ldots & 7,330 \end{array}$ | Wheat........ qrs., $18 \%, 462 \ldots 331, \frac{1851}{1851}$ |

| Barley | ..bol., 9,830... 3,350 | Barley ....... qrs., 45,096... 42,696 |
| Beans | bol., 11,390... 20,320 | Beans........ qrs, $44,615 \ldots 26,8 \ddagger 8$ |
|  |  | Pease .........qrs., 10,466... 4,800 |

Besides these importations of grain, about 30,000 tons are brought annually from the E. of Scotland by the Edinburgh and Glasgow Railway.

The quantity of fresh and salted meat imported in 1851 was:-

In addition to the above, there were imported into the harbour the same year, 8900 tons of eggs, butter, and lard; nearly the whole of which was foreign.

The number and register tonnage of steam vessels which arrived at the harbour of Glasgow from 1st July, 1850, to 30th June, 1851, was 11,062 ; tonn. $1,021,821$. The number

## GLASGOW

and tonnage of the sailing vessels which arrived and departed during the same period is shown in the following table:-

Railuays and Canals.-On the N. side of the river, the Edinburgh and Glasgow, the Caledonian, and the Glasgow, Garnkirk, and Coatbridge railways have their termini ; and on the S. side, are those of the joint Glasgow, Paisley, and Greenock, and Glasgow and South-Western; the Glasgow, Barrhead, and Neilston; the Clydesdale junetion; and the General Terminus and Harbour railway. Of these, the last named, and the Glasgow, Garnkirk, and Coatbridge, are exclusively mineral lines. The Forth and Clyde canal, communicating, as its name indieates, with the Clyde on the one hand at Bowling, and the Forth on the other at Grangemouth, unites at Port Dundas, with the Monkland canal. The former is the medium of an extensive trade with the E. coast of the country, and with the Baltic, \&c.; the latter is chiefly used for conveying coals and iron to the city, from the mining disricts to the E. of it.

History.-The name Glasgow (in old documents frequently spelt Glascu and Glasgu) is probably derived from the Celtic (lais-dhu (dark ravine), in allusion to the locality in which the Cathedral is situated. Here resided (a.D. 560) the founder of the bishopric, the patron saint of Glasgow, St. Mungo or St. Kentigern; whose dwelling, and those of his followers, formed the nueleus of the future city, though the exact date of its foundation is not known. In remote times, the now great emporium of the West of Scotland ranked quite as a secondary place to the sinall, but ancient burgh of Rutherglen, situated about 3 m. S.E. of the city, whieh, for a long period, enjoyed nearly the whole trade of the Clyde. Even so late as the beginning of last century, gaberts sailed every day from that port to Grcenock, freighted with coals. Some of the principal lines of street are believed to have been opened soon after the formation of the bishopric, in 560 ; and several are known to have been in possession of the public for 750 years, or sinee A.D. 1100 ; while others date as far back as the beginning of the 14 th century. As early as the 13th century, Glasgow appears to have possessed a regular magistracy and courts of justice-the 'court-lall,' and the 'provost and bailies' of the city, being alluded to in a charter dated 1268; and nearly a century before this the annual fair, still continned, was established. About this period there were several convents, churches, and hospitals in the town; besides which, and the court hall already alluded to, it is probable that the only other public building in the city at this time was the old bridge, built about 1345 , by Bishop Rae. It consisted of 8 arehes, and was so narrow that one carriage could not pass another. It was subsequently widened on two different occasions; but has recently been taken down to make room for a granite structure, called Victoria Bridge, now (1852) in progress of erection.

During the 16 th , and probably the earlier part of the 17 th century, the people of Glasgow still retained the fierec and barbarous spirit of earlier times. Every man almost carried arms, generally a 'quhinger' (hanger or dagger), or 'quhittal'
(knife), which was freely used on the slightest provocation, as the records of the local courts of the day abundantly prove; every second or third case involving a charge of quhinger or quhittal drawing.

In 1638 was held, in the Cathedral, the famous Glasgow Assembly of the 'Kirk of Scotland,' which deposed the bishops, abolished Prelacy, and restored Presbytery; and accomplished what has been called the Second Reformation in Scotland. In 1652 a third part of the city, including almost all the shops and warehonses, was destroyed by fire; and a similar visitation, in 1677, consumed upwards of 1000 houses and 150 shops. Nearly all the houses at this time being constructed of wood, and covered with thatch, will account for the extent of these devastations. Early in the 17 th century, Glasgow already possessed a commerce and manufactures. Its merchants were engaged in whale-fishing and soap-making as early as 1667. Sugar-baking was commenced in 1669 ; and about the same time were begun tanning, rope-making, and the manufacture of plaids, of coarse cloth and linen. The pickling, curing, and exporting of salmon and herrings were actively carried on.

But it was not till the 18 th century that the advantageous position of the city for commercial pursuits-situated on a navigable river, and in the immediate vicinity of exhaustless fields of coal and iron-fairly began decisively to affect its fortunes. The union of Scotland and England having opened Virginia and Maryland to Glasgow enterprize, it very soon became a great mart for tobacco, and supplied the farmersgeneral of France with that article. In the year immediately preceding the American war, the imports of tobacco amounted to 57,143 hhds. This trade absorbed the greater part of the Glasgow capital, and promoted those engaged in it to the first rank among the merchants of the city. The foreign trade was at first carried on through English ports, and through the port of Ayr, \&c. It was not till 1718 that the first vessel built on the Clyde crossed the Atlantic, and direct communication was established with America. On November 14, 1715, the Glasgow Courant, the first newspaper published in the city, appeared; and ten years later (1725) took place the Shawfield mob; a riot, excited by the imposition of the malt-tax, in which the house of Daniel Campbell of Shawfield, M.P. for the city, was completely gutted, and six persons killed and nineteen wounded by the military, who were called out to quell the disturbance. About the same year (1725) the manufacture of linens, lawns, cambries, \&c., was introduced, which continued a staple till superseded by muslins. At this period, Glasgow is described as being a very beautiful city. Captain Burt, the clever author of ' Letters from the North of Scotland, 1730,' who said as little in favour of anything he met with in Scotland as he possibly could, says that 'Glasgow, to outward appearance, is the prettiest and most uniform town I ever saw; and I believe there is nothing like it in Britain.' In 1732, inklelooms were introduced from Haarlem. In 1740 Alexander Wilson, formerly professor of astronomy in the University of Glasgow, along with his friend, John Baine, introduced the art of type-founding; this foundry soon after became the most famous in Europe for the beauty of its types, as well as for its extent. About the same year (1740) the celebrated printer, Robert Foulis, commenced business; and, in company with his brother, Andrew, attained a degree of excellence in the art which gave the Glasgow press a European reputation for accuracy as well as beauty of execution. The first printfield belonging to Glasgow was established at the neighbouring village of Pollokshaws, in 1742. While residing in this city ( $1763-4$ ), James Watt, then a young man of 27 years of age, commenced the series of practical experiments on the steam-engine, which issued in his splendid improvement of that right-arm of our manufactures. In 1785 Turkey-red dyeing, well-known but not previously existing in Britain, was introduced into Glasgow by George Macintosh and David Dale, who, having engaged Pierre Jacques Papillon, an eminent Turkey-red dyer from Rouen, established their works in the vicinity of the city. Cotton-spinning works were established in 1792 , but it was not till the beginning of the present century that any considerable quantity of cotton was spun. In the following year (1793) power-looms were introduced. From this period the progress of the Glasgow manufactures is exceedingly rapid; the merchants
entering with energy into the working of the various important inventions and discoveries connected therewith, which, in the latter end of the 18th, and the beginning of the 19th century, followed each other in such quick succession. About this time, Charles Tennent discovered bleaching liquor, which was followed, in 1798, by the discovery of bleaching powder, by Charles Macintosh; and soon thereafter, these two chemists united in establishing St. Rollox chemical works, already alluded to. The importance of the discovery of bleaching powder will be appreciated, when it is stated that the quantity of cotton goods now manufactured is so great that the entire surface of Great Britain would not suffice to bleach them by the old method of exposure to the air.

The first steam-boat (the Comet) successfully propelled on a navigable river in Europe was started on the Clyde, by Henry Bell, in 1812 ; and in 1828 Neilson obtained a patent for using heated air in the manufacture of iron, commonly called the 'hot-blast,' by the introduction of which the extensive iron fields in the vicinity of Glasgow, hitherto only partially worked, were rendered fully available, and an amazing impetus was given to the iron manufactures generally throughout the country.

The events of any importance of a purely historical character of which Glasgow has been the scene, or with which it has been intimately connected, are few. In 1566 Queen Mary visited the city; and two years later many of the citizens fought against her in the Regent's army, at the battle of Langside. At the rebellions of 1715 and 1745 , Glasgow fur nished considerable bodies of troops in support of the House of Hanover; and at the latter period it narrowly escaped being plundered and burned by the Pretender's forces, having been saved only by the timely interposition of one of the Chevalier's own chiefs, Cameron of Lochiel. On one occasion, however, $£ 5000$ in money, and $£ 500$ in goods; and on another 12,000 linen shirts, 6000 cloth coats, 6000 pairs of shoes, 6000 pairs of hose, and 6000 bonnets, were levied. In 1819-20 took place the ferment known as the Radical war, when an unfortunate man, James Wilson, was hanged and beheaded at Glasgow, August 20, 1820, for the part he took in the contemplated rising. The last great event in the history of Glasgow, and one of the most auspicious, was the visit and entliusiastic reception of her present Majesty, Queen Victoria, in August, 1849 -being the first native sovereign who had entered the city for nearly 300 years.

Though the names of many eminent men are intimately connected with Glasgow, those that can be claimed as natives are few. The more remarkable of these are General Sir Thomas Munro, General Sir John Moore, who fell at Coruña; and Thomas Campbell, the bard of 'Hope.'

Glasgow is a royal, municipal, and parliamentary burgh, and is governed by a Lord Provost, 8 Bailies, and 39 Councillors in addition to whom the Dean of Guild, from the Merchants', and the Deacon-Convener, from the Trades' Houses, are members of Council ex officio. The income of the burgh, in 1851, was $£ 20,490$, and the expenditure $£ 18,903$. It is the seat of justiciary, sheriff, burgh, county, small debt, and police courts; has also a river court, a custom house, and a chamber of commerce; and sends two members to the House of Commons. Registered electors (1851), 15,535.

The progressive and present population of the city is shown in the following table:-

| Year. |  | Pop. | Year. |  |  |  | Fop. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1560, | - . | 4,500 | 1811, | - |  |  | 110,460 |
| 1708, | . . | 12,766 | 1821, |  |  |  | 147,043 |
| 1763, | - . | 28,300 | 1831, |  |  |  | 202,426 |
| 1785, | . | 45.889 | 184], |  |  |  | 280,683 |
| 1801, | - | 83,769 | 1851, |  |  |  | 347,001 |

-(Chalmers' Caleclonia; Cleland's Annals of Glasgov ; Stotistical Account of Scotland; Memoirs of Charles Macintosh by his Son, George Macintosh; The Progress of GlasgowReport on the Census of the City of Glasgov and Suburbs, for 1851 ; and Report on the Mortality Bills of the City of Glasgow and Suburbs, for 1851, by John Strang, LL.D. ; Accounts and Reports of the Trustces of the River Clyde; and numerous Private Communications.)

GLASGOW (Port), a tn. Scotland. See Port-Glasgow.
GLASHARE, par. Irel. Queen's co.; 2758 ac. P. 653.
GLASHÜTTE, a tn. Saxony, circle of, and 15 m . S. Dresden, on the Briesnitz. It has a parish church, with fine
painted glass; manufactures of straw plait, saw and other suills, and three annual fairs. Pop. 1085.

GLASNEVIN, a vil. and par. Ireland, co. Dublin. The vil., prettily situated in a valley, watered by the Tolka, 3 m . N. by E. Dublin Castle, was, until of late years, a favourite suburban retreat; and among the more distinguished of its former inhabitants, Addison, Swift, Steele, and Sheridan, may be mentioned. It contains a botanical garden, belonging to the Royal Society of Dublin, an agricultural school, and a deaf and dumb institution. Area of par. 995 ac. P. (1841)1226.

GLASOW, a tn. Russia, gov. and 100 m . E. Viatka, cap. circle of same name, l. bank Tschepza; with a church. Pop., agricultural (1851), 1081.——The circle, in the N.W. of the gov., consists of a succession of hills and ridges. generally covered with almost impervious forests of pine, and inclosing, in the intervals between them, numerous heaths and morasses. Pop. 146,800.

GLASS, par. Scot. Banff; 30 sq. m. Pop. 886.
GLASSARY, par. Scot. Argyle, 16 m. by 10 m . P. 4700.
GLASSERTON, par. Scot.Wigton, 8 m . by 3 m . P. 1253 .
GLASSLOUGII, a market tn . Ireland, co. of, and $5 \frac{1}{2} \mathrm{~m}$. N.E. Monaghan. It is neat and clean; has a parish church, and, in the vicinity, several other places of worship. Pop. (1841), 562.

GLASSTOOLE, or Glasthule, a vil. Ireland, co. of, and 5 m . S.E. Dublin, on Dublin Bay. Pop. 849.

GIASTON, par. Eng. Rutland; 1270 ac. Pop. 249.
GLASTONBURY, a market tn. and par. England, co. Somerset. The tn., $22 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Bath, consists of two principal streets, crossing each other at right angles; plentifully supplied with water, well paved, cleaned, and lighted; the more modern houses well built, for the most part of blue lias; but many of the older tenements are composed chicfly, or in part, of stones taken from the ancient abbey. In the market place, in the centre of the town, is a handsome new cross. There are two parish churches, St. John's and St. Benedict's, both elegant structures, in the perpendicular style, with graceful towers; places of worship for Wesleyan Methodists, Friends, Independents, and Baptists; eight daily schools, two almshouses and other charities, and a reading-room and mutual improvement society. The silk manufactures and glove-making were at one time extensively carried on; but the former has completely disappeared, and the latter has dwindled down to comparative insignificance, and there is now very little trade of any description. Glastonbury derives its interest and importance solcly from the ruins of its once magnificent Benedictine abbey. founded by Augustine of Canterbury in 605 , hut built chiefly during the 12 th and 14th centuries, and consisting of some fragments of the church, the chapel of St. Joseph of Arimatliea, and what is called the ahbot's kitehen. Its abbot lived in almost regal state, had the title of lord, and sat among the barons in parliament; a greatness bronght to a close at the dissolution of the monasteries in 1539 , when the last abbot, Richard Whiting, was hanged in his robes, with two of his monks, by order of Henry VIII., for refusing to surrender the abbey. Glastonbury possesses some chalybeate springs, whose medicinal virtnes were at one time highly celcbrated. Market day Saturday. A rea of par. 7950 ac. Pop. (1841), 3314.(Local Correspondent.)

GLATT', a small river, Switzerland, can. Zürich. Issuing from the Griefensce, 5 m. E. Zürich, it flows N. N.W., receiving numerous small tributaries, and joins l. bank Rhine, on the confines of Baden, a little below Eglisan, after a course of abont 20 m . It is well supplied with fish, but is subject to floodings, which often cause serious damage.

GLATTFELDEN, a vil. and par. Switzerlant, can. of, and 13 m . N. Zürich, in a valley enclosed by vine slopes, near the mouth of the Glatt, here crossed by a covered bridge. It is well built, has a parish church, and a trade in corn and wine. Pop. 1098.

GLATTON, par. Eng. IIuntingdon; 6,400 ac. P. 715.
GLATY [Polish, Kladzko], a tn. Prussia, prov. Silesia, gov. of, and 51 m . S.S.W. Hreslau, cap. circle of same name, in a narrow valley on both sides of the Neisse, here crossed by two bridges. It is strongly fortified; has five churches, three chapels, a townhouse, gymnasium, and several schools, an asylun for destitute children, hospital and infirmary, arsenals, barracks, and other military buildinge; it is the seat of courts
of law, and several public otfices; and has various manufactures, particularly linen, ordinary and damask, cotton and woollen goods, red leather, and carpets, numerous distilleries, tileworks, and mills; a trade chicfly in cattle and the above articles of manufacture; a weekly market, and four annual fairs. The celebrated Baron Trenk was confined here, and made his escape by leaping from the walls. Pop. 9856, of which 2011 are military.—The circle, area 248 geo.sq. m., is very hilly, watered by the Neisse and its affluents, and has generally a thin stony soil, of very indifferent fertility. Pop. 91,066.

GLAUCHAU, or Glaucha, a walled tn. Saxony, cirele Zwickau, r. bank Mulde, 54 m . W.S.W. Dresden. It is well built, nearly in the form of a crescent, partly in a hollow of the Wiesenthal, and partly on a series of steep and picturesque eminences; is the seat of a superior court, and of several important public offices; contains a large castle, partly occupied as the residence of the Schonburg Hinter Glauchau line, and partly as public offices; two churches, a normal and several other schools, an orphan asylum, poorhouse, and two hospitals; and has extensive manufactures of woollen and linen cloth, merino, hosiery, carpets, and leather, dyeworks, printfields, and worsted mills, a corn market, and three annual fairs. The lower part of the town often suffers much from inundation. Pop. (1849), 10,350.

GLAZELEY, par. Eng. Salop; 700 ac. Pop. 38.
GLEHN, two places, Rhenish Prussia:-1, A vil. gov. and $10 \mathrm{~m} . S . W$. Disseldorf ; with a R. Catholic parish church. Pop. 976.-2, A vil., gov. Aix-la-Chapelle, circle Schleiden; having, in its vicinity, the lead, iron, and copper works of Neuberg. Pop. 388.

GLEIWI'T'Z, a tn. Prussia, prov. Silesia, gov. of, and 39 m . S.E. Oppeln, on the Klodnitz, and the railway from Oppeln to Cracow. It has three churches, a gymnasium, in the buildings of an old Franciscan monastery; several schools, barracks, and two hospitals; and mannfactures of linen and woollen cloth, an extensive iron foundry, glass-works, a large worsted and other mills, a weekly market and eight annual fairs. Pop. (1846), 8212.

GLEMHAM, two pars. England, Suffolk:-1, (Great); 1340 ac. Pop. 370.-2, (Little); 1530 ac. Pop. 333.

GLEMSFORD, par. Eng. Suffolk; 2280 ac. P. 1366.
GLEN, two rivers, England:-1, Co. Northumberland, rises in the Cheviots, flows E.N.E. and joins the Till at Fenton.-2, Co. Lincoln, rises near Folkingham in two branches, which, flowing S. in a parallel direction, unite some miles N.W. Market-Deeping, whence the united stream flows N.E. and joins the Welland 4 m . N.E. Spalding.

GLEN.-I. A prefix to the name of several pars. Scotland: -1, (Glenbervie), Kincardine; $6 \frac{1}{2} \mathrm{~m}$. by 5 m . Pop. 1296. -2 , (Glenbucket), Aberdeen; 4 m . by $1 \frac{1}{2} \mathrm{~m}$. Pop. 542.3, (Glcncairn), Dumfries; 15 m . by $3 \frac{1}{2} \mathrm{~m}$. Pop. 2094.-4, (Glencross), Edinburgh; 3 m. by 3 m . Pop. 708.-5, (Glendovan), Perth; 6 m . by 4 m . Pop. 157.-6, (Glenelg), Inverness; 20 m. by 20 m . Pop. 2729.-7, (Glenisla), Forfar; 18 m . by 6 m . Pop. (1851), 1050.-8, (Glenmuick, Tullich, and Glengairn), Aberdeen; 18 m . by 15 m . Pop. 2118.-9, (Glenorchy and Inishait), Argyle; 300 sq. m. Pop. 1450.-10, (Glenshiet). Ross; 26 m . by 6 m . Pop. 745. -II. Also several pars. Ireland:-1, (Glenavy), and tn. Antrim; 16,786 ac. Pop. 3773.-2, (Glenbane), Tipperary; 943 ac. Pop. 713.-3, (Glenbehy), Kerry; 30,808 ac. Pop. 3011.-4, (Glencolumbkille), Donegal; 32.224 ac. Pop. 4356. $-5,($ Glenealy $)$, and tn. Wicklow; 5012 ac. Pop. 484.6, (Gleninagh), Clare; 4292 ac. Pop. 886.-7, (Glenkeen), Tipperary ; 14,495 ac. Pop. 7481.-8, (Glenogra), Limerick; 4253 ac. Pop. 1128.-9, (Glenwhirry), Antrim; 11,368 ac. Pop. 1548.-III. Also three pars. England :-1, (Glendon), Northampton; 1490 ac. Pop. 44.-2, (Glenfield), Lcicester; 4890 ac. Pop. 1032.-3, (Glentham), Lincoln; 2240 ac. Pop. 477.

GLEN [Valley], with various affixes, the name of numerous valleys in Scotland, of which the more remarkable arc-1, (Glencoe), N. extremity co. Argyle, about 26 m . N . Inverary, opening at its N.W. end upon Loch Leven. It is several miles in length, and in some places not more than a few score yards in breadth at the bottom, while the highest hills on either side reach an elevation of about 3000 ft . above sea-level. The mountains by which it is

## GLOMMEN

enclosed rise almost perpendicular from their base, and, trom their height, nearly exclude the sun, when at his highest elevation in June. In some parts they are entirely inaccessible. The N.W. end of the glen was the scene of the massacre of Glencoe, so well and widely known for its singular atrocity.-2, (Glencroe), co. Argyle, at the head of Loch Long; about 6 m . long, enclosed by lofty frowning mountains, the sides of which are covered with huge masses of rock. It is one of the wildest glens in the Highlands of Scotland, and ranks next to Glencoe in the rude grandeur of its scenery.3,(Glengarry), co. of, and 43 m . S.S.W. Inverness, traversed by the Garry, in the centre of the great valley extending from Inverness on the E. coast, to Fort-William on the W. It contains a beautiful lake, and is bounded by finely-wooded mountains.-4, (Glenlivet), co. of, and 36 m . S.S.W. Banff. It is utterly destitute of wood, but is celebrated for the quality of its whisky.-5, (Glenroy), co. of, and 25 m . S. by W. Inverness; celebrated for its 'Parallel Roads.' These roads consist of a series of perfectly level terraces, running parallel to each other on both sides, and throughout the whole length of the glen; the most elevated being 1262 ft . above sea-level; and the other two respectively 82 and 212 ft . below the highest. Opinion is much divided as to their origin, but they are pretty generally believed to be the margins of ancient lakes, or other enclosed bodies of water.-6, (Glenshee), N.E. extremity of Perthshire; about 7 m . long by nearly 1 m . wide. Near its head is the Spittal of Glenshee, a stage on the great military road to Fort-George, 20 m . N.N.W. Coupar-Angus.-7, (Glentilt), co. of, and 34 m. N.N.W. Perth, dist. Athole; a beautiful and romantic vale, famous as a sporting rendezvous, and for the stalking of red deer.

GLENANS, a group of islets, France, off S. coast, dep. Finistère. They are nine in number, and are surrounded by dangerous rocks and shoals. The largest, called Penfret, is about 2 m . in circuit, and has on it a revolving light; lat. $47^{\circ} 43^{\prime} 18^{\prime \prime}$ N.; lon. $3^{\circ} 57^{\prime}$ W. (r.)

GLENARM, a small tn. and port, Ireland, on bay of same name, co. of, and $20 \frac{1}{2} \mathrm{~m}$. N.N.E. Antrim, at the foot of a romantic glen. It has a neat Episcopal church, a R. Catholic chapel, and meeting-house; and during summer is much resorted to for sea-bathing; coals are imported from Scotland, and grain and provisions exported. Pop. 881.

GLENDALOUGH, a valley and lake, Ireland, co. Wicklow, 24 m . S. Dublin. The valley, 3 m . long, abounds with romantic scenery and interesting ruins. The lake, celebrated by Moore for its gloomy and desolate appearance, is 441 ft . above sea-level, 1 m . long by $\frac{1}{4} \mathrm{~m}$. broad, and surrounded by almost perpendicular mountains, which rise 1800 ft . above its surface.

GLENELG, several places, Anstralia:-1, A maritime tn. S. Australia, 6 m. S.W. Adelaide, on the Sturt.-2, One of the most N. cos. of W. Australia; about 50 m . E. to W.; containing some extensive open plains and downs, and in the W. part a group of hills called the Wongan hills. It is closely and heavily wooded in the N. parts, and occasionally hilly.-3, A river, Australia Felix, rising in the Victoria mountains, about lat. $37^{\circ} 10^{\prime}$ S.; lon. $142^{\circ} 15^{\prime}$ E.; flowing W. and S.S.W., and falling into Discovery Bay, about lat. $38^{\circ}$ S.; lon. $143^{\circ}$ E.; total course, direct distance, about 110 m . -4, A river N.W. Australia, Tasman Land, rising in a short line of hills called Stephen's Range, about lat. $16^{\circ}$ S. ; lon. $125^{\circ} 10^{\prime}$ E. It flows N.W., then W. and S., and falls into Doubtful Bay, winding its way through a billy district; whole length 60 to 70 m . It is salt for nearly half its length from the sea, and has in some parts a velocity of more than 5 m . an hour. Its banks are composed of fine white sand; its tributaries are numerous, and many of them large. In the upper parts it is much obstructed by rapids.

GLENGAD, a head promontory, N. coast of Ireland, co. Donegal, forming the W. point of Culdaff Bay, 24 m . N. by E. Londonderry.

GLENGARIFF Harbour, an inlet, Ireland, co. Cork, near the head of Bantry Bay; about 2 m . long and 1 m . wide.

GLENLUCE, a vil. Scotland, in a valley of same name, near Luce Bay, co. of, and $13 \frac{1}{2} \mathrm{~m}$. W.N.W. Wigtown. Cattle fairs are held here monthly between April and December. The ruins of the once magnificent abbey of Glenluce stand about $1 \frac{1}{2} \mathrm{~m}$. N.W. the village. Pop. 890.

GLENTWORTH, par. Eng. Lincoln; 2940 ac. Pop. 324. GLENN Magns, par. Eng. Leicester; 2510 ac. P. 833. GLENNIE IsLands, a cluster of small isls. S. coast Australia, in Bass Strait ; lat. $39^{\circ} 12^{\prime}$ S.; lon. $146^{\circ} 15^{\prime}$ E. (r.) GLENN'S Falls, a vil., U. States, New York, 1. bank Hudson, 54 m . N. Albany; with three churches, an academy, and a female seminary. The picturesque falls on the Hudson here have a total descent of 50 ft ., and afford excellent waterpower, propelling several saw and marble mills, \&c. P. 1800.

GLENTIES, a vil. Ireland, co. of, and 6 m . N.N.W. Donegal, among wild and rugged mountains. It has a chapel, a national school, a police barrack, and a large union workhouse. Pop. 317.

GLIN, a market tn . Ireland, co. of, and 29 m . W. by S . Limerick, l. bank Shannon, here about 3 m . broad. It consists of three principal streets, straight and well kept; houses not large, but solidly built of stone, and generally two stories high; supply of water ample; and, as a whole, is gradually improving. It has a bridewell, an Episcopal church, a R. Catholic chapel, and several schools, and the remains of the ancient castle of Glin. Glin is resorted to in summer for seabathing; and, being the depôt of the salnon tishery of the Shannon and its tributaries, a considerable quantity of that fish is annually pickled here and exported; and large quantities of butter are sent to Cork and Limerick. Market day, Saturday. Pop. (1841), 1208.-(Local Correspondent.)

GLinA, a tn. Austria, Croatia, in a plain surrounded by hills, r. bank Glina, near the E. shore of a marshy lake, 22 m . E.S.E. Carlstadt. It contains a Greek church, and two schools, and has important cattle markets. Pop. 1760.

GLINTON, par. Eng. Northampton; 1380 ac. P. 404.
GLOCKNER, or Gross Glockner, a mountain, Austria, on the frontiers of the Tyrol, Carinthia, and Salzburg; lat. $47^{\circ} 7^{\prime}$ N.; lon. $12^{\circ} 43^{\prime}$ E.; height $12,776 \mathrm{ft}$. It is the culminating point of the Noric Alps; is composed of schistous and calcareous rocks, but appears to have a nucleus of granite. It takes its name from the resemblance of the principal summit to a large bell. The ascent has been repeatedly accomplished, but is difficult, and not without danger.

GLOCKNITZ, or Gloganitz, a market tn. Lower Anstria, on the Schwarza and the Grätz Railway, $41 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Vienna. It has a handsome chureh, a castle picturesquely situated on a mountain, and originally a Benedictine monastery; manufactures of white lead, Prussian blue, and plateglass; two iron-mills, and two stone quarries. Pop. 1520.

GLOGAU (Gross), a tn. Prussia, prov. Silesia, gov. of, and 33 m. N. Liegnitz, cap. circle of same name, 1 . bank Oder. It is a place of considerable strength, being both surrounded by walls and otherwise fortified; is the seat of a law court and several public offices; contains four churches, one of them a large and ancient structure, formerly a cathedral; an old castle, a Protestant and a R. Catholic gymnasium, several other schools, an arsenal, artillery depôt, extensive barracks, and other military buildings; an infirmary, poorhouse, and several hospitals; and has manufactures of vinegar, liqueurs, sealing-wax, beet-root sugar, \&c.; dye-works, numerous mills, and some shipping trade. Pop. 15,326, of whom 3239 are military. - The circle is flat, watered by the Oder and several small streams; and is generally fertile, producing much corn, and rearing many cattle. Area, 276 geo. sq. m. Pop. 72,212
